A. Dennis Stachewicz and Bill Sanders had discussed the options on coming up with a new logo and thought the best way to go would be to keep the logo as it is. Changes may create conflict, money would be spent and it would be best to keep logo as is.

B. The Firearms Ordinance will be worked on, however, it is best to wait for the comprehensive plan to be approved prior to making any changes to this ordinance.

VIII. PLANNING DIRECTOR’S REPORT

August 4th is the comprehensive plan meeting

August 9th is the normally scheduled Planning Commission meeting

The County has supported the rezoning of the school property use/permit to be used as a church.

A request has been made for a potential fire arm range near the Gitchee Gumee Campground located on M-28.

IX. PUBLIC COMMENT – None.

X. COMMISSION COMMENT – None.

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Correspondence – Stachewicz to Racine
- B. Correspondence – Yelle to Wietek
- C. Correspondence – Maki to Planning commission
- D. Information – Zoning Board of Appeals Minutes – 06/23/05
- E. Information – Marquette Township Planning Commission Minutes – 05/11/05
- F. Publication – *The Impact of PA577 on Rezoning*s

XII. ADJOURNMENT. Mike LaPointe adjourned the meeting at 9:24 p.m.

Estelle DeVooght, Commission Secretary

Lori DeShambo, Recording Secretary

Charter Township of Chocolay
Planning Commission
Thursday, August 4, 2005
7:00 P.M.

- Present:** Mike LaPointe, Estelle DeVooght, Tom Shaw, Bill Sanders and Scott Emerson
- Absent:** Ken Tabor and Steve Kinnunen
- Staff:** Dennis Stachewicz, Jr. Director of Planning and Community Development
- Others:** Mark Wyckoff, Consultant; Debra Heinzelman, Recorder

I. PUBLIC HEARINGS

A. Comprehensive Plan Update

Bill Sanders called the public hearing to order at 7:03 p.m.. Sanders stated the purpose of the meeting was to consider revisions to the Comprehensive Plan. Sanders states they have been working on the Comprehensive Plan for 14 months, and have had 9 public meetings seeking public input. He asked if anybody at the meeting wished to make comment upon the proposed revisions and said that their questions would be addressed under “New Business” all at one time.

Dennis Stachewicz stated that draft chapters have been available for review at the Township Hall and on the Township web page.

Christine Burris of 108 Cindy Lane had concerns about Number 29 on the revision plan reference to new roads. She had concerns about roads going through private property and said that she did not want her property fronting a highway.

Lee Blondeau of 30 N. Traci Lane said he had concerns about zoning status for commercial properties within the Township.

John Smith of 2176 M28 stated he had several concerns about the proposed Comprehensive Plan, including that he felt it did not address rural commercial zoning, which he described as a situation where an individual has a large parcel of property that, through controlled development, could use a portion of that property for commercial usage. He felt that this could act as an “industrial incubator” for private enterprise.

Smith feels that the new contract zoning, passed by the State of Michigan, should be included in this Plan. He stated he was disturbed by the fact that the document appears to have been produced by .06 percent of the population and that this has the look of “the minority dictating to the majority again”.

Smith also feels that the Plan does not encourage business very much and it does not address existing problems for the businessman and believes this should be considered.

Additionally, Smith had concerns about certain terminology, i.e., “Bigfoot” and “View Shed”. Stated his biggest “bone of contention” was that we seem to lack any vision of how to better communicate in this Township. States bare minimum being done to publish these meetings and feels much greater effort should be made to communicate with the public on these issues.

Smith stated that the Plan failed to address a lot of important concerns and suggests that the Commission not rush into passing this Plan.

Cathy Peterson of 6341 US 41 S read her concerns for the Comprehensive Plan from a prepared statement and presented a copy to Bill Sanders, Planning Commission Chairman.

Ms. Peterson opposed the entire Plan and was concerned about its potential violation of property rights.

At 7:29 p.m., Bill Sanders closed the Public Hearing. States letters and phone calls will be made part of public record.

II. MEETING CALLED TO ORDER/ROLL CALL

Meeting called to order at 7:29 p.m.. Ken Tabor and Steve Kinnunen are not present.

III. APPROVAL OF THE MINUTES OF JULY 11, 2005 MEETING

Estelle DeVooght moved to approve the Minutes of the July 11, 2005 meeting with Scott Emerson supporting.

Aye: 5. Opposed: 0. Motion Approved.

IV. APPROVAL OF AGENDA/ADDITIONAL ITEMS FOR AGENDA

Bill Sanders moved to approve the Agenda for August 4, 2005 meeting with support from Scott Emerson.

Aye: 5. Opposed: 0. Agenda Approved.

V. PUBLIC COMMENT

Brian Muladore of 108 Cindy Lane expressed concerns over the proposed potential road in proximity to his property. He wished clarification on this road.

John Smith of 2176 M28 questioned the inactivity of the Planning Commission's Ordinance Review Committee. He further suggested that it add three at-large public members to its committee. Also, expressed concern regarding longevity with current serving Planning Commission members, stating that he would like to see a rotation of members on a more regular basis. Did not want his suggestion to be construed as being directed at any one commission member. Would like to see "new blood" on Planning Committee.

Cathy Peterson of 6341 US 41 S agreed with statements by John Smith concerning the longevity of current serving Planning Commissioners. She mentioned the longevity of Estelle DeVooght and that Bill Sanders has been serving since replacing his mother-in-law on the Committee. She referred to this process as a "Good Old Boy's Club", indicating it was time to end that practice.

Jude Catello spoke and offered her support for the Planning Commission, stating that they have been doing a fine job.

Cathy Peterson then stated she did not believe appointments to the Planning Commission were to be a life-long appointment.

No further comments being received, Bill Sanders closed the first public comment section.

VI. NEW BUSINESS

Dennis Stachewicz read into the record comments received, in writing, reference to the Comprehensive Plan and suggested revisions. Letter received

from the City of Marquette indicating the Plan was not in conflict with their Plan. Received correspondence from Senior Planner from the City of Marquette pointing out certain spelling and grammatical errors. Letter received from Chairman of the Marquette County Planning Commission stating they have reviewed the Plan and found it consistent with the County and surrounding municipality plans. Have letter from Central Lake Superior Watershed Partnership endorsing the Plan. Also, a letter from resident Dan Smith addressing three items in the Plan pertaining to transportation. A letter from CABA asking a question about the nonconforming use. A letter from MDOT, Supervisor Andy Sikkema, commenting on the transportation portion of the Plan.

Bill Sanders moved the discussion to the questions raised by citizens during public hearing and public comment. First items discussed were road issues.

Road issues were discussed in generality by Bill Sanders and Mark Wyckoff with an explanation for the need to plan for the Township's future road needs. Mark Wyckoff stated that this would serve as an important information source for potential investors and property purchases.

Mark Wyckoff proceeded to discuss questions related to nonconforming use status of businesses along US 41 and M28. He explained the difference between "nonconforming use" and "dimensional characteristics". Indicates the Plan addresses those differences and that there was no desire to propose a change in uses as permitted in the zoning ordinance along US 41 and M28.

Wyckoff addressed the comments referring to "rural commercial" areas, stating that this would not require a change to the zoning ordinance. Discussion offered on "home occupation", "home based businesses", and "conditional rezoning".

Wyckoff responded to the comment that the Plan was not "anti-business" and agreed it was not an "anti-business" plan. He responded to comments regarding unclear language in the Plan, i.e., "Bigfoot" and "View Shed", stating that these are common phrases in this arena of work.

Wyckoff responded to the statement from Cathy Peterson expressing his respect for her input to this process. He stated that most of her comments were philosophical in nature and difficult to address, but respects her right to exercise her rights as a citizen to express her points of view. He then stated that there is no statutory nor legal basis with respect to most of the observations that she made.

Wyckoff addressed Cathy Peterson's comments about roads following abandoned railroad grades, stating there were many factors to consider, including ownership need and acquisition. He addressed Cathy Peterson's observation about the density of one house per 20 acres and the impact it may have on 5 acre parcels. The Plan acknowledges that there would be a potential problem, but proposes that a solution exists through the zoning ordinance.

Wyckoff discussed the public comment regarding a specific road near Cindy Lane. He indicated this was a generalized location and that it may or may not actually be near Cindy Lane. He reported the importance of listing potential road sites in the proposed Plan to assist in decision making.

Wyckoff addressed comments regarding rotation of membership on the Planning Commission. He stated that membership on Planning Commission is by appointment of the Township Supervisor with the concurrence of the Township Board. There is no statutory obligation for rotation of membership.

Greg Seppanen stated that John made the observation that we did the least possible to inform the public of the process. Asked if that was true. Wyckoff

responded that the only requirement is one public hearing prior to adoption. There was town meeting prior and a town meeting after. Bill Sanders states there were several articles in The Mining Journal and local television exposure. Request for citizen input was also put into the Chocolay Quarterly; on the radio; and was on the website.

Additional comment on the road additions was made by Bill Sanders and Mark Wyckoff indicating that the idea was to create a better inter-connecting road system within the Harvey area and to address fire and safety access concerns.

Cathy Peterson had concern about the private roads in the Township meeting conformity with public roads. Bill Sanders responded that there is a thorough discussion about public/private roads within the Plan.

Sanders acknowledged that the Ordinance Review Committee had been purposely inactive, stating that they felt it best to wait until the Comprehensive Plan was completed and adopted.

Mike LaPointe stated there was a letter in their packet from CABA stating concerns over area businesses being listed as nonconforming use. Mark Wyckoff responded that the question being raised is a “use nonconformity”, but that the Plan not proposing anything to deal with or address those in terms of future zoning changes. There is a mechanism under the law to deal with this, i.e., Class A and Class B system classification of nonconforming uses.

Lee Blondeau commented regarding the definition of “nonconforming”. Felt that it was a burden upon the property owner to have to pursue a Class A designation for their property and that a more reasonable way should be found. Mark Wyckoff addressed the Plan and indicated that it addresses both commercial and residential properties. Bill Sanders commented that he felt the Planning Commission had been more than fair in the past with these issues and that with this Comprehensive Plan they now have a mechanism to deal with it.

Estelle DeVooght asked for an example of “conditional rezoning”. Mark Wyckoff responded that if an applicant agrees to a specific single use of that property and that the Township agrees no other permissible uses of the property would be pursued by the applicant. Estelle DeVooght asked, “How can you make that stand?” Mark Wyckoff responded that you can make it stand because the Michigan Legislature authorizes it. However, it’s unknown at this time whether the courts will accept it. Estelle DeVooght stated she believes that is unconstitutional.

Scott Emerson asked if there is a distinction between “nonconforming lot” and “nonconforming use”? Mark Wyckoff responded that the term “nonconforming use” pertains to both “use” and “dimensional” aspects. The problem with using the term “nonconforming lots” is that there is no court defined definition. It is considered a subcategory under “nonconforming use”.

Cathy Peterson commented on the Township’s actions against Tom Waslesky and his business as being nonconforming use. She disagreed with those actions. Bill Sanders stated that particular reference is a good example of the Township working with business owners to expand nonconforming uses. States we worked pretty good with the residents on that.

Bill Sanders commented upon the Plan believing it to be an excellent work and complimented all those who had a hand in this drafting. Scott Emerson also spoke in support of the Plan, indicating that it was a golden opportunity to get ahead of things and to learn from the mistakes of the past. Bill Sanders added that he believes this not a perfect document, but a fair and adequate compromise upon the issues.

Mark Wyckoff and Dennis Stachewicz proposed changes to the wording of the amendments.

1. Item Number 2. “Director of Planning and Research”. “Research” needs to be crossed out.
2. Item 34. It was recommended that “nonresidential” be deleted from the paragraph.
3. Item 35. The proposed spelling change for the word “compliments” with an “e” to an “i”. Actually, “e” is correct. So cross 35 off with no change.
4. Item 39. Language states, “...with regard to the ‘residential lot dimensions’”, that it’s referring to the entire Harvey corridor. Recommends “residential” be deleted.
5. Item 49. Because we deleted Amendment 35, there are actually only 48 Amendments to the Plan.

Bill Sanders makes Motion in the form of a Resolution for the Adoption of The Charter Township of Chocoday Comprehensive Plan.

“**Whereas** the Charter Township of Chocoday Planning Commission has supervised an update to the Charter Township of Chocoday **Comprehensive Plan** to replace the Plan adopted on June 18, 1990, and

Whereas the public provided input to development of the Plan via Town meetings on August 5, 2004 and May 12, 2005, and

Whereas the Charter Township of Chocoday Planning Commission has reviewed the draft Plan and provided comments for its refinement which have been incorporated into the Plan, and

Whereas the Charter Township of Chocoday Planning Commission has duly reviewed the joint plan and accepts it as a basic plan for the development of the Township pursuant to the authority of Act 168 of 1959 (known as the Township Planning Act), and

Whereas the Charter Township of Chocoday Planning Commission had conducted a duly advertised public hearing on August 4, 2005 to receive public comment on this Plan, and

Whereas a set of Plan amendments were presented at the hearing as a result of public comment, planning commission and governing body review over the last four months,

Now, therefore, be it resolved that Charter Township of Chocoday Planning Commission does hereby adopt, on the date listed below, the **Charter Township of Chocoday Comprehensive Plan** along with the amendments attached to the Minutes of the August 4th public hearing and does direct the Chairperson of the Township Planning Commission to deliver a copy of the adopted Plan to the Township Board and following their adoption, to the County Planning Commission along with this Resolution as certification of the adoption of the Plan,

Be it also resolved that this Resolution be published inside the back cover of each copy of the **Charter Township of Chocoday Comprehensive Plan** to certify that all maps, charts and descriptive and explanatory matter therein are a part of the Plan as so signified by the

signature of the Chairperson of the Charter Township of Chocolay Planning Commission on this Resolution.”

Bill Sanders asks if there is support. Supported by Estelle DeVooght. Mark Wyckoff notes there is some mistake on the fourth paragraph, second line. Should say “draft plan”.

Bill Sanders called a Roll Call Vote. Estelle DeVooght, “I vote for it. Yes.”. Bill Sanders, “Is an aye.” Mike LaPointe, “It’s an aye.” Scott Emerson, “Aye.” Tom Shaw, “Aye.”

Vote for Plan: Aye: 5. Opposed: 0.

VII. PUBLIC COMMENT

Cathy Peterson stated that this was a “cut and dry” situation and that nothing had changed.

John Smith clarified his statements that he in no way implied a “clean sweep” of the Board was needed. His suggestion was that rotation of positions in the future should be considered. He wanted to make it “crystal clear” his comments were not directed at any Board member in particular. It was a general observation only. He additionally wanted to make “crystal clear” that while the legal requirements for publicizing the meetings had been met, he felt there should be a greater effort to get the word out and get people involved.

VIII. COMMISSIONER COMMENT

Tom Shaw wanted to encourage more people to become more involved in the process and to attend meetings.

Bill Sanders wanted to clarify that it has been 14 years since on this Board. Thanked other Planning Commissioners here and ones not here. He appreciates being able to serve.

Mike LaPointe thanked the services of Mark Wyckoff in assisting in development of this Plan.

IX. ADJOURNMENT

Bill Sanders adjourned the meeting at 8:47 p.m.

Estelle DeVooght,
Commission Secretary

Debra Heinzelman, Recorder

Charter Township of Chocolay Planning Commission

Monday, August 8, 2005

7:30 P.M.

Present: Mike LaPointe, Estelle DeVooght, Scott Emerson, Ken Tabor, Bill Sanders and Steve Kinnunen

Absent: Tom Shaw

Staff: Dennis M. Stachewicz, Jr. (Director of Planning and Research), Lori DeShambo (Recording Secretary)

I. PUBLIC HEARINGS

1. Private Road #20- River Mist Trail

Meeting began at 7:30 p.m. wherein Bill Sanders explained what the public hearings all entail and asked Dennis Stachewicz to explain the request regarding private road #20. Mr. Sanders stated to the public gathered that anyone may speak and please state their name and address for the record.

Don Balmer of 101 Forest Road stated that his property abuts the property where the proposed road would be. Mr. Balmer explained that it was his understanding that this property was flood land and would not be granted a permit for septic system by the health department. He went on to say that if this flood land were land filled, what would happen to the homes downstream?

John Renfrew of 234 Riverside Road asked if variances would be granted to the flood plane and would there be set backs from the river bank.

It was at this time that Bill Sanders pointed out that he should have allowed the applicant to begin the public hearings with his own statement regarding his request and apologized for the inconvenience.

Stu Bennett of 1860 Altamont Street, Marquette stated that an architect had developed the four proposed lots and they had to have set back from the river. Stu agreed with Mr. Balmer that he was correct in his statement regarding building on these lots but he is not asking for a variance to build homes, he is asking for permission to create a private road. He pointed out that a cul-de-sac will adhere to the county requirements.

John Carlson of 274 Riverside Road commented on the fact that a survey was just conducted in July of 2005 wherein footage was changed to 66 feet.

Rod Smith of 286 Riverside Road stated that he had been assured by the real estate agent that he bought his home from that no one would build on these proposed lots because the health department would not allow any building there as they must have approval for septic fields and this is a flood area.

Gerald Waite of 278 Riverside Road stated that he and his wife have been in contact with Mr. Bennett and Mr. Buzzo and have been happy with the results of their conversations and the ability to resolve any confusion. However, he went on to ask why this would be a private road versus a public road, does the township master plan stipulate any particular use for this area? He pointed out dust and dirt generated from the road, many homes have bedrooms that face what would be the road thus the nuisance of lights and the fact that these lots are in low land and they flood.

Mary (name and address not recorded) Riverside Road built her home in 1964. She states that the road is a race track as it is now and adding more homes to the area would make it even busier. She doesn't want the white pines destroyed. Applicants are putting the "cart before the horse."

Joel McLaughlin of 282 Riverside addressed the Planning Commission by reading a citation, and then went on to say that some of the affected homes would now have three roads

surrounding their homes. If this private road is permitted, it will have a negative impact on Riverside Road. He asked if the Township were willing to provide compensation for the intrusion into their privacy and decreasing the value of their homes.

Don Hurst of 100 Forest Road asked if a private road requires ingress and egress for the fire department to have access to any proposed homes built. Another thought is why not sell the parcels of land to the people who have their back yards adjacent to the property to protect their homes and privacy.

Brian (name and address not recorded) Riverside, lot 14 – speed limit issue, adding traffic, more dogs barking in the neighborhood

2. Conditional Use #73 – Silver Creek School

Bill Sanders asked Dennis Stachewicz to address this issue. Dennis advised that the Faith Assembly of God has requested the Planning Commission to review a conditional use to operate a church, school and day care in an R-3 District under the terms of the zoning ordinance.

Bill Sanders advised those in attendance at this Planning Commission meeting that they may address the members about anything at this time as Public Hearings was still open. There were no questions or comments, thus Public Hearings was closed.

II. MEETING CALLED TO ORDER/ROLL CALL

Meeting called to order – Tom Shaw listed as absent.

III. APPROVAL OF THE MINUTES OF AUGUST 4, 2005 MEETING

These minutes were inadvertently placed on the Agenda when not available. Will be made available for the next meeting.

IV. APPROVAL OF AGENDA/ADDITIONAL ITEMS FOR AGENDA

Mike LaPointe Motioned and Scott Emerson Seconded to adjust the evening agenda to move the private road request to continue to be heard. Aye 6, any 0. Amendment to agenda approved.

V. PUBLIC COMMENT

VI. NEW BUSINESS

A. Consideration – Private Road #20

Stu Bennett advised that this road is the size it is because they are following the township ordinance. They have cut as few trees as possible and are trying to leave buffers. Property owners may purchase the lots behind their property. It is impossible to price a lot at this time because they need the private road first. The question has been asked why this road is not a public road versus a private road. It is his impression that the County does not want another public road to maintain, i.e.: plowing, sanding, etc.

The question regarding fire protection – this will be a cul-de-sac, therefore, allowing clearance for the fire department.

Larry Buzzo of P.O. Box 114, Big Bay, MI advised that with the initial survey of the property, they were careful to ensure 2500 feet to make allowances for septic fields, etc. They had the lots lined up with the existing lots and made it a priority to offer these lots to those who already own property abutting these lots. He stated this is a residential area and that he and Mr. Bennett are trying to accommodate the neighbors.

Bill Sanders now addressed the Planning Commission members and asked them if they had any comments, questions or concerns. Mr. Stachewicz stated that people were getting a head of themselves and that this request was *only* for a private road at this time. Potential builders on these lots would have to apply for a septic field, etc., later.

Mike LaPointe asked Dennis Stachewicz exactly where is the flood plane on the map which demonstrated the property in question. An existing building within the flood plane was identified.

Estelle DeVooght asked if there was a colored map available for review making it easier to mark the flood plane.

Bill Sanders stated that this is a private road request but it is for the purpose of building and that the requirements for a floodplain according to the DEQ and health department have not changed.

At this time there was discussion between members and the public regarding easements, stakes, monuments, markers that have been moved due to flood waters, set backs, lighting issues, question whether there actually is room per lot to build a home. Stu Bennett stated that the cul-de-sac has to be in the easement to be a Marquette County Road of which Bill Sanders asked Dennis Stachewicz asked is there is a construction requirement for a cul-de-sac. Mr. Stachewicz advised the Planning Commission that they may waive the construction requirement for a cul-de-sac but an easement must be provided. He also stated they have waived the requirement to construct before.

After much discussion, it was decided that there were many obstacles to overcome before homes could be built and that the Planning Commission should vote on the private road matter as that is what is being presented at this time, not what could happen in the future.

Dennis Stachewicz asked the chair, Bill Sanders, if he could lay out what conditions would have to be met which Mr. Sanders agreed should be read:

- 1) The applicants shall allow access to township vehicles as well as other public/private utility companies to provide services; and
- 2) A covenant shall be established on the deeds for any parcels created off from the private road identifying the private road status and which reference the Declaration of Private Road Easement which must be fully executed; and
- 3) The applicants shall pay for and install a road sign identifying the approved name of the private road at the intersection with Riverside Road. The name of the road shall be subject to approval by the Director of Planning And Community Development pending review by the Marquette County Central Dispatch; and
- 4) The applicants shall construct the southern curve on the private road in accordance with the comments provided by the Marquette County Road Commission; and
- 5) The applicants shall obtain a driveway permit from the Marquette County Road Commission; and
- 6) The applicants are required to provide certification from a surveyor/engineer that the private road standards of the Zoning ordinance have been achieved at the conclusion of construction; and
- 7) A zoning compliance permit shall not be issued until all of the above conditions are met; and
- 8) Land Division Approval is required from the Assessor for the creation of individual parcels off from the road and may require the modification of the lots as shown; and
- 9) The applicants shall comply with the conditions and requirements of all other agency regulations; and
- 10) The applicants shall obtain Marquette County Health Department review of well and septic considerations for the proposed lots prior to road construction.

Bill Sanders asked if the above helped at all – the lighting issue came up and was added to the conditions.

Scott Emerson Moved, Ken Tabor Seconded that after review of Private Road Request #20, the standards of Section 402.D of Ordinance 34; and the STAFF/FILE REVIEW – SITE DATA AND ANALYSIS, and subsequently finding compliance with the standards for approval of the private road request, the Planning Commission recommends approval to the Township Board with the following conditions (in this case the word “applicants” means Stu Bennett and Larry Buzzo):

- 1) The applicants shall allow access to township vehicles as well as other public/private utility companies to provide services; and

- 2) A covenant shall be established on the deeds for any parcels created off from the private road identifying the private road status and which reference the Declaration of Private Road Easement which must be fully executed; and
- 3) The applicants shall pay for and install a road sign identifying the approved name of the private road at the intersection with Riverside Road. The name of the road shall be subject to approval by the Director of Planning And Community Development pending review by the Marquette County Central Dispatch; and
- 4) The applicants shall construct the southern curve on the private road in accordance with the comments provided by the Marquette County Road Commission; and
- 5) The applicants shall obtain a driveway permit from the Marquette County Road Commission; and
- 6) The applicants are required to provide certification from a surveyor/engineer that the private road standards of the Zoning ordinance have been achieved at the conclusion of construction; and
- 7) A zoning compliance permit shall not be issued until all of the above conditions are met; and
- 8) Land Division Approval is required from the Assessor for the creation of individual parcels off from the road and may require the modification of the lots as shown; and
- 9) The applicants shall comply with the conditions and requirements of all other agency regulations; and
- 10) The applicants shall obtain Marquette County Health Department review of well and septic considerations for any proposed lots prior to road construction and
- 11) A covenant shall be on the deeds for any parcels created off from the private road mandating that all outside lights be downwardly directed to prevent light trespass on adjacent property.

Bill Sanders – any discussions? Like I said, all we are trying to do is respect the owner of that property and hopefully these conditions will alleviate the impact on the neighbors.
Aye 4, Nay 2. Motion Approved.

Bill Sanders asked Dennis Stachewicz if there were any mechanisms that could be used to keep people in that neighborhood apprised of developments. A listing was then signed by those in attendance who wish to be kept apprised of the situation and requested notification from the assessor.

Bill Sanders told the public in attendance that the Planning Commission meets every second Tuesday of the month and that the Zoning Board of Appeals meets every fourth Thursday of month. The public is encouraged to attend these meetings, thus apprised of developments in Chocolay Township.

A break was called at this time to allow residents in attendance to sign the listing regarding the private road issue and leave the building.

Meeting reconvened at 8:43 p.m.

B. Consideration – Conditional Use #73

Estelle DeVooght asked about the church being a daycare center.

Preston Tippen of 465 Silver Creek, #5, was in attendance at this meeting as the representative of the church. He advised that the daycare would care for children from infants to older children; whatever they were able to staff.

Estelle DeVooght asked if this daycare center would be open to the public or only available to members of the church. Mr. Preston advised the daycare would be open to the public. This will be a licensed daycare center.

Ken Tabor Moved, Bill Sanders Second, that after review of Conditional Use request #73, the STAFF/FILE REVIEW – SITE DATA AND ANALYSIS, section 204 of the Zoning Ordinance and subsequently finding compliance with the standards for approval of the request found in section 701 of the Zoning Ordinance, the Planning Commission approves Conditional Use request #73 with the following conditions:

1. The permit shall be subject to the property being rezoned from PL to R-3; and

2. The hours of operation for outdoor activity shall be limited to the hours of operation for the adjacent Township Recreating Area (Dawn to Dusk); and
 3. The permit shall be subject to review one year from the date of approval; and
 4. The applicant shall obtain a Zoning Compliance permit from the Zoning Administrator.
- Aye 6, Nay 0. Motion approved.

C. Consideration – Extension of Preliminary Plat for Elderwood subdivision

Bill Sanders explained that he would continue to chair the meeting; however, his employer was now involved with Mr. Elder. The Planning Commission members had no problem with keeping Mr. Sanders as chair.

Sam Elder of 125 E. Main Street explained that the former engineering firm that had been hired for the preliminary plat to the Elderwood subdivision had problems, thus Mr. Elder had lost time in preparation of this plat. He stated he has been working with people to develop the plat.

Mike LaPointe asked why the cul-de-sac's in this subdivision are not connected. Mr. Elder replied was to save the white pines located off of Ortman Road. He stated that people liked a quiet neighborhood. Talk of access to the subdivision was had via one access road; problems for the county to plow, sewer system is found in Old Ewing Park, any residence built would have township septic so they would have to build their own per home.

Bill Sanders remarked that he was not happy with the cul-de-sacs and that it puts out more traffic on the primary roads.

Mr. Elder remarked that he doubted he would be granted any further openings as Cherry Creek is busy enough as it is.

Scott Emerson suggested bike paths which would make it safe for children.

Dennis Stachewicz asked Sam Elder when to expect another set of plans and who was going to review the final plans? Someone needs to be appointed as quality control and review the plans.

Steve Kinnunen Moved and Ken Tabor Supported, to recommend that the Township Board approve a 1 year extension to the preliminary plat approval for the Elderwood Subdivision with the condition that a 30 foot easement for non-motorized use be established on the preliminary plat and the allow the Director of Planning and Community Development to have final approval of the revised plat drawings.

Bill Sanders clarified that the subdivision is called Elderwood and not Ewing.

Aye 6, Nay 0. Motion Approved.

D. Discussion – Comments on West Branch Comprehensive Plan

Dennis Stachewicz the West Branch Comprehensive Plan with the members. There was discussion about West Branch promoting highway corridor development and the inability to determine consistency with the Chocolay Township Comprehensive Plan because of no future land use or zoning map.

Steve Kinnunen remarked that with the base closed, they are in an infancy stage and he asked about their landfill.

Dennis Stachewicz stated he would compose a letter to West Branch that would reflect the Planning Commission discussion.

E. Discussion – MDOT Enhancement Grant for Harvey Corridor

Dennis Stachewicz stated that he met with MDOT and they want to help with the Harvey corridor to do some improvements in accordance with the recommendations in the new

Comprehensive Plan. They will pick up 20% of the cost with the township picking up 20%. All of this has to go before the Township Board to be approved.

Dennis Stachewicz asked the Planning Commission to create a wish list of ways to improve the corridor. Discussion was had regarding the possible corridor improvements.

VII. OLD BUSINESS

A. Discussion – Firearms Ordinance

Mr. Stachewicz suggested that the Planning Commissioners review the model ordinances he has provided and discuss at the next meeting. Options to be considered would be distance and zoning. The Planning Commission formed a consensus that using the distance model provided by the MTA would be the most appropriate.

VIII. PLANNING DIRECTOR’S REPORT

IX. PUBLIC COMMENT

X. COMMISSION COMMENT

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Correspondence – Supervisor to DNR
- B. Correspondence – Planning Commission to Supervisor Re: Tot Lot and Township Owned Signs
- C. Information – Marquette City Planning Commission Minutes 06/21/05 and 07/05/05
- D. Publication – *Planning and Zoning News*

XII. ADJOURNMENT. Bill Sanders adjourned the meeting at 9:45 p.m.

Estelle DeVooght, Commission Secretary

Lori DeShambo, Recording Secretary

(Recording Secretary)

I. MEETING CALLED TO ORDER/ROLL CALL

Meeting called to order – Tom Shaw and Mike LaPointe as listed as absent.

Tom Murray introduced to the Planning Commission Members. He is to replace Lee Snooks who has retired.

II. APPROVAL OF THE MINUTES OF AUGUST 4, 2005 MEETING and AUGUST 8, 2005 MEETING.

Estelle DeVooght moved to Approve the Minutes of August 4, 2005 with Scott Emerson supporting. Aye 5, Nay 0. Motion Approved.

Scott Emerson moved to Approve the Minutes of August 8, 2005 with Ken Tabor supporting. Aye 5, Nay 0. Motion Approved.

III. APPROVAL OF AGENDA/ADDITIONAL ITEMS FOR AGENDA

Bill Sanders moved to Approve the Agenda of September 13, 2005, Scott Emerson supporting. Aye 5, Nay 0. Motion Approved.

IV. PUBLIC COMMENT – None.

V. OLD BUSINESS

A. Discussion – Firearms Ordinance. Estelle DeVooght stated that the people of the Township are against this. Bill Sanders stated that it is a subject that needs to be reviewed. Dennis Stachewicz asked Estelle DeVooght if it was her thought to keep the ordinance as it is. Steve Kinnunen asked about illegal discharge of a firearm within certain residential areas.

Dennis Stachewicz asked if a questionnaire would be in line for this subject and listed a few questions, i.e.: map of restricted zones, notification of zones in the local newspaper, have a special work session where residents may attend with their input and get a clear consensus on what the people would want.

Estelle DeVooght asked Dennis Stachewicz if he thought a lot of people in the Township are interested in this subject? Dennis replied that there are several people who would like to be able to use firearms within the Township.

Steve Kinnunen pointed out that only one person was asking about the firearms ordinance.

Scott Emerson asked why bring up a problem?

Dennis Stachewicz advised that a complaint was lodged re: Gutchee Gumme Campground.

Ken Tabor thought this request was making a big deal out of nothing.

Dennis Stachewicz asked the Planning Commission Members if they would be interested in him writing a letter to the Board stating this subject has been researched and does not warrant further time or money.

Tom Murray mentioned whether the issue was safety related or noise related

Estelle DeVooght thought writing a letter to the Board was a good idea.

Steve Kinnunen pointed out that it is okay at this time to shoot on state land under certain conditions.

Bill Sanders pointed out that this issue was passed to the Planning Commission from the Zoning Board of Appeals. Is it time to send this on to the Board?

Dennis Stachewicz suggested that the Board be advised that the comprehensive plan has taken up much time in preparation. The firearms issue has now been reviewed and does not warrant further investigation.

It was agreed, Aye 5, Nay 0 that Dennis Stachewicz would apprise the Board in writing regarding the firearm ordinance.

- B. Discussion – Township Owned signs. Bill Sanders discussed with Dennis Stachewicz that the smaller signs of 2 feet x 4 feet a good idea. Dennis Stachewicz advised that the building materials have been researched and are relatively cheap. He asked the Planning Commission if a sign should be posted at/near Silver Creek Road of which it was decided it was not necessary.

Steve Kinnunen Moved, Ken Tabor Seconded, that the Charter Township of Chocoday Planning Commission recommends that the Charter Township of Chocoday Board consider purchasing and install four Township “Welcome” signs and two Township “Municipal Complex” signs in accordance with the following:

1. Sign design should be the same as presented to the Planning Commission at their September 12, 2005 meeting; and
2. Signs should be placed at the locations indicated on the map titled “Location of Proposed Township Owned Signs.” With the understanding that the corresponding road agencies may require an adjustment to the placement based on their permitting process; and
3. Recommended size of signs are 2 feet x 4 feet for the “Welcome” signs and 4 feet x 8 feet for the “Municipal Complex” signs.

Aye 5, Nay 0. Motion Approved.

VI. NEW BUSINESS

A. Discussion – Joint Recreation Survey with the City of Marquette. Dennis Stachewicz told the Planning Commission Members about the progress being made in the Joint Recreating Survey with the City of Marquette. The PC members discussed this briefly and how it would impact the Township.

VII. PLANNING DIRECTOR’S REPORT

Dennis Stachewicz again introduced Tom Murray who will be working on community development. Dennis also advised that Chocoday Township only received five (5) comprehensive plans and intended on requesting more. Dennis Stachewicz also advised that the Planning Commission would no longer accept hand drawn site plans and not complete plans. The ordinance states that site planed must be legitimate.

VIII. PUBLIC COMMENT - None

IX. COMMISSION COMMENT –

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Correspondence – Planning Commission to Holmes
- B. Correspondence – Stachewicz to Hiawatha Trails
- C. Correspondence – Yelle to Planning Commission

- D. Correspondence – Yelle to ZBA
- E. Information – Marquette Township Planning Commission Minutes 6/06/05, 6/25/05, 7/13/05, 7/19/05 and 8/10/05
- F. Publication – *Planning and Zoning News*

XI ADJOURNMENT. Bill Sanders adjourned the meeting at 8:04 p.m.

Estelle DeVoght, Commission Secretary

Lori DeShambo, Recording Secretary

**Charter Township of Chocolay
Planning Commission**

Monday, October 10, 2005
7:30 P.M.

Present: Estelle DeVooght, Bill Sanders, Mike LaPointe. Tom Shaw and Steve Kinnunen

Absent: Ken Tabor and Scott Emerson

Staff: Dennis M. Stachewicz, Jr. (Director of Planning and Community Development), Lori DeShambo (Recording Secretary)

I. PUBLIC HEARINGS

A. Private Road #21 – Keough – Springwood Trail.

There was no one wishing to address the Planning Commission.

II. MEETING CALLED TO ORDER/ROLL CALL

Meeting called to order by Bill Sanders at 7:30 p.m. Ken Tabor and Scott Emerson were noted as being absent.

III. APPROVAL OF THE MINUTES OF THE SEPTEMBER 12, 2005 MEETING

It was suggested that the following comment of Scott Emerson (Item V.A. Discussion – Firearms Ordinance) be stricken from the minutes because it is not an accurate statement of what he said: *Scott Emerson asked why bring up a problem?*

Estelle DeVooght Moved, Tom Shaw Second, to approve the minutes with the above referenced change. Aye 5, Nay 0. Motion approved.

IV. APPROVAL OF AGENDA/ADDITIONAL ITEMS FOR AGENDA

Bill Sanders asked to add a discussion regarding the 2006 Planning and Community Development Department budget recommendations under New Business.

Bill Sanders Moved, Mike LaPointe Second, to add 2006 budget recommendations to the agenda. Aye 5, Nay 0. Motion approved.

V. PUBLIC COMMENT

Mary Pat Linch of 367 Lakewood Lane asked about the development on Kawbawgam Road. Dennis Stachewicz advised that if the property that Ms. Linch is concerned about is property of Dr. English, he will have to come before the Planning Commission and he has not submitted any plans yet.

VI. OLD BUSINESS – None

VII. NEW BUSINESS

A. Consideration – Preliminary Review of Springwood Site Condominium

Eric Keough has requested approval for a site condominium and associated road located off Autumn Trail.

Dennis Stachewicz presented a staff analysis regarding the proposal. He stated that staff have several concerns. He said that the major concern is developing another cul-de-sac into the Wintergreen Trail area. He said this would increase the number of lots served by one access point to greater than twenty. He also referenced correspondence from the Township Fire and Police Departments.

Mr. Stachewicz also said the 100 year flood area is a concern and the proposed Unit #7 appears to be located in the flood area (Zone X). He reminded Planning Commissioners that the Comprehensive Plan discourages any development within designated flood areas.

Mr. Stachewicz indicated that the proposed Unit 1 did not appear to meet the minimum lot size requirements of the Zoning Ordinance.

Another concern of staff was with regards to ownership. Dennis said they would need something more than a letter from Dana Varvil to Eric Keough.

Mr. Stachewicz said the Assessor reviewed the boundaries and it appears that there may be a conflict with the ownership of the railroad right of way. He said there are no records indicating that adjoining property owners were deeded the property.

Planning Commissioners were given possible solutions by Mr. Stachewicz that included reconfiguring or eliminating Unit #7, connecting the proposed road to M-28, reconfigure or eliminate Unit #1, provide proof of ownership to the railroad grade, and provide a purchase agreement to indicate ownership interest in the entire property.

Eric Keough stated that there will only be five of his units served by a new cul-de-sac and he believes that Fire Department has good access to the subdivision. He also said he feels the FEMA map is flawed because Unit #7 has a higher elevation than other units.

Dennis Stachewicz suggested contacting Sheila Meyer of the DEQ at K.I. Sawyer regarding the floodplains. He said the Comprehensive Plan made an effort not to allow building like this anymore. What happened if Unit #7 floods, then floods to other property owners.

The abandoned railroad grade right of way is questionable – it runs all the way to Skandia. Eric Keough had a deed for property but not sure if the document is legal. Mr. Varvil has a deed for right of way for ½ of rail road, however, not sure if the deed is legal.

Glenn Van Neste, project planner, suggested they submit a letter of map amendment to FEMA in order to overcome the flood concerns for Unit #7.

Glenn stated it would be too expensive to build a road to 5 units. They could use the PUD process to approve Unit #1.

Estelle DeVooght asked at this time if the Planning Commission had any overlay maps of the Township to review. Dennis Stachewicz stated the map in the packet is the flood overlay map.

Estelle DeVooght advised Mr. Stachewicz that the Planning Commission in the past had gone directly to the site as Mr. Varvil wanted to sell this property before and it was under water. She also asked if the railroad grade is not available, how much of this is going to change.

Much discussion was had between Planning Commission members, Dennis Stachewicz, Eric Keough, and Glenn Van Neste regarding flood plains, railroad right of way, lot sizes, road access, highway usage, and adherence to the new Comprehensive Plan.

Bill Sanders asked Dennis Stachewicz what would happen if the PC were to approve this request tonight. Mr. Stachewicz stated the proposal would go to the Chocolay Township Board, if the Board okays then to other reviewers, back to the Planning Commission, and then to the Chocolay Township Board for a final approval.

Bill Sanders stated that the 1975 survey needs to be looked at because the proposed Unit #1 may be a lot of record.

It was stated that Attorney Graybill is working on the railroad issue which is possibly owned by Mr. Varvil.

Mike LaPointe Moved, Bill Sanders Second, that the Planning Commission recommends approval of the Preliminary Site Plan for the proposed Springwood site condominium and forwards it to the Township Board with the following conditions:

- 1) Unit #7 be reconfigured for in accordance with the new road location and a letter of map amendment be submitted to FEMA with a copy of an approval provided to staff; and
- 2) Unit #1 be reconfigured to meet the requirements of the Chocolay Township Zoning Ordinance or be eliminated, unless it can be determined to be a lot of record; and
- 3) Springwood Trail be required to connect to State Highway M-28 in order to protect the safety of future residents of the proposed condominium provided that the Michigan Department of Transportation would grant a permit; and
- 4) The developer shall submit a revised site plan to the Director of Planning and Community Development for review and approval in accordance with section 525(B) of the zoning ordinance and of the Planning Commission conditions prior to presenting the revised plan to the Township Board; and
- 5) The developer shall submit a signed copy of a purchase agreement or other legally binding document, to be reviewed and approved by the Chocolay Township Attorney that proves his interest in the property; and
- 6) The developer shall submit a copy of the deed which shows ownership to the centerline of the abandoned railroad grade; and
- 7) That the development comply with the submittal requirements of Section 525 of Zoning Ordinance 60 and Condominium Act 59 for the final Condominium Plans; and
- 8) If it can be determined that the developer owns the entire railroad grade, ½ of the grade shall be dedicated to general common element for non-motorized trail use.

The issue of legal deeds and documents was discussed. Mr. Stachewicz suggested that the Township Attorney review this matter as well as Attorney Graybill.

It was later agreed to eliminate item #6 and add to #5 – after legal binding document and before to be review and approved by the Chocolay Township Attorney that proves his interest in the property: and documentation showing ownership to centerline of the abandoned railroad grade.

Mike LaPointe restated the motion. Bill Sanders second.

Aye 4, Nay 1. Motion approved.

B. Consideration – Private Road Application #21

It was discussed and decided that a revised plan be drawn showing the road, having the Department of Transportation involved and have the applicant submit the changed site plan to the Director of Planning and Community Development who will ensure the changes referenced above have been made. He will then forward the application to the Township Board.

Bill Sanders Moved, Mike LaPointe Second, that after review of Private Road Request #21; the standards of Section 402.D of Ordinance 34; the and STAFF/FILE REVIEW – SITE DATA AND ANALYSIS, and subsequently finding compliance with the standards for approval of the private road request, the Planning Commission recommends approval to the Township Board with the following conditions (in this case the word “applicant” means Eric Keough):

- 1) Springwood Lane shall connect directly to M-28; and
- 2) The applicant shall allow access to township vehicles as well as other public/private utility companies to provide services; and
- 3) A covenant shall be established on the deeds for any parcel created off from the private road identifying the private road status and which reference the Declaration of Private Road Easement, which shall be amended to reflect the approved site plan for the Springwood Site Condominium and must be fully executed and reflected in the Master Deed for the Springwood Site Condominium; and

- 4) The applicants shall pay for and install a road sign identifying the approved name of the private road at the intersection with Autumn Trail and M-28;
- 5) The applicant shall obtain a driveway permit with MDOT as required
- 6) The applicants are required to provide certification for a surveyor/engineer that the private road standards of the Zoning Ordinance have been achieved at the conclusion of the construction, and
- 7) Site Condominium approval is required for the creation of individual parcels off from the road and may require the modification of the lots of Springwood Site Condominium; and
- 8) The applicants shall comply with the conditions and requirements of all other agency regulations; and
- 9) The applicants are encouraged to obtain Marquette County Health Department review of well and septic considerations for the proposed lots prior to road construction; and
- 10) A Zoning Compliance permit shall not be issued until all of the above conditions are met; and
- 11) The developer shall submit a revised site plan to the Director of Planning and Community Development for approval prior to presenting to the Township Board.

Aye 4, Nay 1. Motion approved.

C. Consideration – Arbor Day Mini Grant.

Mike LaPointe Moved, Estelle DeVooght Second, that the Chocolay Township Planning Commission hereby supports the enhancement of recreational facilities within the Township and, therefore, supports the application of a DNR Arbor Day Grant.

Aye 5, Nay 0. Motion approved.

D. Consideration -2004 Annual Report

Mike LaPointe Moved, Bill Sanders Second, to authorize the Director of Planning and Community Development to distribute the Year 2004 (Annual) Report to the Township Board as presented.

Aye 5, nay 0. Motion approved.

E. Consideration – 2006 Budget Recommendation

Dennis Stachewicz highlighted the proposed changes to the 2006 Planning and Community Development Department budget recommendations. He said he was proposing an increase of \$10 per meeting for Planning Commissioners and significant monies in Capital Improvements for consulting help with an updated Zoning Ordinance and upgrading the GIS system.

Estelle DeVooght asked what the \$3,000 in the current budget was for under Professional Services. Mr. Stachewicz said that money is used to cover additional unforeseen consulting costs.

Mr. Stachewicz believes the Zoning Administrator needs to be budgeted for more hours per week as he does not have enough time to meet the increasing number of zoning issues.

Bill Sanders Moved, Tom Shaw Second, to authorize the Director of Planning and Community Development to write a letter of support from the Planning Commission regarding the 2006 budget proposals.

Aye 5, Nay 0. Motion approved.

VIII. PLANNING DIRECTORS’S REPORT

Dennis Stachewicz advised that the legal site plan for the Walt Racine property has been located and his daughter is inquiring about opening a drive through coffee shop adjacent to his property.

IX. PUBLIC COMMENT

X. COMMISSIONER COMMENT

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

The next Planning Commission meeting is on October 31, 2005. There will not be a meeting in November.

The new restaurant in the Township has a "Pot Roast" sign on its roof. There is a very large hole in the driveway going to the Boy Scouts building that needs attention. Mr. Stachewicz is to look into these issues.

XII. ADJOURMENT

Bill Sanders adjourned the meeting at 9:17 p.m.

Estelle DeVoght, Commission Secretary

Lori DeShambo, Recording Secretary

**Charter Township of Chocolay
Planning Commission**

Monday, October 31, 2005
7:30 P.M.

Present: Estelle DeVooght, Bill Sanders, Mike LaPointe, Tom Shaw, and Ken Tabor

Absent: Steve Kinnunen and Scott Emerson

Staff: Dennis M. Stachewicz, Jr. (Director of Planning and Community Development),
Ginger Maki (Recording Secretary)

I. MEETING CALLED TO ORDER/ROLL CALL

Meeting called to order by Bill Sanders at 7:30 p.m.

II. APPROVAL OF THE MINUTES OF THE OCTOBER 10, 2005 MEETING

Mike LaPointe noted on page 3, the 9th paragraph, the motion should read, “*Mike LaPointe Moved, Bill Sanders Second, that the Planning Commission recommends approval of the Preliminary Site Plan for the proposed Springwood site condominium and forwards it to the Township Board...*”

Mike LaPointe also noted on page 4, the 3rd paragraph, the motion should read, “*Mike LaPointe restated the motion. Bill Sanders Second.*”

Ken Tabor Moved, Bill Sanders Second, to approve the minutes with the above referenced changes. Aye 5, Nay 0. Motion approved.

III. APPROVAL OF AGENDA/ADDITIONAL ITEMS FOR AGENDA

No additional items were added to the agenda.

Ken Tabor Moved, Mike LaPointe Second, to approve the agenda as presented.

IV. PUBLIC COMMENT

There was no public comment.

V. OLD BUSINESS

There was no old business for discussion.

VI. NEW BUSINESS

A. Presentation – Central Lake Superior Watershed Partnership Report

Larry Gould presented a report from the Central Lake Superior Watershed Partnership (CLSWP) as it pertained to Chocolay Township. He highlighted the areas in which the Partnership assisted Chocolay Township

Of interest, in 2005 the Chocolay Watershed was selected by the DEQ and the EPA as a 319 Watershed Project Success Story. The CLSWP has received a grant from the EPA for the new program to monitor many sites in the Upper Peninsula. The CLSWP will continue to assist the Chocolay Watershed Citizen Advisor Council who continue to identify areas of concern, comment on draft management plans and suggest areas for public education efforts.

The CLSWP also developed the Lake Superior Shoreviewer website (superiorwatersheds.org), which gives a user-friendly oblique aerial view of the entire Lake Superior shoreline of Chocolay Township.

Lastly, the CLSWP conducted the Earthkeeper Household Hazardous Waste Collection with local churches. They also assisted with the sediment trap maintenance on Chocoday River upstream of Chocoday Township by providing environmental benefits downstream. The Partnership will continue to implement other watershed improvement throughout the watershed with indirect benefits for Chocoday Township.

Mike LaPointe questioned whether the M-28 access site is still going to be a possible work site? Larry noted that it would be included on the spring list barring any problems with the property owners.

Mike LaPointe also questioned the whether there was a grant received to collect hazardous wastes from business, as he noted he heard something on TV6 regarding this issue. Larry noted the CLSWP has applied for a grant to collect mercury from dentist offices. Carl Lindquist did meet with the Dentist Associations regarding this and the collection process was approved.

Mike LaPointe commented that he did review the website with the aerial view of the Chocoday Township shoreline.

Bill Sanders questioned whether not the CLSWP needed help or support from Chocoday Township to implement any of the plans for the upcoming year? Larry noted that due to less staff that the Chocoday Watershed Council may need more local support to help things along in the township.

Dennis Stachewicz noted that \$5000.00 has been budgeted for the CLSWP in the coming year and will be reviewed at the next Board meeting in November.

B. Consideration – Annual Road Rankings

The Planning Commission reviewed the Annual Road Rankings list.

Dennis Stachewicz noted the addition of #14 (Wildwood/Woodvale) to the list, as the road is in very bad shape starting at Ortman Road to the “s” curve toward Woodvale. It seems to be deteriorating quickly. He also noted that #17 (Co. Rd. 454) is on the list and the County Road Commission’s cost is extremely high and Chocoday would cover a certain percentage while West Branch would cover their portion of the cost.

Larry Gould questioned whether or not Co. Road 545 was considered a primary county road and if so, the share of 50% is only for secondary roads. He also noted that Cherry Creek had no local match. Tom Shaw requested Dennis Stachewicz investigate the cost for Chocoday Township, as this may change the ranking of this road.

Dennis Stachewicz noted that #2 on the list (Terrace west of US 41) would be the next realistic project for the township.

Bill Sanders Moved, Ken Tabor Second, to approve the staff’s recommendations for road rankings and pass it on to the Township Board for consideration. Aye 5, Nay 0. Motion approved.

VII. PLANNING DIRECTOR’S REPORT

Dennis Stachewicz reported that he met with Dr. English’s architect/representative on the proposed development on Kawbawgam Road. The proposal was not felt appropriate to bring to the Planning Commission for review at this time.

The Township Board will review the Budget next Monday. Unfortunately, the supervisor did not recommend a \$10.00 raise for the Planning Commission at this time.

Randy Yelle will be addressing the “Pot Roast” sign.

The Boy Scouts called regarding a pot hole and they were given the phone number for MDOT and encouraged to call them so they can come out and investigate.

VIII. PUBLIC COMMENT

There was no public comment.

IX. COMMISSIONER COMMENT

Estelle DeVooght noted that she was upset regarding the rezoning for Van Neste and Keough at the last meeting. She felt it was unfair to hand it over to the staff. She stated this is the purpose of the Planning Commission and it should be hashed out at the meeting. Bill Sanders disagreed and felt the Planning Commission did their job regarding the zoning for Van Neste and Keough.

Bill Sanders noted that the Planning Commission should start looking at some of the key priorities for the next five years in the Comprehensive Plan for Chocolay Township. One of the items that would need reviewing is the private road requirements. The Planning Commission agreed.

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

A. Information – Marquette Township Planning Commission

There was no comment regarding the minutes.

B. Publication – *Planning and Zoning News*

There was no comment regarding the publication.

The next Planning Commission meeting is scheduled for Monday, December 5, 2005. There will be no meeting in November.

XII. ADJOURNMENT

Bill Sanders adjourned the meeting at 8:20 p.m.

Respectfully submitted:

Estelle DeVooght, Commission Secretary

Ginger Maki, Recording

**Charter Township of Chocolay
Planning Commission**

Monday, December 5, 2005
7:30 P.M.

Present: Estelle DeVooght, Bill Sanders, Tom Shaw, Ken Tabor and Scott Emerson

Absent: Mike LaPointe and Steve Kinnunen

Staff: Dennis M. Stachewicz, Jr. (Director of Planning and Research), Lori DeShambo (Recording Secretary)

I. MEETING CALLED TO ORDER/ROLL CALL

Meeting called to order at 7:30 by Bill Sanders.

II. APPROVAL OF THE MINUTES OF THE OCTOBER 31, 2005 MEETING

Motion by Ken Tabor, Seconded by Estelle DeVooght to approve the minutes of the October 31, 2005 meeting. Aye 5, Nay 0. Motion approved.

III. APPROVAL OF AGENDA/ADDITIONAL ITEMS FOR AGENDA

Motion by Scott Emerson, Seconded by Ken Tabor for approval of the agenda for the December 5th, 2005 agenda. Aye 5, Nay 0. Motion approved.

IV. PUBLIC COMMENT

Mark Maki - 370 Karen Road, voiced his concerns over the following issues:

- A. Proposed PUD – Dr. English property – he has not been provided with enough information/township paperwork – he states that the English property can not be a PUD.
- B. Lakenen signs on M-28 – Still in violation, nothing being don.
- C. Waselesky junk yard
- D. He has submitted a Freedom of Information Act request which is being ignored.
- E. He was told by Michele Wietek of the Zoning Board of Appeals that she “thought” he was not allowed to attend township meetings.

Public Comment closed.

V. OLD BUSINESS

There was no old business for discussion.

VI. NEW BUSINESS

A. Discussion – proposed PUD – Dr. English Property.

A lengthy discussion was held between Dr. English, Glenn Van Neste (surveyor), Richard Graybill (attorney), Jim Clark, Dennis Stachewicz and the Planning Commission. This discussion was called a preliminary meeting at to what the developer will need to do to achieve its goals. The development team was at this meeting to present their concept of what this new development would all entail and looked to the Commissioners for their input.

Many issues were discussed as to the formation of a “clustered” style subdivision off of Kawbawgam road.

The Planning Commission made it quite clear that there were many things that needed to be accomplished before the project could even be presented to the Commission for a PUD permit.

Mark Maki - 370 Karen Road, wanted it stated that the developer must be rezoned before applying for a PUD.

Many drawings, sketches, aerial views and stages of development were provided to the Planning Commission. Mr. Van Neste was quite thorough when explaining the development concept.

Scott Emerson and Bill Sanders voiced their opinions that they liked what they initially saw in the preliminary development stages and final outcome.

Dr. English pointed out that this preliminary plan is very close to what the Township wants per the comprehensive plan.

Dennis Stachewicz advised the Planning Commissioners what the next steps in the process would be.

Dr. English and his planning team offered conditions for the potential rezoning of the property including a promise to subsequently rezone the property to PUD. Mr. Stachewicz advised the Planning Commission that he would discuss that matter with the Township Attorney.

B. Discussion – Comprehensive Plan Implementation

Dennis Stachewicz referred to his November 28, 2005 memo where he has listed items taken from the Comprehensive Plan that the Commissioners should begin working on. It was decided that a few of the items on this list could be dovetailed into one project. It was suggested that consideration be given to form a Recreation Committee again.

Between Mr. Stachewicz and the Planning Commission, the following six items were decided to begin working on:

1. Update the Township Zoning Ordinance
2. Adopt Access Management Regulations for the US-41/M-28 Corridor
3. Develop a Township Greenspace and Trails Plan
4. Develop and Ordinance Amendment to Require Public Roads in New Developments of a Certain Density
5. Create and Distribute Commercial Development Guidelines
6. Revise the Subdivision Ordinance

C. Consideration – Support Letter for MDOT/Township Enhancement Grant

Dennis Stachewicz discussed with the Commissioners the need for a letter of Support to be sent regarding MDOT/Township Corridor Enhancement Grant.

Ken Tabor Motioned with Tom Shaw Seconding that a letter be sent. Aye 5, Nay 0. Motion approved.

William Sanders signed this letter at the meeting.

D. Consideration – 2006 Planning/Zoning Fees Recommendation

Dennis Stachewicz did a study regarding the cost of providing zoning/planning applications review services over the past year and found that the fees were lower than cost. He provided the Planning Commission with a proposed listing of fee increases.

The Planning Commission listened as Mr. Stachewicz pointed out the increase to run an ad in the local newspaper, the cost of mailing, the labor cost for mass mailing, the comprehensive plan cost. Scott Emerson was excused from the meeting to attend work.

Mr. Stachewicz stated it looked like a huge increase but there had been no increases in some fees for years.

Mark Maki - 370 Karen Road, spoke up at this time and stated that if the fees are increased, the Planning Commissioners should be ashamed of themselves. The fees will have tripled in three years if you take Mr. Stachewicz's suggestion. He said he did not raise any zoning or planning fees for 20 years.

Bill Sanders pointed out that increases are state wide.

Tom Shaw wanted to know how do these fees compare to other township fees?

Ken Tabor Motioned and Tom Shaw seconded that the Charter Township of Chocoday Planning Commission recommends that the Charter Township of Chocoday Board adopt the 2006 Recommended Zoning and planning Fees as presented by staff. Aye 4, Nay 0. Motion approved.

VII. PLANNING DIRECTORS'S REPORT

Mr. Stachewicz had nothing for the Commissioners at this time other than the fact that he will check with other townships regarding their fees and begin work on the list of 6 items from the Comprehensive Plan. He referred to the information handouts; item A which is the meeting dates for 2006 and it was agreed that the dates presented are fine.

VIII. PUBLIC COMMENT

Mark Maki again stated the fees should not be increased. He referred to keeping the Comprehensive Plan current and that the Township wasted money to update this.

IX. COMMISSIONER COMMENT

There were no Commissioner comments.

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Information – 2006 Township Meeting Dates (Handout)
- B. Information – MDEQ Biological Survey of Chocoday Tributaries
- C. Information – Marquette City Planning Commission Minutes 10/18/05
and 11/01/05
- D. Correspondence – Mark Maki to Planning Commission

XI. ADJOURMENT

Bill Sanders adjourned the meeting at 9:33 p.m.

Estelle DeVooght, Commission Secretary

Lori DeShambo, Recording Secretary

**Charter Township of Chocolay
Planning Commission**

January 09, 2006

7:30 P.M.

Present: Estelle DeVooght, Bill Sanders, Mike LaPointe. Tom Shaw, Steve Kinnunen, Ken Tabor and Scott Emerson (arrived late).

Absent: None

Staff: Dennis M. Stachewicz, Jr. (Director of Planning and Community Development), Lori DeShambo (Recording Secretary)

I. MEETING CALLED TO ORDER/ROLL CALL

Meeting called to order by Bill Sanders at 7:30 p.m. (Scott Emerson arrived during VI).

II. APPROVAL OF THE MINUTES OF THE December 5, 2005 MEETING

Ken Tabor Motioned, Estelle DeVooght Seconded to approve the minutes. Aye 6, Nay 0. Minutes approved.

Bill Sanders asked that minor revisions be added to VI. New Business A. Discussion of proposed PUD – Dr. English Property. Mr. Stachewicz remarked that he would see that these minor changes were made.

III. APPROVAL OF AGENDA/ADDITIONAL ITEMS FOR AGENDA

Steve Kinnunen Motioned, Ken Tabor Seconded to approve the agenda. Aye 6, Nay 0. Agenda approved.

IV. PUBLIC COMMENT – None

V. OLD BUSINESS – None

VI. NEW BUSINESS

A. Discussion – RFP for Consulting Services – Zoning Ordinance Update

Bill Sanders asked Dennis Stachewicz if he had anything to add to what has already been provided to the Planning Commissioners. He responded that he had highlighted in the Commissioner’s packets what he felt needed to be addressed first. There is a budget set in place of \$14,000.00.

Mr. Stachewicz asked for input from the Commissioners and Steve Kinnunen asked what the time frame was for completion. Mr. Stachewicz stated one year or less. It was said by other Commissioners that with a \$14,000.00 budget, this shouldn’t take long.

Bill Sanders asked if on the project work task page, on page 4, change the word to deliverables rather than products; the same for page 7.

Mr. Stachewicz pointed out that we are just looking or an update and not a new product. He suggested that a joint meeting be held with the Chocolay Township Board so they know what the Planning Commission is doing.

There was discussion between Mr. Stachewicz and the Planning Commissioners as to when this meeting should be scheduled, who should attend. Many dates were tossed around. The Board meets on January 19, 2006 and Mr. Stachewicz will be adding the PC comments to their agenda. Only 1-2 commissioners need to be in attendance at this meeting. Mr. Stachewicz will do a formal letter to the Board.

B. Discussion – US-41/M-28 Corridor Grant Application

Bill Sanders stated that he had signed a letter regarding the grant and advised Mr. Stachewicz that this may require a special public meeting for discussion. The community should be involved as there are going to be many changes being proposed. An informational flyer could be sent to all corridor businesses advising of the meeting so they may attend.

Mr. Stachewicz stated that MDOT has verbally agreed to help pay for the corridor renovation.

Tom Shaw remarked that the Chocolay Area Business Association newspaper will be out in two weeks – this public meeting could be posted in the newspaper as well.

It was decided that the public meeting would take place on March 9th, 2006 at 7:00 p.m. at the Chocolay Township Hall.

VII. PLANNING DIRECTOR'S REPORT – None.

VIII. PUBLIC COMMENT – None.

IX. INFORMATIONAL ITEMS AND CORRESPONDENCE

Estelle DeVooght asked about the Michigan Planner publication she had and questioned the takings issue.

Mr. Stachewicz asked to go back to VII – Director's report as there has been discussion regarding the Magnum Farm (Department of Corrections/State of Michigan) and the possibility of Marquette County housing work release prisoners there. The Zoning Administrator, Randy Yelle, is looking into this issue.

Steve Kinnunen stated there is nothing in the new Comprehensive Plan that addresses the agricultural farm on Magnum Road owned by the Department of Corrections.

Mike LaPointe informed the Planning Commission that he gave Greg Seppanen a letter of resignation. Mr. LaPointe has far too many commitments at this time and is traveling extensively and, therefore, made the decision to leave the Commission. He has served on the Commission for the past 14 years and this will be his last meeting.

The Planning Commissioners thanked him for his time and expertise and he was told he would be missed.

The Faith Assembly of God Church (Prince of Peace) located on M-28 is now empty as the Church purchased the old Silver Creek School. The restaurant Memories has shown an interest in the building for the use as a banquet hall and has applied for a rezoning to PUD. This rezoning request will be discussed at the next Planning Commission meeting.

The sale of property to the Naterra Land Company was discussed and there was additional discussion about how a large property sale like that can alter a landscape if there is no long range planning at a local level.

Scott Emerson asked Mr. Stachewicz if there was anything to add/update regarding the casino move from Kawbawgam Road to the former airport in Negaunee. Discussion was had as to what the old casino building could be used for.

Mr. Stachewicz informed the Planning Commissioners that Mr. Albert Denton has presented a request in writing to replace Mike LaPointe on the PC Board. He currently is on the Zoning Board of Appeals. This letter will go to the Supervisor for approval. As far as the present Planning Commissioners, they would welcome Mr. Denton to the Board.

X. ADJOURNMENT

Bill Sanders adjourned the meeting at 8:33 p.m.

Estelle DeVooght, Commission Secretary

Lori DeShambo, Recording Secretary

**Charter Township of Chocolay
Planning Commission**

Monday, February 13, 2006
7:30 P.M.

Present: Estelle DeVooght, Bill Sanders, Mike LaPointe, Tom Shaw, Steve Kinnunen, Albert Denton, and Ken Tabor

Absent: Scott Emerson

Staff: Dennis M. Stachewicz, Jr. (Director of Planning and Community Development),
Ginger Maki (Recording Secretary)

I. MEETING CALLED TO ORDER/ROLL CALL

Meeting called to order by Bill Sanders at 7:30 p.m.

II. PUBLIC HEARINGS/COMMENT

A. Rezoning #132 – Faith Assembly – R-1 to P.U.D. – Bill Sanders noted this agenda item had been temporarily withdrawn by the applicant.

Bill Sanders invited the public to give comments on the two agenda items that are going to be discussed by the Board this evening. The public was asked to give their name and address and limit comments to three minutes. After public comment, each of the above items will be discussed under New Business and decision will be made at that time.

B. Rezoning #133 – JSN Properties – C-2/R-1 to R-3

Dennis Stachewicz gave background on the Rezoning #133 – JSN Properties. This is a request for rezoning of 1.56 acres of land on the corner of US 41 and W. Main Street from a combination of R-1/C-2 (Residential/Commercial) to R-3 (Residential). JSN Properties would like to build detached single-family dwellings on this property.

Dan Diloreto, 301 W. Main, Marquette, MI, questioned what would be allowed under the R-3 zoning. Dennis noted it would be zoned for multi-family dwellings.

Mark Maki, 370 Karen Road, Marquette, MI, asked for clarification on whether or not R-3 zoning allowed clinic. Dennis Stachewicz read the R-3 zoning clarification usage. He also noted that clinics would be allowed on the approval of the Planning Commission.

Dan Keller, 117 Plateau, Negaunee, MI, introduced himself at the representative of the buyers of the parcel of land in question and gave an overview of what the buyers would like to build on the property. They would like to build 12-14 condominiums units with privacy fences.

There was no other comment on the Rezoning #133 and public comment was closed.

C. C.U.P. #74 – Hiawatha Trails – Snowmobile Trail

Dennis Stachewicz gave background on the C.U.P. #74 – Hiawatha Trails – Snowmobile Trail. This is a request a conditional use permit to construct/open a snowmobile trail in an R-1 zoning district located at 225 W. Main and 204 Hotel Place in Chocolay Township.

Cheryl Moore, 111 Green Bay, Marquette, MI, read a letter on behalf of Mr. and Mrs. Perkins noting their concern about the trail and that they oppose the opening of the trail due to the traffic through the parking lot at Hotel Place.

Steve, 203 Hotel Place, Marquette, MI, expressed his concerns about the application for the trail by Mr. Diloreto. He also noted he opposes the trail. He gave the Board eight letters from other residents from Hotel Place who oppose the trail. (See attached).

Lee Blondeau, 30 N. Tracie Lane, Marquette, MI, noted he was in favor of the trail opening for better access to the Harvey area.

Dave Thomas, 311 W. Main, Marquette, MI, noted he was in favor of the trail opening for better access to the business district in Chocolay Township.

Joe Holman, 210 Riverside Drive, Marquette, MI, commended the Board for their looking at new ways to open up Chocolay Township business to the snowmobilers. He has talked with representatives in Lansing who are working to put in a business route for the snowmobilers and feels that if this trail were opened it would undermine Lansing's efforts. He is not in favor of opening this trail through a residential area.

Don Britton, 121 Deerview Trail, Marquette, MI, noted that the reason for the request for this trail is to create better access to the businesses in Chocolay Township.

Dan Diloreto, 301 W. Main, Marquette, MI, clarified the construction of the trail. This is a path that is already on his property and no construction is necessary. He would just be opening it up for snowmobilers to gain better access to the businesses in Chocolay Township. No construction or grooming would be involved with the opening of the trail.

Jerry Ojibway, 161 Lakewood Lane, Marquette, MI, noted he was concerned about the eagle's nest that is on this property and felt the nest would be disturbed by the snowmobiles. He opposes the opening of the trail.

Alma Thomas, 311 W. Main, Marquette, MI, noted that eagles do not use their nests in the winter and the snowmobile season would affect the eagles in the area. She feels there is too much confusion for the snowmobilers right now trying to gain access to the business area of Chocolay Township and would like to see the trail open.

Erma, 210 Riverside Road, Marquette, MI, requested that the Planning Commission deny the request to open the trail.

Tony Lambert, 271 Riverside Road, Marquette, MI, feels the trail on Green Bay is hazardous and would like to see an alternate route outside the residential area.

Tristen McGill, 312 Michigan, Marquette, MI, commented that snowmobiles impact the ecosystem and the discussion regarding the trails has becoming too emotional.

Cheryl Moore, 111 Green Bay, Marquette, MI, commented that the snowmobile issues in regard to trail are not exaggerated and feels the trail near her residence is very hazardous. She also feels that when the snowmobilers use Green Bay Street they become more cautious because they are on a road.

Dan Diloreto, 301 W. Main, Marquette, MI, clarified that he did not request this trail. Hiawatha Trails approached him to open up this path and he agreed because he thought it was a good idea. He also clarified that the eagles nest around the 2nd week of April and by that time there is no longer any snowmobiling. The problems for the eagles are not the snowmobilers but the people that walk through his property and disturb the nest.

Joe Holman, 210 Riverside Drive, Marquette, MI, noted he researched some previous Planning Commission minutes from 7/10/2000 where the conditional use #74 – North Country Trails was approved as a non-motorized. He noted the State took that approval away and made the trail motorized. He feels the Planning Commission should be consistent with the Township purpose.

Bill Sanders read the letters present by Steve from the residents of Hotel Place and Bayou Street. All letters opposed the opening of the trail.
(See attached).

Dennis Stachewicz read a phone-in comment from Linda Walker, 103 Lakewood Lane, Marquette, MI. She is in favor of the opening of the snowmobile trail.

There was no other public comment on C.U.P. #74 and public comment was closed.

III. APPROVAL OF THE MINUTES OF THE JANUARY 6, 2006 MEETING

Estelle DeVooght motioned, Albert Denton seconded, to approve the minutes. Aye 6, Nay 0. The motion carried.

IV. APPROVAL OF AGENDA/ADDITIONAL ITEMS FOR AGENDA

Item A under New Business was taken out of the agenda.

Bill Sanders motioned, Steve Kinnunen seconded, to approve the agenda as revised. Aye 6, Nay 0. The motion carried.

V. PUBLIC COMMENT

Bill Sanders asked for any public comment and keep the comments to a maximum of 3 minutes.

Joe Holman, 210 Riverside, Marquette, MI, addressed a request from one of his neighbors regarding the loud noise of the snowmobiles. Due to the noise of the snowmobiles she often sleeps in the basement. He also noted that a number of people on the trail are also having trouble with asthma due to the snowmobiles. He urged the township not to change their position on a non-motorized trail.

There was not other public comment and public comment was closed.

VI. OLD BUSINESS

There was no old business for discussion.

VII. NEW BUSINESS

A. Rezoning #133 – JSN Properties

The Planning Commission reviewed the overhead presented by Dennis Stachewicz. Dennis then read the staff comments concerning the rezoning. (See page 20, VII B). The rezoning is consistent with the intent of the Comprehensive Plan; the rezoning will allow the parcels involved to act as a transition area that will prevent encroachment of a commercial zoning district into an established residential area; It is likely the rezoning will allow for more flexibility to access management in order to preserve the integrity of US-41/M-28; the current zoning or the parcels if preventing the property owner from reasonable use of the parcels due to the split zoning and small parcel size; and there is existing sewer service available for the development.

Steve Kinnunen Moved Ken Tabor Second, that following the review of Rezoning Request #133, and the Staff/File Review, and holding a public hearing, the Planning Commission recommends that the Township Board APPROVE Rezoning request #133 for the following reasons:

1. The rezoning is consistent with the intent of the Comprehensive Plan;
2. The rezoning will allow the parcels involved to act as a transition area that will prevent encroachment of a commercial zoning district into an established residential area;
3. It is likely the rezoning will allow for more flexibility in access management in order to preserve the integrity of US-41/M-28;

4. The current zoning or the parcels is preventing the property owner from reasonable use of the parcels due to split zoning and small parcel size; and
5. There is existing sewer service available for the development

Aye 5, Nay 1. The motion carried

B. C.U.P. #74 – Hiawatha Trails – Snowmobile Trail

Bill Sanders asked Don Britton if he would like to comment on the request. Don Britton had no comments.

Dennis Stachewicz answered the four questions that were asked during public comment:

1. The Perkins letter asked for the exact location and Dennis reviewed on the map where the trail would be located.
2. There was a question about this area being considered by the MDEQ as wetland. Dennis noted that he was not aware of this issue and that could be consideration of approval.
3. There was a question as to whether or not the application for the C.U.P. was incomplete. Dennis noted that any questions that were answered with “NA” (not applicable) are concerned not necessary.
4. There was a question as to whether or not there was an error in the address on the notification sent out by the township to Hotel Place. The address on record is 204 Hotel Place and that is where the notification was sent.

Dennis Stachewicz strongly encouraged the Planning Commission review the General Standards under the Basis of Determination for a conditional use permit. All standards must be met in order to grant a conditional use permit.

After review of the General Standards, the Planning Commission felt they could not approve the snowmobile trail at this time because it does not comply with all of the standards.

Albert Denton Moved, Ken Tabor Second, that after review of Conditional Use request #74, the STAFF/FILE REVIEW – SITE DATA AND ANALYSIS, Sections 202, 217 and 701 of the Zoning Ordinance, and holding a public hearing, the Planning Commission denies Conditional Use request #74 for the following reason:

1. The proposed trail does not substantially comply with all of the General Standards outlined in Section 701 of the Zoning Ordinance.

Aye 6, Nay 0. The motion carried.

VIII. PLANNING DIRECTOR’S REPORT

The MDOT Corridor Agreement meeting has to be changed from March 9th to March 16th at 7:00 p.m. because Andy Sicamma cannot make the earlier meeting. Mailings will be sent out to all residents along the corridor. This meeting is with MDOT to discuss the grant for the corridor through Chocolay Township. Bill Sanders noted that public support will be needed for this project.

RFP schedule was sent out on February 1, 2006. People were given until Thursday, March 2nd to respond to the proposal. Start up is set for May 1, 2006. The zoning review committee will need to review the definitions, etc.

Regarding the prison property reuse issue, Randy Yelle talked with Mr. Kippola for more information and Randy was told they are no longer pursuing this at this time.

Regarding Dr. English’s rezoning request, there were some errors in the legal and hopefully this request can come before the Planning Commission in March.

Frank Ward has requested a private road on a parcel of property the he has attempted to have rezoned to R-3 a few years ago. This issue will be on the March Planning Commission agenda.

Bill Sanders questioned whether or not rezoning #132 will be coming back before the Board. Dennis noted that the pastor felt it was unlikely it would be presented to the Planning Commission.

IX. PUBLIC COMMENT

Adam Westhouse, a reporter from the Mining Journal, introduced himself and noted that he would be taking notes at various Chocoday Township public meetings.

Joe Holman, 210 Riverside, Marquette, MI, questioned whether he should submit his conversations with the Casperson and Adamini from Lansing regarding the bike path and the grant for the corridor construction to the Planning Commission. Dennis Stachewicz noted these items should be sent to the Township Supervisor and Board for review.

There was no other public comment and public comment was closed.

X. COMMISSIONER COMMENT

Bill Sanders commented on the sub-area plan for the snowmobile trail and asked Dennis if there was any grant money for this type of plan. Dennis commented that this was discussed with the DNR, but because there is already a trail being used there is no interest in looking at an alternate plan. Bill Sanders noted that if the State would be willing to give the township grant monies for a sub-area plan, the township could possibly do this without the DNR's help.

Bill Sanders commented that maybe an information sign could be posted regarding the eagle's nest during the summer months.

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Information – Excerpt from *The Township Guide to Planning and Zoning* re: considering rezoning requests.**
- B. Information – *Taking of Property by Eminent Domain***
- C. Information – M.A.P. Training Brochure**
- D. Information – City of Marquette Planning Commission Minutes – 12/20/205 and 1/3/06**

XII. ADJOURNMENT

Bill Sanders adjourned the meeting at 9:42 p.m.

Respectfully submitted:

Estelle DeVooght, Commission Secretary

Ginger Maki, Recording

Charter Township of Chocolay Special Planning Commission Meeting

March 16, 2006

7:00 P.M.

Present: Estelle DeVooght, Bill Sanders, Steve Kinnunen, Ken Tabor, Albert Denton.

Absent: Scott Emerson, Tom Shaw

Staff: Dennis M. Stachewicz, Jr. (Director of Planning and Community Development), Tom Murray (Community Development Coordinantor), Rebecca Stachewicz (Recording Secretary)

I. MEETING CALLED TO ORDER/ROLL CALL

Meeting called to order by Bill Sanders at 7:00.

II. APPROVAL OF AGENDA/ADDITIONAL ITEMS FOR AGENDA

Steve Kinnunen motioned, Estelle DeVoogt seconded to approve the agenda. Aye 5, Nay 0.
Motion Carried.

III. PUBLIC COMMENT – None

IV. NEW BUSINESS

A. Presentation- U.S. 41 Corridor Enhancement Project

Dennis Stachewicz reviewed US-41 Corridor Grant Project. He stated that this is a probably a once in a lifetime chance to do a project of this size and it they could coordinate it with the resurfacing work that MDOT has planned for 2009. He said that piggybacking this project with MDOT's work would help keep engineering costs down.

Mr. Stachewicz said that there would most likely be 3 phases of the grant.

1. Extension of the current bike path that would increase walkability
2. Landscaping to improve aesthetics
3. Removal of the current pedestrian overpass and possibly constructing a pedestrian tunnel like the one in Houghton / Hancock

Mr. Stachewicz stated that this work would be directly related to economic development in Chocolay Township in that it would make people want to work and live here. He said that the grant should be submitted by this summer to get the ball rolling.

Mr. Stachewicz and Andy Sikkema discussed the proposed tree plantings along the corridor. He reiterated that the tree plantings shown are not exact, but a good idea of what they would like to see happen. Mr. Sikkema said that this would be done to bring nature and a rural feeling back to the corridor. Mr. Stachewicz said that they would like to create a canopy effect with the trees and that the trees would look welcoming from those traveling from Marquette and that it would also have a traffic calming effect.

Mr. Stachewicz explained that currently there is a bike path along both sides of US- 41, but that there isn't a crosswalk of any sort for pedestrians at M-28, which is something they would want to look into. He said that they would want to pick up the bike path at Silver Creek Road and continue it to at least the Family Dollar. He noted that there is a dirt path there already created by so many people taking that route on their own, so this extension would make the most sense to pursue.

Mr. Stachewicz then explained that the bike path would lead to the U.S. - 41 / Fairbanks Street intersection where the proposed pedestrian tunnel would be constructed. Mr. Stachewicz said that in his professional opinion there is no real use for the current pedestrian bridge that it just isn't used, and it doesn't meet handicap accessible requirements.

Tom Murray said he did some research that leads him to believe that a pedestrian tunnel would be of great help for pedestrians, especially children riding their bikes into Marquette in the summer months, to get to places like the public library. He said that there are 1400-1500 library cards held by Chocoday Twp. residents. Mr. Stachewicz also said that this bike path and pedestrian tunnel would encourage residents to be healthier and get more exercise. Bill Sanders agreed with this thought, saying that they just received the Rec Survey and this is a big part of what people are looking for.

Tom Ruprecht 2333 US – 41 South, asked about what kind of trees would be planted along the corridor. Mr. Stachewicz said that the canopy would be made up of a variety of trees to create a calming, natural effect.

Don Britton, 121 Deerview Trail, said he would like to see lighting along the corridor. Mr. Sikkema explained the difference between illuminate highway lighting and shoebox pedestrian style lighting. Mr. Stachewicz said that too much lighting can be bad and he would like to see it kept on the pedestrian levels. Mr. Stachewicz asked for examples of old lighting fixtures that could possibly be used in this project to keep the old-time rural feeling. Greg Seppanen said that if any lighting were installed, it would have to meet the goals that were set a couple of years ago.

Joe Holman, 210 Riverside Rd, commented that the inner lane of Hwy. 41 is dangerous so everybody drives on the outer lane. Mr. Sikkema responded saying that this problem is being looked into, but it is off the current topic.

Estelle DeVooght commented on the current pedestrian bridge. She agreed that it doesn't serve a current purpose but it is discussed often and nobody ever wants to put up the money to take care of it. Mr. Sikkema said that even though it's not the most convenient it still gives people a chance to cross the highway safely.

Joe Holman, 210 Riverside Rd, said he would like to see a pedestrian crossing that was also a multi-use path for snowmobiles. He said that he would like the township use snowmobiles as an economic boom. Mr. Stachewicz said that this grant is for non-motorized transportation, but snowmobile use is a part of the township's daily work. Mr. Seppanen said he is aware of the current snowmobile issues and those issues are being worked on separate from the topic being discussed.

Dick Arnold, 312 CR 545, asked about putting the proposed pedestrian tunnel where the current bridge is. Mr. Sikkema responded by explaining that the proposed placement is the safest place because building a tunnel can be quite destructive to build.

Joe Holman, 210 Riverside Rd, asked about driveways into businesses and asked if there was a possibility of a turning / deceleration lane. Mr. Sikkema said that they of course would make sure driveways would be easing identified for safety reasons, and Steve Kinnunen said that it was that this was very important. Mr. Stachewicz said that there is limited right of way on Hwy. 41, and they probably wouldn't be able to put in any type of deceleration lanes.

Steve Kinnunen asked if benches along the bike path are a possibility. Somebody said that there are good examples in suburban Chicago and in the Menominee / Marinette area.

Estelle DeVooght asked about the status of the M-28 / US- 41 intersection, if a roundabout or cloverleaf intersection is still being looked at. Mr. Sikkema said that they idea is still being worked on. Mr. Stachewicz said he would like to see a roundabout.

Boyd Snyder, 311 W. Fairbanks, asked about a timeline for this work. Mr. Sikkema explained that it will be tied into the 2009 / 2010 MDOT work, but it's possible that Phase I could start sooner depending on the funding from the grant. He explained that the funding comes from the Federal Gas Tax at 19-cents/ gal and 10% of that goes to non-motorized projects like this one being proposed.

Bill Sanders asked for people to spread the word about this project, and that anyone who wants for info should contact the township. He said any letters of support would be appreciated.

V. PUBLIC COMMENT – None

VI. ADJOURNMENT

Bill Sanders adjourned the meeting at 8:10 p.m.

Estelle DeVooght, Commission Secretary

Rebecca Stachewicz, Recording Secretary

Charter Township of Chocolay Planning Commission Meeting April 10, 2006

Present: Estelle DeVooght, Bill Sanders, Ken Tabor, Al Denton

Absent: Tom Shaw, Steve Kinnunen, Scott Emerson

Staff: Dennis Stachewicz (Director of Planning and Community Development) and Rebecca Stachewicz (Recording Secretary)

Bill Sanders started off meeting by saying that he would like to add The Chocolay River access site and Hiawatha Water Trail as an order of business to this meeting. He also said he also wanted to appoint a vice chair because there currently isn't one.

I. PUBLIC HEARINGS

Bill Sanders advised that a public speaker should give name and address and be kept to three minutes.

A. C.U.P. #75—Hendrickson—Single Family Dwelling in OS District

Dennis Stachewicz reviewed the project with an area map. He also referred the commissioners to memorandum dated 4-6-06 and site plan provided.

George Manosky, 2025 M-28 E, Marquette stated that his property was surveyed and it doesn't match with the site plan in terms of lot depth.

B. Private Road #22—Ward—Quandt Trail

Dennis Stachewicz said that Frank Ward is requesting a private road off of US-41 South. His intent is for the road to serve future residential development. This request is purely for a private road. There would be approximately 1300 ft of road, located in R1 district,

Frank Ward, 1401 Co. Road 545 South, Scandia, said he is the one requesting the private road. He said he has already spent \$6000 dollars in surveying and engineering costs.

C. Rezoning #134—English—Multiple Parcels—RR-2/PL to R-1

Dennis Stachewicz stated that the purpose of this rezoning request is to make the property eligible for a rezoning to a PUD zoning district and Dr. English has offered a condition to the rezoning in writing as part of the rezoning application.

He said if the PUD application was never actually filed, or if it was filed and denied, that the classification of the property would revert back to what it currently is.

Dennis Tryan, 315 Kawbawgam Rd., said that his concern is the water. He said that he already had 2 wells put in on his property. He said that the water is suspect, only about 40 ft deep, and this development would cause even more water problems. He also wanted to know if there would there still be access to snowmobile trails and he asked what would happen with the power line. He reiterated that his biggest concern is the water.

Don Houghton, 311 Kawbawgam Rd., said that he has the same concerns as Dennis Tryan. He asked who was going to pay for the water. And he stated that their wells are going to go dry.

Jan Amundson, 2029 M-28 East, said that they just had to drill a new well. She also stated that McDonald is making a mess. She wanted to know if will there be an

environmental impact study done. She questioned the septic systems and said that she objected to any large developments until an underground water study is done

Marlene Johnson, 1953 M-28 East, Marquette, said that they have lived there for 45 years and have always water problems, so they are against it.

Avery Smith, 279 Kawbawgam Rd., Marquette, said that rezoning 277 Kawbawgam causes concern to him. He said he's only lived there for 1 1/2 years and all this talk of water problems concern him.

Jerry War, 1975 M-28 East, said that he used to have a deep well with bad water and he drilled a new shallower one but it is very acidic. He said he is concerned what even more families in the area would do to the water. He said he also has concerns about the liability of the plan. He said that these will be expensive homes and wonders who will even want to live in them. He said he is also concerned about what will happen with the beachfront property that Dr. English owns. He said that he will channel his concerns in all ways needed.

Mary Keegan, 2033 M-28 East, said she echoes all of the concerns that have already been mentioned. She said that she doesn't want the trails to be hurt and that they help the economy. She said she also wonders how this fits into the Township's master plan.

Patrick E Barnett, 1971 M-28 East, Marquette, read a letter that he wrote and that he previously faxed to the Township. The letter was dated March 27, 2006. The letter asked for the commission to deny attempts to change historical land usage that would trample upon individual property rights.

Mary Pat Linck, 367 Lakewood Lane, said that high density, multi-family project like this doesn't belong in Chocolay Township.

Bill Sanders read a letter aloud, written on March 19, 2006, by Keith and Hwa Sun Weiger and it was to be added to the record. The letter expressed opposition to Dr. English's proposed project.

D. Rezoning #135—Wennerberg—1440 M-28 East—C-3 to C-2

Dennis Stachewicz explained that Rezoning #135 is a request from Jon Wennerberg for the rezoning of an approximately 4.19 acre parcel from C-3 to C-2.

II. MEETING CALLED TO ORDER / ROLL CALL

Bill Sanders closed the public hearing and called the meeting to order at 7:55 p.m.

III. APPROVAL OF MINUTES FROM FEB. 13, 2006 AND MARCH 16, 2006 MEETINGS

Ken Tabor moved, Bill Sanders second, to approve the February 13, 2006 meeting minutes as presented. Ayes 4, Nays 0. Motion Approved.

Estelle DeVooght moved, Bill Sanders second, to approve the March 16, 2006 meeting minutes with corrections made to the grammatical errors discussed. Aye 4, Nay 0. Motion Approved.

IV. APPROVAL OF AGENDA /ADDITIONAL ITEMS FOR AGENDA

Bill Sanders said that he would like to add The Chocolay River access site and Hiawatha Water Trail to the agenda and appoint a vice-chair.

Ken Tabor moved, Al Denton second, to approve agenda with additions. Ayes 4, Nays 0. Motion Approved.

V. PUBLIC COMMENT

Don Houghton, 311 Kawbawgam Rd., Marquette, said he would like to make a public comment about concerns that there will be sewage leakage into the limited water that they have.

Jan Amundson, 2029 M-28 East, Marquette, said that density is a concern and that you cannot pile homes on top of each other.

Frank Ward, 1401 Co. Road 545, Skandia, said he has a problem with not being able to cut trees on his own property. He said has a right to maintain timber on his own property and sell it if he wants to.

Mark Maki, 370 Karen Road, said he doesn't know any such law or rule that Frank Ward is talking about. He told Mr. Ward that he can cut his own trees if he wants to. Frank Ward responded to Mr. Maki and said he received a letter from Randy Yelle stating he could not harvest timber. Mr. Maki advised Mr. Ward that he should come and see him about this matter.

VII. NEW BUSINESS

A. HIAWATHA WATER TRAIL ACCESS SITE

Bill Sanders explained the Hiawatha Water Trail along The Lake Superior shoreline.

Dennis Stachewicz said they will be moving forward with this project, though the marina is non-conforming at this point. He said they must ask ZBA for approval, but if it gets the proper status, they can start construction soon.

Nancy Bradbury, 310 W. Wright Pl., Marquette, introduced herself as president of The Hiawatha Water and said she had 7-8 people with her from the trail. She said she wanted to share that will need a significant number of volunteers to make this project happen.

Bill Sanders explained the project a bit more. He said it runs from Big Bay to Grand Marais and that they need a site for users to rest and use at their leisure. There was a question about where it would be located. Mr. Sanders said it will be near current boat launch.

Dennis Stachewicz said that anyone can come by to see him or Tom Murray regarding questions with The Hiawatha Trail Project. He said they are looking at work on a boardwalk, a storage locker to hold 4 kayaks, and a possible overnight campsite.

B. ELECTION OF VICE-CHAIR

Bill Sanders said that the commission needs to appoint a vice chair because there isn't currently one.

Bill Sanders moved, Ken Tabor second, to elect Al Denton as Vice-Chair. No further discussion was held. Ayes 4, Nays 0. Motioned Approved.

C. CONSIDERATION—C.U.P. #75—HENDRICKSON—SINGLE FAMILY DWELLING IN OS DISTRICT

Al Denton stated that everything looks satisfactory.

Al Denton moved, Ken Tabor second, that after review of the Conditional Use request #75, the STAFF/FILE REVIEW – SITE DATA AND ANALYSIS, sections 213, 401.D, and 701 of the Zoning Ordinance, the site plan and application provided, and subsequently finding compliance with the standards for approval of the request found in section 701 of the Zoning Ordinance, the Planning Commission approves Conditional Use request #75 with the following conditions (in case this case the word “applicant means Jill Hendrickson):

1. The applicant shall obtain Marquette County Health Department review and approval of well and septic considerations in the form of a site evaluation; and
2. The applicant is required to obtain MDEQ approval if necessary; and
3. A zoning compliance permit shall not be issued until the above conditions have been met.

Ayes 4, Nays 0. Motion Approved.

B. CONSIDERATION—PRIVATE ROAD # 22--WARD --QUANDT TRAIL

Frank Ward said he wouldn't have spent \$6000.00 if he thought his request wouldn't have been approved. He said that he doesn't see why it is necessary for him to spend this money before the road is approved. He said there are major surveying and engineering costs involved and he asked for an explanation.

Bill Sanders responded and said there are requirements that must be met for a private road and it is the owner's responsibility to take care of them. Mr. Sanders said these requirements are not unusual and they are very comparable to other jurisdictions. He added that it is a part of the ordinance and that all private roads that come through the Township have to meet the same conditions.

Dennis Stachewicz said that the applicant has met standards required for the private road, however, the Marquette County Health Department has asked for the condition that it is reviewed and approved by them. Mr. Stachewicz said that this isn't odd and has been done before.

Frank Ward commented that he is a builder and a plumber, amongst other things. He said that he has to go to the health department regardless, so he doesn't understand why there should be further restrictions put on him. He said he is already behind by one month because of cancellations of meetings.

Mr. Stachewicz said he believed that this could be taken care of pretty quickly.

Ken Tabor moved, Al Denton second, that after review of Private Road Request #22; the standards of Section 402.D of Ordinance 34; Section 401.D of Ordinance 34; and the STAFF/FILE REVIEW – SITE DATA AND ANALYSIS, and subsequently finding compliance with the standards for approval of the private road request, the Planning Commission recommends approval to the Township Board with the following conditions (in this case the word "applicant" means Francis Ward):

1. The applicant shall allow access to Township vehicles as well as other public/private utility companies to provide services; and
2. A covenant shall be established on the deeds for any parcels created off from this private road identifying the private road status and which reference the Declaration of Private Road Easement which must be fully executed; and
3. The applicant pay for and install a road sign identifying the private road as "Quandt Trail" at the intersection with US-41 and the applicant is to pay for and install a stop sign at the same intersection; and
4. The applicant shall obtain a driveway permit from the Michigan Department of Transportation; and
5. The applicant is required to provide certification from a surveyor/engineer that the private road standards of the Zoning Ordinance have been achieved at the conclusion of construction; and
6. The applicant shall comply with the conditions and requirements of all other agency regulations; and
7. The applicant shall obtain Marquette County Health Department review and approval of well and septic considerations in the form of a site evaluation for the proposed lots prior to road construction; and
8. A zoning compliance permit shall not be issued until all of the above conditions are met; and

9. Land Division Approval is required from the Assessor for the creation of individual parcels off from the road and may require the modification of the lots as shown.

Ayes 4, Nays 0. Motion Approved.

C. CONSIDERATION—REZONING #134—ENGLISH—MULTIPLE PARCELS— RR-2/PL TO R-1

Surveyor, Glenn Van Neste said that he has heard a lot of valid concerns tonight, but ultimately, this is private property being developed. He said that three - Type 3 wells have been drilled, and that one Type 3 well can support up to 10 houses. He said the water is sufficient and treatable. He said that Dr. English's lake property has nothing to do with the plan in question. It was stated that this will be a "cluster" type development and will end up being more than 1 acre per house. Mr. Van Neste said that he understand that they will have to meet County Health Department requirements on both the well and septic issues.

Bill Sanders stated that the soil in this area is very porous and there is concern about density and concerns about getting nitrates in the water. Glenn Van Neste said that this wasn't really a concern here. Ken Tabor asked how deep type 3 wells are. It was answered that they are over 100 feet deep.

Bill Sanders asked current zoning. Dennis Stachewicz said it is Rural Residential Number Two. Mr. Sanders asked about density. Dennis said it would hold about 7 homes as currently zoned.

Dennis Stachewicz said that he believed that the PUD process is the only way to achieve the recommendations in the Comprehensive Plan until the Zoning Ordinance has been updated.

Bill Sanders asked Glenn Van Neste if he would feel burdened by answering the citizen's concerns and questions. Glenn answered "no," because they have to do it for the County Health Department anyway.

Jim Clark, Project Manager, reviewed concerns. He said that a type three well is required to be at least 100 ft deep and an isolation barrier is required so there will not be mixing. Mr. Clark also said that there are strict State and County standards and as far as power lines go, no existing ones will be affected and all new ones will be underground. He said there will be no jurisdiction over the snowmobile trail and the main traffic access will be on M-28.

Mr. Clark said the beachfront property on M-28, Dr. English's 2nd home, is not included on this development. He explained that there will be single-family homes, owned as condominiums, but there may be one area where there will be a duplex or two. The required open spaces will be considered conservation area and those areas will never be developed on.

There was discussion about the definition of "immediate near future." Dennis Stachewicz advised the Planning Commission that they could not alter the condition presented by Dr. English, however, they could ask for a definition of "immediate near future."

Dr. English commented that cancelled meetings have caused delays in his project.

Further discussion of "immediate near future" take place and Glenn Van Neste said he that to him it mean nothing less than two years, because the PUD process takes time.

Al Denton Moved, Bill Sanders Seconded, that following the review of Rezoning Request #134, and the Staff/File Review, and holding a public hearing, the Planning Commission recommends that the Township Board APPROVE Rezoning request #134 with the condition offered by the applicant in writing that clearly states *"Upon favorable zoning change, the applicant will submit a PUD application in the immediate near future"*

for development of a cluster design residential housing community with an emphasis on outdoor recreation/conservation living attributes,” for the following reason:

1. The rezoning is an attempt by the property owner to work with the Planning Commission and Township Board to achieve the recommendations for rural residential land use as recommended in the Township Comprehensive Plan.

Ayes 4, Nays 0. Motioned Approved.

D. CONSIDERATION—REZONING #135—WENNERBERG—1440 M-28 EAST—C-3 TO C-2

Jon Wennerberg, 509 Dukes Rd – Skandia, stated that he runs Star Industries and is wishing to rezone property located at 1440 M-28 East from C-3 to C-2. He says that it is in the back of mind that he wants to develop to a lodging facility there.

Dennis Stachewicz said he has already discussed the issue of waste disposal with Mr. Wennerberg and said the DEQ will probably get involved. Mr. Stachewicz said that if a large lodging facility was built, it may need alternate sewage treatment other than a septic system.

Mr. Stachewicz said that this is a reasonable request for a C-2 and that it will actually provide a buffer to the residential area.

Mr. Wennerberg said that he talked to a consulting engineering firm who said that a septic mound system concept is becoming common around here and that the Jack Pine trees would hide it. He said he also owns property East of his current building where he could put the mound system.

Ken Tabor moved, Al Denton second, that following the review of Rezoning Request #135, and the Staff/File Review, and holding a public hearing, the Planning Commission recommends that the Township Board APPROVE Rezoning request #135 for the following reasons:

1. The rezoning is consistent with the Township Comprehensive Plan; and
2. The rezoning will allow the parcel involved to act as a “buffer” or transition area that will prevent the encroachment of industrial activity on an established residential area located on the North side of M-28.

Ayes 4, Nays 0. Motion Approved.

Bill Sanders asked if this will now go to the County Planning Commission. Dennis Stachewicz said that both Rezoning requests will go to the County Planning Commission.

E. CONSIDERATION—VACATION OF ALLEY BETWEEN FAIRBANKS AND MAIN STREETS

Al Denton moved, Ken Tabor second, that the Charter Township of Chocolay Planning Commission recommends that the Township Board send a letter to the Marquette County Road Commission supporting the abandonment of the 20’ alley in block 3 of the Plat of the Village of Harvey.

Dennis Stachewicz said that this is pretty common and there is often trouble getting clear titles to homes because of these alleys that only exist on paper. He said that these alleys are a part of the original plat that never got built.

Ayes 4, Nays 0. Motion Approved

F. CONSIDERATION—SPRINGWOOD ESTATES SITE CONDOMINIUM—FINAL PLAN

Mr. Stachewicz said that he has received documents of final plan and that he has received a master deed that is good to go, but the final site plan needs it in a specific form listed by the condominium act. He said he recommends that it is approved but it has to be put in final form before it goes to the Township board. He also said that they do already have County Health Department approval

Glenn Van Neste explained the map in question to the board in detail. He said there will be a 66 ft road that will go out to M-28. Mr. Stachewicz said it is best to remember that the road is an easement and not a right of way.

Mr. Sanders said he agreed with Mr. Stachewicz that the plan is good for their purposes. Glenn said the Condominium Act does allow for them to combine their plans and it will probably end up being a three sheet plan in the end.

Ken Tabor moved, Al Denton second, that the Charter Township of Chocolay Planning Commission approves the final site plan for the Springwood with the following conditions:

1. The Master Deed be amended to address the concerns of the Township Attorney and incorporate the conditions of approval given by the Township Board and Marquette County Health Department;
2. The final site plan be compiled in the form required by Section #66 of the Condominium Act and address any conditions of the Planning Commission; and
3. The above two conditions shall be met prior to presenting the final site plan to the Township Board.

Ayes 4, Nays 0. Motioned Approved.

G. CONSIDERATION—REVIEW OF PROPOSALS FOR ZONING ORDINANCE UPDATE

Bill Sanders that he must step down due to a conflict of interest and remove himself from discussion. Dennis Stachewicz suggested that it be tabled since that will leave the Planning Commission without quorum.

Al Denton moved, Ken Tabor second, that consideration for review of proposals regarding the Zoning Ordinance Update be tabled until the next meeting.

Ayes 4, Nays 0. Motion Approved.

VIII. PLANNING DIRECTOR'S REPORT

Mr. Stachewicz advised that he needs the large site plans back.

Mr. Stachewicz reminded the Planning Commission that the terms of Bill Sanders and Steve Kinnunen expire at the end of next month. He asked that they take some time to let him know if they are interested in being re-appointed.

Mr. Stachewicz discussed the GIS system, how efficient it is, and what a big time saver it is for the Township staff. He said he hopes that all Township personnel will learn to do it eventually. He said they have it on a trial program right now and will ask the board for money to purchase it. He asked for support.

Mr. Stachewicz said that the possible snowmobile business spurt will continue to be discussed and should be on the agenda for the next meeting.

Mr. Stachewicz said that money is budgeting for training if any of the commission members are interested. He also reminded that the MTA district meetings are coming up on May 18th and they should see him to register.

Bill Sanders asked if the County Health Department compiles data in the GIS database. Dennis said he is not sure, but a lot of data can be downloaded from State of Michigan website.

IX. PUBLIC COMMENT

George Manosky said the GIS is probably the best tool he has seen in the township in 16 years, and that in his opinion it would pay for itself in a year.

Ron Johnson asked if the bike path on Kawbawgam Road was going to be blacktopped. He said he read an article in the Mining Journal that indicated it was. Mr. Stachewicz said the DNR has applied for a grant for crushed limestone along snowmobile trail to walk and ride bikes. He said that it probably wouldn't be blacktop because that could be torn up by motorized traffic in the winter.

X. COMMISSIONER COMMENT

Al Denton reported ZBA information. He said that an appeal must now be made within 21 days of decision. He said this will speed up the appeals process.

He said there was a mistake made by the Zoning Administrator regarding the bank on US-41 but the ZBA corrected it and it is no big deal.

He also updated that 320 Shot Point was denied, and the Class A non conforming designation was rescinded.

George Manosky said he had one last comment. He said he asked for a response about a survey, but hasn't received one yet. Mr. Stachewicz said that the issue is with the depth of the lot, and as long as Ms. Hendrickson meets set backs, it shouldn't be an issue.

XI. ADJOURNMENT

Meeting adjourned at 9:40 pm

Estelle DeVooght, Commission Secretary
Secretary

Rebecca Stachewicz, Recording
Secretary

Charter Township of Chocolay Planning Commission Meeting

May 8, 2006

7:00 P.M.

Present: Steve Kinnunen, Bill Sanders, Al Denton, Scott Emerson, Tom Shaw, and Estelle DeVooght

Absent: Ken Tabor

Staff: Dennis Stachewicz (Director of Planning and Community Development) and Rebecca Stachewicz (Recording Secretary)

I. MEETING CALLED TO ORDER / ROLL CALL

Bill Sanders called meeting to order at 7:30 p.m.

II. APPROVAL OF THE MINUTES OF THE APRIL 10, 2006 MEETING

Al Denton moved, Bill Sanders second, to approve the minutes as presented. Ayes 6, Nays 0. Motion approved.

III. APPROVAL OF AGENDA / ADDITIONAL ITEMS FOR AGENDA

ORV trail discussion was added to the agenda under New Business.

Scott Emerson motioned, Bill Sanders second, to approve agenda with new addition. Ayes 6, Nays 0. Motion approved.

IV. PUBLIC COMMENT

None.

V. OLD BUSINESS

A. Consideration—Review of Proposals for Zoning Ordinance Update

Bill Sanders stepped down (conflict of interest) and Al Denton took over as chair.

U.P. Engineers & Architects, Tri-Media Consultants, and STS Consultants all submitted proposals. Dennis Stachewicz said it was stated in the RFP that interviews would be held of selected firms.

Al Denton recommended eliminating one of the choices and interviewing two candidates. Discussion was held and STS was eliminated due to their high asking price.

Tom Shaw moved, Scott Emerson second, to eliminate STS and interview U.P. Engineers & Architects and Tri-Media Consultants. Ayes 6, Nays 0. Motion Approved.

Special meeting for interviews will be on 7:30 pm May 17, 2006. Bill Sanders returned as chair.

B. Consideration—Recommend Re-appointments to Planning Commission

Bill Sanders stated that he would not like to be reappointed. Steve Kinnunen said he enjoys being involved with the Planning Commission and asked to be re-appointed.

Dennis Stachewicz said they have only one application on file from Andy Smith of Smith Paving in the case that a vacancy would occur. Scott Emerson said that Joe Holman is also interested.

Estelle DeVooght said that they want to make sure they get someone who can come to all of the meetings.

Scott Emerson moved, Al Denton second, to allow the Director of Planning and Community Development to write a letter of support on behalf of the Planning Commission asking for the re-appointment of Steve Kinnunen and present the letter the Township Supervisor.

Aye 6, Nays 0. Motion approved.

VI. NEW BUSINESS

A. Discussion—Informal PUD Discussion—Faith Assembly of God

Dennis Stachewicz explained that Chocolay Township was approached by Pastor Kevin Taylor regarding the potential for a rezoning to PUD at the property owned by the Silver Creek Church (formerly know as Faith Assembly of God), located at 1510 M-28 East.

Troy Koepp, 1729 M-28 East, said he is looking to purchase the property at 1510 M-28 East and develop it as a personal residence and two businesses. One business would be an electronics installation and the other would be the sale of used cars. He said he didn't think there would be a big disruption to the public. He also said the approximate hours of operation would be 9:00 a.m. to 7:00 p.m. and that they are there looking for ideas on what they would have to do to proceed and what to expect in the process.

Mr. Koepp stated that there would not be any vehicle repairs made on the premises, only car sales. He said that there is approximately 1,600 square feet of living space on site and he would also live there, allowing him to watch over the property.

Al Denton stated that their obligation is to the residents and doesn't want to hurt property values. He said he had concerns about chemicals and garage activities that could hurt residents.

Dennis Stachewicz said that this is a vacant piece of property and if there is a creative way to redevelop through PUD with reasonable controls then that should be weighed against having a vacant building that could fall into disrepair. He also said that the property owners must understand that there may be conditions put on them requiring them to do things outside of their business plan.

Mr. Koepp approximated he would have 20-25 cars in their lot for sale at a time. Pastor Kevin Taylor said that there 86 parking spaces in the lot.

Lighting and security issues were discussed between commissioners and business owner and the business owners were advised to get the neighbors involved early in the process.

B. Discussion—Zoning District Classifications of Township Owned Property

Dennis Stachewicz said that the ZBA had to get involved in a decision, due to project timing, regarding the water trail access site because the property was not properly zoned. He said that it would be more appropriate to properly zone Township owned property in accordance with the Comprehensive Plan and the Recreation Plan.

Steve Kinnunen moved, Bill Sanders seconded, that the Charter Township of Chocolay Planning Commission recommends that the Township Board consider allowing the Planning Commission to author a Text Amendment to address the location of "Marinas" on properties zoned as Public Lands and also consider submitting an application for rezoning of the Township owned parcel known as the "Marina" to rezone the property from R-1 to PL.

C. Discussion—Snowmobile Business Route

Dennis Stachewicz gave a history of several attempts to develop a business route for snowmobiles. He said a group of citizens are pushing for alternate route that would alleviate problems along the current trail and also bring snowmobiles into the business district. He said that the Township has met with elected officials and department heads from State agencies to discuss this matter and their recommended alternative is the one being presented at the meeting.

Mr. Stachewicz said outlined the details of the proposed route on the map that was provided to the Planning Commission. He also outlined the concerns with such a proposal. He also said the main safety concern would be trail development North of US - 41 and M-28, especially if it became a two-way trail.

Scott Emerson talked about having a two-way trail and said that it wouldn't be a high velocity trail so there would be little chance of a serious accident. Mr. Stachewicz said it was State law that a two-way trail must be 16 feet off of the pavement and must be twelve feet wide if the trail is to be groomed.

Bill Sanders explained that MDOT has rigid regulations and standards that are hard to get around.

Further discussion entailed trail design issues, the speed limit on US - 41 and the caution that should be taken so as to not affect the enhancement grant application that has already been submitted.

Mr. Stachewicz said it would be easiest to follow through on this business district trail if they go with what is being presented. He said this option has been recommended by all of the State agencies involved with funding and approval. He said if they try to change it to a two-way trail north of US-41 and M-28, it would require special legislation. He explained right now this is just a concept and

Scott Emerson said he supported taking this concept and it was the consensus of the Planning Commission to have Mr. Stachewicz write a letter to the Township Supervisor indicating their support for the concept presented at the meeting.

D. Discussion-- ORV use on snowmobile trail

Scott Emerson said the trail is being used illegally by ORV's and that something needs to be done about the illegal use. He recommended that the DNR get involved and help with enforcement and design of structures to prevent motorized use in the non-winter months.

The design of the structure located at the Carp River bridge in Marquette was discussed. It keeps out motor vehicle traffic, but allows bikes and walking traffic.

Scott Emerson said he would like to talk with a representative from the DNR about the ORV issue. Dennis said he would work on it. It was the consensus of the Planning Commission to have Mr. Stachewicz write a letter to the Township Board notifying them of the problem occurring with the ORV use on the railroad grade.

VII. PLANNING DIRECTOR'S REPORT

None.

VIII. PUBLIC COMMENT

None.

IX. COMMISSIONER COMMENT

The processes of the Frank Ward and Dr. English projects were discussed. Estelle DeVooght expressed her frustrations with the processes.

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

A. Information—MTA Publication: *The 2006 Michigan Zoning Enabling Act*

B. Information—*Planning and Zoning News*

XI. ADJOURNMENT

Meeting adjourned at 9:15 p.m.

Estelle DeVooght, Commission Secretary

Rebecca Stachewicz, Recording Secretary

Charter Township of Chocolay Special Planning Commission Meeting

Wednesday, May 17, 2006

7:30 P.M.

Present: Al Denton, Tom Shaw, Estelle DeVooght, and Ken Tabor

Absent: Steven Kinnunen and Scott Emerson

Staff: Dennis Stachewicz (Director of Planning and Community Development) and
Rebecca Stachewicz (Recording Secretary)

I. MEETING CALLED TO ORDER / ROLL CALL

Al Denton called meeting to order at 7:38 p.m.

II. PUBLIC COMMENT

No public present.

III. NEW BUSINESS

A. Presentation and Interview – TriMedia Consultants

Lisa Coombs - Gerou, Principal Planner with Tri Media Consultants presented Zoning Ordinance Update proposal; Justin Rosky, GIS Specialist and Dave St. Onge were also in attendance.

Al Denton asked if they would be able to stay within budget. Mrs. Coombs – Gerou said they would base their fees upon the tasks listed in their proposal. Al Denton asked why they were involving the Zoning Board of Appeals (ZBA) in the process as he understood the ZBA is a quasi-judicial board and usually is not involved in drafting ordinances. Mrs. Coombs – Gerou said she believed the ZBA has information pertaining to variances that could be used during the project.

B. Presentation and Interview—U.P. Engineers and Architects

Pat Coleman with U.P. Engineers and Architects (UPEA) presented Zoning Ordinance Update proposal.

Al Denton asked if they would be able to stay within the budgeted amount. Mr. Coleman said they would follow the hours allocation in the written proposal and did not anticipate any increase in fees.

Al Denton asked if UPEA would get involved with the ZBA. Mr. Coleman said that he felt that variance information could be received from staff and his firm would dissect that information and recommend any changes. He said the ZBA has a unique role and it was best not to involve them in the process.

C. Consideration—Develop Recommendation to Township Board Re: Consulting Firm for Zoning Ordinance Update

Commissioners discussed that both presentations were good and that they were equal in price. Commissioners came to a consensus that UPEA would provide the best service to the Township because they had a better understanding of the details involved with the project.

Al Denton moved, Ken Tabor second, to recommend UPEA to the Township Board that U.P. Engineers and Architects do the update of the Chocolay Township Zoning Ordinance.

Ayes 4, Nays 0. Motion approved.

IV. PUBLIC COMMENT

No public present.

V. ADJOURNMENT

Meeting adjourned at 8:43 pm.

Estelle DeVooght, Commission Secretary

Rebecca Stachewicz, Recording Secretary

**Charter Township of Chocolay
Planning Commission Meeting**

MONDAY, JUNE 12, 2006

7:30 P.M.

Present: Al Denton, Tom Shaw, Estelle DeVooght, and Ken Tabor

Absent: Steve Kinnunen and Scott Emerson

Staff: Dennis Stachewicz (Director of Planning and Community Development) and Rebecca Stachewicz (Recording Secretary)

I. MEETING CALLED TO ORDER / ROLL CALL

Al Denton called meeting to order at 7:33 p.m.

II. APPROVAL OF THE MINUTES OF THE MAY 8, 2006 AND MAY 17, 2006 MEETINGS

Ken Tabor moved, Tom Shaw second to accept minutes. Ayes: 4, Nays: 0. Motion carried.

III. APPROVAL OF AGENDA / ADDITIONAL ITEMS FOR AGENDA

Estelle DeVooght moved, Al Denton second to accept agenda. Ayes: 4, Nays: 0. Motion carried.

IV. PUBLIC COMMENT

Ron Yesney, MDNR gave update on snowmobile trail. He said the staff in Lansing didn't go for moving the trail, and it will stay where it is now within the railroad grade. He said that they are still in the engineering phase of project. He said that there is a lawsuit in process, which some landowners are claiming ownership of the grade, and it will hold up the process of the resurfacing.

He explained that once engineering is done, the DNR will apply for construction, which will probably happen sometime in 2007.

Al Denton asked if there was anything the Township could do to help at this time. Mr. Yesney said the Township has been of great help already, but nothing more can be done at this time.

Estelle DeVooght inquired about the lawsuit. Mr. Yesney explained that if the lawsuit is successful, the snowmobile trail would not exist at all.

Mrs. DeVooght asked about the costs of engineering. She said it did not make sense to have it re-engineered when the trail already exists. Mr. Yesney said that they have no control over that, but they can fix any bad or unsafe spots in the engineering process. He said an in-house engineer will probably do the project, so costs shouldn't be that high

V. OLD BUSINESS

None.

VI. NEW BUSINESS

A. Consideration—Annual Election of Officers

Dennis Stachewicz said that Mr. Dennis Magadanz will be recommended for appointment to the Commission to fill the current vacancy and Steve Kinnunen will be recommended for re-appointment.

Estelle DeVooght moved, Ken Tabor second that Al Denton serve as Chairperson.

Ayes: 4, Nays:0. Motion carried.

Al Denton moved, Ken Tabor second for that Tom Shaw serve as Vice Chairperson.
Ayes: 4, Nays: 0. Motion carried.

Al Denton moved, Tom Shaw second that Estelle DeVooght remain as Secretary.
Ayes: 4, Nays: 0. Motion carried.

Estelle DeVooght moved, Al Denton second that Steve Kinnunen serve as Vice Secretary.
Ayes: 4, Nays: 0. Motion carried.

B. Consideration—Chocolay Condominiums Preliminary Site Plan

Dennis Stachewicz presented the preliminary site plan for the Chocolay Condominiums, a site condominium project. He said the parcel was recently rezoned from a combination of R-1 and C-2 to R-3 to support multiple family development at this site.

Mr. Stachewicz went over some points to be addressed including:

- A proposed pavilion
- Aisle width for two-way traffic in off-street parking areas
- Proposed connection to the storm sewer
- The connections to the Township sewer system are not shown on the site plan
- Proposed lighting
- Screening of the dumpster

Richard Uren, project architect presented the project to the commission. He explained that they want the condominium units to look more like townhouses than apartments.

Al Denton recommended that the driveways extended to 24 ft. (instead of 18 ft) for access for emergency vehicles, trash pickup, moving vans, and other large vehicles.

Mr. Uren described the pavilion as a “permanent screened porch” that was considered to be a structure that is associated with the dock. He also stated that any lighting would be for normal, residential home lighting purposes.

Estelle DeVooght asked about ownership of the homes. Mr. Uren explained that there will be an association that owns the grounds, but each unit will be held individually.

Tom Shaw questioned if everyone would want to start putting a pavilion on the water. Mr. Stachewicz said that it was a staff concern that a precedent may be set by allowing a pavilion as an associated structure.

The interpretation of Section 403 of the Zoning Ordinance (waterfront setback) was discussed by the Planning Commission and it was determined that the proposed pavilion met the intent of Section 403 of the Zoning Ordinance.

Tom Shaw asked whether or not it would be safer to have a driveway on US-41 rather than Main Street. Mr. Stachewicz said the US-41/M-28 Corridor Plan encourages driveways to be located off the trunkline.

Ken Tabor moved, Estelle DeVooght second that the Planning Commission recommends approval of the preliminary site plan for the proposed Chocolay Condominium and forwards in the Township Board with the following recommended conditions:

1. That the development comply with the submittal requirements of Sections 525 and 503 of Zoning Ordinance 34, and Condominium Act 59 for the Final Condominium Plans; and
2. Approval is required from the agency with jurisdiction over the storm sewer located on Main Street before a connection can be established.

Ayes: 4, Nays: 0. Motion Carried.

C. Discussion—Superior Pines Development Informal PUD Discussion

Dr. English read a letter addressed to Greg Seppanen, Township Supervisor, concerning Hwy BAA. He gave copy of the Site Plan to commission and explained that the Marquette County Road Commission is requiring a temporary cul-de-sac. He said that per discussion with his development team and Township staff, a “T” turn around may be more appropriate.

Mr. Stachewicz said a “T” turn around would be a better option to ensure road connectivity in the future and he cautioned that a temporary cul-de-sac could easily turn into a permanent one if the development faltered.

Dr. English asked for a letter of support to be written to the Township Board from the Planning Commission.

Tom Shaw moved, Al Denton second to a send letter the Township Board supporting the T-turnaround instead of a cul-de-sac at the southernmost point of County Road BAA in the proposed Superior Pines development.

Ayes: 4, Nays: 0. Motion carried.

Consideration—2005 Annual Report

Al Denton said that Dennis Stachewicz did a very good job with this.

Tom Shaw moved, Ken Tabor second, to authorize the Director of Planning and Community Development to distribute the Year 2005 (Annual) Report to the Township Board.

Ayes: 4, Nays: 0. Motion carried.

D. Consideration—Letter Of Recognition for Bill Sanders

Al Denton presented a letter of recognition written by Dennis Stachewicz to Bill Sanders on behalf of the Planning Commission.

VII. PLANNING DIRECTOR’S REPORT

Mr. Stachewicz said that they are expecting an application for PUD from Dr. English within the next 90 days.

VIII. PUBLIC COMMENT

None.

IX. COMMISSIONER COMMENT

None.

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

A. Information—Marquette Township Planning Commission Minutes-3/22/06

B. Information—City of Marquette Planning Commission Minutes-4/25/06

XI. ADJOURNMENT

Meeting adjourned at 8:30 pm

Estelle DeVooght, Commission Secretary

Rebecca Stachewicz, Recording Secretary

Charter Township of Chocolay Planning Commission Meeting

MONDAY, JULY 10, 2006

7:30 P.M.

Present: Albert Denton, Dennis Magadanz, Estelle DeVooght, Tom Shaw, Ken Tabor, and Scott Emerson

Absent: Steve Kinnunen

Staff: Dennis Stachewicz (Director of Planning and Community Development) and Rebecca Stachewicz (Recording Secretary)

I. MEETING CALLED TO ORDER / ROLL CALL

Al Denton called meeting to order at 7:30 p.m.

II. APPROVAL OF THE MINUTES OF THE JUNE 12, 2006 MEETING

Estelle DeVooght moved to approve, Tom Shaw second. Ayes 6, Nays 0. Motion carried.

III. APPROVAL OF AGENDA / ADDITIONAL ITEMS FOR AGENDA

Scott Emerson moved to approve, Dennis Magadanz second. Ayes 6, Nays 0. Motion carried.

IV. PUBLIC COMMENT

Ron Yesney, Michigan Department of Natural Resources (MDNR) stated he was there to answer any questions.

V. OLD BUSINESS

A. Discussion-MDOT Corridor Grant Project—Snowmobile Business Loop

Don Britton stated that this is an excellent opportunity to get a snowmobile trail and bike path, and it will make the trail accessible to all types of recreation. In the summer it would be a non-motorized trail. He recommended proceeding.

Dennis Stachewicz reviewed the background of the project. He said it started as a way to create a business spur and that a funding opportunity has been presented through the MDNR, with Chocolay Township and MDOT matching funds. Mr. Stachewicz stated that himself, Greg Seppanen, Don Britton, and Andy Sikkema have met to look at options regarding combining their two current grant projects (this one and the corridor grant) into one. He said that combining the two grants would keep them from having to choose one over the other.

Mr. Stachewicz asked that the Planning Commission to make a list of pros and cons enabling decisions to be made easier down the line. He said a joint meeting with the Township Board later in the summer is recommended.

Estelle DeVooght asked if the residents on M-28 are aware of this proposal. Mr. Stachewicz said that a notice would be sent as an invitation to the public meeting, along with a posted notice in the Mining Journal.

Al Denton asked about crossroads and driveways. Mr. Stachewicz said there are about 12 total with the South side of M-28 having fewer. Mr. Stachewicz showed a map of the area and the driveway crossings were discussed.

Tom Shaw stated that the makeshift dirt trail (on the South side of M-28) has been used for many years and continuing to use that same path would be least disruptive to the current residents and the church.

Scott Emerson asked that the two-way trail option be left open for discussion in the future. He stated that motorized recreation is bad for society, but he does believe this trail can be used for summer recreation. He stated that he thinks this trail will be good to alleviate snowmobile pressure in other areas and it will help the commercial businesses and economic development in Chocolay Township.

The right-of-way on Hwy 41 was discussed. Mr. Emerson thought that some of the businesses might give up some of their property to the right-of-way for the snowmobiles if they saw the chance for economic development. Mr. Stachewicz explained that there is limited right-of-way and the Township Board would then have to consider purchasing property in order to accommodate a trail.

Mr. Denton said it appears that the Planning Commission is in favor of a snowmobile trail on the South side of M-28 as a business spur into Chocolay Township using the Togo's property, the Hotel Property, and using it as a bike path in the summer months.

Scott Emerson again asked that the two-way trail option be left open in the future. Mr. Stachewicz said MDOT has been firm on stating they won't agree to any 2-way trail. Mr. Emerson stated that is "for now" and said might be open for discussion sometime in the future.

The Planning Commission agreed that the proposed frontage sheet should be written into the grant request if possible as it would accomplish some of the goals from previous planning efforts.

Monday, July 31 at 7:00 p.m. was suggested as a proposed meeting time for a joint Planning Commission and Township Board meeting.

VI. NEW BUSINESS

None

VII. PLANNING DIRECTOR'S REPORT

Dennis Stachewicz said that there are three public hearings next month including the rezoning of the Township Marina, a text amendment to address marinas in the Public Lands Zoning District, and a PUD for old Faith Assembly of God Church.

He also stated that the Township Board approved the contract with U.P. Engineers and Architects and he hopes to have them attend the next Planning Commission meeting to kick off the project

VIII. PUBLIC COMMENT

None.

IX. COMMISSIONER COMMENT

Mr. Denton welcomed Denny Magadanz to the commission..

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

A. Information-Marquette Township Planning Commission Minutes – 4/12/06, 4/2/06, 5/10/06, 5/25/06 and 6/07/06

XI. ADJOURNMENT

Meeting adjourned at 8:15 pm

**Charter Township of Chocolay
Planning Commission Meeting**

MONDAY, AUGUST 14, 2006

7:30 P.M.

Present: Steve Kinnunen, Al Denton, Scott Emerson, Tom Shaw, Estelle DeVooght, Dennis Magadanz, and Ken Tabor

Absent: Tom Shaw

Staff: Dennis Stachewicz (Director of Planning and Community Development) and Rebecca Stachewicz (Recording Secretary)

I. PUBLIC HEARINGS

A. Rezoning #138 – Text Amendment – Marinas in PL District
No public comments made.

B. Rezoning #136 – Chocolay Township – R-1 to PL
No public comments made.

C. Conditional Use #76 – Gentz – Golf Course Expansion
Randy Gentz stated he was present to answer any questions.

II. MEETING CALLED TO ORDER / ROLL CALL

Al Denton called meeting to order at 7:35 p.m.

III. APPROVAL OF THE MINUTES OF THE APRIL 10, 2006 MEETING

Scott Emerson moved, Dennis Magadanz second, to approve the minutes of the April 10, 2006 meeting as presented. Ayes 6, Nays 0. Motion carried.

IV. APPROVAL OF AGENDA / ADDITIONAL ITEMS FOR AGENDA

Scott Emerson moved, Ken Tabor second, to approve as presented. Ayes 6, Nays 0. Motion carried.

V. PUBLIC COMMENT

No public comment.

VI. OLD BUSINESS

No old business.

VII. NEW BUSINESS

A. Consider – Rezoning #138

Dennis Stachewicz said the text amendment would add “marinas” as a permitted principle use in the Public Lands Zoning District. He said the Marina was identified as a non-conforming use. He also said that since the Comprehensive Plan and Recreation Plan support development of the Marina, the Township should take the appropriate steps to bring the use into conformity.

Mr. Emerson said he had concerns regarding noise, parties, music, campfires and such.

Fran Wallace said he lives next door and has had to call the police a few times already in the past and will continue to so if there are problems. He is concerned about boats and canoes on his property. He also is concerned about accesses in and out from his land.

Scott Emerson moved, Steve Kinnunen second, that following the review of Rezoning Request #138, and the Staff/File Review, and holding a public hearing, the Planning Commission recommends that the Township Board APPROVE Rezoning request #138 for a text amendment to Zoning Ordinance #34 under Section 204 PUBLIC LANDS ZONING DISTRICT to amend the PERMITTED PRINCIPLE USES by adding “Marinas.”

Ayes 6, Nays 0. Motion carried.

B. Consider – Rezoning #136

This is a request by Chocolay Township for the rezoning of an approximately 3.58 acre parcel from R-1 to PL. This property is more commonly known at 137 W. Main Street.

Dennis Stachewicz went over map for the public and restated the reasons for the rezoning request and previous text amendment.

Steve Kinnunen moved, Scott Tabor second, that following the review of Rezoning Request #136, and the Staff/File Review, and holding a public hearing, the Planning Commission recommends that the Township Board APPROVE Rezoning request #136 for the following reason:

1. The rezoning is consistent with the Township Comprehensive Plan and Recreation Plan.

Ayes 6, Nays 0. Motion carried.

C. Consider- Conditional Use #76

Gentz, Inc. has requested Planning Commission review of a Conditional Use to expand their golf course located at 353 Gentz Road in Chocolay Township.

Dennis Stachewicz said his biggest concerns are water testing and setbacks on the northern boundary of the site plan. Mr. Stachewicz recommended that an additional monitoring well be installed at the NW corner of the property near the greens for Holes #14 and Holes #16.

Mr. Stachewicz also said he spoke with the Marquette County Health Department and they did not have any concerns about the water usage. He advised that the primary concern is related to nitrates leaching into the groundwater.

Location of current wells and possible placement of new wells were discussed. Mr. Stachewicz said he did not see any use for the current well in the center of the property and he recommended that it be removed in lieu of another well at a more appropriate location.

Ken Tabor moved, Scott Emerson second, that after review of Conditional use request #76, the Staff/File Review – Site Data and Analysis, Sections 208, and 701 of the Zoning Ordinance, the site plan and application provided, and subsequently finding compliance with the standards for approval of the request found in section 701 of the Zoning Ordinance, the Planning Commission approves Conditional Use request #76 as an amendment to Conditional Use #19 with the follow conditions (in the case the word “applicant” means Gentz, Inc):

1. Conditions #1, 2, and 3 required for the previous amendment to Conditional Use #19 (approved on June 1, 1998) shall be required as a condition of this approval; and
2. The applicant shall revise the placement of the cart path and tee for Hole #14 so that it meets the requirements of the Zoning Ordinance; and
3. The clubhouse and cart storage shown as part of “Phase II” are not included in this approval as they have already been constructed; and
4. An additional monitoring well shall be installed at the northwest corner of the property near the putting greens for Holes #14 and #16 as shown on the site plan and an additional monitoring well shall be installed as the southeast corner of the previously built nine hole course, and removal of the clubhouse well; and
5. A zoning compliance permit shall be obtained from the Chocolay Township Zoning Administrator prior to the start of construction; and

6. A zoning compliance permit shall not be issued until all other necessary permits as required by Federal, State, and Local Agencies are acquired.

Ayes 6, Nays 0. Motion Carried.

D. Presentation- U.P Engineers and Architects – Zoning Ordinance Update

Pat Coleman, U.P. Engineers and Architects, said he is there to talk about the process of the project. He said the current schedule would require a meeting in October to start drafting the new ordinance language and then another meeting in January to formalize the draft. Mr. Coleman said his firm will hopefully get a new ordinance in front of the Township Board and approved in March, which would be right on schedule.

Mr. Coleman went over the zoning and recreational use concerns from the Chocolay Township Comprehensive Plan from 2005.

Proposed industrial activity on M-28 was discussed. Mr. Coleman and Mr. Stachewicz agreed that industrial opportunities should be looked at closer in this process.

Mr. Coleman presented a zoning map to the Planning Commission and discussed property ownership lines.

Mr. Coleman asked about other issues of concern. Mr. Denton said he is concerned about outside wood-burning units and would like that to be looked at closely. It was the consensus of the Planning Commission that lighting and private roads were other areas of concerns to be addressed. Steve Kinnunen said that they really try to be proactive and stop problems before they arise. He also said that it is important for them to be prepared to deal with residential developments coming into Chocolay Township. Scott Emerson said snowmobile issues should be addressed. Estelle Devooght asked to be brought up to date on eminent domain and how to protect certain areas within the Township.

Randy Gentz said that this project seems very good for the Township and like the way it is moving along.

Mr. Coleman said he would plan on coming back to a meeting in October.

E. Consider – Letters of Support – MARQTRAN Grant Proposals

The Planning Commission allowed the Chair to sign the supports letters provided and the letter to the Township Board asking them to consider supporting the projects.

VIII. PLANNING DIRECTOR'S REPORT

Mr. Stachewicz said the enhancement grant was submitted to MDOT and now will be sent to the State for review. He also said that he submitted a trail proposal with the DNR as part of the request and the trail may also need conditional use approval.

Mr. Stachewicz said Dr. English has been reminded that his 90 day period for submitting a PUD has expired and another preliminary meeting needs to be scheduled.

He also said the former Silver Creek Church property on M-28 has accepted an offer from another church which is why the rezoning request was pulled.

IX. PUBLIC COMMENT

Richard Uren said he was there to talk about the condominium project and was frustrated that it wasn't on the agenda tonight. He didn't know it wasn't going to be addressed. Mr. Stachewicz said he has spoken with several members acting on behalf of the project and notified them that the application is deficient.

Mark Maki gave a history of lot sizes in the Zoning Ordinance. He stated that in 1977 there were a lot of political compromises that made the Zoning Ordinance the way it is today.

X. COMMISSIONER COMMENT

None.

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

XII. ADJOURNMENT

Meeting adjourned at 8:51 pm.

Estelle DeVooght, Commission Secretary

Rebecca Stachewicz, Recording Secretary

Charter Township of Chocolay Planning Commission Meeting

Monday, September 11, 2006
7:30 P.M.

Present: Steve Kinnunen, Al Denton, Tom Shaw, Estelle DeVooght, Dennis Magadanz,
and Ken Tabor

Absent: Scott Emerson

Staff: Dennis Stachewicz (Director of Planning and Community Development), Tom Murray,
(Community Development Coordinator) and Rebecca Stachewicz (Recording
Secretary)

I. MEETING CALLED TO ORDER / ROLL CALL

Al Denton called meeting to order at 7:30 p.m.

II. APPROVAL OF THE MINUTES OF THE APRIL 10, 2006 MEETING

Dennis Magadanz moved, Estelle DeVooght second, to approve the minutes as presented.
Ayes 6, Nays 0. Motion carried.

III. APPROVAL OF AGENDA / ADDITIONAL ITEMS FOR AGENDA

Dennis Stachewicz stated he would like to add an item to discuss a request for a 30-day
extension for the Ewing Subdivision added (formerly Elderwood).

Steve Kinnunen moved, Estelle DeVooght second, to approve agenda with the additional
item. Ayes 6, Nays 0. Motion carried.

IV. PUBLIC COMMENT

None.

V. OLD BUSINESS

None.

VI. NEW BUSINESS

A. Consider- Bayou Condominiums Final Development Plan

Mr. Stachewicz stated that he recommends an approval with conditions that the developer
provide approvals from the Marquette County Health Department (MCHD) and the
Marquette County Road Commission (MCRC) prior to presenting to the Township Board,
and that the site plan be approved with the condition that the driveway width between
buildings B & C shall be a minimum of 24 feet, instead of the 20 feet the plan shows now.

Mr. Stachewicz said the township attorney reviewed the Master Deed and didn't have a
problem with it. He also said the legal description will be incorporated into the Master
Deed.

Rich Uren said that the width of the driveway was a mistake on the plans and it will be
corrected. He also said that he probably won't have the letter from the MCHD this week,
but it is being worked on. He said that a Type 3 well for multi-home property must be
approved by the MCHD with DEQ rules, which takes time.

Estelle DeVooght asked about possible standing water at the site of the storm water
retention pond. Mr. Uren stated there should not be much standing water because of the
soil type, except in the spring when the ground is frozen.

Mr. Magadanz asked what kind of lighting is planned. Mr. Uren stated that only residential, downward facing lighting will be used. There will no freestanding light poles with arms present.

Mr. Kinnunen asked about landscaping with trees there. Mr. Uren said they are trying to maintain as many trees as they can and will only remove what they need to so they can get the building in.

Ms. DeVooght asked about snow removal in the winter. Mr. Uren said the snow will be pushed towards the north end of the parking lot.

Mr. Kinnunen asked about the trash holding receptacle. Mr. Uren said it will be covered with a partial wall.

Mr. Kinnunen asked about the well, if it will be below or above ground. Mr. Uren said it is below ground.

Dennis Stachewicz said if lighting is a problem, the Planning Commission can put in a condition that only down facing fixtures on building be allowed to ensure that nothing pops up in parking lot in the future.

Mr. Uren the approval from the MCHD is taking more time than expected and he is working under time constraints. He asked that the Planning Commission conditionally approve the request in a manner that it could be presented to the Township Board at their next meeting.

Mr. Stachewicz stated that after September 18th, the next Township Board meeting will be October 16th. He also said that past practice has allowed the Planning Commission to issue conditional approvals as long as the information is presented to the Board.

There was discussion by the Planning Commission regarding the applicant's request and the timing of the development. The Planning Commission asked Mr. Stachewicz if it would be appropriate to honor the request. Mr. Stachewicz said he wasn't positive but he thought the Planning Commission could attempt a conditional approval.

Tom Shaw moved, Dennis Magadanz second that the Planning Commission recommends approval of the preliminary site plan for the proposed Bayou Court Condominium and forwards it to the Township Board with the following recommended conditions:

- 1) The developer must provide approvals from the Marquette County Health Department and Road Commission; and
- 2) The site plan is being approved with the condition that the driveway width between buildings B and C shall be a minimum of 24 feet

Ayes 6, Nays 0. Motion carried.

B. Consider- MNRTF Grant Application

Tom Murray said that this is the third try for this grant that was previously applied for in 2003 and 2005. He said that this year they have scored more points than they have in previous years, but there is no indication yet that they will receive the grant. He does believe though that there is a good chance that they will get it.

Mr. Murray stated that the DNR is asking for clarification on trail length, construction and the layout of the trail. He asked for support of planning commission on this project.

Dennis Magadanz asked if the soccer association brings in any tourism because that may bring up the tourism scoring of the grant. Mr. Murray stated that is a good point and will bring it up.

Estelle DeVooght asked if these trails are already constructed. Mr. Murray stated that they are not formal trails, only footpaths.

Steve Kinnunen stated that if this could be made into a cross-country ski path, and if so, that would certainly increase the points. Mr. Kinnunen also asked about the time deadline.

Mr. Murray stated Oct. 1 is the deadline.

Al Denton said a lot of people from Marquette County play on the Chocolay Township soccer fields.

Mr. Murray stated that it was written into the grant that our fields serve approximately 42,000 people.

Ken Tabor moved, Steve Kinnunen second, to recommend that the Township Board support the follow-up on the application and allow staff to respond to the MNRTF grant coordinator by Oct. 1, 2006 and provide the supplementary trail information as reviewed by the Planning Commission.

6 Ayes, 0 Nays. Motion carried.

C. Additional Item: Request for 30 Day Extension for the Ewing Pines Subdivision (formerly Elderwood Subdivision)

Mr. Stachewicz said this is formerly the Elderwood Subdivision and the last extension was asked for in August of 2005. Mr. Stachewicz presented Planning Commission with a written letter and is recommending that the Planning Commission support an additional 30-days for preliminary approval.

Steven Kinnunen moved, Ken Tabor second, to recommend that the Chocolay Township Board approve the request for a 30 day extension to the preliminary plat approval for the Ewing Pines (formerly Elderwood) Subdivision. 6 Ayes, 0 Nays. Motion carried.

VII. PLANNING DIRECTOR'S REPORT

Mr. Stachewicz said he didn't have anything to report.

VIII. PUBLIC COMMENT

None.

Rebecca Stachewicz, Recording Secretary

Charter Township of Chocolay Planning Commission Meeting

Monday, October 9, 2006
7:30 P.M.

Present: Dennis Magadanz, Al Denton, Estelle DeVooght, Steve Kinnunen, Tom Shaw,
Ken Tabor,

Absent: Scott Emerson

Staff: Tom Murray (Community Development Coordinator) and Rebecca Stachewicz
(Recording Secretary)

I. PUBLIC HEARINGS

A. Superior Pines Condominiums—Rezoning to Planned Unit Development and acceptance of a Preliminary Development Plan

Thomas Johnston, 343 Kawbawgam Road, said he has lived at residence for the past 13 years, and he moved there because it's a rural, quiet environment. He said there is a battle for water there though, and he stated his fear that his well will dry up if this condominium project goes through. He stated this board should provide protection to keep this from happening, and hopes that they do just that.

Don Rudness, 323 Kawbawgam Road, said he's lived there since 1973 and had a new well installed in 1989. Then last summer it almost went dry because of the dry weather. He said that he was told by the well digger that he wasn't the only one this was happening to, and was told that all they can do is pray for a lot of precipitation. He said he cannot afford for his well to dry up and to have to replace it again.

Shawn Campbell, 212 Kawbawgam Road, said he also had to put in a new well a few years ago because the previous one dried up. He said that the casino has already caused the water levels to go down. He also stated that he likes living in the rural area and hopes it stays rural.

Dennis Tryan, 315 Kawbawgam Road, said that his well only sits at 32 ft and the deeper you go, the worse the water gets. He said that he wants to know who he goes after if his well goes dry if this new development goes in. He said he wants a guarantee that this won't happen, but wants to know who is responsible if it does.

Janet Amundsen, 2029 E M-28, said she put in new well just this year, and asked the commission not to allow any more development until developers build a retention pond. She related Chocolay Township to a Chicago Suburb that her family moved from many years ago. She also stated that at 40 feet down you will get good water; at 100 feet down, the water is poor but treatable, and any lower than that, its not safe at all. She said that everyone has a right to build on their own property, but they don't have a right to contaminate the water that everyone uses. She referred to Fred Benzie from the Marquette County Health Departments (MCHD) and that he stated in the Mining Journal that the water available is of good quality. But she wants to know how do they measure the quantity of the water available. She asked the commission to get an answer to that question.

Patrick A Barnett, 1971 M-28 E, stated that he is a licensed attorney and he encouraged everyone present to speak against this project. He said that they vote for the leaders of the Township, and they will use the power of recall if necessary. He asked for a show of hands for people who oppose this project and then asked for people to show hands who support it

Gary Loehr, 1975 M-28 E, said that he was at the April 10 meeting also. He stated that he has water concerns like everyone else. He said there are a lot of questions that he doesn't believe that the MCHD has answered, like if the condos would be rented out to people using snowmobiles in the winter, which would cause a whole new range of problems.

Elizabeth Delene, 232 Kawbawgam Road, said she has lived there for 6 years and she is already on her second well. She asked for a feasibility study before this project happens

and also stated there are already a lot of homes already for sale in Chocolay Township that aren't selling which should be addressed before more are built. She said that she is also concerned about sewer problems and ecoli problems like in Big Bay.

Judd Johnston, 1943 M-28 E, said he has a young family and he chose to live in Chocolay instead of Marquette because of the ruralness. He said that the casino was already illegally built and he doesn't want that situation to happen again.

Connie Barto, 1951 M-28 E, said he has lived there for 25 + years and every few years or so she comes to protest zoning issues. She stated that she also had to get a new well after the casino came in. She also said wants to keep the area residential, and just wants to make sure that the area doesn't get zoned commercial. She said they don't want this to be another Traverse City.

Dennis Tryan asked about how deep the casino went for their well. It was stated that the casino does not serve water from their well for drinking, that they only use bottled water.

Mike Nelson, 1849 M-28 E, said he used to own 1887 M-28 E also, but sold it because he couldn't get any water there. He said he wonders how far the water problems are going (distance wise). He said he takes responsibility because he built there when he knew there were water problems. He said he thinks that putting more units up are problematic knowing what they do about the water in the area.

Bob Cambensy, 306 N. 6th St., Marquette, said that he is doing some of the engineering for Dr. English. He stated that both wells Dr. English already drilled are 125 deep, that it is the more shallow ones that have the problems. He said that its well-known that the shallower ones have the better water quality though. He explained that the well logs show soil levels (sandy clay layer and clay layer) are present, which is adequate for drilling. He recommended that people talk to Chuck Thomas at the DEQ office in Gwinn for expert information on the water issues.

Glenn VanNeste, stated that he is a surveyor and doing some design and layout on this project. He said that there is a 1-acre minimum per house, and it's a site condominium, there won't be a giant apartment building or anything like that. He said that this development agrees with what has been agreed upon in Master Plan. He said there will be 41 houses maximum in the development.

Patrica Kauppila, 8 Red Fox Trail, asked for experts to come in and explain the water issues to avoid fights. She said that Dr. English wants to do this project but he lives and works in Marquette, so the water won't affect him like it will the people who actually live there.

Dr. John English, stated that he has been a property owner in Chocolay Township for 41 years, so he is not an outsider.

Patrick Barnett stated he is a licensed attorney and that the County won't be held responsible for their bad water, but Dr. English's corporation will be. He said that if there are not any assets in the corporation, there won't be any place to get reimbursed from.

Glenn Barto, 1951 M-28 E, asked if there will be financial provision if there are losses.

Tom Murray stated that the question about financial provisions / reimbursement is one that the township attorney will have to answer.

II. MEETING CALLED TO ORDER / ROLL CALL

Al Denton called meeting to order at 8:05 p.m.

III. APPROVAL OF THE MINUTES OF THE SEPTEMBER 11, 2006 MEETING

Al Denton stated that there was an error on Page 2, seventh paragraph down. It should state, "Mr. Kinnunen asked about the trash holding receptacle. Mr. Uren said it will be covered with a partial wall." Mr. Denton also pointed out a couple other typographical errors.

Estelle DeVooght moved, Dennis Magadanz second. Ayes 6, Nays 0. Motion approved as corrected.

IV. **APPROVAL OF AGENDA**

Al Denton stated they wouldn't take up a new agenda item after 10 p.m.

Estelle DeVooght moved, Dennis Magadanz second. Ayes 6, Nays 0. Motion carried.

V. **PUBLIC COMMENT**

None.

VI. **OLD BUSINESS**

None.

VII. **NEW BUSINESS**

A. **Consideration of Superior Pines Condominiums-Recommendation on a rezoning to Planned Unit Development and acceptance of a Preliminary Development Plan**

Tom Murray stated that this is a 3-part process. He said this is the only public hearing that will be available, and the vote tonight by the Commission is only to recommend the plan to the Township Board. He said then it would then go on the November Township Board agenda. He said the public is invited to review any info they have in the office and to contact Fred Benzie at MCHD with any further concerns. He also stated that he has 8 letters submitted in writing in opposition to the project.

Mr. Magadanz asked about County Rd BAA and if there have been conversations with the County Road Commission about moving it.

Glenn VanNeste said they have met with the Road Commission and they have approved it relocated as shown on the map.

Mr. Denton asked for clarification on how many units will be built. Mr. VanNeste said there will be 41 units..

Mrs. DeVooght reiterated that these site-condos are just normal sized houses and that people are blowing it out of proportion, thinking they are huge buildings.

Mr. Denton asked about total acreage that will be covered. It was stated that 26 acres will be used and only 4 deep wells will be drilled.

Mr. Kinnunen said that he wondered about the project's water usage rate will compare with the water usage rate at the casino. He said that will be a good comparison and would like to find someone to find that out for them.

Mr. Kinnunen said that the Superior Watershed Partnership wrote a letter offering their assistance. It stated that they are concerned about quality and quantity issues associated with this project. Mr. Kinnunen stated that he is leaning towards more research being done on the project and he urges more review before they make a decision.

Mr. Shaw said he agrees that more research needs to be done, that the water questions need to be answered.

Mr. Denton said that that the water quality according to the MCHD is good and treatable.

Mrs. DeVooght said they need some expert advice.

Mr. Tabor said he would like some authoritative advice also.

Dr. English said large families just aren't common any more, so the number of people per house will be small. He stated that the homes being proposed small in square footage, ranging from 1200-1600 sq ft.

Sunday Waldon, 2052 M-28 E, asked if they could come back next meeting with answers. Mr. Denton said they would let them know after they vote.

Don Rudness said people don't have problems with the word "condominium" but only with the water issue, and they want guarantees.

Mr. Kinnunen stated that as far as development goes, it seems good, and he supports it, but the water issues need to be cleared up.

Steve Kinnunen motioned that the issue be tabled, and to find out about usage rates. Ken Tabor second. Ayes 6, Nays 0. Motion Carried.

A gentleman asked about bringing Lake Superior water to the Township. Mr. Magadanz stated it would cost \$14 million for them to do that.

Mr. Denton asked Mr. Murray to arrange professionals from MCHD and DEQ to be at next meeting to discuss water issues.

B. Consideration-Ewing Pines Subdivision-Final Plat

Tom Murray read the memorandum to the public, stating that Mr. David M. Dausey, of Green Ventures Development, LLC, has requested a final plat review of the Ewing Pines Subdivision formerly known as Elderwood Subdivision. The most recent Township action on this issue is the 30-day preliminary plat extension granted by the Township Board on September 19, 2006, which will expire on October 18, 2006.

Mr. Denton asked if the County Road Commission has looked at the cul-de-sacs in the plan. Mr. Dausey stated that everything has been approved and should have a signed copy in a week

Dennis Hendrickson, 136 Veda, said he owns a 4-acre lot adjacent to the Ewing subdivision that he has a drainage problem. He said his house is on high ground, but in the spring his property retains a huge amount of water. He said he would like the new subdivision draining system to connect with the current draining ditch that is already in place. He would like to see an engineered outflow of water in to the drainage ditch, and he has an engineering background so he knows this can be done. He stated that he doesn't have anything against the development, but wants to make sure the water runs through their land and doesn't end up puddling up in his. He said there is basically a dam causing the water to end up in his property. He presented the board a map, which showed his property in relation to the subdivision and showed where the water problem was.

Mr. Magadanz asked if he is referring to the drainage behind Oliver Burn's property. Mr. Hendrickson said yes.

Mr. Denton asked him to show the connecting solution he was proposing on the map. Mr. Hendrickson did as asked.

Mr. Dausey stated research has been done on this, and approval has already been given.

Mr. Murray said he wished that this issue were brought up to him earlier, because he would have had someone else look at it. Mr. Murray stated that the County Drain Commission would have the final call on this.

Mr. Shaw said that this seems like a good subdivision, but there can't be dams that stop water flowage.

Mr. Magadanz said that he saw that the Department of public works had a question regarding sewage system, that they requested map. It was stated it was stated it was given to him and all that was taken care of. Mr. Magadanz also asked if there were lead locators. And the answer was that "yes, there was."

Steve Kinnunen moved, Ken Tabor second, that the Charter Township of Chocolay Planning Commission recommends that the Township Board approve the Final Plat of the Ewing Pines Subdivision as presented. With the condition that the Drainage Commissioner is allowed to review and provide for a correction on the natural flow of storm water.

Ayes 5, Nays 1. Motion Carried.

VIII. PLANNING DIRECTOR'S REPORT

Mr. Murray stated that they received 7 applications for the open planning position. He said the selection process will begin next week, and hopefully have a replacement set in the next 2-3 weeks.

Absent: Ken Tabor

Staff: Tom Murray (Community Development Coordinator) and Rebecca Stachewicz (Recording Secretary)

I. MEETING CALLED TO ORDER / ROLL CALL

Al Denton called meeting to order at 7:34 p.m.

II. APPROVAL OF THE OCTOBER 9, 2006 MINUTES

Tom Shaw moved to approved minutes, Denny Magadanz second.
Ayes 6, Nays 0. Motion approved.

III. APPROVAL OF AGENDA / ADDITIONAL ITEMS FOR AGENDA

Tom Murray said he would like to add "Zoning Ordinance Update" under New Business. Steve Kinnunen moved to approve the agenda with addition of VII, Item C, Zoning Ordinance Update.
Tom Shaw second. Ayes 6, Nays 0. Motion approved.

IV. PUBLIC COMMENT

Mark Maki, 370 Karen Road, said a disturbing thing going on in the Township, and he is present to make the Planning Commission aware of it. He said there are two items he is concerned with. The first is the recent site condo project on Main St. and U.S. 41. He said Arlene Hill, Gregg Seppenau and the Township Board are denying him access to those plans, and he filed a Freedom of Information Request on August 8, 2006, but Arlene Hill never responded. He said first part of November he finally looked over site plans and found a problem. He said he's tried to talk to Randy Yelle, but his letters are intercepted, and he isn't getting any answers. He said he doesn't believe that site plans meets the Township Ordinance, and he thinks the Township Board will cover up the discrepancies. He requested that this issue be on the next Planning Commission agenda.

Mr. Maki stated that his second concern deals with the Kawbawgam Road project, the Dr. English plans. He said the Township made an agreement to sell land to Dr. English with an agreement that if he doesn't get the property rezoned he will get his money back. He said that is not proper planning practice. He said the Township Board doesn't like to follow the zoning ordinance. He asked the Planning Commission to do something about it and not to hide.

Gary Loehr, 1975 M-28 E said he still has questions about the Superior Pines / Dr. English project. He said they asked for more information last meeting and wanted to know if answers were available.

Tom Murray explained that water depths and recharge rates of the aquifer is what is being questioned. He said that they developer knows that he needs to come back with engineering information on the water issue, but they don't plan on seeing more info until December. He said that the public will be given the proper notice when it comes back up for discussion.

Gary Loehr said that this is like asking the "fox to watch the hen house" if the Township is asking the developer to bring in information from their own engineer. He said it is a conflict of interest.

Al Denton stated that the Dr. English project is not on the agenda tonight, and that the public will be informed when it is.

Elizabeth Delene, 232 Kawbawgam Road, said she filed a police report, because Dr. English was trespassing on her property. She said she confronted him and he lied and said he was hiking. She said she asked him to leave, but he didn't. She said that she is still concerned about the water, and water studies have been done previously and they haven't been looked at.

Al Denton said that no reports have been submitted to them concerning the water.

Scott Emerson asked if objective, hard data, on this water would be made available to them.

Mr. Murray said it would be up to the developer to bring the info to the table.

Mr. Emerson said that an objective 3rd party assessment would be good to get.

V. OLD BUSINESS

None.

VI. NEW BUSINESS

A. Site Plan Review – Moyle Development

Mr. Murray said that the commission packets contain the plans for the Moyle Development. He said he had compared the plans with ordinance requirements and he did not find them to be out of compliance. He went through the report and stated that parking, dumpster/screening, lighting, snow storage/drainage, and utilities all seem to be adequate and in compliance with the ordinance. He stated that the lighting standards may not exceed 30 feet in height.

Brian Savolainen from TriMedia Consultants introduced himself as the Civil Engineer on the project, Kevin Geshel, Director of Development for Moyle Development and Tom Helminen were also present.

Brian Savolainen said he's had several meetings with MDOT concerning this project. He said the whole site is zoned commercial. There will be a deceleration lane coming into the site, and a bump out for cars turning left. He said that Holiday Gas and Togo's have agreed to allow a frontage road to allow access to the businesses.

Al Denton asked where the well is at on the property.

Mr. Savolainen stated it is located in the far SE corner of property, more than 800 feet from any potential contamination, as required. He said it has been reviewed by the Health Department and has been approved.

Al Denton asked about signage on the property.

Mr. Savolainen said there will be stop signs, and he said that all signage will meet the ordinance.

Mr. Savolainen said that being a single story building, everything will be under the 30 foot height limit. He stated all lights will be down-lit fixtures. He explained that Togo's in Marquette and the Harbor Hills sites have the same type of fixtures that they will use on this project. He said the lights will have a 3-foot base that will withstand any snow plow abuse.

Scott Emerson asked if power will be under ground.

Tom Helminen stated that they aren't sure on that yet, the at the site is on the border of the R.E.C. and B.O.L.P. electrical districts and that he is still waiting for an answer and that he hopes to have it soon.

Mr. Emerson said that some people over look importance of landscaping, especially in the winter months. He said that he recommends 4 evergreen trees to be planted, 2 white

spruces and 2 blue spruces. He showed on the map where he suggested they be planted. He said that having something substantial in the core would keep it from looking bleak in the winter and help with the aesthetics.

Mr. Emerson said he is not clear where the access road is being proposed.

Mr. Savolainen said there will be 2 connections, one in back of Togo's that will loop around the properties.

Tom Geshel said that the idea is to have all the retail businesses work together, and make the businesses want the road to be there. He said that Togo's and Holiday Gas owners are very happy to be working with them, and agree that the traffic should move in a continuum.

Mark Maki looked at the map and said he didn't think the map was accurate, but he is not sure. He said they need to watch parking spaces and required green spaces.

Tom Murray said that current access road at the entrance of the race track is on the MDOT right-of-way. He said they have to talk to those owners to move that access point out of the right of way.

Mr. Emerson asked if road will connect in front of Togo's or in back.

Mr. Geshel said it would connect in the back.

Tom Shaw asked about removing parking spaces at Togo's, but said he appreciates the flow of traffic through the area.

Mr. Geshel said there will be plenty of parking and the ordinance will be followed.

Al Denton asked Tom to find out the parking space requirements at Togo's.

Mr. Savolainen and Mr. Geshel explained that they are working closely with the owners of Togo's and Holiday Gas and there is not any hostility between them.

Elizabeth Delene asked the developers to explain potential problems with wetlands.

Mr. Savolainen said they will talk to the DEQ and obtain any permits needed if they build on any wetlands.

Mr. Emerson said that it will be important for them to preserve the trees along M-28.

Mr. Savolainen said they will keep any that are 3 feet or further from the road, which he thinks will be most of them.

Steve Kinnunen said that for every tree they take out, they should replace one.

Mr. Geshel explained that they don't refer to this development as a strip mall because of negative connotations related to that. He said they like the trees, they like the current landscape in that area and have learned from other's mistakes. He said this project will have an original feeling, that there will be 3 different façades, each business will have an individual feel, unlike a strip mall. He said they want to do a good job and make the Township proud of the development

Estelle DeVooght asked for clarification on where the roads will be, wants to know where the vehicles will be coming in and out.

Mr. Savolainen showed the Commission closely on the map. He said the current road exiting to the Holiday driveway will be moved 50 feet back and it will serve more as a classic frontage road.

Mr. Emerson asked them please make sure to save the big white pine tree that is located there.

Mrs. DeVooght said they don't own that property where they are proposing the road, and doesn't understand how this is possible.

Mr. Geshel said they know they don't own it, but they are talking to the property owners about getting an easement and have verbal approval already and once it is approved by the planning commission will go to them and get the legal approval.

Mr. Savolainen said they working with Jeff Rautiola and Arron Johnson, MDOT engineers on this

Tom Murray said he took this to the corridor committee already and it was and approved. He said that all parties at MDOT assured him that it is a good project.

Mrs. DeVooght asked that once the project is approved, how could they be assured that the road is actually placed where they see it on the plans.

Mr. Geshel said again that the owners have verbally approved the plans, but once the Commission approves it, they will then take it to the landowners for legal easements and approval. He said the landowners know that the best thing for their business to do this. He said that if plans change at all, they will have to come back for a new approval.

Mrs. DeVooght said she has qualms on making a final approval tonight, in case something goes array and they decide to change the plans.

Mr. Kinnunen advised Mrs. DeVooght that if anything changes they will have to come back if anything changes.

Mr. Geshel said the restaurant chain proposed to come is not a competitor to Togo's. He said that the project can only help Togo's.

Mr. Kinnunen stated that MDOT needs to allow the Township the proper signage for the restaurants to bring people through the area. To help steer them down the access road to help these businesses thrive.

Mr. Geshel said they haven't talked about that much yet (the highway signs) but their signs on the buildings will be very elegant, not big, huge ones. He said though signs can be challenging with the amount of snow we get here, and that they will make it work.

Scott Emerson moved to approve the final site plan as presented with the noted additions:

1. Four additional spruce trees be added to the landscaping per discussion.
2. Every attempt be made for underground power
3. Every attempt made to locate the access road in front of the trees and save any trees possible.
4. Any trees removed need to be replaced by a 1:1 ratio

Staff was requested to ensure that the required parking for Togo's would not be affected by the access road.

Steve Kinnunen seconded motion.

Ayes 6, Nays 0. Motion approved.

B. Road Rankings- Recommendation to the Township Board

Mr. Murray said that this is his first time working with road rankings, and he is looking for guidance on the procedure from the Planning Commission.

Mr. Denton said Wright St is traveled a lot and deserves to be fixed and Terrace St (East and West) also should be fixed. He thought that Main Street could use work also, but that it should wait until the condominiums are completed.

Mr. Magadanz said that CR-545 is a County road and on County road rankings. He said they will probably take care of it themselves and that it doesn't need to be on the Township rankings.

Mr. Magadanz asked Mr. Murray to get the County Road Ranking list from Martin in Public Works to compare the two lists, because there could be a lot of duplicates.

Al Denton said he recommends fixing Terrace St (East and West), W. Wright Place and Riverside Road.

Mrs. DeVooght asked about Shot Point. Mr. Magadanz said that would be very expensive.

Mr. Kinnunen said some roads on the list are kind of far out and not as heavily traveled and that they should concentrate on the main traffic.

Scott Emerson moved to approve the road rankings starting with Terrace Street West as #1 priority, Terrace Street East as #2 priority, and West Wright Place as #3 priority and the rest as listed. Add South Big Creek at the end and CR-545 removed from the list.

Steve Kinnunen second. Ayes 6, Nays 0. Motion approved.

C. Zoning Ordinance Update

Mr. Murray said that Pat Coleman from U.P. Engineers and Architects (UPEA) is working on the zoning ordinance update, but that it got behind schedule because of an illness in the family. He said that Mr. Coleman plans to be at the December Planning Commission meeting to give an update and answer any questions.

VII. PUBLIC COMMENT

Mark Maki, said requested copies of letters from Dennis Stachewicz and Randy Yelle concerning the zoning ordinance updates sent to Pat Coleman, but he hasn't seen them. He said he is asking the Planning Commission letters to get them for him.

Tom Murray advised Mr. Maki that should go through the Township Clerk or Supervisor for that information.

Elizabeth Delene asked where Carmen Road by A&W is on the road ranking lists, because it isn't a very good road. Mr. Magadanz advised her that is it on the list but not in the top 10.

VIII. COMMISSIONER COMMENT

Steve Kinnunen said that the Moyle project they approved tonight looks good and it is good to see that kind of development in Chocolay Township. He said it doesn't look like it will look like a classic strip mall, that it will look individual and special to the community.

Estelle DeVooght asked if it's on the record that Tim Hunt was sent a letter at all about the Bayou Court project. She said she wanted to know if he was ever sent notification, because he says that he never received anything.

Tom Murray said that a notice may have been sent regarding a prior zoning change but that the site plan review process doesn't require a public hearing or notification.

Steve Kinnunen said they came in awhile back, 1 or 2 years ago, to be rezoned to commercial, but it was denied. He said that Mr. Hunt probably got a letter then.

Mrs. DeVooght said she is looking to see if we can prove that he got one.

Tom Murray said they could look to see if anything is on the record.

Scott Emerson said he also heard that other neighbors are upset over this site condominium project.

Mr. Murray read section 216 A. 1. that states that site condominiums may be located within all zoning districts. He said that people are allowed to develop their property as permitted by the ordinance.

IX. PLANNING DIRECTOR'S REPORT

Mr. Murray said that Jason Laumann will start as the new Director of Planning and Community Development on November 27th, 2006. He said that Jason is coming from the Coastal Management Division, located in northern Wisconsin and the agency is equivalent to CUPPAD. Tom stated that he is very knowledgeable in Planning and GIS and should be

an asset to the Township. Mr. Magadanz asked Mr. Murray if the new Planning Director plans to put the sewer system on the GIS system. Tom said he isn't sure at this time, but hopes so.

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

A. 2007 Budget Review

Mr. Murray apologized for not presenting the budget at the October meeting and outlined that the budget includes a \$10.00 per diem increase per meeting and an increase for printing and publishing. Mr. Shaw asked about the other Township salaries compared to Chocoday's. It was answered that others may be a little bit higher. Mrs. DeVooght said she didn't think they needed a raise; she does it to serve her community.

XI. ADJOURNMENT

Meeting adjourned at 9:03 by Al Denton.

Estelle DeVooght, Commission Secretary

Rebecca Stachewicz, Recording Secretary

Charter Township of Chocolay Planning Commission Meeting

Monday, December 11, 2006, 7:30 P.M.

Present: Chairman Al Denton, Vice Chairman Tom Shaw, Estelle DeVooght, Dennis Magadanz, Ken Tabor, and Scott Emerson

Absent: Steve Kinnunen

Staff: Jason Laumann (Director of Planning and Community Development), Tom Murray (Community Development Coordinator) and Rebecca Stachewicz (Recording Secretary)

I. MEETING CALLED TO ORDER / ROLL CALL

Al Denton called meeting to order at 7:30 p.m.

II. APPROVAL OF THE MINUTES OF THE NOVEMBER 6, 2006 MEETING

Estelle DeVooght moved to approve 11/6/06 minutes. Scott Emerson second. Ayes 6, Nays 0. Motion approved.

III. APPROVAL OF AGENDA / ADDITIONAL ITEMS FOR AGENDA

Scott Emerson stated he has a brief letter concerning residential zoning he would like to read and have brief discussion. Al said the will make it item "C" under New Business

Denny Magadanz moved to approve agenda with the addition of VII, Item C. Scott Emerson second. Ayes 6, Nays 0. Motion approved.

IV. PUBLIC HEARINGS- none scheduled

Phillip May, 425 Lakewood Lane, said he didn't remember how things work here, but concerned about condominiums that may come into the area on Kawbawgam Road in the future. He would like it on an agenda in the future.

Tom Murray said he spoke to Mr. May about this on the phone already. He said there would probably be a public meeting in the future concerning this subject. He stated that the existing condo ordinance allows for condos in multiple zoning areas.

Mr. May said he understands that a person can't have rental units in a R1 area. Mr. Murray said you could have a rental unit as long as it is a single-family home. He stated that Tee Pee Village is a non-conforming use.

V. OLD BUSINESS

A. Discussion / Update Rezoning #139, Superior Pines PUD

Tom Murray stated that Glenn Van Neste and Bob Cambensey are present to give update. Mr. Van Neste said there is a misconception about site condominiums, that they are just a subdivision by another name, with an association. He said it looks just like any other subdivision, but this particular one is a PUD. A PUD is a type of zoning and it is negotiable and expected to go back and forth. He said the word condominium riles people up. He said they would try their best to answer all questions.

Al Denton gave overview of project. He said there are 40 acres total, about 20 will be developed, and right now it is zoned R1 and there will be about 1 acre per home.

Mr. Van Neste said there is actually more than 40 acres total, and that the first phase equals about 40 acres.

Mr. Cambensey said they are working with the Health Dept & DEQ and well tests have been done. He stated that the wells were monitored, samples sent to state labs for analysis,

the soil was also tested, now they are in discussion with the County Health Dept. and the DEQ and that they are putting it all together for submission. He said they should have results before they ask for any further approval.

Chairman Denton asked if it has submitted to the Township yet. Mr. Cambensey said not yet, but that it will be given to the Township once it is all submitted to the Health Dept. and DEQ.

Estelle DeVooght asked about the quantity of the water in the aquifer.

Mr. Cambensey said that is part of what they are testing for but the results have not been compiled as yet.

Mr. Emerson talked about the letter written to Mr. Murray stating there is no direct connection between the two aquifers. He said he also wanted to know the water data from KBIC report. He wondered why nobody could obtain that report.

Tom Murray said he has the report. It is a large document and it can be available to anyone who wishes to review it.

Mr. Emerson stated it would be good for the hydrologists to see the report. He said they need to be prepared for possibility or requiring a scale back of the development if the water tests don't come back as needed.

Ms. DeVooght asked if the KBIC water is treatable or not.

Mr. Murray stated it says it is high in iron content but treatable.

Pat Coleman of U.P. Engineers and Architects asked if the development is proposing central wells.

Bob Cambensey said that was the initial proposal, but after further discussions it now looks like there will be individual wells.

Scott Emerson agreed that there is a misconception about site condos. He said they are actually a very good form of development, there is a clustering of residents and open space is conserved. He said this would preserve rural character of the area.

Mark Maki, 370 Karen Road, stated that useful open space comes from the zoning ordinance, not the site condo act.

Glenn Van Neste said the KBIC has been so secretive through this whole process and was surprised that they now made the study available.

Mr. Denton said he just called them and asked for it and then went to pick it up, and it wasn't a problem at all.

Mr. Van Neste said the houses on Kawbawgam with water problems are on considerably higher ground than the ones in this development. He said the wells won't even be in the same aquifer.

Mr. Denton stated that three years of low precipitation has probably contributed to the low water levels in the area.

Mr. Van Neste said they would be back after everything is submitted.

VI. NEW BUSINESS

A. 2007 Proposed meeting schedule

No structural changes. Meetings will be every second Monday, unless there is a conflict with a holiday, and the November meeting will be moved up one week because of deer hunting season. The 7:30 meeting time will remain the same.

B. Zoning Ordinance update progress report—Pat Coleman UPEA

Pat Coleman stated there is still a lot of work to do and a number of public meetings remain. He said he had a good meeting with staff earlier and that he has met the new Planner. He said that Randy Yelle has been very helpful with suggestions. He said Mr. Yelle has historical knowledge that is valuable in a project like this.

Mr. Coleman said a big change would be re-organizing the ordinance. He said staff is in favor of organizing it into new chapters. He said not a lot of other work has to be done yet, that he is working on organizing it right now, but would like the Commission's comments and opinions. He said the Hwy. 41 Corridor Team has goal of getting all of the municipalities along Hwy. 41 to adopt the same access management ordinance. He stated that MDOT says the corridor as a whole is leaning towards using Marquette Township's ordinance, which seems overwhelming with all of its sketches and pictures. He said when the team reviews problematic issues along Hwy. 41 using this ordinance, it all becomes very clear and useful.

Mr. Coleman stated that the current ordinance is weak on definitions. He said definitions make things clear for everybody, the more there are, and the better off everyone will be. He said there a lot of them to add.

Mr. Coleman gave a handout concerning map changes. He said there is a number of residential districts and that the master plan recommends consolidation. He said the big thing would be to make 50-foot lots in the Village of Harvey conforming. Mr. Coleman said that Randy suggested additional recommendations for private roads, cul-de-sacs, fences, snow management / storage, and waterfront lots written into ordinance.

Mrs. DeVooght asked about how open space will be affected.

Mr. Coleman said he is recommending what was suggested by the master plan.

Mr. Coleman asked if it was agreed to reorganize the ordinance, and if so, he will work on it and have it ready for the next meeting.

Mr. Emerson said that he is concerned about section 200, and that daycare centers should be restricted to R2, R3, and R4. The new ordinance said it is allowed in all zones, and he doesn't think that is right. He said he believes an error was made in master plan. He said he didn't think day care centers should be allowed in a single-family residential area

Scott Emerson said he was also concerned about water front property being rezoned to C1. He advised that this be looked at. He stated he doesn't want waterfront property to become commercial, for things like fish markets, etc. He said he has a letter that he will give Mr. Coleman concerning this topic.

Mr. Magadanz pointed out a definition error on page 23 of the ordinance.

Scott Emerson commented on comprehensive plan section 9.5. regarding transmission towers. He said that he has personal contacts with the state police and emergency workers and knows that the 800 MHz systems they have know is not working as well as they hoped, and that they will soon need additional towers. He said they are looking at Green Garden Hill for a tower and that the Township need to get ahead of this issue to get around any negative aesthetics. He said they wouldn't be able to say no to the State Police if they decide to do something like this, but they may be able to try to make it look better.

Mr. Coleman said it is a good idea to get ahead of that issue, but it is hard to overcome tower issues. He said it is becoming one of those essential services. He thanked Mr. Emerson for the helpful comments.

Mr. Denton asked if windmills, towers, outside boilers, stoves will be addressed. Mr. Yelle and Mr. Coleman said that they would be.

Mr. Denton asked if "keyhole" water access and flood plains would be addressed.

It was agreed that they both would be addressed.

Mr. Coleman asked about the Access Management Ordinance, and if there were presentations to Chocolay Twp. about the positive uses?

Tom Murray stated there hasn't been a presentation thus far.

Mr. Coleman said that basically any parcel on Hwy. 41 would be allowed one driveway; any site over 600 ft will be allowed one additional access point.

Mrs. DeVooght said in her years on the Planning Commission, they've turned down a lot of driveway requests, but the Road Commission comes along and allows them anyway.

Mr. Coleman said that would be changing; the Road Commission wouldn't be able come along and grant extra driveways, that the ordinance will stop it. He said the Corridor Management Team will review all building permits and it will then go to the Planning Commission.

Mr. Emerson said that the color scheme on the zoning map was hard to distinguish and he suggested doing something different.

Pat Coleman said he talked to staff about that today, and that will be changed. He said there is a standard color scheme that is used, and they will go with that.

Mr. Coleman commented on the condo situation. He said if you look at demographics, ages are increasing, and that they have different housing needs than in the past. He said condominiums are just a point of ownership, they will want to make sure that zoning provides housing for everyone.

Mr. Emerson said there is a lot of interest and sensitivity to this issue and people want to make sure R1 remains that way.

Mr. Coleman said condominiums and the PUD process are really the only way to conserve open space. He said it is also quicker way for the developer.

Mr. Emerson clarified that if somebody wanted an area to allow for multi-family units, a public hearing and approval would be necessary through the PUD process.

Mr. Coleman said that is true, and that the zoning ordinance will prevent duplexes and other multi family homes in a single family district.

A resident (Judy, of Lakewood Lane) asked about the zoning ordinance process and for further explanation of site condos. She said that she has lived in the area for almost 30 years, and that it is important to preserve waterfront property and the current water and land resources.

Mr. Coleman and Mr. Murray further explained the site condominium process.

C. Scott Emerson letter

Letter read earlier in previous part of meeting.

VII. PUBLIC COMMENT

Mark Maki, 370 Karen Road, said he wants to bring shame to the Township for not sending a packet to him as requested. He said there is another problem with the Bayou Project. He said the Township refuses to acknowledge / respond to his concerns, and instead he is intimidated and harassed. He said he wants a copy of the appeal process to file an appeal. He said his mail is censored and his letters don't get through to their intended recipients.

Mr. Denton said that neither himself nor anyone else on the commission knows of any cover-up. He said all meetings are to open to the public and any further problems need to be taken up with the Supervisor.

Lee Blondeau, 340 N. Tracie, said the agenda and information packet was available, he took it at the beginning of the meeting and it was in his possession.

VIII. COMMISSIONER COMMENT

Mrs. DeVooght asked if there is a 30-ft set back from fence on the Bayou Court condos.

Tom Murray said he believed a 10-ft side yard set back is required, and that is what they have. He stated he doesn't have the ordinance with him, so he isn't absolutely sure of that. The new fence was discussed; Mr. Hunt put it up, and not the Bayou Court developer.

Jason Laumann, the new Community Development Director was introduced.

IX. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Dr. T. Scott Emerson resignation and recognition
- B. MDEQ Water Bureau- Chuck Thomas, Ground Water Engineer
- C. USGS- Water Resources Inv. Report 00-4050 (Not Distributed)
- D. Chairman's recognition of Planning Commissioners duties and Board support
- E. Marquette City Planning Commission—11/14/06 Minutes
- F. Planning & Zoning News
- G. Marquette Township Planning Commission—11/14/06 Minutes

X. ADJOURNMENT

Meeting adjourned by Al Denton at 8:50 pm.

Estelle DeVooght, Commission Secretary

Rebecca Stachewicz, Recording Secretary

Charter Township of Chocolay Planning Commission Meeting

January 8, 2007, 7:30 P.M.

Present: Chairman Al Denton, Vice Chairman Tom Shaw, Estelle DeVooght, Dennis Magadanz, Steve Kinnunen, Ken Tabor

Absent: None absent

Staff: Jason Laumann (Director of Planning and Community Development) and Rebecca Stachewicz (Recording Secretary)

I. MEETING CALLED TO ORDER / ROLL CALL

Al Denton called the meeting to order at 7:30 p.m.

II. APPROVAL OF THE MINUTES OF THE NOVEMBER 6, 2006 MEETING

Dennis Magadanz moved to approve the December 11, 2006 minutes. Ken Tabor second. Ayes 6, Nays 0. Motion approved.

III. APPROVAL OF AGENDA / ADDITIONAL ITEMS FOR AGENDA

Steve Kinnunen motioned to approve agenda. Estelle DeVooght second. Ayes 6. Nays 0. Motion approved.

IV. PUBLIC HEARINGS- none

V. PUBLIC COMMENT

Dave Cotton was present and told the Commission that he talked to Greg Seppanen and has expressed interested in joining the Planning Commission. He stated he has an environmental engineering background, regulating wastewater and wastewater withdrawal.

VI. OLD BUSINESS

A. Chocolay Retail Center frontage road / easements

Jason Laumann said that he didn't know much about this, but it is his understanding that the road has already been moved a bit, per MDOT request. He said he knows of no other problems or changes to the approved site plan at this time.

VII. NEW BUSINESS

A. Geographical Information System (GIS) Update

Jason Laumann gave an update on the GIS System. He said when he started working for the Township, he found ArcGIS on his computer. He said this is a program that will create maps and it also has more powerful functions. He stated that one of his first duties was to update the Township base maps. He stated that he is working on putting in new roads and new parcels into the system, and when it is complete they will have a parcel map for the Township. He explained they would be able to print a large planning map, zoning map and parcel map that they can use in planning discussions.

Steve Kinnunen asked if they are capable of getting satellite pictures of properties.

Mr. Laumann said that is possible.

Al Denton asked if the maps can show utilities such as water, electric lines etc.

Mr. Laumann said it has those possibilities, but it is a matter of collecting the information.

Mr. Laumann showed the different kinds of maps that the GIS System is capable of producing: elevation, soil, wetlands, water table, etc.

Mr. Laumann said that with some of the reference maps he would have to work with, the local experts (ex. soil engineer) would be able to see specifics for Chocolay Township.

Mr. Laumann said that he will help them work through the information, won't just throw it at them, but he feels it will definitely helped them in their planning decisions.

VIII. PUBLIC COMMENT

Mr. Cotton said that the GIS maps were interesting, especially the soil map. He said what is good in Chocolay, may not be considered good on a national level though and that they need to be aware of that.

IX. COMMISSIONER COMMENT

Al Denton said last meeting it was brought up that Green Garden Hill may be a possible spot for cell phone towers in the future and he had the State Police look into that issue. He said he received a letter, would like it included, or a portion of it, included with the minutes. The letter stated that soon all emergency officials would be using 800 MGZ technologies. He said they may have just heard one person's opinion last month, but it may not have been the truth. He offered to take anyone to the State Police station in Negaunee to discuss this information more, if interested.

Estelle DeVooght asked if the Township has received any more info on the water issued on the Kawbawgam property. Al Denton said he was under the impression that they are at a point where the developers are thinking about either cutting down the number of homes and/or making sure they all have individual wells, instead of shared wells as first proposed.

Mr. Laumann said he hasn't heard of any more updates on the water issues.

Mr. Denton asked Mr. Laumann if he has heard of any more problems with the Main Street / Hwy 41 development. Mr. Laumann stated "no."

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

A. Marquette Township Planning Commission – 11/29/06

XI. ADJOURNMENT

Meeting adjourned by Al Denton at 8:00 pm.

Estelle DeVooght, Commission Secretary

Rebecca Stachewicz, Recording Secretary

Charter Township of Chocolay
Planning Commission Meeting
MONDAY, FEBRUARY 12, 2007, 7:30 P.M.

Present: Chairman Al Denton, Vice Chairman Tom Shaw, Estelle DeVooght, Steve Kinnunen, Dennis Magadanz, and Ken Tabor

Absent: Dave Cotton

Staff: Jason Laumann (Director of Planning and Community Development) and Rebecca Stachewicz (Recording Secretary)

I. MEETING CALLED TO ORDER / ROLL CALL

Al Denton called the meeting to order at 7:35 p.m.

II. MINUTES- Approval of the January 8, 2007 meeting minutes

Estelle DeVooght motioned to approve the January 8, 2007 minutes. Dennis Magadanz seconded. Ayes 6, Nays 0. Motion approved.

III. APPROVAL OF AGENDA / ADDITIONAL ITEMS FOR AGENDA

Jason Laumann asked that Pat Coleman be added to agenda to allow him to speak under old businesses concerning the zoning ordinance update.

Steve Kinnunen motioned to approve agenda with the addition. Estelle DeVooght seconded. Ayes 6, Nays 0. Motion approved.

IV. PUBLIC HEARINGS

- A. #139 Rezoning of property from "R-1" to "PUD" and consider the acceptance of a Preliminary Development Plan for a 20 unit site condominium project

Jason Laumann said he has reviewed this project and knows there are several questions. He stated this project doesn't fit into his definition of a cluster development. He said his primary concern is a density issue, how many lots that can be built under the current zoning regulations. He said that he also had concerns about the water issues. He said he talked to Fred Benzie, and has not received the site report from the developer, so he hasn't yet made a recommendation. Mr. Laumann said he thinks the Planning Commission should have that report from the County before making any type of recommendation.

Mr. Laumann said that the Township doesn't have any current standards in place for cluster design, but they are in the process of redoing their Zoning Ordinance right now and that will definitely be addressed.

Mr. Laumann stated he cannot make a recommendation without knowing the configuration of open space and what the density is going to be. He said a density bonus could possibly be used as a bonus or incentive for the developer to use a true conservation approach. He said to him, the current plan looks more like a cookie cutter approach than a conservation design. He said that open space needs to have some value, instead of just calling whatever is left over "open space."

Mr. Laumann said he has several items that he pulled out of the comprehensive plan that doesn't meet this plan. He referred to page 10-3 in the comprehensive plan as an example.

Mr. Laumann said that he basically will need more information before he makes a decision one way or another.

Glenn Van Neste, who is working for Dr. English, reminded the commission that the comprehensive plan is not the zoning ordinance. He said they are proposing lots that will be a minimum 1-acre size. He questioned if they would even be having this

discussion if the proposal were a subdivision plan without a PUD. Mr. Van Neste said they need to be careful not to call this a conservation area, as that has a definition of its own. They are calling it a “green area” instead. Mr. Van Neste said he would like to have some flexibility to reconfigure the 14-acres of open space in the future. He said it may or may not ever come to that, but would like to keep that as an option. He stated that originally they were planning 39 units using 40 acres, and they have cut down the number of units in half from what they originally wanted to 20, 1-acre sites. Mr. Van Neste showed the Planning Commission two site condominium plans like this one for reference. He said the proposals are very similar and the commission passed those. He said the water issue is a hot topic and approval process is slow, but they plan to get the approval.

Mr. Denton asked why the full green area isn't shown on the plan. Mr. Van Neste said it's because of the flexibility that they are asking for with the space.

Mr. Van Neste explained that they are committed to making sure they have the full 14 acres of green space and would make sure its there. He said this is a PUD, a give and take situation, and they are just asking to accept it as is so they can get to the next step.

Mrs. DeVooght said she would like the see the green space throughout the plan, not just along the railroad tracks.

Mr. Kinnunen said part of the PUD approval is that the plan will be submitted the plan will not change. He said they want a plan that will be approved and not changed later.

Mr. Laumann said that there seems to be more that one plan/map that is being referred to. He said the map in the commissioner's packets is the one that's been submitted to the Township office.

Mr. Van Neste said once the proposal was scaled down to 20 units, they had not planned to include the 14 acres at all, because they were using 1-acre sites. But the Planning Director said they still needed the 14 acres in the plan, because it was in the original plan when they were proposing 39 sites. He said this didn't make much sense to him, but he still included the space along the railroad tracks but again, is asking for flexibility with that.

Mr. Laumann said the PUD idea was that this would be a cluster design development, not for it to be maximized out to full development of the total acreage.

Mr. Tabor said he wondered why they were not doing this as a subdivision instead of a PUD. Mr. Kinnunen said that the subdivision process is a long one with many steps, much longer than the PUD.

Steve Kinnunen made a motion to table the issue to until the Planning Director can get more info. Al Denton seconded motion.

Bob Cambensey said the soils are pretty much beach sand soil, and Fred Benzie said that if using individual septic systems, lots would have to be at least 1-acre in size. He said initially they were proposing four type-3 water systems and were allowed up to 10 housing unit per well, by the health department. But there were some issues concerning ownership of the wells and it wouldn't work in this condo setting. He said the suggestion was to go to individual wells, which they did. He stated that Chuck Thomas of DEQ sent a letter to the Township that said with individual wells, pump tests could be done, and they were. He said test pits for soil was also done. Mr. Cambensey said the big thing now is that they need to know for Health Department approval how many units they are going to be allowed. He said the wells will be 120-130 feet down, they are close to Lake Superior, the recharge may be from Lake Superior, and that is something the Health Dept. will look at. He stated that they took a water sample to Wayne Johnson at Aqua Care and has a proposal from them to treat the water at a price of \$3,000 per house. Dr. English is proposing that he will pay for the initial systems, but there will be an ongoing maintenance cost.

Mr. Laumann said the lots don't have to be so big and there doesn't have to be so many as to take up the whole area. He stated that the lots could be smaller with more open

space. Said a bonus can be offered to promote true cluster like development. He also stated that if the PUD is pulled, it would go back to being zoned RR-2.

Mr. Kinnunen read an excerpt from a letter written by Chuck Thomas.

Mr. Denton suggested some type of informal meeting between the developers, Planning Director, and Planning Commission.

A vote was taken to table the project until they have more info to make a decision. Ayes 6. Nays 0.

V. PUBLIC COMMENT

Dennis Tryan, 315 Kawbawgam Road, thanked the commission and the new Planning Director. He said he is just looking for protection, he is aware of laws about the well depth to prevent contamination and he stated that poor planning is probably what got them into this bad water condition in the first place. He wanted to know if Dr. English will pay for their new wells when or if they go dry.

Elizabeth Delene, 232 Kawbawgam Rd, stated that she has a copy of a water report and said it states that there are problems at all levels. She read part of the report citing bad water. She said she has a copy of a police report, stating that Dr. English trespassed in her backyard.

Don Rudness, 323 Kawbawgam Rd., apologized to board for his outburst earlier in the meeting. He said it is ludicrous that it was said that the water would be treated to the point that the owner can stand the water smell. He said his well is going dry because of lack of snow. He said this area is known to have bad quality water, and they know it is plentiful when they dig deeper, but that doesn't make it good water. He stated he's lived there for 23 years and many water treatment companies have been to his house.

Tom Lakenen, 108 Timber Lane, said he would like to share a personal experience he had with Dr. English some years back to protect others in the future. He said he and his younger brother built a retaining wall for him, made a hand shake agreement, and worked hard for 12 hours to finish the project in one day. He said in the end, Dr. English refused to pay and they went to small claims court. He said that the judge ended up siding with the Dr. English, simply because of who he his. He said he doesn't trust Dr. English.

Linda Rossberg, 1975 M-28 E., said the comprehensive plan shouldn't be dismissed, a lot of citizen input went into that, and she sees it as important as the zoning ordinance.

Patrick Barnett said it was good to see a lot of people here at the meeting. He stated that he has lived down the road for 20 years from Dr. English and never met him. He said he went for two months without water a couple of years ago and had to pay \$6,000 for a new well. He said that Dr. English will have no legal responsibility to them if their wells go bad.

Janet Amundsen, 2029 E M-28, said she moved here for the open space. She said she wondered if the Township will have someone look at the water issues, instead of someone paid by Dr. English. She said she has a neighbor who spends the winter in Hawaii and has sent letters regarding this project and she wonders what happens to them and if the Planning Commission ever sees them.

Mr. Denton said that the Township does refer to the County Health Dept. for views and advice on the water issues. He said regardless, they must give people an opportunity to develop their land. Mr. Denton said the Planning Commission does read all the letters that are received.

Nancy Rife, 202 Wanda Dr., said that she hasn't had to re-drill yet, but in 1990 her well would pump dry in 20 minutes, and now in 15 minutes, but these statistics aren't recorded anywhere.

Dennis Tryan asked what would happen to the power line that runs behind the houses. Mr. Denton said they don't know what would happen at this time.

Mr. Laumann said he received 6 letters from citizens all in opposition of the project, which are all in the commissioner's packets.

Don Rudness said that at the October meeting there was talk about getting a water expert in to discuss the water problems and wondered what happened with that.

Mr. Denton explained that it is the job of the Planning Director and seven Planning Commissions to obtain that information from the experts and disseminate it in an objective way. He said they do have the residents' best interests at heart.

VI. OLD BUSINESS

A. Pat Coleman, UPEA—Zoning Ordinance Update

Pat Coleman said as they pick away at the ordinance, they are finding more and more issues. He said that if they want to have conservation development in their zoning ordinance, they will have to work to make that happen. He said it is hard to do in the State of Michigan, but education of the developers is the key. He suggested possible seminars for the builders and developers some time in the future.

Mr. Coleman said he is happy with the zoning ordinance update so far, but does have some questions. One being, do they really have to regulate Mobile Home parks since they are already regulated through the State of Michigan and the site plan review process? He said it's not very common to see new mobile home parks being built, since they can basically be put onto any lot as a single family home.

Accessory housing units were discussed. Examples included creating a duplex or a two-family dwelling out of a standard single family home.

Randy Yelle said this type of housing arrangement is happening and they are illegal and are dealt with as needed.

Mrs. DeVooght said that duplexes should be addressed in the new ordinance. The other commissioners agreed. It was decided to keep accessory housing units as a conditional use.

Mr. Coleman brought up the private road issue. He said they heard that they aren't assuming responsibility for maintenance and right of ways, which he said doesn't make any sense because there are safety, ambulance, and fire issues. Mr. Coleman said they can revise the Township standards equivalent to that of the County's.

Mr. Tabor said they always try to get the roads to connect to get some of the traffic off the highway.

Mr. Kinnunen said it would be a good idea to put county standards on their roads.

Outside wood broilers were discussed. Mr. Coleman said these cause a lot of smoke that just hangs in the air if it isn't vented properly, which can cause some people also have respiratory issues. For new wood burners being installed, he suggested 5-acre lots as a minimum size for safe use.

Mrs. DeVooght said an extension of the trailer park on Silver Creek road was just done, so they still deal with it a bit. She said she thinks some of the language should be kept.

They decided to keep the mobile home regulations and that it is something that they still use and may have to deal with in the future.

Mr. Magadanz questioned the acreage of the hunting on shooting on the preserves and the total land. He thought that 40 acres is kind of small.

Randy Yelle said that he just picked a number for that wording because he wasn't sure. He said that total acreage can be changed.

Mr. Coleman said that he should be able to present a complete draft in a couple of months for review.

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Vice Chairman Tom Shaw, Estelle DeVooght, Steve Kinnunen, Dennis Magdanz, and Ken Tabor

Absent: Dave Cotton

Staff Present: Tom Murray (Community Development Coordinator), Randy Yelle, (Zoning Administrator) and Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF MINUTES OF THE FEBRUARY 12, 2007 MEETING

Dennis Magadanz motioned to approve the minutes from 2-12-07 meeting and Tom Shaw seconded. Ayes 6, Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Ken Tabor motioned to approve the agenda; Steve Kinnunen seconded. Ayes 6 Nays 0. Motion approved.

IV. PUBLIC HEARING

No Public Hearings Scheduled.

V. PUBLIC COMMENT

No Public Comment.

VI. OLD BUSINESS

A. Rezoning #139 – Rezoning of property from R-1 to PUD and consideration of a Preliminary Development Plan.

A motion was made by Ken Tabor to revisit this item; seconded by Dennis Magadanz. Ayes 6 Nays 0 Motion approved.

Tom Murray recapped the information presented at the February 12, 2007 meeting pertaining to #139 Rezoning Application of Property from R-1 to PUD (Superior Pines Condominium Project). Mr. Murray read the definitions for “Rural Residential Land Use” (pg. 10-6 of the Preliminary Development Plan) and “Agricultural-Forestry Land Use” (pg. 10-3 of the Plan) on page 5 of the Staff/File Review - Site Data and Analysis Report prepared by Dennis Stachewicz, which is included in the Commissioner’s packets. Mr. Murray also described letters dated March 6, 2007 and April 17, 2007, from Dr. English as well as an April 27, 2007 letter from James R. Clark, Project Manager, requesting that the Planning Commission take formal action on Rezoning Application #139 at their May 14, 2007 meeting. On March 29th the Township received a notice of Intent to Establish a Condominium Project with 20 parcels located on 26 acres with 14 acres of open space located south of the railroad grade. The letter dated April 17th received by Chocolay Township, from the developer, notified the Township Supervisor of the Health Departments’ preliminary approval for well and septic for this plan. At the February 2007 meeting the proposal remained tabled due to density and open space concerns as well as the Health Department’s preliminary approval for soil and water. Meetings with the developer since then have failed to find agreement on a method to decrease the density of the proposal to comply with the Comprehensive Plan

Albert Denton reported that the only new thing he sees being brought to the Commission at this time in regards to this proposal, is the preliminary approval for water and soil from the Health Department for the proposed condominium subdivision consisting of 20 single family residential units on 26 acres of land. The report did state that there is adequate quantity and quality of water for this development, but that there will be a need to treat the quality of the water.

Nancy Rife, 202 Wanda Drive inquired into the status of the water issue and is it complete. Mr. Denton reported that the water issue at this point is pretty much resolved.

Shawn Campbell, 212 Kawbawgam Road asked if the readings from the test wells were accurate for this type of development. Mr. Denton said that the wells were tested according to the "Plan" and the Health Department's specifications for water quantity and quality measures. A letter was received by the Township from James Clark, Project Manager, which included the Health Department's preliminary approval letter for this project. A 4-hour pump test was conducted for the typical unit size of 1 acre. The Health Department's letter dated March 30, 2007 stated that the assessment of the on-site water supplies was provided by the project engineer. The assessment included two well logs from wells constructed within the proposed development, and their associated water sampling data. The wells were 130 and 120 feet deep and located on the west and east portions of the proposed site condominium. Water samples collected from these wells confirmed the chemical and bacteriological suitability of water withdrawn from the aquifer. Mr. Denton again stated that the water quantity is there, but that the quality of the water will need to be chemically treated.

Gary Loher, 1975 M-28 East asked if the water issue is really solved and is there anything else that can be done to protect the residents in regards to their water concerns. Mr. Denton replied that once the Health Department gives preliminary approval there's really nothing the Planning Commission can do.

Elizabeth Delene, 232 Kawbawgam Road reported that the residents on Kawbawgam Road had a United States Geological Water Investigation Report done that states that the underlying clay layers are thin to absent throughout the entire Kawbawgam Road area. Mr. Denton stated that the Commission has to abide by the Health Department's approval report and recommendations.

Jim Clark, Project Manager for the developer, stated that the initial application was for 40 units on 39.99 acres, which has been reduced to 20 units with 4 possibly being duplexes on 26 acres.

Steve Kinnunen reported that he stills sees issues with the green space as 50% of the proposed project has to incorporate green space, which is not seen on the plan. If the intent is to develop this whole development in clusters, the entire comprehensive plan should be put on the table and get all of the open space identified for the entire 164 acres. If we are only going to discuss developing the 26 acres, there needs to be more open space identified. According to the comprehensive plan there needs to be 50% open space.

Steve Kinnunen made a motion to table this request until more information is received regarding the density/green space issues. Tom Murray stated that the developer requested in his April 27th, 2007 letter that formal action be taken on this particular part of the Rezoning Application #139 at the May 14th, 2007 meeting. Mr. Denton also stated that he felt there was enough information provided to take formal action. Mr. Kinnunen made a motion to withdraw his previous motion to table this request. Albert Denton seconded the motion.

Estelle DeVooght made a motion to deny #139 Rezoning Application from R-1 to PUD. Steve Kinnunen seconded the motion.

Ayes 4 Nays 2. Motion approved.

VII. NEW BUSINESS

No new business at this time.

VII. PUBLIC COMMENT

No public comment.

VIII. COMMISSIONER'S COMMENTS

Steve Kinnunen stated that the Planning Commission needs clear and concise definitions of the zoning requirements for this type of land development model, as all future developments in the Township will be based on this model and it needs to be right.

Tom Shaw, Vice Chairman stated that the reason he voted to approve the #139 Rezoning proposal was to give the developer a chance to redo his proposal to meet the density issues. Mr. Shaw understands and appreciates the water concerns of the residents, but explained that it is also the job of the Planning Commission to encourage development in the Township.

Estelle DeVooght questioned why the Planning Director hasn't provided the Commission with more details pertaining to Cluster Development. Albert Denton reported that Mr. Laumann is no longer employed with Chocolay Township and a new Planning Director hasn't been hired yet.

Mr. Denton informed the developers that they can come back to the Planning Commission with another proposal for the development of the 40 acres or a proposal to develop the full 164 acres.

Present: Chairman Albert Denton, Estelle DeVooght, Dave Cotton,
Steve Kinnunen, Dennis Magdanz, Ken Tabor

Absent: Vice Chairman Tom Shaw

Staff Present: Tom Murray (Community Development Coordinator), Randy Yelle,
(Zoning Administrator) and Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF MINUTES OF THE FEBRUARY 12, 2007 MEETING

Dennis Magdanz motioned to approve the minutes from 5-14-07 meeting and Ken Tabor seconded. Ayes 6. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Tom Murray requested to add under Old Business as 6C. Informational - Superior Pines. Steve Kinnunen motioned to approve the agenda with the addition, Ken Tabor seconded. Ayes 6. Nays 0. Motion approved.

IV. PUBLIC HEARING

No Public Hearings Scheduled.

V. PUBLIC COMMENT

Lee Blondeau, 30 N. Tracie Lane requested to speak when the discussion of the revised Zoning Ordinance (VI.) C.) is addressed.

VI. OLD BUSINESS

A. Discussion – Status of the Hiawatha Water Trail Grant

Tom Murray, Community Development Coordinator, provided an update via a memo dated June 11, 2007 to the Planning Commission members. Mr. Murray reported that the Hiawatha Water Trail Grant, was applied for in March, 2004 from the Department of Natural Resources Trust Fund and was awarded to the Township. The total grant amount is \$24,750 of which \$6,435 represents the required Township match. The townships match amount includes the construction of a roof over the storage locker, informational signage, a plaque, a picnic table and labor. 3 portions of the project were bid separately and were tentatively granted by the Township Board, which include construction materials, kayak locker steel fabrication, and limestone aggregate. No initial bids were received for the materials and installation of the footings for the boardwalk and fishing pier. Marquette Fence did submit a bid at a later date. Mr. Murray stated in his memo that there would be an \$11,273.54 projected deficit for this project incorporating all of the bids. Mr. Murray will rebid the foundation work to try to get a lesser quote. Mr. Murray also stated that he is exploring other possible funding avenues to assist with this project as construction costs have risen 45% since the approval of this grant.

Action: Mr. Murray will follow-up on the status of the re-bid for the foundation work.

B. Discussion – Status of the Revised Zoning Ordinance

Randy Yelle, Zoning Administrator, provided the Committee Members in their meeting packets a draft of the Revised Zoning Ordinance up to this point. Mr. Yelle asked everyone to review the draft and make any suggested changes/ corrections they may see in this draft. Mr. Yelle reported that there will be a

Special Meeting held on Monday, June 25th at 6 PM to conduct a work group meeting to discuss the final changes to the Revised Zoning Ordinance. Mr. Yelle also reported that the revised maps should be ready by Wednesday, 6/13/07.

Albert Denton asked the committee members to look through the draft Zoning Ordinance and point out any changes or corrections they may see at this time. There was much discussion pertaining to typos, section numbering, coordination and definitions of the abbreviations (or no abbreviations at all) and acronyms listed in the ordinance, etc. Mr. Yelle noted such changes and will have them fixed in the next draft. Other items discussed were Gas Stations/Service Stations, Cluster development density requirements, acreage required for a Planned Unit Development, clarification of building condominiums vs. site condominiums, mineral extraction changes, and access roads. The Committee members also discussed that the revisions to the zoning ordinance need to as clear and concise as possible and understandable by the commission and residents.

Dave Cotton reported that he submitted to Randy Yelle alternative language pertaining to wind energy systems/towers. This language would not only protect the residents, but provide for their safety as well.

Lee Blondeau 30 N. Tracie Lane suggested that a zoning ordinance pertaining to Contractors Yards should be considered in the revision of this zoning ordinance. Mr. Blondeau also inquired about the Conditional Uses section of the ordinance, which seems pretty broad. He suggested the revisions made to the zoning ordinance should also reflect future road changes and future industry in the Chocoley Township area.

C. Superior Pines Condominium Project Update

Tom Murray reported Mr. James Clark, Project Manager for the proposed Superior Pines Condominium Project is presenting the proposed development and requesting approval of the preliminary development plan at the June 18, 2007, Township Board meeting. If approval is obtained from the Township Board, staff will be directed to hold a public hearing in regards to approving this proposed development. Mr. Murray encouraged the members of the Planning Commission to attend the Township Board meeting on June 18th at 7 PM.

VII. NEW BUSINESS

No new business at this time.

The meeting adjourned at 8:45 p.m.

Albert Denton, Chairperson

Laurie Vashaw-Eagle, Recording Sec.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION
SPECIAL ZONING ORDINANCE MEETING
Monday, June 25, 2007 @ 6:00 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Dave Cotton,
Dennis Magdanz, Ken Tabor

Absent: Vice Chairman Tom Shaw, Steve Kinnunen,

Staff Present: Tom Murray (Community Development Coordinator), Randy Yelle, (Zoning Administrator) and Laurie Vashaw-Eagle (Recording Secretary), Jennifer Thum (Planning and Community Development Director)

Guest: Pat Coleman, U.P. Engineers and Architects

II. ZONING ORDINANCE WORK GROUP SESSION - DRAFT 6/20/07

Albert Denton, Chairperson, reported that the township has been working on updating and revising the Zoning Ordinance for the past year and the zoning ordinance is nearing a final draft. This meeting is a work group session to go over the 6/20/07 draft.

Tom Murray, Community Development Coordinator, reported that suggested changes from the June 11, 2007 Planning Commission meeting have been incorporated into the third draft of the Zoning Ordinance. Mr. Murray also reported that there hasn't been much change to the Zoning Ordinance since the 1970's and it was in need of updating.

Mr. Murray stated that after one or two more work sessions the Final Draft of the Zoning Ordinance will be brought to the Township Board and then to a Public Hearing, which will possibly be held in August, 2007.

Pat Coleman, Consultant, reported that there have been minor changes to the Zoning Ordinance over the years, but since the Township adopted a new Comprehensive Plan within the past couple of years it became necessary to update the Zoning Ordinance to meet the goals that the comprehensive plan outlines. The Township took this opportunity to simplify the ordinance, reduce the number of districts, improve the organization of the ordinance by creating chapters and sections to make it easier to follow, incorporate definitions and include appropriate regulations.

Mr. Coleman reported on some items that have been updated such as the addition of fencing regulations, outdoor wood burning stove regulations, wind energy regulations, access management provisions dealing with M-28 and the US 41 corridors through Chocolay Township, which is the result of the Township participating in a study of these two corridors.

Mr. Coleman reported that Randy Yelle provided numerous recommendations from the staff and the residents of Chocolay Township that have been incorporated into this draft of the ordinance. Fence regulations were incorporated into the ordinance as they were not addressed in the old ordinance. The non-conforming use section was simplified to state that the property either conforms or is non-conforming, and if it is non-conforming there are procedures in place for the resident to request a variance to the zoning ordinance, but only for dimensional kinds of issues related to a specific lot. A big change in the zoning ordinance is the elimination of private roads. Future homes and developments will be required to have the road frontage abut to a public road and all new roads will have to meet all Marquette County Road Commission specifications. This has been agreed to by the Marquette County Road Commission.

The zoning ordinance also reduced the number of zoning districts and combined some to simplify the ordinance and the districts.

Mr. Coleman also reported that the waterfront residential section of the zoning ordinance was cleaned up in regards to allowable uses to better protect the waterfront residents and their property. The intent section was changed to state that premier principal uses of the property are for single-family homes only. The conditional uses section encompasses fishing piers, resorts, bed and breakfasts, outdoor wood burners and wind energy conversion systems on lots of 5 acres or more including conditions for approval, trails and accessory housing units. These conditional use requests will require a public hearing where the requestor will have to make an application, pay a fee, and the planning commission will hold a public hearing and make recommendations for the conditional use before it can be approved.

There was discussion pertaining to pg. 75, 10.1 Uses Permitted, Minimum Sizes and Fees”, Section “A”. This pertains to uses for a Planned Unit Development (PUD). There are many steps incorporated into this type of development and this type of request will require the Township Planning Commission to hold a public hearing and residents within 300 feet of the development will continue to be notified in writing as well as advertised in the newspaper. The new Zoning and Enabling Act, a state law in Michigan that now requires the public to be notified by advertising in the newspaper 15 days before a public hearing is held. Also, the public can't be notified of a planned development until the completed application is submitted. Cluster developments were also discussed which are designed to provide flexibility to the developer and to have higher density on part of the site with open space on another part of the site and also requires at least a 5 acre density ratio threshold. The height restriction for these developments is 30 feet. The density or open space must also meet the particular requirements for that zone / district.

There was a question related to Conditional Uses on page 16 in regards to “resort”. Should this be moved to the agricultural section so it is not part of the residential section. A motion was made by Dennis Magadanz and seconded by Ken Tabor to move “resort” from the residential conditional use section to the agricultural (AF section).

Ayes 5 Nays 0 Motion approved.

The Erosion Hazard line measuring was questioned. Randy Yelle explained that he follows the IGLD (International Great Lakes District) guideline, which states to begin measuring from the 1st apex to the planned building site. Dave Cotton expressed concern in regards to better defining the high dune line or 1st apex.

Dave Cotton also discussed the ordinance pertaining to Wind Energy and outdoor wood burners on pg. 45 that require at least 5 acres. Dave Cotton made a motion to remove the 5 acre requirement and require the applicant to go to the Township Planning Commission for approval. Dennis Magadanz seconded the motion.

Ayes 5 Nays 0 Motion approved.

Dick Arnold, Contractor, stated that there is no zoning districts that permit small contractors to set-up small businesses in the old ordinance. After much discussion a conditional use zoning district will be looked into to accommodate this type of zoning.

Lee Blondeau, Blondeau Trucking, submitted a letter in regards to the Commercial district being zoned conditional use.

Some typographical and numbering errors were identified:

- 1) Page 31 under Intersection (#7) M282 should be changed to M28.
- 2) Page 40 (#5) US/M26 should be M28.
- 3) Page 48 numbering is incorrect

IV. PUBLIC HEARING

A public hearing will be scheduled in August to review the final draft of the Zoning Ordinance. The public will be notified.

V. PUBLIC COMMENT

Public comment in regards to changes, clarification of various items and requests for changes to various zoning items was incorporated into the minutes and duly noted by the Planning Commission.

VI. OLD BUSINESS

No old business at this time.

VII. NEW BUSINESS

No new business at this time.

VII. PUBLIC COMMENT

No public comment.

VIII. COMMISSIONER'S COMMENTS

No commissioner's comments.

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

No informational items or correspondence to discuss at this time.

XI. ADJOURNMENT

The meeting adjourned at 9:00 p.m.

Albert Denton, Chairperson

Laurie Vashaw-Eagle, Recording Sec.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, July 9, 2007 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Vice Chairman Tom Shaw Estelle DeVoight, Dave Cotton, Dennis Magdanz, Ken Tabor

Absent: Steve Kinnunen,

Staff Present: Tom Murray (Community Development Coordinator), Randy Yelle, (Zoning Administrator) and Laurie Vashaw-Eagle (Recording Secretary), Jennifer Thum (Director of Planning and Development)

II. MEETING MINUTES

Dennis Magadanz moved to approve the minutes from 6-11-07 regular meeting seconded by Tom Shaw.

Ayes 6. Nays 0. Motion approved.

Motion made by Ken Tabor to approve the minutes of the 6-25-07 special meeting seconded by David Cotton.

Ayes 6. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

No additional items were added and Mr. Cotton moved to approve the agenda as presented, seconded by Ken Tabor.

Ayes 6. Nays 0. Motion approved.

IV. PUBLIC HEARING

A. Public Road Request #23 / Ward Trail

Francis Ward was requesting approval for a private road located off of Willow Road (an existing private road) to support future development of the area. This request was made under Section 402 of Zoning Ordinance #34.

Tom Shaw made a motion, Estelle DeVoight seconded, that after review of Private Road Request #22; the standards of Section 402.D of Ordinance 34; Section 401.D of Ordinance 34; and the Staff/File Review – Site Data and Analysis, and subsequently finding compliance with the standards for approval of the private road request, the Planning Commission recommends approval to the “Township Board” with the following conditions:

- 1) Francis Ward shall allow access to township vehicles as well as other public/private utility companies to provide services; and
- 2) A covenant shall be established on the deeds for any parcels created off from this private road identifying the private road status and which reference the Declaration of Private Road Easement which must be fully executed; and
- 3) Francis Ward pay for and install a road sign identifying the private road as “Ward Trail” at the intersection with Willow Road and Francis Ward is to pay for and install a stop sign at the same intersection; and
- 4) Francis Ward is required to provide certification from a surveyor/engineer that the private road standards of the Zoning Ordinance have been achieved at the conclusion of construction; and
- 5) Francis Ward shall comply with the conditions and requirements of all other agency regulations; and

- 6) A zoning compliance permit shall not be issued until all of the above conditions are met.
- 7) Land Division Approval is required from the Assessor for the creation of individual parcels off from the road and may require the modification of the lots as shown.

Ayes 5. Nays 1. Motion approved.

V. OLD BUSINESS

No old business at this time.

VI. NEW BUSINESS

A. Superior View Site Condominiums / Preliminary Plans

Mr. Eric Keough had submitted a preliminary plan for the proposed Superior View, a site condominium project. Staff had reviewed the preliminary plan and recommended that several items be addressed prior to submission of an additional preliminary plan:

1. Section 503 of the Zoning Ordinance is for the application and review procedures. Under letter B, it lists the Preliminary Site Plan Review procedures. Mr. Keough does not meet the requirements to have his preliminary plan at the Planning Commission at this time. The Zoning Ordinance states, "The Preliminary Site Plan shall include the same information as required for Final Site Plan review, unless deemed unnecessary by the Planning Director and the Zoning Administrator." Here are the items that should be on the Preliminary plan, but have not been shown at this time:
 - a. The existing and proposed topography of the site at a minimum of 2' (Two foot) intervals and its relationship to the adjoining land, has not been shown. This should be on a separate sheet of paper.
 - b. The scale is not accurate. In future engineering drawings, please make sure that the scale is no greater than 1 inch=60 feet and then only in a base of ten.
 - c. The setback requirements have not been met. This could be due to the inaccuracy of the scale.
 - d. Proposed curb cuts have not been shown.
 - e. Proposed grading if any has not been shown. Please provide a copy of the permit application if there will be grading done on site. Per Part 91, of 1994 PA 451.
 - f. Proposed location, size and type of drainage, sanitary sewers, water services, storm sewers and fire hydrants must be included.
 - g. Proposed landscape plan showing area of new topsoil, grass, or other ground cover, and type and size of trees and shrubs.
 - h. Material description of homes and an example of what material is going where.
 - i. There are no open space calculations shown.
 - j. Our Zoning Administrator, Mr. Randy Yelle has requested a copy of the Master Deed and has yet to receive that item.
2. Another issue echoes the sentiments of our Township Attorney, Mr. Mike Summers and our Zoning Administrator, Mr. Randy Yelle. The enclosed site plan is showing five lots; in 2003 these five lots were combined into two parcels.

The previous owner, Mr. Schaub, rezoned the property from C-2 to R-3. He did so for the construction of the condo development allowing for four 60 foot by 50 foot units.

Mr. Randy Yelle has informed Mr. Keough and his professional surveyor on several occasions that there are no longer five lots, but two, and the property in question is zoned R-3. Therefore, if they attached two of the requested single-family dwellings with a common garage, making two family residents, they would be considered a permitted principle use within said zoning district. Mr. Yelle has informed Mr. Keough that the five lots are non-conforming and they have been combined into two lots. One of these lots became conforming with the second much closer to conforming than before. The two lots will not be split, as it is illegal to create a lot not in compliance with the zoning ordinance.

3. The amount of curb cuts Mr. Keough is proposing to have on Terrace Street. They are unacceptable and a potential hazard to not only pedestrians, but also to the existing residences and customers of the businesses across the street. We have a required road frontage of 125 feet. The lots do not come close to meeting that requirement. In fact, they are not in compliance of our zoning ordinance either, under Section 525(D)(6) General Requirements, under the Site Condominium provision, it states:

“For the purpose of this ordinance, each site condominium unit shall be considered equivalent to a single lot and shall comply with all regulations of the zoning district in which it is located.”

4. If the surveyor could show on a sheet the maximum lot coverage ratio, net lot coverage and floor area ratio, it would be appreciated.
5. With regards to the Sanitary Sewer, our DPW supervisor contacted STS Consultants to get their opinion on this development. Their recommendation was that, one single family home/residence, one lateral – NO EXCEPTIONS. They have seen too many problems when a lateral serves more than one single family home. They are requiring Mr. Keough to follow Section Seven of the Waste Water Collection Ordinances, which states that “A separate and independent building sewer shall be provided for every building.”
6. Mr. Keough is proposing a fence on the east side. Would Mr. Keough plan on building an additional fence on the west side? Also, the new ordinance will state that the fences in Harvey only be allowed at a height of 4 feet, not the 6 feet that he is proposing.
7. In the proposed plan, Mr. Keough is only showing one type of dwelling unit. Are all the homes going to look alike or will there be variances between the homes.
8. There are no heights that are being shown on the plan, in our Zoning Ordinance It states that the maximum height requirement in an R-3 is 30 feet. The heights of each home and garage will have to be shown on the preliminary plan.

Al Denton made a motion, seconded by Ken Tabor that the Planning Commission table the approval request of Mr. Keough’s Superior View Condominium preliminary plan. Mr. Denton encouraged Mr. Keough to meet with the Township Staff and re-submit his preliminary plan in accordance with ordinance requirements and staff recommendations.

Ayes 5, Nays 0. Motion approved.

B. Proposed Farmers Market

Mr. Jim Hyer’s was proposing to operate a farmers market this summer where farmers can sell their produce and local artisans can sell their homemade soaps, wool, etc. Mr. Hyer would like to host the farmers market at the pavilion just north of the Fire Hall. He would like to hold this market during midweek to ensure little competition from neighboring farmers markets.

Jennifer Thum sought opinions from the Zoning Administrator and the Township Attorney regarding this type of commercial activity being held on Township property and what liability/insurance issues would be involved. Mr. Summers stated that the Township might have to obtain additional insurance since the Township is not insured for commercial activities. Mr. Summer's overall position is that if we allow one individual to utilize our township land to have a commercial type of businesses on our property, then we have to allow anybody. Mr. Summers cautioned the Township about entering into to this type of area.

**After much discussion Al Denton motioned to deny Mr. Hyer's Proposal for a Farmer's Market, seconded by Tom Shaw.
Ayes 6. Nays 0. Motion approved.**

VII. PUBLIC COMMENT

Sunny Walden 252 M-28 East questioned how much property is needed for a development such as Dr. English's proposed development?

Al Denton explained that Mr. English's property was rezoned from an RR2 to a PUD, which requires at least 5 acres.

Lee Blondeau 30. North Tracie Drive inquired if there were going to be any more Zoning Ordinance work sessions before the final draft is brought to the Public as he is concerned that his property will be classified as conditional use instead of permitted use thus making it non-conforming.

Tom Murray reported that if deemed necessary another work session will he scheduled before the Public Hearing. Tom Murray also reported that at this time a Public Hearing is scheduled to review the Final Draft of the Zoning Ordinance on Monday, August 13, 2007 at 6:00 PM in the Silvercreek School Auditorium.

VIII. COMMISIONER'S COMMENTS

Tom Shaw, Vice Chairperson, inquired if the Township should look at the fee it charges to hook into the water/sewer system to see if we're in line with other Townships.

Township Staff will research this item.

Al Denton reminded everyone that the Township Board Public Hearing regarding Dr. English's proposed PUD Development will be held on Monday, July 16th, 2007 at 7:00 PM.

IX. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Marquette City Planning Commission – May 15th, 2007 Minutes

X ADJOURNMENT

The meeting adjourned at 8:50 p.m.

Albert Denton, Chairperson

Laurie Vashaw-Eagle, Recording Sec.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, August 13, 2007 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Vice Chairman Tom Shaw, Dave Cotton,
Dennis Magdanz, Ken Tabor, Steve Kinnunen,

Absent: Estelle DeVooght

Staff Present: Randy Yelle, (Zoning Administrator), Jennifer Thum (Director of
Planning and Community Development), Laurie Vashaw-Eagle (Recording
Secretary)

II. APPROVAL OF JULY 9th MEETING MINUTES

Dennis Magadanz pointed to a correction under VII. New Business A) c. change “he” to “the”. The paragraph under New Business A) last paragraph, last sentence should state Ayes 6. Nays 0. With no further corrections noted Dave Cotton motioned to approve the minutes from the 7-9-07 meeting. The seconded was provided by Dennis Magadanz.
Ayes 5 Nays 0 Motion approved.

III. ADDITIONAL ITEMS / APPROVAL OF AGENDA

Dave Cotton requested that under Old Business the Committee add A) Zoning Ordinance – Wind Energy/Outside Wood Burning Stove 5 acre requirement. With no further Additions to the agenda, Ken Tabor motioned to approve the agenda seconded by Dave Cotton.
Ayes 5 Nays 0 Motion approved.

IV. PUBLIC HEARINGS

A. Conditional Use Permit #60A Alder Storage Properties – Revising original C.U.P. to construct two additional Buildings

Dick Arnold of 312 County Road 545, reported that he has no objections to the additional buildings, but would like to see the stumps and trees that can be seen from the highway from the initial construction of the storage buildings be cleaned up before new construction begins.

Mark Maki of 370 Karen Road questioned this conditional use request, as there was another storage facility constructed with out the conditional use process. Mr. Maki referred to Zoning Ordinance, Section 106, which he feels was not complied with. He reported that he was denied access to the site plan before it was approved by the Township. He then came into the office after a Board Meeting and filed a complaint with the police asking why the ordinance was not complied with and stated that he never received a response.

Gloria Hoog of 108 Alderbrook Dr. stated that she lives behind the Alder Storage Buildings and stated she would like to know exactly where the two storage buildings will be located on the property. Ms. Hoog agreed with Mr. Arnold’s clean up comments and would like to see the area cleaned up. Ms. Hoog also wants the area around the buildings to remain cleaned up and presentable and inquired if there were any plans for the small pond on the property.

Cristal Silta of 429 North Third St explained that the brush pile will be cleaned up by either bulldozing it or burning it. Ms. Silta reported that she will follow the recommendations of the Township in regards to cleaning up the previous construction materials, brush, tress, etc.

Gloria Hoog questioned how big the buildings will be and how many more will be built in the future.

Cristal Silta apologized for taking so long to clean this up. She explained that she was hoping to put another building up, but couldn’t afford it last year. The two new buildings

will be bigger than the initial buildings, but will be built 30 ft. from the property line, and in accordance with the zoning ordinance requirements. Ms. Silta also explained that she may build additional buildings in the future, which will be determined by demand and economic feasibility.

Mark Maki reported that he sent a fax to the new Planning Director on 7/13, 7/24, and 7/26 requesting some information and asked for verification from the Planning Director that she received the fax. Mr. Maki stated he hasn't received a response pertaining to his fax or information request. Mr. Maki also stated that he has sent letters to Randy Yelle in the past with no response to those either. Mr. Maki asked if Jennifer Thum or Randy Yelle could address his concerns about denying him access to public records. He questioned if the staff are receiving the faxes or if the fax machine is broken. Al Denton asked Mr. Maki to come in the Township office and make an appointment to meet with Greg Seppanen in regards to his request.

VI. OLD BUSINESS

A. Revision to The Zoning Ordinance - Wind Energy and Outside Wood Burners

Dave Cotton motioned, seconded by Ken Tabor to reinstate into the new Zoning Ordinance a 5 acre minimum with set backs for outdoor wood burners which was omitted during the previous Zoning Ordinance meeting.

Ayes 5 Nays 0 Motion Carried.

VII. NEW BUSINESS

A. Conditional Use Permit #60A Alder Storage Properties – Revising original C.U.P. to Construct Two Additional Buildings

Ms. Silta explained that the curbs and paving between the buildings were initially done on July 23, 2007. Ms. Silta reported that she has been in contact with Jeff Rautiola of MDOT and explained the delay associated with the contractor in completing the paving project. Ms. Silta has spoken with the contractor and he told her the project is scheduled to be completed this Wednesday or Thursday. Ms. Silta also explained the landscaping will be completed once the paving is complete.

Steve Kinnunen motioned, Dave Cotton seconded, that after review of Conditional Use request #60A, the STAFF/FILE REVIEW-SITE DATA AND ANALYSIS, Sections 211, 403, and 701 of the Zoning Ordinance, the site plan and application provided and subsequently finding compliance with the standards for approval of the request found in Section 701 of the Zoning Ordinance, the Planning Commission approves Conditional Use request #60A as an amendment to Conditional Use #60A with the following conditions:

1. Alder Storage Properties adheres to the MDOT requirements that the Township Planner sent to Christal Silta, on July 16, 2007. The letter outlines the items that MDOT is requiring of Ms. Silta. The MDOT requirements need to be completed before the issuance of a zoning compliance permit.
2. Alder Storage Properties maintains the landscape areas that are shown on the plan dated 7/27/07.
3. Alder Storage Properties maintains a 30 ft. buffer in the rear of the property where it abuts residential property. The visual screen shall consist of the surviving conifers and either an opaque wooden fence, a chain link fence with interwoven redwood or cedar slats or a vegetative screen consisting of Lilac, Arbor Vitae and Forsythia planted on 3-ft. centers. Plants shall be a minimum of 30 inches tall at planting.
4. During construction, proper best management practices are placed on site to ensure that soil does not go into the pond.
5. The proposed swales in the rear of the property are to be constructed to ensure proper drainage of the site.
6. Alder Storage Properties plants the required 2.5% of landscaped open space within the 40 foot front yard setback.
7. That any lanes providing access to storage doors be left with a 20'

unobstructed area to allow customer access/maneuvering as well as providing access for emergency vehicles.

8. That the applicant provides the Fire Department with a final set of building Plans detailing the fire breaks within the buildings.
 9. That any security lighting shall be designed to reflect light downward and away from adjoining residential properties in accordance with the requirements of Section 500 of the Zoning Ordinance.
 10. A zoning compliance permit shall be obtained from the Chocolay Township Zoning Administrator.
 11. A zoning compliance permit shall not be issued until all other necessary permits as required by Federal, State, and Local Agencies, are acquired.
 12. Alder Storage Properties will clean-up said property now and after the new construction including removal of brush, trees, debris, etc.
- Ayes 5 Nays 0 Motion approved.

B. Lee Blondeau, Zoning for Blondeau Trucking

Lee Blondeau, 30 Tracie Lane, gave a historical overview of Blondeau Trucking in Chocolay Township and wanted to straighten out some problems that have historically plagued this property. Mr. Blondeau explained that this business has been in Chocolay Township since the early 1960's. Mr. Blondeau also pointed out that when Blondeau Trucking first began, there was no Zoning Ordinance in Chocolay Township. In 1977, the Zoning Ordinance was revised and Blondeau Trucking was zoned as a permitted use property. In the mid 1980's problems began and the disputes ended up in Court. This property then became a non-conforming property. After a lengthy court battle, the property became a conditional use brokered by the Court and included restrictions on the number of trucks they could operate out of this property.

Mr. Blondeau reported that this property does not clearly fit into one specific category listed in the Zoning Ordinance. Technological advances have made the heavy trucks less loud, they have less breakdowns, there is no smoke coming from the trucks as did in the past, etc. Mr. Blondeau explained that Blondeau Trucking operates primarily as a maintenance facility with little to no truck traffic during the day unless there are repairs to be made to the trucks.

Mr. Blondeau explained that he is here to try to avoid future problems with this property and the zoning. Mr. Blondeau is asking staff to work with him to allow Blondeau Trucking to operate under a permitted use rather than a conditional use.

Al Denton asked Randy Yelle if there is any available property in Chocolay Township that would allow Blondeau Trucking to operate under a permitted use. Mr. Yelle explained that there is no available property in Chocolay Township that he is aware of where Blondeau Trucking could relocate and operate as a permitted use..

Al Denton questioned Lee Blondeau in regards to how many trucks the court is allowing for this business. Mr. Blondeau reported that he is not sure of the exact number. Mr. Denton instructed Mr. Blondeau to verify the number and not exceed what the court has restricted.

Al Denton stated that this business has been in the Township for many years and since there is no property zoned in the Township for this type of business nor is there any property available that could accommodate this type of business in the Township, he supports the township doing something to try and work with Lee Blondeau. The Township will work with Mr. Blondeau regarding problems that may arise in the future and also try to find an area in the Township where this type of business could operate or make an area in the Township to allow this type of business to operate and flourish.

Mark Maki questioned the Planning Commission if they are allowing a spot zone for the 8 acres that houses Blondeau Trucking. He also questioned the various actions of the Chocolay Board members, the Township Planning Commission, and the Administrators in regards to his right to the Freedom of Information Act requests. Al Denton asked Mr. Maki to contact the Township Office and set up an appointment to discuss his concerns with Greg Seppanen and himself.

Tom Shaw reported that he has not heard many complaints against Blondeau Trucking, but has personally witnessed unfounded accusations against them. Mr. Shaw has known Lee Blondeau to be willing to work with anyone who has a complaint to try to solve any issues amicably and satisfactorily.

VII. PUBLIC COMMENT

Dick Arnold of 312 County Rd. 545 wanted to commend the Planning Commission on their willingness to work with residents and business owners as well as looking out for the best interest of Chocolay Township.

VIII. COMMISSIONER'S COMMENTS

No comments.

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

XI. ADJOURNMENT

The meeting adjourned at 8:37 p.m.

Albert Denton, Chairperson

Laurie Vashaw-Eagle, Recording Sec.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, October 8, 2007 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Vice Chairman Tom Shaw, Estelle DeVooght, Dennis Magadanz, Ken Tabor

Absent: Dave Cotton (excused), Steve Kinnunen,

Staff Present: Jennifer Thum (Director of Planning and Development), Laurie Vashaw-Eagle (Recording Secretary)

II. MINUTES

Dennis Magadanz motioned to approve the minutes from the August 13th, 2007 meeting, seconded by Ken Tabor with no corrections.

Ayes 5 Nays 0 Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Estelle DeVooght requested to add the Comprehensive Plan to the agenda under Old Business (B). With no further additions to the agenda, Ken Tabor motioned to approve the agenda, seconded by Tom Shaw.

Ayes 5 Nays 0 Motion approved.

IV. PUBLIC HEARINGS

A. Rezoning #140 – Request to rezone property from R-3 to C-3

Jennifer Thum, Director of Planning and Community Development, reported that Randy Yelle, Zoning Administrator, received a request for a change in the Chocolay Township Zoning Map from Minnesota Towers Inc., (Randall Mattson). The site is located in section 7, T47N-R24W, Parcel #52-02-108-009-00, Township of Chocolay, County of Marquette, Michigan, lying north of M-28 East. This parcel is zoned R3, Residential, being requested to be rezoned to C-3, Commercial. If adopted C-3 would become Industrial, as per the proposed Zoning Ordinance, as directed by the adopted Comprehensive Plan. The applicant is proposing to rezone the parcel to C-3 to then apply for a conditional use permit to allow for a wireless cell tower. The Comprehensive Plan, page 10-2, "Future Land Use Map", shows no industrial zoning in that area.

Section 101 of the Chocolay Township Zoning Ordinance addresses towers under;

Wireless Communication Facilities, All structures and accessory facilities relating to the use of the radio frequency spectrum for the purpose of transmitting or receiving radio signals. This may include, but not be limited to, radio and television broadcasting or relay towers, wireless or cellular telephone communication receivers and transmitters, telephone devices and exchanges, microwave relay facilities and towers, telephone transmission equipment building, and public, private and commercial mobile radio service facilities.

Section 211 (C) allows for Wireless Communication Facilities, subject to the conditions of Section 527, within the C3, RP, and PL zoned districts as a Conditional Use. (See attached copy of Section 527).

The following items were noted as some general considerations that should be taken into account when evaluating this rezoning:

1. Is the land use proposed in the rezoning request consistent with the uses designed for said property within the township's comprehensive plan?
2. Is the proposed district and all of its allowed uses compatible with the surrounding area?
3. Can the property be used for a use already permitted within the district?

The following information was given by MTA's Township guide to planning and zoning and also supported by the Chocolay Township Zoning Administrator:

Reviews of rezoning should not be accompanied by a site plan. It is easy to become distracted by discussions of landscaping, setbacks, and other issues. Site plans should not be considered as part of a rezoning review, except as part of a contract, or conditional, rezoning or as planned unit development. **Absent** a specific contract voluntarily offered by the applicant, a rezoning approval cannot be conditioned upon a particular use, plan or other action. Once rezoned, the property can be used for any use permitted in the new zoned district. The site plan review should take place only after the rezoning is approved, the two should not be processed simultaneously.

Permitted Principal Uses within the C3 zoned district are: Motor vehicle sales, service and rental, construction & farm equipment sales, sales of mobile homes, campers, recreational vehicles, boats & monuments, wholesale and storage uses, food packing and bottle works, commercial printing and newspaper offices, contractor's yards and shops, laundry, cleaning and dyeing plants. This does not take into consideration the Conditional Uses allowed with Planning Commission approval.

If approved, any of the permitted principal uses would be allowed, and the Chocolay Township comprehensive plan does not support C3 or Industrial Zoning in that area, and the area is bordered by residential zoned property. The Zoning Administrator recommends denial of this request.

Mr. Randall Mattson of Minnesota Towers, explained that Minnesota Towers is a company that builds towers primarily for cell phones. Mr. Mattson is instructed by the company to explore and make arrangements to building tower(s) within a specific search ring stipulated by the company who hires them. Mr. Mattson contacted Dr. Peura to see if he would be willing to lease a portion of his land to build a 175 ft. cell phone tower as his property is within the specific search ring. Mr. Mattson and Dr. Peura also met with Randy Yelle, Zoning Administrator, to see what the best course of action he would recommend to accommodate a tower of 175 feet high that would be within the zoning ordinance. Mr. Yelle suggested Mr. Mattson and Dr. Peura's best course of action would be to submit a request to the Planning Commission to try to rezone the property from R3 to C3. Mr. Mattson stated that a C1 rezoning only allows for a 75 ft. tower. Dr. Peura stated that he's not a construction person and only intends to lease the space and not do anything else with it. Mr. Mattson also stated that if he has to move the tower even one quarter of a mile it may interfere with the intent of providing better service to the company's customers and it will require a larger tower to be installed. The company would prefer to minimize the size of these towers.

V. PUBLIC COMMENT

Lee Blondeau, 30 Tracie Lane, stated that land zoned in Chocolay Township that would allow this type of tower is extremely sparse.

VI. OLD BUSINESS

A. Update on Alder Storage

Jennifer Thum, Director of Planning and Community Development, provided an update in regards to the zoning compliance of Alder Storage. As of last month, Ms. Silta has complied with all the MDOT requirements for the driveway in order to get the MDOT permit and a zoning compliance from Chocolay Township. When Jeff Rautiola informed the Township that everything was satisfactory with MDOT, we then issued a zoning compliance to Ms. Silta. As of this week, the footings have been installed and the floor added to one of the units. It seems that she will have one building built by the end of this fall.

Ms. Thum stated that the Township did have an issue with Ms. Silta, as she cut down all the trees in the rear that served as a buffer to the residential district. These were supposed to remain. When asked why she did this, she replied, "I had to cut them down in order to create the swales." This was not true as Ms. Silta could have

created the swale without cutting down the trees. Mr. Yelle and Ms. Thum were tempted to put a temporary stop work order on the site, but were able to reach an agreement with Ms. Silta.

It was agreed that Ms. Silta would plant enough Spruce trees on 5 ft. centers to replace the rear buffer and to plant the additional buffer that was called for on the final plan. This called for Lilac, Arbor Vitae, and Forsythia planted on 3 ft. centers. Mr. Yelle and Ms. Thum will monitor Ms. Silta's site to ensure that everything is planted correctly and that she follows the required conditions attached with her approval.

B. Comprehensive Plan in New Ordinance

Estelle Devooght stated that she had some concerns with the July, 2007 Draft Zoning Ordinance in regards to the comprehensive plan. The Commission members stated that a September, 2007 Final Draft Zoning Ordinance was recently provided to everyone to review before the October 29, 2007 meeting. Ms. Devooght stated that she will hold any comments until she reviews the most recent version of the Final Draft Zoning Ordinance.

VII. NEW BUSINESS

A. Rezoning #140 – Request to Rezone Property from R-3 to C-3

Jennifer Thum showed a map of the Township pointing out the C-3 zoning districts to help clarify the rezoning request of Dr. Peura's property and the surrounding districts. Ms. Thum pointed out that Dr. Peura's property is zoned R-3, but all of the property in front of him is zoned C-1 (commercial). Ms. Thum also reported that all residents and businesses were notified within 300 feet of Dr. Peura's property in regards to Rezoning Request #140. Dennis Magadanz asked where the access drive would be located to access the tower. Mr. Mattson stated that the access drive will be off M-28 East. He also stated that Dr. Peura owns both lots (approximately 30 acres) surrounding the proposed tower site.

Ken Tabor questioned why the property would need to be rezoned to C-3, and stated that if the property was rezoned to C-3 it could open up the property for other things and not just the tower.

Al Denton stated that another option would be to go before the Zoning Appeals Board, but there are no guarantees that the request will be approved there.

The Planning Commission members in attendance stated that they're uncomfortable rezoning this property to C-3 because of possible future problems with this type of zoning on this parcel of property.

Dr. Peura asked the members their opinion on whether he should keep the R-3 zoning and request a variance of the height restrictions from the Zoning Board of Appeals? Dr. Peura also stated that he is looking for possible options or suggestions to accommodate the building of this tower on his property.

Jennifer Thum suggested that this be tabled so she could meet with the assessor to see if it would be possible to section off a small parcel of Dr. Peura's property for just the tower. Ms. Thum will look into the legalities and report back to the Commission at the November meeting.

Al Denton stated that the Township would like to work with Dr. Peura and Mr. Mattson to try to accommodate their request to build a 175 ft. tower without having to rezone the property to a C-3 zoning district.

Tom Shaw made a motion, seconded by Ken Tabor to table this so staff can research the options available to Dr. Peura and Mr. Mattson's request to build the 175 foot tower and report back their findings at the November meeting.

5 Ayes 0 Nays Motion approved to table this until the November meeting.

B. U.P. Engineers and Architects – site plans review on an “as needed basis”

Jennifer Thum, Director of Planning and Community Development, reported that recently there has been some issues with existing site plans pertaining to drainage. As a result, U.P. Engineers and Architects were contacted about the possibility of them assisting with site plan review when needed. Ms. Thum believes that outside professional engineering assistance would be best to help ensure that proper draining is on all new sites. It's the Township's responsibility to ensure that the proposed site's drainage does not affect any of the neighboring properties. She stated that the Township would hire U.P. Engineers and Architects, if they believed that the site plan needed a more extensive review.

Currently, it is the Township's responsibility to pay for outside consulting advice. However, under the new ordinance there will be a provision that where the Township can require the applicant to either help with the consultant fees or to cover them completely. Ms. Thum believes the Township will be seeing more and more development, and having an outside agency assisting in the plan review would be beneficial.

“An escrow fee may be required to obtain a professional review of any other project with may, in the discretion of the Zoning Administrator or Planning Commission create an identifiable and potentially negative impact on public roads, other infrastructure or services, or an adjacent property and because of which, professional input is desired before a decision to approve, deny or approve with conditions is made.” (Zoning Ordinance, Draft 7/21/07).

Ms. Thum stated that enclosed in the meeting packets is some information from U.P. Engineers and Architects; the short form of agreement that proposes to provide review services on an as needed hourly basis and their current rate schedule. She also reported that the services that would most likely be used would be Landscape Architect, Planner and Engineer I on the rate schedule.

Estelle Devooght stated that she had a problem with one specific company being awarded all of the business.

Jennifer Thum stated that she understood and would be happy to put the services out for bids.

The Planning Commission members discussed that if the applicant pays for engineering or architectural services, they should be allowed to choose the company they wish with Board input / approval. The Board asked Ms. Thum to create a list of engineers to be considered by the Township and the applicant. The Board also asked Ms. Thum to look into developing a reasonable system to address this item as there are issues pertaining to who would have ownership of the documents, etc. Ms. Thum will research what other Townships do in these types of situations.

Estelle Devooght made a motion seconded by Ken Tabor to table this issue until the November meeting.

5 Ayes 0 Nays Motion approved to table this until the November meeting.

C. 2007 Road Ranking Rankings

Jennifer Thum, Director of Planning and Community Development and Martin Caceres, Director of Public Works submitted a memo to the Planning Commission members in regards to the 2007 Road Rankings.

Ms. Thum reported that with the 2008 budget looming and the upcoming millage vote, the Township needs to prioritize the next road projects so the needed funding can be identified and work can begin with the Road Commission on these future projects. Ms. Thum provided in the meeting packet a spreadsheet detailing the roads that were identified through field inspection, which should be prioritized for completion. Ms. Thum reported that the Township staff have ranked the roads

according to the Township's road ranking system and is asking the Planning Commission to review the rankings to determine their recommendations.

Dennis Magadan stated that CR 545 – West Branch Road should not be ranked on our list as it's a primary road and is the county's responsibility.

No other comments/recommendations were made by the Planning Commission members.

Estelle Devooght made a motion to accept the 2007 Road Rank List with the omission of CR 545 and seconded by Dennis Magadan.

5 Ayes 0 Nays Motion approved.

VIII. PUBLIC COMMENT

Mark Maki, 370 Karen Road, questioned a zoning ordinance change pertaining to contractors yards and shops. Mr. Maki stated that after reviewing the meeting minutes from April and July he was unable to find anything pertaining to this being added to the new zoning ordinance.

Lee Blondeau, 30 Tracie Lane, commented that he attended a meeting where this issue was discussed and he remembers a few contractors attending the meeting.

IX. COMMISSIONER'S COMMENTS

Tom Shaw, Vice Chair, requested that Jennifer Thum research similar tower issues and resolutions in other areas and report back her findings at the November meeting.

Al Denton, Chairperson, reported that the Zoning Appeals Board held a Special Meeting on October 4, 2007 regarding an appeal pertaining to a possible non-compliance of height at a home being constructed at 601 Lakewood Lane. The case was initially heard in Circuit Court and Judge Weber sent it to the Chocolay Township Board of Appeals to be heard first. Randy Yelle, Zoning Administrator, performed the measurements and determined the grade to the best of his abilities. After modifications were made, Mr. Yelle determined the height of the house as it stands today is in compliance with the Zoning Ordinance and the appeal was denied by the Zoning Board of Appeals.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, November 12, 2007 @ 7:30 PM
DRAFT COPY**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Vice Chairman Tom Shaw, Estelle DeVooght, Dennis Magadanz, Steve Kinnunen, Dave Cotton

Absent: Ken Tabor

Staff Present: Jennifer Thum (Director of Planning and Development), Randy Yelle, (Zoning Administrator), Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF OCTOBER 8th & OCTOBER 29th MEETING MINUTES

Tom Shaw motioned to approve the October 8, 2007 meeting minutes as written, seconded by Estelle DeVooght.

Ayes 6. Nays 0. Motion approved.

Estelle DeVooght motioned to approve the October 29, 2007 meeting minutes as written, seconded by Steve Kinnunen.

Ayes 6. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Steve Kinnunen motioned to approve the agenda as written seconded by Dave Cotton
Ayes 6. Nays 0. Motion approved.

IV. PUBLIC HEARING

A. Conditional Use Request #78, Proposal for a Home Occupation to Fix Transmissions on Automobiles and to Work Out of His Garage

Mr. Gregory Martin began his presentation by provided a handout of his invoices for the year to the Planning Commission members and explained his conditional use request proposal for a home occupation to fix transmissions and to work out of his garage. Mr. Martin explained that he's been performing this service since approximately 2001 and was unaware he needed approval from the Commission. Mr. Martin reported that he feels that the main concern is pollution. He did explain that he used to blow parts outside, but no longer does this. He also explained that all of the work he performs is done inside. Over the past year, Mr. Martin has done 52 transmission, which averages out to 1 per week. Mr. Martin did state that he will get in compliance with the DEQ. He also explained that he and his wife conducted a noise test today by having his wife go to various areas of the neighborhood to see if she could hear him blowing parts out inside of his garage. The noise could only be heard when she was in the front yard of their home, but the highway noise was just as loud. Mr. Martin also stated that the drain in his garage could be checked for oil or chemicals and none would be found as he doesn't accept transmissions unless they are drained of their fluids. Mr. Martin wanted to clarify that he does not fix cars in his garage; he only performs work on transmissions. He also wanted to clarify that he only occupies half of his garage as a work area and the other half is used for personal vehicles and recreational vehicles. Mr. Martin stated that the 4 vehicles in his driveway are his and wife's and they are all licensed and registered so his business does not cause a lot of traffic.

B. Conditional Use Request #79, Proposal to Build an Accessory Housing Unit onto an Existing Single-Family Dwelling Unit

Jill Leonard reported that she and her husband have submitted all the necessary paperwork and have been very careful to comply with all of the requirements associated with this request. Ms. Leonard stated the addition is for her mother and would encompass less than 30% of the existing structure and will be less than 1,000

square feet. Ms. Leonard also stated that they are more than willing to return to the Planning Commission in 5 years for a reconsideration of the conditional use request.

V. PUBLIC COMMENT

Paul Kyto, 1475 East M28, stated that he has been a neighbor of Mr. Martin for many years and has no problem with noise or felt concerned about oil getting into the ground water. He also stated that he has never been bothered by Mr. Martin fixing transmissions in his garage.

Gary Heinzelman, 1471 E. M28, stated that he did notice a little air noise in the Summer, but has no problem with Mr. Martin fixing transmissions in his garage, but he did ask the Commission to consider following the zoning ordinance as it's written.

Lee Blondeau, 30 Tracie Lane, requested to get the Planning Commission to discuss their thoughts in regards to the changes to the new ordinance pertaining to the rezoning of the Blondeau Trucking property. Mr. Blondeau requested that this issue be added to the agenda. Albert Denton responded that the agenda is pretty full for this evening, but if there's time the Commission will address this.

Stan Wittler, 124 County Road 545, stated his concerns about the 20 acre rezoning requirement in the new ordinance to build a home. He also questioned why 20 acres and not 5 or 10 acres? Mr. Wittler stated that this seems quite excessive and doesn't appear to serve the public's best interest. Estelle DeVooght stated that this change was decided to try and curb urban sprawl. Randy Yelle explained that the 20 acre requirement came out of public hearings that were held in 2005.

Mr. Dan Wietala, 645 Lakewood Lane, stated that he looked at the applicant's proposal and also the zoning administrator's letter and stated he doesn't support the approval of the Conditional use Proposal #78 due to chemical use. The area is zoned residential and there's always a fear of chemical use and he feels it is too risky to the ground water. Mr. Wietala feels the Township doesn't need to encourage these types of home occupations. He also stated that he hopes everyone who lives in this area is careful with chemicals since everyone has wells

Stephanie Gencheff, 597 Lakewood Lane, stated that this property doesn't really bother her, but an R1 district should remain R1. The only mitigating circumstance Mr. Martin has given is that he only works out of his home 1 day/week. Ms. Gencheff stated she doesn't think that this is enough of a reason to allow a commercial business in an R1 district.

VI. OLD BUSINESS

A. Bayou Court Condominiums

Jennifer Thum, Township Planner, thanked Mr. Keller for providing an updated site plan to the Township. She explained that when she visited the Bayou Court Condominiums recently there was some noticeable changes that were not part of the original site plan. Ms. Thum explained to Dan Keller owner of the Bayou Court Condominiums that when you make changes to the site plan you have to go back to the Planning Commission for approval of these changes. Mr. Keller was unaware that he needed to do this and is present at the meeting tonight to explain the changes, answer any questions, and listen to any suggestions. Ms. Thum stated that the main concern at this point is the increase in the grade and how the drainage might affect the residents on either side of the condominiums and she asked Glen Van Neste to take a look at the property and provide his opinion.

Mr. VanNeste explained that he went to the property and in his opinion the side of the property closest to the Bayshore Veterinary Clinic should not experience anything different from run off then they did before. The residence on the opposite side of the property could possibly have a problem with run off from the roof if there was an unprecedented storm. Mr. VanNeste did state that the Bayou Court Condominiums have constructed a retention pond, installed a retaining wall, and added gutters to the roofs to channel excess run off to the bayou behind the

condominiums, but these don't take care of the potential run off problem for the residence most at risk.

Estelle DeVooght questioned where the retention wall was located and does it stop the normal run off?

Glen VanNeste replied that the retaining wall does not channel the water.

Dan Keller stated that they've made changes to the gutters to channel the water to the center of the Condominiums and then to the bayou. He also stated he believes that the top of the retaining on the residence side can be modified so water can stay on their property and into a pipe already in the ground and then to the planters.

Albert Denton asked Mr. VanNeste if there may be a landscape solution to this problem by building another wall to channel the run off on the other side of the property nearest to the residence?

Glen VanNeste stated that he felt that could be a solution.

Dave Cotton asked about the retention pond in the front and does the water from a normal rain go to the back of the property.

Dan Keller stated that the rain from the retention pond in the front is not channeled to the back.

Jennifer Thum and Randy Yelle will work with Dan Keller to try to fix the resident drainage problem. Ms. Thum will provide an update to the Planning Commission at the December meeting.

B. Cellular Tower

Jennifer Thum, Township Planner, reported that Mr. Mattson (Minnesota Towers),

Randy Yelle and she have been looking for a suitable site to place a 175 ft. cellular phone tower near the intersection of US Highway M28 and US 41. Ms. Thum stated that the area being looked at within the specific range needed by Minnesota Towers, in her opinion, are not suitable for this type of tower.

Albert Denton suggested the property behind the Silver Creek Academy which is by the Township park, or by the Travelodge motel or behind Meister's green house, but he's not sure of the zoning. Mr. Denton asked Ms. Thum or Randy Yelle to look into the land behind Meister's Greenhouse and contact them as that land is in the same general area. Mr. Denton also suggested looking into the area by the Varvil Center on US Highway M28 to see if that area might be in the range Minnesota Towers is looking at for the tower. Mr. Denton also asked the public that if they have any suggestions, please call Chocoy Township.

C. Request for Proposal for Engineering Services

Jennifer Thum, Township Planner, reported that she wanted to update the Commission on this item. Ms. Thum has obtained samples of RFP's from different counties and is working on creating one specific to Chocoy Township. Ms. Thum will present this at the December meeting for review and changes. Ms. Thum stated that she will also include a grading scale at the end of the RFP for awarding engineering services and the awards should be based on the company knowing the area and should not go to the cheapest service.

VII. NEW BUSINESS

A. Conditional Use Request #78, Proposal for a Home Occupation to Fix Transmissions on Automobiles and to Work Out of His Garage

Jennifer Thum reported that Mr. Gregory C. Martin has requested Planning Commission approval of a Conditional Use Permit to allow for approval of a

home occupation to repair and rebuild transmissions on his property located at 632 Lakewood Lane. As required under the conditional use procedure, a notice has been published in the paper and all property owners within 300' of the property have been notified. Ms. Thum also stated that several letters were received against this proposal and a letter of support from Mr. and Mrs. Love. This proposal has the potential to be hazardous and could be detrimental to ground water, wildlife, etc. This type of business is not permitted in an R1 district and is only permitted in a commercial district.

Mr. Gregory Martin stated that there are numerous businesses being operated on Lakewood Lane and reiterated that he understands the environmental concerns and is more than willing to work with the DEQ to be in compliance. He also stated that this business does not generate any oil, as he won't accept transmission with oil. Mr. Martin has taken precautions for oil and mineral spirit concentration. He also stated that he doesn't generate enough business to rent or buy property and that is why he is seeking this conditional use request. Mr. Martin also stated he did some research on the computer and according to the DEQ standards, he has so little amounts of oil that it barely registers. He also stated that he has taken extra precautions in case of a small oil spill.

Dave Cotton stated that it appears that Mr. Martin is an expert for this type of specialty work and this doesn't seem like it's an automotive repair shop.

Steve Kinnunen stated his concerns about Mr. Martin taking business away from businesses that are zoned for this type of work in Marquette County.

Mr. Martin stated that he is fulfilling a niche and is now assisting Marquette Transmission & Auto Repair, as they don't have a person that does this type of work.

Estelle DeVooght stated that there are not many people in Marquette County who fix transmissions.

Randy Yelle cautioned the Commission about allowing this type of business in an R1 District, which could create many problems in the future.

Albert Denton, Moved, Seconded by Steve Kinnunen, that after review of Conditional Use request #78, the STAFF/FILE REVIEW – SITE DATA AND ANALYSIS, Sections 211, 107, and 701 of the Zoning Ordinance, the application and staff comments provided, and subsequently **not finding compliance** with the standards for approval of the request found in section 701 of the Zoning Ordinance, the Planning Commission **denies** Conditional Use request #78 for the following reasons:

1. The proposed home occupation is not a fitted use under the R-1 Zoning District and allowing this type of use would go against the Township's Zoning Ordinance.
2. The applicant would be handling hazardous material such as Transmission fluid and oil that could be detrimental to the groundwater.
3. The proposed home occupation has the potential to interfere with the general enjoyment of the neighboring properties.
4. The proposed home occupation really does not improve the surrounding neighborhood.

Ayes 5. Nays 1. Motion to deny this request approved.

Estelle DeVooght explained to Mr. and Mrs. Martin why she voted no on Conditional Use Request #78. Ms. DeVooght stated that many people in the Township have home occupations and have never gone to the Township for approval. Ms. DeVooght also stated that she doesn't agree with the way this request materialized or how it was handled.

B. Conditional Use Request #79, Proposal to Build an Accessory Housing Unit onto an Existing Single-Family Dwelling Unit.

Jennifer Thum reported that David and Jill Leonard, 990 Valley Road, have

requested the Chocolay Township Planning Commission to review a Conditional Use Permit to allow for approval to construct an accessory housing unit addition to allow for an elderly parent to live with them. As required under the conditional use procedure, a notice has been published in the paper and all property owners within 300' of the property have been notified. Jennifer Thum also stated that Fred Benzie from the Health Department asked that she include that if 2 or more bedrooms are added that Mr. and Mrs. Leonard will have to have their septic system reviewed to make sure it can handle the additional capacity.

Dave Cotton Moved, Albert Denton Second, that after review of Conditional Use request #79, the STAFF/FILE REVIEW – SITE DATA AND ANALYSIS, Sections 211, 107 and 701 of the Zoning Ordinance, the application and staff comments provided, and subsequently **finding compliance** with the standards for approval of the request found in section 701 of the Zoning Ordinance, the Planning Commission **approves** Conditional Use request #79, with the following conditions:

1. That the proposed accessory housing unit does not increase the floor area of the single-family dwelling unit by over 30%.
2. Upon approval of this accessory unit, the owner(s) shall file an affidavit with the Registrar of Deeds giving notice that the accessory housing unit of the involved parcel is for temporary use by a parent(s) or grandparent(s) related to the owner.
3. This conditional use is good for 5 years. After that time is up the applicant is required to come back to the Planning Commission for an extension.
4. Upon the cessation of use of the accessory housing unit by the parent(s) or grandparent(s) of the owner-occupiers of the single-family home, said accessory housing unit shall be removed or converted to remove the individual floor plan elements, that are functionally create a separate dwelling unit.
5. A zoning compliance permit shall be obtained from the Chocolay Township Zoning Administrator.
6. A zoning compliance permit shall not be issued until all other necessary permits as required by Federal, State, and Local Agencies, are acquired.

Ayes 6. Nays 0. Motion approved.

David Leonard, 990 Valley Road, stated that when he purchased the house he checked the septic system and found they were already in violation as they had a steel tank for their septic tank. Mr. Leonard stated that he has upgraded his septic system to a concrete tank from a steel tank that holds up to 1,500 gallons rather than the 1,200 gallon requirement by the Health Department. Mr. Leonard stated to the Commission that he believes they have met all of the requirements asked of them by the Township. Mr. Leonard asked about clarification of #6. Mr. Denton instructed Mr. Leonard to contact Randy Yelle and he will explain #6 to him in detail.

C. Private Road Language

Randy Yelle explained to the Commission that he just received today, the draft zoning ordinance revisions, the County road specifications and the comprehensive plan. Mr. Yelle stated that the Planning Commission members should consider tabling this until the December meeting so they can review the new language.

Dave Cotton motioned, Dennis Magdanz seconded to table private road language until the December meeting.

Ayes 6. Nays 0. Motion Approved.

D. Height Definition Language

Randy Yelle explained to the Commission that he just received today, the draft zoning ordinance revisions, the County road specifications and the comprehensive plan. Mr. Yelle stated that the Planning Commission members should consider tabling this until the December meeting so they can review the new language.

Dave Cotton motioned, Dennis Magdanz seconded to table height definition

language until the December meeting.
Ayes 6. Nays 0. Motion Approved.

E. Proposed Zoning Ordinance

Randy Yelle explained to the Commission that he just received today, the draft zoning ordinance revisions, the County road specifications and the comprehensive plan. Mr. Yelle stated that the Planning Commission members should consider tabling this until the December meeting so they can review the new language.

Dave Cotton motioned, Dennis Magdanz seconded to table height definition language until the December meeting.
Ayes 6. Nays 0. Motion Approved.

VIII. PUBLIC COMMENT

Tom Thomas, 673? Appleway Trail, stated that he feels the existing private roads should not be affected by the new ordinance.

Tom Shaw explained that the changes in the new ordinance pertaining to private roads will be from the point the new ordinance is put into effect and shouldn't change the private roads that were already approved unless they want Marquette County to assume responsibility for them.

Lisa Niemala, 111 Lara Lei Trail, stated that she feels the current roads should be grandfathered in and not subject to the new ordinance changes. Albert Denton and Steve Kinnunen explained that Mr. and Mrs. Niemala's private road has already been presented and approved by the Planning Commission and the new ordinance will not affect that approval.

Chris Nettleton, 130 Maple Road, stated that he submitted an application for a conditional use request for a bed and breakfast at the end of September. He would like to know why this request is not on tonight's agenda.

Randy Yelle stated that he needed Mr. Nettleton to submit some further documents and this has now been done. Mr. Yelle will contact Mr. Nettleton at the beginning of next week. Mr. Yelle also stated that he believes this be on the December Planning Commission meeting agenda.

Frasier Simpson, 231 Kawbawgam Road, asked is a road or a driveway is being built behind Kawbawgam Road?

Randy Yelle stated that Paul Smith has a 66 ft easement to his property in back of the easement and is putting in a driveway as he wants to build a home back there. Mr. Yelle has been unable to contact Mr. Smith to speak to him about it.

Elizabeth Delene, 232 Kawbawgam Road, stated that she came to the Township office to inquire about Mr. Smith obtaining a permit to put in a driveway on the property located on Kawbawgam Road and the Township, but they were unable to assist her at that time. She then contacted the County and they don't have a permit for this project either. Albert Denton replied that he believes this is a County issue and not a Township one so the County will need to address this issue.

Stephanie Gencheff, 597 Lakewood Lane, stated that she feels that the Bayou Court Condominiums is an atrocity and the drainage problems they are experiencing is of their own making. She encouraged the Commission to require grading permits before the work is actually done. If Bayou Court Condominiums was going to build a plateau to place condominiums on, why didn't they have to take into consideration the average surrounding grade?

Patricia Martin, stated that she is very dismayed by what happened pertaining to Conditional Use Request #78. It appeared to her and her husband that the decision was already made before they were able to present their request. Ms. Martin stated that they paid \$250 to be able to request conditional use #78 and that is a lot of money to pay. She also stated that when she came to the Township office to get

copies of the letters that were submitted pertaining to Conditional Use #78, the letters were in 2 different envelopes and she feels she wasn't given all the letters. Ms. Martin requested a written response on how the recommendation was done within 10 days. She also requested information on how to appeal tonight's decision within 10 days.

Stan Wittler, 124 County Road 545, asked if the new ordinance will require a 66 ft right of way for a private residence on the property? His concern is not only the 66 ft. right a way but whether he will be required to pay for a private road so his son can have access to the property if he decides to build a home on this property.

Estelle DeVooght stated that she was under the impression that the new private road ordinance pertaining to driveway requests such as Mr. Wittler's was going to be changed to better reflect the changes the Planning Commission discussed previously.

Lee Blondeau, 30 N. Tracie Lane, stated that he would like to make a formal request to rezone his property from a C1 Commercial district to a permitted use. He stated that Blondeau Trucking has been at the same location for over 50 years and at this point in time there is no other available land in the Township to move and expand. Randy Yelle stated that he will meet with the Township Attorney to see if this property could be approved as a conditional use and report back to at the December meeting.

IX. COMMISSIONER'S COMMENTS

There were no Commissioner's comments.

Albert Denton, Chairperson

Laurie Washaw-Eagle, Recording Secretary

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, October 29, 2007 @ 7:00 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Vice Chairman Tom Shaw, Estelle DeVooght, Dennis Magadan, Ken Tabor, Steve Kinnunen

Absent: Dave Cotton

Staff Present: Jennifer Thum (Director of Planning and Development), Randy Yelle, (Zoning Administrator), Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF OCTOBER 8th MEETING MINUTES

Albert Denton motioned to table until the November 12, 2007 meeting, the approval of the minutes from the 10-8-07 meeting seconded by Dennis Magadan.

Ayes 4. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Dennis Magadan motioned to approve the agenda as written seconded by Steve Kinnunen. Ayes 4. Nays 0. Motion approved.

IV. PUBLIC HEARING

Final Draft of Zoning Ordinance

Pat Coleman, U.P. Engineers and Architects, summarized revisions and additions to the Final Draft Zoning Ordinance, which is the result of many months of work, public hearings, work sessions, etc. The revised final draft zoning ordinance addressed all of the recommendations made related to the comprehensive plan that was created for Chocolay Township last year, which called for the creation and consolidation of various zoning districts. Some of the zoning district changes are RP and OS were zoned agricultural. The RR2 district was eliminated by modifying the agricultural forestry district to include the same uses and to allow minimum lot sizes of uses by right of 20 acres. The RR1 district was eliminated by consolidating that into the agricultural forestry or R2 district to be consistent with abutting property. Lakeshore (LS/R) is now called Waterfront Residential for Lake Superior and some of the inland lakes and streams. Also, consolidated R1, 2, and 3 to R1, created R2 for all of Harvey where most residential was non-conforming, but will now be conforming in terms of their lot sizes to eliminate a lot of variance requests and Zoning Board of Appeals requests. R4 was renamed to multifamily residential, C3 was renamed Industrial and what used to be public land will be changed to municipal properties (MP).

A lot of the text was cleaned up in the draft ordinance. In the past there was a convoluted process if you did have a non-conforming lot, you would first have to have it classified as Class A or Class B. This will be changed to you're either conforming or non-conforming. The height definition and methodology was revised for determining height. We tried to make this definition very clear. Mr. Coleman stated that a lot of definitions to clarify their meaning. In the Comprehensive Plan one of the goals was to encourage Rural cluster development was encouraged rather than spreading this out all over the Township and language was added to allow this in certain zones.

The Township for the past few years has been working with other local governments in Marquette County to in regards to access management on M-28/US 41 as more and more development occurs there will be a need for more driveways and then the road will become more congested and more accidents will occur. Access management is to try to reduce to a minimum the number of curb cuts on the highway. Any future development on M-28 or US 41 will be subject to access management provisions that are in the new ordinance.

There is a lot of concern pertaining to outdoor wood boilers and wind energy conversion as energy costs increase and the Township has created some regulations that would allow for wind energy conversion and outdoor wood boilers under certain conditions.

Another big proposed change is if someone wants to build a private road it must be built to county standards so the county will take over the maintenance and responsibility for that road. The new ordinance will eliminate the private road requirements and require that all development would be located on public roads. There is also a section that is added to the ordinance to regulate fences.

STAFF COMMENTS:

No staff comments at this time.

BOARD COMMENTS:

No Board comments at this time.

V. PUBLIC COMMENT

Stephanie Gencheff, 597 Lakewood Lane, inquired that if R4 is rezoned to multifamily residential, is there still an R3? Mr. Coleman responded that this was consolidated into the R1. In a rural cluster development subdivision the multifamily residential district and the agricultural forestry district have minimum lot sizes of 1 acre, but when you go into the R1 you are dealing with a lot smaller lot size with a minimum lot size of 25,000 sq. feet and if she owned 5 acres and decided to sell it to a developer he could then put 8 units on it and put all the units on one half of the 5 acres will this be possible. Ms. Gencheff questioned set backs in an R1 district and the ordinance only addresses set backs as 500 foot set back from a farm and doesn't pertain to a and R1 residential district. She also voiced her concern about open space being encouraged in a rural cluster and the way a rural cluster is laid out it could affect the properties on either side of it and she feels that the Township should require open space to be along the perimeter. She strongly objects to a cluster development subdivision to be allowed in an R1 district where a minimum lot size is 25,000 sq. ft. and the Township could end up with less density and a much denser population then the residents of Chocolate Township would want.

Maggie Meiss, 105 Wright Street, voiced her concerns about the truck traffic affecting the air quality in her neighborhood pertaining to the contractor's yards and stated that the traffic that goes by her house currently has created a vibration resulting in her foundation cracking. She also expressed concern about the truck traffic and noise that goes on all night, which is not supposed to be allowed from 9PM to 5 AM. If someone would like to put a trucking business in this area, they should be required to put them in an Industrial Park and not in a residential area.

Jim Clark representing Dr. John English, questioned the elimination of private roads except for an AF property if in a PUD district could you still do a private road with a PUD plan? Mr. Clark stated that this requirement would add significant cost to the development and it should be required recorded in the deed that the owners would have to maintain the road and he doesn't see the purpose for a public road within a PUD. He voiced his opposition of the wording in the new ordinance and there should be some sort of exception for the PUD designation upon approval of the Planning Commission. Another concern Mr. Clark has the huge gap in the residential land by the elimination of the rural residential districts i.e., R1 25,000 sq. ft, R2 10,000 sq. ft, and FR 20 acre sites, etc. There seems to be a big gap between high density residential living and rural living. Mr. Clark stated that he also opposes the RR2 designation (pg 44), which he feels should be possibly zoned as transitional zones. Mr. Clark also voiced his concern that in a cluster development the cost of the road required by the ordinance would be more expensive then the land and if you did a PUD it would cost the average person \$10,000 to \$15,000. It seems there is no middle ground for required lot sizes. Mr. Clark also suggested the Township require property owners on a private road to have a covenant provision to maintain road maintenance or require that property owners be required to create a performance bond to insure the road will be built to standard. Mr. Clark also stated that another way that a private road could be handled is by completing a Land Division with Private Road Application and place a covenant upon the application stating that maintenance provisions for every lot and needs to be dictated, and keep the same standards as are already there as they're good standards. Another mechanism that can be used would for the Township to require the property owners to put up a bond for the road and maintenance. If the road is not kept up the bond will be used.

Glenn Van Neste, 1402 Kimber Street, asked if you bring the private road up to county road specifications, does that include black topping? What if you only own 1 parcel of land and it's only going to be 1 parcel and your driveway is 200 ft. because it goes along one lot to get to another parcel of land in the back, are you going to require county road specifications? Mr. Coleman stated no as long as you have frontage. Mr. Van Neste asked what if you have an easement? Mr. Coleman stated that an easement might qualify as frontage. Mr. Van Neste stated that this would be very burdensome so someone building on one lot. He also cautioned about the use of the word "Lot", "Parcel" and "Unit" as they should be used appropriately in the ordinance as there has been many court cases in the State of Michigan for inappropriately using these words. The word "Site" when it comes to condominiums and should be eliminated from the ordinance. The word "site" is not recognized by the State of Michigan the word "condominium" is the correct term.

John English, 450 E. Ohio Street, stated that he has a question about the public/private road issue and commented about the front page of the Mining Journal in regards to the County not having the resources to take care of some of the Township's roads and his question is that if Chocolay is requiring the private roads to be up to county standards are they responsible to service the road and if they are what is the Township telling us.

Bob LaJeunesse, 407 Little Lake Road, commented that Marquette Township does not have the funding to take care of the roads they have much less more roads. Mr. LeJeunesse also stated that he disagrees with the private road ordinance as he has property in the Varvil Center and this change will make that road non-conforming.

Lee Blondeau, 30 Tracie Lane, questioned where did the access management plan originate from? Mr. Coleman explained that it was created with the input of Chocolay, Marquette, Marquette Township, Negaunee and Negaunee Township. In summary the management plan means that every existing parcel of land less than 500 ft. will be allowed 1 driveway and every parcel of land greater than 500 ft. will also be allowed 1 driveway but may be required to build frontage roads, connected parking lots or other types of other alternative access points. The existing driveways in Chocolay Township will be allowed to stay, but if the MDOT decides to do a project they will negotiate with the owners to reduce the driveway access(es) to make it more safe. Mr. Blondeau questioned Private Roads (pg. 49) in regards to all existing lots on private roads becoming non-conforming and appears that it will be burdensome to property owners. Mr. Blondeau questioned the "I" district and stated that the Township should consider expanding this district as currently there is no open space for more "I" district. Mr. Blondeau also inquired as to the timeline that the new zoning ordinance will become effective. Al Denton stated that this is the last public hearing that will be held by the Planning Commission and once the Commission approves the new ordinance, it will be sent to the Township Board for their approval before it is enforced.

Leroy Blondeau, 1 Heidi Drive, stated that he has developed Edward Trail, which is a private road and was put in properly and still has 3 more parcels to sell will these lots be non-conforming? He stated that the road is a good road and is maintained and feels that he should not have to bring the road up to county standards. He suggested that the Township have its own specifications for private roads. Mr. Blondeau stated that when building a private road you're going to encounter two different standards i.e., county specs and the Township specs, which are different. He is opposed to the new ordinance pertaining to private roads and stated that the Township should have their own specifications for private roads and not make them all non-conforming with the new ordinance.

Bob Cambensy, 306 N. Sixth Street, commented that he feels the Township is making a mistake pertaining to making parcels non-conforming. He feels this will be more burden on the Zoning Appeals Board and will create a lot of problems. He voiced his concern pertaining to required acreage in an agricultural district, but has concerns with the elimination of the 5 acre zoning. Height definitions (pg. 9) and voiced his concern about measuring from the "original ground" and stated that some people will remove dirt and/or grade the lot to increase or decrease the original ground. The definition should be made more clear such as incorporating that "height measurements need to be taken prior to the breaking of the ground" or consideration could be given to determining a grade by how far the development is from the lot line. Mr. Coleman stated that he could provide some alternative definitions for consideration. Mr. Cambensy also commented that the County doesn't want nor does it have the resources to maintain frontage roads.

John Swanson, 2366 U.S. 41 South, requested clarification pertaining to pg. 49 in regards to frontage road requirements and easement or other right-of-way not less than 66 feet and would this apply to commercial property. Mr. Coleman stated that if the property doesn't have frontage on a public street or a public road then you would have to create an access road that meets county standards.

Gary Niemela, 111 Laralei Drive, provided a short history of his property and the building of his private road so his kids could play safely and he and his wife could walk their dogs safely. Mr. Niemela has taken extra precautions to preserve the trees and vegetation on his property. Mr. Niemela voiced his concerns in regards to private road safety concerns and feels that they are unfounded as he's had to deliver building materials on many private roads and has never encountered the inability to do this. He also questioned if Marquette County has the resources to take on more roads once the revised zoning ordinance is put into effect. He stated that making private roads non-conforming especially for those who maintain a good and well-maintained road is unfair. He stated that he feels it is important for the Township and the residents to give each other respect and consideration before making a lasting and costly decision.

Stanley Wittler, 124 County Road 545, made a suggestion to the Planning Commission to look into a better way to inform the public so the public can be better prepared for such meetings. He also stated that not all properties are directly on public roads and why should someone need 20 acres to build a home? Why eliminate the 5 acres? He also stated that the Township should let more people give input into the Zoning Ordinance changes.

Janet Amundsen, 2029 M-28 East, commented on the rural cluster development is for low density, and a rural cluster subdivision talks about high density (pg. 52) and stated that parking lots, paved areas, roads, etc. should not be part of the open space. On page 53 it should be required that not only the quality of the water, but the quantity of water should also be looked at for rural cluster developments. She also stated that she disagrees with 55C, which could give the developer a bonus of 52% to develop and 48% open spaced. She asked for clarification of the overlay for snowmobile trails and the requirement of a 50 ft. set-back and she questioned set-back from what? Mr. Yelle explained that this requirement is for snowmobile trails on private property and not the State trails. Ms. Amundsen also pointed out a couple text errors, i.e., "4.11 PUD" on page 22 there is no 4.11 as it ends with 4.10 and PUD is under 4.09 and it goes from 4.7 to 4.10 so there's some discrepancy there. On page 14 where it states See Section 6.5 for zoning districts, this should be 6.6.

Mark Maki, 370 Karen Road, commented on pages 20 and 21 in regards to the zoning districts. On page 20 there's an agricultural/forestry district and what has been added to the zoning ordinance at some point in time after April, 2007, for building contractor yards and shops. His concern is that if this ordinance is passed a large contractor could go into a residential part of the Township and put up a contractor's yard with approval of a conditional use from the Planning Commission and a Public Hearing. Mr. Maki questioned contractor's yards and shops being added to the commercial district. Mr. Maki stated that why would you encourage someone to put up a contractor's yard next to a nice restaurant?

Mr. Coleman stated that it's not in the ordinance yet as this is a draft and Mr. Maki's concerns will be noted. He also questioned #8 on page 20 under conditional uses other uses deemed by the planning commission being in the same general character as those permitted by a conditional use. How would that process work? How does the Planning Commission make that determination? Would it be before the public hearing on the issue or during the process? Mr. Coleman stated that the determination would be made during the process automatically then it will be considered a conditional use and goes before the Planning Commission and the community.

Mr. Coleman in summary stated that the main issues he's hearing out of this public hearing and the new zoning ordinance are private roads, rural cluster development, access management, and lot sizes. He stated that the Township Planning Commission will deliberate all of these issues and make changes as appropriate.

VI. OLD BUSINESS

No old business to address at this time.

VII. NEW BUSINESS

No new business to address at this time.

VIII. PUBLIC COMMENT

Refer to V.) Public Comment for all public comment.

Lee Blondeau, 30 Tracie Lane, provided the Planning Commission members with a copy of “Michigan’s new Contract Zoning Laws”, which gives municipalities and developers more flexibility and options than ever to promote efficient, sensible, and thoughtful land use.

IX. BOARD COMMENTS

Steve Kinnunen commented that the standards are already there for private roads and seem to be working well. Mr. Kinnunen also stated that the Township should obtain and compare the revised Marquette County’s Road Standards against Chocolay Township’s standards. Mr. Kinnunen stated that he feels we should stay with the new standards.

Estelle DeVought commented that the Planning Commission needs to follow the Ordinance and not grant permission for slight variations as this will cause problems in the future.

Mr. Coleman, the Board Members and staff discussed whether they should allow private roads in the Township or stay with the current private road standard. The property owners must be required to meet the Township specifications/standards. Discussion also ensued in regards to how the Township would be able to monitor private roads for maintenance and compliance with the specifications/standards. Chocolay Township does not have anyone at this time to be able to monitor private roads. Mr. Coleman stated that some of the definitions that were discussed will be made clearer and the corrections will be made. Mr. Coleman also stated to the Board Members not to just think of the current situation you should think that the property owner’s should legally protect by easement other owners on the property so they have access to their property from a public right-of-way and to avoid land locking.

Tom Shaw commented that other Townships must be having these same type of challenges and Chocolay Township should research this.

The Planning Commission will obtain Marquette County’s Road Commission standards and research how other Townships are handling these types of issues. The Planning Commission will decide if they want to keep the private road requirements as they are and put a provision in there for inspection. Mr. Coleman cautioned that if you send someone out to inspect the road, the Township would be assuming responsibility that it was in fact built properly and if anything goes wrong, the property owners are back complaining or keep the new public road standard in with revisions. Discussion also ensued that there are other options that property owners can take in regards to the private road standard. Mr. Coleman stated that the Township has the mechanisms that state if property owners want to develop there is the PUD, which gives much flexibility or there is the rural cluster subdivision provisions. The items to be discussed further at the November 12, 2007 meeting and will include lot size i.e., MMR - should we stay with the 20 acres for multifamily dwellings such as mobile home parks, staff will research if there is a better way to define height measurement, private roads, and rural cluster development. Information will be gathered and provided to the Commission members prior to the next November 12, 2007 meeting.

Albert Denton motioned, seconded by Ken Tabor to address the above items at the November 12, 2007 meeting.

Ayes 5. Nays 0. Motion approved.

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

No informational items or correspondence to address at this time

XI ADJOURNMENT

The meeting adjourned at 9:40 p.m.

Albert Denton, Chairperson

Laurie Vashaw-Eagle, Recording Secretary

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
SPECIAL ZONING ORDINANCE
WORK SESSION
Thursday, January 3, 2008 @ 7:00 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Dennis Magadanz,
Dave Cotton, Ken Tabor

Absent: Vice Chairman Tom Shaw, Steve Kinnunen

Staff Present: Jennifer Thum (Director of Planning and Development), Randy Yelle,
(Zoning Administrator), Laurie Vashaw-Eagle (Recording Secretary)

II. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Dennis Magadanz motioned to approve the agenda as written seconded by Estelle DeVooght.

Ayes 4. Nays 0. Motion approved.

III. PUBLIC HEARING

There are no public hearings scheduled at this time.

IV. PUBLIC COMMENT

There was no public comment.

V. OLD BUSINESS

A. Work Session for Zoning Ordinance

Paul Coleman explained that the page number in the index portion of the 1/2/08 Final Draft of the Zoning Ordinance are incorrect due to the old version of the Zoning Ordinance conversion being somewhat of a problem. Once all of the changes are made Mr. Coleman will have the entire document reformatted. Mr. Coleman also pointed out that the most recent changes are bolded and in italics throughout the document.

Al Denton reported that the work session will consist of going through the 1/2/08 version of the Final Draft of the Zoning Ordinance page by page both manually and Jennifer Thum will follow along on the computer making suggested changes/corrections.

Mr. Denton noted that on the back of the cover there is a new "Note to the Reader" providing a brief explanation of the necessitated numerous changes since May 9, 1977 when the zoning ordinance for the Charter Township of Chocolay Township was originally adopted.

Page 1 – I. "Purpose, Title, Severability, Effective Date, Relationship to Other Laws, Administrative Standards and Procedures" should not be entirely capitalized.

Page 15 Section 3.1 - second paragraph last two words in the paragraph change “this ordinance” to “the Township”.

Page 22 Section 4.10 – Special Uses in Designated Zoning Districts – Section 4.10 A.1 last word in the paragraph should be changed to Section 4.10 from Section 4.18.

Page 24 Section 5.3 – US-41/M-28 Access Overlay District – Mr. Coleman explained that this was written by the Michigan Department of Transportation to address increasing development and traffic along US-41/M-28, which will increase traffic volumes and introduce additional conflict points, which will erode traffic operations and increase the potential for traffic crashes. The Access Management addition to the zoning ordinance is approximately 25 pages long. Chocolay Township will be the first to enact this in their zoning ordinance. The MDOT’s purpose is to work with property owners to avoid traffic risks.

Page 47 Section 6.4 – Nonconforming Lots of Record. Clarification was requested pertaining to the sentence that reads “Contiguous parcels under the same ownership are considered combined as necessary to eliminate or reduce to the maximum extent possible all nonconformities.” After much discussion it was agreed that the sentence will be changed to read “Contiguous parcels under the same ownership are considered combined as necessary to eliminate or reduce to the maximum extent possible all *dimensional* nonconformities.”

Page 47 Section 6.4, sixth sentence down beginning with “provision is to limit density.” delete “in areas of historically small lots.”

Page 47 Section 6.5 – Remove Section A.1)C and B.1)C and in A.1)D add the word “coal” after “wood pellets without additives.”

Page 48 Section 6.7 – Change title to read “Road Frontage Requirements” rather than “Frontage Road Requirements”.

Page 49 Section 6.7 third paragraph, second sentence “Property owners with lots on existing private roads . . . “should be changed to read “Property owners with lots on existing “*approved*” private roads.

Page 49 Section 6.7, fifth paragraph down, second sentence beginning with “all areas . . . “and replace it with, “For the purpose of this covenant seasonal road, private road, right-of-way, easements and/or any unapproved access of 300 feet or more are considered one in the same.”

Page 107 Section XV – Zoning Board of Appeals—Powers, Duties, Rules – in the second paragraph, first sentence where it states “not more then two” the word “then” should be changed to “than.”

Page 112 Section 18.4 – Exemptions from Sign Regulations – change the dashes in front of each item to numbers.

Page 115 Section 18.12 “Fences” – There was much discussion pertaining to fence regulations in the Township and it was questioned if there was truly a need for such indepth regulations.

Estelle DeVooght made a motion to delete the entire Section 18.12 “Fences”, seconded by Ken Tabor.

Ayes 2. Nays 3. Motion failed.

Dave Cotton stated that he feels there needs to be fence regulations especially in the R1 and R2 districts as there have been problems in the past. It was decided to table the fence regulations/guidelines so they can be looked into further, rewritten, and presented to the Planning Commission for comments and/or approval

Page 117 Section XVIII. Zoning Maps delete 19.3 “Beavergrove Map” as there isn’t a map for Beavergrove.

VI. NEW BUSINESS

A. Mr. Tom Shaw Resigned, New Vice-Chairperson

Al Denton reported that Tom Shaw resigned as Vice Chairperson due to a job promotion, which will not allow him to attend the meetings. The Chocolay Township Planning Commission will be seeking a new vice-chairperson.

VII. PUBLIC COMMENT

Lee Blondeau requested the Planning Commission’s explanation as to why Blondeau Trucking cannot be zoned as a permitted principal use rather than a conditional use. Mr. Blondeau feels that being zoned as a conditional use lacks flexibility for his particular parcel and his business.

Dave Cotton explained that in his opinion zoning the Blondeau Trucking parcel as Industrial could bring unwanted business to that parcel in the future and therefore he is against rezoning this to a permitted principal use.

Al Denton stated that there is a court order against Blondeau Trucking to restrict him to a specific number of trucks. Mr. Denton stated he is also against zoning the Blondeau Trucking parcel from a conditional use to a permitted principal use as he would like to have Blondeau Trucking come to the Planning Commission with changes they may wish to make in the future for approval as appropriate.

Lee Blondeau explained some of the history involving plans to rebuild the garage and clean up the contaminated soil, but was turned down by the Township and he would like to avoid this type of problem in the future.

Paul Coleman explained that there is not much difference between a site plan review and a conditional use. Mr. Coleman explained that even if a permitted principal use was granted there’s still uncertainty that a future project would be approved.

There was much discussion pertaining to private roads, but no changes will be made to the zoning ordinance.

Mr. Tom ??? commented that he would like to thank the Planning Commission for being so open to comments and changes to the zoning ordinance from the public.

VIII. COMMISSIONER’S COMMENTS

Estelle DeVooght inquired as to why Conditional Use Request #78 – Home Occupation to Fix Transmissions on Automobiles and to Work Out of His Garage (Mr. Gregory Martin) paid the \$250.00 fee and attended the Planning Commission meeting on November 12, 2007, if the Zoning Administrator had already closed him down.

Al Denton replied that Randy Yelle, Zoning Administrator informed Mr. Martin that his conditional use request would most likely be turned down as it is located in an R1 district and would not be in compliance in a R1 district.

Dave Cotton thanked the public in attendance for their input

IX. INFORMATIONAL ITEMS AND CORRESPONDENCE

None.

X ADJOURNMENT

Dennis Magadanz motioned, seconded by Ken Tabor to adjourn the meeting. The meeting adjourned at 9:40 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, January 14, 2008 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Dennis Magadanz, Ken Tabor

Absent: Steve Kinnunen, Dave Cotton

Staff Present: Tom Murray - Community Development Coordinator, Randy Yelle - Zoning Administrator, and Laurie Vashaw-Eagle - Recording Secretary

II. APPROVAL OF NOVEMBER 12th & JANUARY 3rd MEETING MINUTES

Dennis Magadanz motioned to approve the November 12, 2007 meeting minutes as written, seconded by Ken Tabor.

Ayes 4, Nays 0, Motion approved.

Dennis Magadanz motioned to approve the January 3, 2008 special meeting minutes as written, seconded by Ken Tabor.

Ayes 4, Nays 0, Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Al Denton requested that VII. C & D be moved under V. Public Comment. With this change made, Al Denton motioned to approve the agenda as written, seconded by Estelle DeVooght.

Ayes 4, Nays 0, Motion approved.

IV. PUBLIC HEARINGS

A. Conditional Use Permit #77

Holly Petrillo and Chris Nettleton are requesting the Planning Commission to review a conditional use request #77 to allow for a four bedroom Bed and Breakfast at their property located at 130 Maple Road. The applicants were not in attendance for this public hearing.

B. Chocoley Downs Golf Course, Rezoning #141

Bob Cambensy, Engineer representing the Chocoley Golf Club, described that they are requesting a proposed rezoning of Chocoley Downs from a R-1 to PUD. The entire parcel is 122.5 acres and the applicant(s) is proposing 33 single-family individual homes, four areas of 10 townhouses, and one area of 8 townhouses. Mr. Cambensy described that the 33 single-family homes will be built on 1 ½ acre parcels equaling 22 acres and the townhouses will be built on the remaining 5 separate areas of the proposed development which will be built in phases (see preliminary plans). Mr. Cambensy wanted everyone to know that this plan is very preliminary at this point and much of it could change in accordance with the various agencies that will need to be involved and their recommendations.

V. PUBLIC COMMENT

A. Conditional Use Permit #77

Brian Anderson, 108 Maple Road, stated he didn't receive a letter as he's not within 300 ft. of the parcel, but he does have some concerns pertaining to the Bed and Breakfast and Kawbawgam Lake access, which is now considered private and may be considered as a public lake. Mr. Anderson also stated his concern about increased traffic on Maple Road as it is a very small road with an incline that has a very short sight distance. Mr. Anderson also felt that this type of change to Mr. Nettleton's property may affect the other residents marketability of their property.

Larry Shell, 120 Maple Road, stated that he has spoken to Mr. Nettleton about his plans to add the additional rooms to his property. Mr. Nettleton explained to Mr. Shell that as he has been researching the past construction history on the property, he is finding that a lot of the construction done previously was done without building permits and he's working a correcting these issues. Mr. Shell commented that he feels Mr. Nettleton would be a responsible bed and breakfast owner, but does have concerns of noise, the "blind hill", dog issues with the bed and breakfast as the neighbors allow the dogs to roam (with permission) through each others yards. With road conditions i.e., as the road still hasn't been plowed since the weekend snow, and most important, what might happen if Mr. Nettleton sells this property to someone else.

B. Chocolay Downs Golf Course, Rezoning #141

Pam Erickson, 120 Dana Lane, questioned Mr. Cambensy if there are plans to put in another road to come out on M-28.

Bob Cambensy, Engineer, stated that the owners of Chocolay Downs will work with the Planning Commission and follow their recommendations.

Miller Shuck, 4 Redfox, Chocolay Downs, stated his concern about the additional traffic, which according to his approximation, would involve 162 vehicles per day using the road within the development. Mr. Schuck voiced his concern that another exit should be looked into for safety reasons.

Sunday Walden, 2052 M-28 East, asked how much green space will there be from the south edge of the development.

Bob Cambensy, Engineer, stated that he doesn't have the exact figure, but did state that there is additional property on the south side of the property, but part of it is very swampy. At this point in time, there are no plans to do anything with the south side except possibly put in a non-motorized trail.

Kim Erickson, 120 Dana Lane, stated his concern about the demand on the water supply in the area for this type of development especially if there is a drought. Mr. Erickson stated his concern about the possibility of his well going dry and he doesn't feel he should be responsible for the expense to replace it if it is a result of the development's demand on the water supply. Mr. Erickson also stated his concern about the septic systems for the town houses and the potential impact of these on the water. He also questioned why the development doesn't just rezone the areas where the townhouses will be built instead of the whole area as his concern is someone coming in later and putting townhouses in the entire development?

Bob Cambensy, Engineer, stated that many tests will be conducted by the Health Department and the DEQ to see what the effect on the water and drainage will be to the neighboring properties. Mr. Cambensy also stated that he will work with the required agencies to look into different types of waste systems for this development that would have the least impact on the water and environment. Mr. Cambensy also wanted to clear up a misconception pertaining to the possibility of new future owners of the property changing the proposed development to add all townhouses or something else. If there is a proposed change to an approved site plan, the revised site plan would need to come back to the Planning Commission for approval.

Sunday Walden, 2052 M-28 East, asked what a Type III well was

Bob Cambensy, Engineer, stated that a Type III well, according to the law at this Time said there can be no more than 14 units to a Type III well.

George Voce, Jr, 192 Dana Lane, stated that he built his home on M-28 in 1974 and knows the history of the area and its water problems. Mr. Voce wanted to go on record stating that he is firmly against this development as there are still far too many unanswered questions in regards to water, fertilizer and drainage issues. Mr. Voce also stated that he thought the property was approved for 1 house per 5 acres?

Pam Erickson, 120 Dana Lane, stated her concern in regards to there only being one entrance/exit to this large development and how will this affect emergency services to these homes.

Tom Murray, Staff, stated that he received 2 letters of opposition from Mr. Gregory Welch, 172 Dana Lane and John and Gretchen Clossner.

Sunday Walden, 722 M-28 East, asked about storm drains.

Bob Cambensy, Engineer, stated that there is virtually no run off involved with this particular property.

Tom Murray, Staff, commented that before a plan is approved he would like clarification of the development phasing and parameters.

Tom Murray, Staff, questioned that if the development is approved and completed, will the entire golf course still be 60 acres?

Bob Cambensy, Engineer, stated “yes”.

Al Denton, Planning Board, questioned the open space on the golf course and also stated that the golf course had to be 60 acres to be in compliance with the ordinance. He did not believe the current zoning district allows for multiple uses.

Bob Cambensy, Engineer, stated that there is no specifics in the ordinance pertaining to what open space can be used for. Mr. Cambensy also stated that one of the reasons for the PUD request is so the property can be developed into a combination of uses.

(C & D Moved from VII. New Business to V. C. & D. per Motion Approved under III.)

C. Conditional Use Permit #77

Dennis Magadanz Moved, Al Denton Seconded, that after review of Conditional Use Request #77, the STAFF/FILE REVIEW – SITE DATA AND ANALYSIS, Sections 211, 107, and 701 of the Zoning Ordinance, the application and staff comments provided, the applicant not being in attendance for questions, and subsequently the applicant not having spoken with the Marquette County Health Department to go over septic tank concerns, the Planning Commission will table Conditional Use Request #77, for the following reasons:

1. The applicant’s have not spoken with the Marquette County Health Department to have an inspection done at their home to ensure that their septic tank can support the addition of 4 bedrooms. This could result in the applicant’s having to upgrade their current septic tank system.
2. The applicant’s are also recommended to speak to the health department to have their onsite water well evaluated by a licensed well driller and modified as necessary to meet the current State of Michigan, Water Well Construction and Well Pump Installation Code for a Type III Public Water Supply.

Ayes 4 Nays 0 Motion approved to table this until the next meeting.

D. Chocloy Downs Golf Course Rezoning #141

Ken Tabor Moved, Dennis Magadanz Seconded, that following the review of Rezoning Request #141, and the STAFF/FILE REVIEW, and holding a public hearing, the Planning Commission recommends to table Rezoning Request #141 for the following reason:

1. The applicant will work with Township staff to obtain more information pertaining to a access road to the west end of the development to connect to M-28 and not go through an existing residential subdivision to establish another entrance/exit for the proposed Chocloy Downs development due to increased traffic concerns and emergency vehicle accessibility.

Ayes 4 Nays 0 Motion approved to Table this until the next meeting.

VI. OLD BUSINESS

A. Request for Proposal for Engineering Services

A revised proposal for engineering services with the corrections and revisions determined from the November 12th Planning Commission meeting were reviewed with no additional changes, revisions, or comments from the members in attendance.

Al Denton made a motion to approve the proposal for engineering services as written Dennis Magadanz seconded.

Ayes 4 Nays 0 Motion approved.

B. Proposed Zoning Ordinance

The proposed ordinance changes from the January 3, 2008, meeting are complete and the draft with the corrections was received at the Township office today.

Section 18.12 Fence of the proposed ordinance was revised (see fence changes in meeting packet) and reviewed by staff and the Planning Commission. Dennis Magadanz made a motion seconded by Ken Tabor to approve the fencing ordinance changes as written and present the Proposed Zoning Ordinance in its entirety to the Township Board for their review and approval.

Ayes 4 Nays 0 Motion approved.

VII. NEW BUSINESS

A. Tom Shaw's Recognition

Due to Tom Shaw's absence, this will be tabled until the next meeting

B. Vice Chair Nomination

Al Denton made a motion to nominate Dennis Magadanz as the new vice chair, seconded by Ken Tabor. Dennis Magadanz accepted the nomination.

Ayes 4 Nays 0 Motion approved.

VIII. PUBLIC COMMENT

No public comment.

IX. COMMISSIONER'S COMMENTS

Al Denton stated that there needs to be 2 entrances/exits for Rezoning Request #141, Chocoy Downs development, to accommodate emergency vehicles. Mr. Denton asked Mr. Cambensy and the Township staff to work together to determine possible easements opportunities to establish another entrance/exit to the west end of the development.

Al Denton questioned the status of the Minnesota Towers Cell Tower placement (Rezoning Request #140 from the 10/8/07 meeting).

Randy Yelle said he will look into this as Jennifer Thum was working on this.

Al Denton questioned staff on the status of the Alder Storage Property stipulations they were required to follow in regards to disposing of the large pile of brush on the property and the replanting of trees that were removed. (10/8/07 meeting)

Randy Yelle stated that he has provided a first notice of violation and will follow-up on this.

Al Denton questioned the status of the stipulations for the Bayou Court Condominiums (11/12/07 meeting).

Randy Yelle stated that he will monitor the landscaping stipulations in regards to the Bayou Court in the spring when planting can be done.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, March 10, 2008 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Dennis Magadanz, Ken Tabor, Steve Kinnunen, Mr. Milton

Absent: Dave Cotton

Staff Present: Tom Murray (Planning and Community Development), Randy Yelle, (Zoning Administrator), Jennifer Thum, (Planning and Community Development), Laurie Vashaw-Eagle (Recording Secretary)

Welcome: The Planning Commission welcomed Mr. Milton as a new Commissioner.

I. APPROVAL OF JANUARY 14, 2008 MEETING MINUTES

Dennis Magadanz motioned to approve the January 14, 2008 meeting minutes as written, seconded by Estelle DeVooght.

Ayes 6. Nays 0. Motion approved.

II. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Ken Tabor motioned to approve the agenda as written seconded by Dennis Magadanz.

Ayes 6. Nays 0. Motion approved.

III. PUBLIC HEARINGS

No public hearings at this time.

IV. PUBLIC COMMENT

No public comment at this time.

V. OLD BUSINESS

A. Proposed Zoning Ordinance - Corrections and Additions

The final proposed zoning ordinance revisions from the 2/18/08 Township Board meeting were reviewed. These changes included revising the building height definition and requiring a proposed maintenance agreement for private road applications. Due to concerns over building height on a filled site, it was suggested that a requirement be made related to this matter. The proposed final changes are provided below:

Add to Definitions, page 4

Building Height: The vertical distance from the average of the highest and lowest point of that portion of the lot covered by the building to the highest point of the roof, to the deck line of mansard roofs, and to the mean height between eaves and ridge for gable, hop, and gambrel roofs.

Add to Section 11 Landscape and Grading Requirements, page 100

Section 11.11 Building Grades, Fill to Increase Height

Filling with earth or other materials to an elevation above the established or natural grade of adjacent land is prohibited without the express written approval of the Zoning Administrator. The intent of this provision is to prohibit the erection of buildings taller than the natural grade plus what the height restriction of this Ordinance would otherwise permit. All water runoff shall be stored on site; no water shall be directed into public storm drains, sanitary sewers or abutting property unless

owned by the applicant. Where a new building is constructed between two existing buildings or on a vacant lot adjacent to an existing building, the natural grade shall be used to determine the finished grade for the new building and the required yard space.

Add to 6.7 Road Frontage Requirements, page 53 paragraph 4

Applications for private road approval must be received at least 45 days prior to the meeting date at which said road shall be considered for approval. The application shall include scaled drawings prepared by a licensed engineer in sufficient detail to enable the Township Planning Commission and its representative or consultant to determine if the proposed road meets the County Road Commission standards. The application shall also include a proposed "Maintenance Agreement" which will be executed and filed with the property deed at the time of sale of a property fronting on the proposed private road. The proposed "Maintenance Agreement" will outline the responsibilities of each property owner and an arrangement for the sharing of costs related to all maintenance of the proposed private road.

Ken Tabor motioned to approve seconded by Dennis Magadanz the final draft revisions/additions as listed to the Zoning Ordinance.

Ayes 6. Nays 0. Motion approved.

VI. NEW BUSINESS

No new business at this time.

VII. PUBLIC COMMENT

Bob Cambensy, 306 North Sixth Street, Marquette, commented that he felt that the building height definition revision really won't accomplish anything different then in the past and will put an unnecessary burden on the Zoning Administrator. Mr. Cambensy also stated that the Planning Commission should consider modifications to the proposed definition of "Height" and add a section and a definition for "Modification of Grade or alteration from original or natural grade."

Height should be defined as "the vertical distance from the average finished ground surface *adjacent to the building, to the highest point of the roof. *or within ____ feet of the wall (3 feet?). The vertical distance described above could be defined from a "maximum altered grade line slope from the grade at the property line."

More important that the actual definition of "Height" would be a definition for "Grade - alteration from natural grade." This could be defined as the allowable alteration of the finished grade of a lot and should be related to a distance from the property line. Mr. Cambensy stated that he suggested at the February Township Board meeting, that it is reasonable to allow an alteration of the grade from the property line at a slope upward of maybe 1 in 6, or 1 in 8 or maybe 1 in 10 (pick a number). This could also be done with two different slopes maybe 1 in 8 for the first 20 feet, and then maybe steeper beyond 20 feet. This would be the allowable alteration of the natural grade from the property line for determination of the building height.

This could serve a useful purpose for lots along a hillside whereby if the natural grade sloped, but you allowed a 1 on 8 slope for height determination the maximum height could be defined as 30 feet from the 1 on 8 line, even though the natural grade is steeper. This would help to soften the visual effect.

Now aside from the allowable height of the building and where it should be measured from, is also the issue of what should be allowed for changing the grade, such as a retaining wall an example of which is the Bayou Condominiums. Something like "The maximum height of a retaining wall at the property line shall be 2 ft. The maximum height of a retaining wall shall not exceed a line drawn at a 1 on 2 slope from the natural grade at the property line

A variance could be granted with a waiver signed by the adjacent property owner. Mr. Cambensy stated that he just threw out some suggested numbers for allowable slopes. You may choose others. He stated that he thinks this should apply to residential areas and where residential zoning is adjacent to other zoning districts. Other zoning districts should allow steeper grades from the property line, both for maximum altered grade line and for maximum grade from property line from which building height is measured.

VIII. COMMISSIONER’S COMMENTS

Steve Kinnunen regretfully submitted his resignation from the Planning Commission effective immediately due to increased job duties.

Al Denton requested an update on the status of the Minnesota Towers Cell Tower placement (Rezoning Request #140 from the 10/8/07 meeting).

Jennifer Thum stated that Cellular One was purchased by AT&T and Minnesota Towers will contact the Planning Commission once the status of the cell tower request is known.

Al Denton requested an update on the status of the Alder Storage Property stipulations they were required to follow in regards to disposing of the large pile of brush on the property and the replanting of trees that were removed. (10/8/07 meeting)

Randy Yelle stated that he has provided a first notice of violation and Jennifer Thum stated she will follow-up on this when she returns to work from her LOA toward the end of the month.

Al Denton questioned the status of the stipulations for the Bayou Court Condominiums (11/12/07 meeting).

Randy Yelle and Jennifer Thum stated that they will monitor the landscaping stipulations this Spring and the runoff when the Spring thaw happens in regards to the Bayou Court Condominiums.

- B. Planning and Zoning Magazine – January. 2008/February, 2008

X ADJOURNMENT

Dennis Madaganz motioned, Al Denton seconded to adjourn the meeting. The meeting adjourned at 8:10 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, April 14, 2008 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Dennis Magadan, Ken Tabor, Kendell Milton

Absent:

Staff Present: Jennifer Thum, (Planning and Community Development), Laurie Vashaw-Eagle (Recording Secretary) and Greg Zyburt (Police Chief)

II. APPROVAL OF MARCH 10, 2008 MEETING MINUTES

Dennis Magadan motioned to approve the March 10, 2008 meeting minutes as written, seconded by Ken Tabor.

Ayes 5. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Al Denton requested to add to the agenda a "wording change to the proposed Final Draft of the Zoning Ordinance" under New Business, item "D". Ken Tabor motioned to approve the agenda with the requested addition to the agenda, seconded by Dennis Magadan.

Ayes 5. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

Albert Denton reported that the Public Hearing pertaining to Blondeau Trucking was withdrawn and tentatively placed on the May 12, 2008 meeting agenda.

V. PUBLIC COMMENT

Jim Beckman, 6208 US 41 South, reported that he and his wife were attending the meeting for the Public Hearing in support of Blondeau Trucking.

VI. OLD BUSINESS

A. ENGINEERING RFP

Jennifer Thum explained that staff put together a list of potential Engineering/ Consulting firms that will be sent a letter to submit a proposal to the Township. Ms. Thum said she hopes to end up with 3 companies that the Township could chose from for engineering/consulting situations. Ms. Thum asked the commissioners to review the list and suggest changes, make additions or approve the list as written.

Dennis Magadan motioned to approve the list as written seconded by Ken Tabor.
Ayes 5. Nays 0. Motion approved.

VII. NEW BUSINESS

A. SNOWMOBILE TRAIL #417

Jennifer Thum reported that at the Township Board meeting on March 17, 2008, Marc Schwengel from the Alger County Snowmobile and Off-road Vehicle Association approached the Board about the use of snowmobile trail #417 east of the Ojibway Casino. The Association would like to use this specific portion of the trail for ORV's and 4 x 4's.

Estelle DeVooght asked about clarification of "4 x 4".

Ms. Thum responded that she believed it meant 4 wheelers, but will clarify.

Greg Zybur, Township Police Chief, stated that if Snowmobile Trail #417 use is approved for ORV's and 4 x 4's it could open up grant opportunities for the Township.

Due to Mr. Schwengel not being in attendance Ken Tabor motioned to table this until May, 2008, so staff could obtain more information and research other options seconded by Dennis Magadanz.

Ayes 5. Nays 0. Motion approved.

B. PLANNING COMMISSION BYLAWS

Jennifer Thum reported that due to a number of commissioners being absent from meetings and recent resignations that she felt it necessary to review the Bylaws and determine if changes are needed. Ms. Thum proposed one change to Article IV, Section 5, A member who misses three (3) consecutive regular meetings or a total of four (4) regular meetings in any 6-month period *without excuse by the Chair* is subject to replacement. Each member who knows that their attendance at a meeting will not be possible shall notify the Planning Director of the anticipated absence and the reason therefore. The Planning Director will communicate with the Planning Commission Chair to discuss excusing the member for good cause. If a member fails to meet attendance standards, the Planning Commission shall declare the position vacant, notify the Township Supervisor and request that the governing body appoint a new member.

Dennis Magadanz motioned to approve the addition of "without excuse by the Chair" into the Bylaws, under Article IV, Section 5, seconded by Ken Tabor.

Ayes 5. Nays 0. Motion approved.

C. BAYOU CONDOMINIUM

Jennifer Thum reported on a letter from Dan Keller dated November 12, 2007, stating that the "Bayou Court Condominiums and owners of said building and association recognize that the maintenance and liability in reference to the elevation of the buildings located at 351 W. Main Street, Marquette, MI 49855, lies solely with the Bayou Court owners and association and not with Chocolay Township or any associated township governing parties. Ms. Thum reported that the run off water will be monitored by the Township and Van Ness Engineering.

D. Word Change to Final Draft of Zoning Ordinance Section 11.11

Al Denton requested that in Section 11.11 on page 100 of the Final Draft of the Zoning Ordinance the word "stored" be changed to "detained".

Ken Tabor motioned to approve the word change in Section 11.11, page 100 of the Final Draft of the Zoning Ordinance, seconded by Dennis Magadanz.

Ayes 5. Nays 0.

VIII. PUBLIC COMMENT

Jim Beckman, 6308 US 41 South, suggested that the Township look into off road vehicles being allowed to operate in the Township limits on designated trails such as what Ishpeming has done as well as other Townships.

IX. COMMISSIONER'S COMMENTS

Albert Denton reported that the Final Draft of the Zoning Ordinance will be presented at the next Township Board meeting for approval next week.

Jennifer Thum reported that a group of commissioners, staff, etc. will be touring the Blondeau Trucking facility in Gladstone tomorrow.

Monday, May 12, 2008 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Dennis Magadanz, Ken Tabor, Kendell Milton, Steve Kinnunen, Andy Smith

Absent:

Staff Present: Jennifer Thum, (Planning and Community Development), Randy Yelle, (Zoning Administrator), Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF APRIL 14, 2008 MEETING MINUTES

Dennis Magadanz motioned to approve the April 14, 2008 meeting minutes as written, seconded by Estelle DeVooght.

Ayes 7. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Steve Kinnunen motioned to approve the agenda, seconded by Dennis Magadanz.

Ayes 7. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

A. C.U.P. #80 Blondeau Trucking

George Meister, Engineer for TriMedia Consultants, stated that Blondeau Trucking is requesting a Conditional Use to demolish the old truck garage and construct a new similar building to consist of 3 drive through truck bays, install a wash bay, widen the driveway to establish a safer area for pulling onto U.S. 41, landscape the area, patch the asphalt, and address the contamination issues,

David Blondeau, owner of Blondeau Trucking, showed some of the photographs from their Gladstone operation and stated that the construction of a new building would be similar except the roof would be within the Chocolate Township Zoning Ordinance height restriction of 30 ft. Mr. Blondeau stated that the 3 drive through bays would virtually eliminate the noise the residents are hearing now.

Mr. Blondeau also reported that he would use the same contractors as he used to build the Gladstone garage and they will construct the garage according to what the state, DEQ, and Township requires. Mr. Blondeau stated that he would like to increase the number of trucks they operate from 20 to 25 or 30 to offset the large investment he will be making to construct the new building and make the area more appealing. Mr. Blondeau is looking for support from the Planning Commission before he proceeds further and incurs unnecessary expenses. He stated that Blondeau Trucking has been in the Township for 62 years and hopes to be here for many years to come. If the Township supports his request, he will then begin work with the DEQ and follow their recommendations. He will also begin work on having a detailed site plan drawn up to present to the Planning Commission for approval in the future. Mr. Blondeau also stated that he would like to demolish the old building this Summer and not begin construction on the new building until Fall. He hopes to have the entire project complete within 2 years.

Dennis Magadanz asked about the sand trap maintenance schedule.

David Blondeau stated that he will follow the same type of schedule he uses in

Gladstone, which will be to have the sand trap cleaned whether it needs it or not, every 2 years or whatever is required.

Andy Smith, asked about the hours of operation that Blondeau Trucking uses.

Dave Blondeau said they usually begin at 5:00-5:30 AM and all outside work is moved indoors by 9:00 PM.

V. PUBLIC COMMENT

Dave St. Onge, TriMedia Consultants, reported that Blondeau Trucking is trying to clean-up the former diesel fuel spill. Mr. St. Onge has worked with Blondeau Trucking since 1996 to address the ground water contamination issue. Demolishing the existing building would allow the remaining contamination to be addressed and eliminated.

Mark Maki, 370 Karen Road, stated that he is very familiar with the history of Blondeau Trucking and the contamination issue. Mr. Maki stated that Blondeau Trucking is a trucking and transportation company and not a contractor's yard. Mr. Maki inquired how to how this got into the zoning ordinance. He stated that Blondeau Trucking has been trying to get their property rezoned for many years, but were always turned down by Mr. Summer's the Township Attorney. He also stated that there is a stipulated injunctive order against Blondeau Trucking.

Stan Huebert, Owner of the Dry Dock Tavern, stated that if anyone would be affected by the Conditional Use request by Blondeau Trucking it would be him and his business. Mr. Huebert stated that he feels Dave Blondeau and the Blondeau family are honest hard working people and he fully supports their request.

Calvin Atwell, asked what type of contaminants are on the property?

Dave St. Onge, stated that it is diesel fuel contamination of the ground water.

Bob Young, former Main Street resident, asked why 12 years have gone by trying to alleviate the contamination issue? Mr. Young also asked if the wells are being monitored in the area?

Dave St. Onge, TriMedia Consultants, stated that there is a cluster well on Kellogg Street that is monitored as well as the well located on Blondeau's property. He also stated that Blondeau Trucking is not the only entity involved in the contamination from 12 years ago as there was multiple businesses involved, i.e., Harvey Oil, Shaw's Service Station, etc. Blondeau Trucking is and has been working to treat the contamination and also monitors the wells of the residents around their business. The removal of the old building will allow for more aggressive treatment and elimination of the problem.

VI. OLD BUSINESS

A. SNOWMOBILE TRAIL #417

Jennifer Thum reported that at the Township Board meeting on March 17, 2008, Marc Schwengel from the Alger County Snowmobile and Off-road Vehicle Association approached the Board about the use of snowmobile trail #417 east of the Ojibway Casino. The Association would like to use this specific portion of the trail for ORV's.

Jennifer Thum reported that she did some research into Snowmobile Trail 417 and is not sure why they are requesting support by the Township as she believes they are within the law to utilize the trail for ORV's

Due to no one from the DNR being in attendance Estelle DeVooght, Moved, Dennis Magadanz, Second, to table this item until someone from the DNR can attend and inform the Township why they need their support and answer any pertinent questions.

Ayes 7. Nays 0. Motion approved.

VII. NEW BUSINESS

A. BLONDEAU TRUCKING, C.U.P. #80

Blondeau Trucking has requested Planning Commission review of a Conditional Use Request to demolish two homes, the existing moving and storage facility and build a new building for their trucks and a new moving and storage building located at 5025 US 41 South, Chocolay Township.

Dennis Magadanz Moved, Ken Tabor Second, that after review of Conditional Use Request #80, the STAFF/FILE REVIEW – SITE DATA AND ANALYSIS, Sections 211, 403, and 701 of the Zoning Ordinance, the site plan and application provided, and subsequently finding compliance with the standards for approval of the request found in Section 701 of the Zoning Ordinance, the Planning Commission approves Conditional Use Request #80 with the following conditions:

1. Blondeau Trucking maintains a 30 ft. buffer where it abuts residential property. TriMedia will provide Chocolay Township with an “as planted” plan showing what was planted and where. Approved plantings will be maintained throughout the duration of the permit.
2. That Blondeau Trucking is permitted to keep 25 trucks on site.
3. Approved hours of operation will be from 5:00 AM to 9:00 PM.
4. That Blondeau Trucking keep Chocolay Township apprised of their correspondence with the DEQ.
5. During construction, the applicant should make sure that best management practices are placed onsite. Blondeau Trucking will need to fill out an application with the Marquette Conservation District for their Soil Erosion Control Permit.
6. Blondeau Trucking will provide the Fire Department with a set of plans indicating where utility shut offs are located and where flammable/hazardous materials will be stored. All flammable liquids shall be kept in metal cabinets. Finally, the Fire Chief will tour the facility upon completion.
7. If the Police Department determines that Blondeau Trucking is making too many left-hand turns after 7AM, Chocolay Township will be allowed to revisit the issue.
8. Once comments are received from the MDOT Corridor Committee, these comments will be reviewed by staff and TriMedia and incorporated into the plans.
9. Trimedia will work with Chocolay Township staff and our Engineering Consultants, Mike Pond from STS to ensure that all Township concerns are met and to work with Mike Pond and our DPW supervisors throughout this process.
10. That any lighting shall be designed to reflect light downward and away from adjoining residential properties in accordance with the requirements of Section 500 of the Zoning Ordinance.
11. A zoning compliance permit shall be obtained from the Chocolay Township Zoning Administrator.
12. A zoning compliance permit shall not be issued until all other necessary permits as required by Federal, State, and Local Agencies, are acquired.

B. INVESTMENT FOR PUBLIC WORKS AND ECONOMIC DEVELOPMENT FACILITIES

Jennifer Thum, Director of Planning and Community Development, reported that she was made aware of a possible grant/loan from the federal government for communities that want to work on projects that expand and upgrade infrastructure to attract new industry, technology developments, redeveloping Brownfield's, promoting eco-industrial development and supporting heritage preservation development. Ms. Thum would like approval from the Planning Commission to move forward with this project, and allow the Planning Department to research this grant/loan opportunity to see if it's something that could benefit Chocolay Township.

Steve Kinnunen Moved, Dennis Magdanz, Seconded that the Planning Commission supports the Planning Departments desire to research this grant/loan opportunity through the federal government in order to attract new industry to Chocolay Township.

Ayes 7. Nays 0. Motion approved.

VIII. PUBLIC COMMENT

Mark Maki, 370 Karen Road, stated that there are 3 signs erected at Lakanen Land and it is his understanding that there was a sign ordinance in the Township and would like to know why this isn't being addressed. He also stated his concern about a contractor's yard located on the top of Green Garden Hill that is not in compliance with the zoning ordinance.

IX. COMMISSIONER'S COMMENTS

Andy Smith, new Planning Commissioner, gave a brief description of his background. Mr. Smith grew up in Chocolay Township, went to college out of state, then returned to raise a family. He is the owner of Smith Paving in Marquette and employees 45 people.

X. DIRECTOR'S REPORT

Jennifer Thum reported that she is going to Houghton tomorrow for software training to assist in generating road condition reports by entering various data elements as she travels throughout the Township.

Ms. Thum reported that U.P. Engineering submitted an invoice that was \$7,000 more than their original quote for drawings of maps, etc. for the Township. The Township was able to negotiate the cost down to \$2,000.

Ms. Thum reported that the Engineering proposals to provide services to the Township are due Monday, May 19th. The list of proposals will be provided to the Commission at a future meeting.

Ms. Thum reported that a request for a Home Occupation to be operated on Lakewood Lane (Martin's) granted in Court. The Township of Chocolay is going to appeal this decision.

Jennifer Thum reported that the Chocolay Downs Project has obtained an easement for a second access road by the Varvil Center. This will be revisited at the June meeting.

- B. Water Testing Results

XII. ADJOURNMENT

Dennis Magdanz motioned, Al Denton seconded to adjourn the meeting. The meeting adjourned at 8:40 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, June 9, 2008 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Dennis Magadanz,
Ken Tabor, Kendell Milton, Andy Smith,

Absent: Steve Kinnunen, (excused)

Staff Present: Jennifer Thum, (Planning and Community Development),
Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF MAY 12, 2008 MEETING MINUTES

Dennis Magadanz motioned to approve the May 12, 2008 meeting minutes as written, seconded by Kendell Milton.

Ayes 6. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Ken Tabor motioned to approve the agenda as written, seconded by Dennis Magadanz.

Ayes 6. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

No public hearings at this time.

V. PUBLIC COMMENT

Stephanie Gencheff, 597 Lakewood Lane, made reference to a letter from the past that she read and discussed with Mr. Seppanen that pertained to the court injunction restricting Blondeau Trucking from any future expansion in the Township.

Al Denton reported that his understanding was that when the letter was written, the Township indicated it would cease the lawsuit that was filed, if Blondeau Trucking agreed to no further expansion. Brendan

Stephanie Gencheff also stated that she believed Blondeau Trucking did not follow procedure at the May '08 meeting by adding a request for additional trucks during their public hearing when it was not on the agenda to be addressed.

Stephanie Gencheff also inquired as to how far down Blondeau Trucking will excavate to address the contamination?

Mr. Denton replied that Blondeau Trucking and their engineering firm will address that issue once the buildings are torn down and they can see what contamination actually exists.

Stephanie Gencheff also asked if the reason Blondeau Trucking was approved to house up to 25 trucks at the May, 2008 meeting was due to the cost of the project?

Mr. Denton stated that Blondeau Trucking is paying for the entire project themselves as they cannot obtain grants, etc. for this type of project and they will need the extra trucks running to help pay for it. Mr. Denton also reported that the ultimate goal is that Blondeau Trucking will clean up the contamination, have less noise, be able to run a better operation and benefit the Township.

VI. OLD BUSINESS

A. SNOWMOBILE TRAIL #417

A letter dated June 3, 2008, from Mr. Schwengel and Mr. Katona from the Alger County Snowmobile and Off-Road Vehicle Association was reviewed by the Commissioners requesting support for Trail #417 for ORV usage. The Alger County Snowmobile and Off-Road Vehicle Association is permitted to put the trail in, but are requesting support from the Township Planning Commission, which would allow Chocolay Township the opportunity to apply for grants for damage restoration, maintenance, law enforcement and safety/education programs. Mr. Schwengel and Mr. Katona did not attend the meeting.

Al Denton motioned and Dennis Magadanz, seconded, to support the request for Snowmobile Trail #417 for ORV usage.

Ayes 6. Nays 0. Motion approved.

B. BLONDEAU TRUCKING , UPDATE FOR PLANNING COMMISSION

Jennifer Thum presented to the Commissioners for review and questions, a proposed site plan from Trimedia Consultants. Ms. Thum reported that the Michigan Department of Transportation did have Trimedia Consultants change the driveway on the north and add storm gutters and drainage to make sure that the driveway is in compliance with the ADA standards as well as maintain the bike path. The sewers are still being worked out. Ms. Thum asked the Commissioners if they had any questions involving the site plans thus far. Ms. Thum also asked if the Commissioners had any questions pertaining to the interior or the exterior of the building? There were no questions at this time. Blondeau Trucking also stated that they will not exceed the height requirements stated in the new zoning ordinance.. Ms. Thum reported that she requested this to be submitted in writing. Blondeau Trucking will also close the driveway on the north side of the property.

Ms. Thum reported that the landscape plans are being worked on and she will submit those once they are received. The Commission discussed the drains and the drain schedule and the fencing around the property. Ms. Thum also pointed out that she will speak to them pertaining to no handicapped parking being shown on the site plan, which is a requirement.

Al Denton reported that David Blondeau is working closely with the Township to make sure everything will be in compliance with the Township Ordinance.

C. ENGINEERING RFP

Jennifer Thum reported on the RFP proposals that were submitted. Ten requests were sent out and 4 were received. The proposals received were reviewed and discussed by the Commissioners and Township staff. Township staff is looking for two or three firms to represent the Township for site plan reviews, to review our private roads and on an as needed basis from that point. The firms that the Township staff would recommend are U.P. Engineering and Architects and STS Consultants. If a third firm is needed, ECI of Ishpeming would be considered.

Ken Tabor, motioned, Dennis Magadanz, seconded, that the Planning Commission support the decision to hire the following consultants, STS Consultants and U.P. Engineering and Architects “on an as needed basis,” to serve as our Engineering firms for site plan review and private road inspections.

Ayes 6. Nays 0. Motion Approved

VII. NEW BUSINESS

No new business to address at this time.

VIII. PUBLIC COMMENT

(See Section V) Public Comment listed above)

IX. COMMISSIONER'S COMMENTS

Al Denton stated that he would like to make a recommendation seconded by Dennis Magadan to the Township Supervisor that Estelle DeVooght be reappointed as a Commissioner and Ken Tabor as a Trustee to the Chocolay Township Planning Commission for another term.

Al Denton also reported that the Chocolay Township Bike Registration is scheduled for Friday, June 13, 2008 from 3:00 PM to 6:00 PM under the Township Pavilion. There will also be tours of the newly remodeled Township hall with refreshments.

X. DIRECTOR'S REPORT

Jennifer Thum reported that she informed Neil Jandron from Chocolay Downs that he will need to submit a survey showing where the easement for their project will be. Mr. Jandron must also seek approval from the DNR to cross the snowmobile trail. If the DNR doesn't approve his request to cross snowmobile trail, then he will have to start over looking for another entrance/exit for the proposed Chocolay Downs project.

Ms. Thum reported that she met with Moyle Development the company whose site plan was previously approved to construct the McDonald's Restaurant and an additional building that could house approximately 5 businesses. Moyle development will be attending the July Planning Commission meeting to resubmit their plans for re-approval as the first approval has expired. Ms. Thum reported that they also may be looking for approval of additional buildings.

Jennifer Thum and Al Denton will be attending a workshop at Northern Michigan University on 6/10/08 titled "The Michigan Planning Enabling Act" and will report back to the Commission what they learned.

The Martin's Home Occupation appeal has been submitted and the Township is waiting on Judge Weber's decision.

Ms. Thum also reported that the proposed Pedestrian Tunnel is tentatively scheduled to be on the August meeting agenda.

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Suggested Wording for Home Occupation Ordinance, please read.
- B. Minutes from Pedestrian Tunnel Design Meeting

XII. ADJOURNMENT

As there was no further business to discuss, Estelle DeVooght motioned, Al Denton seconded to adjourn the meeting. The meeting adjourned at 8:05 p.m.

Albert Denton, Chairperson

Monday, July 14, 2008 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Dennis Magadanz, Ken Tabor, Kendell Milton, Andy Smith, Steve Kinnunen

Absent:

Staff Present: Jennifer Thum, (Planning and Community Development), Randy Yelle, (Zoning Administrator), Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF JUNE 9, 2008 MEETING MINUTES

Dennis Magadanz motioned to approve the June 9, 2008 meeting minutes as written, seconded by Estelle DeVooght.

Ayes 7. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Steve Kinnunen motioned, seconded by Dennis Magadanz to approve the agenda as written

Ayes 7. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

A. CHOCOLAY DOWNS LLC

Neil Jandron stated that Chocolay Downs LLC is still negotiating to obtain an easement from Marquette County and the DNR. Representatives for Chocolay Downs LLC, Marquette County Road Commission, Jennifer Thum and Randy Yelle will meet tomorrow to discuss various options for the ingress/egress for this proposed development.

B. ZONING AMENDMENT #34-08-01, HOME OCCUPATION

Proposed Amendment:

1. II. Definitions: (Page 9)

- a. **Home Occupation:** A commercial activity, in a residential zoning district, carried on by an occupant of a dwelling unit as a secondary use subordinate and incidental to the use of the dwelling unit as a residence (Section 6.9)

2. Section 6.9; page 53. Home Occupations

- a. Home Occupations are permitted as a Conditional Use in R1, R2, MFR, LSR, and AF districts when in conformance with the following requirements:
 - 1. **Uses Allowed:** Uses that comply with all of the standards of this subsection and those provided for under conditional uses, unless specifically prohibited elsewhere in the zoning ordinance. No more than one home occupation is permitted per parcel.
 - 2. **Size:** A home occupation may not occupy more than twenty-five percent of the gross area of any one story, structure, or dwelling used for the home occupation.

3. **Prohibited Uses:** The following uses are prohibited as home occupations in the R1, R2, MFR and LSR districts:
 - a. Any type of repair, assembly or storage, sale or manufacture of vehicles, machinery, equipment, engines, or household appliances, or any other work related to motor vehicles and their parts.
 - b. Animal Boarding Facilities includes kennels, commercial stables and all other similar uses.
 - c. Restaurants are prohibited as home occupations in all districts.
4. **Location:** All work and activities associated with home occupations must be conducted either inside the principle dwelling unit, or in accessory building or garage.
5. **Exterior Appearance:** There shall be no evidence of the conduct of a home occupation when viewed from the street right-of-way or from an adjacent lot. There may be no change in the exterior appearance of the dwelling unit that houses a home occupation or the site upon which it is conducted.
6. **Operational Impacts:** No home occupation or equipment used in-conjunction with a home occupation may cause odor, vibration, noise, electrical interference or fluctuation in voltage or the use of hazardous substances or materials.
7. **Traffic:** No traffic shall be generated by any home occupation in greater volume than would normally be expected in a residential neighborhood.
8. **Registration:** Any person conducting a home occupation shall notify and register with the Zoning Administrator, within thirty days of the beginning use, or within sixty days of the effective date of this Ordinance, whichever is later.

C. ZONING AMENDMENT #34-08-02, SIGN REGULATION

Proposed Amendment:

Section 18.4 Sign Exemptions from Sign Regulations

(L) Political signs which are intended to advertise a public election, issues to be balloted upon in that election, promoted individuals and/or parties participating in the election are exempt providing that no sign shall have an area exceeding four square feet in area. Sign area may be increased to thirty-two, provided that the sign is so located that no portion of the sign is located on the public right-of-way or lands of which are being used for public right-of-way and further provided that all political signs be removed within ten days after the election, and provide that all signs authorized are authorized for 90 days prior to any election.

D. ZONING AMENDMENT #34-08-03, FLOOR AREA RATIO

Jennifer Thum (Planning/Community Development) requested that this be tabled until the August meeting due to an error in the ground ratio definition.

V. PUBLIC COMMENT

A. CHOCOLAY DOWNS LLC

Miller Shuck, 4 Redfox, Chocolay Downs, expressed his concerns about there needing to be a 2nd entrance/exit as there is only one way out of the development at this time.

Neil Jandron, Chocolay Downs LLC, explained that there is an easement meeting

scheduled for tomorrow.

Miller Shuck, 4 Redfox, Chocolay Downs, inquired about there being a separate road to be used for the construction equipment going in and out of the development when the townhouses are being built. He also inquired if the construction crew or Chocolay Downs LLC will take care of the dust, any adverse road conditions, etc. during the construction phase.

Al Denton reported that Chocolay Downs LLC would be required to have a road that is built to county specifications and standards, but it would be the responsibility of the Chocolay Downs LLC to address construction issues.

Lori Cass, Alholm Erecting, 1145 E. M-28, expressed her concerns about the possible easement and the road being classified as a Class "A" road, which could affect large steel trucks coming into the Industrial Park and their shop when road restrictions are in place.

Nancy Holdwick, 1419 E. M-28/Hiawatha Street, expressed her concerns about another entrance/exit being put on M-28 and the traffic. She explained that drivers on M-28 are using the turning lane(s) as passing lanes and fears that another turning lane will only encourage more unsafe passing on the highway. She feels this entrance/exit could impact her safety trying to turn left into her driveway from the highway.

B. ZONING AMENDMENT #34-08-01, HOME OCCUPATION

Mark Maki, 370 Karen Road, inquired as to what specific language is proposed to be changed?

Randy Yelle reported that the Township needs to be more specific as to what types of businesses can be allowed to operate within the residential area of the Township.

C. ZONING AMENDMENT #34-08-02, SIGN REGULATION

Mark Maki, 370 Karen Road, inquired why Zoning Amendment #34-08-01 needs to be changed for political signs? He also stated that he has brought numerous sign violations to the Township's attention?

Al Denton asked Mr. Maki to compose a list of the sign violations and where they're located and drop it off at the Township office so they can be addressed.

D. ZONING AMENDMENT #34-08-03, FLOOR AREA RATIO

No public comment.

VI. OLD BUSINESS

A. CHOCOLAY DOWNS LLC

Jennifer Thum reported that Rezoning #141 is a request from Chocolay Downs LLC Sanjay Sethi, President of CGC Development LLC, for the proposed rezoning of Chocolay Downs from R-1 to a PUD. The entire parcel is 122.5 acres and the applicant is proposing 33 individual single family homes, four areas of 10 townhouses and one area of 8 townhouses. The Planning Commission previously reviewed this site plan on January 14, 2008 and it is on this month's agenda with a proposed second ingress/egress. The applicant is proposing to connect Brewer Drive with Hiawatha Road, rather than connect to Timber Lane and go through an existing subdivision. Ms. Thum doesn't feel that the existing subdivision should be impacted with the additional traffic of another subdivision. However, the Comprehensive Plan states that, streets should be interconnected for the following reasons:

- Residents have choices to access arterials
- Kids can walk from Home A to B
- Kids can walk or bike to school more safely
- Easy access to neighborhood stores
- More efficient for snow plowing
- Easier access for emergency vehicles
- Larger sense of neighborhood

Ms. Thum stated she has reservations about connecting an existing subdivision to a new one. The subdivision that is referred to is the Fernwood subdivision that contains the following roads: Timber Lane, Ridgewood, Pinewood Trail, Jennifer Lane, Fernwood, Candee, Vedy and Candice. Ms Thums' concerns are:

- This subdivision has a lot of families who utilize the roads for recreational activities as walkways, playing with children and their pets.
- The proposed development will add additional traffic, which will cause problems, as the road will be considered as a cut through street.
- Additional people traveling at excessive speeds, will pose the threat of additional accidents between vehicles and pedestrians/animals.
- The applicant will have to pave part of Timber Lane and bring it up to County Road Standards as the last part is unpaved.

Steve Kinnunen motioned Dennis Magadanz seconded to table this until the August meeting due to there being nothing new to review and to wait on the results of a meeting scheduled for tomorrow to discuss options for the ingress/egress.

Ayes 7. Nays 0. Motion approved to table until the August meeting.

B. ZONING AMENDMENT #34-08-01, HOME OCCUPATION

Kendall Milton motioned Dennis Madaganz seconded to adopt Zoning Amendment #34-08-01.

Ayes 7. Nays 0. Motion approved.

C. ZONING AMENDMENT #34-08-02, SIGN REGULATION

Due to no motion being made the proposed change to Zoning Amendment #34-08-02 has failed.

D. ZONING AMENDMENT #34-08-03, FLOOR AREA RATIO

Jennifer Thum requested that this be tabled until the August meeting due to an error in the ground ratio portion of the definition.

VII. NEW BUSINESS

A. MOYLE DEVELOPMENT GATEWAY PLAZA

Jennifer Thum reported that part of this site plan was previously approved on November 6, 2006, but since then the site plan has expired. However, the applicant met with Al Denton, Denny Magadanz, Randy Yelle and herself to ask about an extension this year, and we granted them one. The site plan is on this month's agenda for re-approval. The site plan was approved with the following conditions:

- 4 additional spruce trees shall be planted within the two parking lot islands located west of the building
- Underground electrical service is required
- Tree removal resulting from the relocation of the southwest frontage road shall be replaced on a 1:1 ratio

- Parking for the retail structure located west of the property shall not be diminished so as to place that facility out of compliance with requirements of the Zoning Ordinance.

Due to no one in attendance from Moyle Development Gateway Plaza this item will be tabled.

Al Denton motioned Steve Kinnunen seconded, to table this until all the details are in place and ready to present to the Planning Commission.

Ayes 7. Nays 0. Motion approved to table.

B. PROPOSED LANGUAGE FOR LIQUOR LICENSE STANDARDS

Jennifer Thum presented the proposed Liquor License Standards to the Planning Commission members. Ms. Thum stated that there is an additional liquor license available to the Township due to the increase in population and two businesses in the Township have contacted the Township in regards to obtaining the liquor license. Ms. Thum reported that this type of license is less expensive than buying one from another Party, when they become available. Ms. Thum reported that there should be Township rules and guidelines in place for individuals to obtain a liquor license, when one is available, so the Township is not accused of favoritism. Ms. Thum will include the proposed application that would accompany the rules and regulations in the August meeting packet.

Al Denton commented that the proposed standards are very long.

Dennis Magadanz questioned a statement on page 18 (g) second to the last sentence that states "it determines that the issuance of an additional liquor license" Can a person obtain more than one liquor license?

Jennifer Thum will look into this and provide clarification.

A requested change from 1 to 3 years is proposed to page 16 under Term of License (f).

Dennis Magadanz motioned Ken Tabor seconded that after review of the proposed language for the Township Liquor License Standards and a few suggested changes stated above, the Planning Commission supports the proposed Township Liquor License Standards and will hold a public hearing on August 11, 2008.

Ayes 7. Nays 0. Motion approved.

VIII. PUBLIC COMMENT

No public comment made at this time.

IX. COMMISSIONER'S COMMENTS

Ken Tabor commented that he feels the home occupation Zoning Amendment #34-08-01 is too restrictive the way it's written.

Al Denton commented that Mr. Tabor could submit a proposal outlining changes to Zoning Amendment #34-08-01 for consideration by the Commission. He also stated that technically anyone who is considering a home occupation needs to come to the Planning Commission for approval.

X. DIRECTOR'S COMMENTS

Jennifer Thum reported that she will be presenting the Parks and Recreational Plan for

review by the Planning Commission in the Fall of 2008. Storm sewer issues will also be discussed in the near future.

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

A. ZBA Minutes from March 22, 2007, dealing with Moyle Development Signs.

XII. ADJOURNMENT

Dennis Magadanz motioned, Ken Tabor seconded to adjourn the meeting. The meeting adjourned at 8:35 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, August 11, 2008 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Steve Kinnunen, Estelle DeVooght, Dennis Magadanz, Dr. Ken Tabor, Kendell Milton, Andy Smith

Absent:

Staff Present: Jennifer Thum, (Planning and Community Development), Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF JULY 14, 2008 MEETING MINUTES

Dennis Magadanz motioned to approve the July 14, 2008 meeting minutes as written, seconded by Estelle DeVooght.

Ayes 7. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Steve Kinnunen motioned to approve the agenda as written seconded by Dennis Magadanz.

Ayes 7. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

A. NIEMELA, CUP #81, WOOD BOILER

Mr. Gary Niemela, 111 Lara Lei Trail, is requesting approval from the Planning Commission to install a wood boiler on his property. Mr. Niemela stated that he owns 80 acres and would only burn natural material in his wood boiler. Mr. Niemela also stated that he's looking to install the wood boiler to help decrease his heating costs.

B. CHOCOLAY DOWNS GOLF COURSE, CUP #82, CLUBHOUSE

Bob Cambensy provided a presentation for Conditional Use #82 for construction of a clubhouse with a restaurant for use by the public and golf course members next to the pro shop at Chocolay Downs Golf Course. There will be no changes to the existing parking lot except the applicant will need to paint lines or install parking signs. They will also add additional parking spaces that are needed for the clubhouse. There will be a service drive put in next to the clubhouse for delivery truck traffic next to Lot 14 located on the northeast corner of the property. The exterior of the clubhouse will match the exterior of the pro shop. The lighting for the area will be minimal and the lighting will be pointing downwards and should not affect any properties adjacent to the proposed clubhouse.

C. LIQUOR POLICY AND PROCEDURES

Jennifer Thum stated that at the July meeting a motion was approved to hold a public hearing on liquor license policy and procedures. This public hearing is being held due to a new class C liquor license that just became available to the Township due to an increase in population. Two local businesses are interested in applying for the available liquor license. This policy was also presented to the Township Board who approved the item for public hearing after removal of all language dealing with the Township reviewing the licenses every three years.

V. PUBLIC COMMENT

A. NIEMELA, CUP #81, WOOD BOILER

Jennifer Thum presented a letter from Mr. Eric Rose a neighbor of Mr. Niemela's opposing Conditional Use Request #81. Jennifer read the letter into the minutes. Mr. Rose is concerned about the types of materials that will be burned in the wood boiler and the potential health hazard they may present to his family. Mr. Rose is also not in favor of a 15 foot smoke stack, as in his opinion, would be an eyesore to him. The letter will be in the Planning Commission minutes book for 2008.

B. CHOCOLAY DOWNS GOLF COURSE, CUP #82, CLUBHOUSE

George Voce, 192 Dana Lane, asked what type of water or well will be installed?

Bob Cambensy stated that they will work with the County Health Department and follow their recommendations.

Kim Erickson, 120 Dana Lane, asked why they are rezoning for a clubhouse?

Al Denton stated that the rezoning request is a separate issue and will be addressed under old business.

Dave Gregory, asked about the original clubhouse plan that was posted on the bulletin board of the pro shop as this is different?

Neil Jandron, Chocolay Downs LLC, stated that it is slightly different, but is a better design than the one that was posted in the pro shop.

George Voce, 192 Dana Lane, stated that he is pro development, but is concerned with water and sewer issues in that area and wants to state his concerns for the record.

Neil Jandron, Chocolay Downs LLC, stated that he wants to be a good neighbor and wants to do things the right way to not harm the nearby residents in any way.

Estelle DeVooght, Planning Commissioner, asked if the Clubhouse will serve food and liquor?

Neil Jandron, Chocolay Downs LLC, stated that they will be serving food and if they can obtain a liquor license, they will also serve alcohol.

D. LIQUOR POLICY AND PROCEDURES

Mark Maki, 370 Karen Road, asked why the Planning Commission is dealing with liquor license ordinance and not the Township Board?

Ms. Thum stated that this is not an ordinance, but a policy and procedures. Ms. Thum stated that if another liquor license becomes available the Township will have something in place to address how people can apply for the license.

Randy Gentz, Homestead Golf Course, stated that he's reviewed the application and doesn't have a problem with it.

I. OLD BUSINESS

A. NIEMELA, CUP #81, WOOD BOILER

Jennifer Thum reported that Mr. and Mrs. Gary Niemela have petitioned the Chocolay Township Planning Commission to consider issuance of a Conditional Use Permit under the terms of the Charter Township of Chocolay Zoning Ordinance to install and operate an outdoor wood boiler. The proposed location is on an 80 acre parcel located in a

Residential (R-1) district at 111 Lara Lei Trail in Chocolay Township. Boilers/units and outside wood burning are a Permitted Principal Use in the MFR I, AF and MP Zoned Districts, a Conditional Use in the R-1, MFR, C1 and MP Zoned Districts.

Steve Kinunen, Moved, Al Denton, Seconded, that after review of Conditional Use request #81, the STAFF/FILE REVIEW - SITE DATA AND ANALYSIS, and Outdoor wood burning boilers and applicants, Section 6.5 and the Conditional Use Permits Section 16 of the Zoning Ordinance, the site plan and application provided, and subsequently finding compliance with the standards for approval of the request found in Section 16 of the Zoning Ordinance, the Planning Commission approves Conditional Use request #81 with the following conditions:

1. The wood boiler will be located at least 75 feet from any and all lot/property lines, easements and right-of-ways.
2. The chimney height will not be less than 15 ft. measured from grade to chimney top or 2 feet higher than the nearest neighboring principal dwelling, within 100 feet, whichever is greater.
3. Mr. and Mrs. Gary Niemela will only burn wood that is in the natural state and does not contain additives.
4. The wood burner will not be located in the front yard.
5. Mr. and Mrs Gary Niemela will notify the Planning Director and the Zoning Administrator when the wood burner has been installed so it can be inspected.
6. A zoning compliance permit shall be obtained from the Chocolay Township Zoning Administrator.
7. A zoning compliance permit shall not be issued until all other necessary permits as required by Federal, State and Local Agencies, are acquired.
8. Township staff can visit Mr. Niemela's property at any time after the installation to perform an inspection to be sure he is in compliance with the conditions set forth for the wood boiler approval.

Ayes 7. Nays 0. Motion approved.

B. CONDITIONAL USE PERMIT REQUEST #82 - CHOCOLAY DOWNS GOLF COURSE CLUBHOUSE

Jennifer Thum reported that CGC Development LLC, (Chocolay Downs Golf Course) has petitioned the Chocolay Township Planning Commission to grant Conditional Use Permit #82 under the terms of the Charter Township of Chocolay Zoning Ordinance to allow for the construction of a new clubhouse. CGC Development LLC is proposing that this clubhouse be used as a restaurant for the general public and members of the golf club. The proposed clubhouse is to be located northwest of the existing pro shop. Jennifer read her report and stated the applicant met all eight of the general standards listed in Section 16 of the Township Zoning Ordinance. Jennifer Thum stated that before the Planning Commission meeting, she talked with Bob Cambensy and they have addressed their concerns and brought a revised plan to tonight's meeting. This proposal is located on one parcel in a Residential (R-1) district, at 125 Chocolay Downs Golf Drive in the Charter Township of Chocolay.

Ken Tabor, Moved, Dennis Magadanz, Seconded, that after review of Conditional Use Request #82, the STAFF/FILE REVIEW - SITE DATA AND ANALYSIS, Sections 211, 403, and 16 of the Zoning Ordinance, the site plan and application provided, and subsequently finding compliance with the standards for approval of the request found in Section 16 of the Zoning Ordinance, the Planning Commission approves Conditional Use Request #82 with the following conditions:

1. The dumpster shall be located on a concrete stand, and surrounded by a wood or masonry fence or wall all least six feet in height.
2. CGC Development LLC will install a service drive located between Lot 14 and the clubhouse. The service drive will also include some type of turn-around for delivery trucks and the fires trucks. CGC Development Engineer and the Planning Director will work out the design of the turn around.

3. CGC Development LLC will install a landscape buffer between Lot 14 and the service drive.
4. The height of the proposed building will not exceed the Township Zoning Ordinance.
5. CGC Development LLC paint parking lines or install parking bumpers in the existing parking lot and the gravel lot by the cart storage barns. CGC Development LLC can also paint parking spaces on the access drive down to the cart storage barns.
6. CGC Development LLC is required to have a total of 72 parking spaces.
7. CGC Development LLC will paint the necessary handicap parking spaces.
8. CGC Development LLC will provide a copy of their approval for the Type II well and for the actual restaurant from the Marquette County Health Department to the Planning Director.
9. A zoning compliance permit shall be obtained from the Chocolay Township Zoning Administrator.

Ayes 7. Nays 0. Motion approved.

C. REZONING 141, CHOCOLAY DOWNS LLC, SANJAY SETHI, PRESIDENT OF CGC DEVELOPMENT LLC

Jennifer Thum read her report, she stated that Rezoning #141 is a request from Chocolay Downs LLC, Sanjay Sethi, and President of CGC Development LLC for the proposed rezoning of Chocolay Downs from R-1 to a PUD. The entire parcel is 122.5 acres and the applicant is proposing 33 single family individual homes, four areas of 10 townhomes and one area of 8 townhomes. Jennifer stated that they are still working things out with the road commission and will keep the commissioners informed. Jennifer Thum met with Mr. Cambensy and Neil Jandron to work things out and to make sure the applicants knew what the township was looking for. Jennifer Thum stated that she feels that the applicant has addressed her concerns, and they now just have to wait for outside agency approval.

Bob Cambensy stated that in January Rezoning #141 was brought to the Planning Commission for approval. At that time this item was tabled due to the Planning Commission asking Chocolay Downs LLC, to look into a second access road for this development. Mr. Cambensy reported that Neil Jandron is working with the County Road Commission and the DNR to either obtain an easement over the old railroad grade by the Varvil Center or find an alternate route for this development to put in a second access/exit. Mr. Cambensy stated that they also eliminated Lots #15 and #26 that were on the original site plan to use as open space. The set backs were adjusted slightly to meet the new zoning ordinance. Everything else from the original site plan remains virtually the same. Mr. Cambensy stated that the sewer treatment for the development if approved will be monitored by the DEQ. Mr. Cambensy stated that this is only the first step of the process and if this is preliminarily approved then they will need to work with many different agencies to obtain their approval before any construction can begin.

Al Denton asked if the cul de sac would be able to accommodate fire trucks?

Bob Cambensy stated that the cul de sacs will be built to County Road specifications.

Al Denton asked about the phasing time frame?

Bob Cambensy stated that their hope is for the first phase to be completed in 4 years; 2nd phase 3-4 years after that; and the 3rd and final phase approximately 10 years. This will also depend on the how long it takes to sell the lots in each phase.

Steve Kinnunen asked if anyone has looked at the increased traffic flow this development will create? He would like the applicant to do a traffic study for this area, to see if any road improvements need to be made.

Dennis Magadanz asked about the green space and is not sure if non-motorized trails can be used as green space.

Kim Erickson, 124 Dana Lane, voiced his concern about how this development could affect the wells and septic systems as well as the ground water.

Bob Cambensy stated that the Health Department is the entity that needs to approve this and the development will have to meet all of their standards.

Kim Erickson, 124 Dana Lane, stated that if Chocolay Downs wants to be a good neighbor then he would like a written guarantee that if the wells on Dana Lane get contaminated that Chocolay Downs will be put in new wells and he would be happy to support the development.

Pam Erickson, 124 Dana Lane, asked if the citizens will have access to the DEQ and Health Departments results?

Neil Jandron, Chocolay Downs, stated he would be happy to share the results with the citizens.

Bob Cambensy, again stated that they are only seeking preliminary approval from the Township and then they must go to the Health Department and DEQ next. Dennis Magadanz, Moved, Al Denton, Seconded, that following the review of Rezoning Request #141, and the Staff/File Review, and holding a public hearing, the Planning Commission recommends that the Township Board approve Rezoning Request #141 and give the site plan preliminary approval with the following conditions:

1. The lot sizes are subject to change, health department might require one-acre sites from the Chocolay Downs LLC.
2. The Chocolay Downs LLC will provide a phasing schedule that explains the timeframe, and subsequent time limitations, for each phase to the Township.
3. The Chocolay Downs LLC will work with all outside agencies for the water and septic systems.
4. The Chocolay Downs LLC will make an effort to provide an access road to M-28 that does not connect through an existing residential subdivision.
5. The Chocolay Downs LLC will keep the Township up-to-date on all talks with the health department and the DEQ on the proposed sewage and water systems. .
6. The Chocolay Downs LLC will provide language on how each of the townhouse sections and the single-family lots will be owned. This is in relation to the homeowners associations for the homes and the townhouses.
8. The Chocolay Downs LLC will install picnic tables in the open space areas, Lot 15 and Lot 26. The Chocolay Downs LLC will maintain the walking paths.

Ayes 7. Nays 0. Motion approved.

D. MOYLE DEVELOPMENT GATEWAY PLAZA

Jennifer Thum reported that part of this site plan was previously approved on November 6, 2006, but since then the site plan has expired. However, the applicant met with Al Denton, Denny Magadanz, Randy Yelle and myself to ask about an extension this year, and we granted them one year extension. The site plan is on this month's agenda for re-approval of the final site plan. The original site plan from 2006 was approved with the following conditions (there was a site layout of the original site plan at the Planning Commission meeting):

- 4 additional spruce trees shall be planted within the two parking lot islands located west of the building
- Underground electrical service is required
- Tree removal resulting from the relocation of the southwest frontage road shall be replaced on a 1:1 ratio

- Parking for the retail structure located west of the property shall not be diminished so as to place that facility out of compliance with requirements of the Zoning Ordinance.

George Meister, TriMedia Consultants, showed the drawing of the original site plan that was approved in 2006 with a few new revisions.

George Meister then moved on to talk about the new plan, which will add buildings and financial institution to the original site plan. He then stated that the furthest building to the east on the plan will be removed from the site plan to allow for trucks to turn around, wells, utilities, etc. A storm sewer with a retention pond will be on the northeast side and will be metered out so it doesn't discharge too fast. As they are not sure of the mixture of businesses that will be in the complex, they are looking at a couple different ways to handle parking space requirements. Moyle Development is looking for reapproval of the original site plan with a few revisions.

Steve Kinnunen asked about the traffic flow?

George Meister, TriMedia Consultants, explained that most of the traffic will come from the entrance that will be located on M-28, but there will also be an entrance/exit that will be behind the Holiday Station. Signage will also be put up to assist in directing the flow of traffic.

Jennifer Thum read her review of the new proposed site plan that is an expansion to the original site plan from 2006. The applicant has met her concerns and the applicant has agreed to install more native landscaping in order to compensate for the applicant having too much impervious surface. Jennifer Thum will send the site plan to the Superior Watershed group for their suggestions on the native landscape plants.

Steve Kinnunen, Moved, Ken Tabor, Seconded, that after review of the standards of Section 504 and other applicable standards contained in the Township Zoning Ordinance; and the STAFF/FILE REVIEW - SITE DATA AND ANALYSIS; and subsequently finding compliance with the standards for approval of the request, the Planning Commission reapproves the original Site Plan Review Request #05-01 (Gateway Plaza) with the following conditions:

1. Moyle Development, Gateway Center plant 4 additional spruce trees within the two parking lot islands located west of the building.
2. Moyle Development, Gateway Center install underground electrical services.
3. Tree removal resulting from the relocation of the southwest frontage road shall be replaced on a 1:1 ratio
4. Parking for the retail structure located west of the property shall not be diminished so as to place that facility out of compliance with requirements of the Zoning Ordinance.
5. The above condition is subject to review and approval of the Zoning Administrator, prior to Moyle Development, Gateway Center obtaining Zoning Compliance.
6. That Moyle Development, Gateway Center, obtain a permit from the Michigan Department of Transportation for the right-of-way improvements in front of the parcel along US 41.

Ayes 7. Nays 0. Motion approved.

George Meister, Engineer for Tridmedia Consultants is requesting for Moyle Development, Gateway Plaza preliminary approval for the additional properties (second phase of the development) located to the east.

Jennifer Thum stated that the additional buildings would have to be built to meet the Township Ordinance height requirements of no higher than 30 ft. She also inquired as to the development putting in a bike path to meet up with the existing bike path. Ms.

Thum requested that Moyle Development, Gateway Plaza keep the Township staff notified of their plans for landscaping, the watershed, right-a-ways, etc.

George Meister stated that this would not be a problem and that Moyle Development is more than willing to work with the Township to meet their requests.

Ken Tabor asked about the lighting?

George Meister stated that the lighting will be downward mounted on the buildings.

Al Denton, Moved, Dennis Magadanz, Seconded, that after review of the STAFF/FILE REVIEW - SITE DATA AND ANALYSIS, to provide preliminary approval for the second phase of the additional properties for Moyle Development, Gateway Plaza.

Ayes 7. Nays 0. Motion approved.

D. LIQUOR LICENSE POLICY AND PROCEDURES

Jennifer Thum presented the suggested policy and procedures outlining how Chocolay Township should handle applications for new liquor licenses. As of right now there are two possible applicants for the newly acquired Class C liquor license. At the last Township Board meeting, the trustees removed all language dealing with the Township reviewing the licenses every three years. They decided that they will leave this up to the Michigan Liquor Control Commission. Ms. Thum also enclosed in the Commissioner's packets a sample application from the City of Northville, and crossed out the items that would not apply.

Ken Tabor, Moved, Dennis Magadanz, Seconded, that after review of the proposed Township liquor license policy and procedures, the Planning Commission supports the proposed policy and procedures and will forward it onto the Township Board for their approval. At our next scheduled Planning Commission meeting we will hold a public hearing for the applicants seeking the new Class C Liquor License.

Ayes 7. Nays 0. Motion approved.

VII. PUBLIC COMMENT

Mark Maki, 370 Karen Road, asked about the Blondeau Trucking Garage requested expansion and stated that it shouldn't have been approved as the expansion site plan was never presented for approval. He also stated that in 1994 there was an agreement made between Blondeau Trucking and the Township that they would never expand at their present location. Mr. Maki stated that he asked at the July meeting how contractor's yards were put into the ordinance? Mr. Maki stated that he's reported numerous instances of noncompliance about many things i.e., size of signs, contractor's yards, etc. and he feels no one is acting on them. Mr. Maki stated that he was instructed to put his concerns in writing and send them to the Township for review. Mr. Maki stated he has done that and has not received any replies. Mr. Maki also inquired as to how Ace Hardware was able to construct a mini storage building and wants to know how mini storage buildings got into the ordinance, which wasn't in the first 3 drafts of the ordinance, but appeared in the final draft?

VIII. COMMISSIONER'S COMMENTS

Andy Smith questioned Mr. Maki's concerns and comments in regards to Contractor's yards, mini storage barns, etc. being snuck into the Zoning Ordinance.

Al Denton explained that the Planning Commission and the Township Board worked on the revisions to the Zoning Ordinance for two years. Mr. Denton explained that there were several public hearings held during this time, which resulted in many additions and deletions to the Zoning Ordinance and language changes to better clarify many areas of

the Ordinance, which then was forwarded to the Township Board for final approval.

IX. DIRECTOR’S COMMENTS

Jennifer Thum reported that she is researching to see if the Township can apply for an Industrial Park Grant through the U.S. Department Economic Development Ms. Thum stated that the U.S. Department of Economic Development may try to come up to look at our tentative plans. She also reported that due to the unemployment in the Upper Peninsula, and the percentage being lower then the national average, Chocolay Township is eligible to apply. Ms. Thum will keep the Commissioners updated on this.

Ms. Thum also reported that she is requesting approval to attend a seminar next year Entitled “Engineering for the Non-Engineer” in Madison, Wisconsin. Ms. Thum will provide a summary of the seminar to the Commissioners if she’s able to attend.

Ms. Thum reported that the first part of the Boardwalk down by the Marina will need to be redone as the volunteers used the wrong type of bolts and it is coming apart. She reported that she is working with Art Lauren from Marquette Community Corrections to complete this project.

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Planning and Zoning News, June 2008.
- B. Letter from the County Road Association of Michigan
- C. Minutes from the Marquette Township Planning Commission

XI. ADJOURNMENT

Dennis Magadanz motioned, Al Denton, seconded to adjourn the meeting as there was no further business to address. The meeting adjourned at 9:10 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, September 8, 2008 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Dennis Magadanz,
Dr. Ken Tabor, Kendell Milton, Andy Smith

Absent:

Staff Present: Jennifer Thum, (Planning and Community Development), Laurie
Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF AUGUST 11, 2008 MEETING MINUTES

Ken Tabor motioned to approve the August 11, 2008 meeting minutes after 2
noted corrections, seconded by Estelle DeVooght.

Ayes 6. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Dennis Magadanz motioned to approve the agenda as written seconded by Ken
Milton.

Ayes 6. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

No public hearings scheduled.

V. PUBLIC COMMENT

No public comment.

VI. OLD BUSINESS

A. MOYLE DEVELOPMENT, GATEWAY PLAZA

Jennifer Thum reported that she was contacted by Moyle Development's
Engineer, George Meister from Tri Media Consultants about the grading
that is going on at their proposed site. Currently, they are grading the
portion that was given final approval (again). They would like to start
grading the other part, east of the wetlands as soon as possible. The
applicants do have their wetland permit and the needed grading permit.
The applicants engineer did call the Marquette Conservation District and
stated that they had final approval for everything. Actually, they only had
final approval for the original portion of the proposed site plan. At this
point, Moyle Construction is asking the Planning Commission's
permission to allow them to excavate the portion that only has preliminary
approval. Personally, as long as they have the correct permits and they
install the needed best management practices, I don't have a problem with
this.

Ken Tabor Moved, Dennis Magadanz seconded, to allow Moyle
Development, Gateway Plaza to excavate the second part of the proposed
site at US 41/M 28.

Ayes 6. Nays 0. Motion approved.

B. CEDA GRANT UPDATE

Jennifer Thum reported that she is working with CUPAD and the U.S. Department of Economic Development on a grant to begin work on an Industrial Park building. Ms. Thum stated that this is a very slow and time-consuming project. She hopes to be able to move forward with this next year and will keep the Planning Commission informed about the progress.

C. BLONDEAU CONSTRUCTION MODIFICATION

Jennifer Thum reported that Dave Blondeau (Blondeau Trucking Company) contacted her on September 4, 2008 and would like approval to increase their proposed storage building by 20 ft. The building size of 60' x 80' was approved previously, but Mr. Blondeau would like to construct the building 60' x 100'. According to our Zoning Ordinance, this is not a minor alternation and needs Planning Commission approval. Mr. Blondeau stated that this is needed to accommodate everything they plan to store inside the building.

Dave Blondeau, Blondeau Trucking, explained that they would like to increase their cold storage building by 20 feet, which will not change the building location on the original site plan. Mr. Blondeau also stated that this will not affect any of the required setbacks.

Dennis Magdanz Moved, Ken Tabor Seconded, to allow Blondeau Trucking Company to expand their proposed cold storage building by 20 ft. This alternation will not alter the basic design of the land or interfere with the required setbacks of the site.

Ayes 6. Nays 0. Motion approved.

VII. NEW BUSINESS

A. NEW CLASS "C" LIQUOR LICENSE

Jennifer Thum reported that two applicants have applied for the available "New" Class "C" Liquor License, Chocolay Downs Golf Club and Gentz (Homestead) Golf Club. Each applicant has filled out the application and attached a site plan of the proposed area where liquor will be served.

Randy Gentz stated that his family has been in the area for the past 116 years and would like to have the opportunity to obtain a liquor license. Cathy Gentz read a letter describing Gentz (Homestead) Golf Club and how the liquor license could enhance and possibly expand their business. If they receive the liquor license it would also allow them to hire 2-3 more employees.

Dennis Karjala, Chocolay Downs Golf Course (Royal English LLC), stated that they are seeking consideration for the liquor license, which would be a great addition to their new clubhouse. He also stated that if the liquor license were obtained by they would add 6-8 additional employees.

Al Denton asked both parties about their membership numbers and if they participate in community service projects?

Both parties have between 200-300 members not including the public and both participate in community service projects for youth, special Olympics, etc.

At this point the Planning Commission asked everyone to step out to

discuss this matter. When everyone was called back in, the Planning Commission stated that they feel both parties are rated equally according to the criteria.

No motion was made to support Gentz (Homestead) Golf Course.

Al Denton/Estelle DeVooght – No motion carried.

No Motion was made to support Royal English LLC.

Al Denton/Dennis Magadanz – No motion carried.

The Planning Commission asked if either party would object to a flipping a coin due to both parties being equally qualified for the Class C Liquor License.

Neither party objected. A coin was tossed and won by Gentz Golf Club.

Ken Tabor Moved, Al Denton Seconded that by the flip of a coin a letter of support on behalf of the Gentz Homestead Golf Course, to receive the New Class C Liquor License above all others. This letter will be presented to the Chocolay Township Board on September 15, 2008 with a public hearing to be held at that time. The Township Board will either concur with the Planning Commission's recommendation, go with the other applicant, or ask the Planning Commission to review the applications again.

Ayes 6. Nays 0. Motion approved.

B. KEN MILTON REAPPOINTMENT

Jennifer Thum reported that the term of Kendal Milton (who replaced Tom Shaw) expired May 24, 2008 and Mr. Milton will need a letter of support from the Commissioners to be reappointed.

Dennis Magadanz Moved, Al Denton Seconded, to allow the Director of Planning and Community Development to write a letter of support on behalf of the Planning Commission asking for the re-appointment of Kendal Milton and present the letter to the Township Supervisor.

Ayes 6. Nays 0. Motion approved.

C. RENAMING OF WARD TRAIL

Jennifer Thum reported that this private road before you is due to the new owner, Mike Colleur, wanting to change the name to Royal Oak. Ms. Thum has spoken with the Marquette County Dispatch and they would like to see something added after Royal Oak, such as Trail or Lane. Ms. Thum reported that she has some reservations about the name as it's the same name as a major city downstate. If the applicants were to add something after the name, it would help deter people's mail going downstate and vice versa.

The Planning Commission asked Ms. Thum to contact Mr. Ward and speak to him about this request and the status of Mr. Colleur purchasing Ward Trail. Ms. Thum will report back at the next meeting.

VII. PUBLIC COMMENT

Randy Gentz thanked the Planning Commission for their support for the Class C Liquor License.

VIII. COMMISSIONER'S COMMENTS

No comment at this time by any of the commissioners.

IX. DIRECTOR'S COMMENTS

Jennifer Thum asked if the Planning Commission members had any objections to canceling the January, 2009 and December, 2009 Planning Commission meetings. Ms. Thum stated that these meetings usually don't have much to address and it would save the Township money. The Planning Commission members had no objections to this.

Ms. Thum extended an invitation to Estelle DeVooght to attend the Township Board meeting on September 15th as the Township would like to present Ms. DeVooght with an award for longevity. Ms. DeVooght has been a part of the Township Committees for the past 35 years. The Planning Commission thanked and congratulated Ms. DeVooght for her service.

Ms. Thum reported that Carol Fulscher will attend the next Planning Commission meeting to discuss and answer questions pertaining to Heritage Trail.

X. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Planning and Zoning News, July 2008.

XI. ADJOURNMENT

Al Denton motioned, Dennis Magadanz, seconded to adjourn the meeting as there was no further business to address. The meeting adjourned at 8:05 p.m.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, October 13, 2008 @ 7:30 PM**

I. MEETING CALLED TO ORDER / ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Dr. Ken Tabor,
Kendell Milton, Andy Smith, Steve Kinnunen

Absent:

Staff Present: Jennifer Thum, (Planning and Community Development),
Randy Yelle, (Zoning Administrator), Laurie Vashaw-Eagle
(Recording Secretary)

II. APPROVAL OF SEPTEMBER 8, 2008 MEETING MINUTES

Ken Tabor motioned to approve the September 8, 2008 meeting minutes as written, seconded by Estelle DeVooght.

Ayes 6. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Steve Kinnunen motioned to approve the agenda as written for October 13, 2008, seconded by Ken Tabor.

Ayes 6. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

A. POLITICAL SIGN, ZONING AMENDMENT 34-08-02

No public comment.

B. HOME OCCUPATION, ZONING AMENDMENT 34-08-01

Dick Arnold, 312 Co. Rd. 545 West Branch Road, stated he's opposed to the way the Home Occupation ordinance currently reads and that it's degrading the R1 and R2 districts. Mr. Arnold stated he was under the impression that the ordinance only allowed for things like insurance agents, a hair dresser with one chair, etc. There are many other businesses being operated in the R1 and R2 zones that should not be allowed. Mr. Arnold also stated that another concern of his is when a home occupation starts, the neighbors are never contacted. He feels if a home occupation starts up, the ordinance should state that the neighbors need to be notified to be allowed a say. Mr. Arnold also stated his dissatisfaction that the ordinance allows for 500 feet of mining, which could be very unsafe.

C. CONDITIONAL USE PERMIT #83

Kenlyn Hubbard, 121 Wintergreen Trail, is requesting a conditional use permit to install an outdoor wood burner to assist her with her heating costs as she uses propane, which is very expensive.

V. PUBLIC COMMENT

No public comment.

VI. OLD BUSINESS

A. MOYLE DEVELOPMENT, GATEWAY PLAZA

Jennifer Thum reported that she was contacted by Brian from Moyle Development, Gateway Plaza who requested to have this tabled until the November meeting. Ms. Thum stated Moyle Development Plaza is working with Township staff and the Superior Watershed Group to determine an adequate landscaping plan for the development that will not only look nice, protect the wetlands, and address water and sewer issues.

Steve Kinnunen Moved, Estelle DeVooght, Seconded to table this until the November meeting.

Ayes 6. Nays 0. Motion approved.

B. RENAMING OF WARD TRAIL

Jennifer Thum reported that she followed-up on this from the last meeting. Ms. Thum spoke with the Township Assessor and Frank Ward and verified that Mike Colleuer does own the appropriate portion of the road and is allowed to change the name if he so choses.

This private road is before you, due to the new owner Mike Colleuer requesting to change the name of Ward Trail to Royal Oak. Ms. Thum spoke with the Marquette County dispatch and they would like to see something added after Royal Oak, such as Trail or Lane. Ms. Thum stated she does have reservations about the name as it's the same name as a major city downstate. If Mr. Colleuer were to add something after the name, it would help deter people's mail from going downstate and vice versa.

Andy Smith stated that he owns approximately 600 feet of "Ward Trail" and has granted Mr. Colleuer an easement. Mr. Smith stated for the record that he does not oppose the name change of the road.

Al Denton Moved, Steve Kinnunen Seconded, to change the name to "Royal Oak Trail" in place of the previous name of "Ward Trail". The Planning Commission will recommend this new name to the Township Board.

C. HOME OCCUPATION ZONING AMENDMENT

Jennifer Thum reported that at the last Township Board meeting, the Board asked the Planning Commission to revisit the proposed Home Occupation ordinance. A couple of the members were questioning the definition and wanted further clarification as to why repair, assembly on household appliances are prohibited. The Township Board was not convinced that the new proposed ordinance was the best way to control home occupations. Ms. Thum posted a notice in the newspaper to inform the public that the Planning Commission will be discussing this issue again to try and come up with a solution to redefine the definition and work on the prohibited uses.

After much discussion, the Commissioners agreed to having zoning ordinance #34-08-01, Section 6.9, page 53, #3 read:

Prohibited Uses: The following uses are prohibited as home occupations in the R1, R2, MFR and LSR districts:

- a. Any type of repair, assembly or storage, sale or manufacture of vehicles, Machinery, engines, or any other work related to motor vehicles and their parts.
Removed from the current ordinance would be the words “household” and “appliance”.

Ken Tabor Moved, Andy Smith Seconded, to recommend approval of the verbage change listed above and forward it to the Township Board for their approval of the revised verbage for Home Occupation Zoning Amendment #34-08-01.

D. POLITICAL SIGN ZONING AMENDMENT

Jennifer Thum reported that on July 14, 2008 the Chocloy Township Planning Commission held a public meeting with a scheduled public hearing to obtain resident feedback on an important item in the Township: allowed square footage for political signs. The meeting was a follow-up to recent sign violations where political candidates were posting larger sizes then we permit, which is sixteen (16) square feet. (See attaching proposed language in public notice that was being discussed).

At the Planning Commission meeting, no motion was made to increase the allowed square footage for political signs. Therefore, the sign ordinance stays the same and the permitted square footage for political signs will be sixteen (16) square feet provided that the sign is so located that no portion of the sign is located on the public right-of-way.

At the September, 2008 Township Board meeting, the Board asked for the Planning Commission to revisit this issue to see if a motion could be made. At the October meeting, the Planning Commission should discuss in detail the ordinance and make a motion to hold a public hearing in November, 2008 on this issue or to have further discussion on this issue.

Ken Tabor, Moved, Kendall Milton, Seconded, to have staff publish the necessary notices to hold a Public Hearing in November to amend the political sign portion in the Chocloy Township Zoning Ordinance.

Ayes 6. Nays 0. Motion approved.

VII. NEW BUSINESS

A. CONDITIONAL USE REQUEST #83

Jennifer Thum reported that she and Randy Yelle, Zoning Administrator, went out to Kenlyn Hubbard's property, but unfortunately no one was home to meet with them. Ms. Hubbard meets all the requirements for the condition use request except for zoning ordinance, Section 6.5 (B) Conditional Use in the R-1 Zoned District 1. b, which states, "Minimum chimney height of 15 feet, measured from grade to chimney top or 2 feet higher than the nearest neighboring principal dwelling, within 1000 feet, whichever is higher".

Ms. Hubbard explained that her property is located where the elevation slopes downwards from the neighbor on one side of her. Due to this situation, meeting the zoning ordinance requirement of having her chimney 2 feet higher than the nearest neighboring principal dwelling will result in an approximate 40 foot chimney, which seems unrealistic and unsafe.

Ms. Thum requested to table this until the next meeting so she and Randy Yelle (Zoning Administrator) can go back to Ms. Hubbard's property to take measurements, try to meet with Ms. Hubbard's neighbors, and determine the required chimney height for the wood burner. Ms. Thum also wants to see where the wood-burner will be installed. Ms. Thum stated she will also assist Ms. Hubbard, if needed, to appeal to the Zoning Board of Appeals if this meets the criteria of a special circumstance for a variance request.

Steve Kinnunen, Moved, Al Denton, Seconded, to table this until the November meeting

Ayes 6. Nays 0. Motion approved.

VII. PUBLIC COMMENT

Dick Arnold, 312 Co. Rd. 545 West Branch Road, expressed his dissatisfaction with 3 of his complaints that haven't been addressed by the Township. The first violation is at Lot #7 Green Garden Road where people have done work on a structure without permits and are now living there. Second violation, is at 281 West Branch Road, involving junk cars (Ordinance 55), the occupant was supposed to be working with the Township to get in compliance with the ordinance, but nothing has been done. Third violation, is at 6884 US 41 S. and 6900 US 41 S. where business is being conducted. Mr. Arnold stated that there are 6 to 8 people who show up to work and this is zoned as a farming/agriculture district and running a business is not allowed there. Mr. Arnold stated he just wants the Township of Chocloy to enforce the law.

VIII. COMMISSIONER'S COMMENTS

Andy Smith inquired as to where the 1,000 feet incorporated in the zoning ordinance, Section 6.5 (B) Conditional Use in the R-1 Zoned District, 1. b. came from?

Al Denton stated that it was determined through a public hearing and complaints from residents with health problems, etc. pertaining to the smoke created from wood boilers or wood burners.

Steve Kinnunen asked if the Township has discussed the recent incident in Ishpeming pertaining to the Moose being euthanized?

Al Denton stated that this has been discussed and the Chief of Police has a plan in place to handle these types of situations if they should happen in the Township of Chocolay.

IX. DIRECTOR'S COMMENTS

Jennifer Thum reported that a Chocolay Downs traffic count was conducted and it was determined that a right hand turn lane is warranted for this type of development.

Ms. Thum also reported that the Township of Chocolay is not supporting the ORV Ordinance as they do not believe ORV's should be allowed to run on the road.

X. INFORMATIONAL ITEMS AND CORRESPONENCE

- A. Planning and Zoning News, August 2008.
- B. Township law E-Letter, Zoning and Land Use Update
- C. County ORV Ordinance

XI. ADJOURNMENT

Ken Tabor, Moved, Al Denton, Seconded, to adjourn the meeting as there was no further business to address. The meeting adjourned at 8:40 p.m.

Albert Denton, Chairperson

Planning Commission
Charter Township of Chocolay

5010 US 41 South
Marquette, MI 49855
Phone: 906-249-1448 Fax: 906-249-1313

There are no minutes for the meeting on November 3, 2008.

The meeting was cancelled.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING
Monday, December 8, 2008 @ 7:30 PM**

I. MEETING CALLED TO ORDER at 7:35 PM/ ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Ken Tabor,
Kendell Milton, Andy Smith, Steve Kinnunen, Andy Sikkema

Absent:

Staff Present: Jennifer Thum, (Planning and Community Development), Laurie
Vashaw-Eagle, (Recording Secretary)

II. APPROVAL OF OCTOBER 13, 2008 MEETING MINUTES

Ken Tabor motioned to approve the October 13, 2008 meeting minutes as written,
seconded by Steve Kinnunen with a slight format correction in II.

Ayes 6. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Steve Kinnunen motioned to approve the agenda as written for December 8, 2008,
seconded by Ken Tabor.

Ayes 6. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

A. CONDITIONAL USE PERMIT #83 (Continuation)

Jennifer Thum reported that the applicant, Kenlyn Hubbard, had petitioned the
Chocolay Township Planning Commission to consider issuance of a Conditional
Use Permit under the terms of the Charter Township of Chocolay Zoning
Ordinance to install and operate an outdoor wood boiler. The proposed location is
on an 8.8 acre parcel located in a Residential (R-1) district at 121 Wintergreen
Trail in Chocolay Township. Boilers/units, outside wood burning are a Permitted
Principal Use in the MFR, I, AF and MP Zoned Districts, and a Conditional Use
in the R-1, MFR, C1 and MP Zoned Districts.

As required under the conditional use procedure, a notice has been published in
the paper and all property owners within 300 feet of the property have been
notified. At the last Planning Commission meeting, this item was tabled and Ms.
Hubbard was directed to go to the Zoning Board of Appeals for consideration of a
height alteration to the proposed wood boiler chimney.

**The Zoning Board of Appeals approved the wood boiler with the following
conditions:**

1. Outside wood boiler will not be in operation from April 30th
through October 1st.
2. Ms. Kenlynn Hubbard will receive an approved conditional
use permit from the Chocolay Township Planning Commission.
3. Ms. Kenlynn Hubbard will receive an approved Zoning
Compliance Permit from the Chocolay Township Zoning
Administrator.
4. The wood boiler's chimney height is to be 15 ft. from the grade of
the property.

Ms. Hubbard stated that she is confused by the process as she thought she was going to the Zoning Board of Appeals Committee to ask for a variance for the height of the chimney. The Zoning Board of Appeals did approve the variance request, but added conditions such as time limits when she can operate her wood boiler, which is confusing. Ms. Hubbard stated that she explained to the Zoning Board of Appeals the danger of having a chimney so high, which also would be more of a nuisance to the neighbors. Mr. Hubbard explained that having a chimney the height it would need to be to meet the ordinance, would also impact the efficiency of the wood boiler.

Steve Kinnunen explained that the ordinance was drafted with much research and input from other Townships similar in size to Chocoday Township. The ordinance is designed to protect neighbors from the smoke that comes from these types of wood boilers. Mr. Kinnunen also explained that a lot of people worked hard to get this variance request approved as Mr. and Mrs. Hubbard's property is non-conforming.

Andy Smith stated that being a neighbor of Mr. and Mrs. Hubbard he doesn't have a problem with them operating a wood boiler and doesn't even notice the smoke from the neighbors who already have them.

Al Denton stated that the reason the condition stipulating a time limit for operating the wood boiler is because in the summer, neighbors tend to have their windows open more and the smoke could bother them.

Estelle DeVooght stated that she feels it is wrong to put time periods to operate these types of wood boilers as they are self contained and usually also heat the owner's water.

B. POLITICAL SIGN, ZONING AMENDMENT 34-08-02

Jennifer Thum reported that on July 14, 2008 the Chocoday Township Planning Commission held a public meeting with a scheduled public hearing to obtain resident feedback on an important item in the Township: allowed square footage for political signs. The meeting was a follow-up to recent sign violations where political candidates were posting larger sizes than we permit, which is sixteen (16) square feet. (See attaching proposed language in public notice that was being discussed).

At the October 2008 Planning Commission meeting, no motion was made to increase the allowed square footage for political signs. Therefore, the sign ordinance stays the same and the permitted square footage for political signs is sixteen (16) square feet provided the sign is so located that no portion of the sign is located on the public right-of-way.

At last month's Township Board meeting, the Board asked for the Planning Commission to revisit this issue to see if a motion could be made. Therefore, at this month's meeting the Planning Commission will revisit this issue.

V. PUBLIC COMMENT

Dick Arnold, 312 Co Rd 545 West Branch Road, stated that he feels it is a mistake to grant any home occupation in the Township of Chocoday without letting the neighbors have a chance to comment and voice their opinion on it. Mr. Arnold also stated that home occupations can affect the value and curb appeal of the neighborhood.

VI. OLD BUSINESS

A. CONDITIONAL USE REQUEST #83

Ken Tabor motioned, seconded by Andy Smith that after review of Conditional Use Request #83, the Staff/File Review, Outdoor wood burner/boiler, Section 6.5, the Conditional Use Permit Section 16 of the Zoning Ordinance, the site plan and application provided, and subsequently finding compliance with the standards for approval of the request found in Section 16 of the Zoning Ordinance, the Planning Commission approves Conditional Use Request #83 with the following conditions:

1. The wood boiler will be located at least 75 feet from any and all lot/property lines, easements and right-of-ways.
2. The chimney height will not be less than 15 ft. measured from the grade to chimney top.
3. Ms. Kenlyn Hubbard will only burn wood that is in the natural state and does not contain additives.
4. The wood boiler will not be located in the front yard.
5. Ms. Kenlyn Hubbard will notify the Planning Director and the Zoning Administrator when the wood boiler has been installed so it can be inspected.
6. A zoning compliance permit shall be obtained from the Chocolay Township Zoning Administrator.
7. Outside wood boiler will not be in operation from April 30th through October 1st of each year.
8. After a year, Chocolay Township staff will contact neighboring properties and Ms. Hubbard to see if there are any complaints concerning the wood boiler. If so, the Township will hold another public hearing to see if the wood boiler can continue to be in operation at 121 Wintergreen Trail.
9. A zoning compliance permit shall not be issued until all other necessary permits as required by Federal , State, and Local Agencies, are acquired.

Ayes 5. Nays 1. Motion approved.

Al Denton abstained from voting as he's also a member of the Zoning Board of Appeals.

B. POLITICAL SIGN, ZONING AMENDMENT #34-08-02

The Planning Commission members discussed that 32 feet in size political signs are allowed in the surrounding townships. Therefore, the members agreed to increase the size of the political signs allowed in the Township of Chocolay from 16 feet to 32 feet.

Steve Kinnunen motioned and Ken Tabor seconded that after review of the pertinent material and holding a public hearing in October that the political sign size will be increased from 16 feet to 32 feet.

Ayes 6. Nays 0. Motion approved.

VII. NEW BUSINESS

A. ANNUAL REPORT

Albert Denton, Chairperson, presented in accordance with the rules of procedure, the 2008 Annual Report outlining the activities of the Charter Township of Chocolay's Planning Commission for the past year for approval.

Ken Tabor motioned, Estelle DeVooght seconded, to recommend approval of the 2008 Annual Planning Commission Report and to have staff present it to the Chocolay Township Board once the December, 2008 data is included.

Ayes 6. Nays 0. Motion approved.

B. RECREATION PLAN UPDATE

Jennifer Thum provided in the meeting packet a copy of the Township's 2004 Recreation Plan. J. Thum reported that in order for the Township to be eligible for any grants such as updating the old railroad bridge on M-28, we need to have an up-to-date Recreation Plan. Work has been started on the Recreation Plan, but Ms. Thum would like your input. Some of things that we will have to add and work on in the future are:

- Update the history section
- Update the contaminated sites
- Look at Park and Facility Guide and see if it needs updating

Ms. Thum also stated that the Township might want to explore adding a couple of questions to the recreational questionnaire for inclusion with next years' tax bill and have the residents send them back with their tax payment. (This would save on stamps!)

The questions could also be posted on our website to ensure that we get a good amount of feedback. Some of the questions could be:

- What park sites would you like to see more up-to-date playground equipment and picnic sites on?
- Suggestions on how to develop the Voce Creek and Brower property?
- Should the Township explore options of using Cherry Creek School or local churches for community events?
- Does the Township need to install better signage for our parks?
- Do you know where the Green Bay Street Park, Voce Creek, and Lake LeVassuer Park are located?

Al Denton motioned to table this until the February meeting to review, comment, and make recommendations. The document will be put on an overhead screen for the next meeting so each part of the plan can be reviewed, discussed and possibly revised. Jennifer Thum reported she will also send the Planning Commission members a map showing all of the recreational areas in the Township.

Ayes 6. Nays 0.

Motion to table this until the February '09 meeting.

C. TOP PRIORITIES 2009

Jennifer Thum reported that this is something she'd like to try to create for next year. Please think of at least (3) three things that you would like the Planning Commission to work on next year. For example, find land for an industrial park or to explore purchasing land near an existing one, another one might be to find a place locally that our seniors could meet for group exercise or new playground equipment at one or all of the parks. These are just some examples, please think of at least (3) three and bring them to our February meeting. This will be your homework assignment for our next meeting

Al Denton stated some suggestions for the 2009 Top Priority List, which are:

1. Update the Recreation Plan.
2. Research any property that may be available in the Township for an Industrial Park.
3. Research a large retail mall, grocery, or retail store that may want to locate in the Township.
4. Look at a Township Cemetery.
5. Do more with the marina and look at possibly 4 camping sites on the property.

Mr. Andy Sikkema stated that he would like to see more connections to the bike path possibly through Silver Creek Road.

Al Denton asked all of the Committee members to write down their thoughts and bring them to the February meeting for discussion.

D. 2009 BUDGET

Jennifer Thum provided the committee members with the proposed budget for the Planning Commission and the capital improvements for the Community Development Department. If you have any questions, comments, or suggestions, please don't hesitate to discuss them with the rest of the Planning Commission and Ms. Thum. Greg Seppanen (Township Supervisor) is asking for a \$10.00 pay increase for all Boards and Commission(s). There is no guarantee that this will go through.

E. 2009 MEETING DATES

Jennifer Thum provided the Commission members with the 2009 meeting schedule and the dates are as follows:

January - No meeting	July 13th
February 9th	August 10th
March 9th	September 14th
April 13th	October 12th
May 11th	November 2nd
June 8th	December - No meeting

Jennifer Thum requested that if you know that you will not be able to attend a meeting, please let her know as soon as possible.

F. VICE CHAIR POSITION

Jennifer Thum reported that during the month of October, Dennis Magadanz had to resign from the Chocolay Township Planning Commission Board, as a result of being hired by the Township. Ms. Thum reported that we need to fill that position.

According to the Planning Commission By-Laws, the Vice Chair is responsible for the following things:

- A. In the event of the office of Chair shall become vacant by death, resignation or otherwise, the Vice-Chair shall become Chair, for the unexpired term of this office. (Amended 7-97)
- B. In the event of the absence of the Chair or his/her ability to discharge the duties of his/her office, such duties shall, for the time being evolve upon the Vice-Chair. (Amended 7-97)

Ms. Thum stated that the only person not eligible to hold this office is Dr. Ken Tabor due to being a Board member.

Ken Tabor motioned, Estelle DeVooght seconded to recommend, Steve Kinnunen be appointed as the Chocolay Township Planning Commission Vice Chair.

Ayes 6. Nays 0. Motion approved.

G. MDOT LANDSCAPE PLAN

Jennifer Thum provided the Commission members with draft plans for landscaping the pedestrian tunnel, and bike path that will be constructed along US 41 South. Staff has reviewed the plans and the Superior Watershed group has also reviewed the Superior Watershed Group and Township staff has some questions and comments about the overall plan for US 41.

Landscape Comments - The tree mixture of Quaking Aspen, Birch, and Balsamic Fir, we are not too fond of. The Aspen and Birch tend to grow up quick and die young, where the Fir has a short life span and slow growth rate. The Sugar Maple is fine with us, the only concern is that it has a tendency for tar spots to appear, which we know does not hurt them, just looks bad. Also, I thought sugar maples might be salt sensitive, but not sure. A contractor will maintain the trees for one year and then they will be turned over to the Township. Staff is wondering if we have to check with the power companies to ensure they meet any of the requirements that they might have.

Ms. Thum spoke with Paul Albert, the City of Marquette Arborist and he stated that the trees that have been proposed are not applicable for their location. Some of the tree suggestions that Paul Albert mentioned in replacement of were:

Austrian Pine - You can see an example of these in front of the Marquette County Sewage Treatment Plant.

Blackhills Spruce - Variety of white spruce. You can see an example of these across from the Rock Cut, there is a Blackhills Spruce memorial tree.

Greenspire Little Leaf Linden - Tend to be branchy, will have to prune and not native.

Canada Red Cherry - Choke Cherry variety.

Red Oak - don't plant by bike path because of acorns.

Kentucky Coffee Tree - these were planted in the City and are doing great.

Ginko - grow slow, there is one by the Marquette Courthouse.

Tunnel Comments - The Planning Commission can make a recommendation on what the outside finished wall surface of the tunnel should look like, such as brick facing, stone, etc. Some examples were provided in your packet and colored examples are presented at this meeting. Staff would like to see stone (rough cut) or an imprinted mural though the cost for the mural would be HUGE. Staff went to view the tunnel in Marquette and the faux brick just looked weird, you could tell it was fake brick.

The Committee members reviewed pictures of various types of walls for the tunnel and most liked the rock walls versus the block or mural-type wall. After much discussion the committee provided permission for Jennifer Thum and Tom Murray to make a decision pertaining to picking out what type of stone should be used for the tunnel wall. Once they choose, they also need to speak to the neighbors before a final decision is made.

Seeding Mixture - Staff would like to see low ground shrubs in place of the seed mixture. There have been some examples of seed mixture around town that just look awful. Staff has found some examples of shrubs that fit into our Zone, and they are listed as salt resistant.

They are:

Mugo Pine -

Rosa Rugosa -

Sheep Lauren

Hopleys Orane (pontenella)

Mountain Cranberry

Winterberry

Junipers

H. CHOCOLAY RIVER BRIDGE

Jennifer Thum reported that the Township of Chocolay received a grant this past year from the Department of Natural Resources to construct a bridge over the Chocolay River to allow for motorized and non-motorized use. We are working with MDOT, DNR, and the DEQ for any permits that we might need. There could also be issues with funding due to the new ramp design, since the ramps will have to be elongated by about 50 feet on each side, due to natural grade of the bank. Ms Thum reported that the Township is hoping that the new bridge will allow the

snowmobilers to use the trail along M-28 as much as possible before they use the Lakewood Lane Trail.

VII. PUBLIC COMMENT

No public comment at this time.

VIII. COMMISSIONER'S COMMENTS

Andy Smith inquired as to how the change in the political sign size ordinance came about. Al Denton explained that the Township Board asked the Planning Commission to look at this ordinance due to many complaints received during the previous election by the people running for political offices. If there are a lot of complaints received pertaining to a specific part of the ordinance, then the Township Board, the Planning Commission or the Public can request a public hearing pertaining to that specific part of the ordinance.

Jennifer Thum asked for volunteers to serve on a subcommittee to look at alternative energy sources, i.e., wind, solar farms, etc. due to the economy this should be looked at before requests for these alternative sources become reality.

The Committee members directed Jennifer Thum to find a mutual agreeable date this month or in January to hold a meeting and inform everyone once the date is decided upon.

IX. DIRECTOR'S COMMENTS

Jennifer Thum reported that Moyle Development, Gateway Plaza have contacted her regarding the landscaping at the new development. Moyle Development, Gateway Plaza will be putting in a rain garden, which Ms. Thum feels will add a nice touch to the development.

Jennifer Thum reported that a request for a home occupation requested from Mr. Martin on Lakewood Lane, which was denied by the Planning Commission earlier this year. This went to Circuit Court and the request was granted by Judge Kangas due to the ordinance being too vague. The Township appealed the decision and Judge Solka overturned the decision. The Township is now waiting the 21 day period to see if Mr. Martin will re-appeal.

Jennifer Thum reported that she is going to work on enhancing the website. She will also add the recreation plan and information pertaining to different projects being looked at for the Township. Ms. Thum hopes this will produce more feedback from the public.

Ms. Thum also stated that the wood boiler ordinance was discussed in great length and as well as the correct process to follow when a request is received.

Ms. Thum also reported that a small piece of land was donated off Kawbawgam Road by Gary Wick, but it is landlocked. The State of Michigan is willing to give them an adjacent small piece of land that could possibly be used as a road into the land. Ms. Thum is looking into trying to obtain an easement to be able to access the land.

- B. County ORV Ordinance

XI. ADJOURNMENT

Al Denton, moved, Steve Kinnunen seconded, to adjourn the meeting as there was no further business to address. The meeting adjourned at 8:55 p.m.

Planning Commission
Charter Township of Chocolay

5010 US 41 South
Marquette, MI 49855
Phone: 906-249-1448 Fax: 906-249-1313

There are no minutes for the meeting on January 5, 2009.

The meeting was cancelled.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
Monday, February 9, 2009**

I. MEETING CALLED TO ORDER AT 7:30 PM/ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Ken Tabor,
Andy Smith, Steve Kinnunen, Andy Sikkema

Absent: Kendell Milton (excused)

Staff Present: Jennifer Thum (Planning and Community Development), Laurie
Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF DECEMBER 8, 2008 MEETING MINUTES

Albert Denton motioned to approve the December 8, 2008 meeting minutes as written, seconded by Andy Sikkema.

Ayes 6. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Estelle DeVooght motioned to approve the agenda as written for February 9, 2009, seconded by Steve Kinnunen.

Ayes 6. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

A. REZONING #142

Mr. William Beckman submitted a letter dated December 18, 2008 describing the background for of the property encompassing his rezoning request. He stated in his letter that the parcel has been in his family for more than 70 years. His grandfather bought it in the 1930's. A camp was constructed on the lake front portion of the parcel shortly after the purchase. The remaining two parcels remained vacant until four or five years ago, at which time the parcel between Lakewood Lane and M-28. The purchaser has since built a home on this lot. The remaining parcel lies south of Highway M-28.

It abuts Timber Crest on the west side and Varvil's addition on the east. When Varvil's subdivision was laid out there was supposedly a fifty foot barrier left between said property and said subdivision. Mr. Beckman described that when they checked as to where the barrier lay, it was found to not exist. At this point they were forced to hire a surveyor to establish the property lines. Upon doing so, it was discovered there was not fifty feet set aside between our property and Varvil's subdivision. When this property was plotted out, Mr. Varvil's surveyors had made an error and as a result he sold fifty feet of our property to the builders of Timber Crest. In order to settle this problem, there was an agreement to deed fifty feet of our property to Timber Crest. In return we were deeded fifty feet from Mr. Varvil on our east property line.

The fifty feet should never have been on our east side to begin with. It should have been on our west side as a buffer between our residential zoned property and the industrial zoned property on our west side. As a result we now have a parcel zoned R1 butting up to an industrial property. We also now own a parcel zoned residential which is useless as a building lot. Mr. Yelle and Ms. Tina Fuller visited this property when we were trying to find the fifty feet that didn't exist. They are both very familiar with the fact that this parcel is not a good site to build a home, because of the properties that adjoin it, namely, Timber Crest and Marquette Fence Company.

It is with these thoughts in mind that I am requesting this parcel be rezoned to industrial or commercial. We are willing to set aside fifty feet as a buffer between us and the residential property on our east side.

I respectfully request that you rezone this parcel so it can be used as a source of revenue for Chocoley Township, rather than a vacant parcel that will generate very little revenue for the Township.

Mr. Beckman also stated in his letter that it is his hope that the above is enough background to make a decision on this matter. If this is not acceptable, he is requesting that the Planning Commission table the hearing until May, 2009 when he returns from Florida.

V. PUBLIC COMMENT

Joseph Uren, 116 Dana Lane, commented that he is not in favor of any more property in this area being zoned as industrial or commercial due to issues with the existing businesses. Mr. Uren voiced his concern that he believes Timbercrest is burying illegal items in their landfill and has even brought pictures to the Township in the past to no avail.

Chuck Hudson, 104 Dana Lane, commented that he does a lot of walking in the area and has seen batteries, garbage, etc. on a trailer behind Timbercrest and then shortly thereafter it was gone. Mr. Hudson supports Mr. Uren's thinking that things are being buried illegally in the landfill behind Timbercrest.

Ms. Thum will follow-up on these concerns with staff.

VI. OLD BUSINESS

A. RECREATION PLAN UPDATE

Jennifer Thum reported that she attached a draft copy of the proposed Recreation Survey that she hopes can go out to the Township of Chocoley residents this year. She stated that work has been started on the Township's recreation plan and at next month's meeting she will show what has been put together so far in the hopes of getting some input. Please review the draft survey and let her know what you think. Any feedback would be appreciated. Ms. Thum also explained that she would like to send this out with the tax bills in the Spring/Summer. She is also working on trying to get the survey on the Township website where it can be filled in and submitted. The survey will also be announced in the Township Newsletter, at the CABA meetings, and forms will be available at the Township Hall.

Commissioners also suggested that Northern Michigan University be contacted to see if one of their classes might be interested in taking this survey on as a class project. Jennifer Thum will contact Northern Michigan University about this and report back.

B. TOP PRIORITIES 2009

Jennifer Thum requested the Commission member's suggestions for the Top Priorities List for 2009. The 2009 priorities are as follows:

1. Better playground equipment for the existing playgrounds in the Township.
2. Camping by the Marina – Jennifer Thum reported that there will be 2 designated camping spots by the Marina.
3. Pocket Parks – Possibly one by the Township Hall's Pavillion and/or a pocket park with a plaque describing the history of Chocloy Township.

The Commissioners will contact Jennifer Thum with more ideas pertaining to the Top Priorities for 2009.

VII. NEW BUSINESS

A. REZONING #142

Jennifer Thum reported that the applicants, William Beckman and Glenn and Dorothy Beckman have petitioned to amend the Chocloy Township Zoning Ordinance to rezone the following described parcel of property from the current zoning classification of "R-1" (Residential) to "I" (Industrial) or "C" Commercial.

STAFF COMMENTS: (See attached "STAFF/FILE REVIEW – SITE DATA AND ANALYSIS) and the Zoning Administrators report.

Estelle DeVooght questioned this request as she believes this was addressed in the past 3 or 4 years and there was a discrepancy pertaining to a 50 to 75 ft piece of property that did not have a deed.

The Commissioners asked Jennifer Thum to research this piece of property and see if there is a tax number or if the tax description matches the legal description. She will also research past meeting minutes pertaining to a request to develop this piece of property (possibly in 2004).

Andy Sikkema, moved Ken Tabor, seconded, that following the review of Rezoning Request #142, and the Staff/File Review, and holding a public hearing, the Planning Commission recommends to table Rezoning Request #142 until the May, 2009, Planning Commission meeting as long as Mr. Beckman can provide proof of property ownership for the entire parcel being requested to be rezoned.

Ayes 6. Nays 0. Motion approved to table this until the May, 2009 meeting.

B. DISPOSING OF TREES AND STUMPS

Jennifer Thum reported that she had a discussion with Commissioner Andy Smith and he brought up a topic for discussion. Mr. Smith was wondering if anyone knew where and how to properly dispose of trees and their stumps. Currently, contractors can take them to the landfill, but that does get expensive. Ms. Thum reported that she will contact the MSU Extension office and the Superior Watershed Group for their thoughts on this subject.

Ms. Thum reported that she contacted a few different agencies and asked if they know how people are disposing of their trees and stumps. The answers she received were that people bury them to let them decompose and they obtain a burning permit to burn them.

Ms. Thum asked the Commissioners for any thoughts or suggestions. The commissioners in attendance were not aware of any ordinance that addresses this or of any other options that could be looked into at this time.

C. SIGN ORDINANCE

Jennifer Thum reported that after a discussion with Commissioner Andy Sikkema about the current DNR LED sign, he wanted to know where the Township Ordinance stands on this subject. The Township Ordinance states that, “No sign except time and temperature and similar signs shall have blinking, flashing, fluttering lights, exposed bulbs or other illuminating devices which have a changing light intensity, heightens or color, or any form of animation or moving device.” If the Planning Commission wishes, Ms. Thum will research other ordinances that cover this subject as well. Ms. Thum also reported that looking at the sign ordinance she can think of a situation that happened downstate and in Marquette Township involving the size of flags. Ms. Thum would like to research other ordinances that restrict the size of American flags at commercial establishments. She stated that if you drive by Perkin’s Restaurant in Marquette Township there is a huge American flag, which she thinks was not put up to be patriotic, but with the hopes to attract more customers by a huge sign (flag). The Marquette Township flag makes a lot of whipping or snapping noises which disturbs adjacent businesses and residents. Ms. Thum also explained that when she worked at a previous Township the sign ordinance did address the size of flags in relationship to the building. Ms. Thum is asking for support to research ordinances that do restrict the size of flags and bring them to the Planning Commission next month.

The Commissioners discussed that the Township doesn’t like large led signs as they are too much of a distraction to drivers. The Commissioners also approved for Ms. Thum to research and present at the next meeting, draft language for review pertaining to the size of flags in other areas. Follow-up at the next meeting.

D. MODEL RIPARIAN BUFFER IMPLEMENTATION PLAN

Jennifer Thum reported that enclosed in the meeting packet is the sample Riparian Buffer Plan that the Superior Watershed Group put together. A riparian buffer is a vegetated area near a stream, usually forested, which helps shade and partially protect a stream from the impact of adjacent land uses. It also plays a key role in increasing water quality in associated streams, river, and lakes, thus providing environmental benefits. Ms. Thum asked the Commission members if they would like to adopt something similar to their plan, to let her know and she will set something up with the Superior Watershed Group.

Albert Denton stated that he feels that this is usually incorporated into the site review and doesn’t feel there is a need to explore this further.

Ken Tabor stated he wouldn’t mind hearing a presentation from the Superior Watershed Group.

Jennifer Thum will contact the Superior Watershed Group to see if they are willing to attend the next meeting and provide a presentation.

VIII. PUBLIC COMMENT

David Blondeau, 30 N. Tracie, stated that he is a proponent for additional commercially zoned land in the Township of Chocolay. Mr. Blondeau stated that he feels commercially

zoned property in the Township is very limited and he fully supports additional zoned commercial property in the Township. Mr. Blondeau also stated that the old building on the Blondeau Trucking property is tentatively scheduled to come down by the end of February. He stated that he wanted to keep the Commission up-to-date on the status of the construction project.

IX. COMMISSIONER'S COMMENT

Andy Sikkema inquired about the subcommittee to discuss alternative energy.

Jennifer Thum asked if those interested in discussing this could come a half hour early for the March 9th meeting and this can be discussed then. Ms. Thum will also put a reminder in the next meeting packet.

X. DIRECTOR'S REPORT

Ms. Thum reported that the offer of land that was going to be given to the Township of Chocolay on Kawbawgam Road has been rescinded.

Ms. Thum reported that there is a 20 acre plot and a 40 acre plot that the State of Michigan owns on Kawbawgam Road and they are looking at disposing of it. Part of this land is along Lake Kawbawgam. Ms. Thum reported that the Township has put a request in for it. Ms. Thum will keep the Commission informed.

Ms. Thum reported that Northern Michigan University was given the Chocolay Downs Golf Course. Ms. Thum reported that all approved permits for the proposed development are now null and void. Northern Michigan University is looking at trying to still put a restaurant in sometime in the future, but they would still need to go through the Planning Commission process.

Ms. Thum reported that she and Randy Yelle are working on approximately 10 amendments to the Zoning Ordinance to be presented in the future.

Ms. Thum reported that there are two Seminars scheduled in the near future pertaining to Planning and Zoning. If anyone is interested, let Ms. Thum know as the Township will pay for this Seminar.

Ms. Thum reported they are looking at funding for the Chocolay Bridge.

Ms. Thum also reported that the Township has free low wattage fluorescent light bulbs available for low income families who live in the Township.

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Planning and Zoning news, September 2008 and November 2008
- B. Marquette Township Planning Commission Minutes 12-10-08

XII. ADJOURNMENT

Al Denton, moved, Ken Tabor, seconded, to adjourn the meeting as there was no further business to address. The meeting adjourned at 9:00 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
Monday, March 9, 2009**

I. MEETING CALLED TO ORDER AT 7:33 PM/ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Ken Tabor,
Andy Smith, Steve Kinnunen, Kendall Milton

Absent: Andy Sikkema

Staff Present: Randy Yelle (Zoning Administrator), Tom Murray (Community Development Coordinator), Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF FEBRUARY 9, 2009 MEETING MINUTES

Ken Tabor motioned to approve the February 9, 2009, meeting minutes as written, seconded by Steve Kinnunen.

Ayes 5. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Steve Kinnunen motioned to approve the agenda as written for March 9, 2009, seconded by Ken Tabor.

Ayes 5. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

No public hearing(s) scheduled.

V. PUBLIC COMMENT

No public present.

VI. OLD BUSINESS

A. TOP PRIORITIES 2009

Staff provided the Top Priorities for 2009 list in the meeting packet. The list consists of the following:

- Pocket Park
- Bike Path extension to residential areas – M-28 to Timberlane and Cherry Creek Road., West of the US 41/M-28 Intersection
- Children's Playground, similar to Kid's Cove in Mattson Park
- ORV Trails
- Grants for an independent Water System, and possibly a Sanitary Sewer System
- Recreation Plan Update – Preserve our current infrastructure, improvements to serve citizens for the next 5 years, and improvements to attract future residents
- Ordinance Updates – To concur with today's technology (Signs), Alternative Energy sources (Wood Boilers, Wind Generators, Solar Energy, Bio Fuel production).
- Improve business district aesthetics and community theme

The Commission members had no additions at this time.

VII. NEW BUSINESS

A. ZONING AMENDMENTS

#1 **Amendment #34-09-01** – Multi-Family Residential District (MFR);

Section 4.3: (D) 1:

Existing language:

1. Density is limited to seven homes per acre.

Proposed amended language:

2. Density is limited to *five* homes per acre.

Ken Tabor motioned seconded by Kendall Milton to approve the proposed amended language to five homes.

Ayes 5. Nays 0. Motion carried.

#2 **Amendment 34-09-02** – Agriculture/Forestry (AF); Section 4.7 & 4.4:

Parks were completely omitted from the AF district. In the old zoning Ordinance; Parks were a permitted use within the RP district and a conditional use within the RR-2 district.

Proposed additions:

1. Add to AF Section 4.7 (C) 11 *Parks*
2. Add to WFR Section 4.4 (C) 7. *Parks*

Ken Tabor motioned seconded by Steve Kinnunen to approve the proposed additions listed above.

Ayes 5. Nays 0. Motion carried.

#3 **Amendment 34-09-03** – Agriculture/Forestry (AF); Section 4.7:

Kennels were completely omitted from the AF district, in the old zoning ordinance; kennels were a condition use within the RR-2 & RP districts.

Proposed addition:

1. Add to Section 4.7 (C) 12 *Kennels*

Steve Kinnunen motioned, seconded by Ken Tabor to add the proposed addition listed above.

Ayes 5. Nays 0. Motion carried.

#4 **Amendment 34-09-04** – Height and Placement Regulations; Section 6.1: (Schedule of Regulations)

Existing language:

	District	Front	Side	Rear
1.	MFR	30	30	30

Proposed language:

2.	MFR	30	<i>10</i>	<i>35</i>
----	-----	----	-----------	-----------

Steve Kinnunen motioned, seconded by Ken Tabor to approve the proposed language to bring this into alignment with the rest of the ordinance.

Ayes 5. Nays 0. Motion carried.

#5 **Amendment 34-09-05** – Height and Placement Regulations; Section 6.1:
(Schedule of Regulations)

Existing language:

	District	Minimum Lot Size	Minimum Lot Width
1.	MFR	20 Acres	None

Proposed amended language:

2.	MFR	<i>2 Acres</i>	<i>200 feet</i>
----	-----	----------------	-----------------

Ken Tabor motioned, seconded by Steve Kinnunen to table this until the next meeting.

Ayes 5. Nays 0. Table until the next meeting.

#6 **Amendment 34-09-06** – Outdoor Wood Burning Boilers and Appliances;
Section 6.5: (Conditions of Approval) Section 6.5 (A) and (B) 1. B

Existing language:

1. Minimum chimney height of 15 feet, measured from the grade to chimney top or 2 feet higher than the nearest neighboring principal dwelling within 1000 feet, whichever is higher.

Proposed language:

1. Minimum chimney height of 15 feet, measured from the *natural land* grade to chimney top *or higher* than the nearest neighboring principal dwelling within 350 feet, whichever is higher.

Steve Kinnunen motioned, seconded by Ken Tabor to table this to incorporate Andy Smith's suggested language in to the proposed language.

Ayes 5. Nays 0. Tabled until the next meeting.

#7 **Amendment 34-09-07** – Commercial Vehicle Parking in Residential Districts;
Section 6.11:

This paragraph was completely omitted from this section, and should not have been as this paragraph was not addressed. Although, whereas this action was not questioned and/or appealed within the required timeframe, it is my opinion that the newly adopted zoning ordinance is a legal and binding ordinance.

This paragraph is no longer a legal part of the zoning ordinance, therefore, if the Board wants it in the zoning ordinance, it must be adopted as a new amendment to the Zoning Ordinance.

Proposed reinstatement of this paragraph:

1. (C) One (1) 27 foot or smaller truck or van may be parked at a residence in all other residential zoning districts without Township review or approval.

Proposed additions:

2. (A) approval required, *subject to the following subsections and limitations.*
3. (E) *In the event of a conflict or contraindication between the above provisions of the Zoning Ordinance and Ordinance number 55, being the Vehicle and Trailer Parking and Storage Ordinance, the terms of the Zoning Ordinance shall prevail.*

If adopted, the action will move the existing (C) to (D).

Steve Kinnunen motioned, seconded by Ken Tabor to approve the proposed reinstatement paragraph and the proposed additions as written above.

Ayes 6. Nays 0. Motion carried. (Estelle DeVooght arrived late)

#8 **Amendment 34-09-08** – Nonconforming Uses and Structures; Article XIV, Sections 14.1 & 14.2:

The Zoning Board of Appeals shall not issue use variances, (Chocolay Township Zoning Ordinance Article XV, and per the Michigan Zoning Enabling Act; Act 110 of 2006) nor can the Planning Commission.

The Township Board, would amend the Zoning Ordinance to include the use that the Township Board may deem should be allowed within a designated Zoning District. Therefore, the Township Board would not be approving or issuing a use variance, but amending the ordinance, per MZEA, to accomplish the desired action or in this case, the desired used within said district(s).

Proposed action:

1. Remove any and all reference to and regarding USE VARIANCES.

No motion was made by the Commission members.

Ayes 6. Nays 0. Motion failed.

#9 **Amendment 34-09-09 – 1. Article II, Definitions:**

1. Add to definitions “Park”

Proposed definition:

Park, A noncommercial not-for-profit, parcel of land, with or without a Structure, designed to serve the recreational needs of the residents, including but not limited to playgrounds, sport fields, game courts, beaches, trails, picnicking areas, and leisure time activities.

Ken Tabor motioned, seconded by Kendall Milton to approve the above proposed definition.

Ayes 6. Nays 0. Motion carried.

#10 **Amendment 34-09-10**

1. Article II, Definitions:

Add to definition regarding “Kennels”

Existing language:

Means any activity involving the permanent or temporary keeping or treatment of four or more adult dogs, cats or any combination of, other than ordinary agricultural activities

Proposed amended language:

Means any activity involving the permanent or temporary keeping or treatment of four or more domestic pets, including adult dogs or cats, or any combination of such animals exceeding three in number, for other than ordinary agricultural activities.

No motion was made by the Commission members.

Ayes 6. Nays 0. Motion failed.

#11 **Amendment 34-09-11**

1. Article XVIII. Signs and Fences

Add 18.12 from “Fences” to “Flags”

Proposed language:

18.12 Flags

(A) *Flags, other than corporate, commercial or advertising flags shall be permitted in all residential zoning districts, on developed residential lots. Flags shall be subject to the following regulations:*

- 1. *Flags shall meet the sign setbacks within Section XVIII and the height limits for structures within Section VI.***
- 2. *The flag of the United States of America, as well as other flags, displayed or flown out-of-doors, shall not exceed a total area of twenty-four (24) square feet.***
- 3. *Up to three (3) flags of any combination but not more than one (1) corporate, commercial or advertising flag shall be permitted on a single lot, shopping center, or business.***
- 4. *No flag shall be displayed with the flag of the United States of America, which is of greater area or which is placed at a greater or same height as that of the flag of the United States of America flag.***
- 5. *No corporate, commercial or advertising flag shall be located on any lot other than the business lot that the flag is advertising.***
- 6. *All out-of-doors flags shall be displayed from a pole or other mounting device which is permanently affixed to the ground or a building.***

No motion was made by the Commission members.

Ayes 6. Nays 0. Motion failed.

#12 **Amendment 34-09-12:**

Add to Article II Definitions:

After “Family Day Care Home”:

Proposed language:

Flag: Any fabric or other flexible material attached to or designed to be flown from a flagpole or similar device or any such device attached to a building or structure for display out-of-doors.

Flag, Business: A flag displaying the name, insignia, emblem, logo, or the like, of a business and/or corporation.

No motion was made by the Commission members.

Ayes 6. Nays 0. Motion failed.

#13 **Amendment 34-09-13:**

Add to Article VI: Add 6.1 after “Said structure(s)”

Proposed language:

NOTE: Lots of less than 20 acres, but not less than 5 acres within the AF district prior to the adoption of this Ordinance, are legal nonconforming. April, 2008.

Steve Kinnunen motioned, seconded by Estelle DeVooght to approve the proposed language as stated above.

Ayes 6. Nays 0. Motion carried.

#14 **Amendment 34-09-14:**
Add to Article XVIII: 18.4 Remove (C)

Current language:

(C) The flag of any state or nation respectfully displayed.

No motion was made by the Commission members.

Ayes 6. Nays 0. Motion failed.

#15 **Amendment 34-09-15:**
Add to section XI after Building Grades fill to increase height.

11.12 Outside Lighting

- A. On site lighting shall be directed away from residential properties and public or private streets.
- B. Light emitted in non-residential developments which are adjacent to residential development(s) shall be compatible with the character of the adjacent residential areas.
- C. Information shall be supplied on the style, manufacturer's part number, height direction, location, wattage, type of bulb and intensity of outside lighting on the final site plan for final approval.
- D. Building Lighting:
 - a) No building-mounted or pole mounted floodlights are allowed. Signs may be lit with floodlights provided the light is focused downward on the sign and does not spill beyond the sign. Shields or adjustable louvers shall be required on floodlights to control beam spread.
 - b) Landscape lighting shall be allowed, provided shielding and louvers are utilized to limit lighting to objects only. Lamp wattage shall be low as possible to illuminate the object without causing glare on the site or neighboring property.
 - c) Gas station canopy lights shall be provided with flat lenses to limit glare. Illuminant levels shall comply with Illuminating Engineering Society standards.
 - d) Lighting standards in parking shall have 20 foot maximum mounting height.
 - e) Searchlights, strobes, lasers or similar high intensity light for outdoor advertisement or entertainment are prohibited.
 - f) Lights mounted on buildings shall not be a flashing, or moving or intermittent type.

Ken Tabor motioned, seconded by Estelle DeVooght to table this item so staff can further work on the language for this item and bring it to the next meeting for review.

Ayes 6. Nays 0. Table until the next meeting

B. MTA CONFERENCE

Jennifer Thum reported that she provided a registration form in the meeting packet for the MTA Planning and Zoning Conference in Escanaba on March 31, 2009. If members were interested in attending, they are to let Township staff know by Monday, March 9, 2009.

VIII. PUBLIC COMMENT

No public present.

IX. COMMISSIONER'S COMMENT

Al Denton stated his appreciation to Andy Smith for all the research he's done pertaining to Alternative Energy.

Al Denton reported that he will be resigning from the Zoning Board of Appeals and the ZBA will need a member from the Planning Commission to take his place. If anyone is interested, please contact Randy Yelle or Jennifer Thum.

Al Denton also reported that a Planning Commission and Township Board joint meeting will be arranged for early May, 2009, at the request of a Township Board member. Jennifer Thum will provide further information and will be putting together an agenda for this meeting.

X. DIRECTOR'S REPORT

Ms. Thum provided a written update as she is unable to attend this meeting due to attending an Engineering Conference for Non-Engineers in Wisconsin. Ms. Thum's hope is that she will come back with a better understanding of storm water, floodplains, drain fields, streets and traffic engineering and street maintenance.

Ms. Thum reported that Geri Larson from the Superior Watershed Association will be doing a presentation at our April meeting to talk about riparian buffers and other items that our township could do to ensure the longevity of our dunes and water courses.

Ms. Thum reported that Township staff is still working on the Recreation Plan. They are also working on putting together a grant application to build a pocket park with some playground equipment at the Township's marina site. Speaking with the DPW crew, they felt that a pocket park at the Township Office location might be too close to US 41. Ms. Thum would still like to look into some type of park at our Township Office Location.

Ms. Thum reported that she has spoken with Ron Yesney of the DNR and apparently, they are working on updating the Rail Road overpass on M-28. The Township has no plans for this at this time. When more information is received it will be forwarded to everyone.

Ms. Thum spoke with Randy Yelle pertaining to the issues with tires at Timbercrest. Ms. Thum reported that Mr. Yelle stated that when he first started at the Township, the Timbercrest site was a problem and since then, they have cleaned things up. Ms. Thum reported that she and Mr. Yelle plan to visit the site this summer to make sure everything is cleaned up.

Tom Murray also reported that supervisors from the Marquette Branch Prison and the DNR will be holding a meeting to discuss a possible wind generator being placed between the Marquette Branch Prison and the DNR Office on U.S. 41. The meeting will be held on April 8th. Township staff will attend this meeting and report back the information obtained.

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

A. Planning and Zoning news, January and February, 2009.

XII. ADJOURNMENT

Ken Tabor, moved, Steve Kinnunen, seconded, to adjourn the meeting as there was no further business to address. The meeting adjourned at 8:30 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
Monday, April 13, 2009**

I. MEETING CALLED TO ORDER AT 7:30 PM/ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Dr. Ken Tabor,
Kendell Milton, Andy Sikkema

Absent: Andy Smith, Steve Kinnunen,

Staff Present: Jennifer Thum (Planning and Community Development), Laurie
Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF MARCH 9, 2009 MEETING MINUTES

Ken Tabor motioned to approve the March 9, 2009, meeting minutes as written, seconded by Estelle DeVooght.

Ayes 5. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Andy Sikkema motioned to approve the agenda as written for April 13, 2009, seconded by Kendell Milton.

Ayes 5. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

No public hearing(s) scheduled.

V. PUBLIC COMMENT

No public present.

VI. PRESENTATION

A. SUPERIOR WATERSHED GROUP

Ms. Geri Larson from the Superior Watershed Group provided a short presentation. Ms. Larson stated that The Superior Watershed Group is a nonprofit organization that serve the entire Upper Peninsula pertaining to buffers, watershed protection, etc. Ms. Larson stated that they have served Chocolay Township quite a bit in the past with projects such as park improvements, erosion control, environmental conservation and restoration. She also stated that there are already some buffers and protections in place within the Township. She suggested that the Township look into applying for the DEQ Coastal Plan that would then be applied to creating a Natural Features Inventory for the Township. This type of inventory could help the Township staff better evaluate site plans, assist in updating the comprehensive plan, the zoning plan, and natural resources overlay. Ms. Larson will leave information pertaining to various types of funding with

Jennifer Thum to provide to the Township staff.

VII. OLD BUSINESS

A. MOYLE CONSTRUCTION

Jennifer Thum explained that she recently inspected the McDonalds/Gateway Plaza site with our engineering consultant, Mike Pond, to make sure everything was proceeding as approved. It was observed that construction was exceeding past the spot shown on the approved plans. Township records show that the original site plan signed and dated November 6, 2006, was not submitted to the County Building Department and was not what Moyle and TriMedia believed they had approval for. Jennifer reported that she, Mike Pond, and George Meister from TriMedia met to try to resolve this issue. Ms. Thum reported that the group agreed to disagree in regards to the final approval given and that TriMedia should approach the Township Planning Commission for final approval of Phase I so work can begin on this phase of the project.

Phase I consists of McDonalds, a financial institution with a drive-thru and seven other buildings. Phase II is going to consist of buildings east of the culvert. TriMedia and Moyle Construction are not sure of what the layout for Phase II will actually look like, so this will not be on the agenda for FINAL approval. At this point TriMedia and Moyle Construction are only seeking approval for Phase I.

Ms. Thum reported that with exception to the conditions placed with the suggested approval motion, TriMedia has provided all the documentation we need for Phase I's final approval. Ms. Thum reported that she doesn't see any problems with Phase I. As part of the conditions, Ms. Thum would like to recommend that our engineering consultant review the site for grading, landscaping and any other concerns.

Al Denton moved, Ken Tabor, seconded, that the Chocolay Township Planning Commission grants final approval for Phase I of SP-05-01 McDonald's/Gateway Plaza. Plans dated April 6, 2009 consisting of sheets 1.0, C2.0, C3.0, C4.0 referring to keynotes and landscaping only and sheet C5.0 are the approved site plans accompanied with the following conditions:

1. The developer submits an illumination plan with site specific lighting features and specifications. These plans and specifications are to be reviewed and approved by Township staff and its consulting engineer.
2. Elevations are to be submitted, reviewed and approved to ensure that building height does not exceed 30'.
3. The developer will adhere to the 30' required buffer adjacent residential zoning district.
4. Plans will be reviewed and approved by the Township's consulting engineer.

Ayes 5. Nays 0. Motion approved.

B. ZONING AMENDMENTS

Jennifer Thum reported that Township staff is bringing to the Planning Commission the proposed zoning amendments that were either tabled or denied at the last meeting. Ms. Thum reported that some changes were made to the wood boiler and the flag proposals as follows:

#1 Amendment 34-09-05 – Height and Placement Regulations; Section 6.1:
(Schedule of Regulations)

Existing language:

	District	Minimum Lot Size	Minimum Lot Width
1.	MFR	20 Acres	None

Proposed amended language:

2.	MFR	2 Acres	200 feet
----	-----	----------------	-----------------

Al Denton moved, seconded by Ken Tabor to table this until the next meeting so Jennifer Thum can work on the language and e-mail the language to everyone for their input. Revisit at the next meeting.

Ayes 5. Nays 0. Motion tabled until the next meeting.

#2 Amendment 34-09-06 – Outdoor Wood Burning Boilers and Appliances;
Section 6.5: (Conditions of Approval) Section 6.5 (A) and (B) 1. B

Existing language:

1. Minimum chimney height of 15 feet, measured from the grade to chimney top or 2 feet higher than the nearest neighboring principal dwelling within 1000 feet, whichever is higher.

Proposed language:

- a. A setback of 75 feet from any and all lot/property lines, easements, and right-of-ways;
- b. The outdoor wood-fired boiler shall be located at least 300 feet from the nearest residential dwelling, not served by the furnace;
- c. If the outdoor wood-fired boiler is located within 500 feet of the nearest residential dwelling, the chimney height measured from grade to the chimney top must be a minimum of 2 feet higher than the nearest neighboring principal dwelling;
- d. No fuel other than the natural wood without additives, wood pellets without additives, coal, and agricultural seeds in their natural state, may be burned;
- e. Outdoor wood-fired boilers shall not be located in the front yard;
- f. Granting of a zoning compliance permit, constitutes an agreement between the landowner and Chocolay Township, that the zoning administrator, at any reasonable time, may enter the property for purpose of inspection to determine compliance with conditions;
- g. If the outdoor wood burning appliance meets the Phase I EPA standards, the outdoor wood boiler located within 300 feet of the nearest residential dwelling must have a chimney height measured from grade to the chimney top must be a minimum of 2 feet higher than the nearest neighboring principal dwelling;
- h. If the outdoor wood boiler meets the Phase II EPA standards, a setback of 50 feet from all lot/property lines, easements, and right-of-ways. The outdoor wood-fired boiler shall be located at least 200 feet from the nearest residential dwelling not served by the boiler. There are no chimney height requirements for a Phase II outdoor wood boiler.
- i. “Best Burn Practices” as issued by the Environmental Protection Agency shall be followed by all applicant utilizing outdoor wood boilers.

Estelle DeVooght moved, Ken Tabor seconded, to approve the proposed language for Amendment 34-09-06.

Ayes 5. Nays 0. Motion carried.

#3 Amendment 34-09-08 – Nonconforming Uses and Structures; Article XIV, Sections 14.1 & 14.2:

The Zoning Board of Appeals shall not issue use variances, (Chocolay Township Zoning Ordinance Article XV, and per the Michigan Zoning Enabling Act; Act 110 of 2006) nor can the Planning Commission.

The Township Board, would amend the Zoning Ordinance to include the use that the Township Board may deem should be allowed within a designated Zoning District. Therefore, the Township Board would not be approving or issuing a use variance, but amending the ordinance, per MZEA, to accomplish the desired action or in this case, the desired use within said district(s).

Proposed action:

1. Remove any and all reference to and regarding USE VARIANCES.

Ken Tabor moved, Al Denton, seconded, to approve the proposed language for Amendment 34-09-08 as written.

Ayes 5. Nays 0. Motion carried.

#4 Amendment 34-09-10

1. Article II, Definitions:

Add to definition regarding “Kennels”

Existing language:

Means any activity involving the permanent or temporary keeping or treatment of four or more adult dogs, cats or any combination of, other than ordinary agricultural activities

Proposed amended language:

Means any activity involving the permanent or temporary keeping or treatment of four or more domestic pets, including adult dogs or cats, or any combination of such animals exceeding three in number, for other than ordinary agricultural activities.

After a second review, Al Denton moved, Ken Tabor seconded, to approve the proposed language as written for Amendment 34-09-10.

Ayes 4. Nays 1. Motion carried.

#5 Amendment 34-09-11

1. Article XVIII. Signs and Fences

Add 18.12 from “Fences” to “Flags”

Proposed language:

18.12 Flags

(A) Flags, other than corporate, commercial or advertising flags shall be permitted in all residential zoning districts, on developed residential lots. Flags shall be subject to the following regulations:

- 1. Flags shall meet the sign setbacks within Section XVIII and the height limits for structures within Section VI.**
- 2. Up to three (3) flags of any combination but not more than one (1) corporate, commercial or advertising flag shall be permitted on a single lot, shopping center, or business.**
- 3. No flag shall be displayed with the flag of the United States of America, which is of greater area or which is placed at a greater or the same height as that of the flag of the United States of America flag.**
- 4. No corporate, commercial or advertising flag shall be located on any lot other than the business lot that the flag is advertising.**
- 5. All out-of-doors flags shall be displayed from a pole or other mounting device which is permanently affixed to the ground or a building.**

Jennifer Thum informed the Commission members that she removed anything of restricting the size of the American flag. The only language that remains pertains to not having another flag be taller or larger than the American flag.

Ken Tabor moved, Kendell Milton seconded, to approve the proposed language as written for Amendment 34-09-11.

Ayes 5. Nays 0. Motion carried.

#6 Amendment 34-09-12:
Add to Article II Definitions:
After "Family Day Care Home":

Proposed language:

Flag: Any fabric or other flexible material attached to or designed to be flown from a flagpole or similar device or any such device attached to a building or structure for display out-of-doors.

Flag, Business: A flag displaying the name, insignia, emblem, logo, or the like, of a business and/or corporation.

Andy Sikkema moved, Ken Tabor seconded, to approve the proposed language As written for Amendment 34-09-12.

Ayes 5. Nays 0. Motion carried.

#7 Amendment 34-09-14:
Add to Article XVIII: 18.4 Remove (C)
Current language:

(C) The flag of any state or nation respectfully displayed.

After a second review, Kendell Milton moved, Ken Tabor seconded, to approve the removal of Amendment 34-09-14, Article XVIII: 18.4 (C).

Ayes 5. Nays 0. Motion carried.

#8 Amendment 34-09-15:
Add to Section XI after Building Grades fill to increase height.

11.12 Outside Lighting

- A. On site lighting shall be directed away from residential properties and public or private streets.
- B. Light emitted in non-residential developments which are adjacent to residential development(s) shall be compatible with the character of the adjacent residential areas.
- C. Information shall be supplied on the style, manufacturer's part number, height direction, location, wattage, type of bulb and intensity of outside lighting on the final site plan for final approval.
- D. Building Lighting:
 - a) No building-mounted or pole mounted floodlights are allowed. Signs may be lit with floodlights provided the light is focused downward on the sign and does not spill beyond the sign. Shields or adjustable louvers shall be required on floodlights to control beam spread.
 - b) Landscape lighting shall be allowed, provided shielding and louvers are utilized to limit lighting to objects only. Lamp wattage shall be low as possible to illuminate the object without causing glare on the site or neighboring property.
 - c) Gas station canopy lights shall be provided with flat lenses to limit glare. Illuminant levels shall comply with Illuminating Engineering Society Standards.
 - d) Lighting standards in parking shall have 20 foot maximum mounting height.
 - e) Searchlights, strobes, lasers or similar high intensity light for outdoor advertisement or entertainment are prohibited.
 - f) Lights mounted on buildings shall not be a flashing, moving or intermittent type.

Ken Tabor moved, Estelle DeVooght seconded, to approve the proposed language as written for Amendment 34-09-15.

Ayes 5. Nays 0. Motion carried.

#9 Amendment 34-09-16

Remove from Article IV; Sections 4.1 C, 4.2 C, 4.3 B, 4.4 C, and 4.6 B (on lots of 5 acres or more)

Proposed language:
Outside wood boilers, including conditions of approval.

Andy Sikkema moved, Kendell Milton seconded, to approve the removal of Amendment 34-09-16, Article IV; Sections 4.1 C, 4.2 C, 4.3 B, 4.4 C, and 4.6 B (on lots of 5 acres or more).

Ayes 5. Nays 0. Motion carried

VIII. NEW BUSINESS

A. KENDELL MILTON APPOINTMENT TO ZBA

Jennifer Thum reported that at the previous meeting, the Planning Commission Chair, Mr. Al Denton, resigned from the Zoning Board of Appeals (ZBA). As a result,

someone needs to be appointed from the Planning Commission to serve on the Zoning Board of Appeals. Mr. Kendell Milton has volunteered to serve on the ZBA as the Planning Commission represented member.

Al Denton moved, Ken Tabor seconded, that we the Chocolay Township Planning Commission appoint Mr. Kendall Milton to serve on the Zoning Board of Appeals as our representative. Mr. Milton's term will be from April 13, 2009 to May 24, 2011.

Ayes 5. Nays 0. Motion carried.

B. CHOCOLAY DOWNS

Jennifer Thum reported on the high points of the Chocolay Downs meeting held on April 4, 2009 as follows:

- Water Testing – The Township will provide water kits and the location of each well to NMU. NMU will gather the water samples at a minimum once a year with staff from the Township. NMU will conduct the water test at their lab and send the results to Chocolay Township.
- Police Protection – Police Chief Greg Zybert discussed that the vandalism that usually occurs is in the rear of the property by greens 12, 13, 14, 15 and the individual tee boxes. The previous owners have installed gates and natural barriers to try to prevent 4-wheelers and snowmobilers from trespassing. There was also discussion pertaining to new wireless technology that will be installed around Chocolay Township and a possible antenna for that system being installed around the golf course and clubhouse. Also, to help with security at the golf course, NMU will install security cameras that the Township police could watch via the wireless technology. Chief Zybert stated that this would be especially helpful since the Chocolay Township police would be the first to respond to any incidents at the golf course and detain the individual(s) until NMU Public Safety could arrive.
- Fire Protection – Chocolay Township Fire Chief, G. Johnson spoke about response time. Mr. Art Gischia asked if the Fire Department would have to use the ponds on the golf course if needed. Chief Johnson explained that this should not be an issue as there are several water pumps not far from the course and the Township has a portable pump they could use if needed. There was discussion about the future clubhouse/restaurant. NMU will provide the Fire Department with a list of the chemicals they have and their location.
- Future Development – NMU and Chocolay Township discussed the current and future signage and the possibility of a new clubhouse. Chocolay Township will provide NMU with GIS layers, traffic study, sign ordinance and any other information pertaining to Chocolay Downs. NMU has talked to Lansing about the liquor license transfer and it will be about 6 months before they can utilize this at Chocolay Downs. All NMU golf events have been moved to the course. There is also the possibility of utilizing the course in the winter for cross country skiing and snowshoeing.
- There was also conversation about grant writing. Chocolay Township will look into what types of grants they can write that might aid Chocolay Downs/NMU and our community. Ms. Thum will look into this and get with Mrs. Martha Haynes with the NMU Foundation Department.
- Intern – Professor Haynes has 4 candidates that would work for the position at Chocolay Township. Ms. Thum is to contact Mr. Haynes about meeting these individuals and to hold interviews for the intern position. The intern would help with any grant administration, water testing, and help process any applications for new development such as the liquor license.

IX. PUBLIC COMMENT

No public present.

X. COMMISSIONER'S COMMENT

Al Denton stated that he has concerns pertaining to the Water Testing at the Chocolay Golf Course and feels that Township staff and not an intern should perform these tests. He also suggested that the water testing be sent to another facility for testing so there is no discrepancies or concerns pertaining to this.

Mr. Denton also stated his concern in regards to the "Police Protection" at the Chocolay Golf Course and feels that it should be the decision of Chief G. Zybert, or whomever is on duty, to detain or arrest an individual or individuals who are involved in an incident(s) at the golf course instead of detaining them for NMU Safety to arrive.

XI. DIRECTOR'S REPORT

Jennifer Thum reported that at the joint Planning Commission and Township Board meeting, the members will be asked to review the MDOT plans, proposed zoning amendments and thoughts on a township newsletter. This joint meeting will take place on May 20th, 2009 at 7:00pm.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Planning and Zoning news, March, 2009
- B. Michigan Planner, February, 2009

XIII. ADJOURNMENT

Estelle DeVooght moved, Ken Tabor seconded, to adjourn the meeting as there was no further business to address. The meeting adjourned at 8:40 p.m.

Albert Denton, Chairperson

May 18, 2009

A joint meeting of the Chocolay Township Board and Chocolay Township Planning Commission was held on Monday, May 18, 2009 at the Chocolay Township Office, 5010 U. S. 41 South, Marquette, MI. Planning Commission Chair Denton called the Planning Commission meeting to order and Supervisor Seppanen called the Township Board meeting to order at 7:00 p.m.

TOWNSHIP BOARD.

PRESENT: Greg Seppanen, Arlene Hill, John Greenberg, John Trudeau, Dr. Ken Tabor, Mark Maki, Susan Carlson.

ABSENT: None.

PLANNING COMMISSION.

PRESENT: Estelle DeVooght, Dr. Ken Tabor, Al Denton, Andy Sikkema, Steve Kinnunen, Andy Smith, Kendell Milton.

ABSENT: None.

STAFF PRESENT: Jennifer Thum, Mary Sanders, Brad Johnson, Denny Magadanz, Pat Beck, Gary Heinzelman.

The first item on the agenda was to look at the new fire truck. Both board went out to see the truck and returned at 7:15 pm.

Discussion by both Planning and Township Boards:

- The township has had two large projects this past year, Blondeau has been completed and the site has been cleaned up with two new buildings. The other project is the McDonalds (Gateway Plaza) that is moving along and the plaza will be a nice addition to our township.
- It would be good to have an overview of the comprehensive plan and how the zoning ordinance works with it.
- The Planning Commission and Board looked not allowing any new roads in Chocolay to be private; but instead required that private roads use county road standards when being built. Culs-de-Sac are only allowed to be temporary in Chocolay Township sub-divisions. All sub-divisions must have two outlets.
- Shared driveways are a problem.
- The Planning Commission would like to hear from the Township Board what direction they want the Planning Commission to go in the future.
- The comprehensive plan will be updated again next year.
- The Planning Commission plans for the future and still has to respond to what is currently happening.
- The 2010 census will most likely show an aging population in Chocolay. The Planning Commission should be looking into transportation and housing for the elderly and how to attract the youth.
- The Planning Commission should be looking at highway issues including the proposed tunnel.
- Water should be a concern of this Township, we should be looking at bring water lines from the City of Marquette.

The proposed zoning amendments 34-09-1 through 34-09-16 were looked at by the two boards. The Township web site was discussed, and staff stated that they are looking for any changes or addition the Board would like to see. Andy Sikkema, Planning Commissioner and representative of MDOT explained the 2009-2010 highway improvements. The intersection at M-28 and U S 41 will be realigned in 2009. Patching and sections will be worked on from the Welcome Center to the intersection in 2009. The pedestrian bridge on M-28 and the tunnel on U S 41 will be 2010 projects. The bike trail from the Welcome Center to Carp River will be relocated away from the highway in 2010. Along with all of these projects landscaping will include planting trees with consideration of clear vision for traffic. Planning Director, Jennifer Thum reported on the Coastal Grant Application with a resolution to be presented to the Board later in the meeting.

Commissioner Denton adjourned the Planning Commission portion of the meeting at 8:40 pm.

MINUTES –April 20, 2009.

Tabor moved, Greenberg second that the minutes of the regular meeting held on March 16, 2009 are approved.

AYES: 6 NAYS: 0 MOTION CARRIED.

AGENDA ADDITIONS/DELETIONS.

Tabor moved, Maki second to add Gentz Inc. liquor license to the agenda; as item A under new business.

AYES: 6 NAYS: 0 MOTION CARRIED.

PUBLIC COMMENT.

None.

ACCOUNTS PAYABLE.

Hill moved, Tabor second that bills totaling \$253,995.92 checks numbered 15430– 15465 be approved for payment.

AYES: 6 NAYS: 0 MOTION CARRIED.

Supervisor Seppanen indicated that this set of bills included the pay off on the fire truck. The total bill came in \$5,750.00 higher than anticipated due to alterations and equipment additions.

Tabor moved, Maki second that payroll for March 19, 2009 for \$26,924.20, April 2, 2009 for \$24,947.21, April 8, 2009 for \$6,525.26 and April 16, 2009 for \$28,597.22 be approved for payment.

AYES: 6 NAYS: 0 MOTION CARRIED.

FINANCIAL AND TREASURER’S REPORTS WERE RECEIVED AND PLACED ON FILE.

Trustee Trudeau arrived at 7:10 p.m.

PRESENTATIONS – FY2008 AUDIT.

Mike Grentz from Anderson Tackman presented the FY2008 audit to the Board. It was reported as an unqualified opinion from the Auditors. The Township has six million in net assets and is in good financial shape. The Township did file a deficit report to the State for the early purchase of the fire Truck, noting that the final millage will be collected in the 2010 tax season.

Maki moved, Trudeau second to accept the audit as presented.

AYES: 7 NAYS: 0 MOTION CARRIED.

SUPERVISORS REPORT.

1. We continue to have dialog with NMU on the golf course property. We will have two NMU interns working on projects involving the golf course property.
2. We have scheduled a joint meeting with the Planning commission and the Township Board on May 18, 2009 at 7:00 pm.
3. The Chocloy Trail Bridge money appears to be covered by the State of Michigan.

BOARD MEETING POLICIES.

The Board discussed the Chocloy Charter Township Board Policies and made several changes. The policy will be brought back to the May 18, 2009 meeting with the changes made.

FIRE DEPARTMENT EXPENDITURE REQUEST – TURN OUT GEAR RACKS.

Trudeau moved, Hill second to authorize the Fire Department’s purchase of a turnout gear rack system and accessories from Pomasl Fire for a total of \$6,387.00

- \$3,387.00 from uniforms and accessories 101.340.745
- \$3,000.00 from capital outlay 101.340.957

ROLL CALL:

AYES: Trudeau, Maki, Greenberg, Tabor, Carlson, Hill, Seppanen.

NAYS: None. MOTION CARRIED.

GENTZ INC. LIQUOR LICENSE – ADD ENTERTAINMENT TO CLASS C LICENSE.

Tabor moved, Greenberg second that the request from Gentz, Inc. for a new Class C license with Entertainment Permit to be located at 353 Gentz Road, Marquette, MI 49855, Chocloy Township, Marquette County, is approved. This is being recommended and approved with the understanding

through a written letter from Randy and Cathy Gentz, stating that there will be no adult entertainment of any kind or any activity that would be classified under our township zoning ordinance as a Sexually Oriented Business.

AYES: 7 NAYS: 0 MOTION CARRIED.

ADDITIONAL HOURS DEPUTY TREASURER.
 RESOLUTION AMENDING GENERAL FUND BUDGET FY 2009 AMENDMENT NO. 1
 WAGE AND FRINGE BENEFIT FOR DEPUTY TREASURER INCREASE IN HOURS.
 Greenberg moved, Trudeau second that Whereas, a budget was adopted by the Chocolay Township Board to govern the expenditures of anticipated general fund receipts within the township on December 15, 2008, for the next fiscal year, and, Whereas, as a result of unanticipated changes in revenues and/or needed expenditures, it is necessary to modify the aforesaid budget between revenues and expenditures, Now Therefore, Be It Hereby Resolved, that the aforesaid budget be hereby modified as follows:

EXPENDITURE	PREVIOUS	CHANGE	AMENDED
Treasurer Department			
Salary			
101.253.702	32,007.00	+2,508.00	34,515.00
Other General Government			
Health Insurance			
101.285.925	176,381.00	+2,390.00	178,771.00
Other General Government			
Pension			
101.285.926	64,425.00	+ 251.00	64,676.00
Other General Government			
Social Security			
101.285.945	50,292.00	+ 192.00	50,484.00
Other General Government			
Contingency			
101.285.951	41,950.00	-5,341.00	36,609.00

ROLL CALL:
 AYES: Tabor, Carlson, Hill, Trudeau, Maki, Greenberg, Seppanen.
 NAYS: None. MOTION CARRIED.

ZONING BOARD OF APPEALS PLANNING COMMISSION APPOINTEE.
 Tabor moved, Greenberg second that we the Chocolay Township Board concur with the Planning Commission and appoint Kendal Milton to serve on the Zoning Board of Appeals as their representative. Mr. Milton’s term will be from April 13, 2009 to May 24, 2009.
 AYES: 7 NAYS: 0 MOTION CARRIED.

ASSISTANCE TO FIRE FIGHTERS GRANT REQUEST.
 Tabor moved, Hill second to authorize the Fire Department to apply for two AFG grant requests; one for replacement of the brush fire unit and the second for the purchase of a thermal imager and fit tester. The total amount of the grants will be \$198,000.00 with a department match of \$9,900.00.
 AYES: 7 NAYS: 0 MOTION CARRIED.

BID SPECIFICATIONS FOR BREATHING AIR COMPRESSOR
 Greenberg moved, Tabor second to authorize the Fire Department to seek bids for a complete Breathing Air Compressor System. The fire department will present the Board a bid tabulation and recommendation for award at their regular meeting on May 18, 2009.
 AYES: 7 NAYS: 0 MOTION CARRIED.

EMPLOYEE POLICY MANUAL.
 The Board discussed the policy manual revision and made some changes. The updated changes will be brought back to the Board at the May 18, 2009 meeting.

SCRAP METAL COLLECTION

Greenberg moved, Tabor second that the Chocolay Township Board accepts the bid from Sands Auto Salvage for scrap metal pickup in the Township.

AYES: 7 NAYS: 0 MOTION CARRIED.

TOWNSHIP ROAD RESURFACING RFP.

Bid specifications on the road resurfacing were presented to the Board for information purposes only. This will be brought back to the Board at the May 18, 2009 meeting.

FRED RYDHOLM RESOLUTION.

Maki moved, Greenberg second that

THE CHARTER TOWNSHIP OF CHOCOLAY
Board members, staff, and citizens
Join together to express to Fred Rydholm's
Family, close friends, neighbors and others who's life has been suddenly
Jarred by the call home of Fred to a better land.

As we join our hearts and hands in a solemn salute
To Fred Rydholm as his time of passing has come,
Our lives have benefited because of who he was,
What he was, and he stands a monument and
Inspiration of what a friend and neighbor should be.

In commenting on his own life Fred said "I've never considered myself a writer.
I'm just a story teller"

We thank God for the stories you've told us. How alive you have made our lives. As with you we saw our streets and neighborhoods come to life. We lived through you and grew in wisdom as we joined your story telling audience.

Thank you Fred, restin peace. Amen.

AYES: 7 NAYS: 0 MOTION CARRIED.

MCTA SPRING BANQUET

Hill moved, Tabor second that the Township pay the dinner cost of \$25.00 for all employees, Township Board members, Planning Commission members, and ZBA members to attend the 2009 Marquette County Township Association banquet on Friday, May 28, 2009.

AYES: 6 NAYS: 1 MOTION CARRIED.

PUBLIC COMMENT.

Clerk Hill told the Board that Debra Heinzelman is the new Administrative Assistant, she took Cathy Phelps position.

INFORMATIONAL REPORTS AND COMMUNICATIONS.

- A. Board update from employee staff meeting
- B. Police Quarterly Stats
- C. Letter from LSCP about Crime Lab
- D. Information on RR overpass over M-28
- E. Magnum Farm article
- F. Map of proposed Marquette Skate Park
- G. Chocolay Township Volunteer Fire Rescue Department Monthly Report

Supervisor Seppanen adjourned the meeting at 8:15 pm.

Arlene E. Hill, CMC
Clerk

Mary L. Sanders, CMC
Deputy Clerk

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
MONDAY, JUNE 8, 2009**

I. MEETING CALLED TO ORDER AT 7:30 PM/ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Ken Tabor,
Kendell Milton, Andy Sikkema, Andy Smith, Steve Kinnunen,

Absent:

Staff Present: Jennifer Thum (Planning and Community Development), Randy Yelle (Zoning Administrator), Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF APRIL 13, 2009 & MAY 18, 2009 (JOINT BOARD) MEETING MINUTES

Steve Kinnunen motioned, seconded by Andy Sikkema, to approve the April 13, 2009 Planning Commission minutes as written and Ken Tabor motioned, seconded by Estelle DeVooght to approve the Planning Commission/Township Board combined May 18, 2009 meeting minutes as written.

Ayes 7. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Steve Kinnunen motioned, seconded by Estelle DeVooght, to approve the agenda as written for June 8, 2009.

Ayes 7. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

A. CONTINUED HEARING FOR REZONING REQUEST #142

Mr. William Beckman stated that he is requesting to rezone this parcel from R-1 to Commercial. He stated that when Dana Estates had their subdivision surveyed many years ago there was supposed to be a 50 ft buffer between the subdivision and Mr. Beckman's property. This never occurred, which resulted in Mr. Beckman's property being zoned residential instead of commercial. Mr. Beckman stated that he has provided a letter and deed for this property as requested by the Township staff.

Joseph Uren, 116 Dana Lane – stated that he opposes Rezoning Request #142 as he feels the Township doesn't enforce the zoning ordinance. Mr. Uren provided the Commission members with pictures he provided to the Township approximately 7 years ago. The pictures show what Mr. Uren believes is dumping occurring behind Timbercrest and on the Oberstar property. Mr. Uren stated that he believes the residents do not want any more commercial dumps in the area.

Mr. Ed Paveglio 108 Dana Lane, stated that why should Mr. Beckman be allowed to rezone his property when he wasn't allowed to put up a commercial garage? Mr. Paveglio also stated that he and Mr. Beckman have had problems pertaining to their lot lines.

Trisha Martin, Dana Lane, stated that she feels if Mr. Beckman's property is used for storage facilities or something similar, the Township should work with Mr. Beckman to rezone this piece of property from R-1 to Commercial.

B. PROPOSED ZONING AMENDMENTS 34-09-01 TO 34-09-16

Proposed Zoning Amendments #34-09-01 through #34-09-16 were presented to the public for comment. There were no comments from the public pertaining to any of the proposed zoning amendments presented (#34-09-01-#34-09-16).

V. PUBLIC COMMENT

No public comment.

VI. PRESENTATION

No presentations scheduled.

VII. OLD BUSINESS

A. REZONING #142

Jennifer Thum reported that Rezoning Request #142 is a request from William Beckman, the property in consideration is parcel #52-02-110-063, and the lot is between the Dana Estates and Timbercrest Landscape Company. Mr. Beckman has petitioned the Chocolay Township Planning Commission to rezone the parcel from the current zoning classification of R-1 (Residential to "I" (Industrial or "C" (Commercial). The entire parcel is 3.08+/-acres and the applicant is requesting the rezoning due to hardship of selling the land as residential, as the land abuts an Industrial District.

The questions that came up at the January meeting concerning the deeds have been answered. Mr. Beckman dropped off copies of the deeds that show that he was deeded 50 ft. east of the Dana Estates and he then deeded 50 ft. to the Wursters (Timbercrest). It appears that everything is correct.

Steve Kinnunen moved, Ken Tabor seconded, that following the review of Rezoning Request #142, and the Staff/File Review and holding a public hearing, the Planning Commission recommends that the Township Board Deny Rezoning Request #142 for the following reasons:

1. There is no public health, safety or welfare concerns, that would require this lot to be rezoned.
2. The Planning Commission cannot rezone properties just because the owner is having a hard time selling the lot.
3. The Future Land Use map has the parcel zoned as Residential.

Ayes 7. Nays 0. Motion approved.

VIII. NEW BUSINESS

A. PROPOSED ZONING AMENDMENTS #34-09-01 - #34-09-16

Jennifer Thum reported that Township staff is bringing to the Planning Commission the proposed zoning amendments now that they have been presented at a public hearing. We can approve them and recommend them to the Township Board, deny them, or table them for more discussion.

#1 Amendment 34-09-01 – Multi-Family Residential District (MFR); Section 4.3:
(D) 1

Existing language:

1. Density is limited to *seven* homes per acre.

Proposed amended language:

2. Density is limited to *five* homes per acre

Ken Tabor moved, Andy Smith seconded, to approve zoning amendment #34-09-01 and recommend to the Township Board.

Ayes 7. Nays 0. Motion carried.

#2 Amendment #34-09-02 – Agriculture/Forestry (AF); Section 4.7 & 4.4:

Parks were completely omitted from the AF district. In the old zoning ordinance; Parks were a permitted use within the RP district and a conditional use with the RR-2 district.

Proposed additions:

1. Add to AF Section 4.7 (C) 12. Parks
2. Add to WFR Section 4.4 (C) 7. Parks

Steve Kinnunen moved, Ken Tabor seconded, to approve zoning amendment #34-09-02 and recommend to the Township Board.

Ayes 7 Nays 0 Motion carried.

#3 Amendment #34-09-03 – Agriculture/Forestry (AF); Section 4.7;
Kennels were completely omitted from the AF district, in the old zoning ordinance; kennels were a conditional use with the RR-2 & RP districts.

1. Add to Section 4.7 (C) 11. Kennels

Ken Tabor moved, Kendell Milton seconded, to approve zoning amendment #34-09-03 and recommend to the Township Board.

Ayes 7. Nays 0. Motion carried.

#4 Amendment #34-09-04 – Height and Placement Regulations; Section 6.1:
(Schedule of Regulations)

Existing language:

	District	Front	Side	Rear
1.	MFR	30	30	30

Proposed amended language:

	District	Front	Side	Rear
2.	MFR	30	10	35

Ken Tabor moved, Steve Kinnunen seconded, to approve zoning amendment #34-09-04 and recommend to the Township Board.

Ayes 7. Nays 0. Motion carried.

#5 Amendment #34-09-05 – Height and Placement Regulations; Section 6.1:
(Schedule of Regulations)

Existing language:

	District	Minimum Lot Size	Minimum Lot Width
1.	MFR	20 Acres	None

Proposed amended language:

2.	MFR	2 Acres	200 feet
----	-----	----------------	-----------------

Ken Tabor moved, Kendell Milton seconded, to approve zoning amendment #34-09-05 and recommend to the Township Board.

Ayes 7 Nays 0 Motion carried.

#6 Amendment #34-09-06 – Outdoor Wood Burning Boilers and Appliances;
Section 6.5: (Conditions of Approval) Section 6.5 (A) and (B) 1. B

Existing language:

1. Minimum chimney height of 15 feet, measured from the grade to chimney top or 2 feet higher than the nearest neighboring principal dwelling within 1000 feet, whichever is higher.

Proposed language:

- a. A setback of 75 feet from any and all lot/property lines, easements, and right-of-ways;
- b. The outdoor wood-fired boiler shall be located at least 300 feet from the nearest residential dwelling, not served by the furnace;
- c. If the outdoor wood-fired boiler is located within 500 feet of the nearest residential dwelling, the chimney height measured from grade to the chimney top must be a minimum of 2 feet higher than the nearest neighboring principal dwelling;
- d. No fuel other than the natural wood without additives, wood pellets without additives, coal, and agricultural seeds in their natural state, may be burned;
- e. Outdoor wood-fired boilers shall not be located in the front yard;
- f. Granting of a zoning compliance permit, constitutes an agreement between the landowner and Chocolay Township, that the zoning administrator, at any reasonable time, may enter the property for purpose of inspection to determine compliance with conditions;
- g. If the outdoor wood burning appliance meets the Phase I EPA standards, the outdoor wood boiler located within 300 feet of the nearest residential dwelling must have a chimney height measured from grade to the chimney top must be a minimum of 2 feet higher than the nearest neighboring principal dwelling;
- h. If the outdoor wood boiler meets the Phase II EPA standards, a setback of 50 feet from all lot/property lines, easements, and right-of-ways. The outdoor wood-fired boiler shall be located at least 200 feet from the nearest residential dwelling not served by the boiler. There are no chimney height requirements for a Phase II outdoor wood boiler.
- i. “Best Burn Practices” as issued by the Environmental Protection Agency shall be followed by all applicants utilizing outdoor wood boilers.

Ken Tabor moved, Andy Sikkema seconded, to table amendment #34-09-06 until the next meeting to allow staff to research set-backs and the definition of grade.

Ayes 7. Nays 0. Tabled.

#7 Amendment #34-09-07 – Commercial Vehicle Parking in Residential Districts; Section 6.11:

This paragraph was completely omitted from this section, and should not have been as this paragraph was not addressed. Although, whereas this action was not questioned and/or appealed within the required timeframe, it is my opinion that the newly adopted zoning ordinance is a legal and binding ordinance.

This paragraph is no longer a legal part of the zoning ordinance, therefore, if the Board wants it in the zoning ordinance, and it must be adopted as a new amendment to the Zoning Ordinance.

Proposed reinstatement of this paragraph:

1. (C) One (1) 27 foot or smaller truck or van may be parked at a residence in all other residential zoning districts without Township review or approval.

Proposed additions:

2. (A) approval required, *subject to the following subsections and limitations.*
3. (E) *In the event of a conflict or contraindication between the above provisions of the Zoning Ordinance and Ordinance number 55, being the Vehicle and Trailer Parking and Storage Ordinance, the terms of the Zoning Ordinance shall prevail.*

If adopted, the action will move the existing (C) to (D).

Steve Kinnunen moved, Al Denton seconded, to reinstate the previous zoning ordinance wording for amendment #34-09-07 and recommend to the Township Board.

Ayes 7 Nays 0 Motion carried.

#8 Amendment #34-09-08 – Nonconforming Uses and Structures; Article XIV, Sections 14.1 & 14.2:

The Zoning Board of Appeals shall not issue use variances, (Chocolay Township Zoning Ordinance Article XV, and per the Michigan Zoning Enabling Act; Act 110 of 2006) nor can the Planning Commission.

The Township Board, would amend the Zoning Ordinance to include the use that the Township Board may deem should be allowed within a designated Zoning District. Therefore, the Township Board would not be approving or issuing a use variance, but amending the ordinance, per MZEA, to accomplish the desired action or in this case, the desired use within said district(s).

Proposed action:

1. Remove any and all reference to and regarding USE VARIANCES.

Andy Smith moved, Ken Tabor seconded, to approve zoning amendment #34-09-08 and recommend to the Township Board.

Ayes 7 Nays 0 Motion carried.

- #9 Amendment #34-09-09 – 1. Article II, Definitions:
1. Add to definitions “Park”

Proposed definition:

Park, A noncommercial not-for-profit, parcel of land, with or without a Structure, designed to serve the recreational needs of the residents, including but not limited to playgrounds, sport fields, game courts, beaches, trails, picnicking areas, and leisure time activities.

Steve Kinnunen moved, Ken Tabor seconded, to approve zoning amendment #34-09-09 and recommend to the Township Board.

Ayes 7 Nays 0 Motion carried.

- #10 Amendment #34-09-10
1. Article II, Definitions:
Add to definition regarding “Kennels”

Existing language:

Means any activity involving the permanent or temporary keeping or treatment of four or more adult dogs, cats or any combination of, other than ordinary agricultural activities

Proposed amended language:

Means any activity involving the permanent or temporary keeping or treatment of four or more domestic pets, including adult dogs or cats, or any combination of such animals exceeding three in number, for other than ordinary agricultural activities.

Andy Sikkema moved, Al Denton seconded, to approve zoning amendment #34-09-10 and recommend to the Township Board.

Ayes 4 Nays 3 Motion carried.

- #11 Amendment #34-09-11
1. Article XVIII. Signs and Fences
Add 18.12 from “Fences” to “Flags”

Proposed language:

18.12 Flags

(A) Flags, other than corporate, commercial or advertising flags shall be permitted in all residential zoning districts, on developed residential lots. Flags shall be subject to the following regulations:

- 1. Flags shall meet the sign setbacks within Section XVIII and the height limits for structures within Section VI.***
- 2. Up to three (3) flags of any combination but not more than one (1) corporate, commercial or advertising flag shall be permitted on a single lot, shopping center, or business.***
- 3. No flag shall be displayed with the flag of the United States of America, which is of greater area or which is placed at a greater or same height as that of the flag of the United States of America flag.***
- 4. No corporate, commercial or advertising flag shall be located on any lot other than the business lot that the flag is advertising.***
- 5. All out-of-doors flags shall be displayed from a pole or other mounting device which is permanently affixed to the ground or a building.***

Ken Tabor, moved, Steve Kinnunen, seconded to approve only (A) #1 of zoning amendment #34-09-12 and delete #2-#5 and recommend to the Township Board.
Ayes 7. Nays 0. Motion carried.

#12 Amendment #34-09-12:
Add to Article II Definitions:
After “Family Day Care Home”:

Proposed language:

Flag: Any fabric or other flexible material attached to or designed to be flown from a flagpole or similar device or any such device attached to a building or structure for display out-of-doors.

Flag, Business: A flag displaying the name, insignia, emblem, logo, or the like, of a business and/or corporation.

Steve Kinnunen, moved, Al Denton, seconded to approve zoning amendment #34-09-12 and recommend to the Township Board.
Ayes 7 Nays 0 Motion carried.

#13 Amendment 34-09-13:
Add to Article VI: Add 6.1 after “Said structure(s)”

Proposed language:

NOTE: Lots of less than 20 acres, but not less than 5 acres within the AF district prior to the adoption of this Ordinance, are legal nonconforming. April 21, 2008.

Steve Kinnunen, moved, Estelle DeVooght, seconded to approve zoning amendment #34-09-13 and recommend to the Township Board.
Ayes 7 Nays 0 Motion carried.

#14 Amendment 34-09-14:
Add to Article XVIII: 18.4 Remove (C)

Current language:

(C) The flag of any state or nation respectfully displayed.

Steve Kinnunen, moved, Ken Tabor, seconded to approve zoning amendment #34-09-14 and recommend to the Township Board.
Ayes 7. Nays 0. Motion carried.

#15 Amendment 34-09-15:
Add to Section XI after Building Grades fill to increase height.

11.12 Outside Lighting

- A. On site lighting shall be directed away from residential properties and public or private streets.
- B. Light emitted in non-residential developments which are adjacent to residential development(s) shall be compatible with the character of the adjacent residential areas.

- C. Information shall be supplied on the style, manufacturer's part number, height direction, location, wattage, type of bulb and intensity of outside lighting on the final site plan for final approval.
- D. Building Lighting:
 - a) No building-mounted or pole mounted floodlights are allowed. Signs may be lit with floodlights provided the light is focused downward on the sign and does not spill beyond the sign. Shields or adjustable louvers shall be required on floodlights to control beam spread.
 - b) Landscape lighting shall be allowed, provided shielding and louvers are utilized to limit lighting to objects only. Lamp wattage shall be low as possible to illuminate the object without causing glare on the site or neighboring property.
 - c) Gas station canopy lights shall be provided with flat lenses to limit glare. Illuminant levels shall comply with Illuminating Engineering Society Standards.
 - d) Lighting standards in parking lots shall have 20 foot maximum mounting height.
 - e) Searchlights, strobes, lasers or similar high intensity light for outdoor advertisement or entertainment are prohibited.
 - f) Lights mounted on buildings shall not be a flashing, moving or intermittent type.

Steve Kinnunen moved, Ken Tabor, seconded to approve zoning amendment #34-09-15 and recommend to the Township Board.

Ayes 7 Nays 0 Motion carried to table.

#16 Amendment #34-09-16
 Remove from Article IV; Sections 4.1 C, 4.2 C, 4.3 B, 4.4 C, and 4.6 B
 (on lots of 5 acres or more)

Proposed language:

Outside wood boilers, including conditions of approval.

Estelle DeVooght moved, Andy Sikkema, seconded to table this until the next meeting so staff can research further #34-09-06.

Ayes 7 Nays 0 Motion carried to table.

B. HEIGHT RESTRICTION FOR ACCESSORY STRUCTURES

Jennifer Thum reported that a couple of months ago, staff was approached by Mr. Gary Niemela to discuss the height limit of accessory structures in our Township, which is 15 ft. Mr. Niemela's position is that we should reconsider this height and raise it to 17 ft; this would be the average height from finished grade to the center of the vertical truss height. Mr. Niemela's logic behind this is, the State of Michigan has adopted a new energy code, which requires R49 in ceilings to comply with the heel trusses that must be raised to accommodate insulation. The new energy code is expected to encourage more insulation and ventilation in attic spaces.

Staff has spoken with Greg Sicotte at the County, and he does not interpret the energy code the same as Mr. Niemela. We have gotten a letter of support from Mr. Swadley of Sunrise Builders, stating that he believes the height increase would be a good thing too. Ms. Thum has spoken with Marquette Township and the City of Marquette both of them are looking at raising the height. One objection at Marquette Township was that the increased height could lead to view or shade problems for the neighbors. Our

Zoning Administrator, Mr. Yelle is not in support of raising the detached height limit from 15 ft. to 17 ft.

Ms. Thum stated that she shares the same concerns as Marquette Township, but our zoning ordinance is not “green” and we should be encouraging residents to do everything to be more environmentally sensitive. Her concern about having residents create living space in the attic due to height increase is legitimate, but that is where we would have to do more enforcement and work with the County to ensure that the plans don’t reflect any living space. Ms. Thum stated she would be in support of raising the height, but maybe to 16 ft, with the condition that the height of the accessory structure does not exceed the main structure.

Steve Kinnunen moved, Ken Tabor seconded, to table this item, to give staff further time to review/research set-backs, definition of grade, and lot sizes until the next meeting.

Ayes 7 Nays 0 Motion to table this item until the next meeting.

C. PEDESTRIAN GRANTS

Jennifer Thum reported that our NMU intern, Mr. John Neych has been working on trying to secure a couple of pedestrian based grants. He has completed the first one which is through the North Carolina Highway Safety Research Center they wrote a book titled, “Resident Guide for Creating Safe and Walkable Communities.” The Highway Safety Research Center was seeking ten communities or neighborhoods that were interested in making their environment safe for pedestrians and walkable to pilot the test guide. We will hear if we were awarded this grant in mid-July.

The second one will be worked on within the next couple of weeks and that is through the Conservation Fund, in partnership with Eastman Kodak and the National Geographic Society, provides small grants to stimulate the planning and design of greenways in communities across the United States. The annual grants program is designed to help establish a national network of greenways. The grants may be used for activities such as mapping, ecological assessments, surveying, conferences, design activities, developing brochures and interpretative displays, public opinion surveys, hiring consultants, incorporating land trusts, building foot bridges, planning bike paths, or other creative projects.

D. SENIOR COMMITTEE

Mr. Steve Kinnunen, reported on the possibility of creating a senior committee. Ms. Thum thinks this is a great idea, as our demographics show an aging population and she thinks it would be a good idea to try and meet with them to see what their needs are from the Township. Ms. Thum stated she would be happy to post some information on the Township’s website about the possible committee to see if we get any interested volunteers.

Al Denton moved, Steve Kinnunen seconded, to have the Planning Director post some information on the website about the possible senior committee to see if we get any interest.

Ayes 7 Nays 0 Motion carried.

E. POCKET PARK

Steve Kinnunen reported that at the April meeting, he showed Ms. Thum pictures of pocket parks and thought that we should try and develop at least one in our Township.

This would be a great thing, but the hard part comes in trying to find a location to work on. Mr. Kinnunen drew up a plan for a park at our municipal complex and Ms. Thum has discussed this with our DPW and they were concerned about it being rather close to the road.

Ms. Thum reported that the Township did put away money for new playground equipment, and she was thinking that we might be able to do a park and install playground equipment by the Township marina on Main Street. There are a lot of families in the Harvey area with really no place for recreation. Ms. Thum stated that a fence could be installed to help keep the kids away from the water and the playground equipment could be located on top of the hill.

Steve Kinnunen motioned, Estelle DeVooght seconded, to support staff to go to the Township Board to discuss a pocket park in Chocolay Township.

Ayes 7 Nays 0 Motion carried.

F. MDOT LANDSCAPE PLAN

Jennifer Thum reported that she has gotten back the latest landscape plan for the US-41 Enhancement Project. It appears that there will be landscape coverage in more areas and staff is pleased, but still has some concerns. Such as the plant choices, there could be more use of taller trees, the split-rail fence seems to have disappeared and the consultant is still showing trees where some already exist. Ms. Thum provided photographs of the proposed plans and trees.

Ms. Thum stated that this plan is for our Township, so she is expecting all of the Commissioners to really look at the plans, and pay attention to the locations, plant species and determine if overall you as a resident are happy with the plans. The Township and its residents should feel very fortunate to have a project like this in our Township and Ms. Thum would like to see the Township Boards and Commissions take some ownership of this project.

IX. PUBLIC COMMENT

No public comment.

X. COMMISSIONER'S COMMENT

No comments from the Commissioners.

XI. DIRECTOR'S REPORT

Jennifer Thum reported that the Township has made it through the first round of the Coastal Grant and hopes to hear something further in June. Ms. Thum reported that there will be an article in the CABA Newsletter pertaining to road construction.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

A. Planning and Zoning News, May, 2009.

B. Marquette Township Planning Commission minutes March, April, and May, 2009.

XIII. ADJOURNMENT

Ken Tabor moved, Andy Smith seconded, to adjourn the meeting as there was no further business to address. The meeting adjourned at 9:40 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
MONDAY, JULY 13, 2009**

I. MEETING CALLED TO ORDER AT 7:30 PM/ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Ken Tabor,
Kendell Milton, Andy Sikkema, Andy Smith, Steve Kinnunen,

Absent:

Staff Present: Jennifer Thum (Planning and Community Development),
Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF JUNE 8, 2009 MEETING MINUTES

Estelle DeVooght, moved, Andy Sikkema, seconded, to approve the June 8, 2009 Planning Commission minutes as written.

Ayes 7. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Steve Kinnunen, moved, Estelle DeVooght, seconded, to approve the agenda as written for the July 13, 2009, Chocolay Township Planning Commission meeting.

Ayes 7. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

A. CONTINUED HEARING FOR ZONING AMENDMENTS #34-09-06 AND # 34-09-16

Proposed Zoning Amendments #34-09-06 and #34-09-16, which were tabled at the previous meeting, were presented to the public for comment. There were no comments from the public.

B. REZONING #143

Mr. Frank Stabile, 121 Vista Hills Trail, presented a summary of Rezoning Request #143. This request is to further develop his property, which consists of approximately 103 acres and is located approximately 5 miles south of the US 41 intersection on the east side. Mr. Stabile received approval for a private road in 2000, but didn't request anything further. He put in the road, utility services, and built his home at that time. Mr. Stabile stated he feels that this planned unit development would be a good fit and maintain the integrity of the area around it. He reported that he has been working with Township staff to address their concerns and do what is required to develop this property. Mr. Stabile reported that he did neglect to pay attention to the recent zoning ordinance revisions and was under the impression that the 5 acre requirement that was previously in effect was grandfathered for this property. Mr. Stabile also stated that the current development plan is very similar to the one he presented in 2000 when he requested a private road. He would now like to develop 9 parcels (approximately 95

acres) and is requesting to rezone the property from AF to a PUD, which is why he is requesting a Planned Unit Development (PUD).

V. PUBLIC COMMENT

Eric Keough, 111 Autumn Trail, reported that he is the person who has the purchase agreement with Mr. Stabile to construct a home on one of the 5 acre parcels and fully supports Mr. Stabile's request.

Diane Huetter, Green Garden Hill, stated that she does not support this particular development as she feels developments such as this should be closer to town.

Bernie Huetter, Green Garden Road, has concerns about water issues that are usually associated with these types of developments as this would be close to his property.

Gary Revord, 7001 US 41 S, stated he supports Mr. Stables planned development.

VI. PRESENTATION

No presentations scheduled.

VII. OLD BUSINESS

A. HEIGHT RESTRICTIONS FOR ACCESSORY BUILDINGS

This item was tabled last month in order for Mr. Niemela to be in attendance.

Jennifer Thum reported that a couple of months ago, staff was approached by Mr. Gary Niemela to discuss the height limit of accessory structures in our Township, which is 15 ft. Mr. Niemela's position is that we should reconsider this height requirement and raise it to 17 ft; this would be the average height from finished grade to the center of the vertical truss height. There were two parts to these request, one is that the new energy code is having individuals push for taller garages for more installation and that is what people are wanting now.

Staff has spoken with Greg Sicotte at the County, and he does not interpret the energy code the same as Mr. Niemela. We have gotten a letter of support from Mr. Swadley of Sunrise Builders, stating that he believes the height increase would be a good thing too. Ms. Thum reported that she's spoken with Marquette Township and the City of Marquette, both of which are looking at raising their height requirement. One objection at Marquette Township was that the increased height could lead to view or shade problems for the neighbors. Our zoning administrator, Mr. Yelle is not in support of raising the detached height requirement limit from 15 ft. to 17 ft.

Ms. Thum reported that personally she shares the same concerns as Marquette Township, but she also knows that the Township Zoning Ordinance is not "green" and we should be encouraging residents to do everything that can be done to be more environmentally sensitive. The concern about having residents create living space in the attic due to height increase is legitimate, but that is where we would have to do more enforcement and work with the County to ensure that the plans don't reflect any living space. Ms. Thum reported that she would be in support of raising the height requirement, but maybe to 16 ft., with the condition that the height of the accessory structure does not exceed the main structure.

Mr. Niemela was present and discussed some of his reasoning for requesting the height requirement be increased for accessory buildings. He explained that roofs with a 10-12

foot roof pitch are becoming the norm. He did explain that he is not pushing for the energy code as stated previously, but a height increase would allow a person to apply the new energy code if he/she desired. The old height requirement does have its drawbacks such as lack of room for insulation, ice build-up that results in roof leaks, etc. He also reported that he provided a letter of support from the Builder's Association.

Ms. Thum reported that the City of Marquette did pass a height requirement of 17.6 ft on July 7, 2009.

After much discussion involving lot sizes and the possibility that a height increase could cause problems involving viewing and shading the neighbors property, Steve Kinnunen, moved, Estelle DeVooght, seconded, to have Township staff come up with a formulation to include height and set-backs for various size properties to review and hold a public hearing on this at the next meeting

Ayes 7. Nays 0. Motion approved.

B. PROPOSED ZONING AMENDMENTS #34-09-06 AND #34-09-16

OUTDOOR WOOD BURNING BOILERS AND APPLIANCES

Section 6.5: (Conditions of Approval) Section 6.5 (A) and (B) 1. b.

Proposed amended language: (conditions for approval)

~~a. A setback of 75 feet from any and all lot/property lines, easements and right of ways;~~

Chimney Heights

b. The outdoor wood-fired boiler shall be located at least 300 feet from the nearest residential dwelling, not served by the furnace;

- *Or the chimney shall extend to a minimum height of 15 ft if neighboring residences are located greater than 300ft from the proposed boiler, Which ever is greater:*

c. If the outdoor wood fired boiler is located within 500 feet of the nearest residential dwelling, the chimney height measured from grade to the chimney top must be a minimum of 2 feet higher than the nearest neighboring principal dwelling;

d. *If there is an existing outdoor wood boiler already installed and there is new construction of a residence not served by the outdoor wood boiler within 200ft of such wood boiler then the owner of such wood boiler shall conform to the stack height requirements of this regulation within 30 days of the date such construction is complete and upon written notice from Chocolay Township*

OWB Regulations

a. No fuel other than the natural wood without additives, wood pellets without additives, coal and agricultural seeds in their natural state may be burned;

1. The following fuels are strictly prohibited in new or existing Outdoor Wood Furnaces:

- i. Wood that has been painted, varnished or coated with similar material and/or has been pressure-treated with preservatives and contains resins or glues as in plywood or other composite wood products.
- ii. Rubbish or garbage, including but not limited to food wastes, food packaging, or food wraps.

- iii. Any plastic materials, including but not limited to nylon, PVC, ABS, polystyrene or urethane foam, and synthetic fabrics, plastic films and plastic containers.
 - iv. Rubber, including tires or other synthetic rubber-like products.
 - v. Newspaper, cardboard, or any paper with ink or dye products.
 - vi. Any other items not specifically allowed by the manufacturer or this provision.
- b. Outdoor wood fired boilers shall not be located in the front yard;
- c. Granting of a zoning compliance permit, constitutes an agreement between the landowner and Chocolay Township, that the zoning administrator, at any reasonable time, may enter the property for purpose of inspection to determine compliance with conditions;
- d. If the outdoor wood burning appliance meets the Phase I EPA standards, the outdoor wood boiler located within 300 feet of the nearest residential dwelling must have a chimney height measured from grade to the chimney top must be a minimum of 2 feet higher than the nearest neighboring principal dwelling.
- e. If the outdoor wood boiler meets the Phase II EPA standards, a setback of 50 feet from all lot/property lines, easements, and right-of-ways. The outdoor wood-fired boiler shall be located at least 200 feet from the nearest residential dwelling not served by the boiler. There are no chimney height requirements for a Phase II outdoor wood boiler.

Letter d and e seem to be the norm with other zoning ordinances, except the phase II has a 100ft setback in majority of the ones that I read. Also, there was a note about no outdoor wood boiler should be closer than 500 ft from the property line of a state licensed school, daycare or healthcare facility regardless of the emission rate. If terrain conditions could complicate air flow patterns on a parcel of land (e.g. valley, hilly, or tall trees), it may be necessary to install the OWB even farther away than the minimum setback distance to avoid costly changes that could be required later is a nuisance occurs when the boiler is operated.
- f. "Best Burn Practices" as issued by the Environmental Protection Agency shall be followed by all applicants utilizing outdoor wood boilers.
- g. *In a couple of the ordinances talk about Commercial Outdoor Wood Boiler with a rated thermal output greater than 350,000Btu/hr. Should we mention something about commercial units in our ordinance?*
- h. *No OWB, regardless of the date of installation, is allowed to operate when conditions cause visible smoke plum to cross onto adjacent owner's land and buildings for 12 minutes or more in any hour. Sending smoke on adjacent land or buildings for 12 minutes or more is a nuisance and a violation of the regulation.*
- i. *Outdoor furnaces may only be used from September 1 to May 31 each year.*
- j. *All outdoor wood-fired boilers shall be equipped with properly functioning spark arrestors.*

Andy Smith, moved, Ken Tabor, seconded, to approve zoning amendment #34-09-06 and forward it to the Township Board for their review.

Ayes 6. Nays 1. Motion approved.

#2 Amendment 34-09-16

Remove from Article IV: Sections 4.1 C, 4.2 C, 4.3 B, 4.4 C and 4.6 B.
(On lots of 5 acres or more)

Proposed language:

Outside wood boilers, including conditions of approval.

Ken Tabor, moved, Andy Smith, seconded, to approve zoning amendment #34-09-16 and forward it to the Township Board for their review.

Ayes 6. Nays 1. Motion approved.

VIII. NEW BUSINESS

A. REAPPOINTMENTS OF PLANNING COMMISSION MEMBERS

Jennifer Thum reported that the terms of Andy Sikkema who replaced Denny Magadan and Steve Kinnunen expired on May 24, 2009.

Ken Tabor, moved, Estelle DeVooght, seconded, to allow the Director of Planning and Community Development to write a letter of support on behalf of the Planning Commission asking for the re-appointment of Andy Sikkema and Steve Kinnunen and present the letter to the Township Supervisor.

Ayes 5. Nays 0. Motion approved. (Andy Sikkema and Steve Kinnunen abstained from voting)

B. REZONING #143

Jennifer Thum reported the Rezoning #143 is a request from Mr. Frank Stabile of 121 Vista Hills Trail, the properties in consideration are parcel #52-02-126-019-014, #52-02-126-019-30, and #52-02-126-019-20. These parcels are part of the proposed development and approved private road Vista Hills Drive. Mr. Stabile has petitioned the Chocoy Township Planning Commission to rezone the parcel of property from the current zoning classification of AF (Agricultural/Forestry) to PUD (Planned Unit Development). The entire proposed development is approximately 95 acres and the applicant is requesting the rezoning due to only a private road being approved in 2000 and changes to the Township Zoning Map.

There was also much discussion by the commission members pertaining to the definition of a Planned Unit Development (PUD) and its requirements. The members will research this further. The commissioner's discussed the need for more open space and how the objectives for the Planned Unit Development in our zoning ordinances states that a PUD should include open space and recreational areas for the residents. Also, that PUD's should also provide for adequate protection and safeguards for the site and the surrounding area. The applicant and commissioner's then discussed where the open space should go and the possibility of a walking trail. The applicant will provide a plan that meets the community needs.

Steve Kinnunen, moved, Kendal Milton, seconded, that following the review of Rezoning Request #143 and the Staff File/Review, the Planning Commission recommends this be tabled until the next meeting and hold a public hearing with the following conditions being met:

1. The Township Staff be provided a revised Plot Plan showing the requested PUD proposed green space with changes to Lots "F" and "C and showing a 50 ft. easement by the cemetery/ highway, and a 15 ft buffer that will run the entire length of the road on Lot "C".

2. The applicant's engineer will put a scale on all maps not greater than 1 inch equals 60 ft., as required per the Township Ordinance. The engineer will have the grading plan on a separate sheet; this will make the plans easier to read.
3. The engineer will look into the soils of where the proposed driveway for lots F, H, I, and J is located and report back to the Planning Commission if he feels that is the best location.
4. The applicant and engineer will follow Section 9 and 10.2, for final development requirements and procedures.

Ayes 5. Nays 2. This will be tabled until the August meeting.

IX. PUBLIC COMMENT

Diane Gider (sp?) stated she is concerned about how many homes could be built in this the development, which could change the integrity of the area.

Mike Lynn, resident of Chocolay Township, stated that he is concerned about PUDs in the Township.

X. COMMISSIONER'S COMMENT

No comments at this time.

XI. DIRECTOR'S REPORT

Jennifer Thum reported that the grant has been submitted for the Pedestrian Walkable Study and we should hear something this month. Ms. Thum also reported that a link will be placed on the Township website pertaining to the formation of a Senior Committee. Ms. Thum reported that work is being done on the lay-out for the Pocket Park in the Township. She reported they are still waiting to hear regarding the grant for the Recreational Brochure, which was submitted. Junk cars are being addressed in the Township and the annual dust control has been completed.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Planning and Zoning News, June, 2009.
- B. Marquette Township Planning Commission minutes May 27, 2009 and June 10, 2009.
- C. MDOT Press Release for Intersection Construction.
- D. Township Department Update, June 2009.

XIII. ADJOURNMENT

Al Denton moved, Ken Tabor, seconded, to adjourn the meeting as there was no further business to address. The meeting adjourned at 9:30 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
MONDAY, AUGUST 10, 2009**

I. MEETING CALLED TO ORDER AT 7:30 PM/ROLL CALL

Present: Chairman Albert Denton, Estelle DeVooght, Ken Tabor,
Kendell Milton, Steve Kinnunen

Excused: Andy Sikkema

Absent: Andy Smith,

Staff Present: Jennifer Thum (Planning and Community Development),
Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF JULY 13, 2009 MEETING MINUTES

Estelle DeVooght, Moved, Ken Tabor, Seconded, to approve the July 13, 2009, Planning Commission minutes as written.

Ayes 5 Nays 0 Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Steve Kinnunen, Moved, Al Denton, Seconded, to approve the agenda as written for the August 10, 2009, Chocolay Township Planning Commission meeting.

Ayes 5 Nays 0 Motion approved.

IV. PUBLIC HEARINGS

A. HEIGHT INCREASE FOR DETACHED ACCESSORY STRUCTURES

Mr. Gary Niemela, 111 Lara Lei Trail stated he appreciates the process that the Township has followed in considering increasing the current height of 15 ft for detached accessory structures. Mr. Niemela stated he would be very satisfied if the height for detached accessory structures could be increased to 16' 6". Trusses are changing and trusses with a 12/12 pitch are becoming very popular to not only add to the look of the roof, but also to accommodate attic space/storage. The City of Marquette just decreased the height for detached accessory structures to 16' 6". Mr. Niemela also commented that the energy code just went from R39 to R49, but the code is not currently being enforced. However, Mr. Niemela stated that he would like to give people the opportunity to follow the energy code if they wish and this could be done easily with an increase in the height of detached accessory structures.

B. REZONING #144

Mr. Frank Stabile, 121 Vista Hills Trail, stated that after hearing the comments from the Commissioners, the public and staff at the July meeting, he requested that Rezoning Request #143 be denied. He is now submitting a new plan per staff recommendation, Rezoning Request #144, which has a similar lay-out as the previous plan, but shows a reduction in the size of the development by almost 50%. On this new plan there will be only one lot behind the cemetery, which will need a private driveway. Green space will be approximately 3 ½ acres with an easement between Lots D and F. There will also be a 15 ft buffer along the west side of Lot C coming off of US 41, which will also be green space. The houses will not be visible from the highway, but you will see his

home, which is not part of the PUD. All the lots will consist of at least 5 acres, which goes back to his plan of 10 years ago. Mr. Stabile hopes that this plan will bring the development more in tune with the neighborhood lay out and hopes the Planning Commission will provide preliminary approval.

V. PUBLIC COMMENT

Dick Arnold, 312, County Road 545, stated that he's wondering why the Green Garden Hill Subdivision (across from his property), is now designated as Agricultural/Farming (AF). Mr. Arnold stated he did a survey of his own and found out that of the 224 pieces of property in the area, the majority are 15 acres or smaller and only 8 parcels out of the 224 have animals. Mr. Arnold stated he feels these properties should have remained designated as R-2. He feels that such a designation could decrease the value of these properties now that they are designated Agricultural/Farming (AF). Mr. Arnold also stated that he feels the Vista Hills development would be good for the area as Mr. Stabile has always maintained his property well and the plan will fit well in the area.

VI. PRESENTATION

No presentations scheduled

VII. OLD BUSINESS

A. HEIGHT RESTRICTIONS FOR ACCESSORY BUILDINGS

Ms. Thum reported that staff was asked to come up with a formula for the height of detached accessory structures and the projected problem with shading the neighbor's yard. Ms. Thum stated that there are a couple of options that the Commissioners can use. The maximum height now for a detached accessory buildings is 15 ft. At last month's meeting there was discussion to raise the height to 17' 2". Ms Thum discussed that the formula she came up with would be for every foot that the building is over 15 feet in an R-1 district, the side and rear setback would have to be increased by 2 ft. In an R-2 district, the side and rear setback for a building would be increased by 3 ft. for every foot over the 15 ft. The accessory height maximum in Commercial and Industrial District is also 15 ft.

Ken Tabor, Moved, Steve Kinnunen, Seconded, that the Chocolay Township Planning Commission recommends to the Township Board approval to raise the minimum height of a detached accessory structure from 15 feet to 16' 6". In order to prevent blocking any sun, the following formula will be attached to any building with a height over 15 ft.

R-1 District:

The rear and side setback of any detached accessory structure will be increased by 2 ft for every foot over the 15 ft.

R-2 District:

The rear and side setback of any detached accessory structure will be increased by 3 ft. for every foot over the 15 ft.

Ayes 5 Nays 0 Motion approved.

B. REZONING #143

Jennifer Thum reported that a couple of days after the July Planning Commission meeting, Mr. Stabile, (the applicant), contacted her about the meeting and his proposed plan. He stated that he wanted to change some things, and upon hearing those changes it was recommended that he ask the Planning Commission to deny Rezoning Request #143 in that it does not match the objectives of a Planned Unit Development (PUD)

according to the Township Zoning Ordinance. We then asked him to submit a whole new set of plans and a rezoning application, which he did and that is Rezoning Request #144.

Al Denton, Moved, Ken Tabor, Seconded, that following the review of Rezoning Request #143, the Staff/File Review, and holding a public hearing, the Planning Commission recommends that the Township Board deny Rezoning Request #143 for the following reasons:

1. Mr. Stabile, (the applicant), has not provided enough open space to be in compliance with the objectives of the Township planned unit development section of our Zoning Ordinance.
2. The proposed plan is not in compliance with the Township's master plan.

Ayes 5 Nays 0 Motion approved.

C. WOOD BOILER ZONING AMENDMENT #34-09-06

Ms. Thum explained that this is again before you because when the motion was made, it was to accept the changes, but the way the amendment was written in the minutes, it was not accurate. It was decided to bring it back to the Planning Commission for re-approval and discussion on the commercial wood boiler language that Ms. Thum added.

Chimney Heights/Setbacks

- a. If the outdoor wood burning appliance meets the Phase I EPA standards, the outdoor wood boiler located within 300 feet of the nearest residential dwelling must have a chimney height measured from grade to the chimney top must be a minimum of 2 feet higher than the nearest neighboring principal dwelling.
- b. If the outdoor wood boiler meets the Phase II EPA standards, a setback of 50 feet from all lot/property lines, easements, and right-of-ways. The outdoor wood-fired boiler shall be located at least 200 feet from the nearest residential dwelling not served by the boiler. There are no chimney height requirements for a Phase II outdoor wood boiler
- c. If there is an existing outdoor wood boiler already installed and there is new construction on a previous vacant lot of a residence not served by the outdoor wood boiler within 200 ft. of such wood boiler then the owner of such wood boiler shall conform to the stack height requirements of this regulation within 30 days of the date such construction is complete and upon written notice from Chocolay Township.

OWB Regulations:

- a. No fuel other than natural wood without additives, wood pellets without additives, coal and agricultural seeds in their natural state may be burned;
 - 1) The following fuels are strictly prohibited in new or existing Outdoor Wood Furnaces;
 - i. Wood that has been painted, varnished or coated with similar material and/or has been pressure-treated with preservatives and contains resins or glues as in plywood or other composite wood products.

- ii. Rubbish or garbage, including but not limited to food wastes, food packaging, or food wraps.
 - iii. Any plastic materials, including but not limited to nylon, PVC, ABS, polystyrene or urethane foam, and synthetic fabrics, plastic films and plastic containers.
 - iv. Rubber, including tires or other synthetic rubber-like products.
 - v. Any other items not specifically allowed by the manufacturer or this provision.
- b. Outdoor wood fired boilers shall not be located in the front yard;
 - c. Granting of a zoning compliance permit, constitutes an agreement between the landowner and Chocolay Township, that the zoning administrator, at any reasonable time, may enter the property for purpose of inspection to determine compliance with conditions;
 - d. “Best Burn Practices” as issued by the Environmental Protection Agency shall be followed by all applicants utilizing outdoor wood boilers.
 - e. In a couple of the ordinances there is talk about Commercial Outdoor Wood Boilers with a rated thermal output greater than 350,000Btu/hr. Should we mention something about commercial units in our ordinance?
 - f. No OWB, regardless of the date of installation, is allowed to operate when conditions cause visible smoke plum to cross onto adjacent smoke on adjacent land or buildings for 12 minutes or more is a nuisance and a violation of the regulation.
 - g. Outdoor furnaces may only be used from September 1 to May 31 each year.
 - h. All outdoor wood-fired boilers shall be equipped with properly functioning spark arrestors.

III. Commercial Outdoor Wood Boiler or Outdoor Wood Boiler with a rated thermal output greater than 350,000 Btu/hr Analysis Requirement

- a. Any person intending to install or operate a commercial outdoor wood boiler or an outdoor wood boiler with a rated thermal output greater than 350,000 Btu/hr shall obtain an evaluation, report and installation recommendations performed by a licensed professional engineer that includes the following information:
 - b. What type of application will the outdoor wood boiler be used for;
 - c. A determination of the heat load requirements of the facility as compared to the available heat supply of the outdoor wood boiler to ensure the unit is properly sized;
 - d. The stack location relative to the property lines and building locations within 400 feet of the outdoor wood boiler;
 - e. The stack height; and
 - f. Recommendations for the proper outdoor wood boiler installation, including but not limited to, hook-up, auxiliary fuel, properly sized outdoor wood boiler, stack height and stack location.
- g. No person shall install or operate a commercial outdoor wood boiler or outdoor wood boiler with a rated thermal output greater than 350,000 Btu/hr unless it is installed according to the recommendations of the evaluation report in Section 3(D)(1). In any case, no person shall install or operate a commercial outdoor wood boiler or an outdoor wood boiler with a rated thermal output greater than 350,000 Btu/hr unless it meets the minimum setback and stack height requirements stated in Section 3(B) and 3(C) of this Chapter.

Steve Kinnunen, Moved, Kendell Milton, Seconded, to table zoning amendment #34-09-06 until the September meeting to allow staff to rewrite this amend- to be reviewed and to further discuss commercial and industrial use.

Ayes 5 Nays 0 Motion approved to table until September meeting.

D. PROPOSED ZONING AMENDMENTS #34-09-01, #34-09-03, #34-09-04, #34-09-05, #34-09-10, #34-09-13

Ms. Thum reported that at last months' Township Board meeting, the trustees requested that some of the zoning amendments be sent back to the Planning Commission for more detailed explanation and review.

Draft Amendment #34-09-01 – Multi-Family Residential District (MFR); Section 4.3: (D) 1

Existing language:

1. Density is limited to seven homes per acre.

Proposed amended language:

1. Density is limited to *five* homes per acre.

The trustees wanted a good and clear explanation as to why we are decreasing the density limit.

Ms. Thum reported the change is being made due to the increased size of the newer mobile homes being built today, which take up more space.

Steve Kinnunen, Moved, Al Denton, Seconded, to recommend to the Township Board for approval at their next meeting.

Ayes 5. Nays 0. Motion approved.

Draft Amendment #34-09-03 - Agriculture/Forestry (AF); Section 4.7: Kennels were completely omitted from the AF district, in the old zoning ordinance; Kennels were a conditional use within the RR-2 & RP districts.

Proposed addition:

1. Add to Section 4.7 (C) 11. *Kennels*

Trustee Maki, was not sure why we need to change this.

Kendell Milton, Moved, Al Denton, Seconded, to recommend approval to the Township Board to reinstate into the new ordinance, Kennels with the addition of “are allowed on 20 acres or more”, which is from the old ordinance.

Ayes 5 Nays 0 Motion approved.

Draft Amendment #34-09-04 – Height and Placement Regulations; Section 6.1: (Schedule of Regulations)

Existing language:

	District	Front	Side	Rear
1.	MFR	30	30	30

Proposed amended language:

2.	MFR	30	10	35
----	-----	----	----	----

The trustees wanted to know why the Planning Commission was asking for this to change, is there a specific site plan in mind?

The Commissioners in attendance unanimously agreed not to place the wording in the zoning ordinance.

Ayes 5 Nays 0 Motion approved.

Draft Amendment #34-09-05 – Height and Placement Regulations; Section 6.1: (Schedule of Regulations)

Existing language:

	District	Minimum Lot Size	Minimum Lot Width
1.	MFR	20 Acres	None

Proposed amended language:

1.	MFR	2 Acres	200 feet
----	-----	---------	----------

The trustees wanted to know why the Planning Commission was asking for this to change, is there a specific site plan in mind?

Ken Tabor, Moved, Steve Kinnunen, Seconded, to table this item until the September meeting and ask staff to come up with some information for language with regards to spacing between buildings.

Ayes 5 Nays 0 Motion to table approved until the September meeting.

Draft Amendment #34-09-10 – Article II, Definitions:

Add to definition regarding “Kennels”

Existing language: means any activity involving the permanent or temporary keeping or treatment of four or more adult dogs, cats, or any combination of, other than ordinary agricultural activities.

Proposed amended language: Means any activity involving the permanent or temporary keeping or treatment of four or more domestic pets, including adult dogs or cats, or any combination of such animals exceeding three in number, for other than ordinary agricultural activities.

The trustees wanted to know how this would work with sled dogs and they wanted to increase the number to 4 or more domestic pets.

Estelle DeVooght, Moved, Ken Tabor, Seconded, to recommend to the Township Board for approval at their next meeting the “Existing Language listed above stating “means any activity involving the permanent or temporary keeping or treatment of four or more adult dogs, cats, or any combination of, other than ordinary agricultural activities”.

Ayes 5 Nays 0 Motion approved.

Draft Amendment #34-09-13 – Add to Article VI: Add 6.1 after “said structure/s.”

Proposed language:

NOTE: Lots of less than 20 acres, but not less than 5 acres within the AF district prior to the adoption of this Ordinance are legal nonconforming, April 21, 2008.

The trustees wanted to drop the 5 acres and have it read, “lots of less than 20 acres within the AF district prior to the adoption of this Ordinance are legal nonconforming lots.”

Ken Tabor, Moved, Al Denton, Seconded, to recommend to the Township Board for approval at their next meeting the omission of “but not less than 5 acres” from the proposed language listed above.

Ayes 5 Nays 0 Motion approved.

VIII. NEW BUSINESS

A. REZONING REQUEST #144

Jennifer Thum reported that Rezoning Request #144 is a request from Mr. Frank Stabile of 121 Vista Hills Trail, the properties in consideration are parcels #52-02-126-019-040, 52-02-126-019-20, 52-02-126-30. These parcels are where the proposed development and approved private road Vista Hills Drive are located. Mr. Stabile has petitioned the Chocloy Township Planning Commission to rezone the parcels of property from the current zoning classification of AF (Agricultural/Forestry) to PUD (Planned Unit Development). The entire proposed development is approximately 45 acres and the applicant is requesting the rezoning due to only a private road being approved in 2000 and changes to the township zoning map. Ms. Thum reported that the applicant has added some open space, but removed his lot and the two additional rear lots out of the PUD. Which could cause problems in the future. Ms. Thum also had reservation about Lot E, which abuts US 41 and really is not connected to the proposed PUD. Staff still does not feel that this is a typical PUD.

There was much discussion by the Commissioners pertaining to the placement of the easements and the green space. Mr. Stabile and his engineer (Mr. Cambensy) explained a discrepancy of the easement between Lots A and B and stated that the easement will be between Lots D and F.

Al Denton, Moved, Estelle DeVooght, Seconded, that following the review of Rezoning Request #144, the Staff/File Review, and holding a public hearing, the Planning Commission recommends preliminary approval with the following conditions:

1. The applicant will provide a 15 ft buffer along the west side of Lot C, to ensure that the development will not be seen from the road.
2. The applicant will provide an easement between lots D and F.
3. The applicant will increase the open space lot to 3.42 acres.
4. The applicant and engineer will follow the Section 9 and 10.2, for final development requirements and procedures.
5. The applicant creates an agreement for maintenance of the road, for his lot and for any future owners of his home and the back lots.

Ayes 4 Nays 1 (DeVooght) Motion approved.

B. 2010 BUDGET

Jennifer Thum discussed a couple of changes to consider for 2010. First, she would like to move the meetings to the first Monday of the month instead of holding them on the second Monday of the month. The Township Board would like their meeting packets earlier and moving the meeting would allow more time for her to assemble the meeting packets for the Township Board meeting. Second, she would like to know if the Commissioners would be in favor of starting the meeting at 7:00 PM instead of 7:30 PM

The Commissioners agreed to change the meeting to the first Monday of each month beginning in January 2010. The meeting time of 7:30 PM will remain the same for 2010.

Ms. Thum reported the Township is looking at possibly purchasing right-of-way in the future along the highways in our township to make it easier to install bike paths.

Ms. Thum asked the Commissioners for their thoughts on how much money should be budgeted in 2010 for the Marina Park and the Veteran's Park? Please let her know your thoughts by calling or e-mailing her.

Ms. Thum also reported that she is going to budget money for a training class to be held in the Township for the Commissioners in December, 2009 and one sometime in 2010.

Ms. Thum reported she will provide more information and projects for consideration at the September meeting.

IX. PUBLIC COMMENT

Stephanie Gencheff, 597 Lakewood Lane, stated she is very concerned about the height increase of 1 ½ ft for detached accessory buildings and feels such an increase is unnecessary.

George Kazymowski 741 Lakewood Lane, stated he is building a home and is concerned about the difficulty with trusses pertaining to averaging the height. He stated that if you're working on anything with a grade this will make it even more difficult to determine. He stated that a lot of houses in Michigan have 2-4 steps up to the entrance and removing the word average will create difficulties in the future for 2 story houses.

X. COMMISSIONER'S COMMENT

Estelle DeVooght stated that Rezoning Request #143 and #144 were the messiest plans she's ever seen.

XI. DIRECTOR'S REPORT

Jennifer Thum reported that one of the grants applied for has been denied and she is still waiting to hear on the other one. She also reported that another intern will be starting in September.

Mr. Kinnunen asked about the status of the Gateway Plaza. Ms. Thum reported that McDonald's should be opening soon and she's heard that most of the store fronts are filled.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Planning and Zoning News, July, 2009.
- B. Marquette Township Planning Commission minutes, July 9, 2009.

XIII. ADJOURNMENT

Ken Tabor, Moved, Kendell Milton, Seconded, to adjourn the meeting as there was no further business to address. The meeting adjourned at 9:20 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
MONDAY, SEPTEMBER 14, 2009**

I. MEETING CALLED TO ORDER AT 7:31 PM/ROLL CALL

Present: Chairman Albert Denton, Ken Tabor, Kendell Milton,
Andy Sikkema, Andy Smith

Excused: Steve Kinnunen, Estelle DeVooght

Staff Present: Jennifer Thum (Planning and Community Development),
Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF AUGUST 10, 2009 MEETING MINUTES

Ken Tabor, Moved, Kendell Milton, Seconded, to approve the August 10, 2009, Planning Commission minutes as written.

Ayes 5. Nays 0. Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Ken Tabor, Moved, Andy Sikkema, Seconded, to approve the agenda as written for the September 14, 2009, Chocolay Township Planning Commission meeting.

Ayes 5. Nays 0. Motion approved.

IV. PUBLIC HEARINGS

No public hearings scheduled.

V. PUBLIC COMMENT

No public comment.

VI. PRESENTATION

No presentations scheduled.

VII. OLD BUSINESS

A. PARKS #34-09-02

Agriculture/Forestry (AF); Section 4.7 & 4.4:

The reasoning behind the proposed amendment is that parks were completely omitted from the AF district. In the old zoning ordinance; Parks were a permitted use within the RP district and a conditional use within the RR-2 district.

Proposed Additions:

1. Add to AF Section 4.7 (C) 12. *Parks*
2. Add to WFR Section 4.4 (C) *Parks*

Ms. Thum reported the Township Board wanted the Planning Commission to look at

setting a minimum lot size for a park in the AF and WFR districts.
Discussion ensued pertaining to including a definition of parks. The Commissioners felt that a definition should be developed to better define the amendment.

Andy Sikkema, Moved, Ken Tabor, Seconded, to table this until the October 12, 2009 meeting so a draft definition for Parks can be created for review.

Ayes 5. Nays 0. Motion approved to table until the October meeting.

B. MFR LOT SIZE AND WIDTH #34-09-05

Draft Amendment #34-09-05 – Height and Placement Regulations; Section 6.1:
(Schedule of Regulations)

Existing language:

	District	Minimum Lot Size	Minimum Lot Width
1.	MFR	20 Acres	None

Proposed amended language:

1.	MFR	2 Acres	200 feet
----	-----	---------	----------

Ms. Thum reported that in the MFR, Multiple Family Residential District, the minimum distance between any two buildings on the same site shall be regulated according to the length and height of such buildings. The formula regulating the required minimum distance between the two buildings is as follows:

$$S=La + Lb + 2 (Ha + Hb) /6$$

Where:

S=Required minimum horizontal distance between any wall of Building “A” and any wall of Building “B” or the vertical prolongation of either.

La=Total length of Building “A”. [The total length of Building “A” is the length of that portion or portions of a wall or walls of Building “A” from which, when viewed directly from above, lines drawn perpendicular to Building “A” will intersect any wall of Building “B”.]

Lb=The total length of Building “B” [the total length of Building “B” is the length of that portion or portions of a wall or walls of Building “B” from which when viewed directly from above, lines drawn perpendicular to Building “B” will intersect Building “A”.]

Ha=Height of Building “A” [the height of Building “A” at any given level is the height above natural grade level of any portion or portions of a wall or walls along the length of Building “A”. Natural grade levels shall be the mean level of the ground immediately adjoining the portion or portions of the wall or walls along the total length of the building.]

Andy Sikkema, Moved, Ken Tabor Seconded, to recommend the proposed Draft Amendment #34-09-05 – Height and Placement Regulations as written to the Township Board for approval at their next meeting.

Ayes 5. Nays 0.

C. WOOD BOILER ZONING AMENDMENT #34-09-06

****REVISED****

Ms. Thum provided a revised draft amendment #34-09-06, Outdoor Wood Burners/Furnaces and Appliances; Section 6.5: (Conditions of Approval), Section 6.5 (A) and (B) 1.b.

Proposed amended language: (conditions for approval)

- I. Chimney Heights/Setbacks
 - a. If the outdoor wood burner/furnace or other wood appliance meets the Phase I EPA standards, the outdoor wood burner/furnace or other wood appliance shall be located within 300 feet of the nearest residential dwelling must have a chimney height measured from grade to the chimney top must be a minimum of 2 feet higher than the nearest neighboring principal dwelling.
 - b. If the outdoor wood burner/furnace or other wood appliance meets the Phase II EPA standards, a setback of 50 feet must be met from all lot/property lines, easements, and right-of-ways. The outdoor wood burner/furnace or other wood appliance shall be located at least 200 feet from the nearest residential dwelling not served by the wood appliance. There are no chimney height requirements for a Phase II outdoor wood burner/furnace or other wood appliance.
 - c. If there is an existing outdoor wood burner/furnace or other wood appliance already installed and there is new construction on a previous vacant lot of a residence not served by the outdoor wood burner/furnace or vacant lot of a resident not served by the outdoor wood burner/furnace or other wood boiler within 200 feet of such wood appliance then the owner of such wood appliance shall conform to the stack height requirements of this regulation within 30 days of the date such construction is complete and upon written notice from Chocolay Township.

- II. OWB Regulations:
 - a. No fuel other than natural wood without additives, wood pellets without additives, coal and agricultural seeds in their natural state may be burned;
 - 1) The following fuels are strictly prohibited in new or existing Outdoor Wood burner/furnaces or other wood appliance:
 - i. Wood that has been painted, varnished or coated with similar material and/or has been pressure-treated with preservatives and contains resins or glues as in plywood or other composite wood products.
 - ii. Rubbish or garbage, including but not limited to food wastes, food packaging, or food wraps.
 - iii. Any plastic materials, including but not limited to nylon, PVC, ABS, polystyrene or urethane foam, and synthetic fabrics, plastic films and plastic containers.
 - iv. Rubber, including tires or other synthetic rubber-like products.
 - v. Newspaper, cardboard, or any paper with ink or dye products.
 - vi. Any other items not specifically allowed by the manufacturer or this provision.

- b. Outdoor wood burner/furnace or other wood appliance shall not be located in the front yard;
- c. Granting of a zoning compliance permit, constitutes an agreement between the landowner and Chocolay Township, that the zoning administrator, at any reasonable time, may enter the property for purpose of inspection to determine compliance with conditions;
- d. "Best Burn Practices" as issued by the Environmental Protection Agency shall be followed by all applicants utilizing outdoor wood boilers.
- e. No Outdoor Wood burner/furnace, regardless of the date of installation, is allowed to operate when conditions cause visible smoke plum to cross onto adjacent owner's land and buildings for 12 minutes or more in any hour. Sending smoke on adjacent land or buildings for 12 minutes or more is a nuisance and a violation of the regulation.
- f. Outdoor wood burner/furnace or other wood appliances may only be used from September 1 to May 31 each year.
- g. All outdoor wood-fired boilers shall be equipped with properly functioning spark arrestors.

III. Commercial Outdoor Wood Burner/Furnace or other wood appliance with a rated thermal output greater than 350,000 Btu/hr Analysis Requirement

- a. Any person intending to install or operate a commercial outdoor wood burner/furnace or other wood appliance that has a rated thermal output greater than 350,000 Btu/hr shall obtain an evaluation report and installation recommendations performed by a licensed professional engineer that includes the following information:
 - b. What type of application will the outdoor wood boiler/furnace or other wood appliance be used for;
 - c. A determination of the heat load requirements of the facility as compared to the available heat supply of the outdoor wood boiler to ensure the unit is properly sized.
 - d. The stack location relative to the property lines and building locations within 400 feet of the outdoor wood boiler;
 - e. The stack height; and
 - f. Recommendations for the proper outdoor wood boiler installation, including but not limited to, hook-up, auxiliary fuel, properly sized outdoor wood boiler/furnace or other wood appliance, stack height and location.

Andy Smith reported that he received more information today that should be reviewed and possibly incorporated into the proposed draft amendment. Mr. Smith and Jennifer Thum will work to revise this amendment again and review it at the October meeting.

Al Denton, Moved, Ken Tabor, Seconded, to table this until the next meeting so additional revisions can be made for review.

Ayes 5. Nays 0. Motion approved to table this until the next meeting.

VIII. NEW BUSINESS

A. PLANNING COMMISSION CALENDAR 2010

Jennifer Thum provided the proposed 2010 Planning Commission calendar dates for review and approval. The Commissioners pointed out that September 4th is a Saturday and should be changed to September 6, 2010 and December 1st should be changed to

December 6th, 2010. After these corrections are made, the Planning Commissioners in attendance unanimously approved the 2010 calendar.

Ayes 5 Nays 0

B. 2010 BUDGET

Ms. Thum reported that the proposed 2010 budget for the Planning Commission and the proposed park at the Township Marina was provided for review in the meeting packet. The Planning Commission members in attendance unanimously approved the 2010 budget as written for the Planning Commission and the proposed Township Marina.

Ayes 5 Nays 0

C. LAKENENLAND

Ms. Thum reported that recently an issue was brought to the Township Board's attention that needs to be addressed by the Planning Commission as to what the next step should be. Earlier this year, Mr. Lakenen constructed a band shell on his property without the necessary permits. The County was after Mr. Lakenen and he was required to get a permit. The Township's zoning administrator issued Mr. Lakenen a zoning compliance permit, but Lakenen Land is considered a park and the property is currently zoned AF. As of today, our ordinance does not allow for parks in the AF district, so the permit should not have been issued. However, there is a proposed amendment to permit parks in the AF district. The Township Board does know about the permit being issued and wanted to get feedback from the Planning Commission on what our next step should be. The next step could be to revoke the permit until parks are allowed in the AF district or to do nothing and wait until the proposed amendment gets approved.

After much discussion by the Commissioners, a unanimous decision was made to table this until a definition for "Parks" is developed and approved by the Township Board.

Ayes 5 Nays 0

D. JUNK CAR ORDINANCE

Ms. Thum reported that over the years, we have seen our current Vehicle and Trailers Parking Ordinance (junk car ordinance) fail at protecting some neighborhoods from the blight of junk cars. The current ordinance is not stringent enough to deal with our current junk car problems; it also does not address Recreational Vehicles. The Township is seeing an increase in the number of RVs that are being parked in the front yard. Staff would like to address some of the problems that we are having by reverting back to Vehicle and Trailers Parking, #46, with new language concerning the Recreational Vehicles. At this time, staff is asking for you to review the propose changes and then hold a public hearing next month.

Al Denton, Moved, Andy Smith, Seconded, to hold a public hearing at the October 12, 2009 Planning Commission meeting to discuss the Vehicle and Trailers Parking Ordinance.

Ayes 5 Nays 0 Motion approved.

E. FIRE HALL LOCATION

Ms. Thum provided a map in the meeting packet indicating the proposed location for the new Fire Hall. The proposed site for the Fire Hall is located on two parcels with a total of 7.06 acres. The smaller .46 acre parcel is intended to serve as access to Silver Creek Road and the larger 6.60 acre parcel indented to house the fire hall. Please review the location for its appropriateness for response time, and highest and best use.

The proposed site is currently wooded and used for hiking trails with evidence of four wheeler usage as well. The property is currently zoned Municipal Properties with Fire Stations listed as a permitted principal use. On two separate occasions, staff submitted applications to expand and improve the trail system in this area with a MNRTF grant, but were not successful.

The Commissioners discussed at length constructing a new Fire Hall at a new location and stated they would rather see the current Fire Hall demolished and a new one reconstructed on the same site. The Commissioners felt that the current site is more accessible to US 41, which they felt was important as most fires happen to the south and east. They also felt that having the fire engines go through a residential area is not a good idea.

Staff will work out the details with the Township Fire Department to ensure they are satisfied with the location for their new fire hall as well.

Al Denton, Motioned, Ken Tabor, Seconded to deny moving the proposed new Fire Hall to parcels #52-02-106-038-00 and #52-02-107-059-00.

Ayes 5 Nays 0 Motion approved.

F. TOWNSHIP PROPERTIES

Ms. Thum reported that she included maps in the meeting packet showing the Township owned properties. The Township Board would like the Planning Commission to review all Township owned properties to see if they are still a valuable asset to the Township, and if we are using them to meet the needs of our residents. Ms. Thum requested that the Planning Commission review one property per month so we can work on a full review and put together a detailed report for the Township Board.

After discussion the Commissioners approved the reviewing of the Township Properties with the Beaver Grove properties (#52-02-116-011-10 and #52-02-116-020-10) to be reviewed at the October 12, 2009 meeting.

Ayes 5 Nays 0 Motion approved.

IX. PUBLIC COMMENT

Waynes Dees, 512 Woodvale Drive, stated that he will put his thoughts from the meeting into writing and send it Jennifer Thum. Mr. Dees' did state that having a conditional use for parks is a good idea so the Township will have some control over the operations of and in parks within the Township.

X. COMMISSIONER'S COMMENT

Andy Smith stated that he hopes to finish up the Outdoor Wood Furnaces/Boilers Draft Ordinance with the proposed changes to be reviewed at the next meeting.

Andy Sikkema that the bike trail crossing M-28 is almost completed and the projected tunnel is coming along.

XI. DIRECTOR'S REPORT

Ms. Thum reported that she is 3 months pregnant and her tentative due date is April of 2010. Tom Murray will fill in for her during her maternity leave. Ms. Thum also reported that the Township is looking at hiring a manager to handle the Planning and Zoning, which may result in a couple of Township positions being eliminated.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Planning and Zoning News, August, 2009
- B. County Planning Commission Reviews

XIII. ADJOURNMENT

Ken Tabor, Moved, Kendell Milton, Seconded, to adjourn the meeting as there was no further business to address. The meeting adjourned at 9:03 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
MONDAY, OCTOBER 12, 2009**

I. MEETING CALLED TO ORDER AT 7:31 PM/ROLL CALL

Present: Chairman Albert Denton, Ken Tabor, Kendell Milton,
Andy Sikkema, Andy Smith, Estelle DeVooght

Excused: Steve Kinnunen

Staff Present: Jennifer Thum (Planning and Community Development),
Laurie Vashaw-Eagle (Recording Secretary)

II. APPROVAL OF SEPTEMBER 14, 2009 MEETING MINUTES

Andy Sikkema, Moved, Al Denton, Seconded, to approve the September 14, 2009, Planning Commission minutes after corrections on page 6, VIII) A) change September 6, 2010 Planning Commission Calendar meeting date to September 7, 2010 and on page 9, IX) Public Comment correct Ms. Dees' to Mr. Dees'.

Ayes 6 Nays 0 Motion approved.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Estelle DeVooght, Moved, Andy Sikkema, Seconded, to approve the agenda as written for the October 12, 2009, Chocolay Township Planning Commission meeting.

Ayes 6 Nays 0 Motion approved.

IV. PUBLIC HEARINGS

A. REZONING #144

Tyler Lemire for Kurt Spodeck, 106 West Branch Road, stated that Mr. Spodeck submitted a letter dated June 11 2009 expressing his opposition to the rezoning of this planned development. Mr. Spodeck feels that this type of development should not be done in the Agricultural/Farming district. Mr. Lemire stated that there is the possibility of sewage problems from the houses in this development as each parcel will have its own septic system and feels this type of development does not fit into the area.

Dick Arnold, 312 Co. Road 545, stated that he is in favor of this development and feels it would be a nice addition to the area. Mr. Arnold stated that Mr. Spodeck is operating a business in an area that is zoned rural residential.

B. VEHICLES, TRAILER PARKING, AND STORAGE ORDINANCE

No public comment.

V. PUBLIC COMMENT

Stephanie Gencheff, 597 Lakewood Lane, inquired if there will be a vote on the height of accessory buildings tonight? She would like to state that she opposes any increase in the current height of accessory buildings and is questioning why the change is needed. She feels that the reason the City of Marquette is increasing their height requirement is to encourage the building of mother-in-laws home within the city, which are not permitted in the Township of Chocolay.

Wayne Dees, 512 Wooddale Drive, stated he feels this is unnecessary and doesn't know why it should go through.

VI. PRESENTATION

No presentations scheduled.

VII. OLD BUSINESS

A. HEIGHT FOR ACCESSORY STRUCTURES, #34-09-17

Ms. Thum reported that at the September 21, 2009 Township Board meeting, the trustees thought the idea of increasing the height of the detached accessory structures was worth exploring. However, they wanted to see some language that did not permit the accessory structure to be taller than the primary residential structure. If you recall at the August 10, 2009 Planning Commission meeting, a public hearing was held to discuss increasing the overall height limit of a detached accessory structure.

Responding to concerns from Gary Niemela of Skandia Truss, the Planning Commission was asked to review the current height limit for detached accessory structures. Section 6.1 in the definition section of the Zoning Ordinance currently permit a height of 15'. This height is measured from the average grade of the area covered by the building to the midpoint between the eave and the peak of the structure. Attached garages or accessory structure are regulated by height restriction of the residence. As per Mr. Niemela, the "Attic Truss" that his company produces exceeds the current height restriction and is not legally marketable in our township. From a planning standpoint, our concern is the protection of neighboring property and to ensure that these structures remain at a scale which is accessory to the main structure. This was the reason that staff was asked by the Planning Commissioners to come up with a formula for buildings over 15 ft, so they would not have an impact on the neighboring properties grass/gardens. On September 14, 2009, the commission accepted staff's formula and made a motion to increase the height to 16'6" for a detached accessory structure. The recommended changes are as follows:

R1 District – Side and rear yard setbacks for accessory structures must be increased 2' for every foot over 15'.

R-2 District – Side and rear yard setbacks for accessory structures must be increased 3' for every foot over 15'.

Staff would now like to add language in the motion that states that the detached accessory structure shall not be higher than the primary structure. Staff believes the suggested language bellows covers the trustees concerns with regards to the detached building being taller than the primary one. Also, staff would like to try to put a stop to anyone thinking that they can occupy the detached building and staff added a sentence addressing that.

Estelle DeVooght, Moved, Andy Smith, Seconded, to recommend to the Chocolay Township Board to approve zoning amendment #34-09-17 to raise the maximum height of a detached accessory structure to 16'6". The overall height of the detached accessory structure shall not exceed the height of the principal residence on the property. Detached accessory structures shall not be occupied for dwelling purposes. In order to prevent blocking any sun, the following formula will be attached to any building with a height over 15 ft.

R-1 District – Side and rear yard setbacks for accessory structures must be increased 2'

for every foot over 15’.

R-2 District (Harvey) – Side and rear yard setbacks for accessory structures must be increased 3’ for every foot over 15’.

Ayes 4 Nays 2 Motion approved. (opposed Andy Sikkema, Ken Tabor)

B. PROPOSED ZONING AMENDMENT #34-09-09, DEFINITION AND ACREAGE

Ms. Thum reported that at last month’s meeting, the Planning Commission discussed parks and the Lakenenland property. Listed below is an updated version of an updated definition of a park that staff and Mr. Andy Sikkema worked on:

Draft Amendment #34-09-09

This proposed zoning amendment is being recommended because the definition of parks was not in the ordinance; therefore, this is a recommendation for consideration to the Planning Commission to include Parks within the definition section of the zoning ordinance.

1. Article II, Definitions:

Add to definitions “Park”

Proposed definition:

Park, a publically owned parcel of land, as:

- A. Maintained for recreational and ornamental purposes.
- B. A landscaped Township square.
- C. A large tract of rural land kept in its natural state and usually reserved for the enjoyment and recreation of visitors.
- D. Protected area in its natural or semi-natural state that may consist of rocks, soil, water, flora, fauna and grass areas.
- E. A place where people can hold public festivals/events.

The Township Supervisor would like the Planning Commission to make a decision on how to handle the permit that was issued for the band shell at Lakenenland. We can leave the permit sit, as parks will be added into the AF districts shortly (as a conditional use permit) or we can revoke it and then have him apply for a band shell under a CUP permit.

The previous definition for parks is as follows:

“Park, a noncommercial, not-for-profit, parcel of land, with or without a structure, designed to serve the recreational needs of the residents, including but not limited to playgrounds, sport fields, game courts, beaches, trails, picnicking areas, and leisure time activities.

After much discussion pertaining to publically owned parks and privately owned parks Ken Tabor Moved, Estelle DeVooght, Seconded to table amendment #34-09-09 until November so more research can be done.

Ayes 6 Nays 0 Motion approved to table this until the next meeting.

C. WOOD BOILER ZONING AMENDMENT #34-09-06

Ms. Thum reported that at the last Planning Commission meeting there was more discussion on the wood boiler ordinance. Mr. Andy Smith submitted some suggested changes. Staff feel there should still be an acreage requirement for wood boilers and believe that 5 acres should stay in place.

****REVISED****

Ms. Thum provided a revised draft amendment #34-09-06, Outdoor Wood Burners/Furnaces and Appliances; Section 6.5: (Conditions of Approval), Section 6.5 (A) and (B) 1.b.

Proposed amended language: (conditions for approval)

- I. Chimney Heights/Setbacks
 - a. If the outdoor wood burner/furnace or other wood appliance meets the Phase I EPA standards, the outdoor wood burner/furnace or other wood appliance shall be located within 300 feet of the nearest residential dwelling must have a chimney height measured from grade to the chimney top must be a minimum of 2 feet higher than the nearest neighboring principal dwelling.
 - b. If the outdoor wood burner/furnace or other wood appliance meets the Phase II EPA standards, a setback of 50 feet must be met from all lot/property lines. The outdoor wood burner/furnace or other wood appliance shall be located at least 75 feet from the nearest residential dwelling not served by the wood appliance. There are no chimney height requirements for a Phase II outdoor wood burner/furnace or other wood appliance.
 - c. If there is an existing outdoor wood burner/furnace or other wood appliance already installed and there is new construction on a previous vacant lot of a residence not served by the outdoor wood burner/furnace or vacant lot of a resident not served by the outdoor wood burner/furnace or other wood boiler within 75 feet of such wood appliance then the owner of such wood appliance shall conform to the stack height requirements of this regulation within 30 days of the date such construction is complete and upon written notice from Chocolay Township.
 - d. If there is an existing outdoor wood burner/furnace or other wood appliance already installed and there is new construction on a previous vacant lot of a residence not served by the outdoor wood burner/furnace or other wood boiler within 200 ft. of such wood appliance then the owner of such wood appliance shall conform to the stack height requirements of this regulation within 30 days of the date such construction is complete and upon written notice from Chocolay Township.
- II. Outdoor Wood Burner/Furnace Regulations:
 - a. No fuel other than natural wood without additives, wood pellets without additives, coal and agricultural seeds in their natural state may be burned;
 - 1) The following fuels are strictly prohibited in new or existing Outdoor Wood burner/furnaces or other wood appliance:
 - i. Wood that has been painted, varnished or coated with similar material and/or has been pressure-treated with preservatives and contains resins or glues as in plywood or other composite wood products.

- ii. Rubbish or garbage, including but not limited to food wastes, food packaging, or food wraps.
 - iii. Any plastic materials, including but not limited to nylon, PVC, ABS, polystyrene or urethane foam, and synthetic fabrics, plastic films and plastic containers.
 - iv. Rubber, including tires or other synthetic rubber-like products.
 - v. Newspaper, cardboard, or any paper with ink or dye products.
 - vi. Any other items not specifically allowed by the manufacturer or this provision.
- b. Outdoor wood burner/furnace or other wood appliance shall not be located in the front yard;
 - c. Granting of a zoning compliance permit, constitutes an agreement between the landowner and Chocoley Township, that the zoning administrator, at any reasonable time, may enter the property for purpose of inspection to determine compliance with conditions;
 - d. “Best Burn Practices” as issued by the Environmental Protection Agency shall be followed by all applicants utilizing outdoor wood boilers.
 - e. No Outdoor Wood burner/furnace, regardless of the date of installation, is allowed to operate when conditions cause visible smoke plum to cross onto adjacent owner’s land and buildings for 12 minutes or more in any hour. Sending smoke on adjacent land or buildings for 12 minutes or more is a nuisance and a violation of the regulation.
 - f. Outdoor wood burner/furnace or other wood appliances may only be used from September 1 to May 31 each year.
 - g. All outdoor wood-fired boilers shall be equipped with properly functioning spark arrestors.

III. Commercial Outdoor Wood Burner/Furnace or other wood appliance with a rated thermal output greater than 350,000 Btu/hr Analysis Requirement

- a. Any person intending to install or operate a commercial outdoor wood burner/furnace or other wood appliance that has a rated thermal output greater than 350,000 Btu/hr shall obtain an evaluation report and installation recommendations performed by a licensed professional engineer that includes the following information:
- b. What type of application will the outdoor wood boiler/furnace or other wood appliance be used for;
- c. A determination of the heat load requirements of the facility as compared to the available heat supply of the outdoor wood boiler to ensure the unit is properly sized.
- d. The stack location relative to the property lines and building locations within 400 feet of the outdoor wood boiler;
- e. The stack height; and
- f. Recommendations for the proper outdoor wood boiler installation, including but not limited to, hook-up, auxiliary fuel, properly sized outdoor wood boiler/furnace or other wood appliance, stack height and location.

Kendell Milton, Moved, Ken Tabor, Seconded, to recommend to the Township Board for approval at their next meeting.

Ayes 6 Nays 0 Motion approved.

VIII. NEW BUSINESS

A. REZONING #144

Jennifer Thum reported that Rezoning Request #144 is a request from Mr. Frank Stabile of 121 Vista Hills Drive. The properties in consideration are parcels #52-02-126-019-040, #52-01-126-019-20, and #52-02-019-126-30. These parcels are where the proposed development and approved private road Vista Hills Drive are located. Mr. Stabile has petitioned the Chocolay Township Planning Commission to rezoning the parcels of property from the current zoning classification of AF (Agricultural/Forestry) to PUD (Planned Unit Development). The Planning Commission held a public hearing on August 10, 2009 for the preliminary review. The Commissioners voted to grant Preliminary approval to the applicant at that meeting with a vote of 4 to 1.

The Township Board voted on September 14, 2009 to give the applicant Preliminary approval as well. Staff has received the required information from the County Planning Commission; they were not in favor of this PUD development. The applicant has met all of the required conditions that were placed on him as part of the preliminary approval. Staff would still like to add some language to ensure that the Eastern lots cannot use Vista Hills Drive or the driveway off lot F, since they were removed from this PUD application.

Staff still feels that more open space should be required, and that Mr. Stables lot’s should be included in the entire PUD. However, staff understands that the applicant’s intent since 2002 was develop this land, and one can see that from looking at the plans that went along with the private road application.

Al Denton, Moved, Kendell Milton, Seconded, that following the review of Rezoning Request #144, the Staff/Review, holding a public hearing, and receiving preliminary approval from both the Planning Commission and the Township Board recommends Final approval with the following conditions.

1. The 3.42 acres of open space and the various easements and 15’ buffers shall be recorded with the Marquette County Register of Deeds.
2. The eastern lots if ever developed shall not be allowed access to Vista Hills Trail, the applicant would have to go through the PUD process again to see if the lots would be allowed to use either Vista Hills Trail or the driveway to Lot F.
3. The applicant must obtain all local and county permits that are required before construction.

Ayes 4. Nays 2. Motion approved. (Opposed Estelle DeVooght, Ken Tabor)

B. VEHICLE AND TRAILER PARKING AND STORAGE (JUNK CARS) ORDINANCE

Ms. Thum reported that staff feels the current vehicle/trailer parking and storage ordinance is too lax and leaves staff unable to enforce junk car ordinance violations. Staff have done several site inspections on known problem places and the current ordinance does not allow us to do anything about them. The current ordinance does not place regulations on RV’s, which is becoming a problem in the Township. The Township is also having problems with people allowing their kids or friends to park either their commercial vehicle or a car for sale on their lot. The proposed ordinance would allow the Township to be able to clean up this problem. (See attached).

The Planning Commission members provided approval to continue work on the Vehicle and Trailer Parking and Storage (Junk Cars) Ordinance.

Ayes 6 Nays 0 Motion carried

C. 2009/2010 ROAD RANKINGS

Ms. Thum reported the Township last completed road evaluations/rankings in October, 2007. The Township’s road resurfacing project has been underway for two years. The Township was able to get all of the roads in Harvey resurfaced, and Jean, Juliet, Judy, and Veda in those two years. With the 2010 budget looking at the next road resurfacing project to start up next Spring, we need to prioritize our next road projects. For the first year of the road resurfacing project the Township worked with the road commission. The following year, the Township went out for bids and the bid was awarded to Superior Paving. They finished up a couple of weeks ago, and it appears that they came in under budget. The roads look great and we have had no complaints.

Attached is a spreadsheet detailing the roads that we identified through field inspection that should be prioritized for resurfacing. The roads that have recently been resurfaced are at the bottom and shaded in gray. Also, attached are out field notes regarding all roads that have some significant problems that need to be addressed. The Township staff have ranked the roads according to the Township’s road ranking system. The Planning Commission should review these rankings to determine your recommendation (ranking) to the board.

Ken Tabor, Moved, Al Denton, Seconded to recommend to the Township Board approval of the Road Ranking List that staff and the Planning Commission have agreed to.

Ayes 6 Nays 0

D. BEAVER GROVE RECREATION AREA ANALYSIS

Ms. Thum reported local parks not only serve a recreational purpose, but they also enhance the quality of life for the communities. Each month staff will give an overview of the Township properties and the Planning Commission is to decide if the property is being used to serve our residents. Local parks focus on recreational activities that are generally more intensive and often require highly developed infrastructure (e.g., ball fields, golf courses, and swimming pools), though many local parks also preserve important land and water resources. In reviewing the properties, please look at the neighboring residential development and see if that park fits their needs. The Township is almost all residential and the more places we can offer to them to enjoy locally the better.

Beaver Grove Recreation Area (BGRA):

LOCATION: West of US 41 and north of County Road 480 and is accessible from either road.

SIZE: This is a combination of two parcels making up a 29.1 recreation site.

ZONING: MP

SCHOOL: None.

OBSERVATION: Facilities at this site consist of a baseball field, basketball court, pavilion, tot-lot playground, horseshoe courts, picnic facilities, multi-use open space, hiking trails, parking and restrooms. The Township comprehensive plan states that there are access sites to Big Creek, with fishing opportunities. Staff is not sure if this is

still there. This is done on 15.11 acres; the other 14 acres are leased for agricultural purposes.

IMPLEMENTATION

STRATEGIES: Staff has looked at developing a community garden on the 14 acres that we currently lease for agricultural. There are several community gardens in the Upper Peninsula, one is in Escanaba. Commissioner Sikkema also mentioned that this might be a good spot for a community garden. A question pertaining to a community garden will be put on the upcoming survey that will be sent out to the residents of the Township of Chocoday.

Ayes 6 Nays 0 Motion approved.

IX. PUBLIC COMMENT

Wayne Dees, 512 Woodvale, inquired if staff received his comments from the last meeting.

X. COMMISSIONER'S COMMENT

Ken Tabor inquired about the new flashing sign at the Holiday Station on US 41. Jennifer Thum stated she asked the Zoning Administrator about it and was told the sign is legal.

XI. DIRECTOR'S REPORT

Jennifer Thum reported staff is looking at the budgeting for the proposed new manager position. Ms. Thum also stated that the State revenue sharing was decreased by approximately \$300,000 for the Township, which will have an impact on statutory funds and possibly employee positions.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Marquette Township Planning Commission Minutes, August and September, 2009
- B. Planning and Zoning New, September, 2009

XIII. ADJOURNMENT

Ken Tabor, Moved, Al Denton, Seconded, to adjourn the meeting as there was no further business to address. The meeting adjourned at 9:33 p.m.

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
MONDAY, NOVEMBER 2, 2009**

I. MEETING CALLED TO ORDER AT 7:30 PM/ROLL CALL

Present: Chairman Albert Denton, Ken Tabor, Kendell Milton,
Andy Sikkema, Andy Smith, Estelle DeVooght, Steve Kinnunen

Excused:

Staff Present: Jennifer Thum (Planning and Community Development),
Laurie Vashaw-Eagle (Recording Secretary)

I. APPROVAL OF OCTOBER 12, 2009 MEETING MINUTES

Estelle DeVooght, Moved, Albert Denton, Seconded, to approve the October 12, 2009, Planning Commission minutes as written.

Ayes 7. Nays 0. Motion approved.

I. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Steve Kinnunen, Moved, Estelle DeVooght, Seconded, to approve the agenda as written for the November 2, 2009, Chocolay Township Planning Commission meeting.

Ayes 7. Nays 0. Motion approved.

I. PUBLIC HEARINGS

A. CONTINUATION OF VEHICLES AND TRAILER PARKING AND STORAGE ORDINANCE

No comments from the public.

I. PUBLIC COMMENT

No public comment provided.

I. PRESENTATION

No presentations scheduled.

I. OLD BUSINESS

A. PROPOSED ZONING AMENDMENT #34-09-09, DEFINITION AND ACREAGE

Ms. Thum reported that last month the Planning Commission discussed parks and the Lakenenland property. The new definition was discussed by the Planning Commission last month, but Ms. Thum believes nothing was approved. There was discussion about private vs. public parks and the consensus was to leave a park as public. For this month's discussion, Ms. Thum reported she included a couple of examples for a definition of Private Park, in case you would like to include them in the zoning ordinance. A while ago a proposed zoning amendment did go to the Board for a definition of a park, but this can be changed.

The Township Supervisor would like the Planning Commission to come up with a decision on how to handle the permit that was issued for the band shell at Lakenenland. Ms. Thum stated that the Planning Commission can leave the permit sit, as parks will be added into AF districts shortly (as a conditional use permit) or the permit can be revoked and then have Mr. Lakenen apply for a band shell under a CUP permit. The previous definition for parks stated:

“Park, a noncommercial, not-for-profit, parcel of land, with or without a structure, designed to serve the recreational needs of the residents, including but not limited to playgrounds, sport fields, game courts, beaches, trails, picnicking areas, and leisure time activities.”

There was much discussion by the Planning Commissioners that the definition for a park is a totally separate issue from the Lakenenland issue. The Commissioners agreed to determine the definition for a park at this meeting and address the Lakenenland issue at a later time.

Andy Sikkema, Motioned, Ken Tabor, Seconded to approve the definition of a public park as listed below:

Park, a publically owned parcel of land, as:

- A. Maintained for recreational and ornamental purposes.
- B. A landscaped Township square.
- C. A large tract of rural land kept in its natural state and usually reserved for the enjoyment and recreation of visitors.
- A. Protected area in its natural or semi-natural state that may consist of rocks, soil, water, flora, fauna and grass areas.
- B. A place where people can hold public festivals/events.

Ayes 7. Nays 0. Motion approved.

A. VEHICLE AND TRAILER PARKING AND STORAGE ORDINANCE

Ms. Thum stated that last month there was discussion about the junk car ordinance. As noted last month, the current ordinance does not place regulations on RV's, which is becoming a problem in our Township. With the proposed ordinance, we are hoping to be able to clean up the Township. Ms. Thum discussed that she would like to have the Planning Commission take time putting this ordinance together. She reported that it has also been sent to the police and Township Attorney for their review.

The Commissioners provided some additional revisions to the ordinance, which Ms. Thum will address. The Commissioners agreed to table this until further input from the Township Attorney and Police are received.

Andy Sikkema, Motioned, Ken Tabor, Seconded, to table this until the next meeting to further review and await Township Attorney and Police Department input.

Ayes 7. Nays 0. Motion approved.

I. NEW BUSINESS

A. BLONDEAU FENCE APPLICATION

Jennifer Thum reported that normally Township Staff can approve a fence permit, but since Blondeau Construction is a commercial use, they have to go before the Planning Commission. Staff contacted Mr. David Blondeau about the fence and he stated the reason he was asking for a permit, was that an individual recently fell off of the retaining wall that the fence would sit on. This incident did involve the State Police, so staff sent a FOIA request to Lansing for a copy of the report. Ms. Thum stated that in her opinion, the report shows justification for the fence. Ms. Thum also stated that staff has no problem with the fence, and does feel that one is needed.

Ken Tabor, Motioned, Al Denton, Seconded, to permit Blondeau Construction to install a 4 ft. high chain link fence located on a block retaining wall, permit #2009-94.

Ayes 7. Nays 0. Motion approved.

B. BROWERS RECREATIONAL AREA

Ms. Thum reported the local parks not only serve a recreational purpose, but they also enhance the quality of life for the communities. Each month staff will give an overview of the Township properties and the Planning Commission is to decide if the property is being used to serve our residents. Local parks focus on recreational activities that are generally more intensive and often require highly developed infrastructure (e.g., ball fields, golf courses, and swimming pools), though many local parks also preserve important land and water resources. When reviewing the properties, please look at the neighboring residential development and see if that park fits their needs. The Township

is almost all residential and the more places we can offer to them to enjoy locally the better.

Browsers Recreation Area

History: In 1999 Don Bower donated this 48 acre parcel of land to the Township with hopes that we could use the land to educate the public about nature. His one request was that it had to be developed for youth by the youth. A local youth resident was seeking his Eagle Scout badge and took on this project. He organized a plan, presented it to the Township Board, and added some additional thought on how to use the property (attached).

Location: 430 Kawbawgam Road (see attached map)

Size: 48 acres

Zoning: MP

School: None

Observation:

Currently the area is used for recreational purposes. There is a gravel parking lot at the site, but we have problems with resident's dumping their brush at this site. Also, there is no signage so Ms. Thum stated she doesn't believe the Township residents know where the site is. Ms. Thum thinks this would be a great spot to get the local kids involved and to add some much needed signage. This area has a rough trail for hiking with minimal nature signage.

Implementation

Strategies: Staff has looked at utilizing this area for cross country skiing.

Ms. Thum requested approval from the Commissioners to contact Northern Michigan University to see if they have any groups interested in working to enhance this recreational area. Ms. Thum also reported that in January, 2010, she will bring some sample mission statements and an inventory sample for the Township parks that are being reviewed. She stated that staff will also be looking at the 2010 budget to see if funds for signage can be obtained for the Township parks as some are not identified and hard to find.

Ayes 7. Nays 0.

C. HOLIDAY GAS STATION SIGN

Ms. Thum reported that as requested by the Commission, she has reviewed Section 18 of the Zoning Ordinance relating to signage and its application to the recently installed signage at the Holiday Gas Station. She also reviewed the sign permit dated July 9th, 2009, attached site plan and supplemental; information submitted with the permit.

Since the question at hand is the color electronic message signage, Ms. Thum will concentrate her reference of the ordinance to the pertinent section. Section 18.9 Sign Illumination states that “No sign except time and temperature and similar signs shall have blinking, flashing, fluttering lights, exposed bulbs or other illuminating devices which have a changing light intensity, heightness of color, or any form of animation or moving device.

With every person you ask, you will get a slightly different opinion, but the generally accepted version of a time and temperature sign is the red LED small lights with the black background that shows a static display the temperature. It is also customary that the date appears as well. Beyond that type of display you have an electronic message center and in this case one with several messages, heightness of color, and changing light intensity.

Andy Sikkema suggested to Ms. Thum to contact the Michigan Department of Transportation to make sure the sign is not in the right-of-way.

I. PUBLIC COMMENT

No public comment provided.

I. COMMISSIONER’S COMMENT

No Commissioner’s comments provided.

I. DIRECTOR’S REPORT

Jennifer Thum reported that in January, 2010, an Intern will be working with the Township who is interested in Planning. Ms. Thum is putting together her 2010 Work Plan and will send the Commissioners a hard copy when she’s finished. The Township has applied for a grant to replace all of the current lights along the highway with LED lights from M-28 to the Township border by Sand River. The grant is for \$63,000. She hopes they’ll hear something by December, 2009 or March, 2010. Ms. Thum also reminded everyone that there will not be a Planning Commission meeting in December. She will send everyone a reminder of the January meeting date in the near future.

I. INFORMATIONAL ITEMS AND CORRESPONDENCE

A. Planning and Zoning New, October, 2009

I. ADJOURNMENT

Ken tabor, Moved, Al Denton, Seconded, to adjourn the meeting as there was no further business to address. The meeting adjourned at 8:27 p.m.

There are no minutes for the meeting on January 4, 2010.

The meeting was cancelled.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
MONDAY, FEBRUARY 1, 2010**

I. MEETING CALLED TO ORDER AT 7:30PM/ ROLL CALL

Present: Chairman Al Denton, Dr. Ken Tabor, Kendell Milton, Andy Sikkema, Andy Smith, Estelle De Vooght and Vice Chair Steve Kinnunen

Excused:

Staff Present: Jennifer B. Thum, (Planning Director/Zoning Administrator)

II. APPROVAL OF NOVEMBER 2, 2009 MINUTES

Dr. Ken Tabor moved, Andy Sikkema, Seconded, to approve the November 2, 2009 Planning Commission meeting minutes as written.

III. ADDITIONAL ITEMS/APPROVAL OF AGENDA

Chairperson Al Denton stated that there will be two additional items under, VIII New Business, Update on Zoning Issues and MDOT Pedestrian Bridge to the agenda. Steve Kinnunen, moved to add to VIII New Business, F. Update on Zoning Issues and VIII. G. MDOT Pedestrian Bridge to the agenda for discussion, Seconded by Al Denton to approve the agenda for February 1, 2010.

IV. PUBLIC HEARINGS

A. Proposed Zoning Amendment 34-10-01, Section 17.2 of the Township Zoning Ordinance.

No comments from the public.

Ms. Thum stated that changes had to be made to the current Ordinance, since the Planning Director and Zoning Administrator are one position. In the event that the Zoning Administrator is absent for more than five (5) days, the Township Board could appoint someone or the Township Assessor could fill in. It's up to the Planning Commission to decide what wording should be placed in the Ordinance.

V. PUBLIC COMMENT

No public comment was given.

VI. PRESENTATION

No presentations scheduled

VII. OLD BUSINESS

A. Junk Car Ordinance

Ms. Thum reported that over the last couple of months she has been working with the Township Attorney to make sure the language works for both the Township staff and residents. The Planning Commission reviewed the proposed Vehicle Storage and Parking Ordinance and did not have any changes to it as of yet. Andy Sikkema and Steve Kinnunen stressed that we should not do anything further until the Police Department had submitted their suggestions. They would like for the Police Department to review and then they will look it over one final time, before sending it the County and then the Township Board.

Steve Kinnunen, Motioned to table this item until the Police Department can review it Ken Tabor, Seconded to table this item until the Police Department can review it.

VIII. NEW BUSINESS

A. Proposed Section 17.2 of the Township Zoning Ordinance

Ms. Thum went over the background of the Township Zoning Ordinance and that it states that the Township Zoning Administrator shall be appointed by the Township Board. The current Zoning Ordinance in Section 17.2 provides for the Planning Director to be allowed to issue Zoning Compliance Permits in the event that the Zoning Administrator is absent for a period of five (5) consecutive business days due to illnesses, vacation, etc.

Ms. Thum stated that at the beginning of this year she took over the responsibilities of Zoning Administrator and, therefore, that section in the Ordinance will need to be changed. Ms. Thum stated that either the language could read the Township Board could appoint someone or, the language could just state that Township Assessor would be able to assume the duties of the Zoning Administrator when she would be absent for those five (5) days.

Ms. Thum went over the procedure and the next step to adopting this amendment change.

Al Denton, Motioned, Ken Tabor, Supported to approve the language stating that in the event that the Zoning Administrator is absent from work for a period of more than five (5) consecutive days due to illness, vacation, or for any other reason, the authority to issue a Zoning Compliance Permit in accordance shall devolve upon the Township Assessor and the duties shall remain with the Township Assessor for the duration of such vacancy or absence.

B. TOP PRIORITIES FOR 2010

Ms. Thum stated that this is the same thing that they did last year. The Planning Commission needs to choose a couple of items that they can focus on for 2010.

Ms. Thum stated some of her thoughts for 2010 were:

- Park at Township Marina
- MDOT Enhancement Grant
- Township Comprehensive Plan Update
- Recreational Plan Update

The Commissioners discussed a couple of other items and felt that updating the Township Sign Ordinance should be on the list and doing something with the Bowler property as well.

Steve Kinnuen stated that the Sign Ordinance revision should be the top priority for right now and that it needs to get on the next Planning Commission Agenda.

Al Denton inquired about the Bowler property and if we could donate it to NMU.

Ms. Thum explained that she believed that, according to the agreement, the Township has to retain it, but the site is supposed to be something that the Township kids can utilize.

Ms. Thum stated that she did contact a Biology Professor at NMU (also a Chocolaty Township resident) and was stated that she would pass on the information to the Biology Department Head. As of the meeting, Ms. Thum has not heard from the Department Head.

The List of the Planning Commission Top Priorities are as follows and in no particular order:

1. Township Recreational Plan update
2. Township Comprehensive Plan update
3. Review all the Township properties.
4. Sign Ordinance
5. MDOT Enhancement Grant
6. Brower Property
7. Intersection at US 41/ M-28 (landscaping)

C. COMPREHENSIVE PLAN UPDATE

Ms. Thum went over the proposed work plan and stated that there could be some possible changes. She will work on a couple of dates for community work sessions for our next meeting. She asked for a couple of individuals on the Planning Commission that might be interested in serving on the Sub-Committee.

Estelle DeVooght stated that she would be interested, and so did Andy Sikkema. Ms. Thum stated that the Township Board will probably suggest Dr. Ken Tabor, but she is not sure. Ms. Thum stated that she does have commitments from a couple of the residents who would sit on the Sub-Committee.

The Planning Commission approved the Township Comprehensive Work Plan Update.

D. NOISE ORDINANCE

Ms. Thum explained that she received a phone call from Dr. Scott Emerson stating that he had concerns about the “jake brakes” use in our Township. Al Denton explained what “jake brakes” were and went over how the only community in Marquette County that regulated them was the City of Negaunee. Andy Sikkema explained that the State of Michigan can not regulate their use on any State owned road which would be US 41 and M-28. The Township could look at doing something for Cherry Creek Road. Andy Smith stated that he advises his guys not to use them. The other Commissions agreed that revising the noise ordinance to not allow “jake brakes” was not necessary at this time.

D. POSSIBLE ZONING AMENDMENTS

Ms. Thum explained that she was speaking with a local realtor concerning the old Bell Hospital in Harvey. Under the new Township Ordinance, medical centers are not listed as a Conditional Use for the R-2 (Harvey) District. Ms. Thum also thought the Planning Commission could review adding a couple of additional items to that list. The Commissioners asked about the number of amendments. Ms. Thum stated that we might have some more down the road. She is going to try and go over the Ordinance page by page and compare it to the old one to see what else was left out.

Steve Kinnunen, Motioned, Ken Tabor, Seconded, to hold a public hearing next month to update Section IV, Zoning District Regulations, Permitted and Conditional Uses to see if additional language is needed.

D. UPDATE ON ALL OUTSTANDING ISSUES

Ms. Thum explained that she was asked to discuss with the Planning Commission and the Zoning Board of Appeals several issues in the Township that were raised by both Trustee Maki and the Township Board. Ms. Thum went down the list and the Planning Commission responded to each one.

D. MDOT PEDESTRAIN TUNNEL

Ms. Thum explained that she was contacted by Al Anderson from MDOT concerning a possible change to the tunnel design. A spokesperson from UP Concrete and Pipe went over the possible changes to the tunnel. Andy Sikkema also made comments about the proposed changes. He was concerned with the sidewalk and it would not be narrower due to the change in the headwall. Ms. Thum also stated that was her concern as well.

Andy Sikkema, Motioned, Al Denton, Seconded to let staff work with Al Anderson from MDOT concerning the tunnel and there would be no need for this project to go back to the Townships.

IX. PUBLIC COMMENT

No public comment provided

X. COMMISSIONER'S COMMENT

Steve Kinnuen mentioned that we really do need to do something about the signs. The other Commissioners felt that we should look at technology and how it's going to affect our sign ordinance.

Al Denton mentioned that he would be retiring from the Planning Commission in April due to personal reasons.

XI DIRECTOR'S REPORT

Ms. Thum talked about the County notice of working on the Zoning Chapter of the Marquette County Comprehensive Plan.

More discussion about the Brower property.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Marquette Township Planning Commission Minutes, December 14, 2009 and December 16, 2009.
- B. City of Marquette Planning Commission Minutes, December 15, 2009

XI. ADJOURNMENT

Albert Denton, Chairperson

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
MONDAY, MARCH, 1, 2010**

I. Meeting Called to Order at 7:30pm/Roll Call

Present: Chairman Al Denton, Andy Sikkema, Kendell Milton, Estelle De Vooght

Absent – Excused, Dr. Ken Tabor, Steve Kinnunen
Unexcused: Andy Smith

Staff Present: Jennifer B. Thum, Planner/Zoning Administrator

I. Approval of February 1, 2010 Minutes

Estelle De Vooght moved, Andy Sikkema, Seconded, to approve the February 1, 2010 Planning Commission meeting minutes. Andy Sikkema stated that on pages 4 and 5 Brower property was spelled incorrectly. Staff will make the corrections.

I. Additional items/approval of Agenda

Kendell Milton moved, Andy Sikkema, Seconded to approve the March 1, 2010 Planning Commission Agenda as presented.

I. Public Hearings

A. Proposed Zoning Amendment 34-10-02, Section IV. Zoning Districts

Jennifer Thum, Planner/Zoning Administrator explained what the proposed zoning amendment was for. The background to the proposed Zoning Amendment was that under the old Zoning District, R-3, nursing homes and medical clinics were a conditional use. When the Township updated our Zoning Ordinance in 2008, those uses were omitted from the Conditional Use section. The Township needs to explore adding those uses back in and might want to explore Veterinary Clinics and General Office as potential Conditional Uses as well.

No Public Comment was made.

A. Proposed Sign Ordinance

Jennifer Thum, Planner/Zoning Administrator explained that after past discussion about the current Sign Ordinance, Section 18 in the Township Zoning Ordinance, staff and the PC decided that it should be updated. Staff worked on a new Sign Ordinance, one that includes definitions, and permit, violation and appeal process. Ms. Thum went over that this Ordinance update will take a while, as she wants to discuss it with various groups in Chocolay Township.

No Public Comment

Public Hearing was closed for both items.

I. Public Comment

No Public Comment

I. Presentations

None were scheduled

VII. Old Business

None

I. New Business

A. Proposed Zoning Amendment #34-10-02, Section IV of the Township Zoning Ordinance.

REASON FOR PROPOSED AMENDMENT

This proposed zoning amendment is being recommended because the language concerning nursing homes and clinics was intended, but inadvertently left out of the new Zoning Ordinance.

IV. Zoning District Regulations

BACKGROUND

Add to Zoning District, High Density Residential District (R-2) (Harvey), as a Conditional Use Permit the following;

- #8 Nursing Homes
- #9 Clinics, medical and veterinary
- #10 General offices

Estelle De Vooght questioned if a Veterinary Clinic would be compatible with a Residential District.

Kendell Milton questioned if the dogs would be too noisy or if they would be kenneled outside.

Sikkema was wondering if we needed to explore definitions for a veterinary clinic and go from there.

Al Denton was thinking that nursing homes require a large building and decent amount of parking.

The Planning Commission directed staff to look into definitions for veterinary clinics and general office and then to bring those to next month's meeting. Ms. Thum also stated that she will have maps printed out so the Commissioners could see what areas in Harvey are specifically zoned as Commercial.

Andy Sikkema, moved, Seconded by Al Denton to hold another public hearing next month and to discuss possible definitions for veterinary clinics and general office.

A. Proposed Sign Ordinance

The Commissioners and staff went through the proposed Sign Ordinance page-by-page and staff had the proposed Ordinances on the screen.

Page 1:

The intent looked good.

Page 2:

The Commissioners wanted to change the time that abandoned conforming and non-conforming signs were permitted to stay up. Al Denton suggested that abandoned conforming signs be given 90 days and signs be given 30 days. Mr. Denton also suggested that staff work on some language that allowed people to get a waiver if they needed more time for either conforming or non-conforming.

Page 3:

The Commissioners were wondering if we should add language about the number of times the electronic signs could change if we do end up allowing them. Also, to explore language about TV's and video monitors in windows, which constitute as signage.

Page 4:

Andy Sikkema had a question on what "internally illuminated" meant. Staff will explore the current definition and see if it needs to be adjusted.

Page 5:

The Commissioners brought up the wording for Wall Sign and thought that it might be confusing with the last paragraph on page 6. Staff will work on the wording to make sure it's clearer to the public.

Page 6:

The Commissioners made a note of the letter and numbering conflict under Section 18.5. Staff will change this. The Commissioners also noted that under Abandonment, the number of days needs to be changed to 30.

Page 7:

Al Denton, noted that under height of signs, the sign should not exceed the length of the building.

Page 8:

Kendell Milton and Estelle DeVooght asked about regulations for residential neighborhoods. Wanted to make sure that you could still have signage, but wanted to make sure the lighting was soft. Ms. Thum stated that she would work on some language that would allow for the address number to be lighted and the possibility of a home occupation sign being lighted.

The Commissioners also questions video signs. Andy Sikkema will check with MDOT to see what regulations they have on billboards. Ms. Thum stated that regulating billboards might be something to look into as well.

Andy Sikkema made a comment concerning signs in the right-of-way. There should be a sentence included in Section 18.5 #6 to state that signs could be permitted, as long as they get a permit from the road jurisdiction.

Page 9:

Ms. Thum stated that she would have to change the number of days under abandoned sign.

Al Denton made the suggestion that Section 18.4 # 5, Permanent Window Signs, include specific language that states "That the window sign may not occupy not more than 25% of an individual window"

Page 10:

No Comment

Page 11:

The Commissioners pointed out that under Section 18.5 #3, there should be some mention of MCRC/MDOT jurisdiction.

Page 12:

No Comment

Page 13:

Ms. Thum stated that she was not sure if they needed Section 18.6 #3, as it's already stated in Section 18.5. She will double check with our attorney.

Page 14:

No Comment

Page 15:

No Comment

XI. Public Comment

No Comment

X. Commissioners Comment

Ms. DeVooght and Mr. Denton inquired about the definition for natural grade and that Marquette Township is having a problem with their definition. Ms. Thum stated she will check into the Marquette Township issue.

Mr. Sikkema wanted to make sure the Township moves forward on the alternative energy ordinance, as windmills and solar energy are becoming quite popular.

XI. Directors Report

Ms. Thum informed the Planning Commission about the upcoming website changes.

IV. Public Hearings

A. Proposed Zoning Amendment 34-10-02

IV. Zoning District Regulations

Add to Zoning District, High Density Residential District (R-2) (Harvey), as a Conditional Use Permit- General Office, Nursing Homes, and Medical/ Veterinary Clinics.

V. Public Comment

Paul Wolfson- from Select Realty commented on proposed Zoning Amendment 34-10-02. They have a pending sale of the property. This use was also previously allowed under Conditional Use.

Greg Perttula- CFO at Bell hospital commented regarding the process of rezoning and that they would like to get the medical and the clinic conditional use for the property and provide the Township with tax revenues.

VI. Presentations

None were scheduled

VII. Old Business

a. Comprehensive Plan update.

Ms. Fuller stated the Township was officially awarded a Coastal Management Grant to assist the Township with updating the Townships Comprehensive Plan. The first step would be to form a subcommittee meet to review our current Township Comprehensive Plan to see what chapters needed to be modified and topics to consider adding. De Vooght questioned why we needed to update the Comprehensive plan when we just paid \$40,000. Denton stated, the board should take a look at it every couple of years, Not to rewrite it: just to see if it needs updating. Have Superior Watershed Partnership take a look. Get somebody at CABA and NMU to form a full committee.

b. Zoning Amendment 34-10-03 Section IV. of Zoning Ordinance.

Denton, which one do we suggest to the board. We don't have anything from Township attorney. We have sample definitions of general office and veterinary clinics. **General**

Office: The office of a recognized profession maintained for the conduct of that profession, such as doctor, lawyer, real estate, and architect/engineering firm; or A building or portion of a building wherein services are performed involving predominantly administrative, professional, or clerical operations. An office shall not include a clinic or the production, distribution or sales of goods or commodities which are physically located on the premises

Veterinary Clinics: A place where animals are given medical care and the boarding of animals is limited to short-term care incidental to the hospital use; or a place used for the diagnosis, care, and treatment of sick, injured, or infirmed animals or those in need of medical or surgical attention. Such a place may include provision for temporary boarding of animals for treatment, observation, or recuperation.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MEETING MINUTES
MONDAY, APRIL 5, 2010**

Andy Sikkema moved, *Ken Tabor*, Seconded to hold a public hearing next month for proposed zoning amendment #34-10-03, which will propose to add the following definition for **General Office**: A building or portion of a building wherein services are performed involving predominantly administrative, professional, or clerical operations. An office shall not include a clinic or the production, distribution or sales of goods or commodities which are physically located on the premises and **Veterinary Clinics**: A place used for the diagnosis, care, and treatment of sick, injured, or infirmed animals or those in need of medical or surgical attention. Such a place may include provision for temporary boarding of animals for treatment, observation, or recuperation to the Township Zoning Ordinance.

AYES ⁵⁴ NAYS 0 MOTION CARRIED

VIII. New Business

a. Fire Hall locations.

Chief Gary Johnson is in the process of writing RFP design requirements for a new fire hall. Not in a position to build within next few years and will not be able to get a grant until the project is "shovel ready". They are currently looking at sites and have concerns about space. They are considering a 15, 000 square foot building. The current fire hall will have to stay until new building is finished. To look at in future, this new hall will need to be around 30 to 40 years if not longer. The Township is looking at municipal water and will need a Water Department; The Police Department continues to grow. In your packet information from County Planner Eric Anderson, he put every address on map and how many driving miles to those areas. There were two good locations- one next to Meister's and the other next to Silver Creek School. Denton asked if there was a big advantage to having fire hall at those locations and is in favor of the fire department staying at the current locations.

A. Good access to US 41 and M-28, near population, churches, schools etc...

B. The department needs to get plans in place.

Kendell Milton moved, *Andy Sikkema*, Seconded to table further discussion until the next meeting.

AYES ⁵⁴ NAYS 0 MOTION CARRIED

b. Alternative Energy Discussions

Last year the Planning Commission established a subcommittee to explore an Alternate Energy Ordinance. There are some communities that discuss alternative energy in their Comprehensive Plan and create an overlay district the becomes part of the Zoning Ordinance. It would be good to get a professional involvement so our measurements are accurate. Should we do something jointly with the City of Marquette or Sands Township?

Ken Tabor moved, *Estelle De Vooght*, seconded to have the subcommittee for Alternative Energy start up again. Also to include a chapter in our Comprehensive Plan Dealing with Alternative Energy. The Planning Commission will then explore if they want to create an overlay district or just include language part of the existing zoning ordinance under Section IV. General Provisions

c. Park Analysis

- Green Bay Street River Access-
- Green Garden Road River Access -

Denton- Township supervisor said send letter to people within 300 feet. Thinks maybe the DNR needs to complete a trail because a lot of people go fishing there. There's room for parking spots there and a sign at each location that says it's Township property would be nice. It's open to the public and you can take your grandchildren down there and fish if you want. Lets maintain these areas for fishing access. The banks and road areas at both locations need to be repaired to prevent further erosion. *See attached recommendations-*

d. Township Sign Ordinance

We need a motion to hold a public hearing in the next month to review the proposed Sign Ordinance.

Ken Tabor moved, *Estelle De Vooght* seconded, to hold a public hearing to discuss the proposed sign ordinance at the May 3, 2010 Planning Commission. *Kendell Milton* is appointed to serve on the Sign Ordinance subcommittee.

Replace current ordinance language as amended April 21, 2008 with ordinance language previously used and adopted May 9, 1977, Sec 402 Frontage Requirements. * see attached pages *

Draft Amendment #34-10-11

Section 10: 10.1 Uses Permitted, Minimum Size and Fees

2. All zoning districts are eligible for consideration for rezoning to a Planned Unit Development District **(revise to: Zoning districts R-1, R-2, MFR, Commercial and Industrial are eligible for consideration for rezoning to a Planned Unit Development District)**

Draft Amendment #34-10-12

Section 16: 16.3 Fees

Neither the Township Planning Commission nor the Zoning Board of Appeals shall consider any matter until there is first paid a fee, except that such fee shall not be required where the Township **(insert: Board)** or any official body thereof is the moving party. The Township Board, by resolution, shall set all fees. The Township Board, by resolution, may change these fees, from time to time, as they determine appropriate.

V. Public Comment

Draft Amendment #34-10-07

Lee Blondeau - Contractors yards should be allowed in the Commercial districts. There is a need to have them and it is a commercial use.

Tom Mahaney - Sees no need not to allow storage units and contractors yard in a commercial district.

Draft Amendment #34-10-07

Lee Blondeau – There may need to be a reason to waive certain fees for individuals in special circumstances

Wayne Dees – Does not think the intent of the proposed text wording from Mr. Maki was not to allow any fees to be waived by the Township Board.

Wayne Dees – Wanted to thank Andy Smith for his support to have him be a member of the planning commission. Wanted to inform the board he has filed a complaint with the Michigan Administrative Agency for discrimination.

VI. PRESENTATIONS

Adam C. Wert- Introduction- Mr. Wert is in the process of purchasing the salvage yard from Tom Waselesky with the intention of reducing the size of the yard, clearing and improving the location of the current salvage operation.

VIII. NEW BUSINESS

A. Proposed Text Amendments to the Zoning Ordinance 34-10-05 to 43-10-12:

Trustee Mark Maki, has made application to have the Planning Commission review the following proposed text amendments to the Chocoday Township Zoning Ordinance.

Mr. Maki was not present for the meeting to review the seven (7) draft text amendment proposals he has made. He had not offered written comment or background reasoning for making the suggested amendments for the Planning Commission to review.

Comment was made by Vice Chair Andy Smith that no complaints have been made by the general public or an actual error in the text had been noted by the Planning Commission or Township Staff. The amendments probably should not have been presented for consideration.

Draft Amendment 34-10-05

Section 4: 4.1 Single Family Residential District (R1)
(C) Conditional Uses

4. Swimming pools (delete)

Andy Smith , move *Estelle DeVooght*, Second to *Deny* Proposed **Text Amendment 34-10-05**, to remove “swimming pools” as a conditional use in Section 4: 4.1 Single Family Residential District (R1) and to recommend acceptance by the Chocoday Township Board.

AYES 3 NAYS 2 MOTION CARRIED

Section 16: 16.3 Fees

*Neither the Township Planning Commission nor the Zoning Board of Appeals shall consider any matter until there is first paid a fee, except that such fee shall not be required where the Township (**insert: Board**) or any official body thereof is the moving party. The Township Board, by resolution, shall set all fees. The Township Board, by resolution, may change these fees, from time to time, as they determine appropriate. (**Add: The Township Board shall not waive any fees for individual requests.**)*

*Andy Sikkema, move Andy Smith, Second to Deny Proposed **Text Amendment 34-10-12** adding wording to Section 16: 16.3 Fees; Neither the Township Planning Commission nor the Zoning Board of Appeals shall consider any matter until there is first paid a fee, except that such fee shall not be required where the Township **Board(was approved to be added to the language)** or any official body thereof is the moving party. The Township Board, by resolution, shall set all fees. The Township Board, by resolution, may change these fees, from time to time, as they determine appropriate. **The Township Board shall not waive any fees for individual requests.***

AYES 5 NAYS 0 MOTION CARRIED

B. Memo to propose a text Amendment in (AF) District

Staff has asked the Planning Commission to consider adding the following text amendments in the (AF) District and hold a public hearing at their July 12, 2010, meeting.

The Planning Commission may want to consider a minimum acreage for agricultural uses. The (AF) District currently has 523 parcels with less than 20 acres which are now allowed by zoning to be used to for agriculture purposes as defined in the Zoning Ordinance.

The State has also expanded the definition of Agriculture Property and the types of animals and businesses considered agriculture. The Township is becoming home to a variety of nontraditional "farm" animals such as Llama, Alpaca, and Buffalo... Etc. The Assessing office has been receiving requests for information from property owners wanting to raise poultry in our residential areas and smaller lots in the (AF)

Proposed Text Amendment 34-10-13

Section 4: 4.7 Agriculture / Forestry District (AF)

(B) Permitted Uses:

2. Agriculture livestock on lots of 20 acres or more

6. Poultry on lots of 5 acres or more

Ken Tabor move, Andy Smith second to hold a public hearing to hold a discussion and review the proposed text amendments to the Chocolay Township Zoning Ordinance (as amended April 21, 2008) to propose a minimum acreage to raise livestock and poultry in Section 4.7 Agriculture / Forestry District (AF)

C. Memo to propose a text amendment to add to definition of Agriculture.

Proposed Text Amendment 34-10-14

Section 2: Definitions

Agriculture: Farming in all its branches, including cultivating soil. Growing and harvesting any agricultural, horticultural, or floricultural commodity and Dairying. Raising livestock, bees, fish, fur-bearing animals, or poultry, including operating a game bird hunting preserve licensed under part 417 of the natural resources and environmental protection act, 1994 PA 451, MCL 324.41701 to 324.41712, and also including farming operations that harvest cervidae on site where not less than 60% of the cervidae were born as part of the farming operation. As used in this paragraph, "livestock" includes, but is not limited to, cattle, sheep, new world camelids, goats, bison, privately owned cervids, ratites, swine, equine, poultry, aquaculture, and rabbits. (Livestock does not include dogs and cats). Raising, breeding, training, leasing, or boarding horses. Turf and tree farming. Performing any practices on a farm incident to, or in conjunction with, farming operations. Agricultural uses include use in a federal acreage set-aside program or a federal conservation reserve program.

A commercial storage, processing, distribution, marketing, or shipping operations and management and harvesting of a wood lot are not part of agricultural operations.

Ken Tabor move, Andy Smith second to hold a public hearing to hold a discussion and review the proposed text amendments to the Chocolay Township Zoning Ordinance (as amended April 21, 2008) to propose changes and additions to the agriculture definition under Section 2: Definitions.

D. Memo to add Wireless Communication Facilities as a conditional use under Section 4.7.

Staff asked the Planning Commission to consider adding the following text amendment to the (AF) District and hold a public hearing at their July 12, 2010, meeting.

Section 13 of the Zoning Ordinance defines conditions and requirements for accommodating Wireless Communication Facilities. Subsection (B) defines standards and conditions for the facilities to be located in the (AF) district. When referring back to Section 4.7 Agriculture/ Forestry District, the facilities mentioned in Section 13 (B) are not listed as a permitted or conditional use.

The Planning Commission is asked to consider adding Wireless Communication Facilities as a Conditional Use in Section 4.7 Agriculture/ Forestry District.

Proposed Text Amendment 34-10-15

Section 4: 4.7 Agriculture / Forestry District (AF)

(C) Conditional Uses:

14. Wireless Communication Facilities

Ken Tabor move, *Andy Sikkema* second to hold a public hearing to review the proposed text amendments to the Chocolay Township Zoning Ordinance (as amended April 21, 2008) on July 12.

E. Memo to add a subsection regulating private swimming pools to Section 6. General Provisions

Currently swimming pools are listed as conditional uses in the residential districts. It has been suggested in Mr. Maki's proposed text amendment to remove the regulation of pools from the zoning ordinance.

About 3,000 people, many of the children, in the United States drown each year and many more suffer serious, irreversible injury in near-drowning incidents. Brain damage can accrue after 4 minutes of being submerged; an estimated 20 percent of victims will suffer severe, permanent neurological disability. One of the most tragic aspects of these injuries and deaths is that they are preventable. Layers of protection are recommended to help prevent pool related death and injuries. This includes, constant supervision of young children, placing barriers such as fences with self-closing, self-latching gates around the pool to prevent access.

Chocolay Township's Zoning Ordinance, Section 18.13 Fences, also does not address the issues and enforcement of required fencing, specific to safety for private swimming pools. There are no review standards in the zoning ordinance or site plan review in order to make determinations and conditions to have swimming pools.

Staff asks the Planning Commission to consider adding the following text amendment to Section 6 General provisions and adding a subsection to

regulate private swimming pools in any zoning district and hold a public hearing at their July 12, 2010, meeting.

Proposed Text Amendment 34-10-16 Section 6: 6.14 Swimming Pools

A swimming pool is any outdoor enclosure located at a private residence designed, intended, or used for the containment of water over twenty-four (24) inches deep, whether construction is below ground level or above ground level. This includes in-ground, above-ground and on-ground swimming pools, hot tubs and spas used for swimming, wading, or other recreational use by owner or tenant of the property upon which the pool is constructed, or by their family or invited guests without payment or fee.

A. A swimming pool or appurtenances thereto shall not be constructed, installed, enlarged or altered until an approved Chocolay Township zoning compliance application and a Marquette County building permit have been obtained.

B. The outside edge of the pool wall shall not be located closer than ten (10) feet from any rear or side property line. Swimming pools shall not be located in the front yard.

C. Each pool shall be enclosed by a fence or wall with a height of at least four (4) feet, sufficient to make such body of water inaccessible to small children. Such enclosure, including gates therein, must not be less than (4) feet above the underlying ground; all gates must be self-latching with latches placed four (4) feet above the underlying ground or otherwise made inaccessible from the outside to small children.

D. All swimming pool installations shall comply with the building codes in force in Marquette County and all standard codes referred to therein.

Ken Tabor move, *Estelle DeVooght* second to hold a public hearing to review the proposed text amendments to regulate private swimming pools to the Chocolay Township Zoning Ordinance (as amended April 21, 2008) on July 12, 2010.

IX. PUBLIC COMMENT

NO COMMENT

X. COMMISSIONER'S COMMENT

Ken Tabor, move Andy Sikkema, second for the Chocolay Township Board to support a "Resolution of Appreciation" for Steve Kinnunen.

XIII. ADJOURNMENT

Andy Smith, move Ken Tabor, second to adjourn the meeting at 9:30 PM.

Kendall Milton
Chairperson

Charter Township of Chocolay

Planning Commission Agenda

Monday, July 12, 2010

I. Meeting called to Order at 7:30 P.M. / Roll Call

Present: Chairperson: Kendell Milton, Vice Chairperson: Andy Smith, Estelle Devooght, Andy Sikkema, Dr. Ken Tabor and Eric Meister.

II. Approval of June 7, 2010 Minutes

Ms. Thum stated that she has a correction to the minutes. Under public comment, Wayne Dees statement should have read, "Wayne Dees stated that he filed a complaint with the Michigan Administrative Agency for discrimination."

Sikkema requested that Zoning Amendment #34-10-12 be corrected in that the Planning Commission denied adding the language, "The Township Board shall not waive any fees for individual request." They approved inserting the word Board after Township on the third sentence in Section 16.3.

Tabor moved and Sikkema seconded to approve the June 7, 2010 minutes.

AYES 6 NAYS 6 MOTION CARRIED

III. Additional Agenda Items / Approval of Agenda

Sikkema moved and Tabor seconded to approve the agenda as is.

Mr. Maki 270 Karen Road requested that the Board table all proposed zoning amendments until staff has had a chance to review them and write a report.

IV. Public Hearings

A. Proposed Zoning Amendment #34-10-13

Ms. Thum stated that this proposed amendment has to do with regulating livestock on 20 acres and this includes horses, cattle, rabbits and other livestock animals. The other part of this amendment was to only permit chicken(s) on 2 acres or more and to limit the number of chickens to 4 and no roosters would be permitted. Ms. Thum stated that she is not in favor of the 20 acres minimum for livestock. There are several municipalities that permit one horse per acre or set a minimum of 5 acres.

The Planning Commission Discussed.

Mr. Meister stated that he spoke with the MSU Extension office and they stated that typically see one horse for every one or two acres.

Mr. Milton stated that he would have to agree that the 20 acres does sound like to much.

Mr. Sikkema stated that zoning is there to regulate the use, so is a neighborhood that is zoned AF impacted by animals? A person would have to expect that if you are moving to an AF District that you would expect to see livestock. The chickens on lots of 2 acres or more, a person may not expect to see chickens on their neighbor's

property if the property was zoned Residential. What is the property owner's expectation in the AF District and the R-1 District?

Dick Arnold, 312 W. Branch Rd stated that his surrounding neighborhood is now zoned AF and that has created problems from contractor's yard to raising animals on small 5 acres. He believes that we are planning for the minority and not the majority.

Mr. Maki 370 Karen Road wanted to know who requested to have amendments #34-10-13 through #34-10-16.

B. Proposed Zoning Amendment #34-10-14

Ms. Thum stated that this proposed amendment was to amend the current definition of agriculture. Ms. Thum read the proposed ordinance.

The commissioners stated that rabbits should not be classified as livestock. Ms. Thum agreed with that statement stating that rabbits have a low impact on the neighborhoods. Staff will work on a new definition for next month's meeting.

C. Proposed Zoning Amendment #34-10-15

Ms. Thum stated that this proposed zoning amendment was to add wireless communication towers to the Agriculture/Forest District. Ms. Thum stated that they have not had any request for towers in the AF District.

D. Proposed Zoning Amendment #34-10-16

Ms. Thum stated that this proposed zoning amendment was to regulate swimming pools under Section 6.14 General Regulations. Ms. Thum stated that this was to address proposed amendments #34-10-05 and #34-10-06 which requested that swimming pools be removed as Conditional Uses from Section 4.1 and 4.2.

Lee Blondeau 1002 N. Tracie LN stated that the type of pool should be considered as a person should not have to spend more on a permit than the actual pool. The Planning Commission should look at categorizing the pools if a fee is going to be required.

Mr. Smith discussed whether to regulate pools and if we removed pools as a Conditional Use in the residential districts, how would they be regulated.

Mr. Sikkema asked about Building Codes and if they regulate pools.

Ms. Thum stated that information was provided in the packets and building codes do regulate pools.

Mr. Sikkema stated that we could remove pools as a Conditional Use and leave the enforcement to the County building codes department. If a resident was going to build a pool and starts at the County, they will contact the Township and/or let the resident know that they have to fill out a zoning compliance permit prior to working with the County.

V. Public Comment

Mr. Maki, 370 Karen Road wanted to reserve comments for proposed zoning amendments #34-10-12 through #34-10-15 as he was the petitioner of those ordinances.

Lee Blondeau, 1002 N. Tracie Lane wanted to know where the proposed zoning amendments were posted and why we don't use the larger advertisements anymore. Also, he wanted to know why several of these zoning amendments are back on the agenda when they were discussed at last month's meeting.

Ms. Thum explained that due to "no action" being taken, the commissioners have to approve or deny the proposed amendment.

Mr. Maki explained that he was not informed of last month's meeting that is why he did not attend.

VI. Presentations

Mr. Al Feldhauser from the Marquette County Planning Department gave a presentation on the Comprehensive Corridor and Access Management Plan involving the US-41 / M28 corridor. Mr. Feldhauser explained what Access Management is and discussed the original plan that was developed by Mark Wyckoff of Planning and Zoning Center of Lansing. He stated that the County is working with MDOT and CUPPAD to update the plan and asked that the commissioners review the attached sheet of recommended improvements to our corridor and to make comments on them. Mr. Feldhauser stated that our Township does have an access management plan, and asked how it has been working for the Township.

VII.

A. Proposed Zoning Amendment #34-10-05

Ms. Thum read the amendments and the Commissioners discussed whether to remove it from the Conditional Use in the Residential Districts and if they should include language to regulate them or not. There was further discussion on how the Marquette County Building Codes Department regulates them.

Smith, moved, Tabor, seconded to **approve** proposed text amendment #34-0-05, to remove "swimming pools" as a Conditional Use in Section 4: 4.1 Single Family Residential District (R1) and to recommend acceptance by the Chocolay Township Board.

AYES: 5 Nays 0 Motion Carried

B. Proposed Zoning Amendment #34-10-06

Ms. Thum read the amendment and the Commissioners had further discussion about swimming pools in residential districts.

Meister, moved, Tabor, seconded to **approve** proposed text amendment #34-10-16, to remove "swimming pools" as a Conditional Use in Section 4: 4.2 High Density Residential District (R2), (Harvey) and to recommend acceptance by the Chocolay Township Board.

AYES: 5 Nays 0 Motion Carried

C. Proposed Zoning Amendment #34-10-07

Ms. Thum explained that these are back because at the last Planning Commission meeting there was no action taken by the Commission. The Commissioners have to approve or deny them to move forward in the process.

Ms. Thum read proposed zoning amendment #34-10-07 and stated that we did have discussion on contractor's yards at several meetings. During the update in 2008, storage units were added as a permitted use in one of the drafts of the Zoning Ordinance, the commissions did see the change.

Mr. Maki, 370 Karen Road questioned the Commissioners on how storage units and contractors yards appeared in the Ordinance when there was no discussion on them.

Mr. Blondeau, 1002 N. Tracie Lane, stated that he attended several meetings where contractors yards were discussed and he was even placed on the agenda.

Mr. Tabor stated that he remembered discussing contractor's yards during the Zoning Ordinance update and at several meetings.

The Commissioners discussed that Contractor Yards are a Conditional Use Permit, so the Commission can set conditions on any proposed yard that they approve and look at each potential yard on an individual basis.

Smith, moved, Milton, seconded to **deny** proposed text amendment #34-10-07, to remove "storage units" as a permitted use; and to also remove "contractors yards and shops" and "other uses deemed by the Planning Commission to be of the same general character as those permitted and Conditional Uses" as Conditional Uses in Section 4: 4.5 Commercial District (C) and to recommend acceptance by the Chocolay Township Board.

The reasons for the denial were;

- A. Allowing both storage units and contractors yards in the commercial district is a good solution, since the Township does not have that many industrial areas.
- B. Contractors yards are a Conditional Use, and therefore the public can have input on any potential contractor yards.

AYES: 5 NAYS: 0 Motion passed

D. Proposed Zoning Amendment #34-10-08

Ms. Thum explained that this proposed zoning amendment was to remove contractor's yards from the Agriculture / Forestry District. Ms. Thum explained that contractor yards were discussed when the Township updated the zoning ordinance back in 2008.

Mr. Maki 370 Karen Road stated that Contractors yards don't belong in the Agriculture / Forestry District.

Mr. Smith discussed logging families in the area that do have land and store their equipment at the home and they don't bother anybody. The families have been storing the equipment there for years and no one has complained about them.

Mrs. DeVooght stated that we discussed contractor's yard in detail when we were updating the ordinance.

Mr. Maki 370 Karen Road continued to discuss contractor's yards and that the township did not discuss them when they were updating the ordinance and that they just got placed in the new ordinance.

Smith, moved DeVooght, seconded, to **deny** proposed text amendment #34-10-08; to remove "contractors yards and shops" as Conditional Uses in Section 4: 4.7 Agricultural District (AF) and to recommend acceptance by the Chocolay Township Board.

AYES: 6 NAYS: 1 (Sikkema) Motion Carried

E. Proposed Zoning Amendment #34-10-09

Ms. Thum explained that this proposed amendment was to increase the front setback in the Commercial District to 40ft and increase the minimum lot width to 100ft in the R-2 District (Harvey). Ms. Thum stated that she did not have an issue with increasing the front setback in the Commercial District to 40ft. However, the minimum lot width in the R-2 District was decreased down to 50ft during the Zoning Ordinance update, due our current Comprehensive Plan suggestion page. The reason behind the suggestion was that, majority of the lot widths in Harvey are 50ft and under. The change now makes those lots conforming to our township Zoning Ordinance setback regulations.

Tabor, moved, DeVooght seconded, to **deny** proposed text amendment #34-10-09; to change frontage requirements for District (C) from 30 to 40 ft and change minimum lot width requirements to District (R-2) from 50 to 100 in Section 6:6/1 height and Placement Regulations and to recommend acceptance by the Chocolay Township board.

Reasons for denial:

- A. The lots are now conforming with the Township Zoning Ordinance Setback Regulations
- B. The Township Comprehensive Plan recommended reducing the setback to 50ft.

AYES: 6 NAYS: 0 Motion Carried

E. Proposed Zoning Amendment #34-10-10

Ms. Thum stated that this amendment was before them to replace the current Road Frontage requirements with the previous zoning ordinance language. Ms. Thum has not had a chance to discuss this with the Fire Department.

Mr. Maki discussed the problems we have with Willow Road. He also stated that the Comprehensive Plan called for the elimination of private roads and after pressure from the public the commission decided to allow 4 dwelling units to one driveway.

Mr. Smith asked if we could table this item so we can look over the information.

Ms. Thum agreed, she too need more time to go over everything. In fact would like to table the rest of the proposed zoning amendments, to allow her more time to go over them.

Smith, moved, Tabor Seconded to table proposed zoning amendments, #34-10-10 through #34-10-16 until the following planning commission meeting.

AYES: 6 NAYS: 0 Motion Carried

VIII. NEW BUSINESS

A. Township Parks

Ms. Thum stated that she would like to table this until next month so we can discuss this with DPW Foreman Mr. Brad Johnson can attend the meeting.

Sikkema moved, Tabor Seconded to table this item until next month's planning Commission meeting.

B. Proposed Zoning Amendment #34-10-13

Smith, moved, Tabor Seconded to table proposed zoning amendments, #34-10-10 through #34-10-16 until the following planning commission meeting.

AYES: 6 NAYS: 0 Motion Carried

C. Proposed Zoning Amendment #34-10-14

Smith, moved, Tabor Seconded to table proposed zoning amendments, #34-10-10 through #34-10-16 until the following planning commission meeting.

AYES: 6 NAYS: 0 Motion Carried

D. Proposed Zoning Amendment #34-10-15

Smith, moved, Tabor Seconded to table proposed zoning amendments, #34-10-10 through #34-10-16 until the following planning commission meeting.

AYES: 6 NAYS: 0 Motion Carried

E. Proposed Zoning Amendment #34-10-16

Smith, moved, Tabor Seconded to table proposed zoning amendments, #34-10-10 through #34-10-16 until the following planning commission meeting.

AYES: 6 NAYS: 0 Motion Carried

F. Recommendation – Planning Commission appointment

Due to Jaime Tomczyk resigning from the Planning Commission we now have an open seat and the Township has received applications from Tom Mahaney, Bob Lajuenesse, Wayne Dees and Jon Kangas. Ms. Thum asked for the Planning Commission thoughts on each of the applicants or who they thought would be a good fit on the commission.

Mr. Smith stated that Mr. Bob Lajuenesse has been a Chocoday Township resident his whole life and operates a business in our Township. He would be a good fit.

Mr. Ken Tabor stated that he believes all of the candidates would be a good fit to the Planning Commission.

Mr. Meister and Mr. Milton stated that they thought Tom Mahaney would make an excellent choice as well, because he is a local business owner.

Mr. Maki stated that the Commissioners cannot make a recommendation to the Supervisor, it's his job to make a recommendation and they should not be doing his homework.

Mr. Dees, 512 Wooddale stated that the act states that the Supervisor is suppose to make the recommendation to the Township Board.

Ms. Thum stated that she would like the Commissioners input, as they will be working with that individual. The Supervisor will still make the recommendation we are just trying to get a feel for who the current Planning Commission feels would be the best fit.

IX. Public Comment

Mr. Dees 512 Wooddale stated that his Chocolay Township Blog will be up soon.

Mr. Maki questioned the Lakenenland Conditional Use permit and the application.

Chairperson

Charter Township of Chocolay

Planning Commission Minutes

Monday, August 2, 2010

I. Meeting called to Order at 7:30 P.M. / Roll Call

Members present: Andy Sikkema, Kendal Milton, Dr. Ken Tabor, Andy Smith, and Eric Meister

Members Absent: Estelle DeVooght, Tom Mahaney

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval of June 7, 2010 Minutes

Mr. Sikkema had a question on the discussion regarding what constitutes a livestock animal and the discussion concerning rabbits should be considered pets or livestock. Would they follow livestock rules or pet regulations? Ms. Thum stated that was where Ms. DeVough was referring that rabbits should not be considered livestock because people can have rabbits as pets or raise them for meat.

Mr. Sikkema moved Dr. Tabor second to approve the June 7, 2010 minutes

Ayes: 5 Nays: 0 Motion Carried

III. Additional Agenda Items / Approval of Agenda

Mr. Sikkema moved Dr. Tabor seconded to approve the agenda as written

Ayes: 5 Nays: 0 Motion Carried

IV. Public Hearings

A. None

V. Public Comment

a. None

VI. PRESENTATIONS

A. None

VII. OLD BUSINESS

A. Township Parks and playground equipment

Ms. Thum explained that last year the Planning Commission looked at improving our Township's parks and that included adding new equipment at the Township marina. The Commission thought that the marina would be a good spot due to the number of families in the vicinity. However, upon further discussion with staff and commission members we feel that is not a suitable location anymore.

What we would like to do this year is replace the slide at Silver Creek and we are looking in the \$1900.00 range. The Township would like to eventually replace all of our park equipment as it's outdated and not ADA compliant. The Township would like to add a set of swings at the Marina.

Mr. Brad Johnson DPW Foreman stated that Lions Field might be upgraded, and what he would like to see where the hockey ring is to pave that and install the walls and let the kids use that for roller hockey and it can still be flooded during the winter.

Mr. Sikkema asked what would be the Township's number one priority, swings at marina and slide at Silver Creek. He also asked what park gets used the most right now?

Mr. Johnson stated that Beaver Grove does, but that the equipment is in good shape right now.

Mr. Meister asked about the current Bell Building and if the Township does purchase that for a Fire Hall, is there enough room on that site for playground equipment?

Ms. Thum stated that there is enough room and that is actually something they talked about. That would take care of the concern with water and parking. Ms. Thum also stated that we could add more money into the capital improvements.

Mr. Milton asked if \$1000 would be enough to put into the capital improvements each year.

The Planning Commission discussed the swings and slide and determined that, at this point they would like to hold off on installing swings at the Township Marina. They felt that the Fire Hall would be a better location as it's in the middle of walking distance from majority of the families.

Mr. Meister moved and Mr. Sikkema seconded to add \$1000 to the recreation and grant capital improvements account and to install a slide at Silver Creek Recreation Area.

Ayes: 5 Nays: 0 Motion Carried

B. Township Sign Ordinance

Ms. Thum explained that the Planning Commission held a public hearing back in March of 2010 and held meetings to discuss the proposed sign ordinance in May and June of 2010. Ms. Thum also explained why the Township is looking into adopting a new sign ordinance. Staff has not gotten much feedback from residents or PC members. Ms. Thum also explained that the Planning Commission can decide if they want the ordinance to continue being a part of the overall zoning ordinance or be a separate one, which might allow the Township to be able to specify an amortization period.

The current ordinance does talk about non-conforming signs and amortization period, staff asked if this was acceptable to the commission? Ms. Thum also asked if 30ft is adequate enough for the maximum height of signs.

Mr. Sikkema asked where video signs would be covered. Ms. Thum stated that it could technically be considered a "Flashing Sign" or "Flashing, Animated or Moving Signs". Mr. Sikkema explained that they are becoming popular down state, and Ms. Thum explained that we could add language to permit them or prohibit them, but we should discuss them.

Mr. Sikkema stated that the 30ft was more than adequate for the height size. Mr. Meister stated that all the businesses on US 41 are in violation of the proposed current sign ordinance as the business are permitted only two signs. He does not feel that the banners are a distraction; it's just a way for people to get information. He feels there should be some room for temporary signs.

Mr. Smith does not feel that the current Holiday Sign is a problem and he likes the signs. He does not feel that electronic message signs are a problem.

The Commission discussed video signs and electronic signs and if we should regulate the signs, then we could look at the timing of the video based signs.

Ms. Thum stated that she will work on the new language and then hold an additional public hearing so the businesses could view the new ordinance.

Mr. Smith asked her to look at the businesses and determine who would be in

compliance and whom would not be in compliance with the proposed ordinance.

Mr. Meister moved and Mr. Smith supported to table the Chocolay Township Sign Ordinance.

Ayes: 5 Nays: 0 Motion Carried

C. Proposed Zoning Amendment 34-10-10

Ms. Thum explained that she would like to table this item, until she is able to speak to the Township Fire Department about the current private road standards and the old language.

Mr. Sikkema moved, Mr. Tabor, Seconded to table proposed Text Amendment #34-10-10 to replace current ordinance language as amended April 21, 2008 with ordinance language previously used and adopted May 9, 2977, Sec 402 Frontage Requirements in Section 6: 6.7 Road Frontage Requirements until our September 12, 2010 meeting.

Ayes: 5 Nays: 0 Motion carried

Mr. Smith had a question concerning the \$500.00 performance bond and the .25 per foot will be required, he wanted to know if we should have a dollar amount instead of the .25 per foot.

Mr. Tabor asked him how would he do it though.

Ms. Thum explained that they were new language to try and ensure that the private road was built correctly.

The commissioners explained that \$500.00 is not going to cover much, and it's for after the road is constructed. The bond should be there to ensure that if the road was not built to County Road Standards then the Township can pay for the road to be built to County Road standards. Before the road would be accepted that the owner should guarantee that the road is built to County Road standards.

Mr. Sikkema asked why we are asking them to build it to County Road Standards, when they are not going to take over any new roads.

Mr. Tabor explained that they have to the easements.

D. Proposed Zoning Amendment 34-10-11

Ms. Thum explained that the amendment was to remove PUD's as a permitted use in the AF District. Staff has been working on new language for the PUD's as there were several issues with the current language. Ms. Thum talked about the Vista Hills development and the open space issues that arose from the PUD Development. Mr. Sikkema asked if Ms. Thum can go through what staff is proposing and what the current language is.

Ms. Thum read through the proposed language for the PUD Ordinance. She explained that the intent of the PUD needs to be changed and it has to be clear that any proposed PUD's have to follow the underlying zoning district regulations. There is also language concerning open space requirements and how it will be maintained. There is also new language about deadlines and conditions.

Mr. Sikkema talked about what the sub-committee is looking at adding 5 acre parcels back into Township.

There was more discussion on the acreage requirement and the proposed language.

Mr. Tabor moved, Mr. Sikkema Seconded to table proposed text Amendment #34-10-11 until next planning commission meeting to allow staff and the commission more time to work on the language.

Ayes: 5 Nays: 0 Motion Carried

E. Proposed Zoning Amendment 34-10-13

Mr. Milton thought that we should be doing proposed zoning amendment #34-10-13 and #34-10-14 at the same time as they are both dealing with Agricultural, or define Agricultural first before looking at the 20 acres or more for livestock.

Mr. Milton read the proposed definition of Agriculture. Mr. Milton wanted to know about the current agriculture on the parcels on less than 20 acres, they can still farm and/or have their livestock as they would be there before the language went into place. Ms. Thum stated that would be corrected. The Commissioners questioned why there should be a minimum lot size for livestock. Ms. Thum explained that there were phone calls from residents asking why what the minimum lot requirement was for horses and chickens, and that is why the Township looked into setting up a requirement.

Mr. Sikkema stated that he did not see any problems with the definition, and asked what staff's concerns were.

Mr. Sikkema moved and Mr. Tabor Seconded to Deny Zoning Amendment #34-10-13.
Reasons for denial:

1. If you are in an area that is Zoned AF then you should be able to have animals regardless of your acreage.
2. If you are in the AF District then you should have the acreage needed for the animals.

Ayes: 5 Nays: 0 Motion Carried

F. Proposed Zoning Amendment 34-10-14

Mr. Sikkema moved, and Mr. Tabor seconded to approve Zoning Amendment #34-10-14, amending the current definition of agricultural to now read, " *Farming in all its branches, including cultivating soil. Growing and harvesting any agricultural, horticultural, or floricultural commodity and Dairying. Raising livestock, bees, fish, fur-bearing animals, or poultry, including operating a game bird hunting preserve licensed under part 417 of the natural resources and environmental protection act, 1994 PA 451, MCL 324.41701 to 324.41712, and also including farming operations that harvest cervidae on site where not less than 60% of the cervidae were born as part of the farming operation. As used in this paragraph, "livestock" includes, but is not limited to, cattle, sheep, new world camelids, goats, bison, privately owned cervids, ratites, swine, equine, poultry, aquaculture, and rabbits. Livestock does not include dogs and cats. Raising, breeding, training, leasing, or boarding horses. Turf and tree farming. Performing any practices on a farm incident to, or in conjunction with, farming operations. Agricultural uses includes use in a federal acreage set-aside program or a federal conservation reserve program.*

and recommended approval by the Chocolay Township Board.

Ayes: 5 Nays: 0 Motion Carried

G. Proposed Zoning Amendment 34-10-15

Ms. Thum explained that this amendment was to permit Wireless Towers in the AF District. Currently the ordinance does allow for them in the Wireless Section of the Ordinance, they are just not listed as a Conditional Use in Section 4.7 in the General Regulations of the Zoning Districts.

Mr. Tabor moved, Mr. Smith seconded to approve proposed text amendment #34-10-15 to add wireless communication facilities to Section 4 4.7 Agricultural / Forestry District (AF) (C) Conditional Uses: 14. Wireless Communication Facilities to the Chocolay Township Zoning Ordinance and to recommend acceptance by the Chocolay Township Board.

Ayes: 5 Nays: 0 Motion Carried

H. Proposed Zoning Amendment 34-10-16

Ms. Thum explained that this was to regulate swimming pools and this was discussed at last month's meeting.

Mr. Sikkema moved and Mr. Meister seconded to deny the proposed text amendment #34-10-16.

Ayes: 5 Nays: 0 Motion Carried

VIII. NEW BUSINESS

A. Township Fire Hall

Township Manger Mr. Lawry asked that the Planning Commission consider an alternative site for the Township Fire Hall. The Township did hire an architecture firm to draw up design plans for a new fire hall. Basically, the township needs to have a shovel ready plan for any government grants that they may be able to attain.

In order to have plans done, we need to identify the site that the fire hall could potentially be built on. The current bell buildings is a possibly for the new fire hall and would not require that much alternation. Also the fire department needs to be able to work at their current fire hall location. The bell building would provide enough space for the fire hall and was identified as a possible site by the Fire Department. Mr. Lawry explained that there is an offer on the building, but there are enough conditions on it that Bell is looking at other offers. Mr. Lawry wanted to know if the Bell building rezoning to municipal properties would be the same vision that the Comprehensive Plan had in mind.

Mr. Milton asked if he is looking for permission or recommendation from the Planning Commission to use the Bell Building in the feasibility study. Mr. Lawry stated that is corrected and they would have to change the scope of work with Integrated Design to do the feasibility study.

Mr. Gary Johnson discussed the location of the new fire hall on the existing site, the building would have to be next to the existing fire hall which would cause problems with snow storage, current pavilion and parking.

The commissioners asked where the stalls for the trucks would go, there was further discussion of the Bell building and the current fire hall.

Mr. Sikkema asked about the nearby residents and if they have been informed. He also asked what other permitted uses are under municipal properties in the Zoning Ordinance. Ms. Thum stated what the permitted used were and conditional uses. Ms. Thum stated that the Fire Department could also seek a Conditional Rezoning.

Mr. Meister thought that the site made sense in that there is a light that fire trucks can utilize to get out on the highway. Also, that no matter where the fire hall goes it will have an impact on the neighborhood.

Mr. Johnson stated that the current siren will not go with the proposed hall. Mr. Sikkema did not have a problem with the location, he just wanted to ensure that the residents knew that the site was being considered for the fire hall.

Mr. Meister and Mr. Tabor felt that they could do the study without contacting the residents.

Mr. Tabor asked if the Board really needs a recommendation from the Planning Commission.

Mr. Larwy stated that the board should have an idea if the Planning Commission feels that its part of the comprehensive plan and the zoning impact that it would have on the neighborhood district.

Mr. Sikkema felt that he would have a hard time knowing that until he was able to hear from the residents.

Mr. Tabor moved and Mr. Meister supported recommend to the Chocolay Township Board to authorize the feasibility study on the current Bell Medical building to be conducted by Integrated Design for an alternative site for the proposed fire hall.

Ayes: 5 Nays: 0 Motion Carried

B. Comprehensive Corridor Access Plan

Mr. Milton stated that this is a follow up from Mr. Al Feldhouser from Marquette County presentation on our access management plan and issues along the corridor. Mr. Milton stated that in the packets was some homework. Ms. Thum stated that the Commission were to go through the list and see what items could be removed or amended.

1. Felt that the existing #1 could be edited to state something about constructing a bike path from the City of Marquette on the west side along the rock cut to connect with the existing bicycle path on the west side.
2. The commissioners felt that #2- #7 appeared adequate.
3. Felt that #8 could be reworded to just talk about the intersection radius at Corning Street.
4. #10 was a bit strange, Silver Creek Drive actually serves the Township Hall and there is a driveway on US 41 that serves the Police and Fire Dept? The Township has talked with the neighboring property owner on Silver Creek Road about purchasing land from them to move our driveway and that have said no on several occasions. This could probably be removed. The road commission did place a do not block sign in front of our driveway and this has helped with people stacking right in front of our property.
5. #10 through #14 seems alright
6. #15 we do have a service drive from the gateway shopping to holiday. It could talk about a serve driveway from Holiday to Snyder's.
7. #16, we felt this could be removed, it most likely will never happen
8. #17 can be removed, we did do this one.

C. Comprehensive Plan update work plan

Ms. Thum gave an update on the status of the Sub-Committee and that they are working on an Agricultural / Forestry #2 where the acreage requirement would go down to 5 acres instead of the 20. This would make more of the lots conforming and the resident would still be able to keep their agricultural status. The Committee tried to keep the 5 acre lots closer to the highway. The committee is also working on scheduling the visioning session.

IX. PUBLIC COMMENT

A township resident wanted to know if any agency was going to mow the weeds along the Green Bay bridge. The weeds have overgrown the bridge and are now in the road. Mr. Sikkema stated that the County Road Commission does not mow anymore and MDOT is only mowing once this year and will probably not mow next year. Mr. Lawry stated that the Township might be able to mow the weeds.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

A City of Marquette Planning Commission Minutes, June 15, 2010

XII. ADJOURNMENT

Milton moved and Mr. Sikkema seconded to adjourn the meeting at 9:30pm

Kendall Milton
Chairperson

Charter Township of Chocolay

Planning Commission Minutes

Monday, September 13, 2010

I. Meeting called to Order at 7:30 P.M. / Roll Call

Members present: Andy Sikkema, Kendal Milton (Chairperson), Dr. Ken Tabor, Andy Smith (Vice chairperson), and Tom Mahanney

Members Absent: Estelle DeVooght, and Eric Meister (excused)

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval of August 16, 2010 Minutes

Milton moved, Smith seconded to approve the minutes as written

III. Additional Agenda Items / Approval of Agenda

Mr. Milton moved Mr. Sikkema seconded to approve the agenda as written

Ayes: 5 Nays: 0 Motion Carried

IV. PUBLIC HEARINGS

A. None

V. PUBLIC COMMENT

- a. Mr. Art Geisha representing Northern Michigan University, discusses the proposed signage for the NMU Golf Course, they wanted to make that it would be in compliance of the new sign ordinance and to get the opinion of the Planning Commission.
- b. Mark Maki 370 Karen Road, wants to discuss the August 2, 2010 meeting.
Page 2: Where it talks about the Township Marina he wanted to know why staff felt that the marina was not a suitable location for recreation equipment. He wanted an explanation as to why the PC changed their mind.
Page 3, discussion on the Holiday, about Mr. Smith statement that he feels that sign looks nice, Mr. Maki was not sure if that is accurate. Mr. Maki also stated that the sign is in violation, and therefore Mr. Smith must feel that it's ok to violate the ordinance. Mr. Smith commented on Mr. Maki's comment concerning the Holiday Gas station sign.
Page 5 and why the Planning Commission denied 34-10-15, and the minutes don't reflect clearly what the amendment is.

VI. PRESENTATIONS

Mr. Andy Sikkema abstained from this discussion

- A. Dr. Emerson and Mr. Brad Corey asked to be on the Planning Commission agenda to discuss two-way snowmobile traffic along the US 41 Business Corridor in Chocolay Township. Dr. Emerson talked the meeting that took place last year, with representatives from the Township, MDOT, DNRE and Representative Lindberg to discuss the possibility of two-way traffic along the Business Corridor. At that time the group discussed the safety aspect and the lack of right-of-way in certain areas along US 41 that could prevent the trail from becoming two-way traffic. At this point, Dr. Emerson would like to see the Township take the initiative to start the required process in order for the snowmobile trail to be two-

way, and to work with the DNRE and local snowmobile associations. Mr. what month's motorized traffic is permitted states and it's only one-way. Also, to see about installing wayfinding signs that would direct the snowmobilers to the businesses. Dr. Emerson also talked about the need for the two-way traffic due to safety concerns along the existing trail that utilize the old railroad grade in our Township and having them use the Green Bay Bridge to get to the businesses in Harvey.

- B. Mr. Brad Corey echoed what Dr. Emerson stated and he stated that he lives adjacent to the trail and he would like to see the Planning Commission address the issue of RR grade by Lakewood Lane that is the designated snowmobile trail, but during the summer and fall months. The problem that they have during those months is with motorcycles and 4-wheelers most of this happens during the weekends when you cannot get a hold of the police. The trail has been improved, but as a result there has been an increase in the number of motorcycles and 4-wheelers. He is not sure what to do on the weekends, as he stated that the police are not available on weekend. He would like to see modified turn styles along the trail that permit walkers and not motorcycles and 4-wheelers they have been installed in other areas. (see attached document concerning the weekends)

In closing, Dr. Emerson is looking for the Township to figure out a way to have two-way traffic along the US 41 Business Corridor for this snowmobile season.

Tom Mahanney stated that he hopes that the new crushed limestone will be maintained as it's a great asset to the township.

VII. OLD BUSINESS

a. Township Proposed Sign Ordinance

Mr. James Thams, representing NMU, started the conversation that NMU is looking at the installing a new sign at the golf course and they have provided a rendering to the township for the Planning Commission to look at. The Commissioners did not have any comments concerning the sign at this time. NMU does have permission from MDOT for the sign to be located in the right-of-way. Staff discussed the two sections in the ordinance where it references golf course signs.

The commissioners decided to start at the beginning of the proposed sign ordinance, and go from there.

Chairperson Milton read out load the Applicability section of the proposed ordinance and the Intent of the ordinance.

18.1 Applicability

No issues

18.2 Intent

Mr. Sikkema commented on letter A, it should read, "recognize the proliferation of signs CAN be unduly distracting to motorist and non-motorized travelers, reduces the effectiveness of signs directing and warning the public, causes confusing, reduced desired uniform traffic flow and creates potential for accidents.

18.3 Definitions

The commissioners added the following definitions;

Animated Sign – any sign which uses movement or change of lighting to depict action or to create a special effect or scene.

The commissioners deleted the following definitions

~~**BOX, CAPSULE OR PANEL SIGN – An internally illuminated sign enclosed within a cabinet or cover encompassing the sign.**~~

~~FLASHING SIGN—Any lighted or electric sign which gives out light or varying intensities of light in sudden intermittent bursts. Non-Commercial, electronic message signs, such as time, temperature, date, open/close and 24hrs are not considered flashing for the purpose of this Ordinance. (DO YOU WANT THIS?)~~

Mr. Smith wanted to know what signs would be conforming to the current ordinance and what signs would not be. Staff is going to measure the signs at Citgo for next meeting to see if they are in compliance with the current ordinance. Staff stated that Wahlstroms, Jacks IGA, and Habitat for Humanity would be in violation of the proposed sign ordinance if the ordinance was to get approval.

Dr. Tabor stated that Mr. Meister had some good points concerning banners and temporary signs and that we should permit them and that he did not want the proposed sign ordinance to be too restrictive to the business owners. There was more discussion on the Holiday Gas Station sign. Mr. Milton stated that we could set up a Conditional Use for the electric message signs. Staff was directed to write language about intensity of the lights for the message signs and look at how often the message can change for next meeting.

Mr. Sikkema stated that we need to continue to work on the definitions and then look at each section, but we have to know the definitions to know what the ordinance is regulating.

Mr. Smith just wants to know what would be conforming and non-conforming and that someone has to enforce the ordinance and where are the people going to go, the ordinance has to be practical.

The commissioners edited the following definitions;

FLAG – An official governmental, or **corporate** emblem displayed on fabric or other material mounted to a pole.

~~FLASHING, ANIMATED or MOVING SIGNS (Flashing)—A sign that internally emits or reflects light from an artificial source, or the sun—a sign which has movement of any illumination such as intermittent, flashing, scintillating or varying intensity; a sign that has any visible motion caused by either artificial or natural source.~~

INTERNALLY-ILLUMINATED SIGN – A sign that is lighted by a source inside the sign face, behind the sign face, or otherwise back-lighting the sign face or message. Only letters, numerals, and logos may be of translucent material to allow internal lighting to reveal the message of the sign. (Figure 4)

PORTABLE SIGN – Any sign which is not permanently affixed to a building, structure or the ground including, but not limited to, sandwich board signs, A-frame signs, inverted “T” signs and signs attached to a motor vehicle, **trailers** or carried by a person. This does not include temporary, real estate, construction, and similar signs defined herein.

SIGN – Any words, numerals, figures, devices, artwork, graphics, or trademarks, **excluding sculptures**, used to convey a message, or attract attention to an individual firm, profession, business, product or message and is visible to the general public.

REAL ESTATE/MARKETING SIGN – **A temporary sign placed advertising a property for sale, rent or lease.**

WALL SIGN – **A sign erected or fastened to the wall of a building having the exposed face of the sign; not extending more than 12 inches beyond**

the surface of the portion of the building wall on which it is erected or fastened. (Figure 9)

18.4 Illustrations

No issues

18.5 General Provisions

The Commissioners deleted the following provision(s)

~~3. D. Change of Message~~

~~No change of message shall be permitted (except on a changeable message sign) without bringing the sign into full conformance with this Ordinance.~~

The Commissioners edited the following provision(s)

4. Height of Signs

No free standing sign shall exceed a height of thirty (30) feet

A monument sign shall not exceed a total height of fifteen or ten (research what other signs are permitted to be in other areas) (15) feet including the sign pedestal. Sign height shall be measured to the top of the sign, from the adjacent grade. A freestanding sign/ ground sign on a man-made base, including a graded mound, or that is located in a depression below the adjacent grade, shall be measured from the grade of the nearest pavement to the highest point of the sign.

The commissioners discussed the difference between a ground, monument sign and free standing sign. They felt that there was confusion with the definitions, as a result they should be cleaned up to reflect each type of sign. Mr. Sikkema asked if the Shiras Hills sign is a monument or ground sign. Mr. Smith talked about his sign and that it is considered a monument sign. This can be a bit confusing to our business owners and this section of the ordinance needs to be clear. The proposed ordinance does have a free standing sign and ground sign grouped together.

There was some concerned about having 30ft sign near the residential areas; staff should look at some language to restrict the height of signs that are nearby residential districts. One example is the Varvil Center.

7. Illumination of any Sign

A. Residential Districts – Only indirectly illuminated signs shall be allowed in any residential district provided such sign is so shielded as to prevent direct light rays from being visible from the public right-of-way or any adjacent residential property. Indirect lighting shall be pointed downward to prevent direct light rays from being visible of neighboring properties.

B. Commercial and Industrial – Indirectly, or internally illuminated signs are permitted providing such sign is shielded as to prevent direct light rays from being visible from the public right-of-way or any adjacent residential property.

C. No sign shall have blinking, flashing of fluttering lights or other illumination devices which have a changing light intensity, brightness or color, or which are so constructed and operating as to create an appearance of writing or printing, except that movement showing date, time and temperature exclusively shall be permitted. ALL illumination shall be steady and stationary in source and intensity. Beacon lights or search lights shall not be permitted as a sign for advertising purposes. (Edit out and revise language.)

Staff will work on adding language about intensity, frequency, size, applicant to provide illumination sheet for lights to determine the intensity of the sign.

No animated signs (see definition) are permitted in any district.

8. Signs in or over a Right-of-Way

~~No sign other than traffic control or directional signs erected by a unit of government shall be allowed on any right of way.~~ (Finish revising) The placement of any sign that projects more than thirty (30) inches from the building and overhangs a public right-of-way shall be prohibited unless approved by the governmental unit having jurisdiction over that right-of-way and upon satisfaction of all requirements in this Ordinance and the Chocoday Township Zoning Ordinance. If applicant receives permission from the correct road jurisdiction to permit a sign in the Right-of-way the applicant can then apply for a sign permit through Chocoday Township. Permits by road jurisdiction do not supersede the rules of this ordinance.

The commissioners discussed if the current signs are going to be grandfathered in or how that would work? Staff stated that our attorney stated that no, because this ordinance is a regulatory ordinance so the signs would not be grandfathered in, but staff is not sure. The Commissioners' asked Ms. Thum to get this clarified for next month's meeting.

9. Signs Constituting a Traffic Hazard

No sign shall be located on any street or street corner signs which would obscure the vision of drivers using said streets, or conflict with traffic control signs or signals in any location. No sign shall obstruct the vision of drivers at any driveway, parking lot or other route providing access to any land use. (At the recommendation from the Township Police or road jurisdiction, work on language) Staff will consult with the Township Police and the appropriate road jurisdiction.

The commissioners discussed in detail how this would be enforced and who would determine what sign would constitute a hazard. There were several examples given where a sign could be considered a hazard. Staff was directed to work on this language for next month's meeting.

10. Abandoned Sign

Abandoned Signs shall be removed in accordance with their status as to conformity. Where such signs are non-conforming in size, or height, or other features, they shall be removed within ninety 90 days. Where the sign is conforming, but abandoned they shall be removed after one year. Any abandoned conforming sign or abandoned non-conforming sign or sign structure may be removed by Chocoday Township as the expense of the property owner.

Dr. Tabor, moved and Mr. Sikkema, seconded to table the Township Sign Ordinance until our October 4, 2010 meeting.

Ayes: 5 Nays 0 Motion Carried

b. Proposed Zoning Amendment 34-10-10 - Roads

Dr. Tabor, moved Mr. Milton, Second to postpone Proposed **Text Amendment 34-10-10** to replace current ordinance language as amended April 21, 2008 *see attached pages* with ordinance language previously used and adopted May 9, 1977, Sec 402 Frontage Requirements. *see attached pages* in Section 6: 6.7 Road Frontage Requirements.

Ayes: 5 Nays 0 Motion Carried

c. Proposed Zoning Amendment 34-10-11 – PUD’S

Dr. Tabor move Mr. Milton, Second to POSTPONE Proposed **Text Amendment 34-10-11** to allow staff and the commission more time to work on the language.

Ayes: 5 Nays 0 Motion Carried

d. Proposed Amendment to Ordinance #55 Vehicle Parking and Storage

Dr. Tabor, move Mr. Smith, Second to POSTPONE proposed **ordinance #55 Vehicle Parking and Storage** to allow staff and the commission more time to work on the language.

Ayes: 5 Nays 0 Motion Carried

VIII. NEW BUSINESS

A. Lakenenland Sign

Ms. Thum explained that at last month’s Township Board meeting, Trustee Maki made the motion to hold a public hearing to have the large Lakenenland sign discussed and determine if the sign needs to have a conditional use permit due to sign being larger than what is permitted. Staff stated that she believes the sign is larger than 60 square feet which is the maximum that the sign can be, but is hoping to get out there before the next meeting in order to measure the sign.

Staff will have to get permission to be the applicant for the Conditional Use Permit, and to hold the public hearing for the Lakenenland Sign.

There was further discussion the existing Conditional Use Permit for the bandshell and how the township got to that point and approval of the Conditional Use Permit. Staff was directed to determine the size of the Lakenenland sign and to determine if the sign is in violation of the Township Zoning Ordinance.

Dr. Tabor moved and Mr. Milton second to table this item until next meeting.

B. Comprehensive Plan update work plan

Ms. Thum discussed the upcoming Township vision session and hopes that everyone will be able to make the meeting. Ms. Thum explained the set up of the meeting and there will be “experts” at each of the tables leading the discussion on land use, natural features, transportation and aging service. Ms. Thum then talked about the next steps that will be taken by the sub-committee.

IX. PUBLIC COMMENT

Wayne Dees, 512 Woodvale – not sure either if the current signs are grandfather in. Mr. Dees talked about the Holiday Sign

Mark Maki, 370 Karen Road – will provide his written questions to staff so he can get a written response. He stated that Chocoley Township is a nice area and Harvey is looking nice and the business deserves credit, but he does not want to see changes to the sign ordinance that would detract from how it looks now.

X. COMMISSIONER’S COMMENT

Mr. Mahanney had a question concerning the Access Management plan and Ace Hardware. Mr. Sikkema stated that nothing has been official, the Township approached MDOT about some traffic concerns and the number of driveways along US 41 was an issue. There has been talk about closing one of the Ace hardware drives, but the Township has to get support from the owners to do this. The Commissioners discussed the driveway closure and the service driveway that would connect the Marquette Veterinary Office to Ace Hardware.

XI. DIRECTOR'S REPORT

A. Property Maintenance Code

Ms. Thum stated that in the current plan it states that the Township should explore the possibility of passing a property maintenance code and wanted to get input from the commissioners.

B. Noxious Weeds Requirements

Ms. Thum stated that in the current plan it states that the Township should explore the possibility of passing a property maintenance code and wanted to get input from the commissioners.

Mr. Milton stated that should keep the weeds down for traffic control and the site triangle would come into play here. Dr. Tabor could see it in the village area and in some subdivisions, but not in the AF Districts. Mr. Sikkema stated that there should be residential covenants in some of the subdivision that regulate the weeds. Also, should residents be required to mow their entire 10 acres?

The Commissioners stated that at this point they don't believe there is a need for either of these items.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

A Planning and Zoning News, August 2010

B. Letter to MDOT Corridor Group from Township Manager Steve Lawry

XII. ADJOURNMENT

Dr. Tabor made the motion to adjourn the meeting at 9:45pm.

Charter Township of Chocolay
Planning Commission Minutes
Monday, October 4, 2010

I. Meeting called to Order at 7:30 P.M. / Roll Call

Members present: Andy Sikkema, Kendal Milton (Chairperson), Dr. Ken Tabor, Andy Smith (Vice chairperson), Eric Meister, Estelle DeVooght and Tom Mahanney

Members Absent: None

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval of September 13, 2010 Minutes

Dr. Tabor moved, Mr. Sikkema seconded to approve the minutes as written

III. Additional Agenda Items / Approval of Agenda

Mr. Sikkema moved Dr. Tabor seconded to approve the agenda as written

Ayes: 5 Nays: 0 Motion Carried

IV. PUBLIC HEARINGS

A. None

V. PUBLIC COMMENT

A. Mr. Steve Zarkowski had general comments regarding the current Bell Hospital building. Mr. Zarkowski stated that he is consider purchasing the old Bell building on Corning Street, to turn into a multiple family building that would cater to the disabled and aging residents of our Township. He has talked to staff concerning his thoughts for the building. He just wanted to see if the Planning Commission thought it sounded like a good use for the building.

VI. PRESENTATIONS

A. None

VII. OLD BUSINESS

A. Township Proposed Sign Ordinance (from where we left off after last meeting)
The Planning Commission and staff discussed the sign ordinance in detail and had discussion regarding banners and electronic message signs. The consensus was to permit electronic message signs and staff was directed to work on language conceding the brightness of the signs. The Commission felt that the Township should permit banners with a total maximum of sixty (60) square feet and a permit would only be required after 30 days.

4. Height of Signs

No free standing sign shall exceed a height of thirty (30) feet

A monument sign shall not exceed a **total height of fifteen or ten (research what other signs are permitted to be in other areas) (15) feet** including the sign pedestal. Sign height shall be measured to the top of the sign, from the adjacent grade. A freestanding sign/ ground sign on a man-made base, including a graded mound, or that is located in a depression below the adjacent grade, shall be measured from the grade of the nearest pavement to the highest point of the sign.

The commissioners discussed the difference between a ground, monument sign and free standing sign. They felt that there was confusion with the definitions, as a result they should be cleaned up to reflect each type of sign. Mr. Sikkema asked if the Shiras Hills sign is a monument or ground sign. Mr. Smith talked about his sign and that it is considered a monument sign. This can be a bit confusing to our business owners and this section of the ordinance needs to be clear. The proposed ordinance does have a free standing sign and ground sign grouped together.

There was some concerned about having 30ft sign near the residential areas; staff should look at some language to restrict the height of signs that are nearby residential districts. One example is the Varvil Center.

5. Sign Construction and Assembly

All free-standing signs shall have a sign face that is an integrally framed structure and shall not have multiple, attached separate sign units on the face of the sign supports. The entire sign shall be made of materials that maintain this integral character, rather than an assemblage of different signs types and materials. Changeable-message signs shall be an integral part of the face of any free-standing sign. In addition, such message signs shall have uniform dark background with light-colored lettering and satisfy all other conditions of this Ordinance. (Northern Meats, Bayou Bar)

6. Sign Maintenance

All signs and all components thereof, including supports, braces, anchors, etc. shall be kept in a good state of repair, in compliance with all building and electrical codes, and in conformance with the requirements of this ordinance. Any sign which is determined by the Zoning Administrator to be insecure, in danger of falling, endangering the public safety or otherwise deemed nonconforming because it does not conform to all standards and regulations of the adopted ordinance or amended ordinance, shall be immediately removed by its owner unless it is repaired and made to otherwise comply with the requirements of this Ordinance. The Zoning Administrator will contact the Marquette Building Department to determine if a sign is in face unsafe and violates and building or electrical codes.

Any electronic variable message sign shall be maintained so as to be able to display messages in a complete and legible manner.

7. Illumination of any Sign

- A. No animated signs are permitted in any district.
- B. Residential Districts – Only indirectly illuminated signs shall be allowed in any residential district provided such sign is so shielded as to prevent direct light rays from being visible from the public right-of-way or any adjacent residential property. Any existing indirect lighting shall be pointed downward to prevent direct light rays from being visible of neighboring properties.
- C. Commercial and Industrial – Indirectly, or internally illuminated signs are permitted providing such sign is shielded as to prevent direct light rays from being visible from the public right-of-way or any adjacent residential property.

Where illumination of signs is permitted, the following standards shall apply.

- 1. Lighting for signs shall not create a hazardous glare for pedestrians or vehicles either in a public street or on any private premises.
- 2. The light source, whether internal to the sign or external, shall be shielded from view. This requirement is not intended to preclude the use of diffused exposed neon.

3. Sign illumination for externally illuminated signs shall utilize focused light fixtures that do not allow light or glare to shine above the horizontal plane of the top of the sign or onto any public right-of-way or adjoining property.

~~4. Signs shall not be illuminated after 10:00 p.m. or close of business, whichever is later.~~

5. Each sign shall be designed so that illumination does not exceed 100 luxes (10 foot-candles) measured at a distance of 10 feet from the sign.

6. All electronic changing image signs shall be equipped with an automatic dimming feature that accounts for ambient light levels.

VII. Electronic Variable Message Signs: Any sign type may be an electronic variable message sign subject to the following regulations:

1. Surface Area: The areas of electronic variable message signs capable of displaying copy shall not exceed forty (40) square feet and shall be included within the maximum aggregate sign surface area allowed for the type and location of sign upon which the changeable copy is displayed.

2. Length of Cycle. The electronic changeable copy or images shall not alternate, change, fade in, fade out, or otherwise change more frequently than once every ~~six (6) seconds~~ (INSERT 20 SECONDS). Electronic variable message sign signs may not display scrolling, racing, pixelating or moving characters or images, or similar actions that convey motion.

~~3. Color. All copy, characters or other changeable images shall be of one (1) color only, with light copy on a dark background.~~

4. Brightness Adjustment: An electronic variable message sign shall be equipped with photosensitive equipment which automatically adjusts the brightness and contrast of the sign in direct relation to the ambient outdoor illumination such that the light level does not exceed three (3) foot candles at the front lot line and one (1) foot candle at all other lot lines, measured three (3) feet above the surface of the ground.

Staff asked to re-word for next meeting.

~~5. Maintenance: Any electronic variable message sign shall be maintained so as to be able to display messages in a complete and legible manner.~~

E. ~~Service Station LED Signs~~

~~Permanent ground mounted sign for use only by fuel service stations for the purpose of advertising fuel costs are allowed.~~

~~1. No such sign shall exceed thirty-two (32) square feet with a maximum height of six (6) feet. The LED numerals may not exceed twelve (12) inches in height. Signs may double sided.~~

~~2. All ground mounted signs shall be located a minimum of five (5) feet behind the street right-of-way. At intersections, no sign shall be in the sight triangle as defined by this ordinance. See example of required sight triangles on Page 10.3.~~

~~3. Color. All lighted LED numerals shall only be green or red in color. LED background screen may only be black.~~

~~4. Illumination. The sign must not exceed a maximum illumination of 5000 nits (candelas per square meter) during daylight hours and a maximum illumination of 500 nits (candelas per square meter) between dusk to dawn as measured from the sign's face at maximum brightness. Such signs may not display light of such intensity or brilliance to cause glare or otherwise impair the vision of the driver, or results in a nuisance to the driver~~

8. Signs in or over a Right-of-Way

If applicant receives permission from the correct road jurisdiction to permit a sign in the Right-of-way the applicant then must submit the drawings and sign application to the Planning Commission for their approval. Permits by road jurisdiction do not supersede the rules of this ordinance.

9. Signs Constituting a Traffic Hazard

A sign constituting a hazard to safety or public welfare by reason of inadequate maintenance, dilapidation, obsolescence, disaster, damage, abandonment or inability to meet lateral and/or vertical loads as determined by the Township Police, appropriate road jurisdiction and/or Marquette County Building Codes Department.

No person shall install or maintain or cause to be installed or maintained any sign which simulates or imitates in size, color, lettering, or design any traffic sign or signal, or any other words, phrases, symbols and/or characters, in such a manner as to interfere with, mislead or confuse traffic.

10. Abandoned Sign

Abandoned Signs shall be removed in accordance with their status as to conformity. Where such signs are non-conforming in size, or height, or other features, they shall be removed within ninety 90 days. Where the sign is conforming, but abandoned they shall be removed after one year. Any abandoned conforming sign or abandoned non-conforming sign or sign structure may be removed by Chocolay Township as the expense of the property owner.

11. Setback

~~All signs shall be setback a minimum of five (5) feet from the right-of-way (ROW) of a public or private street.~~ All signs should have a setback of 30ft from the side lot line. All signs that will be located in the right-of-way must have written permission from the appropriate road jurisdiction. At intersections, no sign shall be in the sight triangle as defined by the local road jurisdiction.

No monument sign shall be located within 200ft of any other monument sign unless the Zoning Administrator determines that practical difficulties exist for locating the sign.

12. Signs constituting Planning Commission Review

- A. Any sign that is proposed to be taller than 20ft and borders a residential zoning district(s) on at least two sides.
- B. The placement of any sign that projects more than thirty (30) inches from the building and/or is located or overhangs a public right-of-way.

18.4 Signs Permitted in all Districts

The following signs are permitted in all districts; subject to the restrictions herein contained and shall not require permits for erection.

1. Governmental Signs.

Governmental signs of a branch of local, state or federal government, including traffic or similar regulatory devices, or signs required to be maintained or posted by law or governmental order, rule or regulation.

2. Flags or Emblems

Flags or emblems of governmental, civic, philanthropic, educational, or religious organizations, provided that the height of any flagpole shall not exceed thirty (30) feet.

3. Commemorative Signs

Commemorative signs such as cornerstones, historical markers, memorial plaques or tablets, and the like. (Figure ____)

4. Warning Signs

Warning signs such as “No Trespassing,” “No Hunting,” “danger,” and “Beware of Dog,” not **exceeding six (6)-square feet in area.**

5. Permanent Window Signs

A business shall be permitted interior signs (including neon as long as it’s not moving, flashing, blinking) and that occupy not more than twenty-five (25%) of the individual window area.

6. Church Bulletin Signs

One (1) Church announcement bulletin shall be permitted on any site which contains a church regardless of the district in which located, provided said bulletin does not exceed twenty-four (24) square feet in area and a height of sign (6) feet, and is set back a minimum of ten (10) feet from the property line.

7. Political Sign

Political signs which are intended to advertise a public election, issues to be balloted upon in that election, promote individuals and/or parties participating in the election are exempt providing that no sign shall have an area exceeding four square feet in area. Sign areas may be increased to thirty two square feet provided the sign is so located that no portion of the sign area is located on the public right of way or lands of which are being used for public right of way and further provided that all political signs be removed within ten days after the election, and provided that all signs authorized are authorized only 90 days prior to any election. (34-08-02)

8. Residential/Address Sign

Signs having an area of not more than ~~two (2) square feet~~, **sixteen (16) square feet** the message of which is limited to conveying street number, the name of the premises, the name of the owner of the premise, and the name of the occupant of the premises.

18.5 Prohibited Signs

1. Banners

Banners, pennants, search lights, twirling signs, sandwich board signs, sidewalk signs or curb signs, balloons, or other gas-filled figures are prohibited except as provided in Section 18.8 Temporary Signs.

2. Moving Sign

No sign shall have any visible moving parts, visible mechanical movement or any other apparent visible movement achieved by electrical, electronic, or kinetic means, intermittent electrical pulsations or wind currents.

3. Signs Constituting a Traffic Hazard

Signs which are of a size, location, content, coloring, or manner of illumination which may be confused with or constructed as a traffic control device or which hide from view any traffic or street sign or signal or which obstruct the view in any direction at a street or road intersection. The Township will work with the local road jurisdictions and Township Police to determine if the sign is constitution a traffic hazard.

4. Signs Constituting a Public Nuisance

Signs which contain statement, words or pictures of an obscene, pornographic or immoral character. Signs which emit auditable sound, odor, visible matter. The

Township will work with the local road jurisdictions and Township Police to determine if the sign is constitution a traffic hazard.

Signs in or on a vehicle when the vehicle is placed in a location not normally expected for such vehicles, and the location has the apparent primary purpose of attracting attention or providing advertising in addition to that permitted for legal signs on the site.

5. Exterior Signs Prohibited

- A. Roof Signs: A sign that is located upon, above, or over the roof of a structure, or in the case of a building with a mansard roof, a sign that is above the deck line of the mansard roof.
- B. Portable signs: A sign not permanently affixed, anchored, or secured to the ground or to a structure, including trailer signs, tripods, menu and sandwich-board signs.
- C. Tacking, pasting, painting, or otherwise affixing of signs or posters visible from a public way except “no trespassing”, “no hunting”, or beware of animal, warning of danger signs and other legal postings as required by law, located on the walls of buildings, barns, sheds, on trees, posts, fences, or other natural features is prohibited.

Mr. Milton, moved, Mr. Meister, seconded to table the proposed Chocolay township sign ordinance until the next Planning Commission meeting.

B. Lakenenland Sign

Mrs. Thum explained that her and Ms. Fuller went to Lakenenland and measured the sign from the road using a scale. Staff has determined that the sign measured 26ft long and thee height is 2.5 ft tall with a total of 65 square feet. The Township zoning ordinance sets the maximum size for ground sign at 60 square feet, but there is an enlargement factor. The sign is setback approximately 75 feet and therefore can be increased by 10%, which would be an additional 6ft. Staff stated that the bird is separate piece and is considered art not a sign.

C. Comprehensive Plan update work plan

Mrs. Thum discussed the Township vision session.

Planning Commission Minutes

Monday, November 1, 2010

I. Meeting called to Order at 7:30 P.M. / Roll Call

Members present: Andy Sikkema, Kendal Milton (Chairperson), Dr. Ken Tabor, Andy Smith (Vice chairperson), Eric Meister, Estelle DeVooght and Tom Mahanney

Members Absent: None

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval of October 4, 2010 Minutes

Staff noted that the second page was missing, but the only item on that page pertained to the changes that were made under the Township Sign Ordinance.

Mr. Milton moved, Mr. Sikkema seconded to approve the minutes as written

Ayes: 7 Nays: 0 Motion Carried

III. Additional Agenda Items / Approval of Agenda

Dr. Tabor, moved Mr. Sikkema, seconded to approve the agenda as written

IV. PUBLIC HEARINGS

A. None

V. PUBLIC COMMENT

Mr. Gary Niemela, 111 Lara Lei Trail wanted to talk about the current height restrictions. Mr. Niemela read a letter addressed to the Planning Commission, which discussed the height change last year when the PC increase the detached accessory height from 15' to 16' 6". Though what has happened due to some language error was that the height was measured from the top of the detached garage, instead at the midpoint. The increase was done, but staff denied an application because the height definition states that it's measured to the top. Also Mr. Niemela discussed that the definition is measured from the grade prior to any ground breaking. He would like detached accessory structures to be measured from the average height with a maximum being 16' 6".

VI. PRESENTATIONS

A. none

VII. NEW BUSINESS

Height regulations and definitions

Mr. Milton stated that it was the intent of the Planning Commission, last year to state the same thing as the Building Codes and that the average height is the midpoint of the regular gable roof and the intent was not to be different from that. With regards to natural grade, that might be to restrictive, the intent was not to allow drainage to go on to neighbors property. The grade should be at the property line and not the setback line. That would be intent of our deliberation.

Estelle DeVooght, we have been trying to figure out a definition of grade, someone has to tell what a grade is and what we can use in our Ordinance.

Mr. Niemela, stated that here is natural grade which has elevation changes and a finished grade.

There are few instances where you can start with a natural grade. In most cases, you have to bring in fill to make sure you have a flat starting point. The final grade is one that has been altered and different than the existing grade. Estelle wanted to see if the language can state final.

Mrs. Thum asked if we can use a cut and fill cross section to help determine if the height of the overall structure does or does not affect the drainage onto the neighboring lot. This could be something we could add as a requirement to obtain a zoning compliance permit. Ms. Thum stated that maybe then we could remove the height definition and then require a cut and fill cross section.

There was further discussion on drainage and who regulates it and if local staff level can look at drainage and determine if there will be problem. Mrs. Stated that we could do that by reviewing cross sections and working with the drain commissioner. There was discussion on a detached garage, with an energy truss are they allowed with a 16' 6" measured from the midpoint would work under the ordinance.

Mr. Sikkema asked when you put a height restriction on structures, what are you trying to accomplish. With zoning you are trying to make sure that whatever is built does not adversely affect neighboring properties and that is why we have setbacks. For example, if someone has a sloping lot, you would not want that person to put 6ft fill on that, raise their lot higher than the neighboring lots. Another question that we have to ask, does a higher building which blocks a river from their neighbor, does that detract for the neighboring home value? We need to find a compromise for our residents.

Mr. Mahaney, asked if we should change the grade from average to finish

Ms. Thum stated that she was not sure about finished grade and like the discussion that Andy Sikkema had started. We should look at incorporation language with regards to the natural grade around the buildings. Should we require cross-sections?

Andy Sikkema – we need to have some control of grade if we remove the statement about natural grade and measuring the height before breaking ground, the intent might be to have that statement in place for site plan review. If we take out the section about measuring the height from grade prior to breaking of ground then we need to have some form of controlling the height for those permits that do not require a site plan review. You don't want to take away a control item.

Mr. Milton, if you are impacting an area that is near the property line, that is the control feature, if you are attempting to put your drainage on to your neighbor property, the setbacks help to control that.

There was further discussion on site plan review in relationship to grade and height.

Mr. Sikkema, we need to amend the height definition and if we take out the natural grade then there needs to be some way to control the grade and how tall a structure can be on that lot. If you use average grade, you are trying to get things level, but if some is a lot that slopes off considerably to another lot, that 6ft of fill that could impact the drainage and image of that persons lawn. If we take that out, that you can change the grade of a lot, so do we use a number that would then kick in site plan review. Or, if you are not going to start construction at the natural grade then you have to go through site plan review. I don't like but it's a fair way to get a permit and to ensure that the neighbors are protected.

Andy Smith, as long as we keep the average word in the definition.

Eric Meister, the grade and definition has to be in relationship to the house/lot.

Ms. Thum gave some examples where the height or filling of a lot has affected a neighboring lot.

There was further discussion on height and that it would impact few individuals, but we need to try and protect everyone. How we should try and require site plan review that might be the only option to try and protect our residents. Any changes for ___ ft would require a site plan review, we need to figure out what number we should use.

Mr. Milton, if they are adding fill in the setback that should kick in site plan review, the interior of the property, one should be able to do what they want, but the setback limits could affect the neighboring property and that should kick in the site plan.

Mr. Smith commented that this is the right direction, if it is setback if you are in that 15ft with grade adjustments to accommodate your building then you should have to go through site plan review. If you are not then you won't affect your neighboring property, so this should work.

Mr. Sikkema, any changes to grade within the setback limits would require site plan review?

Mr. Smith, so the 16' 6' comes from the natural grade then you build in the setback then you will affect your neighboring lots. Any grade changes within the necessary setback would require site plan review.

Mr. Sikkema, any grade changes within setback in any district, and any adjustments of grade over 2ft would require site plan review. If your structure requires any grade changes within the setback, then you would have to go through site plan review, so we are adding another condition to get approval. That takes care of that portion, now we have to look at the definition of height and the changes that go with accessory buildings, that state average height. There is no definition of average height, then you have to go look at the definition of height. What we need to do is define average height and leave the definition of height alone. We need to come up with the term average height and in the section where it talks about accessory structures, it states height, not building height.

Mr. Milton, the building code measures from the finished grade to half the distance from the eaves to the peak. Then its difference from mansard roof, but that is from the finished grade as well.

Do you define average height, and its difference from height? We have to be careful changing the definition that you are not changing height or another portion of the ordinance.

The commissioners read the building height and figure they could change average height to building height, so that no detached accessory structure will exceed 16'6" in **building** height as determined by the Zoning Administrator.

Mr. Milton made a motion and Mr. Sikkema seconded that the Planning Commission be the applicant for proposed text amendment #34-10-18, to amend Section 6.7 General Provision, Footnote #6 and Section II, Definitions of height.

Ayes: 6 Nays: 1 (DeVooght)

VIII. OLD BUSINESS

Township Proposed Sign Ordinance

4. Height of Signs

No sign shall exceed a height of thirty (30) feet. (See #11 if proposed sign will be taller than 20ft)

A monument sign shall not exceed a total height of twelve (12) feet including the sign pedestal. Sign height shall be measured to the top of the sign, from the adjacent grade. The use of berms or raised landscape areas is only permitted to raise the base of the sign to the mean elevation of the fronting street.

All wall mounted signs shall be mounted such that no part of the sign is higher than the height of the façade of the building upon which it is mounted.

(Figure 7)

5. Sign Construction and Assembly

All free-standing signs shall have a sign face that is an integrally framed structure and shall not have multiple, attached separate sign units on the face of the sign supports. The entire sign shall be made of materials that maintain this integral character, rather than an assemblage of different signs types and materials. Changeable-message signs shall be an integral part of the face of any free-standing sign. ~~4~~

addition, such message signs shall have uniform dark background with light-colored lettering and satisfy all other conditions of this Ordinance.

6. Sign Maintenance

All signs and all components thereof, including supports, braces, anchors, etc. shall be kept in a good state of repair, in compliance with all building and electrical codes, and in conformance with the requirements of this ordinance. Any sign which is determined by the Zoning Administrator to be insecure, in danger of falling, endangering the public safety or otherwise deemed nonconforming because it does not conform to all standards and regulations of the adopted ordinance or amended ordinance, shall be removed within fifteen (15) days removed by its owner unless it is repaired and made to otherwise comply with the requirements of this Ordinance. The Zoning Administrator will contact the Marquette Building Department to determine if a sign is in face unsafe and violates and building or electrical codes. Any electronic variable message sign shall be maintained so as to be able to display messages in a complete and legible manner.

7. Illumination of any Sign

- A. No animated signs are permitted in any district.
- B. Residential Districts – ~~Only indirectly (externally) illuminated signs shall be allowed in any residential district provided such sign is so shielded as to prevent direct light rays from being visible from the public right-of-way or any adjacent residential property. Any existing indirect lighting shall be pointed downward to prevent direct light rays from being visible of neighboring properties.~~
No home occupation sign shall be illuminated.
- C. Commercial and Industrial – Indirectly,(externally) or internally illuminated signs are permitted providing such sign is shielded as to prevent direct light rays from being visible from the public right-of-way or any adjacent residential property.

Where illumination of signs is permitted, the following standards shall apply.

- 1. ~~Lighting for signs shall not create a hazardous glare for pedestrians or vehicles either in a public street or on any private premises.~~
The direct light rays shall not glare or shine outside the sign face.
- 2. The light source, whether internal to the sign or external, shall be shielded from view. This requirement is not intended to preclude the use of diffused exposed neon.
- 3. Sign illumination for externally illuminated signs shall utilize focused light fixtures that do not allow light or glare to shine above the horizontal plane of the top of the sign or onto any public right-of-way or adjoining property.
- 4. ~~Signs shall not be illuminated after 10:00 p.m. or close of business, whichever is later.~~
- 5. ~~Each sign shall be designed so that illumination does not exceed 100 luxes (10 foot candles) measured at a distance of 10 feet from the sign.~~
- 6. ~~All electronic changing image signs shall be equipped with an automatic dimming feature that accounts for ambient light levels.~~

- D. Electronic Variable Message Signs: Any sign may be an electronic variable message sign subject to the following regulations:

1. Surface Area: The areas of electronic variable message signs capable of displaying copy shall not exceed forty (40) square feet and shall be included within the maximum aggregate sign surface area allowed for the type and location of sign upon which the changeable copy is displayed.

~~If mounted on a building or if free standing, the maximum area is 16 square feet. If part of a pole sign, the electronic message center may only constitute 20% of the overall sign area.~~

2. Length of Cycle. The electronic changeable copy or images shall not alternate, change, fade in, fade out, or otherwise change more frequently than once every twenty (20) seconds. Electronic variable message sign signs may not display scrolling, racing, pixelating or moving characters or images, or similar actions that convey motion.

~~3. Color. All copy, characters or other changeable images shall be of one (1) color only, with light copy on a dark background.~~

~~4. Brightness Adjustment: An electronic variable message sign shall be equipped with photosensitive equipment which automatically adjusts the brightness and contrast of the sign in direct relation to the ambient outdoor illumination such that the light level does not exceed three (3) foot candles at the front lot line and one (1) foot candle at all other lot lines, measured three (3) feet above the surface of the ground.~~

All electronic signs must have installed an ambient light monitor, which shall continuously monitor and automatically adjust the brightness level of the display based on ambient light conditions.

All electronic signs may not be set above 60 percent of the brightness capability of the sign. DETERMINE THE AMOUNT OF NITS FOR THE BRIGHTNESS. CONTACT SIGN FOR MAXIMUM NIIS.

~~All electronic signs within 200 feet of a residence must be switched off between 11 p.m. and 7 a.m.~~

~~E. Service Station LED Signs~~

~~Permanent ground mounted sign for use only by fuel service stations for the purpose of advertising fuel costs are allowed.~~

~~1. No such sign shall exceed thirty-two (32) square feet with a maximum height of six (6) feet. The LED numerals may not exceed twelve (12) inches in height. Signs may double sided.~~

~~2. All ground mounted signs shall be located a minimum of five (5) feet behind the street right of way. At intersections, no sign shall be in the sight triangle as defined by this ordinance. See example of required sight triangles on Page 10.3.~~

~~3. Color. All lighted LED numerals shall only be green or red in color. LED background screen may only be black.~~

~~4. Illumination. The sign must not exceed a maximum illumination of 5000 nits (candelas per square meter) during daylight hours and a maximum illumination of 500 nits (candelas per square meter) between dusk to dawn as measured from the sign's face at maximum brightness. Such signs may not display light of such intensity or brilliance to cause glare or otherwise impair the vision of the driver, or results in a nuisance to the driver~~

8. Signs in or over a Right-of-Way

~~If applicant receives permission from the correct road jurisdiction to permit a sign in the Right of way the applicant then they must submit the drawings and sign application to the Planning Commission for their approval. Permits by road jurisdiction do not supersede the rules of this ordinance. (REWORD)~~

9. Signs Constituting a Traffic Hazard

A sign constituting a hazard to safety or public welfare by reason of inadequate maintenance, dilapidation, obsolescence, disaster, damage, abandonment or inability to meet lateral and/or vertical loads as determined by the Township Police, appropriate road jurisdiction and/or Marquette County Building Codes Department.

No person shall install or maintain or cause to be installed or maintained any sign which simulates or imitates in size, color, lettering, or design any traffic sign or signal, or any other words, phrases, symbols and/or characters, in such a manner as to interfere with, mislead or confuse traffic.

10. Abandoned Sign

Abandoned Signs shall be removed in accordance with their status as to conformity. Where such signs are non-conforming in size, or height, or other features, they shall be removed within ninety 90 days. Where the sign is conforming, but abandoned they shall be removed after one year. Any abandoned conforming sign or abandoned non-conforming sign or sign structure may be removed by Chocolay Township as the expense of the property owner.

11. Setback

All signs shall be setback a minimum of five (5) feet from the right-of-way (ROW) of a public or private street. At intersections, no sign shall be in the sight triangle as defined by the local road jurisdiction. **(ADD ZERO SETBACK FROM THE RIGHT OF WAY)**

No monument sign shall be located within 200ft of any other monument sign unless the Zoning Administrator determines that practical difficulties exist for locating the sign.

12. ~~Signs constituting Planning Commission Review~~

~~A. Any sign that is proposed to be taller than 20ft and borders a residential zoning district(s) on at least two sides.~~

~~B. The placement of any sign that projects more than thirty (30) inches from the building and overhangs a public right-of-way.~~

~~C. All electronic message signs shall be required to come before the commission to determine the impact of the proposed sign.~~

18.4 Signs Permitted in all Districts

The following signs are permitted in all districts; subject to the restrictions herein contained and shall not require permits for erection.

1. Governmental Signs.

Governmental signs of a branch of local, state or federal government, including traffic or similar regulatory devices, or signs required to be maintained or posted by law or governmental order, rule or regulation.

~~**2. Flags or Emblems**~~

~~Flags or emblems of governmental, civic, philanthropic, educational, or religious organizations, provided that the height of any flagpole shall not exceed thirty (30) feet.~~

3. Commemorative Signs

Commemorative signs such as cornerstones, historical markers, memorial plaques or tablets, and the like.

4. Warning Signs

Warning signs such as "No Trespassing," "No Hunting," "danger," and "Beware of Dog," not **exceeding six (6)-square feet in area.**

5. Permanent Window Signs

A business shall be permitted interior signs (including neon as long as it's not moving, flashing, blinking) and that occupy not more than twenty-five (25%) of the individual window area. **If we increase to 50%.**

6. Church Bulletin Signs

One (1) Church announcement bulletin shall be permitted on any site which contains a church regardless of the district in which located, provided said bulletin does not exceed twenty-four (24) square feet in area and a height of sign (6) feet, and is set back a minimum of ten (10) feet from the property line.

7. Political Sign

Political signs which are intended to advertise a public election, issues to be balloted upon in that election, promote individuals and/or parties participating in the election are exempt providing that no sign shall have an area exceeding four square feet in area. Sign areas may be increased to thirty two square feet provided the sign is so located that no portion of the sign area is located on the public right of way or lands of which are being used for public right of way and further provided that all political signs be removed within ten days after the election, and provided that all signs authorized are authorized only 90 days prior to any election. (34-08-02)

8. Residential/Address Sign

Signs having an area of not more than sixteen (16) square feet, the message of which is limited to conveying street number, the name of the premises, the name of the owner of the premise, and the name of the occupant of the premises.

~~9. Agricultural operations including pick your own produce and pick your own plants and trees grown on the premises may install a maximum of six (6) off premises signs for the purpose of directing to the location of the agricultural operation. The signs shall not exceed 6 square feet per exposed face, or 12 square feet in total area. The maximum sign height shall not exceed three (3) feet. Nothing in this subsection authorizes the placement of any sign on private property without the consent of the property owner.~~

10. Signs not legible from the road are permitted. As the sign is not attended for the.

18.5 Prohibited Signs

1. Banners

Banners, pennants, search lights, twirling signs, sandwich board signs, sidewalk signs or curb signs, balloons, or other gas-filled figures are prohibited except as provided in Section 18.8 Temporary Signs.

2. Moving Sign

No sign shall have any visible moving parts, visible mechanical movement or any other apparent visible movement achieved by electrical, electronic, or kinetic means, intermittent electrical pulsations or wind currents.

3. Signs Constituting a Traffic Hazard

Signs which are of a size, location, content, coloring, or manner of illumination which may be confused with or constructed as a traffic control device or which hide from view any traffic or street sign or signal or which obstruct the view in any direction at a street or road intersection. The Township will work with the local road jurisdictions and Township Police to determine if the sign is constitution a traffic hazard.

4. Signs Constituting a Public Nuisance

Signs which contain statement, words or pictures of an obscene, pornographic or immoral character. Signs which emit auditable sound, odor, visible matter. The Township will work with the local road jurisdictions and Township Police to determine if the sign is constitution a traffic hazard.

Signs in or on a vehicle when the vehicle is placed in a location not normally expected for such vehicles, and the location has the apparent primary purpose of attracting attention or providing advertising in addition to that permitted for legal signs on the site.

5. Exterior Signs Prohibited

A. Roof Signs: A sign that is located upon, above, or over the roof of a structure, or in the case of a building with a mansard roof, a sign that is above the deck line of the mansard roof.

B. Portable signs: A sign not permanently affixed, anchored, or secured to the ground or to a structure, including trailer signs, tripods, menu and sandwich-board signs.

C. Tacking, pasting, painting, or otherwise affixing of signs or posters visible from a public way except "no trespassing", "no hunting", or beware of animal, warning of danger signs and other legal postings as required by law, located on the walls of buildings, barns, sheds, on trees, posts, fences, or other natural features is prohibited.

18.6 Signs permitted in the Agricultural Forestry (AF) and Municipal Properties (MP)

Agricultural-Forestry

One (1) sign advertising the type of farm products grown on a farm premises. Such sign shall not exceed twelve (12) square feet in area. Up to two additional signs not exceeding twelve (12) square feet in area each may be placed on land owned by, or under the control of, the operator of a roadside stand, or a farm offering customer harvesting of crops, during the period said stand or operation is open for business. Said signs shall be located within a one and one half (1.5) mile radius of the farm advertised and be placed behind the right-of-way line.

Add language pertaining to farms. Setback/right of way.

Signs permitted in the AF District in conjunction with conditional uses shall not exceed 60 sq ft and shall be subject to the height and setback requirement in Section 6.1 of the Township Zoning Ordinance.

Recreational Signs

One sign identifying each recreation park up to a maximum of two (2) per structure for a recreational facility, having an area not exceeding thirty (30) square feet and a height not exceeding eight (8) feet is permitted.

Snowmobile business tourist directional signs shall be located at designated turnoffs and on the right-of-way of the D.N.R. snowmobile trail, signs shall be 12 inches x 12 inches or smaller, shall be limited to the "Standard International Symbols for food, gas, and lodging," one sign post per approved location. No business names allowed on any signs. (Signs shall not be in violation of any State ordinances, pamphlets, guides or directives).

Municipal Property

One sign or changeably copy sign identifying each municipal owner facility, having an area not exceeding thirty (30) square feet in area and a height not exceeding eight feet is permitted. Municipally-owned signs shall not be placed in any sight visibility triangle and shall be located at least fifteen (15) feet from any privately-owner parcel of land.

18.7. Signs permitted in the R-1, R-2, WFR and MFR Districts

One sign identifying each subdivision or mobile home park per vehicle entrance, having an area not exceeding twenty (20) square feet and a height not exceeding eight (8) feet is permitted. During development of a subdivision or other property for a period not exceeding two years, one sign, naming the subdivision or other property, developer, contractors and subcontractors, engineers, architects, brokers, and financial institutions involved, and advertising the development, having an area not exceeding fifty (50) square feet, and height not exceeding 12 feet, is permitted in the subdivision, together with signs having an area not exceeding six square feet each and a height not exceeding six feet, directing the public to or identifying models.

On premise signs for golf courses are limited to one sign per course with a total area not exceeding 60 square feet provided that the sign is setback 5 feet from the front line and setback 30 feet from a side lot line.

18.8 Signs permitted in C and I Districts

1. Signs permitted on lots not located in a Shopping Center

~~A.-Area — Total area of a sign is not to exceed six square feet for each ten feet or fraction of frontage.~~

- B. No monument sign shall exceed sixty (60) square feet in area.
- C. No pole sign shall exceed 70 square feet in area.
- D. Total signage permitted for each building shall be determined as one (1) square foot of sign area for each one (1) linear foot of lot frontage provided that the maximum permitted area for any sign shall be 100 square feet.
- ~~E. NUMBER—Each developed lot shall be permitted one monument sign. Each developed lot that is located at the intersection of two (2) collector or arterial streets as classified in the Township’s Comprehensive Plan, may have one additional monument sign, provided that only one (1) identification sign shall be permitted on any single street. Each developed lot shall be permitted one wall sign.~~
- F. Menu/Price Boards – In addition to the signs permitted in paragraphs a. and b. above, drive-thru businesses with automobile pick up windows may have two (2) menu/price boards and each shall not exceed twenty-four (24) square feet in area.
- G. Ingress/Egress Signs: On premise signs of non-advertising, non-identification nature designed exclusively to control access or use, to warn or to direct traffic or pedestrians. Only one (1) entrance/exit directional sign is permitted per legal driveway, and it may not exceed four (4) square feet in area.

2. Signs permitted in a Shopping Center

Signage Guidelines

Shopping center identification signs should be compatible with the design theme of the development. They may identify multiple tenants, but larger shopping centers with more than 5 tenants should avoid listing individual tenants, other than the project anchors, to avoid sign clutter. The sign structure should contain elements of the design theme of the buildings in the center.

- A. One ground mounted/multi-tenant monuments shall be allowed for commercial and mixed-use developments only. (Shopping centers, office complexes, etc.) Individual tenant ground mounted signs are not permitted under this set of criteria. Each store or industry may have one wall sign with a maximum of two and one –half (2 – 1/2) square feet of sign area for each lineal foot of building frontage up to a maximum of one hundred (100) square feet.
- B. Overall monument (armatures, monument bases, brick or stone structural elements, etc.) including maximum allowed sign area should not exceed 100 sq. ft.
- C. Additional monuments on secondary road entrances should be smaller in scale than the primary sign and are limited to 32 square feet. Such signs must be on the same lot as the shopping/business center.
- D. Each tenant of shopping center shall be guaranteed at least 10 square feet of wall signage.
- E. Landscaping must be planted and maintained around the base of any free-standing identification sign.
- F. Menu/Price Boards – In addition to the signs permitted in paragraphs a. and b. above, drive-thru businesses with automobile pick up windows may have two (2) menu/price boards and each shall not exceed twenty-four (24) square feet in area.
- ~~4. A time and temperature sign shall be permitted provided that ownership identification or advertising copy does not exceed ten percent (10) of the total sign area and further provided that the total area of the sign does not exceed twenty four (24) square feet. Such signs shall follow the provision in Section 18.5, (2)~~

18.9 Temporary Signs

Un-illuminated on-site temporary exterior signs may be erected in accordance with the regulations of this section.

- 1. In single-family and multi-family districts one (1) sign for each public street frontage advertising a recorded subdivision or development shall be permitted. Each sign shall not exceed thirty-two (32) square feet in area. Each sign shall be removed within one (1) years after the initial rental or sale of eighty (80) percent of all lots or dwelling units within said development.

2. One (1) identification sign shall be permitted for all building contractors, one (1) for all professional design firms and one (1) for all lending institutions on sites under construction, each sign shall not exceed six (6) square feet in area, with not more than a total of three (3) such signs permitted on one (1) site. If all building contractors, professional design firms and lending institutions combine together in one (1) identification sign such sign shall not exceed thirty two (32) square feet in area with not more than one (1) sign permitted on site. Signs shall have a maximum height of ten (10) feet and shall be confined to the site of construction, construction shed or construction trailers ~~and shall be removed within fourteen (14) days after the issuance of a certificate of occupancy.~~

3. Real Estate Directional Signs

Real estate signs advertising the sale, rental, or lease of property in residential districts are permitted provided:

A. The sign is located on the lot or in front of the unit for sale.

B. One (1) sign is permitted.

C. Sign shall not exceed six (6) square feet in area.

D. Sign shall be placed at least ten (10) feet from the edge of the road right-of-way or easement.

E. Signs shall be removed within seven (7) days after the property has been sold, rented or leased.

4. Banners are permitted without, a permit shall be required if such banner will be posted for more than thirty (30) days. If such banner is proposed to be up a longer a temporary sign permit will be required. Such signs shall not obstruct pedestrian or vehicular view. Gas filled figures are not permitted.

~~A. Banners may be no larger than 40 square feet in area, and located on a building with all four corners securely attached.~~

B. Not exceed twenty (20) percent of the wall area to which the sign is attached. **Increase that to be the same as wall sign area.**

C. Not to be attached to or between telephone poles, fences, fence posts, utility posts, public or private light posts, trees, vehicles, or any other apparatus other than a building wall.

D. Be maintained in a neat, attractive and safe condition.

E. Work on language for sandwich board signs – right –of way. Include working about lot frontage, each business is limited to ____ how many permitted for each lot.

5. In residential districts, temporary direction signs, not exceeding three (3) square feet in area and three (3) feet in height, shall be permitted on approach routes to a private garage or rummage sale, for a period not to exceed seventy-two hours. Said signs shall contain address, dates of the sale and shall be removed within 16 hours of the end of the sale.

XI. DIRECTOR'S REPORT

Mrs. Thum read a letter from a concerned citizen discussing the holiday gas station and the fatal accident. The resident stated that the gas station signs and lights really make it difficult for people whom are turning into Holiday hard to see the driveways. Mrs. Thum stated that staff mentioned that there was the possibility that the curbs could be painted white, to help drivers see the driveways.

Estelle DeVooght, there are so many light there, it's hard to see the driveways.

Andy Smith, stated that he had a conversation with the manager from Holiday about wanting to install lights at the edge of the curb and painting of their curbs. In the winter when they have the orange stakes in its easy to see, in the summer at night it's hard to see the driveway.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A Planning and Zoning News, September 2010
- B. City of Marquette Planning Commission Minutes, September 7, 2010 and September 21, 2010

Planning Commission
Charter Township of Chocolay

5010 US 41 South
Marquette, MI 49855
Phone: 906-249-1448 Fax: 906-249-1313

There are no minutes for the meeting on December 6, 2010.

The meeting was cancelled.

Charter Township of Chocolay

Planning Commission Minutes

Monday, January 10, 2011

I. Meeting called to Order at 7:30 P.M. / Roll Call

Members present: Andy Sikkema, Kendal Milton (Chairperson), Andy Smith (Vice chairperson), Eric Meister, and Tom Mahaney

Members Absent: Dr. Ken Tabor, Mrs. Estelle DeVooght

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval November 1, 2010 Minutes

Mr. Andy Smith asked that his comment on the last page be written to state that he had a conversation with the gas station manager about placing lights at the corners of the lot. Staff noted the change.

Mr. Meister moved, Mr. Milton seconded to approve the minutes as written

Ayes: 5 Nays: 0 Motion Carried

III. Additional Agenda Items / Approval of Agenda

Ms. Thum asked that the Sign Ordinance be moved to Item VIII B.

Mr. Milton moved, Mr. Sikkema seconded to approve the agenda with the added change.

Ayes: 5 Nays: 0 Motion Carried

IV. PUBLIC HEARINGS

A. Conditional Use Permit #87

Mr. Milton stated that this was the neighbor of the person that had requested the Zoning Board of Appeals grant them a side setback of 2ft on the east side. Mrs. Thum explained that the owners of 2003 M 28E have a signed purchased agreement to purchase 25ft from Ms. Weiger, the applicant, for CUP #87. Mrs. Thum's concern was that if the agreement goes through, than part of the dune and vegetation that Ms. Weiger would like to see removed, could be part of 2003 M28E property. Ms. Thum explained that in her report she had written that maybe the Planning Commission should table this item until they can get confirmation that the sales agreement has gone through and then request that an updated survey be conducted to ensure that the dune and vegetation that is being proposed to be removed is not part of the purchase agreement. Mr. Milton noted that by looking at the pictures, they started the work prior to obtaining any of the permits.

Mr. Mahaney asked about the location of the garage. Ms. Thum stated that they are proposing to remove a portion of the dune and some vegetation on the East side of the property and place the dune fill on the West side.

Mrs. Thum stated that she went to the site and attempted to find where the new property line would be if the 25ft sales agreement went though. She stated that it appears that a portion of the dune that was removed would be located on the 2003 M-28E property.

Mr. Mahaney asked if we should wait and see what happens with the sales agreement? Mr. Milton stated the purchase agreement has already taken place, and the house was removed from 2003 M-28E.

Mr. Gary Enright, the construction firm for 2007 M-28E. He stated that the work began and he was not aware that they needed a permit. He asked if the purchase agreement had been signed. He was not aware of the purchase agreement. Mr. Enright approached the Commission to view the sales agreement that they had as part of their packet. The Commission reviewed the sales agreement and that the closing date had passed, so then it might not be official yet, and Mr. Milton stated that then complicates things.

Mr. Enright, explained the details of the garage, and that it will be a detached garage. Ms. Weiger wants it near the entrance of her house that is on the East Side. Mr. Enright showed the location of the garage on a picture that was provided to get a better idea of where it would be located in reference to the dune. Mr. Enright explained that the dune will be cut into, not completely removed. The dune should only be cut about 10ft in. There was further discussion with regards to the purchase agreement.

Mr. Milton asked if there were any other proposed comments on CUP #87. Hearing none the public hearing was closed.

B. Rezoning #145

Mr. Milton stated that proposed Rezoning #145 is for a five unit apartment complex with record storage in the basement and that the property is located at 425 Corning Ave. Mr. Milton then opened up the public hearing.

The applicant, Mr. Zarkowski, 1982 Orchard Street, they plan to turn the building into 5 units handicap accessible apartments; 4 will be two bedroom and 1 will be a one-bedroom apartment. The building would be 100% barrier free. Mr. Zarkowski went over the floor plan of the building. He stated that the basement will be rented to Bell Hospital as they are the owners of the records in the basement and there will be a separate entrance for them and the basement has sprinklers.

Mrs. Fradette, 126 W. Terrace

Mrs. Fradette, stated that they were concerned about the commercial aspect that is being introduced as part of the neighborhood, where this area is highly residential. They object to the commercial aspect of the proposed PUD. They stated that Bell Hospital were good neighbors. Also, that if the apartments could be done without having commercial in the basement, and then they would support this project. Mrs. Fradette stated that she is concerned about their property values.

Mr. Zarkowsk stated that the parcel has been commercial for over 30 years and the multi-family will be a nice transition between the commercial that exists and the single-family residential. The commercial will be in the basement.

V. PUBLIC COMMENT

Mr. Bob Cambsney, (insert address) engineer for the site. With a PUD if granted their approval and use can be rescinded, and that would assure the residents that no other commercial use would occupy the basement. If at some point the apartments don't make it you can't just put a new use in the basement without going before the Planning Commission, as there would be a major change in the approved plan. The commercial use is only for the continuation of record storage.

VI. PRESENTATIONS

A. None

VII. NEW BUSINESS

A. Rezoning #145

Mr. Milton stated that we should continue with Rezoning #145. The applicant is proposing to combine the multi-family designation with a commercial designation in the basement and he has to go through the PUD process. He will maintain the storage facility and use the upper portion for the multi-family use.

Mrs. Thum gave her report and her concerns along with the Department of Public Works and Fire Department. Her concerns dealt with regards to the use and that another driveway may want to be added for emergency purposes. Mrs. Thum was also concerned that there could be an increase in traffic on the streets and wondered what the expected number of vehicles would be at the site on a day to day basis. Also if there would be set hours for the building, as to when family or staff such as nurses and other doctors would be permitted to visit the building. Mrs. Thum also mentioned that past practices of PUD development and the Planning Commission's review has been to add landscaping and open space requirements to the proposed development. Mrs. Thum stated that this should be considered. However, the proposed development would be utilizing an existing site, so she was not sure if open space and additional landscaping would be required for an infill development. Mrs. Thum has stated that she has not received any comments from any of the local or state organizations that the notices were mailed to. The future land use map does show this site as residential. With regards to the Commercial use, if the business does not work, one of the conditions can be that it will revert back to residential. Also, the conditions could be that any commercial change in the basement has to come back before the Planning Commission as well.

Mr. Mahaney asked about the minimum lot requirement and if the applicant would be permitted to build an additional building onto the site or not.

Mrs. Thum explained that the proposed rezoning went before the ZBA at their December meeting and went over the minimum Floor Area ratio's and lot coverage. It would be something that the engineer and developer would have to show on a site plan so we could get an understanding as to what the lot coverage would be with an additional building. Mrs. Thum also mentioned that the sewer could be an issue if another building is proposed, she will have to check with DPW.

Mr. Sikkema stated that, the additional building is a good concern and that could be something that we add as part of the conditions, that any new building would have to go through the site plan process again. It would have to be part of the application.

Mr. Wolfson (realtor for Bell Hospital) stated that the only entrance for the basement is in the front. There is a service drive in the rear of the building that is used for maintenance people to get to the air conditioner and dumpster.

Mr. Sikkema read from the Township Zoning Ordinance about the PUD regulations and what is approved and permitted. They would not be able to change the use of commercial and we could name who the records belong to.

The applicant, Mr. Zarkowski, questioned the Planning Commission comments about the types of records that would be stored in the basement. There was further discussion between the Planning Commission and the applicant about the commercial request in a residential neighborhood. The Planning Commission wanted to address the commercial use to satisfy the residents and preserve the integrity of the neighborhood.

Mrs. Thum stated that she can work on a list of proposed conditions for approval of this site.

Mr. Milton went over the final site plan items that are required per the Township Zoning Ordinance and reviewed the current site plan.

Mr. Cambseny went over the current fence location and the staff's comment about the fence needing to be extended. Mr. Cambseny asked that if you were a neighbor, would you want to have to stare at a fence or the trees that they can see now. Also the neighbor's driveway is partially on Bell Hospital's property. Mr. Cambseny went over the neighboring lots that are zoned commercial.

Mr. Sikkema stated that there still appears to be some gaps into the application and that we need to make a recommendation to the Board, but we still needed answers. We need the applicant to quantify some items. A discussion occurred between the Planning Commission and the applicant with regards to record storage. In terms of the way records are stored, there are numerous ways that they could be stored including a computer system, paper, and so we need to get the intentions of the commercial storage.

There was a further conversation about records and the length of the process between the applicant and the Planning Commission.

Mr. Smith asked about what items should be added on the approval of preliminary approval for the applicant to follow and items that need to be added on the final site plan.

Mr. Meister moved, Mr. Mahaney second, that following the review of Rezoning Request #145, and the Staff/File Review, and holding a public hearing, the Planning Commission recommends Preliminary Approval and will forward Rezoning #145 to the County Planning Commission for their review. The applicant shall prepare the drawings for Final Site Plan review and those will be reviewed at our next Planning Commission meeting. The following information must be supplied to the Township as part of the Final Site Plan review.

1. The number of vehicles that would be expected to be at the site on a typical day.
2. Hours that the building will be open.
3. To indicate any signs that might be requested.
4. To indicate dedicated open space, new landscape and any fencing that will be expanded.
5. The Final Site plan will address any comments that were made by the state and local agencies
6. The applicant will provide a detailed definition of what records will be stored in the basement.
7. Any revisions to landscape, parking, lighting be shown on the final site plan and be approved by the Planning Commission.

Ayes: 4 Nays: 0 Abstained 1 (Milton)

Motioned Carried

B. Conditional Use Permit #87

Mr. Milton explained that this is a request for a Conditional Use Permit to construct a new garage at 2003 M-28E and the applicant has already cut into the dune and removed vegetation. We are not sure what type of vegetation was removed. Also the boundary line on the west side needs to be hashed out with regards to the dune and vegetation that is being proposed to be removed. The big issue is the ongoing sales agreement.

Mr. Milton is not sure how the conditions can be met at this time.

Mr. Sikkema asked about the application and the wall that is being proposed to be built. The home owner would like to install a rock wall along the beach and at the toe of the slope. The applicant, Gary Enright, showed on a picture, the potential location of the rocks.

Staff asked a question as to why she would not build a garage on the opposite location of the lot. Mr. Enright stated that is where the home owner wanted to build the garage.

The applicant stated that they would not have to remove the total dune, just enough to place the garage. The dune that was removed would be used for fill on the East side of the lot.

There was further discussion with the Planning Commission, applicant, and staff about the proposed garage and the layout in relationship to the dune.

The Planning Commission asked the applicant for further information, such as a cross section of the dune, and a drawing of the garage.

Mr. Smith commented that if the garage is built and the purchase agreement went through, would the applicant be able to meet the side setback? That needs to be addressed in order to approve the permit.

The applicant may not be able to build on the opposite side, because the applicant would have to drive over the septic tank and drainfield.

Mr. Meister moved, Mr. Sikkema seconded to table this item pending outcome of the property dispute and the applicant shall provide a detailed site plan showing the dune restoration plan, setbacks, cross section of the dune that is being proposed to be removed, and the new lot line

Ayes: 5 Nays: 0 Motion Carried

C. Proposed Text Amendment #34-10-19

Mrs. Thum explained that this was part of the package of additional amendments that were proposed by Trustee Mark Maki. This is the only one that can be started though the process as the other is still in the works. Mrs. Thum explained that the proposed amendment is to change Section 1.6: Administrative Standards and Polices to be changed to the original language in the 1977 Zoning Ordinance. The Township changed this section in 2008 to be in conformance with the Michigan Zoning Enabling Act. Mrs. Thum explained the current language and why it was changed and that the specific MZE does cover what the old language did in relation to publishing and public notices.

Mr. Sikkema moved and Mr. Milton second to hold a public hearing for proposed text amendment #34-19-10 at our March 7, 2011 Planning Commission meeting.

D. Annual Report 2010

Mrs. Thum went over the report and stated that there were some grammar changes that needed to be made. It was also explained that it included what the Planning Commission did for the last year.

E. Top Priorities 2011 (not in any particular order)

1. Sign Ordinance
2. Junk car ordinance
3. Comprehensive plan
4. Attract new businesses
5. Playground in Harvey
6. Underground utilities along US 41S
7. DDA in Chocolay Township
8. Recreation sub-committee
9. Look into creating an additional AF zoning district that has a 5 acre minimum

F. Joint Meeting

Mrs. Thum explained that the Township Board wanted to hold a joint meeting this year. Mrs. Thum thought that the February meeting would be a good one, to get a better idea of the direction of the comprehensive plan. The Planning Commission needs to make a motion to hold a joint meeting with the Board, because they are inviting the Board to one of their meetings. Each Planning Commission member went over a couple of items they would like to see on the joint agenda.

Mr. Sikkema moved, Mr. Meister seconded, to hold a joint meeting with the Chocolay Township Board to discuss the sign ordinance, comprehensive plan, and other items that the Township Board would like to discuss at their February 7, 2011 meeting.

Ayes: 5 Nays: 0 Motion Carried

VIII. OLD BUSINESS

A. Proposed Text Amendment #34-10-18

The Planning Commission discussed the definition of height and the Michigan Building Codes department of height. The Commission wanted to remove the word "natural" from the

definition. There was further discussion by the Commission on the word grade and the previous discussion.

Mr. Smith moved Mr. Milton seconded, that the language that is written on the Zoning Ordinance Text Amendment application has been changed to state the change that was made at this meeting, is acceptable and we will hold a public hearing at the next schedule Planning Commission meeting.

Ayes: 5 Nays: 0 Motion Carried

B. Proposed Sign Ordinance

Mr. Sikkema moved and Mr. Smith seconded to table the proposed sign ordinance until our March 7, 2010 meeting

Ayes: 5 Nays: 0 Motion Carried

C. Proposed Text Amendment #34-10-13

Mr. Sikkema moved and Mr. Smith seconded to table amendment #34-10-13, #34-10-14, #34-10-14, #34-10-15 and #34-10-16 until next scheduled meeting.

Ayes: 5 Nays: 0 Motion Carried

D. Proposed Text Amendment #34-10-14

Mr. Sikkema moved and Mr. Smith seconded to table amendment #34-10-13, #34-10-14, #34-10-14, #34-10-15 and #34-10-16 until next scheduled meeting.

Ayes: 5 Nays: 0 Motion Carried

E. Proposed Text Amendment #34-10-15

Mr. Sikkema moved and Mr. Smith seconded to table amendment #34-10-13, #34-10-14, #34-10-14, #34-10-15 and #34-10-16 until next scheduled meeting.

Ayes: 5 Nays: 0 Motion Carried

F. Proposed Text Amendment #34-10-16

Mr. Sikkema moved and Mr. Smith seconded to table amendment #34-10-13, #34-10-14, #34-10-14, #34-10-15 and #34-10-16 until next scheduled meeting.

Ayes: 5 Nays: 0 Motion Carried

IX. PUBLIC COMMENT

Kim L. Hillier, Co-owner of the Maple Tree Court and Togo's. They are looking at adding new signage and are concerned that their proposed sign won't meet the proposed sign ordinance. They would like to add a roof sign and was not sure if it would be permitted. The Planning Commission had discussion about the roof sign, and that due to the location of the sign, it really is not considered a roof sign and, therefore, could be permitted. The roof signs were not intended to extend above the roof.

X. COMMISSIONER'S COMMENT

Mr. Sikkema stated that MDOT is moving ahead of the reconstruction of US 41 from Bayou Street to the Carp River Bridge, which is scheduled for 2012. The project will consist that the pavement will stay in place, raise the road about 2ft and then the curb and gutter will be eliminated, will have a standard ditch.

XI. DIRECTOR'S REPORT

A. Public Notices

XII. ADJOURNMENT

Mr. Sikkema made the motion to adjourn at 10:00pm.

SPECIAL MEETING
CHOCOLAY TOWNSHIP BOARD
CHOCOLAY TOWNSHIP PLANNING COMMISSION

February 7, 2011

A Special meeting of the Chocolay Township Board and Chocolay Township Planning Commission was held on Monday, February 7, 2011 at the Chocolay Township Office, 5010 U. S. 41 South, Marquette, MI. Supervisor Seppanen called the Township Board meeting to order at 7:30 p.m.

Planning Vice Chair Andy Smith called the Planning Commission meeting to order at 7:30 p.m.

TOWNSHIP BOARD.

PRESENT: Greg Seppanen, John Greenberg, John Trudeau, Mark Maki, Ken Tabor, Susan Carlson.

ABSENT: Arlene Hill.

TOWNSHIP PLANNING COMMISSION.

PRESENT: Andy Smith, Andy Sikkema, Tom Mahaney, Estelle DeVooght, Ken Tabor (also on Township Board).

ABSENT: Kendall Milton, Eric Meister.

STAFF PRESENT: Steve Lawry, Mary Sanders, Jennifer Thum.

The purpose of the Special Township Board/ Planning Commission meeting was to discuss and coordinate direction for the Planning Commission 2011 priorities and goals.

PUBLIC COMMENT.

Mark Maki, 370 Karen Road - Commented that misinformation went unchallenged on Planning and Zoning issues prior to him being a Trustee on the Board. There have been decisions made based on this inaccurate information. Examples are Blondeau Trucking stipulated agreement, zoning for the church on Green Garden Hill, and the Sign Ordinance/Holiday Station sign.

PLANNING COMMISSION 2010 ANNUAL REPORT.

Jennifer Thum, Planning Director summarized the 11 page annual report; Including descriptions of 18 text amendments, Sign and Junk Car Ordinances and various permits.

Comments made by Planning Commission members and Township Board members on the annual report:

- When the Sign Ordinance is complete the Planning Commission will test it on at least 5 business locations to check compliance of current signs.
- Technology is rapidly changing and the Sign Ordinance needs the ability to evolve with it.
- Discussed the difference between flashing light vs. lighted sign (Holiday Sign).
- The change on the Holiday Sign is not noticeable when driving past it.
- The entrance lighting at the Holiday Station is poor and should be addressed.
- Planning Commission feels the assessment of all of the Township parks is important, but they did not have time to complete it in 2010.
- The Planning Commission worked mainly on text amendments and the Sign Ordinance in 2010.
- Judy Vonck – 559 Little Lake Road, concerns about lack of access to wireless communication towers in the agricultural district. How do we move forward in that direction?
- The demand for wireless communications continues to grow and the tower demand will grow with that.
- Page 10 of the 2010 annual report stated that the Planning Commission made several changes to the Sign Ordinance and should have read *the Planning Commission suggested many changes to the Sign Ordinance*.

Greenberg moved, Trudeau second to accept the Planning Commission annual report with the changes addressed above.

AYES: 6

NAYS: 0

MOTION CARRIED.

PLANNING COMMISSION 2011 PRIORITIES AND GOALS.

Dick Arnold, 312 Co. Road 545 commented that the rezoning of A/F District rezoned 13,000 acres into agricultural district that currently contains 3 active farmers, 6 or 7 part time farmers and 300 single family homes.

The Planning Commission proposed top priorities for 2011 are:

- Sign Ordinance
- Junk Car Ordinance
- Comprehensive Plan
- Attract new business to Chocolay Township
- Playground in Harvey
- Underground utilities along U S 41 S.
- DDA in Chocolay Township

- Recreational sub-committee
- Look into creating an additional AF zoning district that has a 5 acre minimum

Comments from Township Board and Planning Commission:

- Farming area should stay at 20 acres or larger.
- Industrial and commercial zoning districts are needed in the Township.
- DDA district would have to be initiated by the business community
- We need an area designated as transitional for commercial and industrial.
- The market should decide on when and where additional commercial and industrial zoning should be.
- Zoning should be flexible enough to allow for adding commercial and industrial when the need arises in the future.
- The Comprehensive plan would be a good place to indicate locations for future commercial and industrial development.
- The Board is not interested in setting up a Township Industrial Park area; that should be driven by the market.
- The Township should notify the residents through larger display ads and larger mailing areas when we change zoning.

Tabor moved, Carlson second to accept the Planning Commission 2011 priorities with the Sign Ordinance, Comprehensive Plan, transitional commercial zoning and a playground in Harvey as top priorities.

AYES: 6

NAYS: 0

MOTION CARRIED.

SIGN ORDINANCE.

Considerations when writing the Sign Ordinance:

- The Holiday sign is set at a lighting change every 20 seconds. That seems an appropriate amount of time and is not distracting to drivers.
- Changeable LED lighting is appropriate on signs; scrolling text/flashing on signs is too distracting.
- We need to think about multiple businesses in the Township with lighted signs possibly being a hazard to driving.
- The Planning Commission should get input from sign companies while writing the Sign Ordinance.
- We need to consider camp signs on M-28 and Lakewood Lane when writing the Sign Ordinance.

PUBLIC COMMENT.

Trustee Maki is concerned with absences of Planning Commission and Zoning Board of Appeals members.

Supervisor Seppanen thanked the Planning Commission for all the work they do for the Township.

Supervisor Seppanen adjourned the meeting at 9:15 pm.

Arlene E. Hill, CMC
Clerk

Mary L. Sanders, CMC
Deputy Clerk

**Charter Township of Chocoday
Planning Commission Minutes**

Monday, February 15, 2011

I. Meeting called to Order at 7:30 P.M. / Roll Call

Members present: Kendell Milton (Chairperson), Andy Smith (Vice chairperson), Andy Sikkema, Eric Meister, Tom Mahaney, Dr. Ken Tabor, and Mrs. Estelle DeVooght

Members Absent: None

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval January 10, 2011 and February 7, 2011,

Mr. Milton asked that page 5 of the Minutes be amended. There were only 4 Ayes votes and he has to abstain. Mrs. Thum stated that she corrected that part.

Mrs. DeVooght moved, Mr. Milton seconded to approve the Minutes as written

Ayes: 7 Nays: 0 Motion Carried

I. Additional Agenda Items / Approval of Agenda

Mr. Sikkema moved, Mr. Milton seconded to approve the agenda with the added change.

Ayes: 7 Nays: 0 Motion Carried

III. PUBLIC HEARINGS

A. None

IV. PUBLIC COMMENT

Mr. Darrell Adair, 141 Terrace Street, stated that he received a letter from the Township concerning the proposed use by Z and P properties. He stated that he is not for the project, because of the concern with the increase in traffic the multi-family site could cause because it's nearby a day care center. He also stated that the site is large and the applicant will probably want to expand. He was concerned with the possibility of traffic and the expansion of additional multi-family buildings.

Steve Zarkowski, 1982 Orchard Street, Marquette, MI

Showed the plan of the building will remain one story and will be barrier free, but no government money, so he cannot discriminate against anyone, but being barrier free should determine who goes into the apartment. In the future, he may want to build an additional building that would be a 5-plex apartment. With the commercial across the street his lot will be a transition lot from the commercial to the residential. He is to present the proposal for the final site plan approval.

Mr. Milton asked for any additional public comment. Hearing none he moved to Old Business.

VIII. OLD BUSINESS

A. Rezoning #145

Mr. Milton stated that the proposed use will improve the overall Township's tax base as the building will go back on the tax roll, so it will be a benefit to the community. He then asked for any other Board comments.

Mr. Tabor stated that it looks like a good idea.

Mr. Sikkema discussed the parcel size and that the applicant has stated that he would like to develop more apartment buildings on the site. That is something that the

Planning Commission needs to consider, especially when you look at what the residents' concerns have been with the proposed plan. The residents, who took the time to come to a Planning Commission meeting, stated that there were concerned about the possibility of a future building.

There was further discussion on if an additional building would change the overall character of the R-2 neighborhood.

Mr. Sikkema discussed the numbers in detail, under the R-2 District, 7 units would be permitted, so the applicant could potentially have two more units. We need to address this and figure out what number we would expect to see on the lot.

Mr. Mahaney stated that he likes what is on the plan and that is what we are approving tonight.

Mr. Sikkema – we need to have a discussion so that we are fair and let him know what we will expect. So we need to pick out some number that is fair for both the applicant and the neighbor.

There was open discussion about the zoning ordinance and the current layout of the lot and the future layout of the lot if another building is proposed. The commissioners discussed if they can discuss if they should have discussion with the applicant on the future development and how many additional apartment units they would approve.

Bob Camsney, Engineer for Z & P properties, stated that you are looking at one building, but any additional change will have to go through the process again, so it's hard to say what number we will expect.

Dr. Tabor- stated that we are approving what is in front of us. We cannot really set number. Tabor does not see the practically to a point, nice to look in the future, but things could change.

There was further discussion on what to expect in the future. The rest of the members felt that they are approving what is in front of them.

Mrs. Thum asked the applicant, Mr. Zarkowski, about the expected traffic impact, as it was not noted on the site plan.

Mr. Zarkowski stated that its hard to figure out what the traffic impact would be. Should not see more traffic.

Dr. Tabor, moved Mr. Meister seconded, that following the review of Rezoning Request #145, and the Staff/File Review, and holding a public hearing on January 10, 2011, the Planning Commission recommends Final Approval and will forward Rezoning #145 to the Chocolay Township Board for their review. The applicant shall prepare the drawings for the Township Board with the recommended changes from the Planning Commission. The following are conditions of approval:

1. The rezoning is consistent with the Township Comprehensive Plan; and
2. The rezoning will allow the redevelopment of a current vacant building and put the building back on the Township tax roll ; and
3. That the applicant is required to obtain all necessary State and Local permits prior to opening of the development; and
4. If the proposed development does not make it, then the building and lot shall revert back to the original zoning district of R-2 (High density residential).; and
5. The applicant shall complete a Zoning Compliance Permit and pay the necessary fee; and
6. The applicant shall contact the Department of Public Works before utilizing the sewers.

Mr. Milton asked if there was any discussion.

Mr. Sikkema stated that he just cannot support this proposed development. It's still too

wide open and by not knowing what the future development looks like, it's not fair to the development or neighborhood.

Not against this type of development, but just cannot support this.

Ayes: 6 Nays: 1 (Sikkema)

VIII. OLD BUSINESS

B. Proposed Sign Ordinance:

Staff asked about the bill board near the Varvil Center and the snowmobile signs. There was discussion on billboard and billboard permits.

There was discussion about the electronic message signs and the results of the joint planning commission sign.

The Commissioners discussed the joint meeting and the Township Board input and about their idea to send it to the local sign companies.

There was discussion on the residential signs and what would be permitted as far as camp signs in the WFR district and the AF District. The Commission also discussed the definition of "camp" and how we could regulate residential signs and certain areas.

There was further discussion on the sign ordinance, and the types of banners that will be permitted, the sandwich board signs, and the size of signs that would be permitted in the AF District.

The Commissioners felt that more square footage should be permitted for banners, but they did like the 20% limit. The Commissioners felt that 100 square foot would be sufficient, with the 20% rule.

Mr. Sikkema moved and Dr. Tabor seconded to table approving the sign ordinance until the local sign companies can read the document over.

Ayes: 7 Nays: 0 All in favor.
No discussion.

IX. PUBLIC COMMENT

Jennifer introduced Mr. Anthony Gerzetch, an intern from NMU, that will be working with her to assist with the Township Planning and Zoning Projects.

X. COMMISSIONER'S COMMENT

XI. DIRECTOR'S REPORT

Public Notices

A. Dick Arnold stated that it's not too much to ask the Township to place the public notices as block ads. Talked about the zoning ordinance change. We should do more notices.

Mr. Mahaney mentioned that we could try running off some copies of the proposed ordinance changes and leave them in front of Ace, and if they are in the newspaper, they should be located in the main section not the legal section.

B. Zoning Amendments

Amendments 1.6, talk to Mike Summers about the proposed ordinance. If we can use portion of his amendment or if we have to take our own and start over.

Staff will put together a tentative calendar of zoning text amendments, and proposed work schedule.

XII. ADJOURNMENT

Mr. Milton adjourned the meeting at 9:00pm.

Charter Township of Chocolay Planning Commission Minutes

Monday, March 7 2011

I. Meeting called to Order at 7:30 P.M. / Roll Call

Members present: Kendell Milton (Chairperson), Andy Smith (Vice chairperson), Andy Sikkema, Eric Meister, Dr. Ken Tabor, and Mrs. Estelle DeVooght

Members Absent: Tom Mahaney

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval February 7, 2011 and February 15, 2011 Minutes

Mrs. DeVooght moved and Dr. Tabor seconded to approve the Minutes as written.

Ayes: 6 Nays: 0 Motion Carried

III. Additional Agenda Items / Approval of Agenda

Dr. Tabor moved, and Mrs. DeVooght seconded to approve the agenda with the added change.

Ayes: 6 Nays: 0 Motion Carried

IV. PUBLIC HEARINGS

- A. Proposed Text Amendment #34-10-18
- B. Proposed Text Amendment #34-10-19
- C. Proposed Bicycle and Snowmobile Ordinance #57

Don Britton – 121 Deerview Trail

Spoke about proposed ordinance #57. He stated that he is an avid snowmobiler, and is the Vice Chair for Iron Ore Heritage Trail. Mr. Britton stated the he supports the Township allowing snowmobiles to use the M-28 and US41s trails and for two-way traffic along M-28 and one-way traffic along US 41S. Mr. Briton also indicated that the MDOT and DNR funds were used for the trail and bridge. The grant money that was used does not allow motor traffic, but it does allow local government to authorize sleds to use the trail, then they can operate the trail with snowmobiles, will not allow ATV's.

Mark Maki - 370 Karen Road

Spoke about proposed text amendment #34-10-19

Mr. Maki discussed his previous amendments and that he did not receive notification for some of them and that is why he is proposing text amendment #34-10-19. Mr. Maki stated that he would like to use the old administrative procedures language that was used in the 1977 Township's Zoning Ordinance. (Mark approached the table to look at one of the PC packets to show the old administrative procedures and law).

Mr. Maki stated that he just received a copy of what Ms. Thum is now proposing and read the sentence where it referenced that the applicant for any proposed text amendments shall be notified. He stated that the wording looks ok at this point and that he could work with Ms. Thum on the wording that should be used.

V. PUBLIC COMMENT

Mark Maki – 370 Karen Road

Mr. Maki discussed the minutes from the joint meeting and that he was not in favor of changing the sign ordinance. He believes that the flashing signs could be a hazard for drivers who are passing the signs along US 41S. Mr. Maki also commented about his own experience driving by the Holiday Gas Station sign.

VI. PRESENTATIONS

A. None

VII. NEW BUSINESS

A. Proposed Text Amendment #34-10-18

The commission discussed the 2ft adjustment within the setback and the requirement of site plan review. It was stated that if you stay out of the setback then you are fine, but if the grade change is located in the setback area then you have to come before the Planning Commission.

Mr. Meister moved, and Mr. Sikkema seconded, to approve Proposed Text Amendment 34-10-18, to amend Section 2: Definition- Height to read as follows, the vertical distance measured from the average grade to the highest point of the roof. (Accessory structures are to the midpoint of the roof) and to amend Section 6.1 General Provision – footnote #6 to read as follows, no detached accessory building shall exceed sixteen feet and six inches (16’6”) in average BUILDING height as determined by the Zoning Administrator nor exceed the exterior perimeter dimensions of the principal structure on the lot. Any grade adjustment within the setback of any district and/or any grade adjustments over 2t would require site plan review, with the following formula:

R-1 District - Side and rear yard setbacks for accessory structures must be increased two (2) feet for every foot over fifteen (15) feet.

R-2 District - Side and rear yard setbacks for accessory structures must be increased three (3) feet for every foot over fifteen (15) feet (34-09-17)

The Planning Commission recommends that this proposed amendment be approved by the Chocloy Township Board. The Planning Director shall forward this amendment to the County Planning Commission for their recommendation then send it to the Township Board.

Ayes: 6 Nays: 0 All in Favor

B. Proposed Text Amendment #34-10-19

The Planning Commission discussed the current language and the Michigan Zoning Enabling Act. Mrs. Thum went over the new law and that it does not state that the applicant should be notified. She clarified that she has brought forward new suggested language that the Commission should consider adding under Letter B in Section 1.6. Mrs. Thum also stated that the requirement to send the date of the schedule public hearing to the applicant is part of a checklist that staff does follow. However, it might not be a bad idea to include it in our Township Zoning Ordinance.

Mr. Sikkema moved and Dr. Tabor seconded to table proposed text amendment #34-10-19 until our next meeting. Also to direct staff to review ordinance in the surrounding areas that deal with notification of the applicant for various zoning changes.

Ayes: 6 Nays: 0 All in Favor

C. Proposed Bicycle and Snowmobile Ordinance #57

Mrs. Thum explained why the ordinance is needed and that we had a resident voice their concern about the decibels that the snowmobiles produce. It was pointed out that it's not the manufacture mufflers, it's the modifications that people do to their machines.

The dates of the snowmobile trail were discussed and it was stated that ordinance should include the actual dates and not just say that when the trail is covered with snow. Then the snowmobilers know when they can utilize the trail. If the signs are up for motorized users, the dates have to be up and shown then they can operate on top of the trail.

There was conversation about bicycles and snowmobile using the trail and it was stated that under most circumstance they won't be sharing the trail.

The Planning Commission discussed the decibels of snowmobiles compared to logging trucks on the highway. The snowmobile act states that the limit is 78 decibels at 50 feet.

Mr. Andy Smith that there is the potential for him to groom the trail so he will excuse himself from voting on the proposed ordinance. The Planning Commission also discussed two-way traffic along M-18 and US 41S.

Dr. Tabor moved, and Mr. Milton seconded to approve the proposed Bicycle and Snowmobile Ordinance #57 with the change to Section 3 to specify the dates that the trail may be used by snowmobiles and recommend that the Chocoday Township Board concur with the Planning Commission and approve the proposed ordinance #57. The Planning Director shall forward the proposed ordinance and any comments received by the Township residents for or against the proposed ordinance to the Marquette County Planning Commission for their review.

Ayes: 5 Nays: 0 (Mr. Smith abstained)

D. Township Noise Ordinance

Mrs. Thum stated that it was suggested by Dr. Scott Emerson to look at a Township wide noise ordinance and to deal with the snowmobiles. Mr. Sikkema discussed that the state does set limits for the decibel levels for vehicles traveling on the roads and some vehicles do exceed the limit, but it's hard to enforce. There was further discussion about the snowmobile testing that has been going on by law enforcement and that it's a long procedure and the problem is the aftermarket additions to the sleds. The commissions felt at this time the current ordinance is in place and is effective so no changes were recommended.

E. Home Occupations

The Planning Commission discussed the current ordinance in relationship to the Michigan Medical Marijuana Act.

F. Schedule for Zoning Amendment

The Planning Commission looked over the schedule for the next four months as to what proposed text amendment will be brought forward and no changes were recommended. The proposed schedule is:

- April 11, 2011**
- 34-10-19 (section 1.6)
- 34-10-13 (acreage requirement for livestock)
- 34-10-14 (Revising definition for agriculture)

May 2, 2011

34-10-10 (roads)

34-10-15 (wireless)

June 6, 2011

34-10-11 (PUD's)

VIII. OLD BUSINESS

A. None

IX. PUBLIC COMMENT

A. None

X. COMMISSIONER'S COMMENT

The commissioners discussed the Holiday Gas station entrance. Mr. Sikkema talked about the reconstruction of US 41S for 2012. There was also discussion about adding something to Section 1.6 that all owners that would be affected by a zoning map change shall be notified. For example if the AF2 is created the effected properties will be notified by mail.

XI. DIRECTOR'S REPORT

A. None

Dr. Tabor made the motion to adjourn the meeting at 8:50pm, all were in favor.

Charter Township of Chocoday Planning Commission Minutes

Monday, April 11, 2011

I. Meeting called to Order at 7:30 P.M. / Roll Call

Members present: Kendell Milton (Chairperson), Andy Smith (Vice chairperson), Andy Sikkema, Eric Meister, Tom Mahaney, Dr. Ken Tabor, and Mrs. Estelle DeVooght

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval of March 7, 2011 Minutes

Mr. Milton moved and Mrs. Devooght seconded to approve the Minutes with the suggested changes from Mr. Milton written.

Ayes: 7 Nays: 0 Motion Carried

III. Additional Agenda Items / Approval of Agenda

Dr. Tabor moved, and Mrs. DeVooght seconded to approve the agenda with the added change.

Ayes: 7 Nays: 0 Motion Carried

IV. Public Hearings

A. None

V. Public Comment

A. None

VI. Presentations

A. None

VII. New Business

A. Silver Creek Recreation Property

The Township has discussed at the staff level about purchasing a lot on Silver Creek Rd that would make ingress and egress easier for our residents to utilize our SCRA. The lot would also allow the Township to straighten out the driveway and make it easier for the park users to park their vehicles. Ms. Thum went over the assessed value and the history of that lot. Also, there was some concern if a new home would be able to be built and meet the current setback for that zoning district. Mr. Johnson, the DPW Foreman talked about the benefits to the users of the park and to the Township.

Dr. Tabor moved, and Mr. Smith seconded to have Township staff explore the possibility of utilizing the neighboring property that we already own to straighten out the driveway. Then also to explore how much the home owner would sell the property for.

Ayes: 5 Nays: 2 (Sikkema, DeVooght)

Motion Carried

B. Township Marina

Ms. Thum talked about how staff came across this grant opportunity and thought it would be a great idea for the residents in the Harvey area. Ms. Thum went over the details and that the Board granted permission to start the writing and to submit the grant, as they can always turn it down.

Mr. Sikkema stated that this park of the larger scale tend to attract more people and wondered what the size of the proposed park will be.

Mr. Mahaney questioned what type of equipment would be at the park? Ms Thum stated they are looking at a large play structure, slide and some swings. In the future we hope to relocate the current pavilion that is at the Township Hall property to this site as well.

Mr. Meister stated that if you look at the parks that are in the City of Marquette, they are close to water and hardly any of them are surrounded by a fence.

Dr. Tabor moved, and Mr. Meister seconded to hold a public hearing at our May 2, 2011 Planning Commission meeting to hear the residents' concerns and suggestion on the proposed park at the Township Marina.

Ayes: 7 Nays: 0 Motion Carried

C. Planning Commission Ordinance

The commissioners discussed the proposed ordinance, one error was noted by Mr. Sikkema. Ms. Thum explained that this ordinance does not have to go to the County Planning Commission, she just wanted the PC to review.

VIII. OLD BUSINESS

A. Proposed Text Amendment #34-10-19

Ms. Thum discussed that this proposed text amendment was raised by Mr. Mark Maki and it's to change section 1.6: Administrative Standards and the wording regarding public hearing notices. The Commissioners like the newly suggested language, Mr. Smith wanted one changed. He suggested that no matter how many property owners would be affected, the individual owners should be notified if their zoning district is going to change. The proposed change was to (B) #10, which stated, "If there is a proposed zoning map change the owner(s) will be given written notice at least 15 days prior to the public hearing. The notice shall explain their current zoning district and the proposed zoning district. This shall be done regardless of the number of parcels that would be potentially affected."

Mr. Meister moved and Dr. Tabor seconded that we accept proposed text amendment #34-10-19 and recommend that the Marquette County Planning Commission approve the text amendment.

Ayes: 7 Nays: 0 Motion Carried.

B. Sign Ordinance

There was discussion on the electric licensing, and whether the Township should enforce it. Mr. Milton suggested that some language stating that electrical permits are required and must be pulled from the County Building Codes should be included on the sign application.

The commissioners looked through the ordinance and the suggested changes from Cook Sign and made the following changes to the proposed sign ordinance.

1. Change page 7, Page 5. To read - other sign configurations can be submitted and approved by the Township Zoning Administrator. Each individual signs shall be compatible in size, in relationship to width and height.
2. Strike #5 from Section 18.5, on page 8
3. Add to Section 18.5, #6, the word County after Marquette and before Building.
4. Add to Section 18.5, #9, the sign only has to be removed at grade if such sign is not located in the right-of-way.
5. Add to Section 18.7 Letter F, increase the square footage of the menu board to 40 square feet.
6. Modify Section 19.0 #2E, to read that sandwich board signs shall not be located in the right-of-way.

Dr. Tabor moved and Mr. Milton seconded to approve the proposed sign ordinance, with the suggested changes listed about and to recommend approval and send it to the Marquette County Planning Commission for their approval.

Ayes: 7 Nays: 0 Motion carried

C. Proposed Text Amendment #34-10-13

This is a proposed amendment that was brought up by the Planning Commission in 2010 to explore the possibility of placing acreage requirements on livestock in the Agricultural/Forestry District, (AF). The commissioners felt that if you are living in the AF District, regardless of the acres you should be permitted to have chickens and other livestock. It's not the Planning Commission job to regulate animal safety. Ms. Thum thought we should look into modifying the definition of kennels.

Mr. Mahoney moved and Mr. Meister seconded to rescind proposed text amendment #34-10-13.

Ayes: 7 Nays: 0 Motion carried

D. Proposed Text Amendment #34-10-14

Mr. Sikkema moved and Mr. Mahaney to table proposed text amendment #34-10-14.

Ayes: 6 Nays: 1 (DeVooght)

VIII. PUBLIC COMMENT

- A. None

IX. COMMISSIONER'S COMMENT

- A. Mr. Sikkema discussed the construction project that will occur on US-41S during 2012.

X. DIRECTOR'S REPORT

- A. Ms. Thum informed the Commission of the correspondence from Trustee Maki.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Planning and Zoning News, February 2011
A. Fax from Mark Maki, April 4, 2011
B. Information from MSU Extension about Census

XII. ADJOURNMENT

Mr. Milton adjourned the meeting at 9:15pm

**Charter Township of Chocolay
Planning Commission Minutes
Monday, May 2, 2011**

I. Meeting called to Order at 7:30 P.M. / Roll Call

Members present: Kendell Milton (Chairperson), Andy Smith (Vice chairperson), Andy Sikkema, Eric Meister, Tom Mahaney, and Mrs. Estelle DeVooght

Absent: Dr. Ken Tabor

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval of April 11, 2011 Minutes

Mrs. DeVooght moved and Mr. Milton second to approve the Minutes with the suggested changes from Mr. Sikkema concerning the vote on the Township Property and his comment about the size of parks.

Ayes: 6 Nays: 0 Motion Carried

III. Additional Agenda Items / Approval of Agenda

Mr. Milton stated that there was an additional item presented, which was to reappoint two Planning Commission members, Mr. Milton and Mrs. DeVooght. Mrs. DeVooght has not made up her mind yet.

Mr. Milton moved, and Mr. Sikkema second to approve the agenda with the additional change.

Ayes: 6 Nays: 0 Motion Carried

IV. Public Hearings

A. Township Marina, proposed playground

Public Comment

Mr. Pete LaRoo wanted to state that as a long time volunteer for Chocolay Township, there have been a lot of upgrades with regards to bicycle paths and tunnels, but we have neglected the little kids. The Lion's Club is willing to help out with the proposed park. He has visited the site and he thinks that the east side of the marina would work out well for the kids. A lot of our residents and their kids go to Marquette to utilize the playgrounds. However, the park should be in small scale.

Ms. Deb England, 1431 M-28E, she stated that she is the youth director at the Silver Creek Church and runs the Block Party that the Church has put on the past three years. Agrees that we need a park for little kids, she does use the marina and believes that it's a great place as it's off the highway.

Ms. Dorothy Kahler, 121 W Main Street, thinks that a park for little kids is a great idea, but the marina is a bad idea. That location is for boaters and it has been established as a Hiawatha Spot and basically it has been established as an adult place and they won't want little kids at that site.

Mr. Don Harris – objection to the Marijuana place that is in Chocolay Township. Not sure how the permit was issued when the gentleman asks for set donations.

Mr. Forrest Libby, 136 W. Main Street, not in favor of the playground at the Township Marina site due to the number of fisherman. He does know that young adults and children need recreation and is ok with a slide and some picnic tables. He has had individuals park their vehicles on his property.

Mr. Denny Magadanz, 158 Main Street, also recognizes that kids need a place to play in that neighborhood, but there are people that park on their lawn. Another place would be the Lion's field for the kids would give them a playground on that side.

Public Comment was closed.

VII. New Business

A. Planning Commission Reappointments (added at meeting)

Mr. Milton asked if Mrs. DeVooght has made her decision yet, and she stated that she has not decided.

Mr. Sikkema moved and Mr. Meister second to recommend to the Township Supervisor to reappoint Mr. Milton to the Planning Commission.

Ayes: 5 Nays: 0 Abstained: 1 (Milton)

VIII. OLD BUSINESS

A. Township Marina

Mrs. Thum went over the grant project and that it was indented for a neighborhood park, and the Harvey area does meet the criteria. The applicant does require an exact location, as an address needs to be typed in.

The Commission asked if the Silver Creek Recreation Area could be utilized for the playground equipment as there appears to be less of an issue with parking and traffic. Also it was pointed out that there siblings of the children that are participating in a baseball or soccer game would be able to utilize the equipment.

The Commission asked question about what equipment would be used (slide, swings, etc.) staff stated that there would be a slide, swings and playground unit with a climbing wall. The total amount would be about \$25,000. There is room for playground equipment, but it was intended to be a walk to park and not for people to drive too.

Mr. Mahoney discussed that the City of Marquette has several parks that are near water and roadways. It's more the parent's responsibility to watch their children. There could be a problem with the parking at the marina and that is a concern. That is the big issue. The location is good because it's in a neighborhood.

Mr. Milton stated that we should pursue the grant as the consensus is more for it than not.

Mr. Milton moved and, Mr. Smith second, to pursue grant through Lowes and the Planning Commission would like to have the playground located at Silver Creek Recreation because more of the funds could be spent on the equipment, with the Township Marina as a back up space if Lowe's does not feel that the SCRA would be a suitable location.

Ayes: 4 Nays: 2 (DeVooght, Sikkema) Motion passed

B. Proposed Text Amendment #34-10-14

Mr. Sikkema read the current definition of agriculture. There was further discussion on businesses that are currently active in the AF District and that there is nothing that states that they are not permitted. Mr. Sikkema stated that he does not see anything wrong with the current definition, Mrs. DeVooght and Mr. Meister agreed. Mr. Milton stated that the Right to Farm Act should cover the rest.

There was discussion on what types of farms would be considered commercial and what would be permitted.

Mr. Sikkema moved and Mrs. DeVooght second to rescind proposed text amendment #34-10-14

Ayes: 6 Nays: 0 Motion approved

C. Proposed Text Amendment #34-10-15

Mrs. Thum went over the history of this proposed amendment and stated that there is part of the current zoning ordinance that states that wireless towers are permitted in the Agricultural/Forestry (AF) District. There was discussion about the current language in the ordinance and if there should be a lot size requirement. There is current language in the ordinance that states that towers in the AF District can only be 75 feet. It was the consensus of the Commission to do more research and to see what other communities have as far as regulating wireless towers in their communities.

Mr. Meister would like Wireless Towers to be a conditional use that way the neighboring parcels would have input on the proposed tower. There was a question about what would be considered a tower.

There was discussion about what would happen if a home owner who wants to put a tower for the purpose of Television should be required to obtain a permit.

Overall the Commission felt that towers should be a conditional use in the AF District. Looking at acreage requirement should also be part of the research.

Mr. Sikkema moved and Mr. Meister second to table proposed text amendment #34-10-15 to allow staff more time to research neighboring communities' ordinances on wireless towers.

Ayes: 6 Nays: 0 Motion carried

VI. Presentations

Mr. Tony Harry, ORV's

Mr. Harry lives at 6369 US 41S and has been a resident of Chocolay Township for 26 years and asked to be on the agenda to discuss ORV's in Chocolay Township. He stated that in 2008, Marquette County passed an ordinance to permit ORV's to drive in the shoulder of County Roads, but shoulder of roads, but Chocolay Township opted out. He stated that he would like to see them allowed on the rural roads such as, Little Lake Road, CO 480, West Branch Road, Magnum Rd, Kawbawgam Road, Greenfield Road, N and S. Big Creek Roads and Green Garden Road.

Police Chief Zyburt spoke and stated that Chocolay Township is considered a bedroom community and roads are not maintained for ORV's. The department gets about 30 to 50 calls a year, and the individuals are calling about ORV's tearing up their property, and their speeds. If the Planning Commission does decide to move ahead with this, he would like the Planning Commission to spell out the roads they would like to see and then get the public comments about those roads to see if they would be for or against them.

Mr. Milton asked the Commission if at this point they should entertain the idea of opening up the roads to ORV's. Mr. Engle stated that when you opt in all the roads will be open to ORV's, but we could specify which ones and then signage is going to be another factor of this as well.

Mr. Milton stated that we could add this to our Master and Recreation Plans.

There was further conversation about how education is the key in this process and that there will be people that would like to see the Township allow ORV's on certain roads and those that don't want them anywhere.

Mr. Sikkema asked the Commission, "How far do you allow someone to ride to get to a trail, 5 or 10 miles?"

The Commission discussed what the first step should be; develop a map, and establish criteria to choose the roads, or form a sub-committee? Staff will use a computer program to generate a random sample from the following roads and work with the Police Department to find people who would be interested in serving on the committee and there are for or against them. The roads that people for the sub- committee would be chosen from are: Timber Lane, Lakewood Lane, Magnum Road, Green Garden Road, Greenfield Road, Silver Creek Road, Ortman Road, Cherry Creek Road, Kawbawgam Road, West Branch Road, and County Road 480.

The PC liaisons will be Mr. Kendell Milton and Mr. Andy Smith who will be the chairperson.

VII. New Business

A. Planning Commission By-laws

The Planning Commission looked at the By-laws and discussed if they should go up to nine members or stay at seven members.

Mr. Sikkema moved, and Dr. Tabor seconded to keep the Planning Commission members at seven and not amend their By-laws.

Ayes: 7 Nays: 0 Motion passed

B. Election of Officers

Chairperson

Mr. Smith moved, and Dr. Tabor seconded, to appoint Mr. Milton as Chairperson.

Vice Chairperson

Mr. Milton moved, and Mr. Meister seconded, to appoint Mr. Smith as Vice Chairperson.

Secretary

Mr. Milton moved, and Mr. Meister seconded, to appoint Mr. Sikkema as Secretary.

Vice Secretary

Mr. Milton moved, and Mr. Smith seconded, to appoint Mr. Meister as Vice Secretary.

Ayes: 7 Nays: 0 Motion Passed

C. 2010 Corridor Access Management Plan Update

Mrs. Thum explained that at the Planning Commission August 2010 meeting they went over the 2004 Corridor Access Management Plan and the suggested improvement that could be made along US 41S and the items that were accomplished since that time.

Mr. Sikkema then went over the upcoming 2012 project and that it now includes resurfacing of US 41S from the Welcome Center to the M-28/US 41S intersection and as part of that construction work MDOT will be trying to work with the business owners to close some driveways that are either underutilized or problem areas. Currently, they are working with Ace Hardware to close one driveway. It was also discussed that installing a service road between the Vet Clinic and Ace would not work because they are two different uses.

VIII. OLD BUSINESS

A. Proposed Text Amendment #34-10-15 (Section 4.7: Wireless Communication Facilities)

Mrs. Thum discussed why this amendment is before the Planning Commission and stated that we could also look at changing parts of this Section in the Ordinance. As requested, she was able to get information concerning wireless towers from Marquette and Negaunee Townships.

There was discussion on why the current ordinance only permits towers in the AF District that are 75 feet.

The Commission went over the ordinances and picked a couple of items from both of them that they liked and felt that would be appropriate in our ordinance. They felt that we could put a text amendment together that would include some language similar to Marquette and Negaunee Township's ordinance. It was stated that this section of the ordinance should not be more restrictive than any part of the ordinance.

The Commissioners will mark up the ordinances and give them back to Mrs. Thum before next month's meeting. Mrs. Thum will then prepare a text amendment for next month.

B. Proposed Text Amendment #34-10-10 (Section 6.7: Road Frontage Requirement)

Mrs. Thum stated this proposed text amendment was proposed by Mr. Maki and that he was unable to make the meeting tonight. This amendment was postponed at our August 2010 meeting. At that time Mrs. Thum was directed to speak to the fire department about any concerns that they had regarding private roads. Mrs. Thum stated that the biggest concerns that they had at this time was addressing of the homes and used Pine Cone Trail as an example.

Mr. Sikkema suggested that the ordinance be clear as to what option people have when developing private roads and that its essentially site condominium projects. For example, an individual that wants to build a subdivision can sub-divide, have a common driveway (servicing 4 homes) or develop a site condo project. Then the Township does not really allow private roads, but we give developers a couple of options. The site condo would deal with the maintenance, signage and how the road should be constructed.

There was further discussion on the width and length of roads and other private roads in our Township.

Mr. Sikkema moved, and Dr. Tabor seconded, to table proposed #34-10-10 text amendment to allow staff time to look at the impacts of site condos on private roads and compare neighboring communities.

C. Silver Creek Recreation Area Driveway

Mr. Smith talked about how he went to the site with Mr. Brad Johnson and there was a difference in going out there and comparing that to the aerial photo. Mr. Smith stated that it makes sense to pursue purchasing this lot and went over the current driveway and entrance and the safety concerns that were there. Mr. Smith went over what you could do with the area if the Township was able to purchase the lot from the current owner.

Staff will continue to move forward with the project and Dr. Ken Tabor will bring it up at the next Township Board meeting.

IX. PUBLIC COMMENT

A. None

X. COMMISSIONER'S COMMENT

Mr. Mahaney spoke about the pedestrian/bicycle tunnel and the potential damage when you are coming through the tunnel and heading towards Fairbanks Road. There could be riders coming down the ramp and people leaving the tunnel that don't see each other. Mr. Mahaney would like this to be looked into.

Mr. Milton stated that he was asked by the Zoning Board of Appeals to bring up the fact that maybe the Planning Commission should look at amending the section about not allowing detached accessory structures to be larger than the home, in the AF District only though. Staff will check into this and see if some language could be written up.

Mr. Smith discussed the meeting time and date. After some discussion, it was decided to keep the same day of the week, Monday. The time could be discussed in November of this year when the calendar gets created.

XI. DIRECTOR'S REPORT

Mrs. Thum asked for the members to come see Deputy Clerk Mary Sanders to get sworn in.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

A. Planning and Zoning News, April 2011

XII. ADJOURNMENT

Dr. Tabor moved, and Mr. Milton seconded, to adjourn the meeting at 9:30pm.

Ayes: 7 Nays: 0

A. Burn Barrel

Mrs. Thum explained why the Planning Commission was asked to review the burn barrel issue and read a letter from a Township resident. The letter was presented to the Township Board at their June 20, 2011 meeting. The Township Board requested that the Planning Commission look into having a burn barrel ordinance. Mrs. Thum stated that Negaunee and Marquette

Townships have ordinances on burn barrels. The Planning Commission discussed in length potential setbacks for the barrels in the higher density subdivisions and the types of items that should be prohibited from burning. The overall consensus of the Commission is they did not want to outright ban burn barrels, but felt some restrictions were needed for the smaller lots. The Commission felt that people should still be allowed to burn logs and brush.

The Commission discussed burn barrels in length and stated that, they can be a nuisance and some type of setback from neighboring homes needs to be established. The Commission discussed reasonable setback distance and types of items that should be prohibited from burning. After discussion it was decided that there should be a 150 foot setback from any residential structure. The following items should be prohibited:

- I. Non-wood construction material, including but not limited to fiberglass, shingles and tar.
- II. Hazardous Substances including but not limited to batteries, household chemicals, pesticides, used oil, gasoline, paints, varnishes, and solvents.
- III. Tires
- IV. Any plastic materials including but not limited to nylon, PVC, ABA, polystyrene or urethane foam, and synthetic fabrics and plastic containers.
- V. Treated or painted wood including but not limited to plywood, composite wood products or other wood products that are painted, varnished or treated with preservatives.

Mr. Sikkema moved, and Mr. Milton seconded, to direct staff to develop proposed language to regulate burn barrels with a setback of 150 feet, prohibiting the items listed above, language stating that the fire shall be monitored at all times, and a description that the burn barrel shall have 3.4 inch openings on the sides. Also a permit shall not be required. Staff is to bring this back for the August 1, 2011 meeting.

Ayes: 6 Nays: 0 Motion passed

B. Potential Snowmobile Routes

Mrs. Thum explained that the Township Board adopted Ordinance #57, Bicycle and Snowmobile Ordinance that states that snowmobiles are allowed to utilize the paved bike paths in our Township, but the Township Board has to approve which paths. At this point the Commission can request which portions of the bike path they would like to see snowmobiles be allowed, and this includes US 41S. The Commission discussed in the length the safety concerns with regards to the right-of-way and the grooming aspect of the trails. Mr. Sikkema stated that

the Township has been asked on several occasions to look into that portion of the trail and if it would be MDOT guidelines for a snowmobile trail with the flow of traffic.

Mr. Meister moved, and Mr. Engle seconded, to recommend to the Township Board to authorize snowmobiles along the bike path on M-28 and if the Township can meet the MDOT and DNR requirements allow snowmobiles on US 41S, one-way with the flow of traffic.

Ayes: 5 Nays: 0 Abstained: 1 (Sikkema)
All in Favor Motion Passed

C. Potential Agricultural/Forestry 2 (AF-2)

Mrs. Thum gave some background on this item and the Planning Commission pointed out they raised this problem up to the Township Board at their joint meeting back in February. The Commission discussed the current AF and the number of lots that are under the 20 acre requirement. There was further discussion on what types of activities such as farming would be permitted in the AF-2 District. Mrs. Thum explained that the old RR-2 permitted animals as a right and there were certain acreage requirements for intense farming activities. The Commission felt that this needed to be addressed.

Mr. Milton moved, and Mr. Sikkema seconded, to continue this discussion next month and to develop language with potential permitted and conditional uses for the Planning Commission next meeting, August 1, 2011.

Ayes: 6 Nays: 0 Motion Passed

Mr. Sikkema commented that the map would need to be adjusted, but the boundaries can be parcel to parcel.

D. Resolution for HB 4746

Mrs. Thum explained what HB 4746 is and how it could impact local zoning regulations. Mr. Smith explained that natural resources are where Mother Nature put them and we cannot control where they are locate. There is a current problem where local governments are not allowing for local sand and/or gravel mines to expand. There was further discussion on the impact of local mines and the Township current zoning regulations. Mr. Engle explained that the Township Zoning Ordinance does allow for mining operations within reason and the applicant is required to do a site plan and go before the Township Board for review. The Commission felt that the regulations that the Township has in place is the right way to do things and communities should permit the opening and continued expansion of the mines, within reason.

Mr. Engle moved to sign the resolution to not support HB 4746. There was no second.

Motion Failed

VIII. OLD BUSINESS

A. Proposed Text Amendment #34-10-15

Mrs. Thum explained the history of this text amendment and that the language has been written to include the comments from last month's meeting. The Commission discussed the language and made some changes to the proposed amendment.

Definitions –no comment

Section 13.2 (A)

- #3 Changes were acceptable
- #15 Modify the statement about professional engineer
- #16 - Delete
- #17 Modify to state the National Tower Code

Section 13.2 (B)

- #1 Modify the height requirement

Mr. Sikkema moved, and Mr. Milton, seconded to table proposed text amendment #34-10-15 for staff to make the changes and present them at our August 1, 2011 meeting.

B. Proposed Text Amendment #34-10-10

Mrs. Thum stated that she incorporated the suggestions from last time and stated that the Michigan Condominium Act does not state that private or public roads are required. Mrs. Thum went over the Marquette and Negaunee Townships' ordinances. The Commission felt that there was not enough time left to properly discuss the proposed text amendment and would like to see it at the beginning of the agenda for next month's meeting.

Mr. Sikkema, moved, and Mr. Smith, seconded to table proposed text amendment #34-10-10 (roads) until our August 1, 2011 meeting, and to place the item at the beginning of the agenda.

C. ORV Committee (verbal update)

Mrs. Thum gave an update and stated that letters were sent to random residents asking if they wanted to be part of a sub-committee and if they did not have time to give input if they would like to see some or all the roads in Chocoley Township opened up to ORV's.

Mr. Smith asked if the information that was sent out could be part of the packets for next month. Mrs. Thum stated that she would do this.

VII. New Business

A. Home Occupations

Mrs. Thum explained that the new zoning ordinance states that all home occupations are required to go through the conditional use process, which includes paying a fee of \$250.00. Mrs. Thum went over the wide variety of home occupations that one could have and stated that the old ordinance did have discrepancy with the levels of home occupations.

The Commission discussed when a conditional use permit might be required and if having an employee would mean that it was no longer a home occupation, but a commercial operation. There was also discussion on whether a sign made the home occupation a commercial enterprise as well. The Commission felt that the addition of the commercial sign and/or advertising the business via website might be the threshold that would trigger a review by the Planning Commission. The Commission felt that language that was in the 1977 zoning ordinance seemed sufficient, but there was conversation regarding the text amendment that changed the standards and definition for home occupation.

Mr. Meister moved, and Dr. Tabor seconded, to direct staff to draft language that is similar to the old zoning ordinance, specifically to add numbers 1 -3 and modify #5.

Ayes: 5 Nays: 0 Motion passed

VIII. OLD BUSINESS

A. Proposed Text Amendment #34-10-10

Mrs. Thum stated that the information that was provided in the packets for this month was the same as last month's. Staff tried to combine some of the wording similar to what the neighboring communities have. Mrs. Thum went over the Marquette and Negaunee Townships' ordinances.

The Commission discussed what the current language is and what the proposed text amendment applicant, Trustee Maki, wanted to see. The Commission felt that by allowing up to four parcels to utilize one common driveway it allowed for less impervious surface, reduces the number of conflict points along the roadways and helps traffic move smoothly along the roads. The standards of approval are located on the private road application for the application and the Commission members to see.

Mrs. Thum stated that the fire department would like to look at how private roads are addressed and the clearance of the road and road width. Mrs. Thum stated that there is a hold harmless agreement that is in place and maybe that should be modified. Mr. Smith talked about the maintenance agreements and they can be the key to the condition of the road. Mr. Milton stated that Ishpeming allows for a driveway to serve up to four parcels as well.

Mr. Sikkema, moved, and Dr. Tabor, seconded to have staff work on the hold harmless agreement and work on the finding of fact for proposed text amendment #34-10-10 and present it at our September 12, 2011 meeting.

Ayes: 5 Nays: 0 Motion passed

B. Proposed Text Amendment #34-10-15 (wireless towers in the AF District)

Mrs. Thum stated that the language should be ready to hold a public hearing at our September meeting. The comments that were stated at last month's meeting were incorporated into the amendment.

The Commission reviewed the proposed language and found it satisfactory.

Dr. Tabor moved, and Mr. Milton seconded to approve the language as written for proposed text amendment #34-11-03 (formally #34-10-15) and to hold a public hearing at the September 12, 2011 Planning Commission meeting.

Ayes: 5 Nays: 0 Motion passed

C. Burn Barrel Proposed Text Amendment

Mrs. Thum stated that the proposed text amendment would be to modify Section 6.5 of the Township Zoning Ordinance. Mrs. Thum stated that she believed all the comments that were stated and discussed at the previous meeting were incorporated into the text amendment.

The Commissioners discussed the title and felt that it needed to be changed as it was confusing and gave the impression that the Township banned burning of brush. They also felt that a statement about open burning of brush was permitted as long as the residents followed the MDNR guidelines.

Dr. Tabor moved, and Mr. Smith seconded, to approve the language for proposed text amendment #34-11-04 with the following changes and to hold a public hearing at our September 12, 2011 meeting.

1. Change title to (C) Open and Outdoor Burning of Refuse
2. Add #3 to read, "Open burning of leaves, weeds, brush, stumps, clean wood other vegetative debris is permitted, but the burn shall comply with the requirements of the Michigan Department of Natural Resources."

Ayes: 5 Nays: 0 Motion passed

D. Agricultural/Forestry District (AF-2)

Mrs. Thum explained that the Township Board agreed with the Planning Commission that an addition rural residential district needs to be formed and would like the Planning Commission to move forward with this. The Township Board set a deadline of December of 2011 to have this proposed zoning map completed. Mrs. Thum stated at this point she would like to establish the guidelines for the proposed district, such as, setbacks, title, minimum lot size, lot width and the permitted and conditional uses. The Commissioners discussed the permitted and conditional uses along with the lot size and title of the district. Mr. Sikkema stated the new district should still allow for personal gardens, chickens and other livestock. Mr. Meister stated that commercial livestock should be kept for the larger lots. Mr. Sikkema wanted to look at the map next month and see if there are any R-1 parcels that might belong in the new rural residential district.

Mr. Dick Arnold, 312 West Branch Road, passed out a map from the Marquette County Plat book and had concerns about Sections 34 and 35. Dr. Tabor moved, and Mr. Sikkema seconded, to direct staff to complete a text amendment application and present the language in a draft format for review at our September 12, 2011 meeting.

Ayes: 5 Nays: 0 Motion passed

E. ORV Committee (verbal update)

Mrs. Thum gave an update on the Committee and asked for direction from the Planning Commission due to lack of response from the letters that were mailed out to the residents. Mr. Sikkema stated that a follow up letter should be sent. Mr. Smith stated that Mrs. Thum should maybe contact Mr. Tony Harry to see if the petition that has been circulating has gotten any responses from people, positive or negative.

IX. PUBLIC COMMENT

- A. None

X. COMMISSIONER'S COMMENT

- A. Mr. Sikkema filled the Commission in on the proposed road construction for 2012 that MDOT has scheduled.

XI. DIRECTOR'S REPORT

- A. Mrs. Thum informed the Commission about the special board meeting to review the sign ordinance. The Commission was disappointed to see another item be sent back to them.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. Chocoley Township Master Plan – Transportation chapter and the Executive Summary. (DRAFTS)

XII. ADJOURNMENT

Mr. Milton moved, to adjourn the meeting at 9:30pm.

Ayes: 5 Nays: 0 Motion passed

**Charter Township of Chocolay
Planning Commission Minutes

I. Meeting called to Order at 7:30 P.M. / Roll Call

Members present: Kendell Milton (Chairperson), Andy Smith (Vice Chairperson), Andy Sikkema, Tom Mahaney, Max Engle, Eric Meister, and Dr. Ken Tabor.

Members absent: None

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval of August 1, 2011 Minutes

Dr. Tabor moved, and Mr. Milton seconded, to approve the Minutes with the changes.

Ayes: 7 Nays: 0 Motion Carried

III. Additional Agenda Items / Approval of Agenda

Dr. Tabor moved, and Mr. Meister seconded, to approve the agenda as written.

Ayes: 7 Nays: 0 Motion Carried

IV. PUBLIC HEARINGS

A. Proposed Text Amendment #34-11-03 (Section 13: Wireless Communication Facilities)

No public comment was received on proposed text amendment #34-11-03

B. Proposed Text Amendment #34-11-04 (Section 6.5: Outdoor Wood Burning Boilers and Appliances)

Mr. Richard Kierzek, 55 Edgewood Drive stated his opposition to burn barrels and felt that the proposed language was good and the setback distance would help his situation. He also stated that he was happy to see that people could still have fire rings.

Ms. Thum read comments from Ms. Deborah Mulchaey, 633 Lakewood Lane, stated that we should look at listing the items that would be permitted to burn rather than list the items that are prohibited. Also we should define refuse as that is hard to define. Ms. Mulchaey also stated her concerns with the current language for outdoor wood boilers.

Mr. Milton closed the public hearings at 7:45pm

V. PUBLIC COMMENT

None

VI. PRESENTATIONS

A. None

VII. NEW BUSINESS

A. Discussion - Rental Properties in the Waterfront Residential Districts

Mrs. Thum commented that she has been seeing an increase in the number of rental vacation homes along the Lake Superior. Mrs. Thum went over the ordinance language. The Commissioners discussed the language and the grey areas that we currently have. The Commissioners could see where people who are not full time residents would rent out their home to help pay the taxes, but could also see the neighbor's point of view, when you have people renting the home next to you, you can lose that safety factor. In the old ordinance some of the zones were allowed to have a "resort" with a conditional use permit. In the current AF District, resorts are a conditional use.

The Planning Commission would like staff to research this issue more and look at other communities such as Autrain, Onota, Houghton and Higgins Lake.

Mr. Sikkema, moved, and Dr. Tabor seconded, to direct staff to investigate other Township's and consult with Township Attorney to come up with more information to consider in regards to rental of properties.

Ayes: 7 Nays: 0 Motion Carried

VIII. OLD BUSINESS

A. Consideration - Proposed Text Amendment #34-10-10 – Section 6.7 Road Frontage

Mrs. Thum stated that Mr. Maki dropped off some comments and concerns about the proposed text amendment and would like the Planning Commission to look it over and provide any comments they might have.

Mrs. Thum went over the changes that were made to the hold harmless agreement and the Fire Department went over the additions and felt that they were adequate.

Mrs. Thum read the current language with regards to road frontage and lots of record.

The Planning Commission looked at Trustee Maki's comments.

1. The Commission felt that 4 was an appropriate number to have a shared driveway. The Commissioners would like some additional language to the hold harmless agreement about maintenance agreement and that it shall be recorded at the County Register of Deeds. The language could be similar to what is in the Ordinance for private roads. The hold harmless agreement that was presented would address the concerns with regards to fire department access and safety. The Commissioners looked a situation where one driveway could be longer then a shared driveway.
2. The commissioners felt that we should explore a maintenance agreement with shared/common driveways that way everyone would know what the expectations are when it comes to maintenance of the driveways. Afterwards the Township could register the agreement with the County Deeds office and possible put something on our BS & A software.

Mr. Milton stated that this will probably become a problem if the new agricultural district gets approved. The Commission discussed this with regards to properties being split and the recording of easements. Staff is to research the Marquette County Road Commission standards and provide them to the PC at their October 3, 2011 meeting.

Mr. Sikkema, moved and Dr. Tabor seconded to have staff draft a text amendment that allows up to 4 parcels to use a shared driveway, add to hold harmless agreement and requires that a maintenance agreement be attached to the deed and recorded at the County Register of Deeds office to review at our October 3, 2011 meeting.

Ayes: 7 Nays: 0 Motion Carried

B. Consideration - Proposed Text Amendment #34-11-03 – Wireless Communication Facilities

Mr. Milton stated there are no real changes from last time and there have been no complaints.

Dr. Tabor, moved and Mr. Engle, seconded to approve the language as written for proposed text amendment #34-11-03 (formally #34-10-15) and to forward it to the Marquette County Planning Commission for their review and then to the Township Board for consideration.

Ayes: 7 Nays: 0 Motion Carried

C. Consideration - Proposed Text Amendment #34-11-04 – Outdoor Wood Burning Boilers and Appliances –to add language about burn barrels.

The commissioners went over not permitting the burning of household garbage due to plastic being contained in just about everything and the odor that plastic produces. The commissioners stated that the setback would be 150ft.

Mrs. Thum stated that she has not received any feedback from residents, besides the individual that spoke up tonight.

Dr. Tabor moved, and Mr. Milton seconded, to approve the language as written for proposed text amendment #34-11-04, to amend Section 6.5: Outdoor Wood Burning and to forward it to the Marquette County Planning Commission for their review. After their review the proposed text amendment shall be forwarded to the Township Board for their consideration.

Ayes: 7 Nays: 0 Motion Carried

D. Consideration – Proposed Text Amendment #34-11-05 Home Occupation

Mrs. Thum stated that she tried to incorporate the comments and suggestions that were received last month and put them into a draft format.

The commissioners discussed the number of employees that should be permitted for a home occupation and if having an employee who does not live at the location would constitute a commercial enterprise and not a home occupation.

The Commissioners went over the proposed language with regards to the permitted and conditional home occupations. Mr. Sikkema had concern about employees who don't live at the home work at the home business. The Commissioners felt that if you have an employee or more then you should be able to pay the conditional use permit fee. The concern is not the number of employees, but the number of employees that work at that specific home.

Mr. Engle wanted to change the language under conditional home occupation #2 to say "at that location."

Mr. Mahaney discussed the effect when to many employees work from home and don't occupy a commercial space. The Commission also discussed the issue of customers visiting the site and the changing of the character of the neighborhood.

Mr. Milton, move, and Dr. Tabor, second to direct staff to table proposed text amendment #34-11-05 and direct staff to re-write the proposed language taking into account the commissioners comments.

Ayes: 7 Nays: 0 Motion Carried

E. Consideration – Agricultural/Forestry District (AF-2)

Mrs. Thum went over the proposed text amendment, including the permitted and conditional uses along with the setback requirements. Mr. Meister felt that the 10 acre requirement for livestock should be removed, but the commercial agricultural would be fine as a conditional use. Mr. Milton felt that there should be no maximum square footage for detached structures.

Mrs. Thum stated that at our next month's meeting we will be discussing the map.

Mr. Sikkema asked to look at some R-1 parcels that could be added to the new R-A District.

Dr. Tabor, moved, and Mr. Sikkema, second, to direct staff to update the text amendment application to start the process of establishing a new zoning district called, Rural Agricultural (R-A) with the permitted and conditional uses, and setback requirements listed above. Staff is to work on a map outlining potential parcels that could be part of the new R-A District.

Ayes: 7 Nays: 0 Motion Carried

F. Discussion - Sign Ordinance

Mr. Milton discussed the suggestions that the Township Board had for the Planning Commission and felt that they seemed reasonable.

Mr. Smith stated that he measured some of the signs in the Township and stated that majority of them would not meet the new sign ordinance. Several of them were larger than 100 square feet. There was conversation as to whether increase the allowed square footage if majority of the signs are larger than the 100 square feet. Mrs. Thum stated that some of the signs had variances and that the permits were approved with the condition that no sign shall exceed 100 square feet.

Mr. Mahaney expressed his concern about the 40 square feet maximum for banners and felt that was supposed to be for each banner not total.

Mr. Sikkema, moved, and Dr. Tabor seconded to table the sign ordinance to the October 3, 2011 meeting.

Ayes: 7 Nays: 0 Motion Carried

VII. NEW BUSINESS

A. None

VIII. OLD BUSINESS

A. Consideration - Sign Ordinance

TEMPORARY SIGNS

Mrs. Thum stated that she would like to start with the PowerPoint presentation that was presented, before the Township Board at their August 8, 2011 meeting. That would allow us to go through the Board's main points of concerns such as Temporary, Electronic Message and Realtor Signs. Mrs. Thum also stated that we need to have justification as

to why the Planning Commission wants certain things such as a specific square footage for temporary signs. Dr. Tabor reiterated that point.

Mrs. Thum, read the Board's concerns with regards to temporary signs such as permitting, square footage and location of the temporary signs. Mr. Mahoney, felt that we did not use a specific number, but rather a percentage. There was further discussion on the average size of banners and where they could be located on a building, such as Ace Hardware, which has two faces that could be seen from one or two roads.

The Commissioners felt that a total of 80 square feet should be allowed, but cannot exceed 20% of any one wall space, to which the sign is attached. The temporary signs may be located on a fence, posts, pallets, but may not be attached to light poles, vehicles, trees and/or utility posts. The Planning Commission felt that the rationale for the 80 square feet was that, the average banner is 20 square feet so that would allow a business owner to have 4 temporary signs.

Mrs. Thum asked the board how they felt about requiring a permit for a second temporary banner, during that same 90 day period. The Commission didn't feel that a permit should be required, as it takes time and money for that business owner to complete a permit. The commission felt that any banner over 30 days should be required to obtain a permit.

ELECTRONIC MESSAGE SIGNS

The Commissions discussed the NITS and the face of the sign.

There was discussion about, the statement that the message of the sign needs to be relevant to the business that owns and operates the sign. Mr. Sikkema explained that this is regulated under the Michigan Highway Advertising Act of 1972.

REALTOR SIGNS

The Commission looked at the proposed language and felt that it should allow for larger realtor signs on the larger lots, and for commercial signs to be up to 32 square feet as long as they are located outside the right-of-way. For the smaller square foot realtor signs they felt, should be placed at least 30 feet from the edge of a travel lane.

Rationale – state requirement. The Commission also discussed the directional and other realtor signs located in the right-of-way. There is State language that handles this so, the directional signs will just continue to be regulated by the Highway Advertising Act of 1972.

The language in the proposed ordinance would be changed to:

19.1: Temporary Signs

#3 Real Estate Directional Signs

- Real estate signs advertising the sale, rental, or lease of property in residential and commercial districts are permitted provided:

- A. The sign is located on the lot or in front of the unit for sale; and
- B. Sign shall not exceed nine (9) square feet in area.
 - a. Parcel with over 300 feet of frontage can have two additional signs for every additional 400ft of frontage in residential areas, provided that they are located outside of the right-of-way; and
 - i. In the AF District, lots less than 20 acres, but not less than 5 acres or more could have one 16 square foot sign, provided that they are located outside of the right-of-way; and
 - ii. Lots of 20 acres or more could have one 32 square foot sign, provided that they are located outside of the right-of-way

- Signs shall be placed at least 30 feet from the edge of the travel lane.
- Signs advertising commercial real estate signs and subdivision/development signs of 32 square feet or less provided they are located outside of the right-of-way. Such sign shall be maintained and in good repair.
- Signs shall be removed within seven (7) days after the property has been sold, rented or leased.

RESIDENTIAL SIGNS

Mrs. Thum discussed the concerns that the Township Board had, regarding the different square footage requirements for the different zoning districts. There was also discussion about the large signs along M-28E. The Planning Commission felt that the speeds along M-28 are faster than the ones along Lakewood Lane, so they should be allowed to have larger residential signs. The Planning Commission felt that the M-28 homes should be allowed to have larger signs, due to the speed, rather than the zoning district.

The Planning Commission proposed to have the language read, "For speeds less than 45 m.ph. signs shall not exceed 8 square feet and for speeds 45 m.ph. and greater, signs shall not exceed 16 square feet.

The Planning Commission then looked at setting an overall height limit for the residential signs. They felt that one should be allowed, but wanted to ensure that it allowed for the road and grade variances that occur in our Township. The Planning Commission felt that 12 feet would be appropriate and it should say that no residential sign shall exceed 12 feet from the road grade.

BILLBOARDS AND COMMERCIAL SIGNS

Mr. Sikkema stated that the Township can have stricter regulations than the State, but it's hard to get a new permit to construct a billboard. For the State, M-28E and US 41S are regulated and a billboard could not be placed up without a permit. Mrs. Thum stated that the Board voiced concern that no language would open the door up for billboards. The Commission wanted to add a statement that construction of new billboards is not permitted, but the existing ones shall be maintained and those that are not shall be removed. Mr. Milton stated that we should add a definition of a billboard to the ordinance.

The Commission discussed the commercial square footage requirement of the proposed ordinance and our current commercial signs, the pole and ground sign. Mr. Smith stated that he measured that the Holiday, Family Dollar, Shaws, and Citgo are over a 100 square feet and they would be non-conforming signs with the new ordinance. Mrs. Thum stated that the current ordinance states that "no sign shall have an area exceeding 100 sq ft." Mr. Smith wanted it on record that he wants a sign inventory to be conducted before it goes back to the Board. Mrs. Thum stated that she did a sign inventory and it shows different numbers than he has, and she looked at the sign permits that we have on record. Mrs. Thum wanted to check Mr. Smith's numbers to see how they were calculated. Mr. Sikkema stated that this is a tough part, we need to figure out what the Township wants as far as their signs, do they want larger ones or smaller ones and what would take away from our rural character. Dr. Tabor wanted to know if we have a business that has two sides fronting two different streets, should they be allowed to have additional signs.

Mrs. Thum mentioned the international sign code and how it looks at speed limits for square footage requirements. Mrs. Thum stated that she will bring this back to our November 7, 2011 meeting.

Mr. Milton moved, and Dr. Tabor seconded, to table the proposed sign ordinance until our November 7, 2011 meeting to allow staff to make corrections on A, B, C and D and to have staff present information concerning the international sign code.

Ayes: 6 Nays: 0 Motion Carried

B. Consideration – Proposed Text Amendment #34-11-05 (Home Occupation)

Mr. Meister asked if beauty salons and barber shops are permitted as a home occupation right now, and if so they will have more than two visits per day. Mr. Sikkema voiced his concerns about having an employee who does not live in the home, work at that location. He stated that it's his opinion that is not a home occupation, but rather a business. Mr. Mahaney discussed his concern with the home occupation language, and agreed that you should live at your home for the home occupation. Dr. Tabor and Mr. Meister felt that if there is one person answering phones, then it would not change the character of the neighborhood. If it does not affect the overall character of the neighborhood then, it should be allowed, at that same point it might need to be looked at a case by case basis. There was further discussion about if one employee would change the character of the neighborhood or not. The Commission discussed several examples of business that might

have one employee and would really not affect the character of the neighborhood. The Commission wanted to see AF put back into the list of zoning districts where a home occupation could occur. The commission wanted the proposed language to say that if a home occupation would have any employees then it would be a conditional use. The Commission decided to keep current language and add permitted uses not requiring a conditional use and add #1-5 and #8 -9 from the proposed language and delete #2 of the current language.

Dr. Tabor moved and Mr. Mahaney seconded to keep the current language for home occupations, add the permitted uses, # 1-5 and #8-#9 and then delete #2 of the current language.

C. Consideration – Rural Residential Zoning District (RR)

Mr. Sikkema moved and Mr. Milton seconded to table rural residential until our November 7, 2011 meeting.

IX. PUBLIC COMMENT

Mr. Dick Arnold, 312 West Branch Road asked about the AF zoning districts and home occupations.

X. COMMISSIONER’S COMMENT

Mr. Sikkema discussed the 2012 construction and the MDOT Welcome Center.

XI. DIRECTOR’S REPORT

- A. Discussed the sign inventory
- B. Priority list

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. City of Marquette Planning Commission minutes, June 21, 2011
- B. Communication from Sands Township
- C. Planning and Zoning News, July 2011

XII. ADJOURNMENT

Dr. Tabor moved and Mr. Meister seconded to adjourn the meeting at 10:30pm

**Charter Township of Chocolay
Planning Commission Minutes
Monday, November 7, 2011**

I. Meeting called to order at 7:30P.M./ Roll Call

Members present: Kendell Milton (Chairperson), Andy Smith (Vice Chairperson), Tom Mahaney and Gary Heinzelman.

Members absent: Eric Meister, Dr. Ken Tabor and Andy Sikkema

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval of October 3, 2011 Minutes

Mr. Milton moved and Mr. Mahaney seconded, to approve the minutes as written.

Ayes: 4 Nays: 0 Motion Carried

III. Additional Agenda Items/ Approval of Agenda

Mr. Milton, stated that the calendar for next year's meetings was before the Planning Commission and it should be placed under VIII - New Business.

Mr. Heinzelman moved and Mr. Smith seconded to approve the agenda with the change.

Ayes: 4 Nays: 0 Motion Carried

IV. Public Hearing

a. None

V. Public Comment

Mr. Mark Maki – 370 Karen Road

Mr. Maki stated that he wanted to apologize to the Planning Commission. At the Board's special meeting, he attempted to get specific comments on what they would like the proposed sign ordinance to say. Mr. Maki went on to say that he was disappointed in the County Planning Commission's review of the proposed sign ordinance. Mr. Maki, then spoke about the proposed road frontage amendment. He stated that the 2005 comprehensive plan recommend that the Township do away with private roads. The Planning Commission was going to do that, until a public hearing was held and people spoke out about their removal. As a result, the Commission and Township Board inserted the sentence, "up to 4 parcels may share a driveway." Mr. Maki went on to say that the problem with common driveways is the addressing of them and that emergency vehicles have problems locating a home.

VI. Presentations

A. None

VII. New Business

A. Consideration - Planning Commission 2012 Meeting Calendar

The Commissioners discussed the days of the week that would work for them and the time. There was a consensus that Monday's at 7:30 would work best for everyone.

Mr. Heinzelman, moved and Mr. Smith, seconded to approve the Planning Commission meeting dates and time for 2012.

Ayes: 4 Nays: 0 Motion Carried

VIII. Old Business

A. Consideration – Proposed Text Amendment #34-10-10 (road frontage)

Mrs. Thum went over the history of the text amendment and that this was proposed by Mr. Maki, and the Commission needs to either approve or deny the amendment. At our last meeting, we had talked about the issue with addressing and making changes to the hold harmless agreement, but that was not part of Mr. Maki's amendment.

Mr. Heinzelman stated that, in his past profession there were several times that he was called out to a home with a shared driveway and he went to the wrong house. There were further questions about the requirement for addressing of residential lots.

The Planning Commission went over the proposed text amendment and felt that some of the language from the old ordinance could be added to a separate amendment. There was further discussion on County Road standards with regards to private roads.

Mr. Smith, moved and Mr. Mahaney, seconded, to deny proposed text amendment #34-11-07 (#34-10-10) and forward it to the County Planning Commission for their review. After the County Commission has made a recommendation, it shall be forward to the Township for Consideration.

Ayes: 4 Nays: 0 Motion Carried

B. Consideration - Proposed Text Amendment #34-10-11 (PUD)

Mrs. Thum went over the history of the text amendment and that the Planning Commission needs to approve or deny it. There was discussion on current PUDs in the AF District and the Township rural character. The Commission discussed the cluster development vs. PUD's. There was a consensus that there were several options to land owners to develop the larger lots without resorting to a PUD.

Mr. Heinzelman, moved and Mr. Milton, seconded to approve proposed text amendment #34-11-06 (#34-10-11) and forward it to the County Planning Commission for their review. After the County Planning Commission has made their recommendation it shall be forwarded to the Township Board for their consideration.

Ayes: 3 Nays: 1 Motion

C. Consideration – Sign Ordinance

Mrs. Thum stated that at our last meeting, the Commission was able to make it though the majority of the Township Board’s comments. Mrs. Thum also stated that she met with Dan Landers from Cook Signs to discuss the International Sign Code and with Mr. Smith to discuss the current language. The Commission decided to review the proposed ordinance page by page. The Commission discussed the height limit on the monument signs and felt that when measuring the height the base should be excluded.

Mr. Milton asked if there were any definitions that need to be added to the sign ordinance. The commissioners discussed freestanding, ground, pole and monument signs. There was a consensus that the monument sign height, should stay at 12ft w/o the base.

There was further discussion on the sign ordinance. The Planning Commission made changes to pages: 4, 5, 7, 10, 14 and 15. The Commission was satisfied with the changes that were made to the commercial signage. The commission felt that regulating signage according to the speed limit was the right approach. There was discussion on setting a maximum square footage for a total number of signs per business, which was set at 200 square feet. There was discussion on temporary signs and canopy signs.

The Commission felt that the language for service station canopies needs additional work.

Mr. Smith, moved and Mr. Heinzelman, seconded, to have staff make the changes that were discussed at tonight’s meeting and bring it back to the Planning Commission for our December 5, 2011 meeting. Staff will post the draft on our website, and mail it to business owners.

Ayes: 4 Nays: 0 Motion carried

D. Consideration – Proposed Text Amendment #34-11-05 (Home Occupation)

The language was discussed and staff would like our attorney to review the proposed text amendment. Staff needs to correct the number of vehicles on page 3, and there was some concern about the enforcement of this.

Mr. Mahaney moved and Mr. Smith seconded to table this text amendment until our December 5, 2011 meeting

Ayes: 4 Nays: 0 Motion Carried

IX. Public Comment

None.

X. Commissioner's Comment

None.

XI. Director's Report

Mrs. Thum stated that there will be a public hearing for the Master Plan at our December 5, 2011 meeting. Mrs. Thum also stated that if anyone wants to read the additional research manuals that go with the international sign code, just contact her and she will provide them.

XII. Informational Items and Correspondence

- A. Planning and Zoning News, September 2011
- B. City of Marquette, Planning Commission Minutes, September 20, 2011
- C. Natural Features DRAFT Chapter for Master Plan

XIII. Adjournment

Mr. Milton moved, and Mr. Smith seconded, to adjourn the meeting at 9:30pm.

Kendell Milton
Chairperson

**Charter Township of Chocoday
Planning Commission Minutes
Monday, December 5, 2011**

I. Meeting called to order at 7:30P.M./ Roll Call

Members present: Andy Smith (Vice Chairperson), Tom Mahaney
Eric Meister, Dr. Ken Tabor Andy Sikkema, and
Gary Heinzelman.

Members absent: Kendell Milton (Chairperson)

Staff present: Jennifer B. Thum, Township Planner/Zoning
Administrator

II. Approval of November 7, 2011 Minutes

Dr. Tabor moved and Mr. Heinzelman seconded, to approve the minutes as written.

Ayes: 6 Nays: 0 Motion Carried

III. Additional Agenda Items/ Approval of Agenda

No additions to the agenda were presented.

IV. Public Hearing

a. None

V. Public Comment

None.

VI. Presentations

A. Township Fire Hall Proposal

Mr. Lee Gould, Lieutenant and training officer with the Township Fire Department, presented a power point of the Fire Department's need for a new hall. Mr. Gould presented various facts, such as the current hall doesn't meet the NFPA or OSHA's requirements, there has been had two electric fires in the past five years, lack of meeting space, gear is close to fire trucks, some equipment is stored outside. Mr. Gould then discussed what the proposed interior of the new fire hall, and stated that the drive-thru bays would be used for additional trucks and the office space and meeting room/lounge would be used for the public in emergency situations.

Mr. Meister asked about funding for the project, Mr. Gould stated that the Township would have over \$500,000, and the proposed cost is 1.8 million.

The Commission asked questions about the number of vehicles, the proposed floor plan, and the location of the hall. Mr. Gary Johnson (ex. fire chief) responded to their questions.

The Commissioners like the site plan, but wanted the Fire Department to make sure the proposed hall meets their needs and not necessarily their wants. They were also pleased to see that the Fire Department has a large portion of proposed amount of money already in their account.

VII. New Business

A. 2011 Planning Commission Annual Plan

Mrs. Thum stated that the Planning Commission annual plan is a requirement under the Michigan Planning Enabling Act. The annual plan lists the status of planning activities, including recommendations by the legislative body related to planning and development for 2011. Also, that they should be proud for all that they have accomplished this year.

VIII. Old Business

A. Consideration – Proposed Text Amendment #34-11-02 (sign ordinance)

Mr. Smith wanted to read page 14, service station canopies, and maybe the maximum signage should be a percentage, rather than a specific square footage. Mrs. Thum discussed a particular company that has installed LED lights around their canopies and signs. The Commission discussed these lights and felt that they had high light intensity and would shine above the canopy and potentially to nearby lots. The Commissioners discussed if a statement should be included in the sign ordinance or under another section in the Ordinance. The Commission asked staff to research this and present the information to them at their January 9, 2012 meeting. The Commission discussed what would be considered a building alteration or addition. There was a further discussion on billboards and the casino sign. The Commission requested clarification on the location of the casino sign to ensure that it is compatible with the proposed sign ordinance.

Dr. Tabor moved and Mr. Meister seconded to send the proposed text amendment #34-12-01 (#34-11-02) to the Township Board for their consideration and the first reading. Staff shall send the proposed language to the business owners and CABA for their consideration as well.

Ayes: 6 Nays: 0 Motion Carried

B. Consideration - Proposed Text Amendment #34-11-05 (home occupation)

The language was discussed and Mrs. Thum stated that one correction was not shown on page 3, under conditional use #3. There was further discussion about the hiring of employees for a home occupation. The Commission wanted the language to be clear that if, the home occupation has an employee, then a conditional use permit is required. Mr. Sikkema stated that any time

you have an employee that is a business and is no longer a home occupation. Mr. Smith stated that by having a process that allows for home occupations with employees, it would encourage people to follow the law.

Dr. Tabor moved and Mr. Mahaney seconded to forward proposed text amendment #34-12-02 (#34-11-05) to the County Planning Commission for their review.

Ayes: 5 Nays: 1 (Sikkema) Motion Carried

C. Consideration – Proposed Text Amendment #34-11-03
(wireless communication towers)

Mrs. Thum stated that at the Township Board meeting on November 14, 2011, the Board had some concerns with three specific items, A: 17, they felt that was too restrictive. They also were concerned with B: #4, which states that the applicant shall make every attempt in the design of the wireless tower to disguise the structure to reduce the aesthetic impact to the surrounding area.

Mr. Trudeau discussed his objection to the language that was presented and felt that it was too subjective. The Commission discussed the monopoles and other communication towers. There was further discussion on stealth towers and felt that people, now accept wireless towers. This is a conditional use permit process, so each tower would be evaluated on case by case basis. The Commissioners felt it would be best to delete A: #17 and B: #1 and #4. Mrs. Thum discussed Chapter nine of the Townships Master Plan, which talks about scenic areas in Chocolay.

Mr. Sikkema moved and Mr. Mahaney seconded to forward the proposed text amendment #34-11-03 back to the Township Board for their consideration, with the changes listed above and the first reading of the proposed text amendment.

Ayes: 6 Nays: 0 Motion carried

D. Consideration – Proposed Text Amendment #34-11-06 (Rural Residential)

Mr. Sikkema stated that we should look at rezoning some of the R-1 lots to the Rural Residential District. Mr. Meister wanted to mirror this new district with the old RR-2 District, and to permit commercial farming, but not necessarily livestock. The Commission discussed the old zoning ordinance and the current language with regards to the minimum lot size. Mr. Meister used his father as an example.

Sikkema moved and Mr. Smith seconded to table proposed text amendment #34-11-06 to give Commissioners time to view the maps and proposed changes that were presented by Mr. Meister.

IX. Public Comment

None.

X. Commissioner's Comment

Mr. Sikkema stated the project for out here will now be let out in February of 2012.

XI. Director's Report

XII. Informational Items and Correspondence

A. City of Marquette, Planning Commission Minutes, September 20, 2011

XIII. Adjournment

Mr. Smith adjourned the meeting at 10:15pm.

Mr. Andy Sikkema
Secretary

**Charter Township of Chocolay
Planning Commission Minutes
Monday, January 9, 2012**

I. Meeting called to order at 7:30P.M./ Roll Call

Members present: Kendell Milton (Chairperson), Andy Smith (Vice Chairperson), Tom Mahaney, Eric Meister, Dr. Ken Tabor
Andy Sikkema, and Gary Heinzelman.

Members absent: None

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval of December 5, 2011

Mr. Sikkema moved, and Mr. Heinzelman seconded, to approve the minutes as written.

Ayes: 7 Nays: 0 Motion Carried

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Dr. Tabor moved and Mr. Sikkema seconded, to accept the agenda as written.

Ayes: 7 Nays: 0 Motion Carried

IV. PUBLIC HEARINGS

A. None

V. PUBLIC COMMENT

Mr. Pete Mackin, a Chocolay Township resident spoke about his appointment to the Marquette County Planning Commission. He would like to serve as a liaison between the County and the Township. Mr. Mackin gave a brief history of his professional background.

VI. PRESENTATIONS

A. None

VII. NEW BUSINESS

A. Consideration - Township Master Plan

Mrs. Thum spoke about the completed draft and indicated that a presentation will be done on the plan at our February 6, 2012 meeting, so the Commissioners should look over the document in order to discuss it at our next meeting. Mrs. Thum also indicated that the recreation plan has been completed and it will be sent to the members.

B. Consideration - Building lights

Mrs. Thum stated that this came up after our last month's meeting discussion about a particular business blue LED canopy lights.

The Commissioners felt that the lights are not used for safety purposes, but rather for advertisement. The zoning ordinance does prohibit some exterior lights, but it's not specific to the LED canopy rope lights.

Dr. Tabor talked about the Dark Sky language and the difference between the lights at Founders Landing, street lights and parking lot lights.

Mr. Meister talked about the different types of lighting that are used advertisement purpose, and for architecture features.

Mr. Sikkema moved, and Dr. Tabor seconded, to table this item until we received more information on dark sky regulations and clarification on the wording in the Township zoning ordinance.

Ayes: 7 Nays: 0 Motion Carried

C. Consideration – 2012 Top Priorities

Mrs. Thum stated that this it just to keep items on track and it's good to have the commissioner's set goals for 2012. Mrs. Thum discussed her thoughts and goals for this year. The Planning Commission and staff developed the following list, in no particular order.

1. Transportation Center/ Shelter/Bike Rack near the US 41S/M-28
2. Sign Ordinance
3. Junk Car Ordinance
4. Rural Recreation Zoning District
5. Review Fire Arms Ordinance
6. Explore the possibility of underground utilities along US-41S (Business District)
7. New playground equipment
8. Waterfront Residential – Rental Properties
9. Review of private roads and addressing of residential homes

VIII. OLD BUSINESS

A. Consideration - Proposed Text Amendment #34-11- 06 (Rural Residential)

The Commissioners felt that this should serve as a transitional district between the R-1 and the AF District. The Commission looked at this item and felt that commercial farming should be a conditional use. There was further discussion on contractor yards and shops in this district, due to the minimum lot size. Mr. Smith stated that the current language states that a contractor's yard shall be on a minimum of 20 acres, and it's a conditional use. Mr. Sikkema discussed different uses of contactors yards and where it would be acceptable. Mr. Mahaney, felt that residential areas should stay residential, and a commercial type of business is not compatible.

The Commission wanted to look at removing some of the Section toward the southern end of our Township and that are larger lots. The Commission talked about limiting the

growth towards the road, but limiting the AF-2 to the smaller lots, and not the 20 acre parcels.

Mr. Meister thought we should omit contractor yards as a conditional use and permit commercial farming as a conditional use in the Rural Residential District. The rest of the Commissioners felt that this was a good idea. Mr. Sikkema went over the current list of permitted and conditional uses in the current Agricultural/Forestry and compared those to what one would expect in the Rural Residential District.

Mr. Sikkema moved, and Dr. Tabor seconded, to direct staff to look at the proposed language and locate any non-conforming undeveloped parcels in the southern half of our Township, and to draft a revised ordinance amendment for review at our February 6, 2012 meeting.

Ayes: 7 Nays: 0 Motion Carried

B. Consideration - ORV Community Survey

Mrs. Thum explained that since there was little to no response from our residents about the potentials sub-committee for ORV's she worked with CUPPAD on developing a questionnaire that could be mailed to our residents.

There was question about any interest from other residents beside Mr. Tony Harry. Mrs. Thum stated that was a survey at the Grove Restaurant that did produce some input, but no other residents have written a letter or come to the Township Hall. If this item gets more support and the Township decides to do a survey, Mr. Heinzelman stated that the survey should go to our entire population.

Mr. Mahaney moved, and Dr. Tabor second, to drop the issue, unless we get more residents interested in the idea.

Ayes: 7 Nays: 0 Motion Carried

C. 2011 Text Amendment Update

Mrs. Thum stated that this was informational only, and the list will be continued to be updated as we go. Mr. Sikkema wanted this item in the packets from here on out. Mrs. Thum indicated that this will be done.

IX. PUBLIC COMMENT

Mr. Dick Arnold, 312 West Branch Rd, wanted to know if the Planning Commission is going to finish up the junk car/RV ordinance. (This item is on our 2012 top priority list)

X. COMMISSIONER'S COMMENT

Mr. Sikkema discussed the upcoming MDOT project.

XI. DIRECTOR'S REPORT

A. Zoning Ordinance Review

Mrs. Thum stated that she has been going through the zoning ordinance to review what the current issues are and what items might need to be changed. The Commissioners would like to see a monthly list.

B. Road Frontage Text Amendment

Mrs. Thum stated that the Township Board wanted the Planning Commission to look at the safety issue of private roads and the addressing of them. Mr. Heinzelman stated that staff should review Ordinance #29, address requirement. Mrs. Thum stated that this will be added to the 2012 top priority list.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

- A. City of Marquette, Planning Commission Minutes, November 1, 2011 and November 15, 2011
- B. Planning and Zoning News, November 2011

XII. ADJOURNMENT

Mr. Kendell Milton adjourned the meeting at 9:30 pm

Mr. Andy Sikkema
Secretary

**Charter Township of Chocolay
Planning Commission Minutes
Monday, February 6, 2012**

I. Meeting called to order at 7:30P.M./ Roll Call

Members present: Kendell Milton (Chairperson), Dr. Ken Tabor, Andy Sikkema, and Gary Heinzelman.

Members absent: Andy Smith (Vice Chairperson), Tom Mahaney, and Eric Meister

Staff present: Jennifer B. Thum, Township Planner/Zoning Administrator

II. Approval of January 9, 2012

Dr. Tabor moved, and Mr. Sikkema seconded, to approve the minutes as written.

Ayes: 4 Nays: 0 Motion Carried

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Mrs. Thum informed the commission that Mrs. Deborah Mulcahey's written comments are on the desk in front of them for review.

Dr. Tabor moved and Mr. Heinzelman seconded, to accept the agenda as written.

Ayes: 4 Nays: 0 Motion Carried

IV. PUBLIC HEARINGS

Proposed Text Amendment #34-12-05 (home occupation)

Mrs. Thum read Mrs. Deborah Mulcahey's written comment in its entirety, which was emailed to Mrs. Thum on February 5, 2012. Mrs. Thum stated that Mr. Wayne Dees supplied public comment as well, which was placed in their packet materials.

Mr. Dick Arnold, 312 West Branch Road, stated that he is concerned with allowing home businesses in residential areas. Mr. Arnold felt that there should be an annual review process.

V. PUBLIC COMMENT

Mr. Dick Arnold, 312 West Branch Road, stated that he is disappointed that only a few people were in attendance. Mr. Arnold felt that the Township should send out a survey to the residents and see what they would like the Planning Commission to work on. He also felt that the conditional use permit fee should be set at \$75.00 and an annual fee, versus a onetime fee.

VI. PRESENTATIONS

A. None

VII. OLD BUSINESS

A. Consideration - Proposed Text Amendment #34-12-05 (home occupation)

Mr. Heinzelman stated upon further review, he feels that home occupations, which permit an employee, should not be permitted in residential areas. Mr. Heinzelman discussed the research that he did on this subject and stated the majority of municipalities don't allow

home occupations to have non-resident employees in their residential areas. Mr. Sikkema stated that the reason that home occupations came before the Commission, is because a resident was being honest about her home knitting business, but she did not make enough profit to justify the \$250 fee.

Mr. Sikkema stated that the proposed amendment does need to be cleaned up. There are a couple of options, we could move it along, don't do anything, take the public comment and make the changes to remove the allowance of an employee or leave the current language as is.

Mr. Sikkema moved and Dr. Tabor seconded to have staff draft a new text amendment that mirrors our existing language in Section 6.9, but change home occupations to a permitted use and include a statement that they shall register with the Township. This item is to be brought back before the Planning Commission for review at our March 5, 2012 meeting.

Ayes: 4 Nays: 0 Motion carried

B. Consideration - Proposed text amendment #34-12-06 (rural residential)

Mr. Sikkema stated that he was concerned with #3 under the permitted uses, instead of listing the rabbits, chickens, geese and other small agricultural animals, maybe it should say "animals" or fowl for the private uses of residents. There was further discussion on what would constitute an animal and would exotic animals fit into that category. Staff was asked to review the federal and state laws on keeping of exotic animals to see if we can just put the word "animals" instead of listing each animal.

Mrs. Thum stated that there are 162 vacant non-conforming parcels in the Agricultural/Forestry District.

The commission discussed whether we should regulate the number of animals that can be on a lot. The consensus was that this is something that could be reviewed on a case by case basis, as it's listed as a conditional use.

Mr. Sikkema moved and Dr. Tabor seconded to direct staff to finalize the text amendment and prepare a map for review at our March 5, 2012 meeting.

Ayes: 4 Nays: 0 Motion carried

C. Consideration – Dark Skies- Outdoor building lights

Mrs. Thum informed the commission of the discussion she had with the City of Marquette and the lights that are located at Founders Landing. Mrs. Thum stated that she will follow up with the BLP to see when lights along US 41S and in the subdivision are to be replaced.

The Commissioners discussed the sample light ordinance from the Village of Lloyd Harbor. There was also discussion on the sample language from Pittsfield Charter Township.

Staff will look into finding similar language with municipalities that regulate outdoor advertising lights. The Commission will review the Pittsfield Charter Township ordinance and mark it up for next's months meeting.

VII. NEW BUSINESS

A. Consideration - Township Master Plan

Mrs. Thum spoke about the completed draft. Mr. Sikkema suggested that we review Chapters 1 and 2 for next month's meeting.

IX. PUBLIC COMMENT

Mr. Wayne Dees, 512 Woodvale, discussed an administrative issue with the Planning Commission. Mr. Dees stated that there is a statement in the Planning Directors job description, which states that the Director is to make recommendations to the various boards on items of interest. Mr. Dees stated that he felt that, this was to guide the Commission and not to make actual recommendations. Mr. Dees stated that it's Mr. Maki's interpretation that the statements means that the Director is to make an actual recommendation to the Commission on whether an item should be approve or denied, and their reason for such.

The Commission stated that the Planning Director has the background in planning and they don't always listen to staff, but like to see things from their perspective and get different thoughts on the issue.

The Commission discussed this issue with Mr. Wayne Dees.

Mr. Sikkema stated that the Commission looks to the zoning/planning director for guidance on all issues, and to determine if any issue could arise from an enforcement standpoint. The rest of the Planning Commission agreed with this statement.

X. COMMISSIONER'S COMMENT

Mr. Sikkema discussed the upcoming MDOT project.

XI. DIRECTOR'S REPORT

Mrs. Thum gave a general update.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

XII. ADJOURNMENT

Respectfully Submitted by

Andy Sikkema
Chocolay Township Planning Commission Secretary

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, March 5, 2012

I. MEETING CALLED TO ORDER BY: Kendell Milton at 7:30 p.m.

ROLL CALL

Present- Mr. Kendell Milton (Chairperson) - Mr. Andy Smith (Vice Chair) - Mr. Andy Sikkema (Secretary) - Dr. Ken Tabor - Mr. Eric Meister - Mr. Gary Heinzelman - Mr. Tom Mahaney

II. MINUTES

A. February 6, 2012

Motion to approve the minutes as corrected by: Heinzelman

Second by: Sikkema

Vote: All Ayes MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion to approve the agenda as written by: Tabor

Second by: Sikkema

Vote: All Ayes MOTION CARRIED

IV. PUBLIC HEARINGS

None

V. PUBLIC COMMENT

Mr. James Dunn- 3120 M-28 E, MQT- Discussed the issue of the AF setback requirements and the impact on his property located in Section 12. His lot was created in in the early 1900's and had an existing foundation built on the site in 1975 10 ft. from the lot lines. He would like the board to consider the possibility of changing the zoning along that part of M-28 to Residential 1 so the set backs would be that same as the buildings already there and they would not have to come before a board to request a variance.

IV. PRESENTATIONS

None

VII. OLD BUSINESS

A. Consideration - Proposed Text Amendment #34-12-05 (home occupation)

Sikkema reviewed the background information and the discussion to put home occupations as a permitted use in the R1, R2, MFR, WFR and AF districts.

Smith question what if for instance a beautician would cause more traffic during a day than would someone working on motor parts, why would one be permitted and the other not if they met all other conditions.

Tabor commented the permitted use was to make it easier for home business owners.

Heinzelman discussed the issue of why wouldn't more than one home occupation be

allowed. Residents of a home should be able to each have a home occupation if they meet the conditions for approval.

Motion to amend the proposed text amendment as indicated by: Smith:

1. Uses Allowed: remove (No more than one home occupation is permitted per parcel as written;
3. Prohibited uses: remove (B. Any type of repair, assembly or storage, sale or manufacture of vehicles, or any other work related to motor vehicles and their parts)

Add (9. Conditional uses: Any type of repair, assembly or storage, sale or manufacture of vehicles, or any other work related to motor vehicles and their parts)

Second by: Tabor

Vote: All Ayes MOTION CARRIED

Motion to approve proposed text amendment #34-11-05 as written and forward it to the Township Attorney and County Planning Commission for review and then the Township Board for approval by: Smith

Second by Tabor

Vote: All Ayes MOTION CARRIED

Final Proposed Text #34-11-05

Home occupations are a permitted use in R1, R2, MFR, WFR and AF districts when in conformance with the following requirements:

1. **Uses Allowed:** Uses that comply with all of the standards of this subsection and those provided for under conditional uses, unless specifically prohibited elsewhere in the zoning ordinance.
2. **Size:** A home occupation may not occupy more than twenty-five percent of the gross area of any one story, structure, or dwelling used for the home occupation.
3. **Prohibited Uses:** The following uses are prohibited as home occupations in the R1, R2, MFR and WFR districts:
 - a. Restaurants are prohibited as home occupation in all zoning districts.
 - b. Animal boarding facilities including kennels, commercial stables and all other similar uses.
4. **Location:** All work areas and activities associated with home occupation must be conducted either inside the principal dwelling unit, or in accessory building or garage.
5. **Exterior Appearance:** There shall be no evidence of the conduct of a home occupation when viewed from the street right-of-way or from an adjacent lot. There may be no change in the exterior appearance of the dwelling unit that houses a home occupation.
6. **Operational Impacts:** No home occupation or equipment used in conjunction with a home occupation may cause odor, vibration, noise,

electrical interference or fluctuation in voltage or the use of hazardous substances or materials.

7. Traffic: No traffic shall be generated by any home occupation in greater volume that would normally be accepted in a residential neighborhood.

8. Registration: Any person conducting a home occupation shall notify and register with the Zoning Administrator, within thirty days of the beginning use, or within sixty days of the effective date of this Ordinance, whichever is later. (34-08-01)

9. Conditional Uses: Any type of repair, assembly or storage, sale or manufacture of vehicles, or any other work related to motor vehicles and their parts.

B. Consideration - Proposed Text Amendment #34-12-06 (rural residential)

Motion to postpone this item until staff can contact the township attorney for an opinion and/or interpretation of *“VI General provisions; 6.1 (A) {Lots of less than 20 acres but not less than 5 acres within the AF district prior to the adoption of this ordinance are legal nonconforming}*

and 6.1 (B) In Districts R1, R2, MFR, WFR and AF, the minimum lot size and lot width regulations do not apply to any nonconforming parcel of land shown as a lot in a recorded plat, or described in a deed or land contract executed and delivered prior to the effective date of this Ordinance by Sikkema

Second by: Tabor

Vote: All Ayes MOTION CARRIED

C. Consideration - Dark Skies- Outdoor building lights

Motion to postpone this item until staff can work with MBLP and Alger Delta to get an inventory of the type of street lights that are used in our Township and to inventory the lights that are used at the commercial businesses: by Heinzelman

Second by: Tabor

Vote: All Ayes MOTION CARRIED

D. Consideration and Review - Township Master Plan, Chapters 1 & 2

Board will continue to review the Township Master Plan with Chapters 3 & 4 at the April meeting.

Second by: Milton

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

IV. PUBLIC HEARINGS

None

V. PUBLIC COMMENT

Mr. Tony Harry- 6369 US-41 S, MQT- Mr. Harry discussed the possibility of allowing ORV's to utilize the shoulder of county roads in the Township. He requested an update on the progress/results of the ORV survey. Mr. Harry also submitted a petition signed by 51 individuals who would like the Township to open county roads for ORV use on the far right at speeds no greater than 25 mph. The purpose is to allow people to get to the main ORV trails. He mentioned that other ORV groups have been successful in obtaining grants to help with trail development and safety monitoring.

Planning Commission members informed Mr. Harry that only a couple of people expressed interest in participating on the ORV subcommittee, and therefore it was decided in a previous session that the issue (including the proposed Township-wide survey) would be dropped until more interest was expressed by residents.

**Note, Mr. Sikkema joined the meeting at 7:40 p.m.

IV. PRESENTATIONS

None

VII. OLD BUSINESS

A. Consideration - Proposed Text Amendment #34-12-06 (rural residential)

Fuller summarized the opinion by Township Attorney Mike Summers concerning an apparent conflict with respect to three subsections regulating legal nonconforming uses and lots of record. This was pertinent to the discussion of the proposed rural residential zoning district. There was some discussion regarding clarification of what was to be accomplished. The consensus was that Commissioners want to ensure that property owners will be allowed the opportunity to build on currently vacant lots that were conforming lots at the time the original Ordinance was adopted in 1977 even though they don't meet the current requirements for minimum lot area. The Commission also considered the public intent to maintain rural character; how to balance this with increasing the number of developable lots; and how to reduce the number of nonconformities that necessitate action by the Zoning Board of Appeals (usually difficulty in meeting current setbacks). Commissioners discussed what "rural character" means (looks like). They also discussed the logic behind increasing density, such as following primary roads or developing contiguous areas.

A citizen asked the Commission to explain the benefit of 20 acre lots. Tabor explained that the 2008 Board sought to curb urban sprawl and preserve areas for farming and open space per the Master Plan. The impact of the larger lot size on tax base (potential reduction) was discussed in comparison to the value of rural character as a property amenity (attract residents). The Commission had questions regarding current real estate demand. It is difficult to determine whether current regulations curb demand for development or if there are other considerations such as consumer preference or the economy. It was suggested it would be beneficial to research the demand for 5 acre lots and an appropriate location. At the same time, a goal should be consistency with the Master Plan and former decisions.

Motion to postpone consideration of the RR District until there is a demonstrated need, or as identified as a goal in the updated Master Plan by: Tabor
Second by: Meister

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

Action Items: Staff was directed to work with the Township attorney to correct the inconsistent language regarding nonconforming lots in the current Ordinance. Fuller will provide a map at the next meeting that illustrates areas with lots less than 5 acres and also 5 acres or more (and less than 20 acres) in existence after 1977.

Consideration – Attorney Mike Summers opinion with regard to the current Chocoday Township Zoning Ordinance provisions as to Home Occupations.

Commissioners clarified their decision from a previous meeting to make Home Occupations a permitted use. They also reviewed citizen correspondence relating to this issue that will be presented to the Board at their next meeting. The Commission decided to move on without further action.

B. Consideration - Dark Skies- Outdoor building lights

The meeting packet included information on new street lighting fixtures being used by the BLP and the 2011 Joint IDA-IES Model Lighting Ordinance. The

Commission discussed their reasoning in pursuing dark skies lighting principles. Reasons include reducing glare and maintaining safety for road traffic, and limiting light pollution.

Motion for Staff to review the lighting ordinance as applicable to the commercial district and to ensure that lighting can be controlled in an acceptable manner by: Sikkema
Second by: Milton

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

Action Items: Staff will review the current zoning ordinance and the model ordinance and prepare recommend language for the next meeting.

C. Consideration and Review - Township Master Plan, Chapters 3 & 4

The Commission discussed considerations for the Housing section of the Master Plan. They include:

- Accommodation of elderly accessory housing, perhaps in apartments above the garage. This item should be considered also in terms of enforceability.
- Accommodating diverse housing needs no matter the life cycle of the resident to ensure that existing residents don't have to leave the Township as they age.
- The perceived opportunity vs. demand for rental housing. It was suggested that Staff obtain information on current housing demand from area realtors.
- Strategies include matching zoning regulations to the housing diversity goal and also marketing or actively pursuing opportunities to attract needed housing development to the Township. This item is also tied to the availability and funding of suitable infrastructure, such as through special assessments. Adams Township in the copper country was mentioned as an example of water infrastructure improvements.
- There is a question on percentage of the aging population that wants to age in place vs. percentage who plan to move to Florida or other regions.
- The economy impacts the desire for smaller lots and homes, or for development types that don't require individual maintenance. Commissioners expressed a desire to create places for new solutions and options and to maintain flexibility in addressing needs.
- It was suggested we should consider also the needs of the people who don't attend public meetings, such as the elderly, poor, infirm, etc. Commissioner Sikkema charged others with thinking of their parents' needs.
- Options such as low rise apartments with the availability of public transit were discussed.

Motion to postpone the final review of Chapters 1-4 until the June meeting to allow time for new planning Staff to review and comment unless there is a compelling deadline for this to be done sooner by: Meister
Second by: Tabor

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

Action Items: Staff will review Chapters 1-4 and prepare modifications to present at the June meeting. Staff will research regional demand for housing types and acreage.

VIII. NEW BUSINESS

None

IX. PUBLIC COMMENT

None

X. COMMISSIONER'S COMMENT

Sikkema gave an update of the upcoming US-41/M-28 road project. There will be off-roadway blasting of rock on the south side of the highway past the Welcome Center on April 9. There will be short-term road closures. Starting April 23 there will be closure of the outside travel lanes for approximately 30 to 45 days. Other lane closures will continue through fall. The Harvey area will receive only resurfacing in mid to late June through August. The new bike path will be paved before the old one is removed.

XI. DIRECTOR'S REPORT

No report was prepared by the newly hired Planning Director. The Commission requested future reports to include enforcement actions, highlights and points of interest from the department, and the spreadsheet on the progress of zoning amendments.

V. PUBLIC COMMENT

Mr. Tony Harry- 6369 US-41 S, MQT- Mr. Harry still wants the Planning Commission to consider opening up some County Roads to ORV/ATV use. He is starting an ORV/ATV Club for Region 5 in Marquette County. The first meeting will be 6 p.m., May 16 at the Bayou Inn Restaurant in Harvey.

VI. PRESENTATIONS

None

VII. OLD BUSINESS

A. Consideration - Proposed Text Amendment #34-12-06 (rural residential)

Staff has provided maps of all nonconforming properties less than 20 acres within the AF District, highlighting those that are 5 acres or less. Structures can still be built on nonconforming lots in the AF District as long as all setbacks can be met.

These maps illustrate the spatial pattern of non-conforming parcels in the District.

There are many parcels less than 5 acres, and they are widely scattered. This may necessitate a different strategy in addressing the inability to meet setbacks, rather than a rezoning. Those that are located adjacent to the R-1 District could be rezoned.

The Commission wants a strategy to allow people to be able to build or rebuild on these nonconforming parcels. The property owners have recourse to the ZBA if they can't meet the setbacks. This includes additional staff time, and applicant expense and time.

The ZBA requested the Planning Commission to consider rezoning some parcels (Section 17) to R-1. The decision was too preliminary at the time, and the Commission wanted a more comprehensive process for considering the rezoning, not just spot consideration.

Motion to postpone consideration of the RR District until there is a demonstrated need, or as identified as a goal in the updated Master Plan by: Tabor

Second by: Meister

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

Action Items: Staff will continue to determine whether there is a current demand for more 5 acre parcels. This feedback will be obtained from realtors and through the neighborhood planning sessions.

B. Consideration - Dark Skies- Outdoor building lights

The meeting packet included a first draft of Dark Sky lighting provisions and a bulletin explaining the BUG classification system.

There was a question about the new bright blue Holiday lighting that is showing up in other areas of the U.P., and whether it would be allowed under the current ordinance. It was previously thought that this would not be allowed because that particular lighting would relate to sign lighting (advertising), where there is a provision that does not allow similar high intensity light such as strobes, lasers, etc. It was current staff opinion that our ordinance is not very clear in addressing this issue. But the purpose of the Dark Sky provisions is broader – it is meant to address energy conservation and protecting dark skies in rural areas from stray lighting. It ensures that the lighting is more focused in the area where it is needed. It also has the effect of reducing wattage and producing energy savings as property owners strategize ways to provide effective lighting while meeting the total lumen limit.

Commissioners discussed the effect of Dark Sky provisions on current businesses.

These standards would only take effect with new lighting situations, or commencement of a new or changed use requiring a zoning compliance permit.

We cannot know which current businesses would meet the standards since we don't have their lighting information.

Commissioners would like to see examples of existing businesses with lighting that meets these standards, and to see case studies from other communities that have implemented these standards to make sure there were no problems in implementation. They would like to see a test case with a local business to see if they currently meet the standards, or what they would have to do to meet the standards. They would also like to see particular fixtures in operation that meet these BUG ratings, so they can experience the visibility.

There could be a provision that if current lighting was expanded more than 25%, these provisions would apply.

Motion for this item to be postponed until we have more case study information, examples of compliant sites/fixtures, and to give Commissioners more time for study:

Mahaney

Second by: Tabor

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

Action Items: Staff will try to identify a couple of local businesses with BUG compliant lighting, and identify a local business that is willing to be a case study for the calculations. Staff will also research case studies from other communities that have implemented these standards.

VIII. NEW BUSINESS

A. Consideration - Proposed Text Amendment #34-12-01 (sign ordinance)

Staff was directed to produce a comparison of standards in the current and proposed sign ordinances. During this process, staff identified some concerns regarding conflicting and unclear provisions that would lead to enforcement difficulties. Staff wished to make the Planning Commission aware of these findings before they were presented, as requested, to the Township Board.

The Township Board will address this existing proposed Ordinance at their next meeting, and will have the choice of approving it or sending it back to the Planning Commission for revision.

The Commission agreed to go through the conflicts/concerns as summarized and make recommendations for necessary revisions. They completed the most pressing concerns on pages 1-3 of the sign ordinance comparison. The Planning Commission wanted to alert the Township Board that they found some irregularities.

The Planning Commission had not seen the side-by-side comparison of sign ordinance standards that Tina Fuller prepared for the Township Board. They want to see this at the next meeting where this is addressed. Throughout the process, they kept getting copies of new versions of the Ordinance, but without changes tracked. They feel that some of the changes they discussed may not have been incorporated along the way.

Motion for this agenda item to be postponed until the next meeting when the Commissioners have the side-by-side comparison to assist with the revision process:

Mahaney

Second by: Meister

Vote: Ayes: 6

Nays: 0

MOTION CARRIED

Action Items: For the next meeting, distribute the previous side-by-side comparison, and incorporate the changes from this meeting by tracking changes to the 3/19/12 draft.

- B. Consideration – Implementation of neighborhood planning initiatives to assist Master Plan and Zoning Ordinance updates.

Staff wants to initiate some neighborhood planning sessions, and wants Planning Commission input on how to best accomplish this. There was agreement that the more people we can get involved, the better. Commissioners asked for an update on the success of the community open house which was held April 12. Twenty-one people were in attendance with short notice. Staff will identify neighborhood champions to help organize the efforts. Ideally, sessions will be held in the neighborhood. Residents will be asked for their opinions on regulations and issues of concern in their neighborhood, and they will be able to meet some of their neighbors. Timing, location, and advertising methods were discussed. We can send letters to property owners based on location, and we can advertise in the Mining Journal. It would be beneficial to hold the meetings in the neighborhoods, because some people are more comfortable with this. We may start with the Silver Creek neighborhood to introduce the community garden and encourage participation. We need help in breaking determining the neighborhood divisions. There was a suggestion that we check with the PD for typical divisions.

IX. PUBLIC COMMENT

None

X. COMMISSIONER'S COMMENT

Smith heard a rumor about a potential bike path on Lakewood Lane. There was a question about whether there is enough right-of-way to create a path.

There is a new business at Timbercrest – the Rock Shop – and a new physical therapist in the shopping mall.

Mahaney had concerns about safety in the bike tunnel where it exits east and there is a sharp north turn. When people are coming south down the hill to turn west into the tunnel, they have close calls with people coming out through the tunnel because there is no mirror to help with the blind spot. Mahaney asked if the Township can mount a mirror there so people from different directions can see each other. Or can the Township paint a striped line temporarily at this location to divide the path to help alleviate conflicts?

XI. DIRECTOR'S REPORT

Highlights from the April Board report, addressing the public open house, community garden, CABA meeting, 70+ customer calls including 25% neighbor complaints, 3 chicken inquiries, concerns with dumping of inert materials from highway construction or removal of sand, and attendance at the MTA legal update session.

Motion to approve the agenda as written by: Heinzelman

Second by: Sikkema

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC HEARINGS

None

V. PUBLIC COMMENT

Peter Ollila of 633 Lakewood Lane had concerns regarding the home occupation ordinance. He feels the current language is very open-ended and unenforceable, and lets people do most anything at their home. He thinks the notification requirements should be expanded from notifying residents within 300 feet of the proposed home occupation (per State requirements) to notifying residents within 2,000-3,000 feet or half a mile because of the size of some Township lots. He also noted there have been significant changes to the ordinance language, and feels another public hearing is needed on the current language.

Dick Arnold, 312 County Road 545, spoke about the need to revisit the junk vehicle ordinance because it allows parking for an unlimited time of three unlicensed vehicles in the front yard if screened. They don't have to belong to the owner. Also, the ordinance puts no limit on the number or size of trailers. This means a licensed non-commercial semi-trailer or two or three could be parked in someone's yard. Commissioner Milton noted that the Planning Commission plans to review this ordinance this year.

VI. PRESENTATIONS

None

VII. OLD BUSINESS

A. Consideration - Proposed Text Amendment #34-12-04 (Home Occupations)

Staff provided copies of the March 5 ordinance provisions as sent to the County Planning Commission, and copies of their response. Staff also provided a Memo detailing the changes that were made to the proposed text amendment after the February 6 public hearing. The Marquette County Planning Commission reviewed the language that was amended on March 5. They noted that the proposed amendment expands the opportunity for residents to earn income through one or more home occupation(s) without having to pay a conditional use permit fee, and results in reduced staff processing time. They also noted that requiring a conditional use permit for particular uses with potential negative impacts secures an opportunity for public comment and review. The Commission voted unanimously in support of the proposed text amendment as amended by the Chocolay Township Planning Commission on March 5, 2012, pending a public hearing on the proposed language. They requested the opportunity to review the language again if it is further amended.

For reference purposes, staff provided a review of home occupation standards from surrounding jurisdictions, and created suggested language including a purpose and intent statement and tiered system of review based on activity and potential impacts.

There was a discussion on the proposed amendment. Commissioners wanted more specific information regarding Board concerns and the level of agreement on specific concerns. Commissioners did not remember approving the “sale and manufacture of vehicles” as a conditional use as noted in item #9. The intent is that uses resulting in exterior evidence be permitted only as a conditional use. A decision was made to permit repair and assembly and work related to motor vehicles and their parts as a conditional use, but to prohibit the sale, storage, or manufacture of motor vehicles as a home occupation. Commissioners discussed the potential conduct of a home occupation in a portable or mobile structure, but made no modification to address this possibility under the provisions for “location”. Commissioners agreed to add a purpose statement clarifying that home occupations are for “residents” as a way of addressing (not permitting) “employees”. Commissioners also discussed adding a provision for periodic inspection with reasonable notice to ensure compliance of home occupations that are approved by conditional use permit or that receive a complaint. There was a question about quantifying “reasonable” notice for inspection, and a suggestion was made

to consult the Township attorney on this issue.

Motion to revise the home occupation ordinance as discussed and to bring it to the next meeting for final review by: Mahaney
Second by: Meister

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

Action Items: Staff will submit the text to the Township attorney for review and comment regarding the inspection provision. A public hearing will be planned for the August meeting pending final review at the July meeting.

B. Consideration - Proposed Text Amendment #34-12-01 (Signs)

The meeting packet included the suggested revisions of the ordinance language put together by the Planning Director (with a companion document referencing changes) and reference materials (former version with tracked changes, revisions from the May planning commission meeting, and the comparison table of current, proposed, and model provisions). It was noted that no substantive changes were made to numbers relating to area, dimensions, etc. Changes were noted to definitions, measurement standards, formatting, and the resolution of conflicting or inconsistent provisions. There were also some new provisions for consideration.

Commissioners discussed the definition of flashing (a provision which was noted as important to the Board). The idea was that when someone looked down the road they should not see items changing more often than every 20 seconds; therefore Commissioners agreed to define “flashing” as something with less than 20 seconds between changes.

The commissioners then discussed the definition of “mural”, and agreed this would be a sign only if related by language or logo (deleted pictorial depiction) to the advertising of any product or service or identification of any business. Another similar new provision addresses one-way vision decals and their measurement. It was decided that only the portion of the window decal related by language or logo to the identification of the business is counted toward total permitted sign area. The commission’s intent is not to count the decorative portion of the sign.

Measurement of monument signs was discussed due to a proposed change in measurement standards. The change in measurement was approved as allowing for more consistency, but the maximum permitted height of ground signs was increased to reduce nonconformities with existing signs.

The commission discussed the administration of temporary signs, and whether a fee or permit is really necessary. The commissioners do not

want the process to be complicated or time consuming or cost prohibitive. They considered that banners are usually meant to promote seasonal products or services, and that they are not meant to be permanent. Previously they considered charging no fee for banners unless they were displayed longer than 30 days. However, the Supervisor was concerned that this would be hard to monitor if no permit is required, so he felt that even if no fee is charged, there should be a registration process. The Commission changed the provision to require no permit or fee unless the temporary sign is displayed longer than 90 days. The justification for the 90 days is to accommodate seasonal promotions. There was a lengthy discussion on real estate signs and portable signs. The intent is for portable signs to be used as a valuable tool to allow some timely promotion of special events, but a requirement was added that the signs be removed from the public space during non-business or non-event hours.

The Commission reviewed the changes through page 13 of the proposed document, ending their review at the provisions for wall signs. There was a question about the provisions of Table 2 computing wall sign area. Issues to be resolved include measuring distance of the sign from the road or from the adjacent property line (right-of-way), and whether the allowed percentage of the wall sign should be based on the building façade measurement or the building frontage measurement. The table will have to be revised – using percentages as proposed, permitted area should be based on the area of the building façade; percentages will have to be revised if the permitted area is based on the length of the building frontage. The Commission considered a maximum sign size limit as well, while noting that it is reasonable to allow larger signs on buildings with larger setbacks from the road.

Motion to end the discussion and continue on page 13 of the document at the next meeting by: Smith

Second by: Meister

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

Action Items: Staff will document the discussed changes and create revisions to the section on wall signs to prepare the document for review at the next meeting.

VIII. NEW BUSINESS

None

IX. PUBLIC COMMENT

None

X. COMMISSIONER'S COMMENT

None

XI. DIRECTOR'S REPORT

The Director asked about next items of importance. Signs will be revisited first at the next meeting, along with the revised Home Occupation provisions. Smith suggested we further discuss the AF District in relation to chicken permitting in residential areas, and Meister mentioned consideration of the Right-to-Farm Act, etc. Commissioners stressed the importance of protecting residential neighborhoods from nuisances. They would like to be made aware when there are a number of citizen complaints or concerns on a particular topic that may need to be addressed.

There will be further consideration of the Dark Sky provisions at some future meeting. Commissioners would like to put the junk car ordinance as a top priority. They also mentioned being tasked with the identification of other areas for industrial uses.

Commissioners inquired about the status of the Silver Creek Recreation Area property purchase (for access) and Lowe's grant for a playground. Planning Director will check on this.

Commissioners discussed the status of the ORV/ATV issue and asked about the proper procedures for the item to be placed before the commission. The Planning Director said that she encouraged Mr. Harry to create a detailed plan for consideration and public input. Commissioners said they could envision the interest group pursuing a survey of adjacent landowners (although it is important the language should be clear and unbiased), and providing information on what surrounding Townships and Counties are doing on this issue. Commissioners were unclear about whether the interest group was asking them to opt into the County ordinance or to create a separate ordinance. There were questions about where and on what kinds of roads this activity is appropriate. Mr. Harry's group is just getting organized now but he plans to revisit the issue with the Commission.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC HEARINGS

None

V. PUBLIC COMMENT

Mark Maki, 370 Karen Road, spoke about concerns regarding the sign ordinance amendments. He feels it is difficult to follow the changes. He is concerned that it seems the amendments allow greater sign area (about 2.5 times larger in commercial districts and 4 times larger in industrial districts). He wants an explanation for the maximum sign area proposed because he thinks it's a drastic change from what is currently permitted. He wonders what happened to the provision that said no sign could be larger than 100 square feet. What is the maximum sign area permitted for one sign? He thinks some signs could be larger, but this may be too much.

Cheryl Sherony, 1781 M-28 East, is troubled by various conflicts with her neighbor including free ranging dogs, no trespassing signs placed on posts and trees visible from her windows, and regulations regarding fences. She doesn't want the neighbors to plant evergreen trees to obstruct her property and her view of the lake, so she wants more information on the vegetative fences provisions of the ordinance relating to height limit and view obstruction. She

wants a proposed amendment so that “No Trespassing” signs can’t be posted in view of residential windows. She thinks regulations should address the location, height, and size of “No Trespassing” signs. She would like her concerns addressed in writing. Woodward discussed current and proposed sign standards for “No Trespassing” signs and the requirements of the Recreational Trespass Act.

Mark Maki, 370 Karen Road, spoke again, and addressed the size of “No Trespassing” signs. He said they are not usually larger than 2 square feet, so he is concerned about the proposed amendment allowing a maximum area of 6 square feet for Security and Warning Signs.

Debra Mulcahey, 633 Lakewood Lane, pointed out that the regulations of the Recreational Trespass Act are not applicable in residential areas. Of greater concern to her is the Barbieri property near the Welcome Center that has posted large yellow placards (4’ x 6’) saying “police enforced”, along with other 18” x 2.5’ signs trying to keep people off the public beach which is not allowed per a Michigan Supreme Court decision. She says that is also a violation of the zoning ordinance because there are signs everywhere. Mulcahey is mainly concerned with the changes to the Home Occupations amendment. To stay abreast of the matter, she has had conversations with zoning staff, citizens, County planners, and Planning Commission members. She cannot comment on the most recent change because there was no link on the website. She feels the proposed language will bring about a devaluation of her property and maybe constitute a “Taking”. She asked, “if we allow commercial business activity in residential areas, why don’t we allow residential activity in business areas?” She is opposed to the proposed changes because she thinks they are contradictory, open-ended, and unenforceable. She thinks the 300 foot notification (per State requirement) fails to let people know what’s going on because of the 150 foot lot sizes in the area. She thinks the notification area should be increased to allow more property owners to know what is going on. She claimed that the Marquette County Planning Commission said the proposed language needed to come back to them for review because of the notice issues (**note that Marquette County Planning Commission approved the proposed language pending the need for a public hearing on revised language*). She thinks the Planning Commission should review the December 2008 Circuit Court decision involving Chocolay Township, and also look at Anderson’s American Law of Zoning regarding commercial uses in residential areas. She wants to know why the Home Occupation amendment is a priority when the blight and junk car issues are more important.

Mark Maki, 370 Karen Road, spoke again and said he wants to see the application for text amendment for the home occupation and sign amendments. He thinks the process would be more precise if it started with an application detailing what is proposed to change and why.

VI. PRESENTATIONS

None

VII. OLD BUSINESS

A. Consideration - Proposed Text Amendment #34-12-04 (Home Occupations)

Staff provided a memo detailing the progress of the proposed amendment. The packet included the current version of the amendment with changes made at the June 4 meeting, the March 5 version which went to the County Planning Commission for review, and the current ordinance standards. In May, the County Planning Commission voted unanimously in support of the proposed text amendment as proposed by the Chocolay Township Planning Commission on March 5, 2012, pending a public hearing on the proposed language. They requested the opportunity to review the language again if it is further amended.

There was a discussion on the proposed amendment. Sikkema suggested there is a need to use consistent terms in the Ordinance, so changes were made in referring to “dwellings” and “accessory buildings”. Discussion ensued to clarify the size of home occupations.

Smith was concerned that the enforcement provisions of the Zoning Ordinance need to be clear to ensure due process. He said Marquette Township has a very thorough process. Woodward said the Ordinance needs a more thorough administrative section. Sikkema said it's important to ensure consistency in enforcement. Staff was asked to review enforcement provisions of other local jurisdictions and suggest ideas so the Planning Commission can determine whether an amendment to the administrative section of the Ordinance is needed.

Sikkema wants to clarify that a conditional use permit is permitted only after review by the Planning Commission and issuance of the permit by the Township Board (*note that the approval process as detailed in the definition of Conditional Use on page 11 is not the same as the approval process detailed in Section 16 page 111). He doesn't like to restate provisions in the Ordinance, but he thinks the operational impacts are what most people are concerned with, and he wants people to understand the vision behind the conditional use approval provisions in Section 16. Meister suggested a revision which is a clarification that the conditional use approval process includes a public hearing.

The members feel that the home occupation provisions are written well and will protect the public interest, but they noted that no Ordinance will prevent people from violating its provisions. They feel it is not fair to

allow repairs on a lawn mower at a residence, but not an alternator – the operational impacts are what are important, and this amendment is written to address this. A problem with one resident's operations should not prejudice against all similar operations. It is an enforcement issue. Meister pointed out that home occupations are not new, they have been allowed all along. The intent is to allow people to register with no cost on things that are low impact.

Motion to hold a public hearing on the revised language of the proposed home occupation amendment #34-12-04 at the next meeting: Tabor
Second by: Heinzelman

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

Action Items: Staff will review enforcement provisions of other local jurisdictions and suggest ideas for more clear guidelines and procedures so the Planning Commission can determine if another amendment is needed.

B. Consideration - Proposed Text Amendment #34-12-01 (Signs)

The meeting packet included the Planning Commission's revisions of the ordinance language from the June 4 meeting, Planning Director's suggested revisions for consideration, and reference materials.

Woodward's suggested changes were noted and discussed as follows.

The permitting of off-premise signs was discussed, including whether to keep the current language permitting off-premise signs in the Commercial district, provided that the off-premise sign area is counted toward the total sign area permitted on the premises. The Highway Advertising Act and other legal issues involving billboards that become nonconforming due to regulation were considered. It was concluded that the intent is to permit no new billboards other than those already approved by MDOT. So billboards should be prohibited except for those with current permits at the time of the amendment. Provisions will have to allow for the off-premise tourist directional signs as permitted elsewhere in the Ordinance.

There was considerable discussion on Church or School Changeable Information signs and electronic message signs in residential neighborhoods. It was supposed that it would be undesirable to have signs that frequently change in these areas. It was decided that manual changeable copy signs for schools/churches would not require a permit provided they met the requirements, but electronic changeable copy signs would require a permit.

The Planning Commission also discussed signage for Home Occupations and other primary permitted uses such as home day care. Two options that were considered include posting the business name on the residential name/address signs that are exempt from permits, and permitting wall signs on residences. It was concluded that home occupation signs should not be permitted so as to protect the residential character of the neighborhood against the proliferation of signs.

The Planning Commission discussed Security and Warning sign standards in relation to public comment.

The Planning Commission noted a clarification of the standards for banners to limit the total area for all banners on a premise. The size limit for portable signs was discussed.

Signs permitted in the AF district (including electronic message signs) were discussed, and in particular, those for farms.

The Planning Commission felt that it would be helpful to have a joint meeting with the Township Board on the Home Occupation and Sign amendments to explain the discussion, history, and rationale behind the chosen provisions. This could be either a special meeting or agenda item at a Board meeting.

Motion to end the discussion and continue on page 13 of the document at the next meeting by: Smith

Second by: Meister

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

Action Items: Staff will document the discussed changes and prepare the document for (hopefully) final revisions at the next meeting.

VIII. NEW BUSINESS

Postponed at this time. There was a recommendation that staff propose an amendment to address the biggest problems in the zoning ordinance (things that currently create problems). A zoning ordinance re-draft may be upcoming.

IX. PUBLIC COMMENT

None

X. COMMISSIONER'S COMMENT

The Planning Commission needs to develop a list of priority action to address. Board input would be helpful. Smith wants an update of the Lowe's playground grant application. Responsibility for mowing the US-41/M-28 right-of-way was discussed due to aesthetic concerns about the lack of mowing.

XIII. ADJOURNMENT

Smith adjourned the meeting at 10:44 p.m.

Submitted by:

Planning Commission Secretary
Andy Sikkema

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, August 6, 2012

I. MEETING CALLED TO ORDER BY: Kendell Milton at 7:30 p.m.

ROLL CALL

Members Present: Mr. Kendell Milton (Chair), Mr. Andy Smith (Vice Chair), Mr. Andy Sikkema (Secretary), Mr. Gary Heinzelman, Mr. Tom Mahaney, Mr. Eric Meister

Members Absent: Dr. Ken Tabor

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES

A. July 2, 2012

Motion to approve the minutes as written by: Heinzelman

Second by: Sikkema

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion to approve the agenda as written by: Sikkema

Second by: Heinzelman

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC HEARINGS

None

V. PUBLIC COMMENT

*Note, the tape recorder was not started until partway through the public comment. A portion of the following comments are transcribed from notes submitted electronically by Deborah Mulcahey upon Woodward's request.

Deborah Mulcahey, 633 Lakewood Lane, presented comments in regard to the proposed Home Occupation text amendment. Her comments of July 2, 2012, to this Board stand. Her comments this evening are based on her review of the draft proposed text to amend the ordinance pertaining to home occupations as posted on the Chocolay Township website, and as sent to her late Friday afternoon by Woodward. They do not address the administrative changes proposed in the meeting packet.

Her comments relate to promoting public health, safety, and welfare. Mulcahey feels the majority of the comments she has shared with this Board since February 2012 have fallen on deaf ears. Per Andy Smith's comments from the

previous meeting, she is glad to see that the Board finally appears to understand the need for consistent administrative provisions and enforcement.

She does not feel that enforcement should involve inspections via notices to the property owner. Inspection should be accomplished by a “knock and talk” method employed pursuant to the *Administrative Procedures Act*. Also, the Planning Commission did not address the issue of improved notice to the community through an increase in the required notification distance, which currently requires notification of property owners and occupants within 300’ of the proposed home occupation.

She does not agree that the recent alteration in size provisions represents a slight revision. She gave an example of a single story home of 1,200 square feet with a 24’ x 24’ garage of 576 square feet. The existing provisions limit the home occupation to 25% of the gross area of any one story, structure, or dwelling used for the home occupation. Per the current provisions, a home occupation located in a garage of 576 square feet would be permitted a maximum size of 144 square feet. Last month’s revision reads, “A home occupation shall not occupy more than 25% of the floor area of the dwelling, or 25% of the total floor area of all dwellings and accessory buildings on the parcel”. So a home occupation in the garage could now be 25% of 1,776 square feet, or 444 square feet. This is a 208% increase over present standards. This is especially a concern in that the current ordinance does not prohibit property owners from adding multiple accessory structures to their parcel. In some districts, the only restriction is that the perimeter of each accessory building cannot exceed the perimeter of the principal structure, and height is limited. This would enable a property owner to add additional accessory buildings to accommodate additional square footage for the home occupation.

Mulcahey feels it is good that the planning commission has included operational impacts dealing with hazardous substances and materials since the majority of the residents in Chocolay Township use ground water for their drinking water. But she feels the proposed home occupation provisions are actually contrary to this goal by allowing “any type of repair, assembly, or any other work related to motor vehicles and their parts” by conditional use permit involving a public hearing. This work requires the use of hazardous substances in greater quantities than a typical residence. The storage and disposal of the products associated with such businesses necessitates compliance with federal statutes and rules as administered by the Environmental Protection Agency. These materials could include antifreeze, mineral spirits, de-greasers, and carburetor or brake cleaners. It is one thing for a residential property owner to have these waste products in their home and another for businesses to be storing and disposing of these waste products within our residential community. Mulcahey says that according to EPA investigator Hare, any property where a business is being conducted that has a floor drain will now be regulated as an

underground disposal injection facility. She feels that a classification of underground disposal injection sites throughout Chocolay Township would have a negative impact on the entire community.

Also, the State of Michigan regulates mechanics and facilities per the *Motor Vehicle Service and Repair Act 300 of 1974* that requires that any licensed mechanic repair vehicles in a licensed regulated facility. It appears that the Planning Commission is suggesting that the citizens of Chocolay Township who want to work on motor vehicles either do so in violation of the State of Michigan statutes or be unlicensed mechanics, which is also a violation of State law.

Finally, to simplify the process for all who might be involved, including Chocolay Township staff, a home owner, or a neighbor, Chocolay Township should require a license and not a permit, and have home occupations apply prior to commencing the business. Mulcahey says the permitting process requires proceeding according to the *Administrative Procedures Act*. A license can be given and taken away, it's not the same process as getting a driver's license, it's much simpler than that. They should get a license before they open the business, instead of asking forgiveness later.

There were no further comments so public comment was closed.

VI. PRESENTATIONS

A. Presentation – The Commission reviewed the draft presentation for the joint August 22 Township Board and Planning Commission meeting on the proposed home occupation and sign amendments. Commissioners agreed a presentation would be helpful. They submitted comments, additions, and changes as follows.

Sikkema wants to add references to the national standards that were used as a basis for the proposed provisions. Mahaney asked if comments were obtained from the business owners as noted in the timeline. Meister noted some comments were received from Holiday's corporate office. The previous planner, Thum, was thought to have discussed the provisions with CABA and Cook Sign. Woodward will search through the files for previously submitted comments. There have been no recent comments received. A public educational meeting may be needed before the public hearing. Education may also be needed for new members of the Township Board if the amendments are approved after November.

Sikkema noted that the Board of Trustees was also involved in initiating the text amendment for signs, noting concerns over nonconforming signs and lack of enforcement (Holiday EMS, Lankeneland, NMU Golf Course). Particularly, they discussed signs that seemed to be nonconforming to current standards, perhaps indicating difficulty in interpretation. Also there were changes in the sign industry that were not addressed by current

standards (projecting signs, electronic message signs).

Challenges with the current sign provisions were discussed, including difficulty in calculating permitted sign area based on property frontage which is not always easily determined. This also does not relate permitted area to the scale of the building, and is thus more arbitrary and sometimes not equitable. Smith noted that several signs were approved through the variance process (Family Dollar, Shaw's, Citgo, McDonalds), and therefore noncompliant with the current ordinance. He felt that a business should not have to go through the variance process to get a sign that was reasonable. Meister agreed that the standards should reflect what is reasonable so that a variance is not necessary. Mahaney and Sikkema said that standards should be based on scientific research, and should reference national standards and reflect common sense.

Woodward noted current provisions that are hard to administer or to enforce, such as those for multi-tenant buildings, vehicle signs, political signs, and interior signs. She also noted concerns that billboard standards are not in accord with State standards, and nonconforming standards may lead to court challenges. Current nonconforming standards also encourage lack of maintenance to retain nonconforming status. The current standards also do not address electronic message signs, projecting signs, and other customary sign types. There is a lack of detail in applicability, permitting, maintenance, appeals, and enforcement provisions.

In addressing goals for the new provisions, the commission noted they should be organized, more clear, and user-friendly. To make the standards more clear, the Planning Commission decided to base them on national standards that are backed by research to support more informed and less arbitrary decisions. Improvements were also based on input from sign companies who identified difficulties with current ordinance provisions (engineering requirements) and provided guidance in the national standards. Sikkema hopes to create a more professional sign appearance with modernized and up-to-date standards. It was noted that new standards should improve corridor safety by promoting signs of the appropriate size for motorist readability, clearly denoting driveways for safety in locating businesses, and permitting less distractions such as flashing or animated signs. One example is the combined sign for the shopping center across the street, which is larger than current ordinance standards would permit but still is not readable by motorists at that highway speed. The commission wants the ordinance to also reflect what is enforceable.

The new standards reflect changes to sign measurement and permitted area. Current standards allocate a total sign area (for all sign types) based on length of property frontage. The new proposed sign standards separately allocate area for freestanding signs based on highway speed and

setback, and area for wall signs based on façade area and setback. Woodward presented a revised chart for freestanding sign area, which simplifies the former chart based on national standards by consolidating some speed zones (to reflect conditions in Chocoyocoma) and reducing the permitted area. It was clarified that applicants would not be allowed to transfer unused sign area from the permitted freestanding sign calculation to permitted wall sign area. These allocations are separate. Woodward also suggested an increase in sign area for freestanding signs that are setback more than 40 feet. The Commission noted that setback measurement should be from the edge of the travel lane as marked, not the road edge (edge of the pavement). They want it noted in the presentation that the proposed sign area is less than the suggested national standard. They added a provision to limit the additional sign area granted for freestanding signs with greater setbacks to a maximum increase of 40%.

Smith noted corrections to the sign inventory findings based on his physical measurements. He measured Citgo at approximately 100 sq ft (5 ft x 20 ft), Shaw's 135 sq ft (7.5 ft x 18 ft), Family Dollar 120 sq ft (10 ft x 12 ft), Mr. Movies 120 sq ft with the roof, Holiday 117 sq ft (75 ft from the white line), and Marquette Meats 144 sq ft (8 ft x 18 ft – 90 ft setback from the white line). Almost every existing monument sign was found to be above 12 ft in height which is the limit in the current sign ordinance.

Woodward presented three business case studies comparing permitted sign area per both current and proposed standards. Under the current ordinance, Family Dollar would be permitted a total sign area (all sign types) of 263 sq ft plus 12 ft additional wall sign area per the enlargement factor, for a total sign allowance of 275 sq ft. Per the new provisions, they would be permitted a freestanding sign of 120 sq ft, and walls signs of 210 sq ft, or a total of 330 sq ft. This is an increase of 20% over current standards.

Citgo would be permitted a total sign area (all sign types) of 124 sq ft, which they currently exceed by at least 110 sq ft (total sign area recorded as 234 sq ft). Per the new provisions, they would be allocated 120 sq ft for the freestanding sign and 151 sq ft for the wall sign, making both existing signs conforming. This would be a total permitted area of 271 sq ft, compared to their current approved nonconforming allocation of 234 sq ft, an increase of 16%.

Under the current ordinance, Snyder's would be permitted a total sign area (all sign types) of 150 sq ft plus an enlargement factor of 30% or 22.5 sq ft for the wall sign, for a total sign allowance of 172.5 sq ft. Per the new provisions, they would be permitted a freestanding sign of 120 sq ft, and wall signs of 339 sq ft, or a total of 459 sq ft. This is an increase of 166% over current standards.

Smith estimated that at least 80% of all Township signs would be nonconforming to current standards in some way.

Meister wondered if there should be a maximum limit on the area of wall signs. We could reduce potential sign area by increasing the setback range for the first category of wall signs (15% of façade area), for example, “zero to 100 ft” could be changed to “zero to 200 ft”, meaning more signs would be allocated at the 15% level. The purpose of this method is that the sign area be in scale with the building. The maximum proposed allocation is 25% of the area of the building façade for buildings setback over 301 feet. The sign area will also be limited by economic factors (what they can afford to spend on signage).

The presentation also highlights temporary signs that are meant to accommodate seasonal promotions. The new standards would not require temporary signs to be included in total permitted sign area, but a maximum size is stated. Woodward noted the Supervisor’s concern that if permits are not required for temporary signs, the Zoning Administrator would not know how long the signs were on display (enforcement difficulty). The commission did not feel it was necessary for businesses to take the time to get a permit for a temporary promotion, they feel this could be on the honor system. Also promotions would be over and signs removed in many cases before enforcement action would make a difference. The need for enforcement would become evident when the sign topic becomes unseasonable. The goal is to address temporary banners that are displayed too long and become deteriorated. The goal is not to generate additional income for the Township.

Woodward added a provision to electronic message signs so that the sign change must be accomplished in one second or less to avoid animation effects. Sikkema wondered if we used national standards for the brightness, and Woodward answered “yes”.

Woodward explained the provisions for nonconforming signs. Smith noted that in a previous draft, all nonconforming signs had to be removed with initiation of the site plan review process. This is a trigger in the newly proposed provisions.

The Commission also reviewed the presentation for Home Occupation revisions. Sikkema said the project was initiated because the lady wanting to make potholders in her home could not afford the \$250 home occupation fee, and the Planning Commission wanted to make the process less costly and time consuming for home businesses with minor impacts. There was a text amendment application for home occupations detailing the reason for the proposed change. The fee is meant to mitigate the costs of the public process.

The Commission wanted to be forwarded a copy of Deborah Mulcahey's comments.

VII. OLD BUSINESS

A. Consideration – Proposed Text Amendment #34-12-01 Signs

The meeting packet included a memo detailing discussion items, complete up-to-date draft provisions, some comparison tables of proposed sign area chart changes, and current sign provisions.

New provisions include measurement standards for illuminance. It was noted the definition of "nit" might need to be removed if we are using only footcandles. Meister asked if the Holiday sign would pass the proposed footcandle standard. Woodward said she couldn't determine that without either testing or being provided with the appropriate information. Woodward noted that she changed the standard to be based on footcandles because the nit gun was much more expensive than a footcandle meter and less readily available. Sikkema said that MDOT has a footcandle meter we might be able to borrow. Woodward based the proposed illuminance standards on a study report to the International Sign Association (ISA) by the Illuminating Engineering Society of North America (IESNA). This study provides formulas relating sign luminance (as measured by Nits or Candelas), sign area, viewer distance, and illuminance (as measured by footcandles) produced at a viewer's eyes. The standards were also in agreement with a publication by the ISA called "Electronic Message Display Brightness Guide". The ISA commissioned Dr. Ian Lewin of Lighting Sciences, Inc. to develop brightness criteria for on-premise electronic displays, and he based his recommendations on the IESNA's well-established standards pertaining to light trespass, IES Publication TM-11-00. The suggested standard controls the level of illuminance over ambient light level (programmed to vary according to ambient light levels). The current ordinance does not have illuminance or luminance standards for electronic message signs. Woodward picked a level consistent with the lighting zone chosen by the former Planning Director Jennifer Thum. These standards are proposed to apply only to electronic message signs. Other sign illumination is designed to be controlled by shielded fixtures, lighting angle, and minimal wattage. Bright colored lighting would be prohibited on all signs except as regulated as part of an electronic message sign. Smith will get Holiday's input on their current sign brightness levels and how this ordinance would impact their current practices. Woodward clarified that canopy lights would be controlled by the dark sky provisions. Woodward said she will send the provisions to Cook Sign, the attorney, and the County for input.

Draft page 9, "Church or School Manual Changeable Copy Signs",

Woodward noted the Highway Advertising Act's standards permitting new off-premise signs for service clubs and nonprofits provided the signs do not exceed 8 square feet. Page 11 has a note that off-premise signs are prohibited except those lawfully erected per the Highway Advertising Act or other sections of this Ordinance. Sikkema noted that MDOT will permit new billboards in the future, because applicants will either buy one from someone else or the legislature may uncap the limitation. The commission decided to ban any new off-premise signs with the following exceptions:

1. New off-premise signs falling under the exemption for service clubs and religious organizations as permitted by the Highway Advertising Act of 1972; and
2. Those off-premise signs lawfully erected and maintained under the Highway Advertising Act at the time of the adoption of this provision (date); and
3. Off-premise signs as otherwise permitted by this Ordinance.

Abandoned signs are also prohibited. Page 14, Meister had a question about municipal properties signs. The recreation park sign provision is still relevant to private parks such as Lankeneland, but the heading should delete mention of signs permitted in the "Municipal Properties District" because they are covered by the exemption for municipal signs. Sikkema reviewed the definition of "Park" in the Ordinance, and doesn't think it is consistent with the one he worked on and thought was approved. He thinks this is the old definition that was amended. Woodward said she will research this (2009). Sikkema said typically people think of parks as being publicly controlled. Lankeneland was approved as a park by conditional use permit, and thus they were permitted a sign 60 sq ft in area, consistent with proposed sign provisions (H.1.d). Since parks are listed as a conditional use in the AF district (and H.1.d applies), we should eliminate provision H.2.a, and move H.2.b up to H.1.e. The Lankeneland sign was permitted an area over 60 sq ft initially due to the enlargement factor for setback. This sign might possibly be made nonconforming with the new provisions for the AF district, but the sign would be able to be maintained subject to the nonconforming provisions. Woodward will research the text amendment for parks and Lankeneland's conditional use permit.

The commission discussed signs for the residential districts and made no changes to what was proposed. Smith wanted to know the area of the sign for the mobile home park on Silver Creek and for Ewing Pines Subdivision, because they are nice and appropriate signs. Woodward said she will measure them as a reference point. The current ordinance permits an area of 20 sq ft, and the commission debated whether this size was appropriate going forward. There was a question about whether the Vista View sign was nonconforming (too large).

The commission reiterated the proposed changes to sign area calculations for freestanding signs as discussed during the presentation (maximum sign area increase in relation to setback is not to exceed 40%). There was a note that the signs could get large if you don't count the structural supports and base in sign area. Woodward noted she needed a definition for travel lane (defined as the white line on the edge of the road). Signs for shopping centers and properties with multiple entrances were discussed for clarification. "Shopping Center" may need to be defined as a multi-tenant property.

The commission discussed the provisions for wall signs. It was noted that if the building fronts two roads, they would be permitted wall sign area for each façade.

Meister had a question about the need to limit the distance a sign can project over a sidewalk or walkway. This is more applicable in a downtown situation. It was decided to leave the provision unchanged.

It was clarified that canopy signs as defined in the amendment are regulated separately from gas station canopy signs, and are limited to a maximum area which is counted toward the total permitted area for wall signs.

Woodward recommended not including luminance standards for all sign types because of the enforcement difficulty. Sikkema prefers regulation of electronic message signs by luminance or nits, because this is related to actual sign brightness, not perceived brightness. He suggests the applicant be required to provide the information on the brightness level which is related to safety (and we have to accept their provided information). Smith noted Holiday had their sign brightness level measured in Nits. Smith suggested we ask Holiday and Cook Sign about their opinion on luminance vs illuminance standards before the joint meeting. Woodward noted you can convert footcandle measurements to candelas/nits per a formula in the referenced study.

No changes were made to the proposed nonconforming standards that are based on the model sign provisions. This concluded discussion of the proposed sign amendment.

Action Items:

Woodward will solicit the comments on illuminance vs luminance from the suggested parties, will research the amendment for parks and the Lankenland conditional use permit, will measure the referenced signs, and make the proposed changes to the sign amendment.

B. Consideration - Proposed Text Amendment #34-12-04 Home Occupations

The packet included the current and proposed home occupation provisions.

There was a discussion on the proposed amendment. The Commission discussed the proposed change in permitted size for a home occupation. It was initially 25% of the area of the dwelling, but was then changed to permit 25% of the dwelling or 25% of the area of all dwellings and accessory buildings. With the clarification, some commissioners were concerned that total permitted area for home occupations could become excessive. In proposing the change, Sikkema had wanted to accommodate some home occupations that require space for bulky items or tools, such as cabinet makers or potters. However, this could be a concern when multiple accessory structures are permitted. Mahaney was concerned about protecting the character of residential areas, and keeping the size to a minimum. Others were more concerned with operational impacts and not with the size, especially when it's all contained indoors. But they didn't want to encourage people to build extra buildings to accommodate a business. The purpose is not to allow structures that are solely for a business use and not for residential use. Dick Arnold interjected comments about keeping residential areas in character and having businesses in the commercial areas. He noted that planers are very noisy, for example, and would disturb residents. He also felt that the conditional use designation was essential to permit public input. Meister countered that the noise impacts are covered under the operational impact provisions. He doesn't want to keep someone from making a living out of their home if they aren't bothering anyone. He also noted that the Township has permitted home occupations for years, and this is not a new idea. The Commission decided that **all** home occupations on a parcel shall not occupy more than 25% of the area of **any one structure**. They discussed potential issues with enforcement. The applicant would state in their application how much space would be dedicated to the home occupation, but there may be no follow-up inspection to ensure compliance unless there was a complaint, or it was a home occupation approved through a conditional use permit. Then the Zoning Administrator could perform periodic inspection as specified in the proposed amendment. Sikkema noted that if you clamp down enforcement too much, people will just do the home occupation without telling you or going through the process to get a permit. Some people will be using the same space in their home that they use for everyday living, such as their kitchen. The goal is to make it so people do register by keeping the provisions to what is reasonable and fair. These provisions will at least make it hard for the extreme cases that could have occupational impacts or change the character of the

neighborhood.

The commissioners discussed the notification distance mentioned by Mulcahey. Heinzelman suggested that an increase in the notification distance would be reasonable considering the size of the properties in the Township. Sikkema noted that this provision doesn't limit the ability for anyone to give comment, it just changes who gets notified directly. Woodward noted it would increase the number of letters that are sent out. Sikkema noted this had been discussed before, but never changed above the minimum required. Smith thought the County had modified their requirements for notice of rezoning. The commissioners felt that a text amendment for notification requirements would require a separate application and review/approval process.

Motion to submit an application for a text amendment to increase the notification distance for public hearings (as contained in Section 1.6):

Meister

Second by: Mahaney

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

The commissioners then discussed licensing vs permitting. Sikkema noted that people cannot suppose that the granting of a zoning compliance permit exempts them from getting other required permits or licenses that are outside the scope of land use regulation. Woodward noted that per Section 1.5 of the zoning ordinance, "Whenever regulations or restrictions imposed by this Ordinance are either more or less restrictive than regulations or restrictions imposed by any governmental authority through legislation, rule, or regulation, the regulations, rules, or restrictions which are more restrictive or which impose higher standards or requirements shall govern. Regardless of any other provision of this Ordinance, no land shall be used and no structure erected or maintained in violation of any state or federal pollution control or environmental protection law or regulation." This was felt to settle this question.

This concludes discussion of the home occupation text amendment.

Action Items: Staff will complete the text amendment application per the motion above. Staff will make the discussed changes to the home occupation amendment to bring to the joint meeting on August 22. The above referenced Section 1.5 will be noted in the presentation.

VIII. NEW BUSINESS

- A. Consideration – The commission considered Woodward's draft of more comprehensive and enforceable administrative provisions. It is her opinion we could greatly improve administrative provisions in the zoning ordinance. Specially noted provisions relating to conditional uses include

8.2.B (type of permits), 8.3.B.3 (submission requirements), 8.4.B (notice procedures), 8.5.E (Tier 2 Review), 8.7.I (conditional and special use permit details), and 8.11 (violations and penalties). She felt there is not much of a controversial nature in administrative provisions that would delay adoption.

Smith related his experience with clear and fair provisions in Marquette Township. Sikkema wondered about the extent of planned revisions, and whether an entire ordinance rewrite is needed even though the ordinance was rewritten 5 years ago. He is concerned about their other commitments and priorities and the length of the meetings. Meister agreed they can't do everything at once, and they need to proceed in a step-by-step manner and finish each thing before adding more things. Sikkema noted that no one seems to like the ordinance they have which has pieced changes. He said it is not common to rewrite ordinances one piece at a time. Woodward noted her ability and experience in writing a complete, high-quality ordinance. Sikkema noted that if Woodward spends time writing the ordinance, then enforcement would suffer, and there are complaints about enforcement. Sikkema noted that if they want to rewrite the Ordinance, then the Township may want to go through the process of hiring someone. The commission wants an update on complaints. Woodward noted that this information is included in the monthly Board updates, and she will transmit it to the Planning Commission. She noted that enforcement is not being neglected. Sikkema noted they are working like crazy but not getting anything complete. Woodward noted this is not the norm to spend this much time on an amendment, and less time would be spent on enforcement if the ordinance was written more clearly and comprehensively. Smith wants to have one agenda item per meeting if possible, because he thinks that's one reason the sign amendment has taken so long. Sikkema wants consistency in the ordinance changes. He feels this is basically a 1977 Ordinance that has been changed in a piecemeal manner and it may make more sense to start over with a new ordinance. Woodward noted all the work on sign provisions would not be wasted because the provisions would be worked into a new ordinance. Sikkema noted that if Woodward was directed to write a new ordinance, then she would need assistance with other duties, or alternately, someone could be chosen to write a new ordinance under her direction.

XIII. ADJOURNMENT

Smith adjourned the meeting at 11:15 p.m.

Submitted by:

Planning Commission Secretary
Andy Sikkema

August 22, 2012

A Special meeting of the Chocolay Township Board and Chocolay Township Planning Commission was held on Wednesday, August 22, 2012 at the Chocolay Township Office, 5010 U S. 41 South, Marquette, MI. Township Clerk Engle called the Township Board meeting to order at 7:00 p.m.

PLEDGE OF ALLEGIANCE

ROLL CALL

TOWNSHIP BOARD

PRESENT: John Greenberg, Max Engle, Mark Maki, Susan Carlson, John Trudeau, Ken Tabor.

ABSENT: Greg Seppanen.

PLANNING COMMISSION

PRESENT: Kendell Milton, Andy Smith, Andy Sikkema, Eric Meister, Tom Mahaney, Ken Tabor.

ABSENT: Gary Heinzelman.

STAFF PRESENT: Steve Lawry, Kelly Drake Woodward.

Planning Commission Chair Milton called the Planning Commission meeting to order at 7:01 p.m.

ELECTION OF CHAIR

Maki moved Greenburg seconded to elect Engle as Chair for the meeting.

AYES: 6

NAYS: 0

MOTION CARRIED.

AGENDA ADDITIONS/DELETIONS.

Maki recommended two additions to the agenda, including accommodating Don Britton if he arrives, regarding the route of the Iron Ore Heritage Trail, and consolidating all agenda items dealing with Home Occupations and Signs separately. Woodward said she thought the Iron Ore Heritage Trail item was to be included on the next Planning Commission agenda, and agreed she would like to separate the two presentations to be shown in New Business along with their respective topic. The Agenda would first include public comment on non-agenda items, then (having no public hearings or unfinished business) proceed to New Business of Home Occupations Amendment (presentation, public comment, discussion) and then to New Business Sign Amendment (presentation, public comment, discussion), and then to Upcoming Priorities (public comment and discussion), and finally public comment and adjournment. Greenberg also proposed a one hour time limit on the Home Occupation discussion to leave time for other agenda items.

Maki moved Greenberg seconded to accept the agenda as corrected.

A. Home Occupation Amendment #34-12-04

Presentation

Woodward gave a brief presentation about the initiation and progress of the Home Occupation amendment, and a summary of the proposed regulatory change. The project began with a concern that the conditional use process and fee would discourage some home occupations, or at least the Township's knowledge of some home occupations. The goal is to create a two-tiered system that makes it easier for low impact home occupations. The current provisions require a conditional use permit for all home occupations, and prohibit the repair, assembly, or any other work related to motor vehicles and their parts among other uses. Only one home occupation is allowed per parcel. The proposed amendment has a two-tier system that permits some home occupations as permitted uses, and requires a conditional use permit for others (such as the repair, assembly, or any other work related to motor vehicles and their parts). The proposed provisions allow more than one home occupation per parcel (but still limit permitted area). The new provisions are supported by periodic inspections and ordinance provisions that elevate other governmental laws, rules, and restrictions.

Public Comment

Deborah Mulcahey of 633 Lakewood Lane said she has been dealing with the issue of home occupations since 2008 and feels the proposed ordinance does not protect the public or the public water supply. She cited the March 2012 attorney comments regarding the "substantial liberalization" of home occupation provisions that could weaken enforcement. She feels the permitting process is too cumbersome for revoking permits, and recommends a licensing process. She reiterated that she would like to see an increased notification distance for public hearings above the state requirement of 300 feet. Putting notices in the Mining Journal is expensive, and the \$250 fee may not cover it. She doesn't feel the Township should have to subsidize the cost of home occupations. She recommends considering use of e-mail and phone communications for notifications. She feels the proposed home occupation provisions do not conform with the Chocolay Township Master Plan, will result in larger home occupations, and do not adequately define operational impacts such as increased traffic. She agrees the prohibited use list is not all inclusive. She clarified that the Motor Vehicle Act does not repress work on motor vehicle parts. Mulcahey said that in 2009 there was a cease and desist order to shut down a transmission repair business in her neighborhood. She had previously mentioned the issue of hazardous materials (mineral spirits) to Woodward, who commented that anyone can have these types of materials in their home. Mulcahey says this is different than having the large quantity associated with businesses. She thinks it is short-sighted to expect other agencies to help with enforcement of hazardous substance because they don't have the necessary staff to enforce their regulations. She said Chocolay Township should not create issues for other regulatory agencies. She thinks Chocolay needs to make regulations easier to enforce. She doesn't want to live in a business district. Mulcahey claimed that in March Smith proposed the idea of permitting motor vehicle repair as a conditional use. She questioned Smith's motives in introducing ideas for the changes that she thinks are very different from what we have. She wants to protect well water and quality of life in the Township.

Maki asked Mulcahey for clarification on the traffic provision, and the court order for abatement in the case she mentioned. He also questioned her assertion that Smith proposed the home occupation amendment. She clarified that she meant that Smith proposed a provision to allow auto repair as a conditional use instead of a prohibited use at the March 2012 meeting. Mulcahey said that the court deemed the transmission repair operation a nuisance per se. Mulcahey and other residents claim that the transmission repair operation has not closed down, although there have been no deliveries in the last two months. They can't say what is going on in the garage. Mulcahey claims that Township staff feels their hands are tied in enforcement – the previous planner was not allowed on the property. She claims the Township can knock and ask to inspect the property pursuant to the court order. Police and the prosecutor say there is no probable cause to get a search warrant for a knock-and-talk inspection

such as Mulcahey has proposed. Mulcahey says you don't need the documentation that someone is doing something illegal if you have the documentation of the activity that is being brought to the place. She claims there has been continued violation since 2009, and the Township felt they had no proof. She said this has created enforcement difficulties for staff.

Lorraine Leidholdt of 196 Brookside Drive said there is an illegal operation on South Big Creek Road behind a fence, which is an auto repair home occupation run by a non-resident of Chocolay Township. She doesn't want to live in a business district, and thinks the ordinance changes will allow more businesses to crop up in neighborhoods.

Peter Ollila of 633 Lakewood Lane said that he discussed the rationale and enforceability of the Home Occupation provisions with Sikkema, who said that ordinance design and enforcement are two separate issues. Ollila feels you can't separate the two, and should not have regulations if you can't enforce them. He feels the scope of these provisions has been broadened beyond the original intent, and industrial equipment and chemicals do not belong in residential neighborhoods. He wants to scale the provisions back to allow only "mom and pop" operations and get away from uses with impacts that are not enforceable. He noted a circular argument in that the attorney claims that probable cause (criminal standard) must be shown for entry, but you can't get probable cause without entry.

Stephanie Gencheff of 597 Lakewood Lane and her husband are also opposed to the Home Occupation amendment. Public comment was closed for this item.

Discussion Home Occupation #34-12-04

Sikkema noted that this issue came up because a person wanted to report a home occupation, and felt they wouldn't have enough income from the home occupation to cover the required conditional use fee of \$250. It was deemed unnecessary to require a conditional use permit for all home occupations. There is also a concern that there are many unreported home occupations. It was thought that a simplified process would be less likely to deter notification of the existence of home occupations. The original intent of the amendment was to make home occupations a permitted use. During discussion, the commission addressed the issue of non-resident employees, and came back to the belief that home occupations should be for residents only. The commission questioned the relevance of the prohibitions against all types of vehicle repair because they do not all have the same impacts. The commission hoped to create a fair permitting system that discriminates based on operational impacts and not type of operation. For example, someone doing repairs on starters may not create any adverse impacts and could earn income in retirement. The commission questioned the logic behind allowing lawn mower repair but not repair of automobile parts. The conditional use process includes a possibility for additional special requirements based on anticipated impacts.

Sikkema explained that the planning commission felt it was not fair or logical to limit home occupations to 25% of the area of one story, because this would give an unfair advantage to someone living in a ranch home with the same square footage as a two-story home but a larger footprint. They also discussed home occupations in accessory buildings, and felt they did not want to encourage people to build accessory structures strictly for home occupations. After listening to public comment, the planning commission decided to limit the size of home occupations to 25% of the area of one structure.

Sikkema also noted that the Planning Commission didn't feel the limit of one home occupation per parcel was fair if both husband and wife want a home occupation, such as a home office and craft business. Meister noted that they strengthened enforcement with inspection provisions. Sikkema said that under the current provisions, there are probably very few conditional use permits and many unreported operations. They want to make it easier for residents to report legitimate home occupations, and easier for the Township to know what is going on.

Mahaney commented on the home occupation provisions of neighboring jurisdictions as provided in the packet. He said they are all different with few commonalities except the intent to allow home occupations without impacts. He said it's a complicated issue that has been discussed quite a bit, and there is not one specific way to do it. It's important to listen to public feedback.

Sikkema addressed the sensitivity to auto repair as a home occupation and said the concerns are probably well justified. But he didn't feel you should write an ordinance based on one case that wasn't enforced. The ordinance should be reasonable for the community, and then it should be enforced. You shouldn't fail to write an ordinance because you don't think it will be enforced.

Carlson asked Lawry about Marquette Township's provisions. He stated that he could only speak to the City of Marquette's provisions. The City revised their home occupation provisions a couple of times and are currently rewriting the entire zoning ordinance. He can't speak in detail because the project is being done by a consultant who has not provided the Planning Commission with anything for review. He does not think home occupations are a big issue in Marquette, and suspects the majority are not registered even though they are supposed to.

Maki commented on enforcement related to contractor yards that led to a previous amendment and the two-tiered system in the 2007 home occupation language. Under that system, a home occupation that met all the standards was permitted, and if not, then could only be permitted by conditional use permit. He feels the permits that were issued and termed out are not being put through the re-application process or being enforced. Some of the proposed language mirrors the 2007 language with the exception of the motor vehicle repair. He noted the original prohibitions came from uses with anticipated problems with impacts or enforcement. He said that residents don't usually want to speak out against their neighbor because it creates problems with relationships. He thinks we should structure a lower fee and go back to a two-tier system. Tabor noted that he thinks this is what the Planning Commission has proposed. Engle noted that the \$250 cost for the permit doesn't cover the entire cost of the conditional use process, so he doesn't think it is justified to lower the fee.

Greenberg gave an example of his own home business that consists of a desk, file cabinet, and telephone. He went to the ZBA for permission for a home occupation and sign, but it was simple back then. He likes the Planning Commission's thoughts and thinks the two-tier approach makes sense. He said the fee should be set so as not to discourage registration but to cover expenses. Sikkema said that currently all home occupations must go through the conditional use process and pay the \$250 fee, and there is no guarantee they will get their permit. The \$250 probably does not even cover the notification costs. This is why a change is needed.

Engle suggested we move the "Permitting and Approval" section from (D) to (B). He also noted a text change that "1) ALL PERSONS conducting a home occupation . . ." instead of "ANY PERSON conducting a home occupation". He suggested making C.5.b (any type of repair, assembly, etc) as a separate section C.6 labeled "Conditional Use". Item C.7 would then include "Prohibited Uses".

Maki wants to get rid of the provision in "Permitting and Approval" that encourages people to start a home occupation without having first gotten the relevant permit. He thinks they should not be able to come in 30 days after they start a home occupation for approval. They should get a Zoning Compliance Permit or Conditional Use Permit as appropriate and then start. Sikkema said that some people experiment with these activities before really committing to a home occupation. He doesn't want people to feel they are committing a violation. Maki noted there would be no penalty if people didn't come in for the permit first – they would just be informed they needed a permit.

Trudeau said that most people want to try something first before they get serious about a home business. Then if they get serious, they can get a permit. But they might register first. He said that you wouldn't even know that many home businesses are there and they don't have permits. Sikkema noted

that when the home occupation gets to the point that it creates operational impacts, it should be required to move to the commercial area, but this process would allow them to get a start first before making that commitment.

Greenberg asked if we could say that no permit is required for certain home occupations, and conditional use permits are required only for the ones with operational impacts? Trudeau asked if the proposed language will take care of all the uses that should be prohibited due to operational impacts. Sikkema said that if the neighborhood knows about the home occupation, then it is probably in violation of proposed operational impact standards. Maki wanted to know if there have been any conditional use permits granted in the last 10 years. Smith remembered a sawmill on Willow Road. Maki wondered why the change was made in 2008 to make all home occupations conditional uses. Carlson noted that the Governor is trying to eliminate licensing for barbers so they can do this from their home, and this should be considered. Meister noted that home occupations with operational impacts would not be granted the conditional use permit. Mulcahey disputed the effectiveness of depending on this approach.

Woodward proposed not mentioning specific uses since a list could never be all-inclusive, but clarifying levels of operational impacts as the basis for tiered approval. As an alternative, she proposed a language change that would broaden the definition of uses that could be considered through the conditional use process based on anticipated operational impacts. She suggested a Zoning Compliance Permit (currently \$25) for Tier 1 approval, and the Conditional Use Permit (currently \$250) for Tier 2 approval. She suggested that when operational impacts are questionable, the Planning Commission could determine the proper permit required. Milton said the Zoning Administrator should have the authority to determine the appropriate permit required. Sikkema suggested this needs to be more clear. Trudeau asked for clarification of whether Tier 1 would be a registration process or a Zoning Compliance Permit approval process?

Maki asked what would be the trigger for the second tier approval – for example, would there be different size requirements for Tier 1 and Tier 2 permits? Sikkema thought the conditions would be the same – he noted this question made things get complicated in earlier discussions. Mahaney noted the amendment currently lists the conditions as applicable to ALL home occupations. Sikkema discussed an example of someone creating a sawmill on 20 acres where there is noise but no real impacts because there are no nearby neighbors. Neighbor input would be taken in the public hearing for the conditional use. Smith and Maki wanted to know what kinds of home occupations have been approved under the current ordinance. Maki wants to include the conditional use standards from Section 16.1 in the Home Occupation section to make it clear that all those standards also have to be met for the conditional use to be approved. It was generally agreed that there may be other uses besides auto repair that could be approved through the conditional use process, so the language should reflect this. Woodward reiterated her opinion that it is problematic to try to list specific uses into one of three categories – permitted by right (administrative approval), conditional use permit (planning commission approval), or not permitted. It should not be determined by type of use, but by the operational impact. Sikkema asked if the Board wants to see the prohibition against all automobile repair as a home occupation?

Maki wants separate language for the two tiers. Smith said that if a home occupation couldn't meet all the required conditions, then they could try for approval through the conditional use permit process that would explore the actual operational impacts. In this case, Maki thinks there should be different conditions for the conditional use than the permitted use. Woodward said you can have specific conditions that are different for each tier, and conditional use provisions that apply only to the second tier. She reminded participants of former versions of the amendment that followed this method. Sikkema thinks this much detail in regulation is problematic, and thinks some decisions can be left to the discretion of the Planning Commission after public comment and within reason. Greenberg appreciates the Planning Commission and the job they do. He is concerned that the conditional use is approved by a public body that is not elected, since the Board does not have final approval. So he likes to see black and white provisions. Woodward thinks it is important to strengthen the inspection and administrative

provisions, and suggested that the more black and white the provisions can be, the more defensible they are.

Maki feels we should still deal with whether motor vehicle repair would be allowed in residential areas. He doesn't want to see this, but doesn't mind if someone works on parts (although it was noted that a transmission is a part). He reiterated that we shouldn't encourage problems between neighbors by depending on a discretionary process. Sikkema asked if full vehicle repair should be prohibited, with parts repair potentially permitted through the conditional use process. Smith believes that if the operational impacts had been enforced, then the previously mentioned auto parts repair facility wouldn't have been approved or would have been found in violation. Sikkema suggested that certain conditions such as size, location, and exterior appearance could be varied in the conditional use approval process while allowing no relaxation of operational impact provisions. However, it was noted that the noisy sawmill on the large acreage that wasn't bothering anyone would not have been approved under such a system.

There was agreement on the following:

- The Board doesn't necessarily want a ban on all auto repair uses, but they want to prohibit the repair of whole vehicles while allowing some flexibility for parts repair as long as there are no operational impacts.
- The Board would allow other conditional uses with some variance. For example, it might be appropriate to allow a sign, outdoor storage, additional space, etc. depending on the situation.

Then there was a question about whole tractor or boat repair? Sikkema said that's why the Planning Commission made vehicle repair a conditional use. As Mahaney said, when you get into planning for every possible scenario, you could spend a whole year on it.

Maki made a motion that the proposed home occupation amendment go back to a two-tier system similar to the 2007 language, retain current prohibited use language (3 items), require an administrative permit for Home Occupation 1 (meeting the conditions from 2007) and Conditional Use permit for other home occupations (Home Occupation 2), keep current size provisions, require a conditional use permit for a sign, and let the Board address the conditional use fees for home occupations. Support by Carlson. During discussion Trudeau said the motion was too confusing, and should be structured as a recommendation. Maki withdrew the motion, Carlson withdrew, and the above provisions were structured as a recommendation to the Planning Commission.

B. Sign Amendment #34-12-01

Presentation

Woodward gave a brief presentation about the initiation and progress of the Sign amendment, and a summary of the proposed regulatory change. In researching the minutes from meetings and other documents, it appeared the sign ordinance amendment began with a question regarding LED digital signs that staff was asked to research. Planning Commissioners said that the Board of Trustees were concerned about a number of nonconforming signs which might either indicate a lack of enforcement or difficulties with interpretation. Maki disputed the information about nonconforming signs and lack of enforcement (except with the Holiday Sign which the attorney said couldn't be enforced because of lack of ordinance clarity). Maki didn't remember any other problems with signs being mentioned in discussion. Others mentioned discussion on political signs, banners, temporary signs, Lankenland signs, etc.

Woodward outlined challenges including administrative difficulties, inequitable provisions, and lack of clarity. The Planning Commission was concerned that many signs were approved through a variance and are therefore nonconforming. The commission argues that standards should reflect what is

reasonable so that variances are not needed. Some current provisions are hard to enforce, or are in conflict with other regulations. The nonconforming policy needs to be updated to reflect recent case law that has determined that amortization or removal of nonconforming uses is not allowed in regulations adopted in accord with the Michigan Zoning Enabling Act. There are many omissions in the current provisions, which, if added, would provide clarity.

Goals for new standards include a user-friendly format, increased clarity, provisions to accommodate new sign technology, greater equity, and more defensibility supported by a reliance on model codes and national standards for guidance. Improved corridor safety achieved through appropriate sign size and less visual distraction was noted as a high priority.

Woodward explained the changes in sign area provisions. The current provisions prescribe a total sign allowance (all sign types) based on lot frontage length. The proposed standards have separate area allowances by sign type. Freestanding sign area is related to the speed of the adjoining roadway and the setback, therefore creating a more consistent standard with a relationship to public safety and motorist readability. Additional sign area is allowed for signs with greater setback, up to a maximum percent increase. The currently proposed freestanding sign area reflects a significant reduction from that recommended by the United States Sign Council studies. Wall sign area is related to building façade area, resulting in signs that are more in scale with the buildings. This method mirrors USSC standards.

Woodward presented findings from the sign inventory (area measurements compiled by Andy Smith). It was shown that several Township signs exceed current maximum sign area of 100 square feet. This information was disputed by Maki, as he thinks these signs would have been put up in violation if there were no variances.

Woodward presented three case studies for Family Dollar, Citgo, and Snyder's that compare allowed sign area per current vs. proposed standards, based on information on frontage length, setback, and façade area computed from Township records (retained site plan and permit records). Family Dollar is currently permitted about 275 sq ft with enlargement factor; proposed standards would permit a 120 sq ft freestanding sign and 210 sq ft wall sign for a total of 330 sq ft, or a 20% increase over current standards. Citgo is currently permitted 124 sq ft, but actually has 234 sq ft (exceeding current standards by at least 110 sq ft). Proposed standards would permit a 120 sq ft freestanding sign and 151 sq ft wall sign for a total of 271 sq ft, which is 16% over what they currently have, but would make the existing signs conforming. Snyder's is currently permitted 173 sq ft; proposed standards would permit a 120 sq ft freestanding sign and 339 sq ft wall sign for a total of 459 sq ft, which is 166% over current standards. Maki disputed these findings and computations, and doesn't believe that many signs are nonconforming. Woodward said the Township does not maintain an up-to-date list of nonconforming signs.

Current and proposed standards for temporary signs (specifically banner signs) and electronic message signs were presented. Currently temporary signs are authorized for not more than 2 months at a time with a permit, and are only allowed for public direction or events, with no other specifications. The proposed standards would permit temporary signs for 90 days without a permit to accommodate seasonal promotions. The area of temporary signs would not be counted toward total permitted area but there are size restrictions. Banner size is limited as a percent of the area of any one building façade, and by total square footage allowed per parcel. Electronic message signs are proposed to have a size limit of 40 sq ft, a static message that doesn't change more often than once in 20 seconds, and an auto adjust mechanism to regulate brightness levels in relation to ambient light conditions. Nonconforming standards were discussed, with Woodward noting recommended changes for abandonment and amortization per her research based on the Michigan Sign Guidebook.

Public Comment

Deborah Mulcahey, 633 Lakewood Lane, said that she wants to address the fence issue for those who live on Lake Superior. She thinks current provisions that designate the road side as the “front” for purposes of fence placement, and do not address the lake side as the “front” of the property, create problems for neighbors with widely varied setbacks. She can put any fence she wants between the Lake and her house (even on the dunes) but she can’t put any kind of fence she wants between her house and the road, even though, with the offset setbacks, her neighbors can have privacy fences extending along the property line nearer to the road than she can.

Regarding signs, Mulcahey wondered why the area of warning signs is being increased to six square feet, and why there are increases for residential sign area. She commented on provisions that she thinks favor political and real estate signs but make garage sale signs suspect. She wants the sign ordinance to be enforced on the Barbieri property adjacent to the Welcome Center. She says the property owner is unlawfully displaying 4’ x 6’ and 2’ x 3’ signs saying “private beach” and “no trespassing”, and is harassing people who walk on the beach. She says the Township was involved in removing illegal signs from the DNR property, but they need new language to control this because there is no prohibition against people walking on the beach in Michigan. She is concerned that the traveling public visiting the Welcome Center see these uninviting signs. She encourages the Planning Commission to keep sign regulation simple so people know what is allowed.

Public comment on signs was closed at 9:23 pm.

Discussion

Smith asked for clarification from Mulcahey on the fence issue. She gave a demonstration.

Maki appreciated having information presented with clarity, even though he disputes the facts. He said that the ZBA allows increases to sign area with no basis, citing the Moyle development as an example. He knows we need to change the LED signs, but he said that for 32 years when he administered the Ordinance there was no problem with signs. He thinks the signs in the Township that were approved under the previous ordinance look nice. He doesn’t hear people saying they need more signs. He agreed the effort started with LED signs, but then went on and on for three years – it gets crazy. He commented on Summer’s comments of a previous draft that mention County ordinances. He questioned the recent proposed decrease of freestanding sign area from what was formerly based on national standards (which he thought were too large). Meister said they reduced the numbers because they thought a reduction would be more appropriate for the Township.

Trudeau wants to make the Ordinance less subjective so the ZBA has more guidance (more objective criteria). He said the changes the planning commission has made are based on rational discussion.

Meister said that Maki had asked them to review the sign area numbers because he thought they were excessive, so they initiated a discussion and agreed to back off the numbers. Maki said that was good, but questioned whether the discussion shows up in the minutes. Woodward offered the minutes of the August 6 meeting that were written with more detail per Maki’s request. Smith said it was not arbitrary; it was all discussed in a good 3 year effort. Planning Commission members offered more information about the input and reasoning that are the basis for the provisions.

Maki is happy about the sign size reductions, but wants more reductions, although he objected to the ever-changing document. Sikkema said that’s the point of the joint meeting – to try to make adjustments based on Board input, but it’s been confusing to figure out what the Board wants to see and to determine how broad the consensus is across the entire Board. He said the Planning Commission has had very long discussions in their efforts to make standards more objective by basing them on national standards or reasoning based on what is applicable to the Township. Meister wants to learn

more about Board objections so it can be addressed. Smith noted Woodward's influence and efforts in getting rid of problems and making the amendment read better.

Maki questioned why the size limits were changed – he said it's not based on case studies that say we need bigger sizes. He doesn't want the purpose to be making existing signs (that may be violations) conforming. Greenberg asked what Maki wants to see.

Trudeau asked if the speed limits might change, affecting the provisions. Sikkema said it is not likely and it's maxed out at 55 mph anyway.

Maki again said he doesn't agree with all the facts and will have to look at them. He said he should not have to continually be the staff and work through all these ordinances, but he will do some more homework on the last two meeting minutes. To get to specifics, he doesn't understand why residential signs are proposed to change from 2 square feet to 6 or 8 square feet, representing a large percentage increase. Woodward clarified that Maki was referring to residential name/address signs whose area is proposed to be based on speed of the adjoining roadway. Meister clarified that people can't see a 2 square foot residential sign on M-28. Maki said he suggested a larger sign area on M-28 ten or twenty years ago for the purpose of addressing homes with greater setbacks. He agrees with larger signs on M-28 due to the higher speed limit, but thinks 3 or 4 square feet is sufficient, and 16 square feet (4' x 4') is too much for name and address. Engle noted it's more visible for the person going 55 mph. Meister noted the signs that have camp names, and an effort to make this more equitable. Milton noted it was an effort to create criteria to control the camp signs. Maki suggested it was an effort to accommodate the maximum plus 20 percent.

Maki doesn't understand the increase in area for banners and changes in display time. He asked why give them another 80 square feet of free sign area for the summer? Tabor asked what is the problem with increasing it? Maki asked what is the reason for increasing it? Tabor said it seemed reasonable. Greenberg doesn't think banners have been a problem. He thinks it's somewhat self-regulating based on the length of the sale the businesses are promoting. Maki's opinion is that banners are not to be used for sales promotions, they are supposed to be for special events. Smith said this was all extensively discussed and the Planning Commission was in agreement. They did not randomly choose numbers. Meister related his experience in utilizing banners for promotions. His experience is that most businesses don't want to make their property look bad by leaving banners up for extended periods of time. He feels that banners are important tools for businesses, and are not a negative for the community. Mahaney said it is important to regulate the size and condition of banners. Maki objected to the display time. Greenberg asked what time period Maki suggests. Maki said he thinks one week is plenty of time for a sale. Trudeau said that the Planning Commission is composed of citizens who have determined that this regulation is appropriate and the process should move on. Carlson noted Snyder's and Ace Hardware's use of banners for promotions. Mahaney gave an example of a 90 day Scott's promotion, or 120 day DeWalt promotion for which he is sent banners for display. He said banners are an inexpensive way to advertise product. Maki doesn't object to banners, but thinks four-20 square feet banners per property is excessive. The Planning Commission discussed the typical size of banners, and that they can be displayed on multiple facades. Mahaney said Chocloy Township businesses won't go to the extreme to make their businesses look tacky, and praised the business corridor. Sikkema said businesses are important to the community, and the Planning Commission wants to show them support so they can be a part of the community. The Planning Commission reached a compromise on banner provisions. Tabor said they gained input on the typical size of promotional banners that are received by businesses. Sikkema said they also sought the input of business owners, CABA, sign companies, and the national standards. Smith pointed out that the size of banners is limited to 20 percent of building façade area. Maki stated it is good that banners can't be hung on poles, posts, vegetation, fences, etc.

Trudeau had a concern that the political sign standards need to accommodate the typical size of signs sent by national and state organizations, and urges staff to go measure them.

Maki again expressed concerns with the size of residential signs. He was told that the regulations were altered in consideration of existing conditions for residential signs (which were measured by Jennifer Thum) and what they thought was reasonable at different speeds. Maki wanted to be provided with evidence. Greenberg said many signs are not in compliance with the 2 square feet limit. Sikkema said no one is complaining about the signs that are out there, so why would we write an ordinance that makes them nonconforming? Again, the Planning Commission all agreed on numbers they thought were reasonable. Maki objected to the fact that the “reasonable” numbers keep changing. Engle said more information was available now than before on what is reasonable, based on standards no one ever looked at before, and the Planning Commission even chose reduced numbers from those standards based on what was right for the Township. Engle said this draft is much more readable than any others, with much better definitions. Maki extended appreciation to Woodward. Sikkema said the Planning Commission did their due diligence with careful consideration. Thum, Woodward, and the Planning Commission found issues and kept fine tuning. He really wants to know what the issue is so that adjustments can be made.

Tabor thinks we are there with this version of the amendment. Maki has learned things that make him feel a little bit better, but still feels that a change should be based on evidence. He feels better about banners; although he still thinks you should get a permit for banners because how else can you count the days? Maki doesn't think sign area should be changed just to make nonconforming signs conforming. Sikkema said that was not their method – they took examples of signs that seemed reasonable in size (as measured by Smith), and they looked at national standards. Lawry said the fire and police departments say they have problems with the size of residential address signs when responding. They want to see signs larger than 2 square feet for better visibility. Maki said he is the one who suggested this enlargement before and they agreed with him. There is especially a need for larger numbers that may not be visible on a sign that is 2 square feet.

Staff was directed to look at the Barbieri signs (on the beach next to the Welcome Center) to see if they are in violation, and to talk with the attorney to see what can be done. The Township has done a lot of work to welcome people as a tourist area, and we shouldn't allow an illegal sign to offset this. Sikkema noted that the proposed sign provisions apply only to signs visible from the public right-of-way, public facilities, public trails, and navigable waterways, which would include Lake Superior and the public beach, but some signs on private property would not be regulated. Trudeau thinks this particular sign should be addressed. Perhaps it is on public property since it is between the high water mark and the shoreline.

Maki suggested the Board write a recommendation on their desired changes to the amendment at the September meeting, based on everyone suggesting changes and collaborating. Trudeau mentioned that the Planning Commission thinks they have a finished document. Greenberg was in agreement with passing on specific comments to the Planning Commission after the next Board meeting. Sikkema asked if they are getting there. Greenberg said, “Absolutely”. Maki said they will try to quantify it and be in agreement. Sikkema said no one will get everything they want, it will take compromise. It was called a work in progress through the ages. Discussion was ended.

C. Planning Commission Priorities

Public Comment

Deborah Mulcahey, 633 Lakewood Lane, said that she would like to make the concept of “Aging in Place” a priority. Senior citizens use golf carts to get around on Lakewood Lane, and there is a safety issue. Lakewood Lane may need to be wider to accommodate walkers, bikers, and others so we don't lose senior residents.

Discussion

It was suggested that the Planning Commission give the Board a list of priorities at the September meeting, and the Board can add to the list. Items for inclusion are the junk car ordinance and private road standards. Sikkema would like to get through the ordinance issues and leave time to get back to Township planning. He mentioned a previous directive from another joint meeting to determine appropriate areas for more commercial/industrial development, and to make sure these areas are adequate for the future.

Smith asked about the Lowe's grant status. Lawry said a Lowe's grant was used for a slide at the Silver Creek Recreation Area a year ago, and picnic tables through the fire department (in the pavilion). The Township is still attempting to purchase the parcel on Silver Creek for better access to the recreation area. Some KBIC money is being put toward that purchase.

There was a discussion about the Iron Ore Heritage Trail (IOHT) route, and whether it should stay on the DNR trail or run through the business district. IOHT is talking about only including the DNR trail route. Both locations were shown on the map when the millage was passed, and the Supervisor is concerned that this should not look like a bait-and-switch situation to voters, and that the Chocolay Township voters should get a direct return on the dollars they contribute to the millage with IOHT investment in the Township trails. Sikkema thinks the Township should be part of the IOHT master planning process and have input into the route location. Woodward noted this is proposed to be on the agenda for the next Planning Commission, to work with Don Britton to determine the route, which is then advertised. Milton and others want to see the trail on the business route where it will also support the Silver Creek Recreation Area and other public access points in addition to the railroad spur. The Board is in agreement, and suggests bringing CABA in for support.

PUBLIC COMMENT

Wayne Dees, 512 Woodvale Drive, said he was going to hit specifics on these two ordinances, but doesn't think it's necessary. He thinks there needs to be a procedure and methodology for these public processes or the public bodies will keep spinning their wheels. This back and forth on issues is not effective or efficient and causes problems for the public who are trying to track government processes.

Meeting adjourned at 10:25 p.m.

Max Engle, Clerk

Greg Seppanen, Supervisor

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MINUTES**
Monday, September 10, 2012

I. MEETING CALLED TO ORDER BY: Andy Smith at 7:30 p.m.

ROLL CALL

Members Present: Mr. Andy Smith (Vice Chair), Mr. Andy Sikkema (Secretary), Dr. Ken Tabor, Mr. Gary Heinzelman, Mr. Tom Mahaney, Mr. Eric Meister

Members Absent: Mr. Kendell Milton (Chair)

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Brad Johnson (Public Works Foreman)

II. MINUTES

A. August 6, 2012

Motion to approve the minutes as written by: Meister

Motion to reverse the order of Old Business and New Business, and to approve the agenda as corrected by: Meister

Second by: Sikkema

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC HEARINGS

None

V. PUBLIC COMMENT

Deborah Mulcahey, 633 Lakewood Lane, presented comments in regard to the proposed Home Occupation text amendment, specifically the "alternatives" document as presented in the packet. She doesn't like the idea of having non-resident employees. She doesn't think it should say "REASONABLE business hours" as this is subjective. She feels that the Planning Commission would set up neighborhood bickering if enforcement depends upon having a "formal written complaint" for investigation.

She reiterated her opinion that a licensing system instead of a permitting system should be used to facilitate timelier and less costly revocation actions. She said that the permitting system has to follow provisions of the Administrative Procedures Act, and under that system a cease and desist order for a home occupation may have to be

defended in Circuit Court. She says a license could have a much simpler revocation process because it doesn't have to follow the Administrative Procedures Act.

She thinks we need a better definition for hazardous substances. She thinks there should be clarification of "motor vehicle repair". Does that mean boats and airplanes? She thinks the planning commission should consider protection of the property owner by making sure the property owner, not just the resident, signs the home occupation request. She thinks there should be no home sales for any home occupation.

Vehicle parts repair, which is proposed to go through the Tier 2 conditional use process for potential approval, requires hazardous substances, so should be a prohibited use in her opinion.

She said the Planning Commission did not address a specific number for an increase in the required notification distance for Tier 2 approvals (*the Planning Commission approved the submittal of a text amendment application to address this issue at a previous meeting*). She said the Comprehensive Plan does not envision residential areas to be used for businesses.

Dick Arnold, 312 West Branch Road, had several questions, including how the Township can enforce the home occupation ordinance without a search warrant? He doesn't want home occupations in accessory buildings because it is his impression that there is no limitation on the height or placement of such buildings (Woodward stated there are height and setback limitations in place for most accessory buildings in all Districts). He said the Township rezoned a subdivision that's been a subdivision for 30 years for farming and logging which doesn't make sense.

There were no further comments so public comment was closed.

VI. PRESENTATIONS

None

VII. NEW BUSINESS

- A. Consideration – Citizen request to correct spelling of Basil Road to reflect the family name of early settlers, Basal. Michael P. Basal presented a packet of information to the commission. He said he wants to correct the spelling on the sign at US-41 for "Basil" road to reflect the proper spelling "Basal". His father, Myron Basal, is the last of the 13 children from original settler George Basal. Mr. Basal read a letter from his father, excerpts follow. *Myron Basal was born in 1929 on the family farm on what is now North Big Creek Road. His father and Uncle Charlie ran the farms which were inherited from their grandfather Frederick. The family settled in the area in the late 1800's, and was considered one of the founding families. When Myron was 10 years old (1939), his father George and Uncle Charlie deeded the road, which they assisted the WPA to build, over to the Road Commission. At that time the entire road was called Basal River Road. The road was later divided with the northern portion along the section line called N. Big Creek Road, and the other portion to retain the family name of Basal. It is a common error to misspell the name like the spice. At that time, it was mis-spelled as "Basil", even at the County Register of Deeds. It is important to him that the road name be changed to reflect the family and area*

history for his grandchildren.

Mike Basal showed a 1960 plat map that identified property for C & H Basal and George Basal (mis-spelled), and a subsequent plat map that identifies the same property with the name spelled correctly. Greg Basal, Mike's cousin on Charlie's side, still lives on N. Big Creek Road (County Road BO). The 1930 Census documents show the families of George and Charles Basal living on Basal River Road (all spelled correctly). The family name is spelled correctly in the Township history books. His request involves changing one road sign and the various records. He spoke with staff at the Township, County Road Commission, Marquette County Resource Management (Al Feldhauser), and all said the change must originate at the Township Planning Commission. Feldhauser would help change all the appropriate records. Mike noted that his father offered to pay for the sign and also a spare sign (he requests that the others are destroyed so they don't ever go back up).

Heinzelman pointed out that on his 25 years on the police department, all records referred to the road as "Basal", spelled with an "A", so there must have been a reference that it was supposed to be spelled that way. Mike said that when he was a teenager and his uncle George lived on Basil Road, all the mailboxes for the residents on Basil Road spelled it correctly as Basal Road, even though the sign said "Basil" (self-corrected). He believes this is just a clerical error.

Meister inquired about the procedure to change the spelling. Woodward suggested that this be handled similarly to a zoning map change with a public hearing to allow resident opinion to be heard. Commissioners agreed it makes sense to hear from the non-Basal residents. Mulcahey suggested Basal use a petition to see if the people who currently live on the road agree with the change. Heinzelman said it would be more appropriate to allow all Township residents to give input should they wish to. Other people may remember this history.

Motion to hold a public hearing to correct the spelling of "Basil Road" to "Basal Road" at the next meeting, and to notify all residents on both Basil and N. Big Creek Road by: Sikkema

Second by: Heinzelman

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

- B. Consideration – Discussion on the preferred route for the Iron Ore Heritage Trail through Chocolay Township. Don Britton, 121 Deerview Trail, Iron Ore Heritage Trail (IOHT) Board of Directors, spoke to this issue. He said he would like to see the Iron Ore Heritage Trail adopt the M-28/US-41 business loop through Chocolay Township as their trail to maintain, and leave out the section on the railroad grade from the Welcome Center to the Soo Line bridge on M-28. Smith asked if there is any reason that the IOHT authority can't adopt both routes through Chocolay Township? Britton clarified that the Authority has always envisioned the railroad grade as the spine of the trail from the Casino in Chocolay Township to Marquette, Negaunee, Ishpeming, and over to Republic. He thinks designating the business loop as the IOHT route is better for tourists, businesses, and the economy. If the bike path on the business loop gets rebuilt

with grant funds (the Township has approved the match), then it makes sense for the IOHT Authority to use that route for the designated IOHT. This is the trail that runs along the east side of US-41/M-28 from the south US-41/M-28/Cherry Creek intersection to the Welcome Center. Smith again asked for clarification on why they couldn't use both routes as part of the IOHT. Britton said he doesn't know why the IOHT Authority would want to adopt both portions because they only want to maintain the spine of the main trail. They are letting the communities do the spurs.

Mahaney asked how this would impact the snowmobile route, and if it would still follow the railroad grade. Britton said the railroad grade would have to be groomed along with part of the business loop. U.P. Central Trails would probably take care of grooming the portion that is an official snowmobile trail, or at least the M-28 business loop portion.

Britton noted that the IOHT Recreation Authority is not in agreement with his perspective. Sikkema asked for clarification of why the IOHT Recreation Authority adopted the railroad grade as the spine in the first place. He noted that the route through Ishpeming and Negaunee was chosen to highlight their assets. Britton confirmed that those routes were chosen as being more advantageous for citizens.

Supervisor Greg Seppanen, 1019 Ortman Road, spoke to the issue. He said this started because Andy Sikkema identified grant money to improve the remainder of the east business loop bike path through the Township, which has poor infrastructure and drainage problems (a portion will be resurfaced with this year's road construction project). The Township approved a match for the grant. If this route became the IOHT, the IOHT Recreation Authority would then be given control. When he approached the IOHT Authority with the idea, he expected reservations because of their current cash flow constraints with assets being diverted to the Negaunee to Marquette trail this year. However, they seemed to object to the business loop route through Chocolay based on projected maintenance costs. The discussion was delayed to give Chocolay time to survey their assets and collect public opinion about the best route. Seppanen noted that the IOHT does consist of portions with dual trails running through business districts. When the idea first came up, there was only one option for the trail location through the Township, but the possibility of the grant opens up this additional opportunity for a business loop route.

Seppanen said that the original IOHT map that Chocolay was given before the millage vote showed both trail routes, but the IOHT said that was not the official map, it was a map provided by the County. The decision needs to be made before discussion with the DNR about trail leases in the spring. Seppanen thinks the IOHT has a misconception related to projected maintenance costs. Chocolay contributes at least \$34,000 annually through the millage to support the trail. The monies collected so far are going toward acquisition and construction of the trail in other jurisdictions. The Township manager and supervisor looked at the three bridges on the railroad grade route (one over the Bayou, one over the Chocolay River, and one over M-28). One bridge deck is in bad shape, and it was

estimated that it would take around \$100,000 even to paint the railroad bridge. Seppanen said that staff analysis may show that the business loop route has lower projected maintenance costs. This route has only one bridge, which is new and won't need work for about 10 years.

Supervisor Seppanen tasked the Planning Commission with gathering the public opinion on the issue, including all the user groups. In his discussions, it was clear that the residents along the railroad grade would support a plan that would divert more snowmobiles from the trail along the railroad grade through the neighborhoods. He said that Chocolay Township citizens expect something in return for their millage contribution besides the improvements in other jurisdictions, such as consideration for the preferred location of the trail. If the Planning Commission decides to do a public hearing, the Supervisor asked them to do it in November and send it for Board review that month, because it will be a fairly new Board who should be in on the decision and the process of discussion with the IOHT Recreation Authority.

Smith asked about the IOHT Recreational Authority's opinion about snowmobiles on the trail. Britton said their goals and objectives include multi-use trails. If the railroad grade route was adopted, the IOHT would have a lease agreement with the DOT or the DNR and the IOHT would maintain the trail. Meister asked if the IOHT authority wants to adopt the railroad grade as the spine because they think the DNR would maintain it for them? Britton said that once the IOHT authority leases the trail, they have to maintain it. The IOHT uses a portion of the money from the multiple jurisdictions as match for grants (\$200 million in grants so far). Woodward asked for clarification on what the grant money is used for – only acquisition and construction? Britton said the IOHT Authority uses the Township contribution as a match for grants for acquisition, construction, and maintenance. Britton said maintenance activities include sweeping the trail and cutting the grass within three feet of the trail.

Mahaney asked if the railroad grade trail would be abandoned if the business loop is chosen as the route. Britton said that the portion of the railroad grade trail between the Welcome Center and the Soo Line bridge would still have to be used as a snowmobile trail because snowmobile traffic can only travel one-way through the business loop. This is because it is not possible for snowmobiles to cross over the highway at the Welcome Center to get to the west side of US-41 to travel in the same direction as traffic. The tunnel is not for motorized traffic. From the trail along M-28, snowmobiles can travel north through Harvey to the Welcome Center along the east side of US-41. The traffic is two-way on M-28 where the trail maintains enough separation from the highway. Britton said snowmobile tourists don't normally leave the main trail.

Meister asked if Britton would rather the IOHT authority adopt both routes, with the preferred route being the business route, or if he wants only one route designated. Britton said he'd prefer only the business loop was adopted by the IOHT with the remainder to be maintained by the DNR. Seppanen said the Township can attend to the due diligence on the maintenance costs on behalf of the Township and other interested parties.

Mahaney is concerned about maintenance of the bike path. Britton said the IOHT Recreation Authority uses millage funds for trail maintenance on whatever route they adopt. Seppanen said that the IOHT is collecting money now, but doesn't actually take over maintenance functions of the spine until next year. They currently only do maintenance on the portions of the trail that they have built and for which they have lease agreements with the State. Smith said that U.P. Central Trails spends some money currently for bridge work (about \$1,500 per year). Britton said the IOHT Recreation Authority is in a better position to ask for grants than the snowmobile club because their user group represents the entire population and not just one interest group.

Motion to hold a public hearing in November to take public comment on the preferred IOHT route by: Tabor

Second by: Meister

Vote: Ayes: 6

Nays: 0

MOTION CARRIED

C. Consideration – Discussion on the relocation of the pavilion from the Township Hall to other Township property to make room for the fire hall, including photo presentation. Woodward showed pictures of each considered site, and of the current pavilion which is 20' by 40'. Meister inquired about frequency of use, which Johnson said may be once a year at the current location. However, the Beaver Grove pavilion gets rented about two times a month. The pavilion is rented out for parties and other events.

Johnson gave his impressions of the marina site, where his intention was to remove the two existing picnic tables and grill and put the pavilion in that area (adjacent to the larger parking area). He said this was his second preferred site due to lack of parking or opportunity for expansion of parking (kids use the field for recreation). Currently the main parking area can accommodate a maximum of 5 trucks with trailers, and secondary parking area can accommodate 2-3 other vehicles without trailers. Current marina users include boaters, kayakers, and fishermen who like the site because it's free to launch. If there was more parking, this would be staff's number one pick for a relocation site.

Lion's Field does not have a lot of room, and most of the site is sand. There is not much parking or opportunity for parking. There is not an ideal site already prepared on which the pavilion would fit and be easily accessible. The Kawbawgam Pocket Park is not well used, and would probably not attract use to the pavilion. There is already a pavilion at Beaver Grove.

Mahaney suggested it would be best to put the pavilion where it will be used the most to try to generate revenues for the Township. Johnson said Silver Creek Recreation Area would be the potential location that would generate the most use. Woodward showed a Google image with a scale sketch of the pavilion location by the soccer field in the multi-use area (playground, spectators, trails and disc golf facilities). It is buffered from residences by a strip of woods. More parking is planned for the recreation area, but there is plenty of existing parking for pavilion users. Mahaney asked about the potential for electricity to the pavilion, and Johnson said that is possible either there or at the marina location.

The pavilion roof will be moved with the firehall construction project. The picnic tables are to be moved with it. Meister asked about the feasibility of moving it, and whether the cost exceeds the value. Johnson was not sure about the age of the structure. Mulcahey mentioned the structure was built with donated supplies and labor, and this was confirmed by Woodward. Tabor and Heinzelman thought the pavilion would get the most use at Silver Creek, even though Heinzelman said he didn't want to short change the east side neighborhood. Johnson suggested that a public hearing may be needed for a potential marina location because it would be closer to residences. Meister said residents near the marina had complained about people parking in their yards, so an increase in traffic to the site may create problems. Sikkema thinks the Silver Creek location will attract the most use. Seppanen noted it would provide shelter for sports teams in case of bad weather or heat during a game. Sikkema asked if the Township is still considering the purchase of the parcel adjacent to Silver Creek Road and the recreation area, and whether the pavilion could be located there in the woods. Seppanen said this hadn't come to him for consideration. Johnson said his impression was that the owner was asking too much money for the property. Mahaney said it's a good indication that the Beaver Grove recreation area pavilion gets so much use. Sikkema cautioned that the pavilion should be placed as far from residents as possible (northwest corner). But the playground is in the southwest corner. So the staff's preferred location was in the middle of that area.

Motion to recommend to the Township Board that the pavilion be moved to the Silver Creek Recreation Area: Tabor
Second by: Sikkema

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

VIII. OLD BUSINESS

- A. Consideration – Review proposed Text Amendment #34-12-04 Home Occupations. The meeting packet included original home occupation language (before 2008) as referenced by Trustee Maki at the joint meeting, current language, draft of the proposed language, and a reference document by Woodward with alternative language that could address some of the Board's concerns or be used for alternate language, such as a two-tier system.

The commission clarified again that they do not want home occupations to include non-resident employees. Woodward pointed out that the current proposed version utilizes a registration process and conditional use process for approval. She would prefer there to be an administrative approval process utilizing a zoning compliance permit, and a conditional use process for approval, as illustrated in the alternative document. Maki had earlier expressed that he thought a home occupation should get official approval before beginning (like any other use permit), and should not be encouraged to register as much as 30 days after beginning operations. It was discussed at the joint meeting that occasional "testing" of the home business before an official start was not an issue of concern or a violation. Woodward also encouraged the supplemental strengthening of the permitting and enforcement language at least for home occupations because the

current zoning ordinance language is not comprehensive.

Mahaney received clarification about the approval process. Woodward reminded the commission of Maki's question regarding the differentiation criteria for Type 1 and Type 2 Home Occupations. She wants to know what factors would differentiate these two. For an example, Type 1 might have only off-premise or infrequent interaction with customers (internet business, accountant, caterer). Type 2 might have on-site interaction with customers with limitations. Woodward would like the commission to move away from differentiation based on a list of specific uses, to differentiation based on impact criteria. Sikkema noted that frequency of activity is an example of a factor that may differentiate levels of home occupation impact. Another is scale of activity. The Type 1 Home Occupation may have no impact (evidence of activity), whereas the Type 2 Home Occupation may have low impact (some minor evidence of activity). Impacts may include more frequent traffic to the home, larger vehicles coming to the home, extra space for storage, etc. The Type 2 process would include a public hearing to explore the acceptability of the anticipated impacts. Tabor noted that what is acceptable in one area or district might be less acceptable in another. Mahaney thinks there should be only no impact, no evidence of home occupations. He questions the intent of allowing home occupations. Meister said the conditional use places restrictions, and reminded everyone that permitting of home occupations is not new to the Township.

Tabor said most home occupations start from hobbies that someone hopes to make a little money from. Sikkema said that when they reach of level of creating impacts, they should move to the commercial area. Smith noted that people with 6 kids can create neighborhood impacts in their daily lives, and did not want to encourage a disgruntled neighbor reporting a strange car coming to a home or something minor like that. Meister noted the original attempt was not to change the intent of the provisions, but to make it easier for no impact home occupations. Sikkema noted the responsibility to listen to Board viewpoint and try to incorporate their wishes because the commission works for the Board.

The commission discussed Woodward's desire to strengthen the administration and enforcement provisions, and noted no changes to what she proposed. The majority of the commission was in agreement that a two tier process was appropriate. They do not want non-resident employees or on-premise retail sales, although there may be a need to define retail sales vs. wholesale pick-up of special order items. Does the off-premise vs. on-premise interaction wording take care of this? There was still indecision about signs. Most commissioners don't want additional signs for home occupations, although a business name on the permitted residential sign may be ok.

Woodward felt that it's helpful to provide examples of occupations that may exemplify the impacts of each tier. Commissioners were in agreement, but made modifications to the suggested examples. Sikkema wanted to move dressmaking, sewing, or tailoring to Type 2 because of on-premise interactions. This would allow the commission to determine the frequency or scale of impact. "Offices for sales representatives or professionals" was changed to "Home

office". Plural references in the examples were eliminated. It was agreed that Tier 1 would be allowed in single or multi-family residences, but Tier 2 would only be allowed in single-family residences.

Sikkema requested staff to research language regarding the regulation of hazardous substances and vehicle parts repair. There is still difficulty with prohibiting motor vehicle repair, because of the differences with boat, tractor, and automobile repair. Arnold mentioned that there is a good definition in the #55 Vehicle Parking and Storage Ordinance (*but that includes, but is not limited to, automobiles, trucks, vans, buses, truck tractors, motorcycles, motorbikes, bulldozers, front end loaders, construction equipment, logging skidders, snowmobiles, all-terrain vehicles, and boats that are self-propelled by means of an engine*).

There was a discussion of the provision that no advertising shall use the residential address of the home occupation. The intent was not to encourage increased traffic to the address, but not to discourage the display of an address on a business card. Business cards would not be considered advertising. Commissioners discussed scenarios including professional home offices, catering, golf club repair, cabinet maker, hair styling, home photography, antique car parts repair, furniture making, canoe building, pet grooming service, etc.

Motion to review the changes at the next meeting before moving to a public hearing: Tabor
Second by: Sikkema

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

Action Items: Staff will research language regarding the regulation of hazardous substances and vehicle parts repair.

IX. PUBLIC COMMENT

Deborah Mulcahey said that while the commission is working on the sign ordinance on Lakewood Lane, they should consider letting some signs be grandfathered but not accommodating them in the new standards.

X. COMMISSIONER'S COMMENT

Meister asked what would happen if they don't get the sign ordinance finished before the new Board comes in. Would they be starting all over again? Woodward said it would be reviewed at the next meeting after the formal Township Board comments were received. Both the sign and home occupation amendments will need public hearings, possibly in November.

VII. OLD BUSINESS

A. Consideration – Review proposed **Amendment #34-12-04 Home Occupations** as discussed at the August meetings.

6.9.C.2.a – Sikkema has a question about this statement, “The Zoning Administrator shall review applications for Type 1 Home Occupation permits, and the Planning Commission shall review applications for Type 2 Home Occupation permits.” He thinks it should say that each shall “review and approve” applications. The change was made. Milton asked if it should say that there is no fee for Type I applications. Woodward said that would be up to the Board. She affirmed that Zoning Compliance Permits are \$25. It was thought this is a reasonable fee to process the application.

Page 1, 6.9.C.2.c - (C) Sikkema has a question about this statement, “If the resident applicant is other than the owner of the property, the owner must authorize the application.” He wonders how the owner will do the authorization, whether by letter or signing the application? It was decided to change the

statement to, "If the resident applicant is other than the owner of the property, the owner must sign the application."

Smith had a question about 6.9.D.2, "All work areas and activities associated with the home occupation shall be located either inside the dwelling or in an accessory building." He wonders if outside storage of wood out of view of the neighborhood would be prohibited. In other words, if there is no evidence of a home occupation when viewed from the street right-of-way or adjacent lot, would they be able to have outdoor storage? Mahaney said then you might be using more than your allowed square footage. Woodward noted provision 6.9.D.3.a that says "No outdoor storage or display of products, equipment, or merchandise is permitted other than of a type and quantity characteristically found at a single-family residence." She said there are many residences that store wood outside. Sikkema suggested a conditional use permit might allow some outdoor storage, so anything with outdoor storage should move to a Type II permit. No change was made to the provision.

Motion by Sikkema, second by Tabor, to hold a public hearing on the revised language of the proposed amendment #34-12-04 (with those few minor corrections) at the November 5 Planning Commission meeting.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

B. Consideration – Review proposed **Amendment #34-12-01 Signs** as revised at the August meetings.

Woodward noted the addition of a substitution clause in 18.1.A thus, "Any sign that can be displayed under the provisions of this ordinance may contain a non-commercial message." The purpose is to not favor commercial messages. She said this is a requirement according to the Michigan Sign Guidebook published by Scenic Michigan and the MSU Planning & Zoning Center. Woodward also noted slight changes to the Intent provisions to specify both the problem to be solved and the goals/intent of the regulations. The following items are new:

7. Reinforce and support the desired community character in a manner that takes into consideration building scale and massing, building and sign setbacks, travel speed, and pedestrian presence so that signage contributes to a sense of place.

8. Ensure that the constitutionally guaranteed right of free speech is protected and to allow signs as a means of communication for business identification and other commercial speech, non-commercial speech, and dissemination of public information, including but not limited to public safety information and notification as may be required by law."

All changes to these provisions were accepted as written.

Woodward added a definition of "Farm" based on the Michigan Right to Farm Act, to read "The land, plants, animals buildings, structures, ponds used for agricultural or aquacultural activities, machinery, equipment, and other appurtenances used in the commercial production, harvesting, and storage of farm products as defined in the Michigan Right to Farm Act, Act 93 of 1981." Only commercial farms would be permitted signs. Otherwise the applicable

residential sign would be allowed. This change was accepted.

Woodward noted prohibitions for phosphorescence and luminescence, and also prohibitions for affixing signs to fence posts, benches, and perimeter walls. Sikkema noted the exception for conventional “No Trespassing” signs. These changes were accepted. Also prohibited are “Signs affixed to a motor vehicle, trailer, or other wheeled device parked with the primary purpose of display.” The words “or other wheeled device” are new and were accepted.

Most importantly, Woodward added a statement that “any sign not expressly permitted” is prohibited. This is to give the Township the opportunity to respond with regulation if necessary when presented with a sign technology not previously contemplated. Tabor said it seems backward – if not mentioned, it’s permitted. Sikkema noted as an example the lights on the Holiday sign that were proposed – this would give the Commission the opportunity to address them and potentially alter the ordinance. Woodward mentioned the possibility of supergraphics, and asked whether they would be considered to be similar to the window decals permitted as wall signs, or a sign type not expressly permitted. Is there a need for a definition of supergraphic? Could someone put up a temporary supergraphic? Woodward noted that some supergraphics have digital components, such as a projected image or woven fiber optics. Sikkema asked if this would be considered an electronic sign. Sikkema suggested amending the provisions thus, “any sign *or sign type*” not expressly permitted (are prohibited). This was agreed.

Woodward then discussed off-premise signs. She said that general bans or bans with exceptions are not advised, as they may be challenged if the exceptions do not support stated goals. The current language bans new off-premise signs with some exceptions. She said the current language was probably not that problematic, as the exceptions relate to Township goals, and signs permitted by another agency (MDOT through the Highway Advertising Act), or some temporary signs like political signs, real estate signs, residential directional signs, food stands, and snowmobile directional signs. She said you can choose not to ban them but try to control them through other regulations, such as limiting the number of off-premise signs per undeveloped parcel, or limiting size to discourage them. Sikkema stated that in general he doesn’t feel that off-premise signs, primarily billboards, add to the appearance of a community. He thinks they should be controlled. He also thinks they do not benefit local businesses, but are usually for businesses located elsewhere that do not care what the local community looks like. Heinzelman noted the McDonalds billboard for a local business. There were no objections to the way it is written.

Heinzelman discussed signs on motor vehicles, and the dilapidated truck with a business name and phone number painted on it. Woodward said this would be prohibited because of the primary purpose of display.

Woodward discussed the inventory of signs along M-28. Trudeau had asked for an inventory of political signs. None were over 32 square feet, but some were around 9 or 12 square feet. All were located in the right-of-way. The way the

amendment is written, anything over four square feet would have to be placed outside the right-of-way. The provision currently says, "Area may be increased to up to thirty two (32) square feet provided that no portion of the sign is located in the public right-of-way." This was changed to, "Area may be increased to up to thirty two (32) square feet provided that the sign is located at least thirty (30) feet from the edge of the roadway (white line along the edge) or curb." The reason is that so many signs would not have to be removed. Mahaney favored retaining the four square feet as a maximum when the sign is located less than 30 feet from the roadway, so as not to provide a hazard. Sikkema said the larger signs are mounted with 2x4 boards or other more substantial posts and would be a hazard closer to the roadway. But it was decided that 30 feet was a safe distance for the larger signs from the edge of the roadway.

Temporary real estate signs, which formerly read "Temporary real estate signs for individual parcels shall not exceed an area of nine (9) square feet except as otherwise provided herein. Commercial or Industrial real estate signs shall not exceed an area of thirty-two (32) square feet." Woodward suggested the following change for clarity: "Within the R-1, R-2, MFR, and WFR districts, temporary real estate signs shall not exceed an area of nine (9) square feet except as otherwise provided herein. Real estate signs in Commercial or Industrial districts shall not exceed an area of thirty-two (32) square feet." She thought that more accurately reflected the intent. This change was approved. Woodward discussed the portable sandwich signs for firewood, etc in the right-of-way along the highway. They are temporary portable signs, but not specifically addressed under that sign type. Sikkema says MDOT considers them off-premise signs. They would pull them as a violation of the Highway Advertising Act. You can overlook signs on people's property for a temporary event, but if it's there all or most of the year, it should be considered a home occupation sign. It's like comparing a garage sale and a home occupation. The home occupation sign would violate the home occupation amendment, and wouldn't be allowed. Mahaney asked about people selling vegetables. In the AF district it would be a farm. In the R-1 district it wouldn't be allowed to have those signs.

This provision for farm signs previously read, "Farms are permitted one (1) identification sign not to exceed an area of thirty-two (32) square feet and one (1) sign identifying farm products grown on the premises not to exceed an area of twelve (12) square feet." Because she was concerned about content-based regulation, Woodward proposed a change to read, "Farms are permitted a total of forty-four (44) square feet of sign area, provided that no sign shall exceed an area of thirty-two (32) square feet." The property owner could divide this sign area accordingly between the signs. Heinzelman was concerned that this wording might lead to multiple small signs cluttering a property. The wording was changed to add a limit of two signs.

Sikkema was going to check on the recent Highway Advertising Act standards regarding farm signs. He was concerned that even though we allow off-premise signs for roadside stands, MDOT may still pull them. It was decided that we can still have this standard.

Woodward noted a clarification that signs with commercial messages are prohibited in residential districts. This was to reinforce the intent of the home occupation amendment.

Based on the sign inventory, the Commission decided to reduce the maximum sign area for residential name/address signs where speeds are 45 MPH to twelve instead of sixteen square feet.

Tabor asked for a clarification on current permitted illumination. He said there is a sign by the passing lane out east that is brightly lit up from below.

Woodward made changes to the nonconforming provisions because of legal interpretations that sign ordinances authorized under the Michigan Zoning Enabling Act cannot require the removal of nonconforming signs or to enforce an amortization scheme. This could only be done if the Township had a separate sign ordinance. The new language only requires a sign be brought into conformance upon verification that the use is abandoned. This change was approved.

Woodward added this statement for clarity to the administrative provisions: "It shall be unlawful for any person to erect, relocate, or structurally alter or repair any sign or other advertising structure within Chocolay Township as defined in this Ordinance without first obtaining a Zoning Compliance Permit. (See Section 18.1.J and 18.1.L for maintenance exceptions which do not require a Zoning Compliance Permit.)" The words "or repair" were removed.

Motion by Sikkema, second by Tabor, to hold a public hearing on the revised language of the proposed amendment #34-12-01 (with those five minor corrections) at the November 5 Planning Commission meeting.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

General celebration ensued upon completion!

VIII. NEW BUSINESS

- A. Consideration – Text amendment application regarding notification distance. Woodward presented a copy of the text amendment application for increased notification distance, pertaining to Section 1.6.B.6.a. This is being submitted by the Planning Commission and was brought before them for approval of the wording. This increase to notification distance would impact any public hearing, such as conditional uses, rezonings, etc. This is prompted by a request from Deborah Mulcahey and others. The issue is that many properties are large, and so the current standards don't prompt direct notification of very many people. The increase would increase the numbers of people who would receive letter notifications. Property widths along Lakewood Lane were discussed. Milton thought Jennifer had said the State was looking to make changes to the notification distance. It was decided to check on this before filing the application to avoid duplication of effort or inconsistency. The application will be put on hold pending information on a State change.

Action item: Staff will check to see if there is a pending State change and report at the next meeting.

B. Consideration – Upcoming priorities

Sikkema noted some have been requested by the public, so should gain priority. Tabor asked about the issue concerning the junk car ordinance. Woodward said it's hard to determine what is inoperable, and which license plates are up-to-date or even if there is a license plate when you can't go on the property to inspect. She suggested thinking about what is to be accomplished – a neater front or side yard, or other goals. The Commission noted the junk car ordinance was changed a couple years ago. Tabor asked how big an issue this is. Woodward says it's huge. Heinzelman said it was a big issue for the police. Tabor said the intent was to require screening if someone wanted to keep the vehicles.

Code enforcement education and follow-through means notifying citizens of rule changes, or amnesty periods, etc. Mahaney inquired about the firearms ordinance. Heinzelman responded to the question. It mainly deals with where you can discharge firearms. Zones may need to be updated.

This is to give the new Board an idea of priorities. Sikkema suggested junk car and private road as a priority #1. He thinks there is a request about the private road regulation. Smith noted Au Train Township spent a lot of time and some court battles with the rental property issue. Woodward hopes to get public input on this issue. The Commission asked if there are any complaints. Woodward noted only a couple complaints received. Commissioners noted one at Shot Point. The Commission further discussed this issue and determined it is a priority.

Sikkema suggested these items show up in their future business to determine if the issue needs to be dealt with.

Mahaney asked if there have been calls on farm animals. Woodward noted calls asking about what is permitted in their area. She wants public education and opinion on this issue, and would put it as a #2 priority.

IX. PUBLIC COMMENT

None

X. COMMISSIONER'S COMMENT

Heinzelman asked about the Basil Road issue. Due to notification issues, it has been postponed to the November meeting, along with the Iron Ore Heritage Trail, sign amendment, and home occupation amendment.

XI. DIRECTOR'S REPORT

Woodward is attending the Michigan Association of Planning Conference in October.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

None

XIII. ADJOURNMENT

Milton adjourned the meeting at 9 p.m.

Submitted by:

Planning Commission Secretary
Andy Sikkema

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, November 5, 2012

I. MEETING CALLED TO ORDER BY: Kendell Milton at 7:30 p.m.

ROLL CALL

Members Present: Mr. Kendell Milton (Chair), Mr. Andy Sikkema (Secretary), Dr. Ken Tabor, Mr. Gary Heinzelman, Mr. Eric Meister

Members Absent: Mr. Andy Smith (Vice Chair), Mr. Tom Mahaney

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES

A. October 1, 2012

Motion to approve the minutes as written by: Tabor

Second by: Heinzelman

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion to approve the agenda as written by: Heinzelman

Second by: Sikkema

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

None

V. PRESENTATIONS

Jim Edwards, 549 Cherry Creek Road, on behalf of his son Michael Edwards, updated the Planning Commission on the progress of Michael's Eagle Scout project, which involves setting up the Adopt-a-Tree program in Chocolay Township. The project joined boy scouts, girl scouts, business owners, and members of the community in a common goal to maintain the plants that have been installed along the highway corridor. Michael hopes to have 50 or 60 recognition brick installations completed soon. Over 40 planting areas have been adopted thus far and 30 more are available. See interactive map and project history at:

www.chocolay.org/communityprojects/adoptatree.php

Togo's supported the scout troops with lunch for their efforts, and Fraco supplied the recognition bricks. Michael raised money to engrave the bricks with names of adopters. There have been other in-kind donations of labor and costs. Jim said it takes both people wanting to do the work, and people knowing what work can be done to work together. The project originated with a grant supported by MDOT, MI DNR, Chocolay Township and other funders, but volunteer community support is vital.

VI. OLD BUSINESS

A. *Consideration* – Hear comment on citizen request to correct the spelling of **Basil Road** to reflect the name of early settlers, Basal. Prepare a recommendation to the Township Board on this matter.

Planning Director Comments

Woodward presented information from the staff memo regarding the proposed change. The county planning staff said that the decision rests with the Township. The Planning Commission decided to gather public comment on the matter before making a recommendation to the Township Board.

Public hearing

Bob Basal – He grew up on the Basal farm, and lived there 35 years. His great-grandfather Ferdinand homesteaded here in 1860. The family has a long tradition and history of contributions in this area, and he would appreciate their name being spelled correctly.

Mike Basal – He is here on behalf of his father, Myron, to correct what they believe was a clerical error commonly resulting from spelling their name like the spice. He provided many historical documents, including the original deeds transferring the road right-of-way in 1939 from the Basals to the County (with the name spelled correctly). The road sign with the mis-spelling didn't go up until the late 1970's, at which time the early families were deceased. Mike wants the name corrected for the sake of history, and he believes any family in their situation would want the same. He appreciates the idea of an interpretive plaque with the story, but what the family really wants is to have the road name spelled correctly. He cited numerous examples of communities who have changed the names of roads for more arbitrary reasons and at great expense. This is a relatively simple and inexpensive request.

Woodward read a letter from Vince Jeevar of 110 Basil Road stating concerns about expenses that might be incurred by current Basil Road residents with this change, and potential problems with postal delivery. Otherwise, he is in support of the name change, and he even suggested the installation of a historical plaque on his property (at the road origination point).

Commissioner/Applicant Discussion

Sikkema asked how many residents currently live on Basil Road. *Woodward* stated there are 8 separate property owners including the State of Michigan. Commissioners discussed post office concerns and deed concerns per the staff memo. The post office anticipates no problem with mail delivery until someone moves away and needs mail forwarding. If the residents do not correct their address with all their mailers, some of the mail may not be forwarded. Deeds would not be impacted by the change.

Commissioner Decision/Recommendation

Motion by *Tabor*, second by *Heinzelman*, to recommend that based on public comment, the Township Board approve the official change of spelling for Basil Road from "B-a-s-i-l" to "B-a-s-a-l" to correct a supposed clerical error and accurately reflect the role of early settlers in forming the Township road system.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

- B. Consideration – Discussion of the preferred designated route for the **Iron Ore Heritage Trail** through Chocoley Township, and preparation of a

recommendation for the Township Board.

**Note that "UR" refers to the urban route from the Welcome Center through Harvey to the US-41/M-28 intersection, and east along M-28 to the overpass, and "RR" refers to the rural residential route along the railroad grade from the Welcome Center, through the Lakewood Lane residential area to the overpass on M-28. "IOHT" refers to the Iron Ore Heritage Trail. "IOHTRA" refers to the Iron Ore Heritage Trail Recreation Authority.*

Planning Director Comments

Woodward clarified that the decision involves choosing between two possible trail routes for designation as the Iron Ore Heritage Trail (as shown on the map). She explained that snowmobiles use the RR in the winter. They can also travel from Munising along M-28 and into some portions of Harvey, but not all the way to the Welcome Center. Currently snowmobiles cannot travel from Marquette south into Harvey along US-41. She clarified that the current discussion is not about ATV use of these trails, or about pursuing other options for the snowmobile trail. The discussion relates to which trail will be designated as the official Iron Ore Heritage Trail to be maintained by the Iron Ore Heritage Trail Recreation Authority. She said that currently the RR is maintained by the DNR, and the UR is maintained by the Township.

The Planning Commission had some questions about trail maintenance and control. *Don Britton* of the IOHTRA was present for questions along with *Jim Thomas* who is the Chair of the IOHTRA and *Carol Fulsher* who is the administrator. *Britton* said that currently the RR is owned and maintained by the DNR. It is used as a non-motorized trail in the spring, summer, and fall, and a snowmobile trail in the winter. If the RR is designated as the IOHT, the IOHTRA would lease the trail from the DNR and maintain it. Currently the UR is used as a non-motorized trail in the spring, summer, and fall, and portions are used as a snowmobile trail in the winter (north to about *Wahlstrom's*). The portion along M-28 is a two-way snowmobile trail, but north of the US-41/M-28 intersection the trail is one-way snowmobile trail only into portions of Harvey.

Public hearing

Gary Walker, 765 Lakewood Lane, prefers the designation of the UR for the IOHT. He said the history of these two trails rests a lot with the issue of snowmobiles, which the designation really doesn't. He said that the change in snowmobile traffic won't be impacted by the designation of the Iron Ore Heritage Trail. The IOHT is a tourist attraction and keeping the tourist attraction along the UR provides local business opportunities. In terms of maintenance, if the IOHTRA end up with maintenance, the UR is much more easily maintained with a new bridge built to handle snowmobile traffic. The RR would require more costly maintenance. He thinks *Chocolay* would get more bang for the buck with a UR designation because in the summer the RR route is not used by any motorized vehicles, and he thinks the walkers and bikers will be mostly local folks. He thinks the UR would work better as a tourism route.

Tabor asked which route the IOHT Recreation Authority prefers, and the IOHTRA representatives said they currently prefer the RR.

Jim Thomas, Chair of the IOHTRA, said the IOHT Recreation Plan was created 5 years ago with the initial designation for the IOHT to be along the railroad grade by the lake. There was some miscommunication that the IOHT would involve two trails through Chocoley Township, which they never intended. They are here to listen. If we designate the UR, they will have to remove or move their established mile markers from their current location on the RR. Based upon an MDOT recommendation, their intent is to create and promote the spine of the trail first so there's something to build upon.

Carol Fulsher, IOHTRA, said the IOHTRA chose the RR because they thought it created more interest, would be more unique, and would better attract visitors. They thought that people would not be interested in a trail along the highway. But she noted that the IOHTRA will abide by Chocoley Township's decision for the designation of the trail location.

Alan Rose, 176 Riverside Road, spoke about the advertised users of the IOHT. He said sometimes the RR is very busy and it's difficult to navigate around other users when you're on a bike, much less an ATV. He thinks that if we designate the trail as the IOHT, and include all the specified uses associated with the IOHT name, then there will be an issue.

Britton said ATVs were never intended to be on the Chocoley Township trails. These trails are meant to be for walking and biking in the summer and snowmobiling in the winter.

Fulsher explained that the IOHT is 48 miles long, and some portions are designated as ATV trails, but not Chocoley Township. Different parts of the trail have different uses. She said there is an order from the DNR director that our trail will be closed to ATVs.

Joe Holman, 210 Riverside Road, expressed distrust in the DNR's promises about trail use - the snowmobile trail was only supposed to be a one year trial.

Brad Cory, 110 Lakewood Lane, agrees with Mr. Walker that the UR should be designated as the IOHT because of economic considerations (benefits) for the Township. He thinks this designation will help with the overall traffic problem.

Don Balmer, 101 Forest Road, said that there is an economic benefit to routing snowmobile traffic along the UR and keeping the RR for non-motorized activity. He doesn't see the need for a change in designation, just a change in the routing of snowmobile traffic.

Walker said that's an excellent solution but the DNR stands between what they want and common sense. He believes there may be confusion among ATV users who see IOHT advertising and think they can use any portion of the trail, and thus mis-use non-ATV portions of the trail such as Chocoley. He thinks misuse is an unintended consequence of the IOHT designation.

Thomas said that the IOHT is synonymous with walking and biking. They do support snowmobile, ATV, and equestrian use along portions of the trail where the communities have requested it. This works in more rural areas.

Milton clarified that no ATVs are allowed on the M-28 portion of the trail. Tabor clarified that the issue is which trail the IOHTRA will take responsibility for maintaining.

Thomas said the trail is planned for mostly non-motorized use, and it is now becoming a much larger trail system with the Negaunee to Marquette portion under construction. There will be some asphalt paving in the City of Negaunee, then the trail changes to crushed aggregate from Negaunee to Hwy 492 in Marquette Township, then there is another paved portion to the Holiday Inn in Marquette and across the Soo Line bridge and onto the City trail system and out to the Welcome Center in Chocolay Township. It is too expensive to blacktop the entire route. Bikes can ride on the aggregate portion easily.

Jerry Maynard, 146 Lakewood Lane, clarified that the RR portion of the trail is not rural, it's a residential neighborhood, and it's also part of the scenic North Country Trail. He is also concerned about ATV use, and does not want them in the residential area where the trail is heavily used by non-motorized users. He doesn't want to open up the opportunity for the DNR to change their mind in the future and open the trail to ATVs, so he supports the UR for motorized users.

Claire Rose, 176 Riverside Road, supports the UR designation because of the unintended consequences associated with illegal ATV travel that may come with the IOHT designation, and problems with cost of enforcement in the residential area.

Jennifer Bruggink, 673 Lakewood Lane, would be horrified if there were ATVs on the RR. She said her kids use this route often because it is separated from traffic. She wouldn't want to be routed through Harvey if she was on a bike trip with her kids because she thinks there is too much conflict with cars and it wouldn't be a pleasant experience. She doesn't think the DNR decision for ATV use is related to the IOHT designation issue. She doesn't think the tourism benefit for businesses will be that great. (She supports the RR designation for the IOHT)

Deborah Mulcahey, 633 Lakewood Lane, asked why we can't have both trails designated. But this is not the DNR's fault. The reason you can't have snowmobiles travel two-ways along the UR is because no one has acquired land along both sides of US-41. So no matter how much residents would like to get snowmobile traffic removed along Lakewood Lane that will not happen. The snowmobilers coming into Harvey from Marquette have to travel the RR because they cannot travel southbound along US-41 on the east side of the road, and they can't travel in two directions on the same side of the road. She thinks we need to try to get a snowmobile trail outside the residential area. Voters have approved the IOHT where it is currently (RR). She is also concerned about traffic. The intersection of US-41/M-28 is a dangerous intersection and is not safe for kids on bikes. She wants both trails to be maintained even if both are not designated as the IOHT. She said that even though it's not currently an ATV trail that could change. She has sympathy for those living on the snowmobile trail, but mentioned that the State gives Chocolay Township money for enforcement along the trail. She said don't look at tourism as the bottom line. The community pays for the trail. She wants to keep the RR as a trail designated for non-motorized users and look for an alternate trail for snowmobilers.

Holman said the snowmobile trail has long been contentious. He suggested starting with a UR designation and working toward a long-term solution such as separate but parallel non-motorized and motorized trails. There are safety

concerns with snowmobiles. They want to get downtown and so they travel Green Bay Street and it's dangerous. He thinks designating the UR as the IOHT will set the stage for future long-term solutions that make everyone happy.

Jude Emerson, 119 Lakewood Lane, said she is strongly in favor of UR designation as a win-win for residents and businesses. She thinks if the RR is designated as the IOHT, the ATVs will come and create a disturbance. We don't have enough enforcement to take care of the problems.

John Carlson, 274 Riverside Road, said that what is done now is not just for the short-term. We are establishing long-term trends. Once you allow motorized traffic, it sets a base and others will come. Chocoley Township should look at a Comprehensive Plan for the trail users.

Balmer suggested creating a two-way route for snowmobiles through town.

Mulcahey said the problem is in the area of the rock cut.

Balmer addressed enforcement. While he has been on the RR, someone went by on a motorbike. The police came shortly thereafter looking for him, but there was no way they would catch up with him. He thinks they will need an officer on the trail 100 percent of the time.

Mulcahey said that local residents are the worst violators with ATVs.

Carlson said that it's a habit of some ATV users to move from cabin to cabin and there is diminished capacity and drinking involved.

Thomas said he has noticed some confusion. He thinks that when we discuss the IOHT, we should be talking about where we want a walking/biking trail – along the lake or on the business route. It has nothing to do with snowmobiles or ATVs. They have separate trails managed by other groups. The IOHTRA wants to know where we want to have walkers and bikers.

Susan Maynard, 146 Lakewood Lane, said that you can't see the lake from the RR except the 50' stretch where it crosses over the Chocoley River bridge at the mouth.

Alan Rose said that if the IOHTRA wants to make the IOHT a walking/biking trail, they should remove ATVs from their organization user list or their organizational definition because it creates confusion.

Barb Holman, 210 Riverside Road, supports the UR designation.

Paul Charboneau, 174 Riverside Road, seconds Alan's comment and the concerns of the residents to keep the trail residential.

Woodward read written communications from *John Renfrew of 234 Riverside Road*, *Greg McDonnell of 182 Riverside Road*, *Scott Emerson of 119 Lakewood Lane*, and the *Chocoley Area Business Association*.

The *Chocoley Area Business Association* supports the UR designation because it is felt that the extensive marketing and promotional activities will increase tourism for local businesses.

Emerson was supportive of the UR designation for a trail that would be open to snowmobiles in the winter and would be non-motorized only in the summer. He

thought this would benefit the business community (increased traffic) as well as the residential community (decreased traffic). He wants the existing trail through the residential area (RR) to remain non-motorized in the spring, summer, and fall, and for ATVs to be prohibited as incompatible with most users.

McDonnell's comments were based on an understanding of intent to have year round motorization of the RR. He talked about the enforcement difficulties for motorized users (cost, safety, diverting police from other duties), and other issues including trespassing; property damage; conflicts with pedestrians, handicapped and pets; increased maintenance costs; noise; environmental damage; liability; and other nuisance concerns. He wants to maintain the current status and use alternative routes for motorized vehicles.

Renfrew was in favor of the UR designation because that is more appropriate for snowmobile users and would support businesses. This route has been enhanced with the new bridge on M-28 and a paved trail so it should be easy to maintain. Along M-28, it is also very wooded and scenic. He thinks speeding snowmobilers are a danger in the residential area. He thinks the UR designation will reduce snowmobile traffic through the residential area.

Mulcahey said that Chocolay Township is one of the jurisdictions that decided not to allow ATVs to operate on Township roads. This probably lessens the impact on the trails.

Commissioner Discussion

Milton said the Township is looking for a way to maintain trails and not dip into the general fund. The IOHT could take over maintenance of the UR, and the RR would still be there and be open to use even without the IOHT designation.

Sikkema asked who controls what happens on the railroad grade. The IOHTRA representatives confirmed that the DNR would still control what happens on the railroad grade (including user groups) regardless of IOHT involvement. The IOHT can't dictate that – they can only make recommendations.

Thomas said the RR was designated as the IOHT 5 years ago for walkers and bikers, and that's when all of the signs went up. That was the agreement and the other route was not discussed. He has been on that trail several times and has never seen an ORV on the trail even though it's been designated as the IOHT for 5 years.

Several people agreed that ATVs are on the trail, but not heavily.

Mulcahey said that voters passed the millage with the map showing only the trail through the residential area. ATVs were not mentioned. Just walking and biking.

Thomas said that both Chocolay Township and the DNR have said there will be no ATVs. There is no guarantee, but citizens have a lot of influence. We just need to decide where to locate the walking/biking portion of the trail.

Sikkema asked if the IOHT manages any snowmobile trails. The IOHT does not currently manage any ATV or snowmobile trails.

Britton said the IOHT will do some maintenance of ATV trails in other jurisdictions. *Thomas* added this would be in Negaunee and Ishpeming where there are two trails.

Mulcahey asked why we can't have two trails (one motorized and one non-motorized) so we can get the motorized traffic out of the residential neighborhood.

Sikkema answered by saying that in Ishpeming and Negaunee, the two trails are in the same corridor but separate. *Sikkema* asked how does the IOHT decide where they have support for ORV trails?

Thomas said they look for a recommendation from the people to determine trail users.

Fulsher said the west end jurisdictions weren't interested in the IOHT unless they could have a motorized trail. She said it was never the intent of the IOHTRA to tell citizens what they want. For example, the City of Marquette controlled the non-motorized designation in their jurisdiction.

Sikkema wanted to know how the citizens would be assured that the non-motorized designation for the IOHT in our jurisdiction would not be changed.

Britton said the railroad grade is controlled by the DNR and the IOHT would just lease the trail. The DNR would not lose control of that trail.

Holman knows of a community that voted to have a non-motorized trail and then the DNR changed the designation to a snowmobile trail without community support.

Mulcahey said that was Cheboygan, and she worked on that issue. The citizens wanted the changed designation because it was a governor's direct order that it become a snowmobile trail. But she agrees it could happen that the DNR change the designation.

Thomas said we must find a place to meet between user groups in various areas.

Walker said that the community is expressing concerns way beyond the issue of designation. People see the issue of designation as a step toward installing motorized use. The Township would like to remove snowmobiles from the current route, but tried unsuccessfully. However, conditions have changed somewhat with the new M-28 trail, but there wasn't proper planning earlier to accommodate the snowmobile route through town. Ideally this would involve an access road which would be costly. Ideally, separate non-motorized and motorized trails would be maintained. He is concerned that the IOHT designation would increase motorized use (he is not saying that the IOHTRA has anything to do with that).

Fulsher asked if the Township would rather have the RR trail maintained locally (IOHT) or by the State (DNR)?

Charboneau talked about the issue of maintenance. If the UR was designated as the IOHT, the IOHTRA would use the Chocolay millage to maintain that trail, and the DNR would maintain the RR trail, so both trails would be maintained at no cost to Chocolay Township other than the millage. Walkers and bikers could still use the RR trail.

Heinzelman said that the IOHT user survey reflected that people have asked for better surfaced trails, more lighting, parking for trailheads, and more bathroom facilities. Those items are not located along the RR at someone's house. With

the new bridge on M-28, he thinks it makes sense to designate the UR as the IOHT.

Britton said the one-way trail through Harvey is not groomed for snowmobiles because people then interpret it as a two-way trail. When two-way trails are this close to the highway, their lights shine in the eyes of motorists and create unsafe conditions.

Bill Joswiak, 248 Timberlane, mentioned a portion of the trail near his home where there is a hill, curve, slope, and bike trail crossing. Even bikes have trouble stopping in time, but it would be especially dangerous with a motorized vehicle.

Milton said there is an ordinance that limits the time of motorized use.

Tabor said that it seems to him if the RR is designated as a walking/biking trail (IOHT) then it would be more difficult for the DNR to allow motorized use, but if there is a UR designation, it might be easier for the DNR to designate the RR as a motorized trail because now there would be an alternate walking/biking trail.

Someone pointed out that the RR would still be the North Country trail.

Thomas said on the asphalt trail between Ishpeming and Negaunee, the police could not catch the ATV users. The problem was taken care of by the increase in walkers and bikers, especially the old ladies who literally chased the 4-wheelers up and over the berm at the old landfill. It is not the decrease in the usage of the trail that keeps the 4-wheelers off, it's the increase in usage.

A citizen asked for clarification on why there are a variety of trail surfaces. The representatives of the IOHTRA said it is based on finances and cost.

Sikkema said that the trail was paid for by different kinds of grant funding according to the policies of various grant agencies.

Fulsher said the IOHTRA is trying to find out if people prefer certain surfaces, and then they can consider upgrades if warranted.

Sikkema said that this issue came up because the Township would like to have two designated routes. But the IOHTRA only wanted to support one route. They already established the trail on the RR. The question is does the Township want to change the previous agreement? They can either take no action (everything will stay the same), or recommend a change.

Meister said he got the impression that the Township originally wanted the trail to go through the business district. There was confusion about this between the Township and IOHTRA.

Britton said the County planning staff had created IOHT maps that showed spine and spur routes. At the time of the millage, the Township had one of these maps on display, but the spurs were not intended as part of the official route.

Sikkema asked how many years the IOHT has been on that alignment. It's been on the RR for 5 years. *Sikkema* asked for confirmation that if the designation is not changed, it will stay like it's been for the last 5 years. The IOHT position hasn't changed on the uses. The designation impacts the maintenance agreements. If the Township wants the UR designation, the IOHTRA would have

to change the mile markers and interpretive sign locations.

Tabor asked if the IOHT polled users on the RR portion of the trail to see where they are from? They have not.

Thomas said that scenery attracts people from other areas. The IOHT is advertised as a nature trail. There are currently 14 interpretive signs.

Alan Rose reiterated that the neighborhood wants more protection or assurance that the RR will stay a non-motorized trail, and he thinks this assurance would come with a UR designation for the IOHT. The RR designation would give less assurance.

Wayne Dees, 512 Woodvale Drive, said that as a retired appraiser, he understands concern for property values with motorized traffic coming through. He asks if social engineering can be done on the RR to design it so motorized traffic can't come through?

Thomas said bollards can be put up to keep ATVs out at trailheads, but not the whole trail system. They can get around them.

Bruggink said that ATVs go on residential streets and on the lake and ice too. You can only do what you can to minimize it.

Meister wants to encourage more motorized traffic through the urban area, not the residential area. So he would recommend the UR designation.

Heinzelman would support the UR designation to increase tourism, and because he thinks people on road bikes are looking for better trail surfaces.

Tabor said the issue is which trail the IOHTRA will maintain (yes they are using our money to maintain it). He thinks the RR will mostly be used for locals, and not as a tourism trail.

Meister asked for clarification on the financial issue. Is there a difference in cost for the Township? With an RR designation, the Township would maintain the UR. With the UR designation, the DNR would maintain the RR and the IOHTRA would maintain the UR.

Sikkema said that currently MDOT maintains the trail along US-41. The M-28 trail is owned by the Township.

Commissioner Decision/Recommendation

Motion by *Heinzelman*, second by *Milton*, that the Chocolay Township Planning Commission recommends that the Township Board seeks designation of the urban route through Chocolay Township (route from the Welcome Center through Harvey) as part of the Iron Ore Heritage Trail, based on citizen comment and the following compelling reasons:

1. Tourism benefit for businesses
2. Better trail surface for users
3. Requirement for less maintenance

Vote: Ayes: 3 (*Heinzelman, Milton, Meister*)
MOTION CARRIED

Nays: 2 (*Sikkema, Tabor*)

The representatives of the Iron Ore Heritage Trail Authority suggest that this decision will impact their Recreation Plan (amendments will be needed), so this item needs to be addressed by the Township Board as soon as possible, and certainly before the end of the year. They need a letter with the decision.

- C. Consideration – Receive comment on proposed **Amendment #34-12-04 Home Occupations**, and prepare for presentation to the County and Board.

Planning Director Comments

Woodward said she provided public education sheets on this topic at the meeting. Attorney Mike Summers reviewed the proposed amendment and said there were no legal issues, but he offered some minor suggestions for clarity. *Woodward* incorporated those suggestions into a revised document for Planning Commission consideration. *Heinzelman* noted (from the staff memo) that it was the Attorney's opinion that the revised document could be adopted with no need for an additional public hearing on his revisions. *Woodward* verified this and said there would be additional opportunities for a public hearing if the Planning Commission decides to review the comments from the County, or if the Township Board wants to hold a public hearing with their review. The legal requirement is one public hearing on a text amendment.

Woodward presented the proposed revisions which relate to the definition, fees, relocation of the home occupation, inspections, and hazardous materials.

Sikkema asked if "noxious" is an enforceable term. Peter Ollila offered comment that this was too subjective and suggested substitution of the term "hazardous substances" or "hazardous wastes" which are legal terms.

Mark Maki objected that the document was being changed as we speak. *Woodward* clarified that she was just presenting the revisions suggested by the Attorney that will be discussed by the Planning Commission this evening, then the Commission will hear public comment, and they may or may not approve changes to the document.

Maki suggested postponing the remaining public hearings till the next meeting because the Commission isn't going to want to discuss this for another hour and a half (it's 9:30) and he has a lot of comments and suggestions as do others. He doesn't want to give public comment then have the discussion delayed. *Heinzelman* and *Meister* want to at least get through the Home Occupation discussion. *Woodward* said the Commission could decide to amend the agenda to hold the two remaining public hearings on home occupations and signs, then postpone the discussions to the next meeting, so at least everyone who had come for public comment could still be heard tonight.

Maki felt the attorney should have looked at the document before it was offered for public hearing. *Woodward* said that the suggested revisions were made available to the public before the public hearing as part of the agenda packet that was available online. *Woodward* suggested the Planning Commission hold the public hearing, then send the amendment for County comment, then review the County comments and decide if another public hearing is needed before sending the amendment to the Township Board. *Maki* disagreed and said the process is for the amendment to go to the Board after County comments. *Maki* again

suggested postponing. *Meister* and *Heinzelman* again suggested proceeding with the Home Occupation amendment. *Maki* said to remember that Mike Summers reviewed the 2008 ordinance and then would not enforce it after approving it, and not to put a lot of credence in all that. *Milton* opened the public hearing.

Public hearing

Peter Ollila, 633 Lakewood Lane, submitted a letter of public comment. He reiterated his comment on noxious substances vs hazardous substances. He congratulated the Planning Commission for getting close to a decent ordinance but said there are a few problems yet. On page 5, motor vehicle repair is allowed as a home occupation in the AF district. He doesn't think this was recommended in previous meetings. Page 5, G #5 (g) under examples of Type II home occupations, he is concerned that vehicle parts repair is listed in conflict with a previous section that says this is not allowed in all areas. It's confusing whether you can do this or not. He thinks we should drop (g) under examples. In the examples (h), he doesn't understand what an assembly operation is. He thinks of Ford Motor Company when he hears it. He thinks we should drop this example or define. He is concerned about the notice provisions for conditional uses, because he sees none in this document. He thinks ½ mile notification distance is appropriate. He wants the amendment to go to the County for review.

Dick Arnold, 312 West Branch Road, asked if, for motor vehicle repair, the Township will require a mechanics state license, Federal ID license, and Michigan sales tax license, etc? Because the zoning ordinance says that if it's less restrictive than another ordinance, the more restrictive ordinance must be enforced.

Sikkema said the intent is not to take over enforcement for other agencies, or see if people have those licenses, the other agencies do that. We won't duplicate their efforts. For example, we wouldn't say you can't live in the Township unless you pay your Federal taxes. That's someone else's requirement to enforce.

Mulcahey said, "What Dick Arnold is saying is that if you're going to allow motor vehicle repair operations in the Township, wouldn't you want them to have the proper certifications and be licensed by the State of Michigan?"

The Planning Commission said they absolutely would want them to have that, but Chocoley Township wouldn't be the one to enforce that. *Mulcahey* noted the enforcement section of the amendment that says you can revoke the home occupation permit if the use is in violation of other statutes, ordinances, etc.

Arnold said he doesn't want motor vehicle repair in the AF district because it's not listed as a permitted use in that district. He said nonconforming lots are only entitled to permitted uses. He said there are 396 nonconforming lots in the AF district – he thinks the Township should have made all those properties R-1 and made farming a conditional use in that district. He doesn't think the Township should jeopardize everyone's property values for three farmers. He thinks the zoning ordinance does not allow motor vehicle repair on a nonconforming lot because it's not listed as a permitted use.

Milton clarified that motor vehicle repair would be considered a permitted

accessory use by conditional use permit in the AF district per the home occupation language. *Meister* said that a conditional use that is approved is then a permitted use.

Arnold said home occupations are part of the underground economy and don't pay taxes so why bend over backward to accommodate them.

Jill Bradford, 555 Little Lake Road, said home occupations are like apple pie to Americans, whether you're a seamstress or a blacksmith. They are entrepreneurial incubators. They can be cottage industries. They kept people alive in the Great Depression. These occupations drive the work ethic into kids and teach things schools fail to teach. They are the beginning of business in the community. You have some people trying to stop home occupations when you have other people that have to stay at home to take care of their kids who have sacrificed their hospital career. They stay home and try to make a living any way they can. They are not cheaters – they pay taxes. There will be cheaters and non-cheaters in anything that happens on earth. She takes offense at *Arnold's* comment because some people take cash instead of credit because it costs too much to accept credit. She wonders if the \$250 conditional use fee will stop some little old lady with good ideas from doing business. They don't have much money. There are mother with ideas that may end up as businesses on Main Street. But you don't know till you try it, and they can try the business out before risking everything they have on the overhead. She agrees with keeping water safe. She isn't sure about prohibiting firearms sales as home occupations. It's the American way for hunters. She doesn't think you should penalize people for trying to make a living an alternate way. Don't criticize them - maybe you should think of something nice about them. It's a better way than knit-picking.

Arnold said that when people do auto repair as a home occupation in their garage, they take business away from people who have businesses, provide health insurance, and pay taxes.

Wayne Dees, 512 Woodvale Drive, to the fee comment, asked why his taxes should subsidize home occupations (if fees don't cover the costs of public hearings, etc)?

(general discussion among the audience ensued)

Milton said it is important to have a cottage industry until it becomes so viable that employees are needed, then it can move into the business district.

Maki said he was the Zoning Administrator from 1977 to 2002, and for at least 20 years of those years they did not have fees for home occupations. They may have had enforcement issues. They tried to keep them very low key and things worked out fine. In around 2000 the Township changed the zoning ordinance to set up a two tier system. That lasted for seven years. He doesn't know what the fee was, but somewhere along the line the fees have changed drastically, and are now 2 ½ to 3 times that of West Branch and Skandia. The two tier system worked well but the Township didn't require a permit and didn't keep track of them. They failed to renew some permits. There was lack of enforcement and administration. In 2008 the Township changed the ordinance and brought in the \$250 fee because some lady said she can't pay the \$250. So a lot of time has been spent on this, and the Comprehensive Plan and Rec Plan are out of date

because we spend too much time on signs and home occupations. Enforcement has not done and that's why we have sign problems, and that's why they're trying to write the sign ordinance to fix the problems so they're not in violation. So we go around and around in a circle because they haven't been doing their job. In 2007 we had fine home occupation provisions and they changed it and made them a conditional use. Again they were never enforcing it so it never came up except for that lady. So it started with the \$250 fee which could have been easily resolved by going back to the Board and requesting a reduced fee for home occupations. Instead we got into this process that went to the County once, came back, the Township Board sent it back, they had a joint meeting, the Board said no motor vehicle repair but it's still in the language in the AF district, or maybe in all districts as a conditional use. The Board said no, don't have it in there. They said what do you want, and we told them, and somewhere along the line it went back in the ordinance. The Board said go back to the 2007 ordinance that was working and I don't think we've gotten there.

Jennifer Bruggink, 673 Lakewood Lane, doesn't want a gun dealer across the street. She hopes the auto stuff is prohibited in all districts. She has no faith it can be clean.

Deborah Mulcahey, 633 Lakewood Lane, said that as a result of the Home Occupation amendment and future agenda items dealing with Lake Superior rentals, she made a FOIA request to Chocolay Township for three lists and one letter. She received a response from the clerk that she was to pay \$222. She checked with Woodward and Lawry who said the lists don't exist. Why should the Township charge for that? She thinks it's a problem that the Planning Director will be responsible for enforcing the ordinance, but does not know the nonconformities that exist. She thinks there are contradictions. On page 2, paragraph 5 of the FAQ sheet it says the use provisions are slightly more prohibitive than the current ordinance. The sale, storage, or manufacture of motor vehicles would be prohibited in all districts (current regulations allow these activities in the AF district). No change is proposed to motor vehicle and parts repair, which is currently prohibited in the R-1, R-2, MFR, and WFR districts, but is not prohibited in the AF district (may be allowed through conditional use permit in the AF district). On page 4, G of the proposed amendment, it says Type 2 Home Occupations shall be a conditional use in all districts (when in conformance with following requirements), but on page 5, G (3) it says motor vehicle repair may be permitted as a Type 2 home occupation only in the AF district. But on page 5, G (5) (g) vehicle parts repair is listed as an example that is presumably allowed in all districts. This is confusing and is not what was said at the joint meeting. She thinks it's contrary to the Comprehensive Plan. She thinks the notification distance should be ½ mile, and that the Planning Commission shouldn't wait for the State of Michigan to change their requirements. In C #2 of the approval process, where it says "may" require public hearing, she thinks it should say "shall". She says don't limit hours for inspection to business hours because these people work non-business hours because they have a day job. In C #3 (d), she says the Township doesn't have a choice but to go through the Administrative Procedures Act, including an informal hearing then a full-blown hearing, and this takes time. On page 3, #4 Operational Impacts, she doesn't know what "normal senses" means. Noise is

not defined. The quantity is not defined in hazardous wastes. Substantial traffic volume is not defined. She agrees with Arnold about not violating the zoning ordinance to create other opportunities.

Milton said they want to make a document that can be understood by laymen.

Mulcahey said that in the 2008 court case, the judge said it was illegal for the vehicle parts repair business to be in a residential area because it was more appropriate in a commercial area pursuant to zoning. She still objects to vehicle parts repair being allowed in all districts and motor vehicle repair being allowed in the AF district.

Maki made comments about contractor yards. *Milton* said it sounds like we have more work to do.

Motion by *Milton*, second by *Sikkema*, to table the rest of the agenda until the December 3 Planning Commission meeting.
(General discussion ensued among the public).

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

The public asked if the public hearing was adjourned. The Planning Commission said it will be taken up at the next meeting.

Commissioner Discussion

Postponed till December 3 meeting.

Commissioner Decision/Recommendation

Postponed till December 3 meeting.

- D. Consideration – Receive comment on proposed **Amendment #34-12-01 Signs**, and prepare for presentation to the County and Board.
1. Planning Director comments
 2. Public hearing – limit 3 minutes per person
 3. Commissioner Discussion
 4. Commissioner Decision/Recommendation

All postponed till December 3 meeting.

VII. ADJOURNMENT

Milton adjourned the meeting at 10:35 p.m.

Submitted by:

Planning Commission Secretary
Andy Sikkema

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, December 3, 2012

I. MEETING CALLED TO ORDER BY: Kendell Milton at 7:30 p.m.

ROLL CALL

Members Present: Mr. Kendell Milton (Chair), Mr. Andy Smith (Vice Chair), Mr. Andy Sikkema (Secretary), Mr. Gary Heinzelman, Mr. Tom Mahaney, Mr. Eric Meister

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES – November 5, 2012

Andy Sikkema noted changes to his comments on the Iron Ore Heritage Trail. Woodward will use the recorded minutes to make revisions to reflect questions posed as statements and other corrections for noted comments.

Motion to approve the minutes as corrected by: Heinzelman

Second by: Meister

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Add approval of 2013 meeting dates as New Business IX (B).

Motion to approve the agenda with additions by: Milton

Second by: Sikkema

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. CONSIDERATION OF RESIGNATION OF CHAIR FROM OFFICE

Milton noted he had resigned as Chair. He would like to nominate Gary Heinzelman as Chair.

V. ELECTION OF NEW CHAIR

Motion to nominate Heinzelman to serve as Chair: Milton

Second by: Meister

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

VI. PUBLIC COMMENT

None

VII. PRESENTATIONS

None

VIII. OLD BUSINESS

A. Consideration – Receive comment on proposed **Amendment #34-12-04 Home Occupations**, and prepare for presentation to the County and Board.

Planning Director Comments

Woodward said this item was postponed from the last meeting during the public hearing. The hearing was re-noticed in the Mining Journal. If we can finalize the language at this meeting, the amendment can go before the County and a first reading of the Board in January. Attorney Mike Summers reviewed the proposed

amendment and said there were no legal issues, but he offered some minor suggestions for clarity. Woodward incorporated those suggestions into a revised document for Planning Commission consideration (agenda item VIII.A3). There are proposed changes to the definitions for home occupations and motor vehicles and additional factors for consideration for Conditional Use approval.

Public hearing

Dick Arnold said according to the zoning ordinance, if it's a nonconforming lot, it can only have permitted uses. He asked if that is still the case. Heinzelman said this would be discussed during the commissioner discussion. Arnold had a question on page 2 of the zoning ordinance – relationship of other laws. If state law is more restrictive than Township law, then you have to enforce the more restrictive. He wonders why it doesn't state that for motor vehicle repair you have to be certified by the State of Michigan. He also wonders since home occupations are considered a business, is there a ruling that they have to get a tax number which is also a requirement? He can't see how, unless you change the zoning ordinance, you can NOT require those things.

Jill Bradford wanted to make sure the proposed anti-firearm language (prohibition of the sales of firearms as a home occupation) has been eliminated from consideration as stated in the staff memo. She said that people who deal in arms are highly regulated by ATF and the FBI and other agencies. She feels gunsmithing is fairly safe with no hazardous materials involved.

Commissioner Discussion

Commissioners considered the proposed changes which were made available for both the November and December meetings as part of the public packet. They started with Mike Summer's five suggested changes. The first clarified that a fee is required, as reflected in Section 6.9(C)1 of the proposed amendment. This change was approved. Summers also suggested tightening the hazardous materials provisions to say that "no noxious materials used or produced in the home occupation shall be disposed of on-site." It was suggested that the word "hazardous" be substituted for the word "noxious" because "hazardous" is a term used by the Environmental Protection Agency. This change was reflected in the proposed Section 6.9(D)4(c). Sikkema also suggested adding the words "stored or" in the sentence, "no hazardous materials used or produced in the home occupation operation shall be stored or disposed of on-site . . ." He doesn't want people to think they can store wastes on the property without a plan for disposal. Heinzelman asked if there would be a time limit for disposal. Sikkema also suggested quantity could be a trigger for removal, but said some of this has to come down to reasonable discretion. Commissioners didn't want to restrict people from storing supplies to be used under this provision. Heinzelman suggested this could be addressed on a case-by-case basis in the conditional use provisions. Meister said it might also be relevant in a non-conditional use situation.

Milton had a question about the provisions in Section 6.9(D)5 "no persons other than full time residents as named in the application shall be engaged in the home occupation", yet under permitting Section 6.9(C)2(d) "if the resident applicant is other than the owner of the property, the owner must authorize the application". To him this means the owner has to be the authorized applicant, yet only the

resident is to be engaged in the home occupation. He wondered if there is another line on the application for the person who is applying. It was clarified that the resident is always the applicant, but if they are not the owner, then the property owner also has to sign the application. Woodward will create the proper application. Sikkema clarified that the first provision deals with who can work in the home occupation, and the second deals with who can apply.

Meister suggested we could say that hazardous wastes requiring disposal cannot be stored for more than 6 months or some other time period. Woodward was concerned about how she would keep track of the amount of time something was stored for enforcement purposes. Sikkema said there should never be more than one collector container for wastes. Mahaney sees difficulty in quantifying a specific amount of allowable stored waste. Woodward wasn't sure we should be concerned about accumulations of waste products that are properly stored and not a danger to the environment because further detail could make enforcement difficult. Sikkema noted the main thing is that it is not disposed of on-site. Sikkema suggested removing the word "used", so the sentence would read, "no hazardous materials produced in the home occupation operation shall be stored or disposed of on-site . . ." This change was approved.

Smith asked how often inspections would occur. Woodward said this would vary based on the type of home occupation and whether there were perceived risks or complaints.

Summers suggested additional language for Section 6.9(C)3(a) Enforcement. This was approved.

Section 6.9(D)6 reads "no advertising shall use the residential address of the home occupation. This provision does not apply to business cards". Summers stated it is unclear whether third party advertising is allowed, such as Yellow Pages and other off-site informational sources. Commissioners were in agreement that Yellow Pages are clearly advertising and advertising the address there is not permitted. No change was made.

Commissioners discussed whether a home occupation permit was transferable to another person (new resident of the home). Commissioners felt it was clear that the use shall terminate automatically when the applicant no longer resides in the dwelling unit, so it cannot be transferred to a new resident.

Milton asked if the home occupation would have to be re-approved if the non-owner resident (tenant) is the applicant and there is an ownership change after approval. Woodward thought this would be up to the new owner to work it out with the tenant, and Sikkema noted that there would probably be a new lease agreement at that time.

Commissioners approved a revised definition for home occupation to read "a business, profession, occupation, or trade conducted by an occupant of a dwelling unit as a secondary use subordinate and incidental to the use of the dwelling that meets the standards of Section 6.9" instead of "a commercial activity in a residential zoning district, carried on by an occupant of a dwelling unit as a secondary use subordinate and incidental to the use of the dwelling and meets the standards set out in Section 6.9." Woodward advised this change partly because home occupations are also allowed in the AF district, not just

residential zoning districts.

The commission approved the addition of “personal watercraft” to the definition of motor vehicle in Section 6.9(G)3. They also approved additional considerations for the approval of conditional uses in Section 6.9(G)4, including “the zoning district; size of lot; distance to adjacent land uses; screening and buffering”.

Smith asked if we address licensing. Woodward said this is something that is required by other agencies, and we would not do enforcement for other agencies such as the DEQ. We do work with the DEQ and notify them of issues of concern to them. Heinzelman said we had discussed this previously and determined it was not our responsibility. Smith asked how we would know that home occupations are following all other rules and regulations. Mahaney said we might permit a tax accountant without being concerned if they are licensed. Sikkema said that if we approve a home occupation, and then find out that they do not meet the requirements of other agencies, we can revoke their permit. Meister says it goes beyond the scope of the job to expect the Zoning Administrator to be aware of all applicable laws, although if the Zoning Administrator becomes aware of something they could notify the appropriate agency. Smith said we should at least ask if they have the appropriate licenses, etc. Sikkema said on the application we can ask if the activity requires other licensing and if so, have they obtained it. Smith suggested addressing it in Article 16 Conditional Use Standards so there is a checklist of things to ask for approval for any conditional use. It would apply to every conditional use. We would ask if there is any other licensing required, and then we could revoke the permit if the license is not obtained. Mahaney asked what would happen if a conditional use was approved and we were not aware of licensing required by the State, and a couple months later become aware of it and they don't have the license but they hold the permit, what would happen? Woodward said we would give them the opportunity to obtain that license from the appropriate agency, and if they don't get it, we could start the revocation process per the statement in Section 6.9(C)3(b)(iii) that says permits for a home occupation may be revoked at any time if the use is in violation of any statute, ordinance, law, or regulation.

Heinzelman affirmed that an additional public hearing is not needed for this amended version. Woodward said that is correct.

Citizen Jill Bradford, 555 Little Lake Road, asked if farms are permitted to have migrant workers. Woodward said farms are not considered to be home occupations – they are a permitted principal use.

Woodward was asked to address Arnold's concern about permitted uses on nonconforming lots. Arnold asserted that nonconforming lots (in the AF district) can only have permitted uses, so motor vehicle uses can't be allowed as home occupations because they are not a permitted use in the AF district. He refers to Section 6.4 of the Zoning Ordinance that reads: “Nonconforming lots, any lot of record may be used for permitted uses even though the lot area and/or dimensions are less than those required for the District in which the lot is located, provided that yard dimensions and other requirements of the District, not involving lot area and width are met.” Arnold also referenced a list of permitted principal uses for the AF district (page 28 of the zoning ordinance) which does not include motor vehicle uses. Woodward explained that every lot (not just

nonconforming lots) shall contain only permitted uses. She said home occupations are accessory uses, not principal uses, and they are permitted per Section 6.9 of the Zoning Ordinance (Home Occupation provisions), and the list of permitted principal uses does not apply to home occupations. Whatever activity is approved as a home occupation per Section 6.9 of the Ordinance is then considered a permitted accessory use to the principal use which is the residence in that district.

Arnold said he is concerned about people with automotive uses who dump hazardous substances on the property, and it's hard to keep track of their activities but it endangers the water supply. Mahaney said it was more of a problem when we didn't have disposal sites set up. Sikkema said he would be hard pressed to permit a vehicle repair business as the primary income opportunity for a homeowner. It's different if it's supplemental income as a hobby. He can see the public's concern about someone's primary car repair business next door, but thinks they are protected by our size and operational impact controls. Meister said the restriction on number of employees also provides protection. Meister said we should ask about disposal methods for hazardous wastes on the application. Smith said this should be asked of all conditional uses per Article 16. Mahaney said we should also ask about quantities of these materials.

In re-addressing motor vehicle uses, Woodward explained the current ordinance and proposed ordinance provisions. Currently vehicle repair, parts repair, assembly, storage, sale, or manufacture, and any other work related to motor vehicles and their parts are prohibited in only the R-1, R-2, MFR, and WFR districts –they are NOT prohibited in the AF district, but may be permitted per the conditional use process. The proposed amendment is more prohibitive for the storage, sale or manufacture of motor vehicles because it prohibits these activities as home occupations in ALL districts. This is probably ok with everyone. The proposed amendment represents no change from current language for the permitting of motor vehicle repair (could be approved as a conditional use home occupation only in the AF district). Some Board members may want this to be more prohibitive. As currently proposed, the amendment would be more permissive than current regulations for motor vehicle parts repair and assembly which could be permitted as a conditional use in ALL districts. Woodward offered a proposed definition for “assembly operation” if one is needed. She cautioned that it may not be clear what is defined as motor vehicle repair vs. motor vehicle parts repair, so a distinction could be created for “major vehicle repair” vs. “minor vehicle repair” to provide more clarity.

Sikkema said this all came up because of making alternators for old cars as an example of motor vehicle parts repair. There are intricate small parts that don't require heavy machinery and power washers – things that would typically be worked on in a garage or basement. He said in an R-1 setting, transmission repair may be inappropriate. Smith noted the inconsistency with allowing people to work on parts for snowblowers or lawn mowers, but not cars. Sikkema said no one would think allowing repairs to car radios would be inappropriate in a residence, but something like a transmission is questionable in a subdivision. Smith noted the quantity of repairs is significant in relation to hazardous wastes, etc, so hopefully the operational impact provisions and enforcement will protect

people from violations. Milton noted that what was previously needed was stronger enforcement provisions. Sikkema noted no one has come in to speak to support automotive parts repair, and there was a whole room of people opposed to it, and the Township Board isn't supportive of it. So they could spend all this time working on it and the amendment may not get adopted regardless of the good things in the amendment. Mahaney was worried about less visibility associated with home occupations vs commercial businesses, and what they might feel they can get away with. He thinks it's a contentious issue that should be prohibited. Smith stressed the importance of facilitating the development of small businesses.

Heinzelman clarified the issue is whether to keep Section 6.9(G)5(g) or get rid of it. Woodward said if it is determined that vehicle parts repair is inappropriate in residential districts, then it should be added to the list of prohibited uses in Section 6.9(E)1 or 2.

Milton spoke about solar energy and the potential hazard associated with the batteries that would not preclude the permitting of the use.

Smith said the most positive thing to come out of this ordinance is to make it more reasonable and less difficult for appropriate home occupations to start up. The Township will be more aware of them, and can ask the right questions for those that are conditional uses. Sikkema again cited the lack of support for vehicle parts repair as indicated by citizen input, making it questionable if there is a demand. He reiterated lack of support. Mahaney said citizen comment should be taken into consideration. Sikkema said this is a good amendment, better than what we have, but this is the one questionable issue that could kill it.

The commission was polled for their opinion by Heinzelman. Two members would like to leave vehicle parts repair as conditional in all districts, and four members think it's best to prohibit it in the residential districts (conditional use in AF district only). The commission agreed to move motor vehicle repair and vehicle parts repair to 6.9(E)2 where it would be prohibited in the four residential districts only.

The term "vehicle assembly" was compared with "vehicle manufacture". Woodward felt that "manufacture" denotes processing raw materials into new products through chemical or mechanical processes, while "assembly" means putting together pre-made parts. There are no objections to "assembly operation" being a potential conditional Type II Home Occupation, however, the Commission decided to add "vehicle assembly" to Section 6.9(E)2, to read, "Animal boarding facilities including kennels, commercial stables, and other similar uses; and motor vehicle repair, vehicle parts repair and assembly are prohibited as home occupations in the R-1, R-2, MFR, and WFR districts."

Commissioner Decision/Recommendation

Milton moved, and Sikkema seconded, to send Home Occupation Amendment #34-12-04 version VIII.A.3 as changed to the County and to the Township Board for review and comment at their earliest possible date. (Changes include adopt all highlighted text; Section 6.9(D)4(c) to read in part "No hazardous materials produced in the home occupation operation shall be stored or disposed of on-site . . ."; delete Section 6.9(G)3 and Section 6.9(G)5(g) and move "motor vehicle repair", and "vehicle parts repair and assembly" to Section 6.9(E)2; and move the

definition of motor vehicle to the definition section.)

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

- B. Consideration – Receive comment on proposed **Amendment #34-12-01 Signs**, and prepare for presentation to the County and Board.

Planning Director Comments

The attorney noted no legal issues. Woodward discussed his comments regarding complexity, and Summers agreed the complexity is probably needed for sign provisions. Woodward said she could add a table to Section H to clarify sign types and provisions per district for better readability. This would not be considered a significant change necessitating another public hearing. Sikkema asked about acceptance of the electronic sign provisions.

Public hearing

Bradford asked if the Commission intends to prohibit signs for home occupations, and this was affirmed. She urged them to consider permitting a small sign for delivery confirmation. She is against a total prohibition which comes across as “anti-home occupation” in tone. Woodward noted that former home occupation language permitted home occupation signs, so there will still be existing nonconforming signs if the prohibition is adopted.

Commissioner Discussion

Milton is opposed to lighted signs in residential districts, and noted some home occupations had begun to light their signs. Meister asked for clarification of current sign provisions for home occupations. Woodward said that currently signs are not permitted as “exterior evidence” per home occupation provisions. She said the Commission could allow content related to a home occupation to be included on the permitted residential signs. No one wanted to re-address this issue. Meister inquired about the time limit for temporary banners, if the 90 days pertained to exhibiting of one particular banner. This was affirmed. Heinzelman addressed Summers’ question about the lack of clarity for electronic vs animated signs. It was felt these provisions are clear in the proposed amendment. Animated sign provisions don’t apply to electronic message signs. Woodward asked Summers if he thought the same illumination standards for electronic message signs should be used for all illuminated signs, and he didn’t think this was necessary. Woodward was not sure the provisions as written would protect against the colored lights all around the sign such as other Holiday Stations have adopted. No one wants colored lights as a border on signs. It was noted the illumination standards require fully shielded fixtures that minimize glare, and are not visible by pedestrians, motorists, or adjacent property owners. It also says bright colored lighting is prohibited on signs except as part of an electronic message sign. It was questioned whether bright lights would be allowed all around gas station canopies since these aren’t signs. Woodward said most of them do have signs on them. It was noted the outdoor lighting standards may have to be revised to be consistent with these provisions.

It was noted that Dan Landers of Cook Sign had said that we would probably get smaller electronic signs if we allow them to scroll the message. No one suggested a change to the electronic message sign provisions.

Smith asked how distance from travel lane would be calculated for the Togo's building. Which travel lane would be considered? Highway M-28 and US-41 would be the pertinent travel lane. All wall sign areas would be added together to determine if they exceed the maximum allowed wall sign area.

The only change would be the addition of the chart.

Meister asked if we know the illumination level of the Holiday Sign. We do not. He asked where we got the illumination standard, which was from a national study. Woodward noted we need to obtain a measurement device.

Commissioner Decision/Recommendation

Milton moved, and Meister seconded to send Sign Amendment #34-12-01 as changed with the addition of a chart to the County and to the Township Board for review and comment at their earliest possible date.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IX. NEW BUSINESS

- A. Consideration – Prepare comments on the Iron Ore Heritage Trail 2013 Draft Recreation Plan.

Sikkema thinks there is difficulty in the IOHT wanting to encompass all uses in different sections as stated on page 13, "Provide a quality user experience and safe trails for the diverse trail users". They could not assure our community that ATVs would not be allowed on the trail that the DNR controls. This creates a difficulty for them in relation to what the community wants. He thinks they need to better define which uses are allowed per section of the trail in the plan. Woodward noted this is shown on page 6, but the map resolution is poor and the scale does not allow a detailed view. Heinzelman agreed this is a difficulty.

Smith said he understood that Britton was asking for support for the route location, but the IOHTRA already had support for the rail trail. Heinzelman noted that this was before the alternative urban trail was available, and now most participating citizens support the urban trail as the designated route. Smith noted that from the intersection of M-28/US-41 to the LSI bridge it is a designated 2-way snowmobile trail. Nothing is proposed (for designated snowmobile route) from intersection to the Welcome Center. It is currently only a one-way trail north from the intersection to the Welcome Center. Sikkema said snowmobiles are allowed to travel along any state highway in the direction of traffic at the furthest edge of the right-of-way.

Woodward noted resistance on the part of the Iron Ore Heritage Trail Recreation Authority (IOHTRA) to adopt the urban route as the designated route instead of the rail trail. The idea is that the DNR doesn't have the money to mow the trail, but the IOHTRA would take care of summer maintenance along that trail. The IOHTRA tabled the decision till the December 19 public hearing.

Sikkema also noted there are no items in the Action Plan that pertain to Chocolate Township, even though we have invested in the trail system. We shouldn't pay a price to be a member of the group without actually receiving some services, such

as maintenance. He thinks maintenance activities should be addressed in a more detailed manner in the form of an action or maintenance plan so the Township would know the expectations.

Smith asked about the millage money and what it funded. It was clarified that none of the Chocoday trails were funded by the IOHTRA. He said the millage money was to go for development and maintenance, but there have been no maintenance agreements thus far. There are no criteria or restrictions on how the millage will be spent. Woodward noted there are no appendices included in the review document so we can view their By-Laws or other documents to see if this is addressed. Who will receive the money to do the maintenance? Smith noted that part of the millage monies could be returned to the Township to perform maintenance activities instead of being spent on equipment, for example. Sikkema noted that Chocoday Township does have a representative on the IOHTRA who represents our interests.

Woodward presented these comments for inclusion:

- Page 6 map resolution is poor
- Page 12 typo “Apprendix C”
- Page 15 – The Chocoday Township boundary starts at the Welcome Center, and thus it is not accurate to say that the rail trail “hugs Lake Superior” as there is quite a distance and a dense wooded buffer between the trail and the Lake.
- To highlight how the rail trail intersects with water bodies in Chocoday, you could say that the rail trail bridges the Bayou and the Chocoday River, and provides occasional river views near Harvey. The only public access to Lake Superior in Chocoday Township for pedestrians (accessible from the rail trail) is at the Welcome Center, but people boating on the Chocoday River can access Lake Superior at the mouth.
- Page 15, Connections - the rail trail in Chocoday Township provides access to the Chocoday Marina and Park (via Green Bay Street), but also Lion’s Field, the NMU Golf Course, and the Kawbawgam Pocket Park.
- Add a section commenting on future spurs and other connections throughout the region. In particular, even if you don’t designate it, we want to highlight our urban trail system through Harvey that provides an alternative paved surface, lighting, safe ADA access to refreshments, bathrooms, and other recreation areas including the Silver Creek Recreation Area, Chocoday Community Gardens, Willow Farms Therapeutic Riding Stable and the M-28 fishing site.
- Add a section on future envisioned collaborations.

The Commission accepted these comments to pass along to the Iron Ore Heritage Trail Recreation Authority. Smith said he agrees it would be best if the IOHTRA would designate both trails, even if they only maintain one trail utilizing our millage money. Even if they adopted both routes, there would be very little maintenance on the urban trail because the property owners and adopt-a-tree citizens maintain most of it, so most of their effort could go to maintenance of the rail trail. Woodward noted it is a unique situation in our Township, and it doesn’t seem that the IOHTRA is set up to address this in a flexible manner instead of a

formulaic one. They fear setting a precedent for other areas.

- B. Consideration – Approve 2013 meeting schedule. No difficulties were noted and dates were approved. It was not anticipated that any meeting would be eliminated because there is no shortage of agenda items. Mahaney requested the meeting packets go out Wednesday or Thursday. It was noted that the packet is available on the website as well, or can be e-mailed digitally.

X. PUBLIC COMMENT

Bradford said “good job”.

XI. COMMISSIONER’S COMMENT

Milton said “nice job”. Smith asked about the vacant property on Silver Creek Road that was considered for purchase. Woodward will get an update. It was noted we need to change the agenda format so that a motion is not needed to adjourn.

XII. DIRECTOR’S REPORT

- A. Report – Woodward updated the Commission on the Iron Ore Heritage Trail Board meeting regarding the route through the Township.

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, January 7, 2013

I. MEETING CALLED TO ORDER BY: Gary Heinzelman at 7:30 p.m.

ROLL CALL

Members Present: Gary Heinzelman (Chair), Andy Smith (Vice Chair), Andy Sikkema (Secretary), Bernie Stanaway (Board Rep), Tom Mahaney, Eric Meister

Members Absent: Kendell Milton

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES – December 3, 2012

Andy Sikkema noted changes to his comments on Home Occupations.

Motion by Meister, seconded by Sikkema, to approve the minutes as corrected.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Correction of date on the agenda.

Motion by Sikkema, seconded by Smith, to approve the agenda as corrected.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

None

V. PRESENTATIONS

None

VIII. OLD BUSINESS

A. Consideration – Discuss proposed **Amendment #34-12-01 Signs** after the addition of the tables. Planning Director discovered a need for clarification on several items in order to accurately complete the tables.

Planning Director Comments

Woodward noted that Attorney Mike Summers said that an additional public hearing would only be needed if the Commission made a change that was material in nature as opposed to strictly a clarification. If it was determined a public hearing was needed, it could be held at either a future Township Board meeting or Planning Commission meeting.

Commissioner Discussion

Regarding the exempt residential name/address signs, a clarification was needed on the types and number of signs allowed in relation to the maximum square footage. The Commission discussed either allowing one sign per lot (at the appropriate 8 or 12 square feet maximum) or allowing unlimited numbers of signs provided the total combined area of all signs does not exceed the appropriate maximum. Based on the measurement standards, the Commission decided to allow unlimited numbers of signs up to a combined maximum area per lot so that we would not create enforcement difficulties resulting from the already common situation of having separate multiple sign panels for house numbers, addresses,

and names. The maximum square footage requirement will limit the number of such signs. These can be either freestanding or wall signs.

The Commission agreed to clarify that temporary directional signs are permitted off-premise signs. Sikkema wanted staff to check to see if the County Road Commission permits signs in the right-of-way, because MDOT doesn't, and he doesn't think we should imply that temporary off-premise directional signs can be located in the right-of-way if it violates other agency rules. However, they could also be placed on someone else's private property (with permission, of course). Woodward clarified that the amendment already specifies that temporary signs shall not be located in the public right-of-way except as otherwise indicated, and the amendment also prohibits signs that extend into the public right-of-way without authorization of the road authority. For further clarification, the Commission decided to change the text to "temporary off-premise directional signs not located in the right-of-way, and placed with the permission of the owner, not exceeding an area of three (3) square feet . . ." If the County Road Commission does allow signs in the right-of-way, then we won't add the clarification of "not located in the right-of-way, and placed with the permission of the owner", because they could be in the right-of-way. They also clarified that the intent is to permit temporary directional signs in any district, not just residential districts.

The Commission clarified that temporary real estate signs in the AF district should be divided into only two size categories, those that are less than 20 acres, and those that are 20 or more acres. They decided to delete the language that said, "for lots which are not less than 5 acres" because that left no direction on what is permitted on lots less than 5 acres.

The Commission agreed to change 5(b)ii Temporary Banners 80 square feet per premises to say 80 square feet per lot, because there is a definition of lot in the ordinance, but not a definition of premises. The Commission re-discussed the provision limiting the total area of all temporary banners to 80 square feet per lot in relation to fairness. (There is also a square footage limit per façade). They were concerned this may not be fair to multi-tenant or multi-structure properties. It was decided that was a private matter between the property manager and the tenants because the intent is to limit the proliferation of banners for purposes of aesthetics. Change 5(b)iii to delete the words "per calendar year".

The Commission discussed a clarification on which districts would allow temporary portable signs, and the number of such signs permitted per lot. They decided they would be allowed for permitted uses in the C and I district, and for conditional uses in all districts, and there should not be more than one such sign per lot at any one time.

The Commission clarified that farms could have either freestanding or wall sign types. The language for conditional use signs in the AF district was clarified for number of signs and sign type per the 60 square feet maximum. It was decided that they could have any number of freestanding or wall signs as long as the total combined area of all signs does not exceed 60 square feet. They added a specified height limit of 12 feet to add to the chart.

The Commission discussed the standards for trail signs. These standards were removed from the AF district (because these trails run through other districts as well) and added to governmental signs that are exempt from permitting. The intent is to facilitate wayfinding signage, especially since we now have two trails designated as part of the Iron Ore Heritage Trail. Smith noted you can't advertise specific businesses in the DNR right-of-way, although you can put up maps identifying businesses, so the existing sign at the LSI bridge is nonconforming to DNR standards. (No one knew who was responsible for putting up this sign, but it was not the snowmobile club.) The language was changed to permit off-premise wayfinding signs on public trails provided they meet the standards of the appropriate public entity, and are located only at designated turnoffs and within the public right-of-way. A limit of sixteen (16) square feet was set for these trail signs. Regarding the MDOT right-of-way in Harvey, wayfinding signs are not allowed unless they have an MDOT permit.

The Commission also discussed illumination in relation to the Holiday Stores putting up the blue lighting all around the signs and canopies. The standards say that exterior illumination has to be fully shielded and cannot be directly visible by pedestrians, motorists, or adjacent property owners. It also says bright colored lighting is prohibited on signs except as regulated as part of a permitted electronic message sign. The Commission thinks we should also be concerned about outdoor lighting standards and some necessary changes to cover lighting on canopies and buildings (not a part of signs). They want to put this on the agenda for the next meeting.

The Commission decided to review the discussed changes and the comments from the County Planning Commission and to have an additional public hearing on the sign ordinance at the February Planning Commission meeting.

IX. NEW BUSINESS

- A. Consideration – Choose road names to accommodate addresses for new driveways off Kawbawgam Road. Commissioners did not feel it is appropriate for them to name a non-governmental road. They feel this is the responsibility of the land owner. The access does not currently need to be approved as a private road because it is now only a driveway that doesn't serve more than 4 parcels. But the driveway needs a name because a home is being built there, and they can't have a Kawbawgam Road address (none are available). Heinzelman suggested the chosen name needs to be reviewed by the county so there are no conflicts with other road names. Meister suggested the planning staff determine the name along with the property owner. This was the consensus decision.

- B. Consideration – Comments on the Planning Commission Annual Report
Woodward presented a draft annual report for commissioner review. Commissioners only made changes to the ongoing and new goals. The zoning amendment relating to "dark sky lighting" was changed to "outdoor lighting" and given a priority of one. The "Rural Residential district" was deleted from the ongoing goals because there was a perception of no need (no one asking about it). "Review firearms ordinance" was upgraded to a priority three in ongoing goals because it contains language for zoning districts that no longer exist. This

would be an ordinance amendment (not zoning ordinance, but separate ordinance). There is not enough control in residential areas in the current ordinance.

“Planning for commercial and industrial land uses” was previously postponed because there aren’t many areas available that wouldn’t encroach on existing land uses. This was a Board request. Meister suggested addressing this because the residential uses will only get more prevalent the longer we wait. Leave this at priority 3.

Sikkema asked for an updated status of proposed amendments to be attached to the agenda at every meeting. This would also include citizen requests for upcoming revisions.

- C. Consideration – Proposed amendment to the zoning ordinance related to Conditional Use Standards. This originated with Smith’s request to ensure that home occupations that are conditional uses (all conditional uses) provide proof that they have obtained all other applicable permits and meet all other regulations during the review process. Woodward said other administrative changes are needed to this section, but for now we can make these additions and address the others during a more comprehensive update.

Commissioners decided to add a statement (to item 9) that, “Failure to comply may result in Planning Commission review and possible revocation of the Conditional Use permit.”

Commissioners discussed general needed amendments to the zoning ordinance, and the scope, and how to proceed. Sikkema wants to spend more time on planning and not address ordinance amendments in such a piece-meal manner. He asked Walker about the process for coming to the Township Board to get permission to hire someone to rewrite the ordinance so the burden is not on the Planning Commission. Mahaney noted that many of the Planning Commission’s agreed upon goals relate to zoning ordinance amendments. Smith asked what kind of planning Sikkema is referring to. Noted items include recreation planning, master planning, and future land use planning. Woodward said this planning should be done first as a basis for the zoning amendments. Walker noted that when the Planning Commission makes decisions on an ordinance, they are doing planning and impacting the future. Heinzelman asked if the Commission should send a letter to the Township Board asking them to hire someone to rewrite the zoning ordinance. Sikkema said he wants to clarify the intent related to the ordinance amendments. Woodward said she could put together a presentation detailing needed changes for consideration in determining next year’s budget. Smith asked what would necessitate a change? Woodward noted difficulty in enforcement and interpretation, or regulatory gaps. Sikkema said he wants to have a conversation about what they want to accomplish.

Moved by Meister, seconded by Mahaney, to proceed with this proposed zoning amendment with the addition of Meister’s suggested language above, and to file the appropriate text amendment application and to hold a public hearing as soon as possible.

Vote: Ayes: 6 Nays: 0

MOTION CARRIED

X. PUBLIC COMMENT

None

XI. COMMISSIONER'S COMMENT

Sikkema asked who is the Township representative for the Iron Ore Heritage Trail? It is Don Britton. No one in attendance was aware of how he was chosen, but Woodward thought he was appointed by Seppanen. Sikkema asked if this is consistent with how other communities appoint representatives, and said Don is doing a good job. He asked if Don reports back to the Board on what is going on. Smith wants an update on purchase of the Silver Creek property to improve access and parking. Woodward noted she was only told that the property was deemed too expensive at this time. She will get an update from the Manager.

XII. DIRECTOR'S REPORT

Woodward updated the Commission on the Iron Ore Heritage Trail Board Recreation Authority decision on the location of the routes through Chocolay Township. They have adopted both the rail trail and business route as part of the Iron Ore Heritage Trail, but will invest money in maintenance only on the rail trail. They will facilitate maintenance on the business route, and will assist with wayfinding signage and artwork.

Woodward also advised Commissioners on the Solka decision in the Buchler trial, which has the effect of setting local precedent for pre-emption of local zoning by the Michigan Right To Farm Act. This may pertain to commercial farmers (no minimum level of sales) who meet all the applicable GAAMPS, and who would be protected against nuisance claims regardless of when the operation began. Woodward suggests the scale of agriculture needs to be more clearly addressed in the township zoning ordinance. She encourages education about community resilience, local food supply, and sustainability and gathering public input. Woodward has had inquiries about raising poultry and other small animals for food, and a couple complaints about chickens roaming free in residential neighborhoods. The old animal control ordinance is not sufficient to address all relevant issues, and the zoning ordinance is unclear. Local zoning is not completely irrelevant to this issue.

Sikkema noted the grant for improving the remaining portion of the urban route looks positive. Results will be in soon. There is also a project to resurface and widen US-41/M-28 from the Carp River Bridge to Shiras Hills.

IV. PUBLIC COMMENT

None

V. PRESENTATIONS

None

VI. OLD BUSINESS

- A. Consideration – Consideration of proposed amendment **#34-12-01 Signs** for submittal to the Township Board.

Chair Introduction and Opening of Public Hearing

Chair clarified that this discussion is to allow public comment on approved changes from last meeting, and to move the amendment forward.

Public Hearing

There was no public comment.

Planning Director Comments and Commissioner Discussion

Woodward said the amendment has gone to the Attorney and County for comment. The County recommended we reference the Access Management section of the ordinance which has provisions pertaining to signs. The recommended reference was added to Section 18.1.A to read thus, "Refer to Section 5.3 for additional provisions pertaining to signs in the US-41/M-28 Access Management Overlay District". The remainder of highlighted provisions relate to items approved at the last meeting, and sentences reworded for consistency, such as "no such sign shall exceed". On page 16, Temporary Directional Signs, provisions were amended to acknowledge that County sign standards do allow these types of signs in the right-of-way. It says, "provided they are placed in conformance with the requirements of the appropriate road authority." Illuminated sign standards were checked for consistency with outdoor

lighting standards, and were found to be consistent. The packet includes the County Planning Commission comments and the County Road Commission standards for signs. Woodward recommends approval of the amendment to forward to the Township Board for the first reading at the earliest possible date.

Heinzelman said he thinks last meeting's changes were incorporated correctly. The County sign standards were discussed in relation to the amendment. The standards relate to placement, timing, and property owner approval. Our standards just reference the County standards, and thus do not sanction something they don't permit.

Sikkema questioned the statement regarding the number of signs permitted in the AF district for conditional uses. The intent was confirmed and the language was not changed.

Commissioner Decision and Recommendation

Moved by Smith, seconded by Milton, to send Sign amendment #34-12-01 as written to the Township Board for review and comment at their earliest possible date.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

B. Consideration – Consideration of proposed amendment #34-13-01 Conditional Use standards.

Chair Introduction and Opening of Public Hearing

Chair opened the public hearing on the proposed amendment.

Public Hearing

Lee Blondeau, 1001 N. Tracie, asked if the rules would be retroactive on Conditional Uses. Heinzelman indicated he did not recall discussing retroactive review. Woodward confirmed this would relate only to new Conditional Use decisions.

Planning Director Comments and Commissioner Discussion

Woodward said this amendment originated from a concern by Smith that we have some ability to confirm that an applicant for a conditional use permit has taken steps to conform with other applicable rules and regulations, and has gotten all necessary permits before we issue conditional use permits. At the previous meeting, the Commission approved an additional statement about the ability to revoke permits. The current Zoning Ordinance doesn't address permit revocation except for mining permits and permits based on applications with false statements.

Mahaney asked what would happen if the Township approved a certain Conditional Use, and later found that an individual was not licensed? Would the Township be in jeopardy for allowing the activity, and would the permit be revoked? Woodward said that the licensure would be enforced by another agency, and we would not have the authority to enforce their rules or be responsible for compliance. If the Township found out that the party was not in compliance with other regulations as stated in the application, then a letter of notice would be sent, and the party would be given the chance to comply before possible revocation proceedings. Mahaney wondered if the Township would have liability for the continuance of the use without the necessary compliance or

licensure while the party was given the opportunity to comply?

Walker provided an example. He said that if he practices law from his house, and does not have a license to do so, it is not the Township's concern, it is the Board of Law Examiner for State licensure. The fact he is operating with a conditional use does not give the Township any liability for his non-licensure. We are just making our conditional use permit contingent upon having the other appropriate licenses and following other applicable regulations. The Township would have the ability to revoke the permit, but not the responsibility for someone operating without a license.

Mahaney was just concerned because rules change. For example, if he wants to raise lilies at his home, in the State of Michigan he has to have a plant dealer's license.

Stanaway said his understanding was that we were relying on the applicant to provide the information regarding compliance with other regulations. It was discussed again how we would know that the applicant is being forthcoming and telling the truth, because we are not an expert in all these regulations. Stanaway said a quick Google search today can produce much information on requirements. Mahaney said people seem to think we are the ultimate licensing agency or something. Woodward said the provisions are intended to provide additional protection. If we don't adopt the provisions, we can't do anything about people failing to comply with other regulations. At least this would give the Township the opportunity to do something if someone doesn't have the necessary permits or licenses, or follow the necessary rules.

Milton said it was meant to enhance enforcement provisions. Smith said his first thought for Conditional Use permits was that we need a standard checklist for all decisions of this nature so that nothing is forgotten in the decision. Mahaney asked if the Planning Commission will receive copies of all conditional use applications. Woodward confirmed this would be included in the packets for the meeting when the item was under consideration. The application would include questions relating to the proposed amendment provisions.

Commissioner Decision and Recommendation

Moved by Stanaway, seconded by Mahaney, to send zoning amendment #34-13-01 as written to the Township Board for review and comment at their earliest possible date.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

VII. NEW BUSINESS

- A. Consideration – Consideration of proposed amendment **#34-12-05 Administrative standards**, relating to notification distance for public hearings.

Heinzelman noted citizens had requested we increase the distance for written notifications for public hearings because they don't think 300 feet is enough. Woodward said she created six case studies within the Equalizer system so that Commissioners could visualize how many properties would receive written notices based on inputs of 300, 500, and 700 feet radii. She picked typical size parcels and large size parcels, because citizens were concerned that notification would not be sufficient when larger parcels were involved. The cost of additional

mailings was presented. She explained that her normal practice is to include additional parcels anyway just to make sure no parcels seem unnecessarily excluded, and so the distance ends up looking more like 500 feet typically. She indicated the 700 feet notification distance would be a change, but was not necessarily unreasonable. The amendment could be as simple as changing the number for notification distance.

Mahaney noted the cost increase was not significant. Commissioners discussed the case studies. Smith asked if the County changed their notification distances. Woodward said she responded to the previous question about State requirements, but was not aware of a question regarding the County. The discussion turned to notification practices for rezonings. Woodward noted our Ordinance goes further than State requirements for notifications for rezonings. The State requirements say that for any group of adjacent properties numbering eleven or more that is proposed for rezoning, certain notice requirements do not apply (you do NOT have to notify every property owner, or every person to whom real property is assessed within 300 feet, or all occupants of all structures within 300 feet). But our Ordinance says all property owners will be given written notice of proposed rezonings regardless of the number of parcels involved, and seems to say that owners and occupants of neighboring properties within 300 feet are also to be notified of ANY public hearing (including rezonings).

Heinzelman thinks 300 feet is inadequate, and the more people that are notified, the better off everyone is. He did not think cost is prohibitive in increasing the notification distance. Stanaway said relevance depends on the zoning districts and size of parcels involved. A 700 feet notification distance in the R-1 district may be excessive, because it will involve a lot of small parcels and owners may not think the notice is relevant to them. He thinks 700 feet is too much, and 500 feet may be a good compromise. Milton said 500 feet seems sufficient. Heinzelman confirmed there would need to be a public hearing on this. Mahaney and Smith are in favor of 500 feet.

There was a discussion whether neighbors would be notified of a rezoning. After discussion, it was determined that they would, but standards could be more clear. Provision #10 may be redundant, but it doesn't hurt anything. When asked, Walker said there is no harm in leaving both #6 and #10 in. No change was made on this issue.

Moved by Stanaway, seconded by Smith, to change the notification distance for public hearings to 500 feet, and to hold a public hearing on Zoning Amendment #34-12-05 (Administrative Standards and Procedures – notification distance) at the March Planning Commission meeting.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

- B. Consideration – Proposed changes to outdoor lighting standards to address exterior lighting on canopies and buildings.

Woodward noted this was initiated because of the Commission's desire to address outdoor lighting on buildings and canopies. It follows the intent of dark sky standards without incorporating the "bug ratings" and technical lighting measurements. It mostly regulates cutoff and shielding of fixtures to deflect light from adjacent properties and streets. It does address shutting off lights after

businesses are closed. There was a question about whether AF district is considered non-residential. The heading for Section E was changed from “Non-Residential Lighting” to “Lighting in C/I Districts”. The provisions do address canopy lighting (all lighting can only be underneath the canopy, entirely recessed, with a flat lens, but allow no other internal or external lighting). There were questions about commercial loading dock lighting, security lighting for business entrances, and lighting for outdoor storage areas. The provisions could be changed to say, “Outdoor lighting, except that at building entrances, shall be extinguished between 11:00 pm . . .” Smith wants the opportunity to observe existing conditions late at night.

Moved by Mahaney, seconded by Smith, to make changes as discussed and table this until next month to give Commissioners a chance to study actual lighting conditions in the Township.

Vote: Ayes: 5 Nays: 1 MOTION CARRIED

C. Consideration – Discuss using excerpts from staff reports as findings of fact in minutes.

Woodward received information from MSU Extension regarding how to take minutes for administrative decisions. Specifically, this relates to documenting information that is contained within staff reports that contributes to decision making, but is not necessarily discussed at the meeting. She said that communities can accept a staff report as basic findings of fact if the report is complete, includes analysis, but is without a recommended action. The Commission can pull excerpts from staff reports to use as findings of fact, and then the whole staff report would be available as reference in a court action.

Walker elaborated on this issue. If an administrative decision is challenged, the court will look to what is actually in the Ordinance. They won't look beyond the Ordinance if they don't have a published record as to the reasoning used when adopting that Ordinance. You can't supplement the record in court. This would be adopting, by reference, part of the staff report as findings of fact.

Woodward noted that the City of Marquette reads their staff report in entirety, but the minutes don't contain the entire language of the report. She suggests placing the chosen excerpts in the minutes, or including them in the motion. It was noted this might create longer, more complicated motions. Walker noted it is not necessary to read the whole motion if everyone has it in front of them.

This discussion was just to make Commissioners aware of this issue and to expect some changes in the future.

VIII. PUBLIC COMMENT

None

IX. COMMISSIONER'S COMMENT

None

X. DIRECTOR'S REPORT

Woodward noted the new road off Kawbawgam was named Charlotte Trail in honor of Chief Kawbawgam's wife, Charlotte. Woodward has compiled a list of zoning ordinance amendments starting from the 1977 Ordinance, including their topic, and their adoption date. There are some difficulties in documenting proposed but not adopted

amendments since 2009. There is no documentation in the official record when an amendment was considered but not passed, so this is taking some additional research of minutes to confirm the progress of over 30 proposed amendments. The research is not complete, but the official record and official text of the zoning ordinance is in question related to some proposed, but not adopted amendments. Woodward will complete the research and address this again with the Commission along with the list of Zoning Ordinance changes needed.

Woodward will reformat the draft Master Plan into a more simplified, summary document with detailed analysis contained in Appendices. Dale is making progress on the Recreation Plan. There will be public meetings with current user groups and the public to determine satisfaction with existing facilities and ideas for new facilities. However, the plan will not be ready to be submitted to the DNR until next year's grant cycle. It was originally thought that a new plan was submitted in 2010, however this is not the case. The last plan expired in 2009, so grant opportunities are limited until next year.

Woodward researched the potential Silver Creek property acquisition, and there are no staff that are up-to-date on any proposed action on this property, although it is considered a goal to purchase. It would be a good potential project for a DNR acquisition grant. Milton thought the lot is not buildable based on setbacks and other requirements. Woodward will check on this. The concern is to make sure there is legal public access to the park, so this issue was brought to the Planning Commission by the former Planning Director and DPW staff.

Smith suggested the Township look into purchasing the property to the west of Township Hall along Silver Creek Road, because the current driveway entrance does not allow for proper automobile stacking. Walker confirmed that this was formerly negotiated, but negotiations were not successful with the property owner. He will look into this again to see if anything further can be done, because this would be an opportune time with the fire hall reconstruction project. Smith asked about the eminent domain process in relation to this project. Sikkema and Walker commented on this process. The Township would have to pay the appraised value, but there could be a civil action to claim a higher amount.

Woodward discussed potential improvements to the Park & Ride facility at Jack's Foods, and a potential Farm Incubator on Township property in cooperation with the U.P. Food Exchange initiative. Plans will be created for both projects (especially in case discretionary funding becomes available for the transportation project).

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

Marquette City Planning Commission minutes and Planning & Zoning News

ADJOURNMENT

Heinzelman adjourned the meeting at 9:10 p.m.

Submitted by:

Planning Commission Secretary
Andy Sikkema

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, March 4, 2013

I. MEETING CALLED TO ORDER BY: Gary Heinzelman at 7:31 p.m.

ROLL CALL

Members Present: Gary Heinzelman (Chair), Andy Smith (Vice Chair), Andy Sikkema (Secretary), Tom Mahaney, Eric Meister, Kendell Milton

Members Absent: Bernie Stanaway (Board Rep) -excused

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Brad Johnson (Public Works)

II. MINUTES – February 4, 2012

Motion by Sikkema, seconded by Milton, to approve the minutes as written.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Sikkema, seconded by Meister, to approve the agenda as written.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Gary Walker, 765 Lakewood Lane, said that the Township attorney advised caution when he attends Planning Commission meetings because of his authority to appoint Planning Commission members. He should not be perceived as exercising undue influence on the Commission. He said he would continue to attend but he will be uncharacteristically quiet so as not to intrude on decisions so that the decisions are not subject to challenge. Heinzelman asked if the Commission can still solicit advice from Walker, and he said yes.

Public comment was closed.

V. PRESENTATIONS

Tim Kopacz, representing the Upper Peninsula Disc Golf Association (UPDGA), gave a presentation on the expansion of disc golf opportunity in the Township. The UPDGA focuses on expanding recreation opportunities for residents within the entire Upper Peninsula. The "Disc the U.P." organization runs leagues, hosts tournaments and events, and works with schools to give clinics and demonstrations. This group focuses mainly on Marquette. Several members of the organizations were in attendance for questions.

The group wants to expand the Silver Creek course from 9 holes, which is equally split between Church and Township property, to 18 holes. Kopacz described the improvements to be made to this course. The regional goal is to create a good balance of courses satisfying different niches. The 18 Hole, professionally-designed Powder Mill course in Marquette will be more challenging, and will attract touring players and college students. The Silver Creek course is a tight technical course (due to small parcel size) where people can work on accuracy and control. The design includes amateur tees that provide opportunity for youngsters as well as longer, more technical tees.

Other regional facilities include 18 hole courses in Iron River, Grand Marais, Escanaba (2 courses to open in May or June), and Sault Ste. Marie, as well as the 9 hole Al Qual course in Ishpeming that is being redesigned for 18 holes. There are 9 hole courses in Lake Linden, Houghton (Michigan Tech), St. Ignace, Escanaba and Copper Harbor. Requests for courses are increasing. The courses are on both public and private land. They need at least 5 courses within a 20 mile radius to bid for the World Championships. Tournaments can accommodate 5 players per hole, for a total of 90 people out utilizing and enjoying the facility.

Costs to construct 18 hole courses range from \$18,000 to \$23,000. Many courses are sponsored by Rotary or Lion's Clubs. It is a low cost recreation option compared to other popular forms of recreation. These initiatives utilize a large quantity of volunteer labor. The group would like to create a partnership to expand opportunity in Chocolay.

Commissioners asked questions of Kopacz. Sikkema asked how the courses are maintained once they are put in. The group has a land use agreement with the BLP to partner for maintenance at the Powder Mill course. As the players use the course, it also reduces the amount of maintenance needed. They can arrange a similar land use agreement in Chocolay Township. No mowing is required in the woods. Occasionally they have to remove dead trees, which is actually helpful in reducing fire danger. The baskets are removable for winter, so all parts would be flush to the ground to accommodate winter sports like cross-country skiing. They might need to arrange for storage of equipment with the Township in the off-season. The baskets are locked on during the season, and so deter vandalism.

Johnson gave a brief history of the group's involvement with the Church and Township. He said that since the group has undertaken maintenance activities, vandalism at the park has gone down. There are always people playing there, they take care of the trash and are great to work with. Johnson said the Township has room to store the disc golf equipment during the off-season, however, there is not necessarily a need to pull the baskets because they do not interfere with any other recreation at this time.

Kopacz pointed out that the deadfall from the old growth needs to be cleaned up anyway because it poses safety concerns from fire danger. The group proposes to selectively cut some trees in consultation with the Township. They give consideration to preserving specimen trees like maples and conifers that contribute to four-season aesthetics.

Mahaney asked about the typical width for fairways. Kopacz said they typically use a ten percent rule: the width is ten percent of the length. However, he explained that disc golf is different than traditional golf because they do not have "fairways", they have "airways". They do not clearcut an area. They selectively cut. The airways are precisely designed to narrow and widen and present various obstacles. It is fun to gain the technical skills required to avoid the obstacles. There are different disc types for different purposes. Some people may carry 15 to 20 different discs which have different configurations and performance characteristics. The goal is to make a course tight but as minimally frustrating as possible.

Meister asked how much participation they get from young people, and which age groups are involved. The group offers clinics for Bothwell and Northstar students. The sport accommodates all ages.

Mahaney asked about membership and who can play. People do not have to join the group to play. Anyone can play for free. Discs are frequently made available at nearby businesses, including gas stations. You can start with one eight inch disc and learn the different throwing techniques.

Mahaney asked if the group had to secure funding for the Powder Mill course. Tim said yes, and much came from donations from club members. He suggested this project can be part of a grant application effort for a Silver Creek improvement initiative, funded by the Township, or they can institute a sponsorship and fundraising drive. The grant would be the only way to assure a definite opening date. They install sponsorship signs at holes for businesses or organizations that sponsor (fund) them.

Heinzelman asked if there has been any other discussion on uses for this particular area. Johnson said that several years ago a dog park was proposed but the idea died fast.

Milton asked if there is a parking issue. Johnson said yes. There has been a plan for many years to expand the west parking lot and to build additional restrooms. The Township is also trying to get a new access off Silver Creek.

Woodward mentioned that Kevin Taylor of Silver Creek Church is supportive of the expansion. Based on the numbers of NMU students playing at Silver Creek, Taylor thinks the sport helps to attract college students to the area. Woodward asked if Kopacz thought NMU students would continue to use the Silver Creek facility once the Powder Mill course was complete. There was unanimous and instantaneous assertion by disc golf members in attendance that the participation at Silver Creek would continue.

Heinzelman asked if there is a conflict with the park closing at dusk. Kopacz said there are lighted discs for night play if that was an option. Mahaney asked if the facility is predominantly used on weekends. It was reported by Township staff that there is ALWAYS someone there playing during the day between 7:30 am to dusk.

There are sometimes 40 people playing at any one time, and they bring their families and children. They encourage people to come there to learn the sport. The members are willing to promote the sport and teach others. The group believes participation among children will increase.

After discussion, disc golf members of the audience and Johnson left.

VI. NEW BUSINESS

- A. Consideration – Discussion regarding disc golf opportunities at facilities in Chocolay Township.

Commissioner Discussion

Sikkema asked if there is an official agreement for the disc golf facility at this time. Woodward said the present agreement is informal. The Township has no investment in equipment. If there was to be a grant application, the Church would have to issue a lease for the portion of the property used for the Recreation Passport grant project for a time period of 25 years.

Heinzelman asked Woodward to explain the Passport grant. A summary was given. The focus is on renovating existing obsolete facilities and accommodating ADA accessibility and Universal Access. This project would not be able to be ADA accessible due to the nature of the activity. To strengthen the grant

application, the Township could apply for other improvements at the same time that meet those requirements and earn those points. This is the only grant the Township could apply for at this time since the Recreation Plan is not finished.

Sikkema inquired about the criteria in place for use of Township property. Is there a formal policy or is it case-by-case? Woodward was not aware of a formal policy. Mahaney pointed out the facility is open to the public. Heinzelman noted the group is asking for primary use designation for the course. Woodward said the group is willing to work around other users.

Sikkema asked how the Township evaluates requests for new facilities from various user groups and decides which ones to support. He says ultimately the Township gets into a position where they have to say I'll support this but I won't support that. After you open up the door how can you tell anyone no if you don't have criteria that says this is how we make our decisions on who we allow to use Township property and who we don't? Heinzelman said they have already opened the door with the baseball and soccer fields. Sikkema asked if it is a bad thing to have special interest groups come in and provide facilities that people can use at no cost to the Township? We provide a place but they have the responsibility to install and maintain the equipment. This keeps facilities current, because the users are the experts, and they will maintain it since they are a stakeholder vs. the Township owning it and having to maintain it. So there might be value to this, but how do you decide who to support because you don't want to pick winners and losers or the flavor of the day. Woodward pointed out the criteria is typically in the Master Plan and the Recreation Plan based on identified needs and goals.

Meister said it's a positive thing if you can get someone else to maintain the property rather than the Township having to pay for it. He thinks one of the criteria has to be that the facilities support local residents. He said it does sound like the group thinks local youth will get more involved. Also it's a positive that the property is less subject to vandalism since disc golf users are there. Sikkema said there still should be a policy so it's fair to everyone.

Smith asked about the time commitment involved with making this property available for disc golf. Woodward said the equipment is portable and easily moved if plans change.

Mahaney asked if this project is high priority? Woodward said staff recommended it in the highest priority rank for this facility, subject to Planning Commission agreement as part of the Recreation Plan. Mahaney said he felt funds should go toward fixing existing problems at the park. Woodward said that there is additional financial benefit to including some of the existing facility improvements in the grant for the disc golf. The disc golf group was willing to help provide match for the disc golf portion of the grant.

Sikkema said once you allow one group, you have to allow them all unless there is a good reason to say "no", so the Township needs to be careful where they put their money. It's easier to say yes to someone providing a public facility for anyone to use at no cost to the Township.

Heinzelman asked about liability issues. Woodward said the only identified liability is related to brush cutting. Milton asked about lightening.

Heinzelman asked about deadlines. Woodward said that if this was a part of a grant application, the deadline is April 1, and the Board would have to address the issue at their next meeting. Woodward answered several questions about the grant and what the group requests.

Heinzelman said it's not up to the Commission to come up with the money, it's up to the Board. Sikkema had an issue with recommending the Township Board include the project in their Capital Improvement Plan, which he said indicated they would pay for it. Woodward said she intended it to be approved as part of a possible grant with the Township possibly funding a portion of the match, not that the Township would pay for the entire disc golf project.

Mahaney thought a grant should cover existing facilities. Woodward said none of the improvements were budgeted for this year, so improvements would not be likely without a grant.

Sikkema said this will put unused property to good use, but he has a lot of questions about the agreement, ownership, maintenance, etc. and thinks this has to be settled before moving ahead. Woodward answered some of the questions. The Commissioners indicated they would vote for the project if no money was involved because it's a good use of the property. They are in favor of disc golf as a use of that property. Sikkema said we should make best use of the property, and it's not a good decision to put money into a facility that won't be used. We know the disc golf will be used, but the soccer field really isn't being used. Meister said you have to make decisions or the property never gets used for anything. If the Township has unused property, and a group proposes a use at no cost to the Township, he would be in favor of that in most cases. But he agrees that spending priorities have to be carefully made. Mahaney said it sounds like public works is satisfied with the arrangement with the disc golf group, and it's been positive for the Township. Woodward pointed out the regional benefit of working together to establish enough disc golf courses in the area to attract tourism, and how passionate the group is in working to support the activity.

Sikkema said it's good that it uses property that is not currently used, but it's not clear it's benefiting Township residents. We don't do anything to attract college students here, and we don't make provisions for housing them, so we wouldn't be attracting residents through this project. He said it would be hard to say this is something we should invest in, but it's a good use of Township property and there will be some use by Township residents. The Commission discussed the need for a formalized agreement to give both parties some assurance of the continuance of the use after investment. They are supportive of the Township being the conduit for the grant if the group comes up with their portion of the match for the disc golf facilities.

Commissioner Decision and Recommendation

Moved by Sikkema, seconded by Meister, to recommend that staff prepare a draft land use agreement with the U.P. Disc Golf Association for the expansion of current disc golf course at the Silver Creek Recreation Area without Township funding. The agreement should define Township and U.P. Disc Golf Association responsibility for course upkeep, funding of project, length of the agreement, and potential for agreement extensions.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

VII. OLD BUSINESS

- A. Consideration – #34-13-01 Proposed amendment to the zoning ordinance related to Conditional Use Standards.

Woodward said the Attorney made only one change, which was to delete one word. The County will review the proposed amendment on March 6.

Moved by Sikkema, seconded by Milton, pending County support, to revise the text of proposed Zoning Amendment #34-13-01 (Conditional Use Standards) as suggested by the Township Attorney and send to the Township Board for review and approval at their earliest possible date.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

- B. Consideration – Proposed changes to outdoor lighting standards to address exterior lighting on canopies and buildings.

Sikkema noticed a few things while driving around observing lighting in the Township. 7.D.2 mentions sign lighting is not regulated by these provisions. Some property owners leave their sign lights on at night. However, these lighting provisions provide for extinguishing lights after hours when they are not needed. He thinks either this amendment or the sign amendment should address turning the sign lighting off. Meister asked if there is light pollution created by sign lighting, and if not, there is some economic value in leaving them on for advertising. The property owner should determine for themselves whether to choose energy efficiency or advertising benefit.

Smith does not agree with requirements for turning all lighting off at 10 pm as discussed in previously proposed amendments. He's not sure he's in favor of 11 pm even with the exceptions. Sikkema estimates 50 percent of property owners turn their sign lights off.

Milton asked how you light a flag at night if you can't turn a light skyward. Woodward said the light has to be directed onto the property and not out toward the street, and onto the object and not beyond it. She said an alternative to lighting a flag is to bring it in at night. The regulations do not impact lighting required by other regulations.

Smith asked about lighting for the park and ride facility. Woodward said that would be regulated as parking lot lighting. Lighting can remain on while employees and visitors are arriving or leaving.

Sikkema commented that night sky is not the only purpose. It should also be about general aesthetics of the Township. The commission decided the purpose

statement covers it.

There was a clarification on enforcement, specifically the limitation on hours of lighting. Woodward said we won't require new lighting fixtures for grandfathered properties, but to be fair we would have to enforce the hour limitations on every property if this is adopted.

Sikkema asked if the purpose is to have less lighting, keep it the same, or allow more. He wants to minimize the lighting and encourage people to turn off lights if they are not needed.

Meister asked about D.9 and whether that information should be required for a permit application to construct a house. It was decided to move items D.7-9 to Section E as items E.3-5.

Sikkema added the words "or 60 watt equivalent" to the lighting that's exempt (B.4). It was clarified that low voltage landscape lighting that is exempt includes solar landscaping lights.

Sikkema said MDOT uses Smart Phones applications for a light meter. He wanted to know what portion of the ordinance will prohibit the bright blue lights at the Holiday Stations. Canopies are covered. There was a question about controlling the blue lights on buildings. It was felt this is definitely an advertising device. It was decided to add the words "or buildings" to C.1 so that high-intensity lights can't be used to light the sky "or buildings" for advertising purposes, etc. Plus the blue lights are not shielded from the roads, and they cause glare.

Smith asked if other communities are implementing lights out times. This was affirmed.

Moved by Sikkema, seconded by Milton, to move forward with a text amendment application to amend Section II Definitions, Section 9.1 Application and Review Procedures, and Section 11.12 Outside Lighting of the Zoning Ordinance, to forward it to the Attorney and County for review, and to hold a public hearing on the draft language as changed to include the following: move D.7-9 to E.3-5, add the words "or 60 watt equivalent" to D.4, and add "or building" to 3, and change the wording of the title of E to "Outdoor Lighting in Commercial and Industrial Districts and Non-Residential Uses in Residential Districts".

Vote: Ayes: 5 Nays: 1 MOTION CARRIED

VIII. PUBLIC COMMENT

None

IX. COMMISSIONER'S COMMENT

Sikkema asked about the progress of the proposed amendment for the definition of "park". Woodward will address this in the Director's report. Sikkema also said that MDOT is close to receiving the conditional commitment letter for finishing the bike path on the east side of US-41. The Township had a \$20,000 match for this, and construction would be complete this year.

X. DIRECTOR'S REPORT

Woodward said the Home Occupation amendment was approved by the Board at their last meeting and will be effective 7 days after publication. She is preparing a Home Occupation permit application based on the new language, and has 2 candidates waiting for the form. The sign amendment will go to the Board in March for a second reading. Woodward and Walker met with Mark Maki to address his concerns. He will probably still suggest a reduction in residential sign area, but most of his concerns were addressed.

There was a meeting with the St. Louis the King Catholic Church to build another community garden on their site. The Church will put together a committee to work on it with the Township.

Woodward continues to work on the farm incubator project, and was contacted by a citizen who owns nearby property who is interested in utilizing her land in a similar way. Perhaps this will be the start of a local food innovation district.

Woodward completed the zoning ordinance amendment research. Woodward and Walker met with the Attorneys because there were some serious concerns about past procedural problems that have resulted in administrative errors. She handed out summaries of the research and said the Board will address the problems at their next meeting. There are at least a dozen incidences from 2009 where the current public version of the ordinance does not reflect official proceedings. The published Zoning Ordinance will be changed to reflect official proceedings. If the Planning Commission or Board want to pursue previously proposed amendments that were never completely addressed, the process will need to begin again because it has been too long. The erroneous changes to the Multiple Family district are substantial, but actually more permissive than the official document. It may make some developments nonconforming, but they will be grandfathered.

Woodward noted that in the future, proposed zoning amendments will receive a case number that will be consistent throughout the entire process, and will then be given a sequential official amendment number when adopted. This will simplify the documentation process so that the number doesn't change 3 different times during the process, causing confusion in the paper trail.

Tom Mahaney entered the meeting at 7:33 p.m.

V. PRESENTATIONS

None

VI. NEW BUSINESS

- A. Consideration – Proposed Conditional Use for 129 Deerview Trail, Parcel #52-02-108-021-20, for a Montessori School/Licensed State Child Care Center

Planning Director comments

Woodward introduced the application for a Montessori School which the State of Michigan would license as a day care center. She asked the Commission to process the application based on the most specific description of the function of the use, which she determined is a “school”. This determination is based on the schedule that mirrors that of the public school system rather than a day care center (not open during the summer or holidays).

The applicant wants to purchase the property to start the school in the existing accessory structure and to live in the existing residence. There are no plans to build an additional structure for this use. The purpose of the application is to change the use of the accessory structure to a school which is a conditional use in the R-1 district. Day care center is also a conditional use in the district.

The zoning plan of the 2005 master plan recommends that schools be permitted in any residential or commercial zoning district. Currently schools are not permitted in the waterfront residential or commercial zoning districts, contrary to this recommendation. This has the effect of limiting the location of new schools to mostly rural areas of the Township such as the one proposed. Woodward said the master plan definitely supports schools as a use in residential districts.

The application is for a preschool and accelerated kindergarten only.

Woodward said that the Michigan Zoning Enabling Act (MZEA) does consider some residential uses of property, such as day care, preferential uses of property for which local zoning control is limited. Some day care uses must be permitted the same as any residence, and some must be granted a conditional use permit if they meet the minimum standards in the MZEA.

Public hearing – limit 3 minutes per person

Applicant Kimberly Pettit, currently of Van Buren, Missouri, potentially a new resident of 129 Deerview Trail, Marquette, MI. Kim has run a Montessori school for the last seven years. She has had anywhere between 8 and 45 kids in her school. She is a state licensed teacher, and has a total of 14 years teaching experience in the Montessori system and in public schools. She said Montessori Schools are basically magnet schools for the local public and private schools. Kids are prepped till the age of 6. These schools are an asset to their community and an alternative to Head Start.

Gary Walker, 765 Lakewood Lane, said he thinks that as a community we ought to do anything we can to support early childhood education and appropriate socialization. In his career as prosecuting attorney, he spent time dealing with people who didn't receive the appropriate attention as children. He said the one thing we know for sure in terms of prevention is that dealing with children appropriately at an early age is probably the best thing you can do to put them on a path so they're socially developed and become appropriate members of our society. Targeting young children is the best way to prevent crime instead of just reacting to it. He is somewhat familiar with the Montessori system and what he knows of it is very positive.

The public hearing was closed.

Commissioner Discussion

Sikkema asked about the type of conditional use per the Ordinance. Woodward said that this application is being processed as a school which is a conditional use in the R-1 district. This is because the specific should take precedence over the general, and this proposed use most specifically functions as a school. The applicant doesn't have an existing home where she is proposing to start a home occupation. She is a person who wants to start a school, and will open that school in a place where it is permitted and where she can also live. Woodward noted other situations in the Township where there are residences in addition to other uses on the same property, such as St. Paul's Lutheran Church, Pet Sitters Plus, Wert Salvage, and so on.

Milton said he can't think of a reason to deny the application.

Sikkema said there is a lot of information in the staff report that isn't included in the application, and he wants to be sure that this information is addressed in the permit documentation, and the applicant would be held to those standards. Woodward said the Commission could make that information part of the conditions for approval. Sikkema cited the number of kids and hours as examples. The applicant estimates she will serve 12 children, but would feel comfortable with 15. Some families will be transporting two children within that

age group. Her license will allow up to 20 kids maximum based on the size of the building, which would require two teachers.

Mahaney asked about the licenses held by the applicant. She has a State license in Missouri for public teaching (bachelors and masters degrees), a master's degree in reading, and Montessori certificate in preschool, kindergarten, and elementary. In Michigan there is no licensing for Montessori, so the applicant will be required to go through licensing for day care centers including fire, health, and other inspections.

Meister asked about the distance to the nearest home. Woodward estimated over 300 feet from the aerial photos.

The Commission discussed how to limit the size of the school. They could set a maximum number of students or a maximum size of the building. The applicant reported that for State licensing, the size of the building limits the number of students. Milton suggested controlling the size of the facility. The applicant said that for this age group, there must be 30 square feet per child for indoor space and a minimum of 1,200 square feet total for outdoor space. The building is 30 foot by 40 foot, minus walls and service areas, so they estimate there is enough existing space for 20 children. They are not asking to increase the size of the building.

Heinzelman asked whether there are other conditions to be addressed.

Mahaney said it appears the only contentious issue that had been raised so far from neighbors was the issue of the nearby hunting blind. The current owners of the home said they have lived there 7 years and no bullets have ever come their direction. The adjacent property owners have been very cautious and considerate of their dogs, etc. They estimate the blind is setback 400 feet from the property line.

The applicant said the fence will be attached to the garage and won't be anywhere near the rear property line.

Heinzelman confirmed there would be no summer school and no hours after 4:30 p.m. Mahaney felt the proposal meets all the criteria and is a good idea. The applicant said she had found no other Montessori Schools in Michigan except in Ann Arbor.

Meister said most neighbors would be more concerned about the impact of the traffic, which is not constant, and that the number of kids would not be a zoning problem. The applicants talked with Don Britton who takes care of the private road, and he volunteered to assist in controlling dust if there was a concern. However, the school is not open in the summer.

Sikkema noted this is not a public school, so problems cannot be addressed to a school board. Since it's a private school, concerns could be brought to the Township. He wants to ensure a process of due diligence is undertaken to get the permit right so that potential concerns are addressed up front.

Meister asked for clarifications regarding limitations that are set as part of the conditional use permit. Woodward noted that if expansions or changes to the approved conditions are warranted, the applicant can come back to the Planning Commission to ask for an amendment to the conditional use.

Sikkema wants conditions to address size and hours/dates of operation. The applicant says the State recommends 180 days per year of instruction if you operate on the same schedule as public schools.

One possible condition is that the school operates on the same general schedule as the public school system.

A second condition is that no additional space or construction shall be utilized for the school without an amendment of the conditional use permit. The school will be limited to the existing accessory building and the required outdoor space. Stanaway supported the idea of controlling the maximum number of students through controlling the space, because specifying the number of students could require more administrative time. Woodward said the size of the space is easier to enforce than the number of students, which she would not necessarily be aware of.

Sikkema asked the applicants to clarify that they are aware this is a private road and does not receive public maintenance. The applicants said the neighbors have come to a financial agreement to take care of the road cooperatively. Sikkema clarified that the Township would not intercede in arguments about road maintenance. The applicant noted that the school will be easily accessible by the circle drive.

The commissioners clarified that the facility will maintain the existing exterior appearance. The applicant said the only change would be the removal of the garage doors and finishing with the same siding.

The third condition would be that the general appearance of the school would remain as existing to maintain the residential character of the district.

The Day Care licensing covers safety concerns. The applicant's sister will assist in teaching. The number of teachers is also covered by State licensing in relation to the number of students.

The fourth condition would be that the student/teacher ratio shall be according to the Michigan Department of Human Services minimum requirement for child care licensing.

Signs will be regulated per the provisions of the sign ordinance, as will lighting.

Woodward noted the recommended condition within the staff memo consistent with the proposed zoning amendment for conditional use standards (permit effective upon proof of obtaining other permits and licenses and following other applicable regulations). Meister was not sure this was needed, and didn't want the process to be held up by a circuitous approval process. The applicant can't apply for the license without zoning approval, but can't get zoning approval without the license. He didn't think the Township should enforce other regulations. The Commission revisited the purpose behind this proposed zoning amendment. Meister feels the applicant shouldn't have to show the license up front to get the zoning permit. Walker clarified that we can issue the conditional use permit, and if the applicant don't get the state license, or loses it, the Township can revoke the permit. Woodward clarified that the conditional use permit can be approved without proof of the other permit, but the conditional use permit would not be effective until the state license is obtained. The applicant

would be given documentation of the decision to use for state licensing. The applicant said it could take up to six months to obtain licensing, but probably more like a year with all steps.

The Commission decided that the fifth condition would be that the applicant must show proof of compliance with all required permits and licenses within one year. Failure to comply may result in revocation of the conditional use permit.

Commissioner Decision/Recommendation

Moved by Milton, seconded by Stanaway, that upon finding that the proposed use complies with all Conditional Use Standards of the Chocolay Township zoning ordinance as noted in the staff report dated March 28, 2013, the Conditional Use request for parcel #52-02-108-021-20 located at 129 Deerview Trail to convert an existing accessory structure to be used as a Montessori School/Licensed State Child Care Center is hereby approved subject to the following five conditions:

- *The school shall operate on the same general schedule as the public school system.*
- *No additional space or construction shall be utilized for the school without an amendment of the conditional use permit. The school shall be limited to the existing accessory building and the required fenced outdoor space.*
- *The general appearance of the school shall remain as existing to maintain the residential character of the district.*
- *The student/teacher ratio shall be according to the Michigan Department of Human Services minimum requirement for child care licensing.*
- *The applicant must show proof of compliance with all required permits and licenses within one year. Failure to comply may result in revocation of the conditional use permit.*

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

VII. OLD BUSINESS

- A. Consideration – Receive comment on the proposed amendment to the zoning ordinance related to **Notification Distance** for public hearings.

Planning Director comments

Woodward said that at the February Planning Commission meeting, it was decided to increase the notification distance for public hearings from 300 to 500 feet. A public hearing was needed before the proposed zoning amendment was sent to the County for review.

Public hearing – limit 3 minutes per person

No public comment. Public hearing was closed.

Commissioner Discussion

No additional Commissioner comment.

Commissioner Decision/Recommendation

Moved by Meister, seconded by Mahaney, to approve the increase in notification distance for public hearings from 300 to 500 feet, and to forward the proposed amendment to the County for comment and make a recommendation to the Board to adopt the proposed amendment.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

- B. Consideration – Receive comment on the proposed amendment to the zoning ordinance related to **outdoor lighting standards**.

Planning Director comments

Woodward said the purpose of this agenda item is to hold a public hearing on the proposed zoning ordinance amendment pertaining to outdoor lighting standards prior to submittal to the County for comment. E-mail communications from Woodward were sent to CABA members on March 20, clarifying intent and provisions for the 11 p.m. lighting curfew (and exceptions). She did not hear from any businesses with specific concerns. Commissioner Smith submitted some concerns at 4 p.m. on April 1, which Woodward presented to the Commission before the meeting. Per Smith's concerns, Woodward also sought input from public safety regarding the 11 p.m. lighting curfew. The officer on duty was Gerald Trotochaud, who said he sees no advantage from the aspect of public safety in requiring businesses to turn off their lights at night.

Public hearing – limit 3 minutes per person

Dick Arnold, 312 West Branch Road, asked for clarification on the proposed regulations. Arnold was concerned that lighting protects from break-ins. He said that as far as protecting the night sky, you can go down the road to the beach to see the night sky. Too much control is taken from citizens. What does it bother if someone has a light on, unless it shines in the road like a spotlight? What about the street lights? That's not protecting the night sky. He doesn't agree with the proposed change.

Seeing no additional public comment, public hearing was closed.

Commissioner Discussion

Mahaney asked how this will affect current businesses if it is approved. Woodward said the curfew would have to be enforced the same for everyone after adoption. But existing lighting fixtures would be grandfathered in and would not need to be brought into compliance until replaced. The curfew does not impact sign lighting. It impacts parking lot lighting. It impacts building lighting except motion sensor light or lights of 60 watt equivalent or less. It does not impact lights at building entrances.

There were no changes to the definitions. Woodward clarified the need for the change in the off-street parking requirements of section 8.1 and site plan review application procedures of section 9.1 to be consistent with the proposed amendment. There were no changes to the suggested language for section 8.1 or section 9.1.

Meister was concerned about the need to meet the new requirements when a light fixture is replaced, and if this would necessitate a whole new lighting plan. Woodward said there is no limit on number of lumens per lot, and the change

would relate simply to choosing a new fixture with the correct shielding, placement, etc. The change would impact only that fixture, not all of them. Mahaney said it would be important to send a letter to all businesses letting them know of this requirement should it pass. Woodward was in agreement, and said it would also be published in the newspaper.

The Commissioners agreed on a change to 11.12.B.4 to say, “Gas lighting; glass tubes filled with Neon, Argon, or Krypton; and small decorative fixtures of 800 lumens or less (equivalent to a 60 watt incandescent bulb)”, and to add a definition for “lumens”.

The Commissioners discussed the issue of lighting at night related to security. Woodward clarified that the police have implemented a policy of turning off lights in some recreation areas at night to deter vandalism (so people will not be encouraged to congregate). Meister said he is comfortable with motion sensor lights for security, because they give someone a scare. It’s also more noticeable when the light comes on when it’s not supposed to be on.

Commissioner Decision/Recommendation

Moved by Sikkema, seconded by Milton, following a duly noticed public hearing, to approve the draft proposed Zoning Ordinance text amendment Case #ZA0002-13 Outdoor Lighting as changed (Section 11.12.B.4 ... “small decorative fixtures of 800 lumens or less (equivalent to a 60 watt incandescent bulb) and to add a definition for “lumens”), and to forward the proposed amendment to the County for comment and make a recommendation to the Board to adopt the proposed amendment.

Vote: Ayes: 5 Nays: 1 (Stanaway) MOTION CARRIED

VIII. PUBLIC COMMENT

None

IX. COMMISSIONER’S COMMENT

Sikkema said MDOT received the conditional commitment for the resurfacing of the bike path on the east side of US-41 to M-28 which would be done sometime this summer.

X. DIRECTOR’S REPORT

Woodward met with the ORV group led by Tony Harry to receive a proposed plan for an ORV connection along selected County roads through Chocoley Township that would allow a link between the western U.P. trails and the eastern U.P. trails. Chocoley Township is their only missing link right now. The proposal will come to the Planning Commission next month when a public hearing will also be held. The Planning Commission would be asked to make a recommendation to the Board.

Woodward serves on a food policy committee as part of a regional effort in conjunction with the Food Co-op’s Food Hub grant. She is working with other planners and area stakeholders to do due diligence on local regulations impacting food systems, with the goal of coming up with model regulations and educational materials to assist local government policy and regulatory decisions.

Woodward went to a FEMA meeting regarding a new study and updated maps for flood management. However, the Township has not received the study or updated maps for review as stated in the letter from FEMA (and neither had any other community in

attendance). She said there is a comment period on the data, but we haven't seen the data. We are also supposed to adopt new regulations related to flood management, but FEMA did not provide information on those required regulations.

The Tribe has changed the name of the road leading to the casino from Acre Trail to Zhooniyaa Miikana Trail.

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

Planning & Zoning News

ADJOURNMENT

Heinzelman adjourned the meeting at 9:10 p.m.

Submitted by:

Planning Commission Secretary
Andy Sikkema

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, May 6, 2013

Cherry Creek School, 1111 Ortman Road

I. MEETING CALLED TO ORDER BY: Gary Heinzelman at 7:30 p.m.

ROLL CALL

Members Present: Gary Heinzelman (Chair), Andy Smith (Vice Chair), Andy Sikkema (Secretary), Tom Mahaney, Eric Meister, Kendell Milton, Bernie Stanaway (Board Rep)

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES – April 1, 2013

Motion by Sikkema, seconded by Milton, to approve the minutes as changed, page 6, B. “public hearing” was closed (not public comment).

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Sikkema, seconded by Stanaway, to approve the agenda as written.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Tom Russo, 910 Mangum Road. Russo said he is new to the process and getting involved, and due to his naiveté, he needs to know what is the role/mission statement of the Planning Director. As a taxpayer, he would like to know. Heinzelman said that the Planning Director is a conduit between the Township Board and Planning Commission, and is an information source to the Planning Commission. Russo asked if the Planning Commission hired the Planning Director, and Heinzelman said the Township hired her.

Raymond Wood, 1777 M-28 E, asked the Commission how citizens can change zoning regulations pertaining to chickens. His daughter is in 4-H and would like to raise chickens. He understands that the current status is that you can potentially have chickens, but it may be a problem if there is a neighbor complaint per the animal control ordinance. He would like to see regulations that say you can raise chickens if you don't keep a rooster so that his daughter can participate in 4-H. He wants to know how this process works now that he has brought it to the attention of the Planning Commission. Heinzelman said it can't be discussed at this meeting, but it could become an agenda item to be discussed at an upcoming meeting. He said that Wood could make a personal request for a zoning change by contacting Planning Director/Zoning Administrator Woodward. Woodward said she advised Wood to attend and bring up the issue during public comment because there is a whole list of people interested in the same issue, and suggested it could be discussed during Director's Comments if there is time.

Public comment was closed. Heinzelman pointed out that there are three public hearings on the agenda, and a very large turnout, and the building was only rented until 10:30 pm, so to accommodate everyone people should keep their comments brief to three minutes.

V. PRESENTATIONS

A. Firewise Program, Brad Neumann, MSU Extension

Neumann works with local governments across the Upper Peninsula on topics related to land use, planning and zoning, and community development. One main audience for the Firewise program is property owners. Large wildfires are common in the Upper Peninsula. Marquette County is second in the State for number of wildfires. MSU Extension has educational resources to help.

Homeowners can reduce risk of property loss and damage by maintaining landscaping within 150 feet of the home (remember “Keep your landscaping LEAN, GREEN, AND CLEAN”). Examples of tips include pruning branches up to six feet in height, removing dead fuels lying on the ground, choosing less combustible landscaping and roofing materials (fire resistant plants bulletin at www.firewise.msu.edu/resources/), relocating woodpiles away from the home, enclosing openings in eaves where embers could enter, etc.

There are also tips for Firewise communities and subdivisions who can work collectively to prevent fire damage. Local governments have a role. In the April 2013 issue of Planning and Zoning News, Neumann offers zoning language relating to a wildfire hazard overlay district for high risk areas (where the topography and fuel types are good indicators of risk). These regulations may address construction standards. Education can be incorporated in the zoning process by handing out Firewise brochures to people seeking permits in high hazard areas.

Neumann can set up a booth to hand out information at Township events, or can provide materials for Township mailings. Sikkema suggested getting a link to the Firewise materials. Neumann said the County is starting a community wildfire protection planning process with funding from DNR and US Forest Service to look at hazard assessment and to map hazard areas. They will contact the Township about involvement in the process.

B. T.E.A.M proposal for an east/west Chocolay Township ORV connector route utilizing County roads

Tony Harry, 6369 US-41S, is President of Trail Riders Enthusiasts of Marquette County ATV club (T.E.A.M.), member of SORBA ATV club in Munising, on the Board of Directors of the U.P. ORV Trail Development Association, member of MI Trails ATV Club in Ontonagon, and member of the Hiawatha Snowmobile Club in Marquette. Harry is trying to get a connector route for ATVs through Chocolay Township to create a U.P. wide trail from Ontonagon to the Mackinac Bridge. The trails would be marked and would have organized law enforcement. Harry started the club because people don't know where they can ride and are getting lost. The mission of the club is to play an active role in improving ORV conditions through legislation, publicity, and responsible members. Harry introduced Rob Katona who is a trails analyst for the Upper Peninsula District of the Michigan DNR.

Katona clarified there are State designated routes that are maintained by grant sponsors, such as ORV clubs that apply for grants through the ORV trail

improvement fund. These trails are typically off road and have true trail characteristics. They are not on roads. They are through the woods or on railroad grades, and are eligible for grants to fund maintenance and law enforcement. They are approved through the internal DNR approval process.

Non-state designated routes are corridors that are open to ATVs, and could be a forest service road, state forest road, county road, or even a trail that is not managed by the State. They are primarily located on County roads and serve as connector routes. In this case, this is an example of a club seeking to open a connector route. These are approved through a local ordinance. The process to open a non-designated route begins with citizens or a club approaching the DNR with a plan. The DNR provides guidance, and the initiators seek permission from landowners or the appropriate public authority. With support and approval from all parties, the corridor can be opened and enforced through a local ordinance. The U.P. Trail Development Association is working with clubs to develop a U.P. wide connector route. These can be combinations of designated and non-designated approved routes. Our area provides a large gap through which T.E.A.M. is trying to provide a connection.

This proposal is to open Mangum Road, Basal Road, County Road 480, a portion of Kawbawgam Road, and Cherry Creek Road between 480 and Carmen Road for ORV travel (on the paved portion of the road). There are some portions of the proposed connector route that involve other landowners and managers and require separate review and approval.

Katona said the benefits of opening select roads and enacting an ordinance is increased recreation for local residents, access to businesses, increased tourism opportunity, connectivity to other routes, and additional monitoring from responsible ORV users and club members along the routes. This could lead to decreases in trespassing, unauthorized youth operation, and property destruction. It creates the opportunity for enforceable regulations such as speed limits and hours of operation. Signage and information stations help educate users.

Katona addressed some concerns, saying there would be an increase in ORV traffic if Chocoday opens up some roads, but the use would be concentrated and better managed. Enabling of enforcement would help address noise and speed concerns (there are State regulations regarding sound emission and the local government could enact speed limits and put up signs). When limiting operation to the far right of the maintained portion of a road, there would be less damage to road shoulders, steep wet areas and driveways. Some funding from fines would be available to assist in restoration and maintenance. He said that ORV and vehicular accidents have been very minimal.

Ron Yesney of the DNR then explained their role. The DNR used to develop and maintain trails on their own. With staff decreases, the DNR now partners with others to develop and maintain trails, both motorized and non-motorized. The designated ORV route ends at the casino in Chocoday Township, and there is another trail that ends at the crossroads. A connection is needed between them through Chocoday Township. The governor supports interconnected trails between communities (Trail State) as good for the economy. A managed system is better

than a free-for-all where people don't know where they can ride. ORV clubs are good partners. The DNR representatives are present to hear what people have to say and to support T.E.A.M.

Mahaney asked if there any paved designated trails? Yes, there are, short segments to get around wetlands or accommodate road crossings.

Sikkema asked if this would be considered a long or short paved segment? Katona said this would be considered a long segment. State designation would require moving the trail off the pavement (off-road), even in the unpaved portion of the right-of-way.

Mahaney asked for clarification on funding for repairing road, shoulder, and driveway damage. An ordinance would allow civil infraction fines to be put into an ORV fund with a portion used for restoration.

Milton asked if the ORV definition includes jeeps and pickups. Yes, it does. Everything from full size vehicles down to motorcycles, including side-by-sides, quads, four wheelers, but not snow machines.

Sikkema asked about classifications of trails. There are several. An ORV route includes all vehicles; an ATV trail includes vehicles less than 50 inches in width; and a motorcycle trail is 24 inches in width and for motorcycles only. There are also ORV routes with specific restrictions.

Meister asked if the DNR has looked at alternate routes. Katona said they have, as far south as Trenary, working with the forest service. The watersheds south of Chocolay Township provide a barrier. This is really the only viable route at this time. The other considered routes were mostly roadways except for off-road trails through the Chatham area. There were problems with landowner permissions.

VI. OLD BUSINESS

None

VII. NEW BUSINESS

A. Consideration – Trail Riders Enthusiast Alliance of Marquette County (T.E.A.M) proposed plan for east/west Chocolay Township ORV connector route

Planning Director comments

Woodward pointed out that the 2012 Annual Report for the Township includes descriptions of roles and responsibilities for Township Planning and Zoning staff and decision making bodies. She said her job as Planning Director is to bring items to the appropriate decision making body. This decision is being heard first by the Planning Commission who will hold the public hearing, and then may or may not make a decision this evening. Depending on the time, they may postpone a decision until the next meeting. But what they will work toward is making a recommendation to the Township Board on this proposal.

Woodward said she appreciates that T.E.A.M. is working through the appropriate public process with the Township and the DNR to promote responsible ORV

ridership and to educate people. She also praised the hard work of others to get together, find out what people want, and to present the information and submit petitions.

Harry had submitted a petition with 51 signatures (at least 35 residents of Chocolay Township) who want an ORV route through Chocolay Township. Staff advised Harry to submit a detailed plan for the route. Harry had informational meetings with various Township staff. The group does NOT propose opening all roads to ORV use, and does not support travel through neighborhoods to access the route. This is simply a connector route.

The staff report details applicable legislation and regulations in surrounding jurisdictions. Basically, the County ordinance opened county roads in all jurisdictions to ORV travel except those in the townships of Chocolay, Marquette, and Sands and the cities of Negaunee, Ishpeming, and Marquette. The cities of Ishpeming and Negaunee adopted their own ordinances opening most of their roads to ORV travel. The staff report includes input from the County Road Commission and County Planning, and County Sheriff's department. Police Chief Zyburt is also present to discuss his report.

Woodward detailed the applicable sections of the Community Master Plan that support quiet, rural lifestyles and more non-motorized transportation opportunities. The only direct mention of ATVs is a vision statement that says, "Recreational riders enjoy their ATVs in designated areas with well enforced laws". Woodward submitted setback and density calculations along the route for consideration.

Chief Zyburt said he met with T.E.A.M. and they asked his opinion on the route. He thought the route they chose would be the safest, but he is concerned about ATVs and motor vehicles mixing on the road for that long distance, and also concerned about kids on ORVs. There will be a problem with people riding their ORVs from their residence to this route instead of trailering. The four man department is very busy and this will tax their ability for enforcement. He spoke with Mike Lovelace about his experience in other areas, and he has similar concerns. The police department does have an ORV. Statistics from the last five years show a total of 99 complaints (not a lot), with a majority on the portion of the snowmobile trail which is closed to all wheeled vehicles. There was one fatal accident, and others involve private property damage. Mahaney asked if they have been able to ticket violators. Chief Zyburt said the majority do get away. They are hard to catch and there is a risk of injury in a chase. They can usually identify locals because it's ongoing and there may be a worn trail. Heinzelman asked if they do a directed patrol for ORVs. This is done on the snowmobile trail in the spring and summer.

Sheriff Mike Lovelace commented on problems in other jurisdictions. Chocolay's primary enforcement would be the local police department. The Sheriff would have deputies available for DNR designated trails. Sheriff Lovelace is opposed to ORVs on paved roads. He opposed the County ordinance along with the attorney and road commission. He is concerned about youth on ORVs who are not supervised by their parents and travel in packs down the middle of the road. He will not chase them because they will flee and lose control and get hurt. He says the tires are not

designed for travel on paved roads and they are not stable at high speeds. Even on roads that are not busy, the mix of traffic can create dangerous incompatibilities. There are not enough deputies to answer calls if there are problems.

Public hearing – instructions were given

Robert Taylor, 204 Jean St, owns the Adventure Center at the crossroads and promotes ORVs. He detailed the substantial income generated by ORVs for the State. He said there are more accidents on non-motorized units than motorized units. He prefers they not run down paved roads, but due to various obstacles, no other route has proven viable. The tire safety consideration is not applicable at the 25 mph speed limit. He also has a problem with unsupervised youth riders, but there are appropriate laws for this. He suggested approval on a test basis.

Mary Jane Lynch, 316 Kawbawgam Road, appreciates the work of T.E.A.M., but asks that an economic study be done because she thinks the impact is not significant. She is in favor of a well-designated, well-maintained, and well-signed trail but not in favor of the connector route because she thinks it is not necessary. She thinks it's wrong to prioritize ORV funds over safety and other people's needs.

Jennifer Tapolcai, 794 Mangum, said Mangum Road is peaceful, with young families, and four season non-motorized use – a strong community with strong friendships. She is concerned about ORV traffic on a small winding road with hills, especially in the winter. ORV traffic would have been a deal breaker for her when she was looking for a home in a quiet, peaceful area. Safety is a priority.

Tom Russo, 910 Mangum Road, says Mangum is a busy, dangerous road. The DNR did not partner with the residents or get their input. Residents want to be in the partnership. The DNR needs to find an alternate route. TEAM means together everyone achieves more (his interpretation). Safety should not trump the quality of life for residents. He is concerned about safety, and increasing the amount of traffic is irresponsible. Don't forget the residents of Mangum Road, they care.

Deborah Mulcahey, 633 Lakewood Lane, congratulates ORV people who safely operate. This is not always the case. She is concerned about ORVs operating on dunes and the beach. ORVs are not listed as a Township priority. She asked that the hearing be cancelled so everyone is not wasting their time due to two primary reasons, 1) Road Commission not allowing the connector on Cherry Creek Road, 2) DNR not speaking uniformly about the Lake LeVasseur connection. The land managers didn't know about the proposal until recently. There are serious accidents. Look from the user perspective of the land. The creation of the link will not solve the education problem. There will be no enforcement. Noise is an issue. There is a liability issue for the local club. She is opposed to the route.

Carol Lamirand, 452 County Road 480, invites people to have a lemonade and view the traffic in front of her home. She is concerned about children on motorized vehicles and thinks it creates disaster in letting them share the road with big trucks. She also worries about the method of road repair using loose pebbles and lack of repair. She doesn't want vehicles making a mess in front of her yard.

Dave Drummond, 805 Silver Creek Road, disputes some of the other concerns and thinks people blame 4 wheelers for problems they don't create. He is in favor of the route.

Cheryl Koski, owner of Creative Interiors on the corner of US-41 and Basal Road, is opposed to the connector route. Basal is narrow with no shoulders, creating a hazard for users of the road. ORVs travel in groups and disrupt business activity with their presence and noise. It is a dangerous intersection. ORVs don't have identification so they can't turn them in for improperly using their parking lot. It is a safety risk. The Township should provide adequate parking for the users to trailer their vehicles to access the trails.

Ray Wood, 1777 M-28 E, uses the roads frequently as a cyclist. The shoulders are in poor repair already and this would make it worse. He is also concerned about safety with mixed users. Mangum Road is narrow, winding, and has line of sight issues.

Skip Schulz, President of U.P. ORV Trail Development Association, hears the same frequent concerns from the minority. He disputes the basis for safety concerns based on the low frequency of incidents compared to the number of total users. To the residents along the road, he said, "It's a public road". If you want something different you can live on a private road. He supports a controlled and managed route that can be enforced. Otherwise, people will use it anyway. It's already against the law for youth to ride. People break the law. Motorists also break the law by speeding, but we don't make cars illegal. The sport will exist whether people like it or not. The majority of riders are 52 year olds on side-by-sides. This is one way to bring people to and through the community. It doesn't make sense that people can say they want to drive their car from here to Detroit but they don't want ORV people to ride from one end of the U.P. to the other. That's selfish. He promoted working together.

Leanne Hatfield, 724 Greenfield Road, mentioned the petition against the proposal in her neighborhood. She heard every family on Mangum Road is opposed. She mentioned the many non-motorized users and safety concerns on the road. She said the economy would be better if everyone in the room bought local and supported local businesses. The directly affected landowners are opposed.

Domenic Ori, 293 County Road 480, is concerned about the safety of non-motorized users utilizing the road shoulder. Is he supposed to jump in the ditch or in the road when meeting an ORV on the shoulder? He supported the bike connection between Lake Michigan and Lake Superior. He is not opposed to ATV people if they ride in the right place, but is opposed to them using the road shoulder.

Jerry Labine, 6408 US-41, suggested putting the trail on prison property.

Debby Mahin, 774 Greenfield Road, is concerned about safety. Residents contribute a lot to taxes, and she is not sure about the contribution from ORV users.

Katie Beerman, 150 Mangum Road, was born and raised there. She thinks regulations will not be enforceable. The packet does not mention that the Township is not immune from liability arising from gross negligence. If the Township does not listen to the safety concerns of residents, then it may constitute gross negligence. She doesn't care what other jurisdictions do – our Township is different and that's what makes it special, that's what brings tourism here. The Township Comprehensive Plan supports her position. She thinks the Planning Commission is the representative of the residents, and should listen to the majority.

Chris Hamari, 114 Mangum Road, worked very hard on the petition opposing the route. They have ORVs and enjoy riding, but trailer them to private property. They are not the minority position. There are not that many complaints simply because residents don't bother to complain, but that doesn't mean there aren't incidents. You can't see how old riders are with helmets on. Citizens should help the police by turning in complaints. She invited the Commission to speak for them.

Dale Hamari, 114 Mangum Road, tried to find a compromise. He noted there may not be problems with ORVs on the roads in other jurisdictions because they have other places to ride. When pedestrians hear cars coming behind them, they get off the road. ORVs won't be able to get off the road safely on Mangum because it's narrow with no shoulders. Be consistent with the non-motorized focus of the Township Plan. He submitted a plan for an alternate route to the Commission.

John Kurkowski, 249 W. Ridge St. Marquette, speaking on behalf of M.A.P.S. and Cherry Creek School, asks the Commission to consider the impact of the route on the school and the children traveling to the school.

Don Houghton?, 21 year resident on Kawbawgam Road, said there is ORV and snowmobile use already, you can't stop the traffic. His concern is that snowmobiles will go faster than ORVs.

Donald Dameworth, 550 Mangum Road, 96% of residents on the road oppose this route, not counting the connecting road residents that use the route on a daily basis. Some of the other 4% that did not sign were out of town.

Public comment was closed.

Commissioner Discussion

Mahaney said that of the signatures that were collected, there were approximately 189 residents opposed and 35 in favor. He notes the predominance of the opposition, and based on the information presented, he is opposed to the proposal.

Heinzelman also noted the overwhelming opposition from the affected area. He also noted the safety concerns of the Chief of Police, and he has personal experience in enforcement difficulties. Paved roads are not a safe environment for ORVs. There are enough concerns on the roads between motorists, pedestrians, bicyclists, and deer, and this will be that much more distraction. He also noted the vast variety of vehicles considered to be ORVs vs. ATVs. This should be more definitive. It's a hard sell for him especially with all the opposition.

Meister had some of the same concerns. He traveled the route and noted it's an extremely narrow road with no shoulder and no room to get out of the way. The first priority is to the residents of Chocolay and their quality of life, so he is opposed.

Sikkema asked the DNR to clarify that this trail, being on long stretches of paved surfaces, would not be a State designated trail and thus would not be eligible for funding through the ORV trail improvement fund, and would not receive paid enforcement by the County Sheriff.

Milton noted the confined space on Mangum Road, and felt adding ORVs would be a mistake. He can't support an ORV trail on Mangum Road.

Smith personally owns snowmobiles and is an active ORV user, and likes the idea of riding from his house to a trail. But as a Planning Commissioner he represents the Township. As a user, he just wants a place to ride, but doesn't think people will trailer to a trail. He knows the people on Mangum Road probably have ATVs and probably use them respectfully to ride from house to house. However, there is overwhelming opposition to a through traffic route, and so he can't support it.

Heinzelman addressed the liability issue and gross negligence, and says the Township might open itself to liability because there is always a lawyer willing to take a gross negligence case. He also noted it is unclear what a pedestrian should do when approached by an ORV on the shoulder. The Commission will submit the alternate route plan to the DNR and Township Planner.

Smith noted that from his experience, it takes time to work with the community and get trails open. He hopes this will open the discussion and more people will come forward with alternate routes. He appreciates all the work the club put into it.

Mahaney is an avid cyclist using the roads that are included on this proposal, and he has safety concerns along Mangum Road, including disrepair and sharp turns. He sees problems with the mix of users and is concerned about quality of life and the non-motorized focus. He thinks they should listen to the residents of Chocolay.

Heinzelman asked Woodward to verify the County Road Commission's position on the proposed route along Cherry Creek Road. She said that even if the Township approved the ORV route on Cherry Creek Road, the Road Commission has said that they will use their authority to negate that decision.

Commissioner Decision/Recommendation

Moved by Milton, seconded by Mahaney, to recommend that the Township Board take no action on the T.E.A.M. proposal and maintain Chocolay Township's exemption from the County ORV ordinance that authorizes ORV access on County roads.

Vote: Ayes: 6 Nays: 1 (Stanaway) MOTION CARRIED

There was a two minute break to accommodate those who wished to exit the meeting.

- B. Consideration – Proposed Conditional Use #CU13-02 for 110 Aspen Drive, Parcel #52-02-465-026-00, for a Group Day Care Home (will be State Licensed)

Planning Director comments

Woodward summarized the application. This was formerly the site of a family child care home (up to six children) run by a former resident. Woodward took photos of the outdoor play area. She noted the main consideration is that the Michigan Zoning Enabling Act designates this as a residential use of property that shall be issued a permit if it meets all of six standards. To address the six standards, the Commission needs to decide what it thinks is appropriate for fencing. The regulations of PA 116 of 1973 do not require fencing for the required outdoor play area. The Township Zoning ordinance also does not have a requirement for fencing for this use, but the Planning Commission could require fencing as a condition of approval. The applicant is present to answer questions about hours of operation. No signs have been proposed, but a sign would not be permitted other than the typical residential name/address sign. There is plenty of room for parking for the other employee.

The use must also meet the conditional use standards of our zoning ordinance. Staff made a determination that it does meet these standards, and that the improved availability of quality home child care proximate to other homes and places where people work is in the public interest per standard #4. Staff also finds that the State licensing process will ensure that the use continues to provide adequately for the services and facilities deemed essential to the use per standard #6.

Sikkema asked for verification that if the use meets all the conditions, it's basically considered a residential use under the Michigan Zoning Enabling Act (MZEA). He asked if you can require a conditional use permit. Woodward said the MZEA says a Township can approve this use through a conditional use permit with extra conditions, as long as the conditions are not more restrictive than the State licensing act. For example, you can't be more restrictive than the 16 hours maximum hours of operation. But you can approve the use even if it doesn't meet the conditions of the MZEA. You can limit night time hours of operation but not prohibit them. These things should be addressed as conditions in the decision, not just exist in the application. You can't be more restrictive than the state in number of permitted children. Conditions must support standards in the Zoning Ordinance.

The Commission verified the number of public comments received. Sikkema also verified that even though an additional "employee" would be required, this is designated by the MZEA as a "residential" use of property, not a home occupation.

Public hearing

Andy Wasilewski, 114 Aspen Drive, said the former child care home worked fine and the children were never a problem. He is only now learning about the increase from six to twelve children, which presents some concern to him. He had some questions related to the discussion. He thinks that a front yard fence would be a detractor for the neighborhood because it would be the only one. Sikkema asked for clarification that the speaker would not consider a fence to be detrimental. Wasilewski clarified that he thinks a front yard fence would be a bad thing, but a

back yard fence would not be a problem. Mahaney asked if Wasilewski was concerned about traffic with the increase in children, or the hours of operation. He was not sure how it would be now, but it was not a problem before. The other child care home closed last October.

Meister asked if Wasilewski thought a fence was needed for his protection. He said that the other kids played in the front yard and were closely monitored, but it was never a problem and they weren't near the roadway. He said it was a positive thing.

Public comment was closed. The applicant will join the Commissioner discussion.

Commissioner Discussion

Sikkema verified that the operation would include another adult if there were over six children in care. The applicant verified this and explained the adult/child ratio rules. Mahaney asked how this was enforced by the State. They perform unannounced inspections and pull the license if you have too many kids.

Sikkema asked the applicant's thoughts on fencing. The applicant saw no need for fencing based on her level of supervision. Heinzelman asked about the perimeter trees. Mahaney asked the applicant if she is aware of other neighbor impressions. She said the older neighbors across the street expressed that they love the atmosphere that the kids bring, and that it creates more of a neighborhood feel.

Sikkema asked about limiting hours of operation from 6 am to 6 pm. The applicant noted that they might not be able to limit to 12 hours when the state allows 16 maximum, but she doesn't generally anticipate exceeding these hours. The Commission discussed limited outdoor play hours.

Mahaney again asked about a back yard fence. The applicant would prefer not to install a fence for the kids. They put in a wireless fence for the dogs. They like the current feel of their backyard. The kids have organized activities.

Commissioner Decision/Recommendation

Moved by Stanaway, seconded by Sikkema, that after conducting a duly noticed public hearing, and upon finding that the proposed use complies with all standards of Section 206(4) of the Michigan Zoning Enabling Act, P.A. 110 of 2006, and the Conditional Use Standards of the Chocoday Township zoning ordinance as noted in the staff report dated May 2, 2013, the Conditional Use request for parcel #52-02-465-026-00 located at 110 Aspen Drive to operate a Group Child Care Home is hereby approved subject to the following conditions:

- *Limit hours of operation to 5:30 am to 10 pm.*
- *No outside activity prior to 9 am.*

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

- C. Consideration – Proposed Conditional Use #CU13-03 for 801 Willow Road, Parcel #52-02-107-082-10, for a Group Day Care Home (will be State Licensed)

Planning Director comments

Woodward noted one public comment was received that day and submitted to the Commission.

Public hearing

No comments were received at this hearing.

Commissioner Discussion

Stanaway asked the applicant how far down Willow Road she lives. The condition of the road was discussed. It is a private road with no private road agreement. Two homeowners take care of the maintenance. The applicant has resided there for two years. She has a family child care home now, and other residents should be aware since they play in the front yard. Sikkema asked if there are any covenants that limit uses. The Township is not aware of any.

Commissioners discussed hours of operation with the applicant. She has someone considering working a night shift. Drop off would be 9:30 pm. Commissioners thought there would be two important concerns for neighbors in relation to hours of operation, including pick-up/drop-off times and outdoor play time. The applicant noted that hours of operation are reported in the state license application. Changes can be approved through an agency process.

Commissioner Decision/Recommendation

Moved by Sikkema, seconded by Meister, that after conducting a duly noticed public hearing, and upon finding that the proposed use complies with all standards of Section 206(4) of the Michigan Zoning Enabling Act, P.A. 110 of 2006, and the Conditional Use Standards of the Chocoday Township zoning ordinance as noted in the staff report dated May 3, 2013, the Conditional Use request for parcel #52-02-107-082-10 located at 801 Willow Road to operate a Group Child Care Home is hereby approved subject to the following conditions:

- *Pickup/drop-off shall be limited to the hours of 5:30 am to 10 pm.*
- *Outdoor activities shall be limited to the hours of 9 am to 9 pm.*

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

VIII. PUBLIC COMMENT

Gary Walker said the Planning Commission did a very good job in a very difficult situation.

IX. COMMISSIONER'S COMMENT

Sikkema said MDOT is proceeding with the design of the resurfacing of the bike path on the east side of US-41 from M-28 to Terrace. There will probably be some changes in curb and gutter in front of a couple of businesses to enlarge the islands to accommodate the bike path. Contact Rob Dervo.

The Commission asked about the status of the unfinished zoning ordinance amendments. This list will be brought to the Commission at the next meeting to discuss potential further action.

The Commission discussed the current chicken regulations in the animal control ordinance, and lack of clear regulation in the zoning ordinance. Enforcement can really only come from the animal control ordinance which is enforced mainly through complaint. It is not fair for people to have chickens only if their neighbor doesn't complain. There needs to be consistently applied regulation and enforcement. The Commission will further discuss this at the next meeting, considering other animals and the impact of the Right to Farm Act. They could adopt a local food chapter for the Master Plan and then address regulations.

X. DIRECTOR'S REPORT

Woodward related thoughts and examples from the APA conference in Chicago. The Board adopted zoning amendments pertaining to Signs and Conditional Use Standards. Woodward noted the Board approved a change in the Conditional Use amendment, which the Planning Commission thought was problematic because there is a need to keep up with current law vs. the law at the time the permit was issued. Woodward presented the revised Sign application. Sikkema said the new trend is portable billboards.

ADJOURNMENT

Heinzelman adjourned the meeting at 10:35 p.m.

Submitted by:

Planning Commission Secretary
Andy Sikkema

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, June 3, 2013

I. MEETING CALLED TO ORDER BY: Andy Smith at 7:30 p.m.

ROLL CALL

Members Present: Andy Smith (Vice Chair – Acting Chair), Andy Sikkema (Secretary), Tom Mahaney, Eric Meister, Kendell Milton, Bernie Stanaway (Board Rep)

Members Absent: Gary Heinzelman (Chair – resigned)

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES – May 6, 2013

Motion by Milton, seconded by Stanaway, to approve the minutes as written.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Meister, seconded by Sikkema, to approve the agenda as written.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

None

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

A. Chocolay Township Farm Incubator Project

Kelly Drake Woodward introduced Natasha Lantz and Matt Gougeon from the Marquette Food Co-op, who spoke about the Co-op's involvement in the project to date. Gougeon, General Manager of the Food Co-op, gave a perspective on the impact of local food in our area as context for the presentation. He said from a business perspective, locally grown food and product has been the fastest growing category in their store for the last four year period, growing 60 percent during that time and representing half-a-million dollars of impact from food grown in the Upper Peninsula. He said the prospect for this local incubator farm is significant. They have seen that there is a growing interest in locally grown food, but there is a dearth of locally grown food. The U.P. has a third of the land mass of the state and only three percent of the population. Gougeon said that his organization, directed by his Board of Directors, has a vested interest in supporting the farm incubator project in Chocolay Township, because they have seen a real need for the education of new, young farmers and a need for an increase in capacity of locally-grown food. He said this is a tremendous opportunity for Chocolay Township and Marquette County to be seen as a leader.

Natasha Lantz works as Community Liaison for the Marquette Food Co-op. Up until two years ago she owned one of the local farms in the area, Dancing Crane Farms. Lantz is the co-leader of the U.P. Food Exchange project. This project coordinates local food activities across the Upper Peninsula. Lantz said they

conducted an Ag Assessment across the U.P., polled the retail stores, and talked to the community, and found that there is not enough local food being produced to meet the demand. Hospitals, schools, and restaurants try to purchase local food but can't because there is not enough being produced. The Co-op has obtained commitments that these institutions and businesses will purchase local food when it is available. She said when the opportunity came up to work with Chocolay Township on the incubator project, they assigned two of their hoophouse/gardening experts, Kelly Cantway and Abbey Palmer, to meet with Woodward on a significant level, which they have been doing for quite some time now. They will also involve other staff members who are "hands on the ground" working and training community members to grow food. Lantz said there is great potential for the farm incubator project because there are two different types of farmers that can be served – new beginning farmers, and current farmers who want to increase capacity. Both need a place to learn and try different techniques. This is an opportunity not only to train more people, but to create a model for others in the state and across the country. Lantz can answer questions about local food and has brought information on various classes and other events to give the Planning Commission an idea how this incubator project will dovetail nicely with programs already in place.

Woodward gave a presentation on the potential project starting with a history of how the project materialized. The property has been leased to a farmer from Skandia, but the Township was actually losing money on the lease. During the process of renegotiating the lease, the Board voted to let the lease terminate in spring of 2014. The Board indicated support for agriculture as an interim use of the property until it could be determined if expansion of the Recreation Area was warranted. Township Manager Steve Lawry discussed the prospects for retaining the grandfathered agricultural status of the land with Woodward. Woodward suggested that it might be feasible to use the land as a farm incubator to train new farmers who might then purchase farms in Chocolay Township or the region and contribute to the local food supply.

Woodward said the goal is to contribute to a vibrant and sustainable food economy, and to increase food security in the region. Chocolay Township would be working with local farmers, the Co-op, U.P. Food Exchange, and other important community partners to accomplish this goal. Existing challenges within the local food system include a dependence on far-away food sources. Woodward said the average pound of food travels 1,500 miles to reach your table. This is a concern in light of dwindling fossil fuel reserves and rising food prices. She also noted corporate control of seed supply and distribution systems, citing various statistics related to the processing and distribution of meat, precut salads, and milk by only a handful of companies nationwide. She noted the value of more resilient and diverse food systems. Other challenges are the disproportionate subsidies for large vs. small farms, food standards that create a hardship for small farms, and local regulations that don't support local food businesses.

Woodward noted the following benefits of strong local food systems: fresher, healthier food; fewer middlemen leading to greater incomes for farmers and lower food prices for consumers; more local jobs; greater productivity per acre; better conditions for farm animals, and increased food security. Woodward noted the

evidence of increased interest in local food as shown by the rising number of farmer's markets, winter markets, institutional purchases, and agri-tourism sources along with the participation of local health departments in support of local food.

Woodward highlighted the vision and some of the relevant goals and policies of the Marquette County Local Food Supply plan that could be addressed by this farm incubator project. She especially noted the goal of government providing an example of how to use land to increase the local food supply. Also, the County plan does include policies for supporting education, land-leasing and sharing (farm incubators), and cooperatives for food processing, storage and farm equipment. She noted the importance of community partnerships in the project.

Woodward said that there may be several different meanings for the term farm incubator. Some organizations use them strictly for education or for certification. However, this project is envisioned as a working farm, outdoor classroom, and entrepreneurial experience. There would be multiple lease holders that would pay for their own plots and supplies and participate in cost sharing. They would be assisted in creating business and marketing plans and tracking their profits. The project also promotes the sustainable use and stewardship of agricultural lands, and ensures community engagement in the food system. The project is envisioned as a bridge between internship at a farm like Seeds and Spores and the big step of full farm ownership. Most new farmers don't have the opportunity to learn from other family members or access land and equipment on their family's farm like they used to.

The Township would be the land owner, and there would be a need to create an entity like a Board of Directors for the operations management portion of the project. Other partners would supply mentoring, education, support, and other resources for the farm participants.

Participants would be expected to attend workshops and training, cover start-up costs, participate in a cost share program and shared work days, practice organic farming, and submit reports. Woodward discussed other farm incubators including Intervale Center in Vermont and Tilian Farm Development Center in Ann Arbor Township, Michigan.

Woodward conveyed the keys for success that were discovered at the first visioning meeting on May 28. Topics related to the site, production, distribution, management, program support, and participants. Other potential elements for inclusion are a large plot community garden, children's garden, native plant or permaculture demonstration garden, space for classes and demonstrations, packing and storing area, community orchard or bramble patch, hoopouses, on-site and off-site marketing, and agri-tourism. Woodward will have a meeting with area farmers to get their input, and will form work groups if we want to move forward. Project partners who have offered support thus far include the Marquette Food Co-op and U.P. Food Exchange, AgBioResearch Center in Chatham, MSU Extension educators, local farmers, local educators, and local citizens. Woodward said that with the blessing of the Planning Commission and the Township Board, she would be working with others to create a proposal for the project. She said there is a survey available at www.chocolay.org to collect input.

Mahaney asked when the current lease expires. Woodward referred members to Board minutes on the topic. Mahaney asked if people could use the property year after year to grow food for their family. Woodward said this is what the large plot community garden site would be for, but the farm incubator would be intended to support the farmers for a period of time until they could graduate and buy their own farm. The time period might depend on the demand from new farmers to enter the program, because we would want to keep the majority of the site in production. He also asked about current farmers and how they might use the property. Woodward said they had envisioned it a jump-start for new farmers who don't have access to land, but they would expect existing farmers would be mentors. Existing farmers might also use a portion of the site to try out new products or techniques. Each farmer would either lease a portion of the site from the Township or from the non-profit fiduciary organization that oversees the project.

Smith confirmed that the site is 14 acres, and asked what is currently being grown. The answer was corn. The property was leased by the prison farm and then a farmer. The project would hopefully start next spring provided a proposal was approved by the Board. Woodward hopes to get grants or donations to help cover start-up costs, and to establish a Board to oversee operations.

Sikkema asked if there are models where the land is leased out to a non-profit and the non-profit runs the program. Woodward said that is the most common model. The Ann Arbor Township project is headed by a non-profit fiduciary, Steering Team, and Project Manager.

Meister asked about the possible expansion of the recreation area. Woodward said there are currently no plans for expansion, but they would plan for mobile structures so the site could be easily converted if needed. The communal elements could be located around the edges or away from the recreation areas.

Milton asked about the existing water supply on site (recreation area). The fields have their own sprinkler system and there is a pump house. Mahaney feels that the project should prioritize leasing the land to new farmers more than accommodating existing farmers.

Mahaney asked if it would be open to people other than township residents. Woodward said she anticipated it would need to be opened up to non-residents hoping that they might eventually purchase property here, but that the governing body could decide to give preference to local resident participation in their selection process. She noted that either way it would contribute to the local food system.

VII. NEW BUSINESS

A. Election of Officers

Meister nominated Smith as Chair. Smith said he would rather be Vice-Chair. After discussion, it was moved by Stanaway, seconded by Smith to nominate Sikkema as Chair.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED Sikkema was elected Chair.

Moved by Meister, seconded by Mahaney, to nominate Smith as Vice-Chair.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED Smith was elected Vice-Chair.

Moved by Sikkema, seconded by Stanaway, to nominate Meister as Secretary.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED Meister was elected Secretary.

B. Comments on Marquette County Local Food Systems Plan

The vision statement was praised by Woodward and Stanaway. Milton suggested adding a policy to regulate the mining of topsoil through the use of mineral extraction rules. Stanaway supported this idea. Other members had concerns that topsoil is needed for many uses such as highway construction and landfill remediation, and has to come from somewhere. At the least, a remediation plan should be associated with the activity. There were questions about whether remediation would be covered by the County Soil Erosion regulations. Smith said this would be covered if more than an acre was disturbed or if the site was within 500 feet of a lake or stream. There were also questions about whether these rules would be pre-empted by the Michigan Zoning Enabling Act. Woodward said the township would be limited in local government control of extraction. The focus is to promote responsible removal of topsoil for commercial purposes, recognizing topsoil as a valuable agricultural resource. Responsible removal could include rebuilding the soil with organic materials. Stanaway suggested keeping this idea to guide Township policy, but not necessarily County policy.

Supporting the County Plan does not mean the Township would have to adopt this plan. However, the County master plan goals and objectives would be the basis for the advisory comments on any zoning amendments we would send to the County for review. There were no concepts in the County Local Food Supply plan that were not supported by the Planning Commission. Season extension infrastructure was recognized as important to more resilient systems.

Moved by Stanaway, seconded by Smith, to support the Marquette County Local Food Supply Plan as a basis to guide Township policy.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

C. Comments on the Chocolay Township Farm Incubator Project

Smith asked about the revenue from the current lease. Woodward said the lease with Bergdahl's Inc. was for \$211 per year, but subsequently it was determined that the property taxes of about \$640 per year were not covered by the lease, resulting in over \$400 loss. She noted the details were contained in a March 6, 2013 Memo from the Manager to the Board, as provided to the Commission.

Stanaway said the farm incubator project is a good idea, but he is concerned about security for equipment stored there. This is not so much a problem if the Township doesn't purchase the tools. Sikkema noted it was preferable to have a non-profit taking ownership of the equipment, managing the project, deciding who is in the program, so it's not the Township having to invest in and manage the project. Meister said the Township should not have to administer the program. Many people think this is a good project, but taxpayers don't want to have another employee hired on Chocolay tax dollars. He'd like to see a separate group take it over, with the Township making the property available and having some input on

use, terms, structures, etc. The Planning Commission and Planner don't have time to take this on, but he does support the project as a good use of the land. Woodward said the concept included having a separate group to manage the project. Sikkema suggested having a Board that could include Township residents to work with the non-profit entity, but not to utilize Township resources. He said it's a great opportunity for a group to take on this business, especially this close to Marquette. Sikkema said it's a great use of the property, we just need to look at how it gets managed and operated. Stanaway and Meister concurred. Mahaney asked if the guidelines would come back to the Planning Commission for approval. Woodward said that right now she just needs approval of the land use concept and moving forward with an advisory Board, and also Board to approval of further investigation and creation of a proposal. Mahaney recommended the proposal come back to the Planning Commission to make sure it's in the best interest of residents. Sikkema suggested finding a group to champion the project, do the implementation and take the burden off Staff. Gary Walker concurred that the Planning Commission is a better body to vet ideas. Sikkema acknowledged the correspondence received from residents that Township dollars not be spent.

Lantz said the Co-op could provide technical assistance on things like hoophouse construction, crop planning, and hands on farming instruction. She said that at the new facility, the Co-op will have an aggregation site in the basement with dry and cold storage that could be utilized by participants. The Co-op is also doing a study on how to better utilize trucking to support regional distribution with backhauls. The Co-op and their other community partners can handle large pieces in support of this project, including helping Staff put it all together.

Mahaney supported the creation of a large plot community garden as well on this site. After the following motion was made, Gary Walker asked for clarification of whether the concept would go to the Board for a blessing before proceeding, and Stanaway said that was not his intent. The Commission advised that the concept move to the Board after the proposal was considered by the Planning Commission. This was clarified as keeping the concept at the Planning Commission level until they approve the next step, then sending it to the Board.

Moved by Stanaway, seconded by Meister, to direct Woodward to investigate the forming of a committee or work with a current non-profit to proceed with the next step in forming the farm incubator project, and to present the draft proposal to the Planning Commission for recommendations.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

D. Potential Changes to the Animal Control Ordinance

Woodward said this came about due to enforcement difficulties for current regulations, and multiple citizen requests. She noted her memo response to Trustee Maki regarding chicken regulations. Woodward suggested two courses of action in clarifying the regulations relating to the keeping of chickens per citizen petition presented at the May meeting. One course is to address the animal control ordinance that currently bans the raising of certain animals in non-agricultural areas. The difficulty with this Ordinance is that it is only enforced by complaint to the police department. So people who have neighbors who don't

complain could keep chickens, and those who have neighbors who complain may not be able to, so it's not equitable or based on objective standards. The zoning ordinance is a better mechanism for regulating the activity beyond the basics of proper containment and animal behavior (nuisance provisions). The second and concurrent course would be to amend the zoning ordinance which currently only regulates this issue in a "backward way" (to quote the attorney). Attorney Zappa concurred there is room for improvement in the regulations, and the proposed procedures would be an improvement over current regulations. He said he wouldn't want to have to be in a position to enforce current zoning regulations related to agriculture, and it would be better to have more clear regulations for the keeping of chickens per zoning district. Woodward noted the limitations of the current regulations and the resulting imbalance in enforcement related to strict interpretation of the definition of agriculture. The Planning Commission is asked to consider the change related to the animal control ordinance tonight. Woodward noted that changes other than those being discussed tonight are necessary to bring the animal control ordinance up-to-date with current laws.

Stanaway expressed concern about opening up the regulations to allow chickens to be kept in his neighborhood in the R-2 districts where some lots are only 60 feet wide. He was concerned that if it was opened up for chickens, then other livestock like a pig might be allowed.

Sikkema noted the City of Marquette probably has no agricultural lands, so if they want to allow poultry, they have to allow them in a residential district. Whereas in the Township, we have options for everybody. If someone comes here and moves to residential, then later decides they want to have chickens, well, they should have moved over there.

Stanaway asked if it can be limited to a certain size parcel. Sikkema noted that people don't want to have to move from their homes after their desires change and they decide they want chickens.

Smith asked how the Right to Farm Act comes into play. Woodward noted there are many cases happening across the State and the impact is yet to be determined, however, we have one example case in our County that provides some direction that regardless of our regulations, there are some cases in which local regulations may be pre-empted by the Right to Farm Act. This would involve commercial farms that follow the Generally Accepted Agricultural and Management Practices (GAAMPS). The case was discussed briefly.

Woodward advised creating regulations that are appropriate in scale, setbacks, etc based on the different contexts within the Township after having obtained public input (not just Commission opinion). These regulations may still be pre-empted by the Right-to-Farm Act, but at least we will have clear regulations that citizens can understand before they move here, and they won't have to wonder if they are actually breaking the rule if they keep chickens.

Mahaney said he thinks Traverse City allows chickens. He thinks it's an important issue that we're getting many calls about, and he thinks it's time we deal with it. Stanaway said he wants to see some ordinances and do some more research on

the Right-to-Farm Act. Woodward noted an MSU Extension workshop on the Right-to-Farm Act on June 11, 6:30 – 9:30, at the NMU Olson Library, Room 109.

Moved by Stanaway, seconded by Mahaney, to table this issue to the next meeting to allow Commissioners to do more research on this issue, and Staff to provide more information from Ordinances in other municipalities.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

VIII. UNFINISHED BUSINESS

A. Board request on proposed Zoning Ordinance Amendment Case #ZA0001-13 Notification Distance relating to posting of sign on property for public hearings

The proposed amendment changes the notification distance for written correspondence to all properties within 500 feet, instead of the current 300 feet.

Gary Walker said this issue has come to the Planning Commission as a result of a Township Trustee suggesting that in addition to the other required notices, a sign be placed on the property. The question is does the Planning Commission think that is appropriate or not. Proposed language for consideration is “Where a public hearing of the Planning Commission or the Zoning Board of Appeals is required in relation to an individual parcel in the administration of this Ordinance, notice of said hearing shall also be given by posting a sign not to exceed six (6) square feet in area on the subject parcel at least ten (10) days before the public hearing. This requirement may be waived if the sign would not be visible from any adjacent roadway when placed within the property boundaries, or if excessive snow or frozen conditions interfere with visibility or placement.”

Meister asked who would be responsible for posting the sign, the applicant or the Township? Milton said he thinks Google maps is useful for finding the location, and he doesn't think a sign on the site is necessary. Smith verified that surrounding properties will be notified in writing of the public hearing.

Woodward read Deborah Mulcahey's comments on this issue as submitted to all Planning Commissioners since she was the citizen who requested a notification change to start with. Mulcahey thinks the proposed changes are not acceptable. She suggests a notification distance of 1,250 feet instead of the 500 feet proposed by the Planning Commission (currently 300 feet is the State requirement). She said the proposed language regarding the posting of a sign is also unacceptable because the proposed period of posting of 10 days should be 30 days since people travel for work, take holidays, and might not be aware of a proposal that is posted for only 10 days. She also does not agree with the waiving of the requirement as proposed since she says it offers the community no protection of notice. Comments include, “The fact that the requirement to post notification in the area where the sign will be placed can be waived if there is excessive snow or frozen conditions interfere with visibility or placement is subjective. What exactly does excessive snow mean, or frozen conditions interfering with visibility? Frozen conditions can make it difficult to post a sign; but the reality is that if someone wants to put up a sign they will do so through frozen conditions. Therefore, the individual or business that wants the sign should be required to put the notification sign up and no waiver should be granted for this. Further, there is not mention of dealing with signs being posted along seasonal roads and the ability to post, or the

public's opportunity to review.”

Woodward said the Commission needs to verify their recommendation on the notification distance, and consider whether posting of a sign is necessary or not, and if so, decide on details such as time of posting, size, etc. The Board or Staff could figure out the details on how to purchase or make the signs.

Stanaway said he still thinks 500 feet is sufficient notification distance in most of the area. He agrees Google maps is a good tool. He doesn't think people who are a greater distance away will care about the issue. If they are not directly affected, most people won't care. He doesn't think a sign needs to go up.

Smith said they are already increasing the written notification distance, and he is also not for placement of a sign. Mahaney asked Woodward if she is aware of any other communities that post a sign on the property. Woodward said she did not know. Walker said an older Township zoning law 20 years or so ago may have had a requirement for posting a sign but that is no longer there. He doesn't know if other Townships retain that practice.

Moved by Stanaway, seconded by Milton, that the Board adopt #ZA0001-13 Notification Distance as previously submitted without the requirement for posting a sign on the premises for the following reasons:

- *Properties are easily found*
- *We are providing greater notification than what is required by the Michigan Zoning Enabling Act.*

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

B. Recommended resolution of unfinished historic zoning ordinance amendments

The Commission discussed the zoning amendments that were never finalized but were placed in the public zoning ordinance. Woodward recently corrected the Zoning Ordinance to reflect official processes. If these unfinalized amendments still merit consideration, the process must begin again.

The Commission went through the entire list and decided on whether to take further action as follows:

#34-08-03 Floor Area Ratio - Need more information on the exact text and what was intended. Staff will provide more information at the next meeting.

#34-08-04 Setback changes in the MFR district – this was originally denied by the Planning Commission and there was consensus no further action is warranted.

#34-09-05 Change in lot size and width in the MFR district – this was originally approved by the Planning Commission but there was no Board action. The Commission wishes to take action on this amendment. Sikkema said this was a correction they were trying to do and should be reopened.

#34-09-06 Outdoor Wood Boilers – the Planning Commission approved the language, but there was no record it went to the Board for consideration. However, significant undocumented changes were made to the Zoning Ordinance that didn't match the language approved by the Planning Commission. This language was recently corrected to reflect official proceedings. Smith says he has

the draft at home. The Planning Commission decided to reopen this issue.

#34-09-07 27' Commercial vehicle parking in residential districts – This was to reinstate language that existed before the 2008 amendment. It was approved by the Planning Commission, and approved for a first reading at the Board, but was tabled at the 2nd reading. There was consensus no further action is warranted.

#34-09-08 Change to nonconforming uses and structures – deleted all language pertaining to nonconforming uses which were confused with use variances. This change was denied by the Board, but text was deleted from the Zoning Ordinance anyway. This language was recently corrected to reflect official proceedings. There was consensus no further action is warranted.

#34-09-09 Definition of park – The Board had approved a definition at a first reading but then didn't bring it for a second reading or approval. In the meantime, the Planning Commission created a new definition. Neither definition was approved but the Zoning Ordinance was changed according to the first definition. Currently there is no definition of Park in the ordinance, and parks are approved as conditional uses except in the MP district where they are permitted uses, and in the C and I districts where they are not permitted. After much discussion, there was consensus no further action is warranted.

#34-09-11 Flags – Approved by the Planning Commission and first reading of the Board but never adopted. The same basic language is now contained in the recently approved sign ordinance thus, "flags other than those representing corporate or commercial entities are permitted in all residential districts provided the support structures comply with the setback and height provisions of that zoning district." Smith said this amendment originally was intended to address very large US flags. Gary Walker said that might be a free speech issue. There was consensus no further action is warranted.

#34-09-12 Definition of flags - Approved by the Planning Commission and first reading of the Board but never adopted. There is currently no definition of flag in the Ordinance. There was consensus no further action is warranted.

#34-09-13 AF district nonconforming lot – An attempt to correct an ordinance problem. However, it's the consensus of staff and the attorney that this was not needed. The intent was that people can still build on nonconforming lots in the AF district. There are already provisions for this. There was consensus no further action is warranted.

#34-09-14 Flag – The Planning Commission approved it, the Board approved the first reading, but there was no second reading or adoption. This was related to a provision in the sign ordinance. There was consensus no further action is needed.

#34-09-16 Outside Wood Boilers use provisions. This was approved by the Planning Commission but not addressed by the Board. The idea is that if you meet all the setbacks, why do you need a 5 acre minimum? The Planning Commission decided to reopen this issue.

#34-10-16 Swimming pool regulations – This was never finalized by either the Planning Commission or the Board. But it was thought this was dropped because the County has regulations for swimming pools and the Township doesn't need to regulate them. Swimming pools are not currently addressed in the ordinance. There was consensus no further action is warranted.

#34-10-18 Height – Approved by Planning Commission. Not taken up by Board. The Planning Commission had considered a formula to increase the setback for higher accessory buildings. It had to do with energy truss systems. There was also an issue with how the height was measured. The Planning Commission decided to reopen this issue.

#34-11-06 There was consensus no further action is warranted.

Moved by Stanaway, seconded by Meister, to revisit previous zoning ordinance amendments #34-08-03, #34-09-05, #34-09-06, #34-09-16, and #34-10-18 and to take no further action on all the others.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

VIII. PUBLIC COMMENT

None

IX. COMMISSIONER'S COMMENT

Smith asked on the progress of purchasing the property to the west to allow for better access into the Township office complex. Gary Walker reported no further progress. Sikkema said progress is moving forward on the bike path project. The Township will approach some of the land owners because there is a need to increase the width of some of the islands to accommodate the 10' wide path with 2' borders.

X. DIRECTOR'S REPORT

Woodward noted the opportunities for the Right-fo-Farm-Act workshop and Citizen's Planner certification. She asked Commissioners to let her know if they are interested. Stanaway is interested in the Citizen Planner program.

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

Planning & Zoning News

Correspondence received from Deborah Mulcahey and Wayne Dees.

ADJOURNMENT

Sikkema adjourned the meeting at 10:10 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, July 1, 2013

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:31 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Eric Meister (Secretary), Tom Mahaney, Kendell Milton, Bruce Ventura

Members Absent: Andy Smith (Vice Chair), Bernie Stanaway (Board Rep)

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES – June 3, 2013

Motion by Milton, seconded by Meister, to approve the minutes as corrected, page 4 “The property was leased by the prison farm and then a farmer.”

Vote: Ayes: 4 Nays: 0 Abstain: 1 (not present at meeting) MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Meister, seconded by Ventura, to approve the agenda as written.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Dick Arnold, 312 West Branch Road, asked about the status for the change relating to nonconforming lots in the AF district. Per a FOIA request, he reports there are 841 parcels in the AF district, and of these, 512 are nonconforming lots less than 20 acres. He said his understanding is that nonconforming lots can only have permitted uses so they cannot have conditional uses as listed. He thinks dealing with this issue is more important than putting up community gardens. He suggests we should not change the AF district, but just look at the permitted uses for a conforming lot and nonconforming lot. He was concerned about the lack of height restrictions other than distance from property lines because that could result in excessive heights. Also he is concerned that there are no restrictions on the size of accessory buildings or the number of accessory buildings. He wants to protect the residential neighborhoods and doesn't want a 100' x 200' building 40' high across from his house because it limits his view and decreases property values.

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

A. Marquette County Brownfield Inventory

Presentation by Dotty LaJoye of Marquette County Planning. Marquette County started a Land Bank which receives tax reverted properties and provides

advantages for redevelopment such as title clearing and redeveloping according to a plan. There are more properties for redevelopment than there are redevelopers in the County. The County obtained an EPA assessment grant to start baseline environmental testing as a catalyst for redevelopment. They will then go for a cleanup grant. Brownfields include many types of properties such as blighted, functionally obsolete, and those in the land bank. There were 2012 and 2013 changes to P.A. 381 that now include parking, multi-level parking, urban stormwater management systems, and historic resource redevelopment as eligible projects. There are more eligible activities allowed in core communities which include the cities of Marquette and Ishpeming, or those that are in a land bank. Brownfield redevelopment authorities use tax increment financing and revolving loan funds to reimburse the costs of eligible activities and get sites ready for redevelopment.

Marquette County is giving the community a chance to help identify and nominate brownfield eligible sites and comment on the preferred use. It is important that these findings are validated in the Master Plan and Recreation Plan. The County will prioritize sites for redevelopment according to the following factors: they are identified by the community, public health impacts, hazardous material use on site, and redevelopment potential.

Sikkema asked questions about tax reverted properties and how they are put in the land bank. Ventura asked questions to confirm that the County wants Chocolay Township to help identify sites and that the County may then take steps to redevelop. LaJoye said the projects need to be included in a plan that is usually written by a consultant and sent to the local unit of government for approval. Meister asked who evaluates the properties that are in the land bank? LaJoye said the County Treasurer visits all sites and does an assessment of potential. The Wahlstrom's property is in the Land Bank and therefore qualifies for all eligible activities and expenses, including site and infrastructure improvements, demolition, cleanup, etc as addressed in a Brownfield plan. The goal is to get the property back on the tax rolls, but to get community input on the land use.

VII. NEW BUSINESS

A. Welcome new member Bruce Ventura

Sikkema welcomed Bruce Ventura to the Commission and thanked him for his willingness to serve.

VIII. UNFINISHED BUSINESS

A. Unfinished historic zoning ordinance amendments

1) #34-08-03 Floor Area Ratio

Woodward said she could not find any more information on this proposed amendment, it's purpose, the proposed text, etc. There was only a cryptic reference in one month's planning commission minutes. Ventura

asked Woodward to define what is meant by Floor Area Ratio. Woodward said this is a way to control the size of development on a parcel. It's the ratio of the area of all floors of a building to the area of the parcel. Chocolay does not currently have controls in place to limit the portion of a lot that can be covered by buildings. Some communities have maximum lot coverage, maximum impervious surface ratio, or minimum open space requirements, etc.

Meister said he's not sure he wants to address this if there hasn't been a problem thus far. Sikkema said we only have one area with small parcels and there hasn't been a concern over inappropriate density. Ventura said it would potentially come up more with a multi-family development than with single-family. The Commission agreed to let this issue drop.

2) **#34-09-05 MFR Lot Size/Width**

Woodward said this amendment was proposed to reduce the minimum lot size for the multi-family district from 20 acres to 2 acres, and to add a minimum lot width requirement of 200 feet (currently there is no minimum lot width). However, Woodward pointed out that other uses are also permitted in multi-family districts, including schools and churches, and the minimum lot size would also apply to them. But the other consideration is that this zoning district currently only includes areas that are already developed as mobile home parks or apartments or condos. There are no undeveloped properties in this zoning district. Woodward said this is a bigger issue than minimum lot size. She would like to see the Commission get rid of the Multi-family district, and address multi-family development as a conditional use in appropriate districts. This would give more flexibility in where these kinds of developments could locate. Woodward said that multi-family development should be encouraged in areas with public sewer availability, such as the current commercial district and adjacent areas. This is similar to the method used by Negaunee Township and Marquette Township. The Master Plan supports the development of diversity in the housing stock, housing affordability, and satisfying the needs of more residents.

Sikkema asked about the definition of multi-family. The current definition includes many housing types with two or more dwelling units, such as apartments, boarding houses, fraternities, dormitories, townhouses, etc but not hotels, hospitals, or nursing homes. It does not include Bed & Breakfasts. It does include duplexes.

Sikkema asked if the Commission wants to support creating more multi-family development, and if so, an amendment would be needed. Milton

asked how the current multi-family developments ended up in the multi-family district. Ventura said it looked like spot zoning was done just to accommodate the existing multi-family uses. Meister wasn't sure a multi-family use would be appropriate or have resident support in the R-1 district in places like Briarwood or areas along Ortman Road by Cherry Creek School. He is concerned that if multi-family is made a conditional use, it could go in where it is not appropriate. He said there is a strong tradition in the Township of not having multi-family development, although he's not saying he agrees with it, but there must have been a reason.

Woodward mentioned that they are not currently allowed in any of the Commercial or Harvey areas where sewer is available. Meister reiterated that there is currently no opportunity for future multi-family development. Milton said there is encouragement for mother-in-law flats or accessory dwelling units to address this issue, but the problem is they later become rental units, and he asked if we are trying to encourage this. Meister said he thinks apartments should be more like transitional uses on the edges of the commercial district. So he wants to know if a conditional use would allow some location criteria to achieve this.

Milton said another problem with mother-in-law units is that people may want to split the lot later. Ventura said in the current ordinance, accessory dwelling units are required to revert back to single-family when not in use. Woodward clarified that we don't currently allow detached accessory dwelling units that could later turn into rentals. They must be attached to the home and theoretically all the kitchen facilities for the separate unit must be removed after the use terminates, although she said this is an enforcement difficulty.

Sikkema asked if the only way for someone to build a multi-family development currently is as a PUD? Woodward said the other option is a rezoning. The Commission felt this would be like spot zoning. Woodward pointed out that there is a minimum lot size for PUD's and particular objectives that must be met.

Sikkema again asked if the Commission wanted to try to find a way to allow more multi-family development in the Township. Gary Walker mentioned the limitation of availability of public utilities, unless the citizens would support the extension or development of more public utilities. Mahaney asked if anyone has approached the Township to put in multi-family development. Meister said the units in the medical office redevelopment were rented right away, so that demonstrates demand for rental properties. Sikkema proposed the option of just opening up the

area with sewer facilities to development of this type. Meister mentioned the tradition of having apartments above businesses as an alternative to apartment complexes.

Milton mentioned that density is also controlled by Health Department requirements. Woodward mentioned there are engineered methods that can help satisfy these requirements. Milton said he thinks the 20 acre minimum may be excessive.

Sikkema asked if there is a general consensus to create more multi-family opportunities. This was agreed. The Commission agreed to table the issue for more discussion at the next meeting. They are tasked to think of more areas where multi-family development as currently defined in the Ordinance (including duplexes) would be appropriate and the regulatory methods for approval.

3) **#34-09-06 Outdoor Wood Boilers**

Sikkema said he knows there is one commission member who is particularly concerned about these regulations and he is not in attendance, so he suggests tabling until the next meeting. Ventura said that the packet materials presented information that he could not make sense of due to contradictions, so work is needed.

4) **#34-09-16 Outdoor Wood Boilers in Use Provisions**

Tabled for the above reasons in item #3.

B. Workshop and Attorney input on the implications of the Right-to-Farm Act

Woodward referred to the MSU Extension decision matrix on the Right-to-Farm Act (RTFA) as provided in the packet. The matrix leaves you with the question of what local governments CAN regulate in relation to agriculture. Woodward met with the Township attorney to determine their level of comfort with risk associated with the RTFA, and also discussed the issue with Supervisor Walker. For example, box 5 in the decision matrix asks if local government regulations restrict farms or farm operations to certain zoning districts, at which point you have to decide on a level of risk that your community finds acceptable in acknowledging that local regulations may be legally challenged and pre-empted. The attorneys agreed it is worth having some local regulations because not every operation will fall under jurisdiction of the RTFA. Woodward discussed her belief that we should allow some appropriate scale of these activities to occur, assuming that if the regulations are reasonable and publicly accepted, there may be fewer reasons for people to challenge the regulations under the RTFA. Currently, people don't want to break the rules, but the rules are unclear. The intent is to create regulations that will stand up to scrutiny under the RTFA. However, we should understand that there may be cases where the RTFA will apply, so Woodward suggested making sure

the Nuisance Ordinance is updated to protect against nuisance claims arising from agriculture so that a complaint could be filed with the State and therefore the process would begin to determine if the operation complies with Generally Accepted Agricultural & Management Practices (GAAMPS). Woodward is not aware of any local ordinances that are not challengeable, so her intent was to create something innovative to address the issue.

C. Approach to regulations for Accessory Homesteading Activities

Mahaney asked if this is all tied to regulating chickens. Woodward said it addresses the raising of other animals like rabbits too. Woodward wanted to avoid having to make a determination of whether an activity is commercial or not due to enforcement difficulties and a wish to focus more on the nuisance impacts and compatibility among uses. Mahaney's impression is that the proposed language goes beyond just the chicken issue. Ventura said that the RTFA is a State law that supercedes almost anything the Township can do. Woodward said this is why she tried to create standards that are related to "accessory homesteading activities" as differentiated from "farms" or "farm operations" as defined in the RTFA. Anything that doesn't fall under those categories would need conditional use approval. Walker said that Woodward is trying to set the Township up so that we can keep reasonable decisions local, and not have decisions automatically fall under the jurisdiction of the RTFA; to do what we all believe is necessary to protect the context of our neighborhoods and yet not run "afoul" of the RTFA. Walker says basically it's brand new, no one's really thought this stuff out, we're going to see some ridiculous results before the legislature goes back and fixes it (RTFA). He said Woodward's intent is to have the Commission determine what is appropriate in the Township, and with the Attorney's help, try to make that happen.

Mahaney said we could have an ordinance allowing people to have only 4 chickens, and if they have 20 they could fall under the RTFA jurisdiction and be allowed. Woodward said they could, but they might think twice about challenging the regulations if ours are reasonable. The proposed regulations were briefly discussed in detail. Woodward sent the proposed regulations to the food policy group which includes an MSU Extension land use educator and had received no feedback yet. All potential regulations discussed at the RTFA workshop were felt to contravene the RTFA, except an approach to deal with these animals as "pets", and perhaps Traverse City's approach of regulating only "non-commercial" operations that by definition don't fall under RTFA jurisdiction. Woodward wanted to avoid having to make the "commercial" determination as part of enforcement, and felt it goes without saying because if they are commercial they could be protected under the RTFA anyway.

Sikkema said the way it is written, you wouldn't have to be commercial and could still have the animals, and you wouldn't have to follow GAAMPS and could still

have the animals. Meister said it restricts how many animals and types of animals. Mahaney said the chicken regulations he had researched limit it to four chickens. Woodward said these ordinances randomly limit the number of animals without consideration of the size of the parcel or the context. Mahaney said most ordinances also say they have to be fenced in and no roosters allowed. Woodward said her regulations were meant to be related to something rational and reasonable, such as available pasture area, and also to be publicly acceptable, because some people won't want to see certain animals in their neighborhood. Mahaney said he agrees, some things aren't appropriate in a residential area. Sikkema said that raises the questions of what is a residential area. He says people may invest \$250,000 or \$300,000 in a house and the next thing they know they have a goat or cow next door. He understands this could happen anyway with the RTFA, but he thinks these regulations would open it up so you wouldn't have to have a farm operation but could still have a cow, pig, or sheep. Proposed regulations were further discussed.

Woodward suggested this goes back to what people used to do at their homes, raise a few animals for their family's use. She asked about the difference between having dogs and sheep. Sikkema said he doesn't know if they want to go so far as to have farm animals in residential neighborhoods, even though it could happen with the RTFA. Woodward said that is what you will force people to do, is to seek RTFA protection to have their animals.

Mahaney said the issue now seems to be chickens. It doesn't seem like people are pushing to have sheep, cows, and goats in residential back yards. So he wondered if we could put in an amendment just for chickens. Milton said he likes the animal unit method. The Commission discussed the scope of regulations they want to tackle. Woodward said she was just trying to cover all possibilities in the draft regulations. Sikkema said he grew up in a neighborhood where people had cows, chickens, rabbits, and it's not a big deal to him but he knows there are people who probably wouldn't appreciate that. He doesn't see a big problem with chickens because people will likely get tired of them, but people may have a bigger problems living next to swine. Meister said 4 chickens won't bother anyone if there are no roosters. Ventura said that deer and raccoons that come into his backyard are a bigger problem to him than 4 chickens in the neighbor's yard would be, but you can't do anything about that.

The Commissioners again discussed the approach. Milton said he thinks it's meant to be like "heading it off at the pass", trying to get prepared for some of the challenges that could come up. Walker said adopting an amendment for chickens would probably satisfy things for the moment, but he thinks what Woodward is attempting to do is 1) be innovative, and 2) be prepared for RTFA issues. You could solve the chicken issue and then hope not to see challenges later. Ventura

suggested they move forward with the proposed regulations, dealing only with the 0.1 animal unit equivalents now, making it easier for a future amendment if needed. Meister didn't see a problem with someone in the R-1 district with 40 acres having a variety of animals. Sikkema said then they could have 30 head of cattle, but anyone with that many animals would probably be a commercial operation anyway, and be covered under the RTFA. Meister said there were complaints about arbitrary zoning district boundaries related to having animals, such as on one side of a particular road you could have horses, and on the other side you couldn't, even if you had many more acres than the other property.

Sikkema asked the Commission's intent, whether to work on Woodward's draft but making revisions, and whether to do it now or as homework. Meister likes Woodward's general format but wants time to consider. The Commission was directed to mark up their draft for a good discussion at the next meeting.

Woodward was directed to contact Andy Smith before the next meeting in preparation for the Wood Boiler discussion.

VIII. PUBLIC COMMENT

Arnold asked if the Right-to-Farm Act is a State or Federal Law, and whether State representatives should be contacted to say he doesn't like it. Sikkema said he grew up on a blueberry farm/orchard in an area that experienced changes over the years, and was surrounded by residential development. The neighbors tried to shut the farm down and not let his Dad sell his produce because of the road dust generated by farm visitors. The RTFA rightfully protected this farm that had been there since the 1940's. Ventura said the Act was predicated on issues with an existing pig farm that became surrounded by development, then the new residents tried to shut down the farm that was there first. The reasoning behind the law is to protect the farmers that have been there a long time. It came from downstate pressures. Woodward said agriculture is Michigan's second largest industry and is therefore important to legislators. Meister said the RTFA also protects the farmer who must innovate to stay profitable, because previously if they wanted to change crops, they would lose grandfathered status. Walker said the issue really is change, and whether you come to the nuisance and think you can complain. Woodward said she felt it was wise for the region to come together to write to legislators and let them know the difficulties the RTFA is creating for local zoning, and how it is contradicting the ability of people to raise food in their own back yard if they want to. It's really only protecting the big farmers if it makes local governments think they have to allow all or no agriculture and not regulate anything in-between. But Sikkema said the RTFA does allow some farms out of context and that creates problems. Arnold asked if someone could actually farm in Marquette. The Gwinn RTFA case was discussed in which the farmer prevailed.

IX. COMMISSIONER'S COMMENT

None

X. DIRECTOR'S REPORT

Woodward said the Board passed the Outside Lighting amendment and the zoning ordinance has been revised. She will send a letter to businesses informing them of the change. The amendment on notification distance awaits a second reading but no changes were made at the last Board meeting.

Woodward asked who wished to attend Citizen Planner training this fall. Meister would like to attend. Ventura wants training in Township procedures this year, perhaps the Citizen Planner program. Sikkema and Milton would like to take the Citizen Planner Training next year.

Woodward said an NMU professor had developed a permaculture plan for the farm incubator site, incorporating water catchment and other ecosystem ideas which Woodward hoped to include in the proposal. This site plan was developed by the group and instructor of a permaculture design certification program. Woodward talked to some Chocolay farmers at the farmer's market, and they are very interested in helping with the project and gave some helpful tips.

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

Planning & Zoning News

City of Marquette Planning Commission minutes

ADJOURNMENT

Sikkema adjourned the meeting at 9:10 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, August 5, 2013

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:30 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Bernie Stanaway (Board Rep), Kendell Milton, Bruce Ventura

Members Absent: Tom Mahaney (excused)

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES – July 1, 2013

Motion by Ventura, seconded by Milton, to approve the minutes as corrected, page 1, last sentence of public comment, “it” instead of “if”.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Meister, seconded by Smith, to approve the agenda as corrected, adding the items “Planning Director comments”, “Public Hearing”, and “Planning Commissioner discussion and decision” under New Business item VII.A.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Deborah Mulcahey, 633 Lakewood Lane, commenting on the Right to Farm Act information presented in the packet on page 7-8. She said there is no Supreme Court ruling or published Court of Appeals decision and no legal precedent. She thinks it's overreaching for a zoning ordinance to take away what she considers to be her rights to sue for public nuisance. She cited two Attorney General opinions from 2006 and 2011 and read a statement from an attorney. She said there is controversy but the two informal opinions say that if there are relevant GAAMPS then the Right to Farm Act pre-empts the local ordinance. The site selection GAAMP requires facilities to be zoned agricultural. She said that public nuisance is a serious matter. She doesn't think the Planning Commission is trying to make it difficult for citizens, but is looking to not get itself in trouble. She doesn't think we want to add trouble for the common citizen. She doesn't think the intent of the legislation is to say farming can be everywhere.

None

VII. NEW BUSINESS

A. Conditional Use Permit for 1875 M-28 East, Birney, Parcel #52-02-112-017-00

1) *Planning Director comments*

Woodard said this is a conditional use permit application under the Lake Superior Dune Protection Overlay District, and it's come to the Planning Commission because the applicants want to make earth changes to the dune, including taking four feet off the top of the dune. The overlay district was approved in 2002. The owners of the property to the west (1871 M-28 E) removed the dune sometime between 1997 and 2002 before the overlay district was adopted.

Woodward read correspondence from Jeff Neuner, current owner of 1871 M-28 E. Neuner wanted it known that he is not the owner that removed the dune. He purchased the property in 2004 and he has worked with the DNR to mitigate the damage caused to the dune. His main point was that they are not opposed to the proposed changes on the Birney property if the modifications are made as indicated. They are worried that taking four feet off the top of the dune will cause the west dune to collapse, so they'd like assurance that this would not occur. He says the entire tall dune falls into the area extending 20 foot in each direction from the side property line which, according to the ordinance, is untouchable. Woodward mentioned previous cases that were approved within the Dune Overlay Protection District involving similar changes.

2) *Public Hearing*

Mr. Birney had talked with Mr. Neuner and told him they weren't going to touch the west dune. He described the proposed location of the home. He said they were going to retain the big pines on the dune except one that is leaning toward the house. They want to maintain the integrity of the dune.

John Okonkowski, 1879 and 1881 M-28 E, said his house was built many years ago on top of the dune. He said the dune is really stable there, and his concerns about erosion were satisfied after he saw the plans. He felt that taking four feet off the top of the dune would not destabilize it. His understanding was that the Birneys would keep the area natural and retain all the trees between the properties. He had no objections.

Deborah Mulcahey, 633 Lakewood Lane, objects to the dune being cut and to the requirement for a 1:3 maximum slope. She said cutting the dune causes ongoing erosion, such as that experienced at 1871 M-28 E next door. She said the owners never had a view anyway. She doesn't think using the foundation to stabilize the dune is a good idea because the dune will impact the building since sand moves a great deal. She gave examples of earth changes in the area over time, with dune movement as much as 61 feet, and disappearance of a large pond. She

does not feel it is an energy efficient proposal to take away trees that block the north wind. She urged the Planning Commission to look at other things that can be done with the property, because she thinks that every day will impact the dune.

Pat O'Boyle, project contractor, corrected an earlier statement, saying the property that is setback similarly with the proposed development is owned by Manoskey, not Neuner.

The public hearing was closed.

3) *Planning Commission discussion and decision*

Meister asked for clarification on the setback of the house in relation to the dune. Sikkema asked about the vegetation that would be used to replant the dune.

Ventura said it has been his experience in working with properties along Lake Superior that the wind will undermine structures, including boardwalks. He has seen foundations exposed as much as six to eight feet. The sand will move, and there's no stopping it. He said that putting in a boardwalk will create an invitation to further movement. The only thing that stabilizes sand is vegetation with plugs planted close enough together to create a mat under the sand, however, even that is not permanent. He thinks it's imperative to implement re-vegetation immediately. Birney said the dune face is well vegetated. Ventura said the sand will also obscure windows because it sand blasts the glass. Ventura asked about the re-vegetation requirements of the ordinance and whether it is consistent with what is recommended by the Superior Watershed Partnership. Woodward said there was some indication in the minutes that the Partnership was involved when the standards were adopted.

Sikkema noted that the owner, Mr. Birney, needs to sign the application, not the agent, Mr. O'Boyle.

It was moved by Stanaway, seconded by Meister, that after conducting a duly noticed public hearing, and upon finding that the proposed use complies with the Conditional Use Standards of the Chocolay Township zoning ordinance as noted in the staff report dated July 26, 2013, the Conditional Use request for parcel #52-02-112-017-00 located at 1875 M-28 E to perform construction within the Lake Superior Shoreline/Dune Protection Overlay District is hereby approved subject to the following conditions:

- 1. A twenty foot undisturbed buffer shall remain in place on the dune along side property lines.*
- 2. Slopes for dune cuts shall not exceed one foot vertical to three feet horizontal.*

3. *The limits of clearing, grading, and vegetation removal will be clearly indicated to avoid accidental damage to slopes and vegetative roots that support slopes, and discourage materials being stored outside the planned impact area.*
4. *Disturbed areas will be minimized, and the applicant will utilize all applicable temporary slope stabilization measures during construction.*
5. *The applicant will minimize tree and vegetation removal. If removing trees, stumps and roots will be left in place to stabilize soils and slopes unless they would interfere with the building foundation.*
6. *The development area will be re-vegetated in stages as soon as possible as portions of the site are complete utilizing native vegetation. Disturbed areas of the dune will be rehabilitated with dune grass plantings at a rate of one culm (clump) per square foot of disturbed area (can also include other native vegetation).*

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

VIII. UNFINISHED BUSINESS

A. Unfinished historic zoning ordinance amendments

1) #34-09-05 MFR (Multi-Family Residential) District Lot Size/Width

Woodward said the last meeting ended with a discussion on where new multi-family development might be accommodated since the zoning district is currently configured only to include existing development. She obtained input from the Marquette County Health Department which will assist with the decision. She said she has been tasked with completing a strategic master plan update within two months, and there is some urgency on addressing future land use. She suggested holding a special meeting to further discuss these decisions. She would like to see the master plan adopted before taking on this amendment.

Milton asked about the history of accessory dwelling unit regulations in the Township which resulted in not permitting detached accessory structures. Woodward said that would take some research, but usually communities are worried about these units turning into rental properties. She said this could be mitigated somewhat by requiring the parcel to be owner-occupied. The other concern could be additional density and traffic concerns. She pointed out the benefits of accommodating extended family members who may need care.

Stanaway recommended holding a special meeting, anticipating a long discussion.

It was moved by Stanaway, seconded by Ventura, to table the discussion to a special meeting.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

The special meeting will be held on Monday, August 26 at 7:30 p.m.

2) **#34-09-06 and #34-09-16 Outdoor Wood Boilers**

Smith gave a history of the proposed amendment. The most important difficulty with the current ordinance is trying to figure proper chimney height by considering the height of structures within 1,000 feet, especially considering terrain differences. Smith did research with area distributors regarding the usual complaints. The most common complaint for outdoor wood boilers is that people burn improper materials such as green wood, garbage, leaves, and debris. Smith researched regulations from other Townships and determined that 300 feet was a more reasonable radius for determining minimum chimney height (based on the chimney being two feet higher than the nearest structures within 300 feet). Smith said standard chimney height is six to eight feet, so fifteen feet is considerably higher anyway. The current requirement of having a fifteen foot minimum chimney height or a height two feet higher than the nearest neighboring principal dwelling within 1,000 feet, whichever is higher, is prohibitive.

Smith said the EPA has new standards for outdoor wood boilers, and the new ones (Phase II) burn cleaner than the old ones (Phase I). Because of this, the recommended standards reflect reduced setback requirements. The recommended standards also reflect a potential requirement to raise the chimney height upon development of a vacant neighboring lot, if warranted by the standards. Standards for commercial size appliances were discussed and supported. Also the reasoning behind the moratorium on burning during the summer months was explained (to reduce nuisance impacts while people are outdoors). The previous decision to eliminate the minimum five acre requirement was discussed. Smith said you can't over extend the chimney height because the boiler won't work properly (creates too much draft) and it's also not attractive.

Meister is in favor of re-approving the previously approved amendment provided the wording is properly recorded (there were some previous problems). The Commission reviewed the wording and asked Woodward to work up a draft for the next meeting.

It was decided that outdoor wood boilers should be a permitted use in the AF district and a conditional use in all other districts (R-1, R-2, WFR, MFR, C, I, MP), however, all appliances in all districts have to meet the stated regulations.

The Commission discussed the method for determining building height in

relation to chimney height. In response to a question, Ventura said mechanical codes require a chimney to be two feet higher than any point of the roof within ten feet. Commissioners want the smoke from the wood appliance to draft up over the house, not halfway up the roof (if we base building height on the average height between the eaves and the peak). The Commissioners decided it is really about the wood appliance chimney being raised above the elevation of highest point of the nearest residences within 300 feet. This elevation can be determined within a foot or two using Google Earth (add the building height to the given elevation) or through an elevation survey. Chimney heights for Phase I are to be a “minimum chimney height of 15 feet, measured from grade to chimney top; or 2 feet higher than the elevation of the highest point of the roof of the nearest neighboring principal dwellings within 300 feet, whichever is higher”.

For Phase II appliances there are no proposed chimney height requirements since they burn cleaner.

The Commissioners intend that property owners may need to raise the chimney height if, after the wood appliance is installed, someone builds a new residence within the 300 foot radius and the chimney height of the appliance is insufficient to meet the standards. This will need to be run past the attorney. Eliminate proposed I.d as it is redundant with I.c. The proposed standards will be renumbered to make sense.

There was a discussion about prohibiting these wood appliances in front yards. This creates problems with the lakefront properties, because most of them have deep front yards (fronting the road) with the home hidden from view, and most wouldn't want the appliances in their back yard which faces the lake (the residents typically consider this to be their front yard). The Commissioners added wording that exceptions could be granted during the conditional use review in the WFR (Waterfront Residential) district. Corner lots were discussed. The wood appliances would go in the side yard of corner lots.

Change wording to say only “granting of a permit”, not “granting of a zoning compliance permit”, because some will be conditional use permits.

The prohibited fuels and standard for conformance with EPA burn practices will remain unchanged to address potential complaints.

Correct the word “plum” to be “plume”. Woodward had concerns about enforcing the provision relating to smoke plumes crossing onto adjacent properties for 12 minutes or more in an hour (does she have to stand there with a stop watch?). Does the plume have to be in the air, along the ground, etc? It is meant to address smoke within the height of the residence, making it difficult for people to enjoy their own property.

Commissioners left the standard in to address real nuisance problems. The prohibition on using wood appliances from May 31 to September 1 remains unchanged, along with the requirement for spark arrestors. The requirements for commercial appliances with thermal outputs greater than 350,000 Btu remains unchanged. The five acre minimum will be removed.

It was moved by Stanaway, seconded by Ventura, to have staff submit a zoning ordinance amendment application covering former amendments #34-09-06 and #34-09-16.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

After a draft is approved, it will be sent to the County to determine consistency with their applicable requirements.

B. Approach to regulations for Accessory Homesteading Activities

Woodward received comments from the attorney regarding the draft regulations. He said in principle the draft tries to supplement, and not conflict with, the Right-to-Farm Act (RTFA). The attorney recommended adding the words “of a non-commercial nature” to the definition of Accessory Homesteading Activities so as avoid conflict with the RTFA. He understands the Planning Director’s preference to avoid distinguishing between commercial and non-commercial activities, and to focus on nuisance factors, but he noted that one commonly used definition of “commercial” includes activities done “PRIMARILY for sale or profit”, so occasional sales may not trigger the RTFA definition as long as the PRIMARY use is for residential consumption. He noted that the meaning of “fiber activities” might not be clear. He also suggested clarification that the animal equivalent allowances are intended to be prorated for smaller parcels. It should also be clarified that the permitting process applies only to Accessory Homesteading Activities including animals, not plants.

The attorney clarified his position that if we retain our current standards, it could be argued that gardens would be a customary accessory use in any residentially zoned district, but the raising of animals would not be a customary accessory use and would only be permitted (by negative inference) in the AF district. To permit chickens or other animals in residential districts, he believes the proposed Accessory Homesteading Activities provisions with the above recommended changes accomplish that objective without serious risk of pre-emption under the RTFA.

It was clarified that the site selection GAAMP which says that a new or expanded operation has to meet zoning district requirements doesn’t apply until 50 animal units as defined by the Michigan Right-to-Farm Act, so there is controversy over pre-emption of zoning. Brad Neuman of MSU Extension forwarded interpretations by attorney Catherine Kaufman who does training for the Michigan Township Association that include the idea that local governments cannot distinguish

between types of farms/farm operations allowed, cannot require minimum acreage for farms/farm operations unless the regulations don't conflict with GAAMPS (per RTFA definitions), and that farm/farm operations have to comply with ordinances that do not conflict with GAAMPS (such as setbacks and height for agricultural buildings). Neuman said that the local Circuit Court ruling that allowed pre-emption of zoning is only applicable (precedent setting) to our circuit.

Ventura pointed out that the pasturing area as defined in the provisions need not be fenced for animals that are in cages, such as rabbits or chickens.

Sikkema discussed the intended scope of the regulations (chickens or beyond)? Woodward presented two case studies that illustrate potential impact on two different size parcels in the R-1 district. Meister thought animal allowances should be related to reasonable family, not commercial, consumption. Stanaway felt that allowing chickens will open the door up for other animals. Woodward said that these questions arise often in the daily operation of the Township anyway.

Sikkema said the Commission needs to agree on a direction and then write the regulations to fit. Walker asked if it would make more sense to determine areas where animals should be allowed and then zone it appropriately? Woodward said this might look like a checkerboard since there are widely varying lot sizes and character areas in the Township, but that is why she associated permitted activities with the size of the pasturing area – this will limit activity in the subdivisions anyway to probably only the smallest animal equivalents such as chickens. The definition and rules for pasturing area was discussed. For example, the area within setbacks would not be included in calculations for pasturing area. The Commission anticipates strong feelings both ways, but they anticipate that people in subdivisions won't want farm animals in their neighborhood. Animal noise was discussed. Sikkema said we need to be sensitive to this and get a lot of public input. Woodward asked "what is rural character"? Does it mean pristine country estates or areas where you can practice traditional rural activities in a reasonable way? It was noted that in our Township there are probably people who embrace both perspectives.

Stanaway suggested holding a public hearing on the regulations to determine public opinion. He said ultimately we are here to serve the people of the Township, so let's have a public hearing to get input. Ventura said there would be two very vocal groups show up so it might be hard to balance. Sikkema said the other problem with public hearings is that only one side might mobilize while the other doesn't show up, so the view is skewed. Woodward noted the importance of this issue to local food systems.

Citizen Dick Arnold said it might be harder to sell your house if you live next to someone with cows or chickens unless they have a farming attitude.

Gary Walker suggested a survey to get public opinion. The Commission discussed how to get good feedback. Sikkema said the regulations are innovative

and he's not opposed to them but he thinks we need public input. Walker said the Board could be asked to approve mailing of a survey to all households, asking their general opinion on applicable concepts, not the draft regulations.

Gary Walker commended Woodward on trying to anticipate everything, although he said that can't be done. Woodward said she can develop the survey for Planning Commission review at the Special Meeting (to be distributed in September). The Commission wants to get the regulations to the point that they're accepted within the community and don't harm people. Ventura said that dogs and cats are also kept in residential neighborhoods and cause nuisances such as noise, smell, killing of birds, etc, and asked why we are segregating farm animals. Commissioners cited probable lack of public acceptance for similarly limiting dogs and cats. Woodward said the animal control ordinance deals with dogs and livestock, but doesn't allow livestock anywhere but non-residential areas.

VIII. PUBLIC COMMENT

None

IX. COMMISSIONER'S COMMENT

Stanaway is moving to a home in another jurisdiction, and will attend the Special Meeting but will have to resign his position after that. Sikkema said the paving of the bike path (10 feet wide from Holiday to Terrace Street) will happen this fall or spring. The DNR is repairing the Soo Line bridge.

X. DIRECTOR'S REPORT

Woodward asked about participation in the Citizen Planner program. Meister and Ventura confirmed. There was a question about Mahaney and Woodward will contact him. Woodward updated the Commission on the Montessori School that was approved by conditional use permit. This use will locate within the Commercial district instead. The Commissioners asked when that conditional use permit would expire. Woodward said the approval runs with the land and probably does not expire.

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MINUTES
SPECIAL MEETING**

Monday, August 26, 2013

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:35 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Tom Mahaney, Kendell Milton, Bruce Ventura

Members Absent: Bernie Stanaway (Board Rep)

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES

August 5, 2013

The minutes were not included in the packet.

Motion by Ventura, seconded by Smith, to table acceptance of the minutes to the next meeting.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Ventura, seconded by Meister, to approve the agenda as written.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Deborah Mulcahey, 633 Lakewood Lane, commented on fire safety. She is concerned about the fires people can have at their residences that are not regulated and pose a significant hazard to the community. She gave a recent example of a fire on the beach that consisted of a pile of debris about 12 feet by 12 feet and one story high containing brush, trees, wolmanized wood, styrofoam, etc. The police instructed the responsible party to remove the things that are not supposed to be burned like the treated wood and styrofoam. You are allowed to burn a campfire with permission of the State of Michigan. In her opinion, this was not a campfire. There is no definition of campfire in our ordinance or in State law. She requests that we evaluate this while planning. The Department of Environmental Quality and Michigan Township Association in July 2011 created an Outdoor Burning model ordinance. The police can't write and cite in this situation. An unattended fire is not a violation unless it causes problems. She's trying to prevent problems.

Smith said when he gets permits to burn brush, it can't be in a City, it has to be in a Township, and it has to be attended 100 percent of the time or he gets a fine. He calls the Township fire department and the DNR before the burning. Woodward noted that Chocolay Township does have outdoor burning regulations in the zoning ordinance.

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

None

VII. NEW BUSINESS

A. Approve 2013 Master Plan & Recreation Plan Survey for distribution

Woodward asked the Commission for feedback regarding the draft public opinion survey. The Township will provide respondents with the character area category for their property as part of the address label. Respondents will then be asked to check the appropriate box in their survey to identify their character area. Results for each character area will be tabulated separately for some land use related questions. Online respondents can identify the character area of their property from a map or from the mailing.

Milton asked what will prompt people who take the survey at home to mail it back. Woodward said if they want their voice to be heard, then they can either mail it in or bring it to certain locations for pickup. Woodward said there is not enough money in the budget to pay for return postage for the entire mailing, especially since many will not respond to the survey or will take it online instead. If they take the survey online, it will be automatically tabulated and will save the Township time and money because Staff won't have to manually enter their responses. Milton thought it would be better to encourage people to take it online, and mail the survey only to those who choose not to take it online. He suggested sending everyone a post card notifying them of the survey. Multiple members of a household can take the survey. Sikkema noted we are going on the honor system that no one will "stuff the ballot box" and skew the results. It was suggested that people be notified of the survey by posting information on the sign at Township Hall.

The Commission reviewed the survey for suggested changes. Meister wanted to move the question relating to the keeping of animals to the beginning of the survey because that is the primary impetus for the survey, and so that people don't think it's just a general survey. Sikkema suggested revisions to the introduction so that it mentions the Master and Recreation Plan updates but also indicates potential changes for accessory homesteading activities involving animals. Ventura suggested adding a Table of Contents or general listing of topics to the introduction. Sikkema allowed public comment on each question.

The Commissioners discussed the question about "rural character". Ventura said it seems to be a comprehensive list, and people can also write in comments. Woodward said the 2010 survey identified "rural character" as being important to people, but there were no questions to clarify perceptions of what constitutes rural character. This question is meant to rectify that. The Commission discussed the purpose of the question. After discussion, the Planning Commission decided to add an explanation about the 2010 survey and the purpose of the question, and to have the question read, "In terms of Chocolay Township, what does rural character mean to you?" Mahaney suggested adding "access to hiking/biking trails" as a

choice for the meaning of “rural character”. Ventura suggested instead a more general question about “access to outdoor recreation”. This was agreed.

On the survey, the Commissioners decided to eliminate the names of the Character Areas and include only the number for simplicity. Ventura suggested having a peel off label with the character area number for the respondents to attach to question #3 to identify the character area. Woodward will look into this. The Planning Commission decided to use the word “neighborhood” instead of “character area”.

For question #4 regarding appropriate uses for each character area, the Commission decided to substitute the word “neighborhood” instead of “character area”.

Dick Arnold brought up a concern regarding the number of accessory buildings permitted on a property. The Commission decided this issue was more suited to question #15 about the level of support for various regulations. They added a choice of “Limitations on the number of accessory buildings” to question #15.

For question #5 regarding current recreation opportunities, Commissioners were concerned about the term “need” vs. “use”. They recognized that there might not be a household need for a particular current facility, but a household might still recognize a community need for that facility. Also, a particular household may not have a current need, but as people evolve in life cycles their needs could change. Is it about the need for facilities to be available in Chocolay Township vs. Marquette or somewhere else in the region? Or is the intent of the question to determine if people currently use the facility? There was also confusion about the indication of support for funding the facility. The willingness to fund may indicate verification of a community need. Also, people may not understand that funding can be accomplished by grants and other methods. Woodward said there are people outside the community that use some facilities, so the survey which is distributed only to local addresses, who may not even respond, will not indicate total use anyway. Commissioners decided to substitute the word “community” need for the word “household” need.

For question #6, Commissioners discussed the phrase “has a need” for the recreational opportunities. They changed the sentence to read, “Please indicate if you or any member of your household **anticipates a use** for the recreational opportunities ...”

No changes were made to question #7 regarding the priority of funding improvements to parks and recreation facilities.

Question #9 concerns accessory homesteading activities. This question will be moved to the beginning of the survey. The Commission changed the wording of the following sentence, “Please indicate your opinion about whether the following activities should be allowed in your **neighborhood** (instead of **character area**). They also decided to change the wording of the final item to “Do not permit the raising of animals”.

Smith indicated the former intent for the Township to conduct an ORV survey. The former planner was going to conduct the survey on this issue, but this did not happen. Smith would like to ask a separate question on this survey relating to ORV travel on County roads (while explaining applicable State and County rules). Meister thought this would be useful. Mahaney was hesitant to stir the issue up again. Smith indicated that a citizen had submitted a petition with 250 signatures and was told a survey would be conducted. Mahaney thought the community response to a potential designated route at the hearing in May was definitive. Smith said the hearing was about a specific route. People may not be against another route. Ventura suggested asking the Police department about their view before putting it on the survey, because they are the ones who will have to enforce the provisions and deal with related accidents. The Commissioners decided to gain input through question #6 which asks whether there is a need and desire to fund "additional motorized trail connections".

The Commission added an additional item to question #10 (important issues) to read, "Lower taxes and decrease services".

The Commission added two additional items to question #11 (potential new public improvements/amenities). They are, "Underground utilities (electric, telephone, cable) along US-41" and "Underground utilities (electric, telephone, cable) with new development". It was noted that there is a high cost associated with implementing underground utilities. Ventura wanted to address multiple exits for residential developments in the survey. Many developments only have one access route. It was agreed to identify necessary additional access roads as projects during the Master Plan process. Ventura related communications with the Iron Ore Heritage Trail authority regarding the potential of paving the existing aggregate trail, or of adding a pedestrian/bike path east of Kawbawgam (as a dual trail paralleling the ORV trail). It was decided to gain input about additional non-motorized trails through the existing question #6, "additional non-motorized trail connections", and then address desired improvements appropriately in the Master Plan goal setting process. The Commissioners discussed how funds are raised for public improvements such as public water supply.

The Commission added one additional item to question #12 (appropriate uses for Township property), which is "sell excess land".

It was clarified that the Township Board requested question #13 which asks whether people would support the placement of a cell phone communications tower at the Silver Creek Recreation Area. This is in response to a business proposal, which may no longer be valid. Township staff added the other question relating to the placement of a tower near Green Garden Road (where the Township owns property).

The Commission discussed the intent of the items in question #15 regarding the accumulation of inoperable cars, scrap parts, and accumulated equipment and junk. No further changes were made to the question.

The Commission added an additional item to question #16 (views toward Township taxes and services) to read, "Lower taxes, which may require reducing public

services”. No change was made to question #17 regarding how people get information on what is happening in the Township.

The Commissioners discussed the County Broadband Survey which will also be distributed and conducted as a separate survey.

B. Identification of growth sectors based on Character Area Inventory

Woodward indicated that the Character Area inventory was meant to provide information to the Commission to help them determine where they would like to indicate areas of intended growth, managed growth, redevelopment or infill, working lands, and conservation. The Commission viewed the placement of the character areas on the map. Mahaney asked for a map with a close up view of the Harvey area. Meister asked how this relates to the discussion of allowing more multi-family housing. The survey will also indicate public opinion regarding future land uses which will be applicable to the discussion.

Commissioners decided to wait for the results of the survey before having this discussion regarding growth areas. Ventura said the market will also determine areas of growth and uses. Woodward said that the natural resource maps will also contribute to the discussion (areas of prime farmland, wetlands, etc). Meister also wants to view the results of the 2010 survey again (it is available on the website).

VIII. UNFINISHED BUSINESS

None

VIII. PUBLIC COMMENT

None

IX. COMMISSIONER’S COMMENT

Smith again inquired about the purchase of the property to access the Silver Creek Recreation Area. Woodward will pass along the inquiry and ensure the action is mentioned in the Recreation Plan.

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Milton, seconded by Meister, to approve the agenda as written.

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Deborah Mulcahey, 633 Lakewood Lane, commenting on the draft Master Plan survey. She noted a problem because the character area ID was not included on the post card and residents may not be able to determine where they live. They are confusing their section number with character area number – they are not looking at the legend on the map. Also the postcard indicates that September 30 is the deadline to complete the survey. She went to the website and there are two other surveys that are due by September 15. Based on the agenda items, she is confused about the purpose of the survey. She thought it was to get updates on farming activities and to get information for the Master Plan. She doesn't understand the why the farm incubator project is on the agenda.

Also, she wondered why we would consider putting the farm incubator adjacent to a recreation area. How did the Township acquire the land? Why go forward with the project? She associated the survey questions on accessory homesteading activities with the farm incubator project.

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

None

VII. UNFINISHED BUSINESS

None

VIII. NEW BUSINESS

A. Review and comment on draft Farm Incubator proposal

Woodward noted additional materials relating to input received from interested citizens and resource people. This includes comments from Natasha Lantz of the Marquette Food Co-op, a letter of support from Ashley McFarland who is the Coordinator for the MSU Upper Peninsula Research and Extension Center in Chatham, MI, comments from Gary Shaffer who is a local certified organic farmer and Gary Wiater. The proposal needs to go to the Board for land use approval. Some details may more appropriately be provided by the project Leadership Team once the project is approved. Woodward would welcome cost information from Planning Commissioners as well. Anjila Johnson has indicated she will provide assistance with a site plan drawing. If not, Woodward will provide a site plan.

Sikkema opened this item up for public comment. Natasha Lantz said she had the opportunity to work with Woodward on this project from the beginning. She attended the public meeting for the Marquette County Local Food Supply Plan, which was passed by the Planning Commission and is going to the County Commission for approval. She said in her work on local food, Chocolay Township is being recognized in a positive light in their approach to agriculture. She talked with the Ag Commission of the State, and the issue of backyard chickens was mentioned as well as incubator farms. She said it's nice to know that Chocolay is always referred to as on the leading edge in being progressive and taking a proactive approach to these issues. She said the Marquette Food Co-op and the funded partners are involved in projects such as this, and she is glad we are looking at these issues.

Mahaney noted the proposal is not labeled a "proposal". Sikkema inquired about the current zoning of the parcel. Woodward said it is zoned "Municipal Properties" but agriculture is a grandfathered use. She reminded the Commission that the Township manager had suggested a strategy to maintain the grandfathered use as a good interim use since there were no current plans to expand the recreation area. She is trying to accomplish this goal as well as open the land for public benefit.

Mahaney asked if there is any issue with Mulcahey's comments regarding the purchase of the land. Woodward said that there were no DNR funds associated with the purchase or subsequent use of this parcel, so there are no applicable complications or restrictions for use.

Sikkema asked what type of farming activities could occur with this proposal. Woodward said she had envisioned organic vegetable or grain production. Sikkema suggested this needs to be clarified in the proposal with the addition of a section on "Proposed Activities" specifying type of agriculture. He is concerned that the parcel is bounded by some small parcel residential uses and that animal agriculture may not be appropriate. Woodward suggested that any planning for animal agriculture should take place after the Planning Commission finished its analysis on accessory homesteading activities. Sikkema said that as a grandfathered use, the parcel could probably currently include any agricultural activity, including animal agriculture, so he thinks this should be specified. Woodward said she would specify that activities are envisioned to include organic vegetable and grain production, and any animal agriculture activities would be determined after the Planning Commission addresses regulations for animal agriculture in the Township.

Meister said the Planning Commission had previously determined that an outside group should administer and fund the project, and he didn't think this was clear in the proposal. He thought there is enough interest in this project that the Township can find someone to take this on. He thinks it's an excellent use of the property and he's in favor of it, but he doesn't think the Township should administer and fund it. Woodward thought this was addressed in the proposal, but it wasn't clear to the Commission. The proposal suggests there will be a volunteer Leadership Team to administer the project. It was suggested that the Township would only pay for the permanent site improvements such as the well and electricity, and for the initial soil test. All other funding would be generated from other sources such as grants and donations. Woodward said no one can really start searching for funding opportunities until the project is approved by the Board. Woodward also clarified that the project is envisioned as including three separate elements: 1) the large plot community gardens, which would be administered by the Chocolate Community Garden Board, 2) the Farm Incubator which would be administered by the volunteer Leadership Team and advisory Resource Team, and 3) the public elements, which would be administered by Township staff just like any other Township facility.

The well was discussed. Woodward said she was told the well at the existing Beaver Grove Recreation Area is being used at maximum capacity for irrigation, and that any new well could also benefit the Recreation Area.

The concept of tax payer dollars and special interest groups was discussed. Mahaney thinks it is a good use of the property, but thinks the Township should be reimbursed for any start-up costs. He cited reasons that the project does not necessarily favor Township residents (Woodward said the Management Team will choose the incubator participants based on the strength of the application). The Commission wants the project to be financially self-supporting.

The Commission feels that this is such a popular project that there should be no problem in finding a group to get the project off the ground. Sikkema said a Charter needs to be developed for an outside group to have an agreement with the Township. The outside group would come in and develop the plan and the site, and the Township would oversee the project agreement.

Mahaney asked how long an individual farmer can stay on the site? Woodward said that would be a topic for the Leadership Team. The Township won't necessarily know the individual needs, but should only be concerned that the entire site is kept in production or appropriately managed.

Sikkema asked about the composition of the Leadership Team. Woodward said residents can be included on the Leadership Team, but she can't solidify who is involved until the use is approved. Sikkema asked how the Leadership Team would report to the Township. Woodward said that was a good question, and she would have to ask the Township Manager how this should work. Meister said this would be spelled out in the Lease agreement with the project group. Sikkema said that a tremendous amount of planning goes into a project like this.

Sikkema asked if there was a consensus on the use of the property for a project like this. All members said yes.

Sikkema asked if the proposal is meant to be given to the outside group to form the basis of the project. He wondered who would provide the other project infrastructure listed in the proposal. Woodward said those items would be provided when money became available from grants, donations, user fees, and other sources. But the well would be utilized for the other separate elements such as the community garden and public elements, so this was envisioned as a Township expense. Lantz said there are grant writers willing to help.

Sikkema mentioned a lease idea in which an outside group might provide the start-up infrastructure and be given the use of the property for a specified number of years. If the Township asked them to leave before the end of that term, then the group would be reimbursed on a prorated basis for the improvements.

Woodward asked what the Commission anticipates will happen to the revenues from the project? Meister said the lease could specify that the project group has to make a certain portion of the project available for community gardens and make the well available to them and for the public areas. Mahaney asked who would own the well? Milton said the Township should own the well, because if the project is discontinued, the well can still be used for the Recreation Area.

Sikkema said there is good information in the proposal that justifies the use of the property for the project, and there is consensus on that. But there are specific

management, ownership, and funding issues that need to be worked through. It will take a lot of research and planning.

Sikkema asked for a motion, and took comments from each Commissioner to be used in a motion. Milton said it's a good proposal. He is under the impression that the proposal provides for a separate management group other than the Township. This could be a non-profit.

Eric said it's an excellent use of the property. It could be administered and managed by a separate entity because there is a lot of interest in the community.

Mahaney said it's an excellent use of the land. He is concerned about having Township residents on the Leadership Team so that resident interests are taken into account. Before the Township turns over the land to a separate group, there should be a structure including operating procedures as a part of the lease agreement.

Sikkema said it needs to be determined how the group will report back to the Township (define the Township oversight).

Walker suggested the project Leadership Team would ultimately report back to the Township Board, however Staff should be the intermediary because some issues may need to be resolved and both the Township Board and Planning Commission only meet once a month. These Boards don't need to discuss daily operations.

Sikkema also noted there should be limitations on the farming activities since the parcel is adjacent to small lot residential uses.

Dick Arnold commented on the survey in relation to this project. He asked about the cost of the well, and suggested the discussion be postponed until after the survey results are in. He doesn't want dangerous animals in residential areas and thinks there are enough acres designated as AF. Meister said the survey isn't meant to address the farm incubator project. Lantz said there was a separate farm incubator survey, and there were at least two public meetings on the project. She understood that the accessory homesteading activities being discussed in the current survey are a separate issue. The incubator project has been underway for several months, and the idea for the current survey originated with the Planning Commission's need to get input on the accessory homesteading activities. She understood from the proposal that the Leadership Team was a separate entity that would manage the project with the permission of the Township. So maybe the duties could be more clearly defined.

Jim Goodman, Orchard Lane, Skandia, within Chocolay Township taxing authority. He thinks not one penny of taxpayer money should go to the project.

Summary

1. The project is an excellent use of the property.
2. The project should be administered and managed by a separate entity through a lease agreement or charter with the Township.
3. Township residents should be included on the Leadership Team that reports back to the Township.
4. The Township's oversight role should be defined.
5. The agreement should define the acceptable agricultural activities.

Motion by Mahaney, seconded by Milton, to approve the land use as contained in the proposal along with the comments as written in the Summary above.

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

B. Review and comment on Jennifer Thum's draft Master Plan Goals/Objectives section

This is an attempt to get Planning Commission input on a portion of the draft in preparation of a new draft. Sikkema noted some material is dated and needs to be brought to current. He mentioned the strategies that suggest purchase of additional property. He said there should be some criteria regarding purchases. He also noted some recreational property is donated to the Township. Mahaney suggested this discussion wait until the survey results are in. Woodward said this is just the start of the discussion, but the final version will not be solidified until the survey results are in.

Motion by Mahaney, seconded by Milton, to table this item until the results of the survey are available.

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

IX. PUBLIC COMMENT

Gary Walker said that some of Jennifer's comments in the Master Plan draft should be more aspirational because, as they are stated, it seems like we have already achieved them, which we obviously haven't. Woodward added, in Thum's defense, the draft does state in the beginning that readers should transport themselves mentally into the future. Walker thinks people will miss that statement and thinks the statements should be rewritten as aspirations – things we would like to see, not things that have been achieved.

Woodward said she would like to see the goals organized around specific growth areas and related to specific projects instead of being organized around topics.

Walker said we should plan for an expansion of the business district with businesses suited to the area and which can serve needs for the Township. But he thinks we are hampered by the lack of availability of public infrastructure, and this poses a limitation for development. However, the public infrastructure would require a large capital

outlay which we are currently unable to meet. He is not certain there is citizen support, and not certain the Township would reap the benefits of this development based on what is happening with taxing of big box retail stores.

Laurie Krzymowski, 741 Lakewood Lane, was the resident who first brought attention to the concern regarding recreational fires. There was a large fire at her neighbor's house containing illegal materials. She called 911 because she could not get hold of the DNR. The Chocolay Township Police asked the party to remove the unlawful materials prior to the burning. But this warning was not heeded. However, they couldn't cite the party because all the materials (evidence) had been burned. She called again because the large fire was never extinguished and was allowed to burn unattended for four days. This situation could not be prevented because fires on the beach are labeled recreational. She wants safety to be addressed as part of the Master Plan, especially the provision for unattended fires. There needs to be limits on recreational fires, which she defines as fires you can safely sit around. Limitations should include how to prepare the materials, how to control/attend/extinguish the fire, limitations on the size, etc. She is concerned that unsuspecting people on the beach can get injured when people extinguish their fires with sand instead of water. The fire will continue to burn under the sand for days. Her second concern is that Chocolay Township should regulate pornography. There is an increase in crime associated with these uses. The Township can't ban these uses, but through zoning, they can control where they locate, such as distance from schools and churches.

Dick Arnold, 312 West Branch Road, thinks the Township should consider adding a road from Holiday to Snyder's so that residents can avoid the hazard of going back out onto the highway near a difficult intersection to go next door.

X. COMMISSIONER'S COMMENT

Mahaney told Woodward she did a nice job on the farm incubator proposal, and he does think it's a good use of the land. He would like to see the project happen.

Sikkema asked for a spreadsheet to be available as part of each packet to track unfinished business such as ordinance amendments and other important issues such as multi-family lot size and widths, outside wood boilers, accessory homesteading regulations, property purchase at Silver Creek, private road ordinance, blight ordinance. This will help with determining future planning commission agendas. It is expected that the next agenda will be dedicated to the survey results and the master plan. The Commission also wants to hold the public hearing on the amendment pertaining to outside wood boilers. Mahaney asked when they will proceed with accessory homesteading regulations. Woodward suggested they not move forward until the Master Plan is approved.

Milton cannot attend the next meeting.

XI. DIRECTOR'S REPORT

Woodward said that Mulcahey's concerns regarding the survey and identification of character areas is justified. The character area numbers were somehow inadvertently omitted from the address line of the mailing. She was unaware how the mistake occurred. She said residents can determine their character area by looking at a copy of the database on the website (character area by address), looking at the map in the office or online survey, or calling or stopping by the Township. The Commissioners said it would be worth sending the postcard out again to ensure greater participation and accurate results. It is vital to their work.

Woodward noted that Meister and Ventura were successfully registered for the Citizen Planner program, and the Township did receive an MMRMA grant to defer most of the cost.

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, October 7, 2013

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:30 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Tom Mahaney, Bruce Ventura

Members Absent: Kendell Milton (excused), Bernie Stanaway (Board representative – resignation accepted, not yet replaced)

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES

September 9, 2013

Ventura commented that although he was not at this meeting, the minutes reflect a good summary of what happened and are very complete. He said, “Good job”.

Motion by Meister, seconded by Mahaney, to approve the minutes as written.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Ventura, seconded by Smith, to approve the agenda as written.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Deborah Mulcahey, 633 Lakewood Lane, has concerns with the public input survey response rate and how the data was reviewed. She was also concerned that the results were only available before the meeting as part of the agenda packet. She thought there might be some comments from non-residents. She also viewed some parts of the summary as a manipulation of data. She doesn't think it's right to have a summary that presents the “yes” and “maybe” responses together.

She said the 2010 and 2013 results show that people want regulations for junk and she doesn't think the Planning Commission has addressed this identified priority. She asks the Commission to consider if the survey is a good representation of the community. She doesn't feel the rush to get public input is warranted. She wants the Commission to take the time to read the public comments.

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

None

VII. UNFINISHED BUSINESS

A. Public hearing on proposed Zoning Ordinance Amendment ZA0003-13 pertaining to Outdoor Wood Boilers (OWB), Section 6.5 and Sections 4.1, 4.2, 4.3, 4.5, 4.6, 4.7 and 4.8

1. *Staff Report*

Woodward noted that the amendment changes existing regulations and uses per zoning district. Major changes include allowing OWB as a permitted use only in the AF district, and a conditional use in all other districts. There are new provisions for chimney heights and setbacks, and regulations acknowledging new technologies such as Phase II EPA approved units which burn cleaner and are less polluting. There is an exception for the restriction on placement of OWB in the front yard in the WFR district. Tonight the Commission will hold a public hearing, review Attorney comments, and discuss any changes.

2. *Public Hearing*

No comments. Public hearing was closed.

3. *Review of Attorney Opinion*

Woodward summarized the comments from Attorney Roger Zappa from October 3, 2013. The first concern is that the proposed standards have setback requirements for Phase II units (which burn cleaner) but none for Phase I units. This difference could be interpreted as “arbitrary and capricious” by a Court. Woodward noted this could have been an oversight. But if this was implemented, the Attorney cautions that Phase I units could be set very near the property line in some zoning districts and have chimneys that could fall on adjacent properties.

The Attorney also noted that requiring taller chimney heights could render the appliances ineffective. The requirement for chimneys to be 2’ higher than the highest elevation of nearby residences could yield excessively high chimney heights in relation to the maximum building height of 30 feet, especially with terrain differences. Tall chimneys could be aesthetically unpleasant or unsafe.

The Marquette County Building Code Official enforces a chimney height that is approved by the manufacturer of the appliance.

The Attorney pointed out the difficulties with requiring compliance not only at the time of installation, but after a residence was built on an adjacent vacant lot. Possible implications are a requirement for the owner to move the unit after installation in order to comply with new conditions, or possible revocation of the permit due to the inability to meet regulations based on new conditions.

The Attorney also cautioned against using coal as a permitted fuel because it is highly polluting. He pointed out enforcement difficulties with the 12 minute per

hour smoke plume rule.

4. *Planning Commission Discussion and Decision*

Smith recalled a 75 foot setback for both Phase I and Phase II units. This is consistent with current regulations.

Ventura said that mechanical code regulations require consistency with the manufacturer's recommendation, so installation cannot deviate from this and be legal according to Michigan's code. If we set regulations that are contrary to this, we could be inconsistent with Michigan mechanical code. Because of this, he thinks we need to control the smoke dissipation through setbacks rather than chimney height. He thinks setbacks are also more easily measured for owners and those who enforce the regulations. Measurement of chimney height as written could require specialized equipment. He noted that Phase II units are supposedly 90% cleaner in relation to particulate matter. He suggests regulating the setback to eliminate the need to move the unit if a residence is built on an adjacent parcel after installation.

Sikkema said that if you set the stack height as high as you can to disperse particulates instead of releasing them close to the ground, setback becomes irrelevant. You have to get the smoke up to disperse it. He noted that terrain would impact the ability to disperse. He thinks there are many properties that could not have these appliances because of neighbor nuisance impacts. He's not opposed to OWB, but he has experience with a neighbor's unit that creates smoke in Sikkema's house every time the wind is in a certain direction, year round. He said zoning is about creating zones for particular uses, and OWB aren't appropriate everywhere.

Ventura noted that under certain atmospheric conditions the smoke may not disperse, and said perhaps the 75' setback is not enough to compensate. Changing the setback to 200 feet or even more will eliminate the ability for some residences to have OWB but it would also protect the neighbors.

Smith said he thought the 15' chimney height suggestion was based on model ordinances he discovered during his research. Woodward noted the Marquette County Building Code official said that the units are usually 8' tall with a stack height around 6', so the 15' height is probably consistent with manufacturer's recommendations. Several Commissioners noted that it is important that the units function properly, and function is related to appropriate chimney height.

Sikkema said he thinks the setback requirement should be consistent across districts, but that it should be quite large to minimize nuisances. This may be restrictive to people outside the AF district. He thinks OWB make the most sense economically for people who cut their own wood, so maybe this restriction

won't mean much to those who would have to purchase the wood elsewhere since they don't have the timber resources onsite.

Woodward noted the Marquette County code official said that only about 15 percent of existing units were installed with permits, so if there is a problem with a unit we should check with the County to see if a permit was obtained (ensuring proper installation).

Smith said that in his research he discovered that most of the problems with OWB come from people burning inappropriate materials, and when that is remedied, the problem is solved.

Ventura said many OWB are oversized for the structure, and that the Phase II units will smoke just as badly as the Phase I units when they are throttled back. He said the standards of the testing agencies are based on the units running at optimal conditions, and most people don't run them at optimal conditions so more particulate matter is released.

Smith said the issue was initially brought up by citizens who wanted to know what could be done to accommodate these appliances, and he agreed to look into the matter.

Meister suggested that more restrictive provisions for Phase I units might force people in residential neighborhoods to install cleaner Phase II units. He also thinks the summertime burn ban will help.

Sikkema suggested a change in the summer restriction period to October 1 through April 30. Mahaney said it wouldn't take too many OWB in certain neighborhoods to cause problems. He asked if a larger setback is needed.

Sikkema suggested the problem cannot be solved for everyone due to differences in terrain and placement of homes in relation to the lot line. OWB may not be appropriate in subdivisions.

Ventura said there is precedent in the Country for bans on OWB in urban areas. Meister said that large setback requirements would preclude installation on smaller lots such as subdivisions, but still allow them on larger lots. Sikkema said it is still important to make them a conditional use in residential districts so that context can be considered – for example, a larger parcel could be surrounded by smaller parcels and greater density.

The Commission discussed measurement of setback from either the property line or an adjacent residence. Implementing a setback from another residence reintroduces the concern about neighboring parcels that are vacant at time of installation and the OWB needing to be changed or moved upon construction on

the vacant parcel. Meister suggested we have long, narrow parcels where someone might be able to locate the OWB optimally considering the length of the lot and but might have difficulties meeting side setbacks.

Sikkema said at the 200' setback from property lines, it is unlikely that anyone with fewer than 4 acres would be able to have OWB unless they were granted a variance. Smith objected to increasing the setbacks over current requirements because the whole idea was to help people who wanted to save some money, and there have been no complaints at the current setback requirement of 75'. However, the Commission doesn't want to encourage nuisance impacts. They would like to encourage people to install the cleaner Phase II units, perhaps through the possibility of reduced setbacks for those type units. The differences between Phase I and Phase II units were discussed.

There was a discussion whether to leave the provisions as they are or continue. There are trade-offs in permissiveness vs. restrictiveness. Consensus was to continue.

There was consensus also for two different setbacks for Phase I vs. Phase II units. Ventura pointed out that the smoke problem would be worse when it's not very cold outside and the units aren't burning hot.

After further discussion, the Commission decided on 200 foot setback for Phase I units and 150 foot setback for Phase II units (to the property line). For seasonal limitations B(7), they revised the amendment to read "may only be used from *October 1 to April 30* each year." The Commission eliminated "coal" as a permitted fuel per Section B(1). It was uncertain whether coal can be used in the OWB anyway, because most OWB have steel fireboxes.

Eliminate A(1a), A(2b) and A(2c). Eliminate provision A(3) pertaining to vacant lots. Modify A(1) to read that the setback for Phase I units is "a minimum setback of two hundred (200) feet from any and all lot/property lines, easements, and right-of-ways". Modify A(2a) to read that the setback for Phase II units is "a minimum setback of one-hundred fifty (150) feet from any and all lot/property lines, easements, and right-of-ways". Eliminate Section B(6). The Commission decided to have an additional public hearing because of the changes.

Motion by Mahaney, seconded by Ventura, to direct Staff to implement the recommended changes to the amendment ZA0003-13 pertaining to Outdoor Wood Boilers, Section 6.5 and Sections 4.1, 4.2, 4.3, 4.5, 4.6, 4.7 and 4.8, and to hold another public hearing at the next meeting and send to the County for review.

Vote: Ayes: 5 Nays: 0 **MOTION CARRIED**

VIII. NEW BUSINESS

A. County Brownfield site nomination

Woodward asked Commissioners to review potential sites for nomination to the County Brownfield inventory. There could be a chance these properties could receive funding to assist in redevelopment. Nothing would be done without owner approval. The following were suggested for submittal:

- Parcel #52-02-106-044-00, 4067 US-41S (vacant residence which is a non-conforming use in the Commercial district – redevelopment potential)
- Parcel #52-02-107-007-00, Wahlstrom's (tax reverted, vacant commercial improved, purchased by Andrea Beckman, slated for redevelopment)
- Parcel #52-02-110-083-85 and #52-02-110-083-50, 1500 M-28E, Varvil Center (vacant commercial improved) Per inspection, Ventura reports the structure is sound but the infrastructure is not.
- Parcel #52-02-254-003-00 and #52-02-254-004-00, 4021 US-41S, Harvey Motors building (known contamination, vacant commercial improved)
- Parcel #52-02-251-012-00 and #52-02-250-001-00, 2801 US-41S, Walt's Auto (potential contamination, occupied commercial improved)
- Parcel #52-02-252-005-50, and #52-02-252-011-00, and #52-02-252-012-00, 3061 US-41S, Silver Creek Project LLC (vacant commercial lot)
- Parcel #52-02-106-023-10 and #52-02-106-023-20 (vacant commercial lot at the Rock Cut)

The Planning Commission suggests that the owners be contacted and notified of the Planning Commission recommendation that could someday assist them in redevelopment. Woodward will also obtain more information about potential contamination.

B. 2010 and 2013 Master Plan survey results and implications

Woodward noted that the Planning Commissioners were given the complete raw and summarized survey results in a binder. This includes results from both the 2010 and 2013 surveys. The 2013 results include results in aggregate and also results as filtered by Character Area. All raw results and summaries are also available online.

Mahaney inquired about the former Planning Commission decision to resend the postcards since the Character Area was inadvertently not printed on the postcard as planned. Woodward said that there was not enough money existing in the budget to resend the postcards. However, residents were either personally assisted in determining Character Area for their property (paper surveys), or could locate their property on a map that was in the online survey, or could locate their property address and Character Area on a published list (website).

Mahaney noted that only 600 people took the survey. Woodward noted this was about 100 more than took the 2010 survey. He also wondered if the survey should

have continued for a longer time period. Woodward noted the survey is meant to be taken as a representative sample and as a basis for discussion and one guideline for policy. Further public input will be obtained for proposed plans and regulations. It's not the only opportunity that citizens will have for public input. Mahaney asked about the advertising of the survey. Woodward said it was advertised in the Mining Journal (and of course by direct mailing to every address).

Ventura noted some skewing based on age and length of residency, which he thinks is more significant than the number of respondents. We did not get young people's opinion and recent residents. Woodward noted that surveys were hand-delivered to all residences in the mobile home parks and tribal housing to try to get renters. Youth were not singled out especially. Ventura noted this may be representative of the actual age distribution. Sikkema said residency is pretty stable here without much turnover. So this may also be representative.

Ventura compared the number of survey respondents to the number of residences in the Township. Mahaney noted multiple responses were allowed per residence. Sikkema said their purpose was to find out more about a general consensus on issues. He also noted that just because someone doesn't live here doesn't mean we don't value their opinion. To sustain the Township, we also have to consider what future people want.

Ventura said that the people that made the effort to respond might be the people we should listen to if the rest don't care. Meister said we can't assume they don't care. Sikkema said a lot of effort went into obtaining the data and we should use it. Even though we may be concerned about the number of responses, at least it gives some idea on what to do and what to consider moving forward. It should be kept as a reference book as agenda items are considered. Woodward said she felt it was great that so many people took the time to answer a very long survey, and that we should honor the effort that was put into it by taking it into consideration. She suggested there were many cool ideas in the public comment and Commissioners should take the time to read them.

Sikkema asked for public comment. Dick Arnold said he filled out the survey four times, so how is it valid when you can stuff the ballot box? Sikkema said, "Shame on you Dick." Arnold also said that at 167 questions it was way too long. He said he got about halfway through and was ready to quit. Sikkema said, "Then you changed your mind and did it 3 more times."

Mulcahey again objected to the contents of the summary. She cautioned against using the results to justify spending of taxpayer money because we don't know if the people who commented live in the community.

C. Work session on Master Plan

Woodward said the beginning of the plan articulates important community values and where they come from (such as public input). Values include *Community Character*, *Healthy & Livable Community*, and *Sustainable and Resilient Community*. Particularly, Woodward would like the Commission to reach consensus regarding the priority decision criteria that are based on these values. These may be used by departments, community groups, and commissions/committees to determine the important projects on which to focus. This sets the stage for the rest of the plan.

Sikkema noted we really don't have an identifiable business district. Commercial was built around the highway. The area didn't develop as a village. He thinks we need to support a commercial area, but the Township will probably continue to be rural in nature and not contain a traditional business district. However, he thinks there are things we could promote that would make the commercial area more attractive over time, such as larger setbacks, green space in front, etc. Smith noted a need for better access between Holiday and adjacent development.

No modifications of the text were noted in the first section. Ventura said it was a good summary of community character. Woodward noted that there has been some talk of aging in place and taking care of our seniors, and said that while doing that, we also make things better for other people at the same time, so it's not about catering to one population segment. Ventura thought it's a good point to refer to sustainability and resilience because every community experiences changes, and those who don't accept change die.

Sikkema noted the guiding principles for sustainability and resilience were to be drivers for decision making, along with the priority decision criteria that are based on risks and opportunities. Woodward suggested that projects that don't meet certain criteria might still be pursued, but they would receive lower priority than those with higher scores based on these criteria. She asked Commissioners to envision how possible projects would be considered against this criteria to see how it works.

Sikkema asked for an update of history from the 1920's at least until the 1980's, mainly related to the progress of development (particularly residential neighborhoods as opposed to strictly agrarian). Commissioners suggested highlighting recreational opportunities such as trails as examples of resilience. Mahaney suggested mentioning the overlooks on M-28 under regional context - geography, tourism, and transportation, because they draw tourists. Woodward noted the lack of handicapped accessible beaches as mentioned in the survey comments. Ventura mentioned the lack of signage for the Great Lakes Circle Tour.

Ventura noted the college is no longer called Bay De Noc Community College, but as simply Bay College. Commissioners also wanted to mention Michigan Tech which is in the western U.P. region. Sikkema noted many people come to Chocolay Township for hunting and fishing (especially the Chocolay River).

Ventura said this is a good start to the plan. Sikkema asked Commissioners to send any additional comments to Woodward within the next couple days.

D. Review summary of amendment history and progress report and set priorities

Sikkema said the “X” represents completed items, and “O” represents open items. Commissioners went through the open items to set priorities. Continue with Agricultural Regulations. Finished County Brownfield Inventory. Continue with the multi-family amendment although this isn’t a high priority (noted by Ventura this would be consistent with survey results because it was not a priority among residents either). Continue with proposed amendment for outdoor wood boilers. Finished with Master and Recreation Plan survey except for continued discussion. Ongoing Master and Recreation Plan as a high priority.

Firewise zoning was suggested for inclusion in the Master Plan, but no current implementation. The purchase of Silver Creek access property is included in the Recreation Plan. Woodward noted that a citizen had suggested she could submit sample regulations for fire safety regulation, and some of the materials included for OWB also had model regulations for fire safety. Commissioners suggested Woodward check with Chief Zybert to see if there are ongoing complaints about fire safety and discuss this in the next Director’s report. Fireworks regulations were brought up by Greg Seppanen – include this in the Director’s report as well.

Necessary changes to lot split and land division ordinances – noted as a need by the Assessor. The Commissioners agreed to add this to the open list. They also wanted to add an item to consider minimum lot widths for potential changes in the Zoning Ordinance, per suggestion of Township Supervisor Gary Walker.

Commissioners noted that the junk car and blight ordinance should be the next priority after some others are finished. Continue with all open items as identified in the Annual Report priorities. Woodward noted the priority list can be updated with the Annual Report for 2013 (2014 priorities). Woodward noted we can’t do a grant for playground equipment until the Recreation Plan is adopted. She also noted we tried to get funding through Marq-Tran for the transit center, but it didn’t work out this time. We will find other options.

Next meeting will include the second public hearing on OWB, review of more of the Master Plan, and begin to address historic amendment #34-10-18 pertaining to the

definition of height for accessory buildings. The Commission directed Staff to send an e-mail with the amendment history to Commissioners in case research is needed for the meeting.

IX. PUBLIC COMMENT

Mulcahey discussed the fire safety issue that prompted the concern. She reported that Chief Zyburd had told her he was surprised that Lakewood Lane hadn't burned already because of all the jack pines. She agrees with the focus on junk car and blight and thinks this should have been done earlier. She suggested that we can't decrease minimum lot sizes because the area along the water bodies is already built up, and if you increase building you increase pressure on resources. She suggests we consider Recreation Passport funding for parks. She doesn't think the local food concept is supported that well.

X. COMMISSIONER'S COMMENT

Mahaney was shocked only 600 residents responded, and he is thinks in a way it's a joke when a person can comment 4 times and skew the results. He is disappointed the post cards were not re-sent. The Township spent a lot of money on this and we don't know how reliable or good a representation the results are.

Meister said the Citizen Planner Program is well-worth it and puts a lot of things in perspective. Smith said someone should be assigned to actively pursue better access to the Township Hall/Fire Hall through property acquisition. He wants someone to actively move this forward.

Sikkema said there were successful bids on the bikepath improvements and work will start in the spring. On completion ownership of the path will be turned over to the Township.

XI. DIRECTOR'S REPORT

None

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

Skandia notice of intent to plan

ADJOURNMENT

Sikkema adjourned the meeting at 9:55 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, November 4, 2013

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:30 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Kendell Milton, Bruce Ventura

Members Absent: Tom Mahaney (excused)

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

Sikkema asked if we have heard about a Board member replacement yet, and Woodward said the Board would appoint someone as a Planning Commission representative at the November Board meeting, but indicated that Richard Bohjanen, who was in attendance, is the new Township Trustee and a possible appointee. She also reported that Tom Mahaney had called to say he would not be able to attend because he is out of town.

II. MINUTES

October 7, 2013

Motion by Ventura, seconded by Smith, to approve the minutes as written.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Milton, seconded by Ventura, to approve the agenda as written.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

None

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

None

VII. UNFINISHED BUSINESS

A. Public hearing on proposed Zoning Ordinance Amendment ZA0003-13 pertaining to Outdoor Wood Boilers (OWB), Section 6.5 and Sections 4.1, 4.2, 4.3, 4.5, 4.6, 4.7 and 4.8

1. Staff Report

Woodward noted that the materials reflect the changes from the last meeting to eliminate chimney height requirements, eliminate coal as a fuel, and eliminate the smoke plume provision. She said that the Manager suggested the Commission clarify whether the provisions apply to food cooking devices such as

smokers. She provided a definition for consideration that would clarify this issue. This could be added to Article II. This meeting includes a public hearing on the revised amendment. The County is also reviewing the amendment this week.

2. *Public Hearing*

No comments. Public hearing was closed.

3. *Planning Commission Discussion and Decision*

Ventura suggested a change in Section 6.5A 1 & 2 to eliminate the words “easements and right-of-ways” in relation to required setbacks. He said that if a utility easement crosses the middle of the property, the current language would indicate someone would have to maintain a 150 or 200 foot setback from that easement as well as the property lines. Milton had concerns about permanent structures being built in drainage easements. Woodward clarified that the structures wouldn’t be allowed to be built in the easement, but the proposed revision would indicate the structure could be adjacent to the easement and not have to meet the 150 or 200 foot setback as from property lines. Consensus approval was indicated on this change.

Ventura also addressed a proposed change for Section 6.5B.2 which would indicate “coal” as a prohibited fuel (in addition to the previous revision which deleted “coal” as an acceptable fuel).

Section 6.5C, Ventura suggested adding (f) which is “recommendations for proper firing and maintenance of the unit” to control more than just installation. Sikkema suggested that is part of the “Best Burn Practices” but there was concern this did not apply to commercial units. Meister indicated Section 6.5B is meant to apply to ALL outdoor wood boilers, but Ventura felt this is not clear. The Commission decided to make an addition to Section 6.5C in the introductory paragraph for Commercial Outdoor Wood Boilers to say that they shall also follow all provisions of Section 6.5B in addition to Section 6.5C.

Ventura also suggested that all portions of Article IV District Regulations be changed to say “outdoor wood boilers” not “outside wood boilers” for consistency.

Sikkema confirmed everyone is in agreement with Ventura’s suggested changes. Woodward asked if the Commission wants to add the suggested definition per the Staff memo as well. The definition reads, “Outdoor Wood Boiler: A fuel burning appliance that (1) the manufacturer specifies for outdoor installation or in structures not normally occupied by humans (e.g. sheds) or is an indoor-rated device housed in a modular or containerized structure; (2) is designed to transfer or provide heat by burning approved solid fuels; and (3) heats space or water, or both, through the distribution, typically through pipes or ducts, of a fluid or air heated in the device. Also known as hydronic heaters or outdoor wood furnaces.

Does not include outdoor smokers or wood-fired stoves for cooking food; fire pits; or chimineas.” This was approved.

Motion by Meister, seconded by Ventura, that after holding two duly noticed public hearings, the Planning Commission hereby approves proposed amendment ZA0003-13 pertaining to Outdoor Wood Boilers as changed (delete “easements and right-of-ways” in Section 6.5(A) 1 & 2; add “Coal” to Section 6.5(B)2; indicate that commercial outdoor wood boilers shall follow all provisions of Section 6.5(B); correct wording in Section 4 from “Outside” to “Outdoor”; and add the definition for Outdoor Wood Boilers) based on the following findings of fact:

The proposed amendment accomplishes the following:

- *Simplifies administration*
- *Addresses nuisance impacts through setbacks and seasonal limitations on use so that chimney height can be consistent with manufacturer’s specifications and thereby meet Marquette County Code requirements*
- *Accounts for technological improvements that affect nuisance impacts*
- *Is more appropriate in relation to zoning district provisions*
- *Provides an exception in the waterfront residential district which may permit outdoor wood boilers to be located in the front yard*
- *Has more stringent requirements for commercial appliances*

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

VIII. NEW BUSINESS

A. Site Plan Review #SP13-02, My Way Enterprises Inc, Parcel #52-02-121-002-50

1. Public Comment

Kevin of GEI Consultants spoke for the engineer of record, George Meister, who could not attend. The plan is for three large storage buildings, a small office, and five retention basins. In addressing staff comments, he said the lighting would be designed by the electrical contractor in accordance with the Ordinance and if necessary the contractor can bring in the electrical details to the Township for approval. The proposed distances for plantings are based on appropriate distances for the specific plants. They felt our Ordinance provisions would result in overplanting. He also said the storm and erosion control measures would be constructed prior to construction of the drive areas.

Sikkema asked if these statements would satisfy Woodward’s concerns. She indicated that the lighting spec sheet did offer a houseside shield and a photoeye that would help satisfy Ordinance requirements. The lighting design probably eliminates most concern over type of bulb or wattage as long as the lighting is directed away from adjacent properties and toward the development.

Woodward indicated concern with the locations of the three access drives in close proximity (this property and two adjacent). Sikkema asked about the current driveway location. Chuck Genshaw, property owner, said the driveway

for neighboring property G.T. Sales is basically on the property line and goes along the entire frontage but also exits on Mangum Road. He said his driveway design would depend on MDOT's requirements. Sikkema indicated there would be two commercial driveways about 10 to 15 feet apart, and asked Genshaw if he could work out a shared driveway arrangement with G.T. Sales. Genshaw said he had spoken with Mr. Stanaway once and he seemed agreeable with their plans as was the adjacent residential property owner. His intent is to work with them to satisfy any concerns within reason.

Genshaw indicated he had talked with Jeff Ratiola of MDOT who said he didn't see that there would be a problem. Ventura said "the fewer access points, the fewer accidents". Genshaw said he had been told that a service drive was not possible. Ventura said he did not envision a steady stream of traffic in and out once people have their things in the buildings and Genshaw agreed, saying with mini storage uses there are not usually many people onsite.

Sikkema asked if Genshaw is opposed to trying to work out a shared driveway. Sikkema is concerned with conflicting turn movements into the two commercial uses, even though the chances of an accident are pretty slim. Genshaw said that he guesses it would not be a problem to blend the two driveways in together, but he's not sure the adjacent owner would agree to a parking lot reconfiguration. Sikkema would like to at least see the two commercial driveways combined into a true shared use driveway with a formal shared use agreement (an example of which can be provided by MDOT). Woodward noted that G.T. Sales is in the process of submitting paperwork for a site plan review to add an office building, so perhaps these details could be worked out further with that site plan review.

Sikkema said as it is now, it won't work well, and he would like to see both properties move their driveways onto the property line as a common driveway.

Sikkema asked Woodward if the landscaping plan is acceptable. She said it's not according to the Ordinance, but she assumes there is some expertise in the family (referring to Eric Meister, Commissioner). Meister said he feels he has to abstain from the decision since his son created the plans, but he said lilacs can get to be six to eight feet wide.

Ventura said the lilacs are gorgeous in the spring, with nice foliage in the summer, but what about winter? Would they provide much screening? He would like some evergreens to be mixed in with the lilacs at least on the residential side to provide more buffer. This is agreeable with the applicant.

There were no further public comments.

2. *Planning Commission Discussion and Decision*

Sikkema summarized the previous discussion, which includes:

- Require a lighting design to be submitted prior to obtaining a zoning compliance permit. So as not to hold up the permitting process, it was

decided that the lighting specifications should be turned into the Zoning Administrator prior to installation.

- Joint use driveway with G.T. Sales. Sikkema asked the opinion of the Commission on requiring a joint use driveway. Ventura said he is in favor of it but doesn't think they can require it. He thinks they can recommend that the applicant pursue it, but can't withhold the permit if an agreement can't be reached. Woodward said Chocolay Township does not have a regulation that can be cited to require the shared driveway, because this property is not within the Access Management Overlay district. Sikkema said that MDOT can also make the recommendation, but cannot withhold the permit. Sikkema said if the property owners can't reach a shared driveway agreement, then this driveway needs to be completely separate because it is not acceptable to have a 75 foot wide apron. Either it needs to be a narrow driveway that is visibly distinct from the adjacent driveway, or there needs to be a shared driveway. Genshaw said he is willing to discuss it with the adjacent property owner and to present him with a proposal for a shared driveway. He asked if he could just amend his plans to move the driveway next to the property line. He doesn't want to delay construction for months. Sikkema would like a plan to be presented to the adjacent property owner to see if they can agree on and implement the plan. Smith asked how the Commission is going to handle all that tonight. Woodward cited a section of the Zoning Enabling Act that says a site plan shall be approved if it meets the conditions of all applicable Ordinances and statutorily adopted plans (the Master Plan). It was decided this issue would be handled in the form of a recommendation.
- The other issue is to add evergreens to the landscaping plan.

Motion by Milton, seconded by Ventura, that after review of Application #SP13-02 My Way Enterprises, Inc for parcel #52-02-121-002-50, the site plan dated 9/27/13 be approved having met all requirements of the Ordinance and based on the Findings of Fact contained within the Staff Report dated 10/24/13, with the following noted clarifications:

- *Complete details for a lighting design consistent with provisions of the Chocolay Township Zoning Ordinance are to be presented to the Zoning Administrator for approval prior to installation;*
- *The Applicant will pursue a possible shared use driveway with the adjacent commercial business, or upon failing to achieve such agreement shall construct a completely separated driveway;*
- *Applicant shall incorporate evergreens in the indicated planting screen per the standards of the Zoning Ordinance Section 11.3 as approved by the Zoning Administrator.*

Vote: Ayes: 4 Nays: 0 Meister abstained for conflict of interest. MOTION CARRIED

Ventura made a comment to the designer. He appreciates the quality of the work on the Plan which shows the contours, drainage and storm calculations and thinks it was very professionally done.

B. Work Session on the Master Plan

The packet includes updates to the Draft Master Plan and a memo with questions that Woodward would like addressed relating to the former draft Future Land Use Plan and implications of survey results in relation to animal regulation, growth sector areas, housing, connected greenways, etc.

Woodward summarized the changes that had been made to the Draft Master Plan, including the addition of an introduction with a detailed summary of changes since the last Master Plan, and progress toward the recommendations of the 2005 Comprehensive Plan. This should give the Commission an idea of the issues that still need to be addressed. She updated the Historic and Regional Context sections based on input from the last meeting.

The Commission reviewed the former Future Land Use Plan draft. Woodward inquired about the statement regarding more intensive use along the major corridors and arterial streets based on availability or economy of public services. She would not want this to translate into commercial strip development as opposed to commercial clustering around nodes. This should be clarified in the development plan.

Sikkema said that Chocolay had a distinct business district, and over time many of the businesses were abandoned, but the property has not gone back on the market. He wonders how to encourage redevelopment on underutilized parcels along the central business corridor. Woodward said that a zoning change (mixed-use) might encourage more options. She said the Township isn't necessarily in a position to offer development incentives such as tax breaks. The property behind the McDonalds development was discussed. A new connecting road might be helpful. Smith noted the presence of a creek and wetlands in the area as well as steep terrain.

Per discussion, it was noted that a connecting road is needed adjacent to the Varvil Center to provide additional access to the Timberlane subdivision.

Sikkema asked the Commission to address the section on non-residential Commercial land use. He suggests the Commission identify strategic locations for commercial expansion. There is a draft section that reads, "Expansion of nonresidential tax base should only be permitted along US-41/M-28 from the west township line to the intersection of these two roads and to 500 feet either side of the intersection, with the exception of possible small expansions along M-28 in front of the Casino and adjacent to the Varvil Center on M-28, and at Kassel's Korner (corner of US-41 and CR 480)." Meister said this seems a bit confining.

Sikkema suggested that most are in agreement with the US-41/M-28 corridor development, but how far from that intersection do you want to promote new non-residential development? Sikkema is concerned that expanding the area for non-residential development may result in sprawl instead of infill development. Ventura said that if the Township limits commercial expansion, it will encourage more infill development in existing commercial areas. If the Township makes more land available south and east for development, developers will take advantage of those opportunities and create sprawl. He said if we want infill we should somewhat limit new land that is available for development. This will increase the value of existing underutilized commercial properties. The opposite is happening in Marquette Township where they keep making more land available for commercial development, and new development is marching west, yet there is a mall on the west side of Marquette that is almost empty.

Sikkema said he also doesn't want to make all the land close to Harvey commercial so that residential just keeps getting shoved further out. There are services here that would support a walkable community, but if we make it all industrial or commercial no one will want to live there. He said we might be missing some opportunity related to low-impact light industrial uses that are compatible as well. Our industrial area is very limited, and we might need to deal with the blight that is there to make it more appealing to business. We should try to attract businesses to create more local jobs.

Milton asked if the Township has to allow industrial? Woodward said they can't be exclusionary of a particular use. Sikkema said staff could look into resources for industrial parks and how to establish them.

Ventura said you could approach this differently through form-based zoning. Instead of having separate industrial and commercial areas, you regulate a building form that could accommodate those uses but is compatible from the street and doesn't impact the neighbors. You regulate the building form rather than the use. He thought this might work in a limited area in Chocolay Township. Meister said people seem to think that you have to totally separate commercial and residential, but with the new developments, they put them together and it seems to be what people want. Smith said all of Third Street in Marquette is a combination of uses. Apartments on upper floors were discussed. Ventura said we have a lot of commercial uses in houses along the corridor anyway. Milton said whatever form we come up with, we will always be hindered by fire protection and water in mixed-use applications. He thinks we should think about where an elevated water storage tank could be, because he thinks eventually we will need one. Sikkema said if you want to create a more vibrant business district, you probably do have to assess the challenges. Smith indicated Building Code requirements for 6" lines for fire protection would be challenging. Sikkema didn't think we have the level of community services that would attract those wanting to live in apartments over

businesses, for example, transportation into Marquette. Woodward noted that more and more people are getting priced out of the residential market in Marquette and are looking for housing near the jobs in Marquette.

Sikkema said we have to decide what we want it to look like and then figure out what to do to make it happen such as public water supply, etc. It might take a Planning Consultant to figure that out. Smith thinks Chocolay's existing character is related to those missing services, and the character would be much different had those services existed in the past. He thinks it's too hard to meet Code.

Meister asked why we should be opposed to apartments over businesses. It might help the business be more economically feasible, and shouldn't be objectionable to a person who would choose this lifestyle. Sikkema said we could put a goal in the Master Plan to explore how to redevelop the corridor into mixed use, and then recommend a Planning Consultant be hired to figure out how to make it happen. Then the Township would have to decide which of those things it's willing to do. For example, there are grants for water supply systems, but the Township may not qualify because of the median income levels here. It may not be realistic to expect the developer would pay for it when they can go to another Township where they don't have to.

Woodward said that in creating the development plan, we could involve area developers and local property owners to get more information on the challenges and realistic opportunities. She said with so many properties in transition, it's the right time to plan.

Meister said we should look at what can we do with what we have now, and have someone tell us what we need to do to make other things happen. If the cost of sewer and water is going to be more than the Township can afford, then we should figure out what to do with what we have.

Smith asked how the Township would go about building the connector road that has been discussed in the Plan. He thinks it would benefit a lot of people. Sikkema said it's a marriage between property owners and the local unit of government. The property owners donate easements, the government creates TIF districts, they get matching funding for grants, etc. He said we don't have enough development inertia to start that kind of process. Woodward said funding could also come from a special assessment. Sikkema also said private individuals have built roads and the local government has taken over maintenance.

Sikkema said we should have a goal to redevelop the underutilized commercial areas, and answer the questions, 1) what can we do with our current infrastructure, and 2) what is needed to accomplish our vision.

Meister said 60% of survey respondents said they'd like to see more jobs in the community, and so building commercial/industrial uses are important. Sikkema said he doesn't see heavy industrial as being suitable or possible, but high tech, low impact industries might be.

Sikkema said the vision might require doing a study to see how to incorporate commercial and residential mixed-uses in Harvey that are consistent with community character, because the Commission isn't aware of all the requirements.

Woodward said some communities are hiring consultants to create a development plan along with a form-based code to implement the plan. Sikkema said the proper zoning can also give property owners the assurance that their investment is protected from incompatible future development. The discussion turned to residential development.

Ventura said that the survey results were pretty definitive that the people who responded only want single-family homes. Meister said people do want more senior housing although they may not want apartments. He thinks people may be opposed to multi-family, but not senior multi-family. Milton said health department regulations also have an impact on the number of units built, because over a certain number of units they have to get an operator's license. Woodward said there are existing developments that do meet these requirements in Chocolate Township, it's just more expensive. Milton said they can share operators to save costs.

Woodward said there are other ways to do single-family housing and still support housing affordability and housing for seniors, including allowing tiny homes, cottage communities, accessory dwelling units, etc. Sikkema said people may accept a smaller scale multi-family versus a large-scale multi-family development. If the units are separated into multiple small buildings versus one large building it might be more acceptable. Meister said that for seniors, we need housing that is easier to manage. Woodward said that it's useful to think about the scale of the firehall, and how many multifamily residential units could fit into that structure which doesn't seem inappropriate on the corridor.

The Commission generally supports multi-family residential as a conditional use with controls on the scale of development, and allowed in transition areas between commercial or mixed-use and residential. They also support a mix of light industrial and commercial in some areas.

For regulations regarding special areas of concern, Woodward suggested we could have more regulations to discourage development in floodplains or for wellhead protection, but probably could not enforce extra regulations for wetland protection or endangered plants and animals. For cultural areas of concern, Woodward

would like to see a plan for connected greenways to allow wildlife movement. Ventura said we have a start on that with the Iron Ore Heritage Trail. He suggested the non-motorized trail could be expanded all the way to the County line, but this would involve addressing the issue of motorized versus non-motorized traffic where motorized is currently allowed. Smith said in that area there is an old County road that parallels the Iron Ore Heritage Trail that could be used to create a parallel trail for motorized users. It was previously used for snowmobile traffic when the railroad was active on the grade, and is more fun to ride than the rail grade. Milton said the North Country Trail also meanders through that area.

Woodward asked if the Commission wants to expand the access management areas beyond the current overlay district, as is suggested in the draft. Sikkema said it's not real applicable in residential areas, but is somewhat important in commercial areas. He said the real value is in preventing new driveways when properties are split. This forces a shared driveway arrangement in order to get the split approved. Smith said that the State DNR enforces similar regulations in limiting trail crossings.

The Varvil Center was discussed in relation to mixed-use. It is currently zoned industrial, but some commercial uses are permitted. Sikkema said owners of some residential properties in that area have wanted to be rezoned industrial, but it wasn't approved. Smith said that was because there wasn't a plan, they just wanted to sell the property. Meister said he thought it would be appropriate for a restaurant to be there. It was suggested to rename the district to more accurately reflect the mix of commercial and industrial uses.

Milton asked if CR-480 would become a State highway. Sikkema said not any time in the near future; he doesn't see it happening. Sikkema would like to see a zoning map for the next meeting so their future land use decisions don't create a bunch of nonconforming uses.

The Commission stopped at the section on "Infrastructure Management" to continue at the next meeting. They will also get a draft of Section 4 for the next meeting, sent electronically more in advance of the next meeting.

IX. PUBLIC COMMENT

Richard Bohjanen said he typically would rather not speak, however, he wondered if the Planned Unit Development zoning would be a good management of the transition areas that the Commission has been discussing. It requires input from the neighbors. There was a requirement that made it not too useful before, related to parcel size, but this could be changed.

X. COMMISSIONER'S COMMENT

Meister said he thinks the firehall looks great, and Sikkema agrees. Milton said he

would like to have the zoning of adjoining parcels noted on the site plans. Ventura agreed.

XI. DIRECTOR'S REPORT

Woodward said she was contacted by Carol Fulsher about some three sided sign kiosks she wanted permitted at the trailheads for the Iron Ore Heritage Trail, and some MDOT wayfinding signage. Sikkema said local communities can develop a wayfinding sign program that can be permitted with MDOT, but the Iron Ore Heritage Trail Authority would have to work with the Township to get it permitted with MDOT. Woodward asked about the sign for the Bayou Restaurant. Sikkema said that is a TOD sign (tourist oriented directional sign) which is developed with a private company (Michigan Logo) contracted by MDOT. The company contracts for the signs with MDOT under a general permit. Smith said the current sign provisions under the snowmobile program are very generic for trail signs. Smith suggested talking with Ron Yesney of the DNR to see if they've made exceptions for these types of signs.

Woodward asked Commissioners to send comments on the draft recreation plan to Dale within a couple weeks.

XI. INFORMATIONAL ITEMS AND CORRESPONDENCE

ADJOURNMENT

Sikkema adjourned the meeting at 9:40 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, December 2, 2013

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:30 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Richard Bohjanen (Board), Tom Mahaney, Bruce Ventura

Members Absent: Eric Meister (Secretary), Kendell Milton

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Dale Throenle (Community Development Coordinator)

II. MINUTES

November 4, 2013

Motion by Ventura, seconded by Smith, to approve the minutes as corrected (correct spelling of "sited" to "cited" on page 5, 2 incidences).

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Ventura, seconded by Bohjanen, to approve the agenda as written.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Dick Arnold, 312 West Branch Road, said he would like a better description of the topic in the agenda. Public comment was closed.

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

None

VII. UNFINISHED BUSINESS

None

VIII. NEW BUSINESS

A. Work Session on the Recreation Plan

Dale Throenle presented a copy of the previous draft recreation plan to the Commission. It was thought this plan had been submitted to the DNR (after it was approved by the Board), however this was in error and our Recreation Plan is currently expired. Throenle presented a completely revised draft.

The goals of the plan are to support recreation grant requests, fit within the budget, and create a recreation directory to aid citizens and visitors. The format is designed according to DNR specifications, with some additions. It is intended that this plan be

reviewed annually.

Throenle reviewed the outline of contents of the plan, including a *Community Description, Recreation History and Timeline, Administrative Structure, Recreation Inventory, Resource Inventory, and Description of the Planning and Public Input Process* (including goals, objectives, action program, and plan adoption documents). Appendices include *Maps, Recreation Locations, Site Information, Recreation Coordination, Risk Management Assessment, Summary of Survey Questions, and Self Assessment Grants*.

The Recreation Inventory is divided into four components including *Chocolay Township properties* (owned and maintained by the Township), *cooperative facilities* (public/private ownership partially or wholly supported/maintained by the Township), *other public facilities* (other public ownership not maintained by the Township), and *private facilities* (privately owned and privately maintained). Examples of *cooperative facilities* include the Chocolay Community Garden and Kawbawgam Ski Trail. Examples of *other public facilities* are the Cherry Creek Fish Hatchery, Cherry Creek School, DNR Chocolay River Access site on M-28, Jeske Flooding, MDOT turnouts, NMU Golf Course, and the MDOT Welcome Center. Examples of *private facilities* are the Gitchee Gumees RV Park, Homestead Golf, and Lakenenland.

There is also a brief section on *Regional Recreation Facilities* (such as trails) and *Grant-Assisted Facilities*. *Grant-Assisted Facilities* is a detailed outline of recreation grants that have been awarded to the Township in the past from sources such as the 1988 Recreation Bond Fund, Clean Michigan Initiative Recreation Bond Fund, Land and Water Conservation Fund, and the Michigan Natural Resources Trust Fund.

The *Resource Inventory* will contain information on the natural resource assets of the Township, such as natural areas and rivers, state natural forests, farmland, floodplains, groundwater recharge areas, rare species, scenic areas, and wetlands.

The *Public Input Process* will include methods for reaching decisions, and will be rewritten. The Census data will be rewritten.

There are five stated goals for the plan. Recreational opportunities will reflect the lifestyles of residents, will serve all age groups and people with disabilities, and will attract visitors. Risk management and maintenance policies and procedures will be developed for recreation facilities. There are ten policies and ten implementation strategies meant to support the goals of the plan. There are additional responsibilities assigned to Township departments and staff to support the plan.

The *Action Program* is created for the next five years. It begins with general implementation strategies and concludes with site specific implementation strategies. Strategies are assigned for each year. There is also a summary table for all years and all facilities indicating the assignment of action items or evaluation/ongoing maintenance activities.

The Plan concludes with a detailed table summarizing all project descriptions by site

and year, including costs, participants, and funding sources. This is meant to provide direction to the Board. Some costs will be indicated as “to be determined”.

Appendix B includes detailed information for each facility with map and GPS coordinates to help users locate the facilities. Basic access and asset features are described. There are also coordinates for the water features in the Township.

Appendix C includes supplemental designs, drawings, specifications, and documents pertaining to specific facilities. Throenle described those available for the Brower Recreation Area.

Appendix D will describe the collaborative recreational activities in which Chocolay Township participates.

Appendix E contains results of the Risk Management Assessment performed on all Township properties in June of 2012 in collaboration with the MMRMA.

Appendix F contains a summary of public survey questions and input.

Appendix G contains the Self Assessment Grant forms completed by the Township.

Throenle noted that survey results indicate that people first want the Township to maintain what we have and do it at a reasonable cost rather than focusing on new facilities. He said respondents prioritized trails and passive recreation. Throenle noted that there were very few younger respondents to the survey, so he has tried to anticipate and accommodate their needs as well. It was found that Township recreational opportunities are not well known, so education and promotion is needed. Throenle said the only property that the Township could sell (is not grant funded or otherwise encumbered) is the Wick property by Kawbawgam Lake on the north shore of LeVasseur Creek. It is land locked and an easement across private property would be needed for access. If a kayak/canoe launch could be established by Kawbawgam Road, a water trail to the property could be created.

Throenle said the Kawbawgam Pocket Park was once the launch site for the Kawbawgam Ski Trail. He wondered about re-establishing this launch site for both the ski trail and ATV/ORV trail.

Recreational partnerships will be pursued. Examples include the Chocolay Community Farm project, improved fishing access, and a possible cross-country ski trail on the golf course.

Throenle asked for Commission comments. Ventura said the plan is very comprehensive and thanked Throenle. Ventura noted the golf course will not expand beyond 18 holes as noted in the plan, and it is used informally now for cross-country skiing (would be a good site). Ventura also noted the Brower property is not well marked.

The Voce property was discussed. There is a 66' wide access easement from US 41, but no parking and no identification. Sikkema said for some of these properties the most you can really do is identify them for passive recreation use.

Throenle noted that better access to Silver Creek Recreation Area is a priority. This could involve property acquisition. This would support expansion.

Sikkema reiterated his view that the priority is for recreation to serve residents. He doesn't necessarily think we should develop facilities for other people to come here and use. He is in favor of multiple smaller scale recreation sites near population centers. The Commission had previously identified road easement parcels along Lakewood Lane that run between US 41 and Lakewood Lane that might serve as pocket parks. Resident buy-in could make possible the creation of small scale pocket parks. He thinks this is a priority as an amenity for young families.

Mahaney asked if there was thought to closing down Lion's Field and putting another field at Beaver Grove for easier maintenance. Throenle noted that he is an umpire for the leagues that play at those fields, and many people like the location of Lion's Field. He's not sure if maintenance would be that much easier since you would still be maintaining two fields. He also noted that Lion's Field is to be a trailhead for the Iron Ore Heritage Trail, and that the paved hockey rink is now located there. Throenle also noted there could be resistance from the surrounding neighborhood to the removal. Woodward noted that the Lion's Club has invested a lot of time and resources in the park. Throenle noted that if you move the field to Beaver Grove you'd have to start from scratch, and he doesn't think there is enough projected growth to warrant an additional field. Mahaney asked because of the extensive facelift that seems to be planned for Lion's Field in 2014 in the Plan. Ventura said he thinks it's better to keep multiple facilities closer to where people are living. Mahaney asked if the hockey rink could be moved to Silver Creek where there is already infrastructure. Sikkema noted you can really only get to Lion's Field by car. Throenle noted you can get there via the Iron Ore Heritage Trail, and the back portion of the park can be developed. Mahaney said people will drive to hockey because of the equipment anyway. Throenle said the paving of the hockey rink is already complete.

Throenle mentioned that a resident of Marquette told him there is a group of people who haul their bikes to the Beaver Grove Recreation Area and use it as a launch site for bike tours of the rural roadways. This resident said the Township should create some bike trail maps and encourage greater use.

Woodward asked the Commission's opinion on the plan recommendation of bike lanes on US 41 (shoulder). Sikkema said MDOT does not allow this because that would indicate there is no parking of vehicles on the shoulder, but parking is allowed. A bike lane indicates a travel lane. However, he said everyone knows they can use the highway shoulder for biking, so you wouldn't gain anything by marking it.

Bohjanen said there is a mistake on page 95 of the Plan – the Kawbawgam Pocket Park is on the left side of the road when heading south, not the right.

Ventura also noted necessary changes to the population information.

Sikkema asked about the nature of the “MDOT” cooperative facility listed on page 23. It is unclear that this references the multi-use paths in the highway right of way. He wanted it made clear that these multi-use paths will be turned over to Township ownership & maintenance responsibility when complete next summer.

Sikkema said the DNR owns the rail grade that is used for a snowmobile trail, and there are many potential uses that could be accessed from this trail, perhaps in the Bayou or along the Chocolay River. Throenle discussed the plans for the park strip along Green Bay Street, including parking. Sikkema said people should avoid referring to it as the snowmobile trail; it is the Iron Ore Heritage Trail.

Sikkema wanted the Commission to understand that the Beaver Grove Agricultural Area was being presented as a new recreation area with a work plan recommended by staff. Woodward said it was not just a staff recommendation – there were many meetings with the Planning Commission and the Commission recommended the project as a good use of the property. Sikkema said he thinks it needs to be clear that this project was recommended based on an outside group doing it. Ventura is in favor of the content being in the plan; the plan doesn’t specify who is going to be doing and financing everything, that can be determined later. Ventura suggested clarifying that this is a proposed project to be done jointly with an organization that would be created to oversee it rather than being run by the Township. In previous action, Ventura thinks the Planning Commission supported this project to the point it can be included in the plan. Bohjanen said the development plan can be put into slow motion – you don’t have to be very specific early on.

Mahaney asked about things that are in the plan but may not happen? Throenle said the plan can be modified over time.

Sikkema asked about next steps. Woodward wanted the Commission to focus on the goals and implementation strategies on page 54 and 55 and the action program beginning on page 56. The next step for the master plan is to prioritize the strategies from this plan according to the Priority Decision Criteria in the Master Plan. Smith said the Commission previously discussed their top 5 priorities with some being common among the majority. Woodward will look for those. He thinks it involved playground equipment at Silver Creek Recreation Area (Lowe’s grant), a bigger parking lot at the Chocolay River boat launch, etc.

Ventura noted that without the costs, priorities might be difficult to assign. Smith said some priorities will be indicated by the survey results. The plan is to review the final draft no later than January so it can be moved to the Board for approval. The Commission said the priorities can be determined after this plan is approved, as long as the important items are included. Woodward said the priorities need to be consistent with the Master Plan. The Commission wants to make sure costs are available for the top priorities with the rest to be determined.

B. Work Session on the Master Plan

Woodward asked Bohjanen if he thought it would be preferable for the Board to review the Master Plan in phases or as one complete document. He said it's difficult to read a document that big thoroughly, so segments would be better. Woodward suggested that if the Commission could approve Chapters 1 through 3, she could include those in the next Board packet for introductory review.

Woodward explained the format of Chapters 4 through 5. Chapter 4 is a review of resilience from the perspective of four elements including community (public) systems, private businesses and households, natural systems, and social systems. Within each of these systems, risks and opportunities are identified for subtopics like critical infrastructure and services (transportation, water, waste, public safety, energy, food), housing, public health, etc. Chapter 5 contains the functional strategic plans for future land use and development, fiscal sustainability, transportation, capital improvements, energy, food systems, economic support, health and quality of life, ecosystem support, disaster and risk management, collaboration, and zoning.

Woodward asked for any comments or changes for Chapters 1 through 3. She revised the summary of major changes since the 2005 Plan based on input from Board minutes, so it is more comprehensive. She asked about the Commission's preference for the placement and readability of the section detailing progress toward the recommendations of the 2005 Plan. Consensus was that this is an important section. There were a few comments/changes. Sikkema, page 10, said the Township has accomplished more for alternative transportation, including the MDOT carpool lot and the Altran/Marq-Tran transfer at Jacks. This may be more appropriately included in accomplishments. He also noted that under economic development (page 10) there has been retail expansion with the strip mall at the intersection of US 41/M-28. On page 11, Sikkema was not sure about the wording under Community Center, and whether it really is still work to be done. He hasn't seen it come up as a priority according to the survey results. The Community voted it down twice, so he's not sure it's something the community is looking for. The Plan makes it sound like we didn't accomplish it, but he's not sure it's something the residents wanted. Bohjanen was on the Ad Hoc committee for the community center. He said he thinks people wanted it, but didn't want to pay for it. Sikkema said if they don't want to pay for it, that means they don't want it. Bohjanen offered some background on the issue. Before the school was purchased, money was put aside for this purpose in an amount which was almost enough to purchase the school. He said this indicated consensus on working toward a community center. However, the school ended up being more expensive to operate than anticipated. During the brief time of operation, there were many activities going on in there. There were two choices for financing, including user fees and/or a millage. The Board decided to go for a millage, and the millage failed twice (it was combined with other things and the people didn't want to pay for it). Then the Township sold the school. But he said the facility was heavily used while operating.

On page 11, regarding Township Office expansion, Sikkema said that the offices were expanded, so this may be an accomplishment.

Bohjanen noted on page 21, 2nd paragraph, it should say “transportation corridor of *natural* and international significance”, not “transportation corridor of *natural* and international significance”.

Ventura noted on page 13 in the bullets, “proximity to cell towers” etc is mentioned under supportive principles for healthy communities. This is the only negatively worded item. Woodward said she would reword it to say “Separation from cell towers”, etc.

Upon there being no other comments on Chapters 1 through 3, Bohjanen moved, and Ventura seconded, to present Chapters 1 through 3 of the Strategic Master Plan with changes to the Board for review.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

Sikkema asked for comments on Chapter 4. There was consensus to revise the format to include all the risks and opportunities together per topic, instead of keeping all the risks for all topics together, followed by all the opportunities for all topics. There was consensus to leave the action strategies in a separate section, with references at the end of each topic in Chapter 4 to the appropriate action items in Chapter 5. Woodward said she might put each element of Chapter 4 in a separate Chapter, resulting in four additional chapters.

Some changes were suggested to the tone of the energy section. The Commission wants the information to directly relate to the Township, sharpening our focus on things within our control. Woodward said she does think energy is going to be one of the defining issues of our long term future. Sikkema said it is somewhat out of our control – we’re not going to drive energy policy here. Woodward agreed it’s somewhat out of our control, but felt we need strategies to deal with energy issues. The quote “necessity is the mother of invention” was referenced by Sikkema. He said we should focus on things within our control – for example, we can’t determine if people use electric vehicles or not, but if it becomes an issue, we could install infrastructure to support them such as that in Marquette. Bohjanen said that some things that haven’t traditionally seemed to be within our control might be a valid future local government role. Energy rates were discussed. Sikkema said electricity costs for some residents are expected to increase 25% over the next 3 years, which Ventura said will still be 60% less than those who are served by Alger Delta.

The plan was tabled to the next meeting.

IX. PUBLIC COMMENT

None

X. COMMISSIONER’S COMMENT

Sikkema welcomed Bohjanen to the Commission. Bohjanen said if he had one

comment or position, it would be to prevent ordinances. There was laughter in the group.

Ventura said he agreed with Sikkema that there is some editorial comment in the plan, especially regarding energy, and he understands the problems but doesn't think this is the place to promote it.

XI. DIRECTOR'S REPORT

Woodward said that if you read energy and sustainability plans from other communities, this is a real topic of discussion. She wants the Commission to keep this in mind, even though this might not be the right time to talk about it. She said she included the information because she does care about the future of the Township and is doing her best to anticipate things that will be of importance.

Sikkema mentioned the Township does have a pretty good network of natural gas, which is something people consider when they build. Woodward noted that there were survey comments from people who can't get natural gas. Smith said that Wintergreen Trail and Autumn Trail can't get natural gas because the infrastructure wasn't put in by the developer (would have cost \$40,000). Now it would cost \$7,800 per household if you could get 28 of the 35 residences to participate in putting in the infrastructure. He has to use propane, and is also on Alger Delta electricity. His roads are also not plowed. Some wells are failing to meet capacity (180 to 160 feet).

Sikkema encouraged everyone to stick to the outcomes in the plan, and not include text that would make some people disregard it.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

None

ADJOURNMENT

Sikkema adjourned the meeting at 9:48 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, January 6, 2014

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:31 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Eric Meister (Secretary), Richard Bohjanen (Board), Tom Mahaney, Kendell Milton, Bruce Ventura

Members Absent: Andy Smith (Vice Chair)

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Dale Throenle (Community Development Coordinator)

II. MINUTES

December 2, 2013

Motion by Ventura, seconded by Bohjanen, to approve the minutes as amended (correct spelling of “resondents” to “respondents” on page 3, modify sentence regarding the Beaver Grove Agriculture Area per Sikkema page 5).

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Ventura, seconded by Meister, to approve the agenda as amended (add item VIII.C Dairy Processing Facility).

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

None

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

VIII. NEW BUSINESS

A. Work Session on the Master Plan Chapter 4

Woodward said she'd like to send Chapter 4 to the Township Board for reading on February 17 if the Commission can get through the entire chapter either tonight or through e-mail comments in the next week.

Bohjanen wondered if “Resilience in Community Systems” is the appropriate title for Chapter 4 since there is a lot of work to be done before the Township can be called resilient. Ventura said the chapter points out openings for failure and proposals on

how to achieve resilience; if we follow through, we will be more prepared for what comes in the future. He gave an example of an action that could create better resilience. Sikkema said the chapter does relate to community resilience, it's just about whether we have achieved it or are working toward it. The Commission decided to change the title to "Working for Resilience in Community Systems".

Page 28, Ventura requested an explanation of the remaining revenue sources. This will be added to the commentary.

Page 30, change "underutilized non-residential areas" to "underutilized existing commercial areas". The purpose is to be consistent with the goal to increase tax base but still preserve rural character.

Page 31, change the word "modest" to "small" to reflect actual survey text in relation to tax increases. Sikkema likes the idea of having a Capital Improvement Program.

Page 32, change "K.I. Sawyer" to "Sawyer". Also include information on rail with nearby transportation modes.

Page 33, Sikkema said the State's population increased in the last year. Change sentence to say, "The decline in the State's population between 2000 and 2010 and increased fuel efficiency resulted ..."

The process for levying special assessments for private roads was discussed. The Commission also discussed the idea for an all-weather transit station, and whether there was a need based on long waits for connections. It was decided that this type of station might encourage greater use of transit and serve a developing need, and would be appropriate considering our climate.

Page 38, Sikkema asked if the Township has a Complete Streets ordinance. Woodward was not sure. Sikkema said the Township might want to consider that. Sikkema said there was good information on the water system that he wasn't aware of.

Page 41, Sikkema asked that there be further explanation of what the "shortfall" means. It refers to there being no money put into the sewer fund to fix failing infrastructure. In addition, there was a lack of certainty regarding the status of regional electric generation and potential rate increases. Say only "Fiscal feasibility of the sewer system is also related to energy costs", and "Increases in energy costs will continue to raise operating costs". Choccolay's potential role as an energy producer was discussed. This could include small scale methods such as solar panels or small wind turbines to power Township facilities.

Page 44, Bohjanen said he is somewhat cynical when it comes to the statement that "reducing consumption will reduce energy costs" because power producers have fixed costs, and if consumption declines, they may increase rates. He said the only way we can control costs is to produce our own power through methods such as solar and wind farms. Sikkema said this wouldn't necessarily reduce costs either because of the capital expenditure associated with this infrastructure.

Sikkema said he is not sure about the need to establish an “emergency fuel fund” because this would not involve a great deal of money and the Township already has funds in the bank. Bohjanen said this is also already reflected in the budget. No text change was suggested.

Page 46, next to last paragraph, change the word “facilities” to “measures” to make it more clear that the incentive involves ensuring that property taxes don’t increase because of energy improvements. Bohjanen said that the Township will recoup this value anyway eventually, because when the properties are sold, the energy improvements will increase the value and translate into tax increases for the new owner, not the person who installed the improvement.

Page 50, provide more information on Commission discussions and actions regarding agricultural regulations thus far and the importance of the issue.

The Commission approved all recommended staff changes to incorporate climate-responsive design strategies.

The Commission took time to read the new materials presented that evening so they could conclude the entire Chapter 4 review.

Page 57, provide more information on recycling of other materials such as fluorescent light tubes and organics.

Page 59, provide more information on the water quantity issue in relation to increasing density, and whether density is feasible. Sikkema said this is a good discussion on density. The Commission discussed their perceptions of citizen acceptance of density. Supervisor Gary Walker said there is no place in Chocology Township where additional density will provide the same benefits of walkability as Marquette, because there are fewer activity centers. He said he is not sure that competing with Marquette in this way is something to aspire to. Sikkema said he knows people who would like to age in the Township but don’t have that option because suitable residential options don’t exist, so they have to move to Marquette, or they accept a lower quality-of-life because they don’t want to move to Marquette. Woodward said that residents may be more accepting of diverse residential options if they were put in the same room with others discussing these needs. Bohjanen said he has heard no complaints about the senior housing on Cherry Creek Road, and it’s nicely located for walking to the grocery store and other businesses. Sikkema said if a district is developed to support that, then MarqTran may service the area.

Page 60, point out that another reason for the 20 acre minimum lot size in the AF district was to maintain rural character. Meister asked about the acceptability of the idea for small stores in neighborhoods, and how this would be achieved. Woodward said she proposed to achieve this through an activity nodes overlay. Bohjanen said someone tried to get zoning for a convenience store at the corner of Kawbawgam Road and M-28 and it met with tremendous opposition from residents. Sikkema said many people walk to Kassel’s Korner from the neighborhood. No change was made.

Milton asked “what is a form-based code”? Woodward said it is using the zoning ordinance to shape the public space with a certain scale and appearance, placing lesser emphasis on use and more emphasis on form, such as how the building fronts the street, the height, straight or stepped facades, etc. Sikkema said it’s a way of creating character. Ventura said it allows for changes in use without complicated processes. Woodward said it only gets implemented with new development or redevelopment.

Meister suggested providing for rezoning in case there is no suitable existing location for a particular desirable use. For example, he said there was nothing suitably zoned for his business when he started it, and no existing developed lot would have suited the purposes. He doesn’t think we should force someone into a PUD. He doesn’t want to make more land available ahead of when it is needed, but also doesn’t want to prohibit opportunity. Bohjanen suggested the PUD provisions could be redesigned to accommodate this. After discussion, the Commission decided that following the statement, “The Township should resist zoning more vacant land available for commercial or industrial development until the existing developed areas are more fully utilized with the exception of PUD projects”, ADD “; but rezoning could be considered if there are no suitable properties to accommodate the development. An alternative is to redefine the PUD provisions for these purposes”.

B. Work Session on the Recreation Plan

Throenle said the primary focus is the staff recommendations for climate-responsive design and the blanks filled in since the last review.

Bohjanen said he thinks it’s a great document, an extensive document. He had some corrections including page 7, substitute the word “incurred” for “occurred”; page 9 delete redundant “and”.

Ventura, page 9, substitute “James” for “Jesse” for the James D. Jeske wildlife flooding.

Bohjanen, page 13, check spelling of “predominately” vs. “predominantly”. Page 18, property donated by Wick “west”, not “east” of Kawbawgam Lake. Page 103, Voce Creek property is on the left as you travel south, not the right, but substitute the word “east”. Page 101, Kawbawgam Pocket Park is on the “left” not the “right” when heading south.

Ventura, page 25 and 27 charts, the legend is confusing because the same letters are used for different amenities. It was decided not to repeat the letters within the chart.

Milton questioned the poverty Census figures on pages 4 and 5. Discussion followed for the purpose of understanding the data.

Meister said it’s well done and will be easier to update next time.

Mahaney said it’s very comprehensive, an asset for the Township; it increased his awareness. He thinks it would really benefit the Township if more of the residents

knew what we have.

Bohjanen, page 4, change “Marquette Branch population” to “Marquette Branch prison population”.

The Commission approved all staff recommendations relating to climate-responsive design.

Ventura said he also feels the plan is an asset to the Township, and complimented Throenle on his efforts. It will be especially helpful when applying for State recreation grants as this is what they’re looking for.

Bohjanen moved, and Ventura seconded, to approve the 2014 – 2018 Recreation Plan draft as changed, including additional materials on climate-responsive design, and to make it available for the required public comment period.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

C. Potential Dairy Processing Facility

Woodward explained that she was first approached by Jason Schneider of Accelerate UP, and then by the entrepreneur, with an inquiry regarding a start-up dairy processing facility and suitable sites. Woodward researched available properties and presented contact information to Schneider. The entrepreneur has decided one of these locations could be suitable for this purpose.

The question tonight is how to handle this use in relation to the zoning ordinance. The site is in the Commercial District. Dairy or food processing facilities are not listed under either permitted or conditional uses at this time. However, the Commercial District recognizes, as a conditional use, “Other uses deemed by the Planning Commission to be of the same general character as those permitted and conditional uses”. Woodward asks the Planning Commission to determine whether a “dairy processing facility” is of the same general character as a “bakery” or other allowed use. A “bakery” is a permitted principal use in the district. The zoning ordinance addresses “food packaging and bottling works” as a permitted use in the Industrial district, but does not mention it in any other district.

The use is expected to utilize 800 to 1,000 square feet of space initially. Raw milk delivered from local farms would be processed and distributed by retail or wholesale means. The applicant has been in contact with the Marquette Wastewater Treatment Plant and the licensing agency.

Sikkema asked some questions regarding the potential operation and the potential methods of approval. Mahaney asked what makes this proposed use similar in character to a bakery. Woodward said both operations use heat to process raw materials into food products. Mahaney asked about the waste products. One solid waste component is whey, which the applicant expects to divert as a feed source to farms. The other would include liquids with cleaning solutions and milk residue. The potential location has public sewer.

Ventura asked about the suitability and capacity of the water supply. Woodward said that would be a Health Department issue.

Meister said he thinks it would be very much like a bakery in the processes involved in food production, and this is a legitimate way to process the application.

Sikkema had a question regarding potential expansion, and the differences between an operation like Huron Mountain Bakery and Bunny Bread. Sikkema asked what it would take before it was no longer a commercial facility but an industrial facility. Woodward said either scale of operation would be allowed as a permitted use under our Ordinance, because there is no distinction made. Meister said the site does limit the amount of activity that can occur. Woodward reminded the Commission that even if the use is processed as similar in character to a bakery, it would still be a conditional use that requires a public hearing and Planning Commission review. Certain parameters can be explored within the stated Conditional Use standards.

Woodward said the three choices are 1) process as a conditional use similar in character to a bakery, 2) amend the zoning ordinance to include this type of use in the commercial district, either as a permitted principal use or conditional use, 3) do not allow the use.

Mahaney said his opinion is that it's a conditional use. Walker noted that if the operation were to expand in the future, they would have to come back again to get approval under option #1. Mahaney and Meister said it seems like a good use. Sikkema said it would be a good use provided it's processed through a conditional use permit. Ventura concurred. Sikkema clarified that he doesn't want to chase the use out of the commercial district because this type of use is more appropriate in an area with sewer service.

Bohjanen moved, and Ventura seconded, to accept the concept of a dairy processing facility to be processed as a conditional use permit on the basis of the similarity to a bakery which is a permitted principal use in the commercial district.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IX. PUBLIC COMMENT

None

X. COMMISSIONER'S COMMENT

Meister said the milk processing facility would be an excellent addition, there are a lot of cheese shops in Wisconsin that include a retail operation, and he hopes they go through with it.

Milton said he likely could not make the next meeting. Bohjanen said he will also be unavailable for the next meeting, as did Meister. The Commission decided to move the next meeting date from February 3 to February 10 because a public hearing and final approval of the Recreation Plan is involved.

Milton moved, and Meister seconded, to change the next meeting date from February 3 to February 10 at 7:30 p.m.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

No further comments.

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, February 10, 2014

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:30 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Richard Bohjanen (Board), Tom Mahaney, Kendell Milton, Bruce Ventura

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Dale Throenle (Community Development Coordinator)

II. MINUTES

January 6, 2014

Motion by Ventura, seconded by Milton, to approve the minutes as written.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Meister, seconded by Bohjanen, to approve the agenda as written.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Patty Stephens of Stephens Realty and Consulting in Marquette spoke as an agent of the federal court regarding a property at 208 Timberlane. This 2.5 acre parcel is an asset in a federal case, valued at \$88,500. Stephens said this parcel could be part of a Chocolay River water trail from Green Garden or Mangum Road to M-28 and the Marina. It would also make a nice pocket park. She invited discussion on the parcel.

Stephens said she had talked with Kelly Drake Woodward, Zoning Administrator, and Don Bode, Assessor, and wanted to comment on how professional they were, and she thinks they are great assets for the Township.

Sikkema asked how such a purchase would be handled. Stephens said that if the Township wanted to make an offer, she should negotiate with the federal trustee as the appointed agent. The sale would need federal court approval, and creditors would be given the opportunity to object.

Woodward offered a clarification that there had been discussion of the potential for a DNR acquisition grant which could take 1.5 to 2 years to implement. Sikkema said that is a long time frame, and asked if that would be an issue. Stephens said the Trustee has the liberty to accept such terms.

Sikkema asked if they should add this to the agenda as a discussion item.

Stephens said there is 375 feet of river frontage, and it's a very private property with electricity and point well.

After no further comments, public comment was closed.

V. PUBLIC HEARINGS

A. Public Hearing on the Draft Charter Township of Chocolay 2014-2018 Recreation and Natural Resource Conservation Plan

Cathy Peterson, 6341 US 41 South, said staff did a great job on the plan. It is well put together. She didn't get a chance to read the whole plan, but she wants the Commission to know she is opposed to anything that is bad for the people. If there is anything negative in the plan, she is opposed.

After no further comments, the public hearing was closed.

VI. PRESENTATIONS

A. Silver Creek Church use proposal

Pastor Kevin Taylor of the Silver Creek Church said he echoes the sentiments expressed earlier regarding professional treatment he has received from Kelly and other folks from the Township office and offered appreciation.

He directed the Commission's attention to page 2 of their proposal, Objectives. They propose the development of a thrift store ministry to be located in their current facility at 219 Silver Creek Road to serve the residents of Marquette County with quality second hand clothing and household items.

They ask the Commission to consider this activity a customary accessory use to the activities and function of their Church. They cited quite a few examples of churches that also have thrift stores involved on-site in their ministry. In the U.P., the Salvation Army locations in Escanaba, Hancock, Iron Mountain, Ishpeming, and Marquette at one time operated a thrift store in conjunction with their church. He also specifically mentioned the Maranatha Assembly of God in Kingford, MI, whose ministry center grew so much that they had to purchase an off-site facility to serve the 3,000 clients each year, caring for a broad range of needs in addition to food and clothing.

The Church anticipates the ministry will create a couple salaried positions as well as an atmosphere and opportunity for volunteerism and donations within the community. There will be environmental benefits as items are repurposed instead of taken to the landfill. They believe the affordable shopping opportunity will also draw people from various parts of the County into the Township.

They believe the ministry will benefit people from all socio-economic backgrounds, but the physical location will especially benefit low-income residents within walking distance. Taylor cited a study conducted in 2004 by Precept showing that in Chocolay Township 30% of homes are single parent homes, 19% of households are below poverty level, etc. This project allows them to continue to take the church to the community with possible future outreach projects such as a food pantry, addiction recovery, and supplies for emergency situations.

The footprint of the building will not change except for a canopy on the rear. They estimate the traffic flow will be the same or less at any given time, except there will be additional Saturday traffic. Jennifer Prus of the Church brought the idea.

VII. UNFINISHED BUSINESS

A. Recommendation on adoption of the Draft Charter Township of Chocolay 2014 - 2018 Recreation and Natural Resource Conservation Plan

Woodward presented an idea from the U.P. Disc Golf Association to turn the Kawbawgam Ski Trail into a multi-use system for miniature golf in the summer and ski / snowshoe trail in the winter. They'd like to be involved in the redesign of the system before replanting to accommodate this. This could be added to the Recreation Plan in the general action plan as a collaborative effort on State property.

There was a correction to a parcel number for the Beaver Grove Recreation Area. The title was changed to the 2014 - 2018 Recreation and Natural Resource Conservation Plan.

Sikkema asked about the Township role on the Kawbawgam Ski trail on State property. It is a DNR trail that the Township grooms. Sikkema suggested the disc golf group could deal directly with the DNR and the Township wouldn't have to be involved. Throenle said the Township would have to adjust their grooming to accommodate the uses.

Ventura inquired about the extent of the cutting of timber and whether they will go all the way to the lake. He is concerned about the steep slopes. Woodward said the area of the trails will be impacted, but she doesn't think the steep slopes and area near the lake will be impacted. The Township has a map, which they will make available to Ventura.

Throenle said it's relevant to the recreation plan in that the DNR would look for Township input on the use of the land. He said it would be a good addition to the plan for potential collaborations.

Bohjanen said that since we have other State properties listed in the plan, it wouldn't be a problem to list this potential project. Throenle said the project would be listed in the Action Plan under "General", last item page 64. It could be in either year 2014 or 2015, but if it was put in 2014 the group could get involved in redesign.

Ventura said it was appropriate since collaborations with other agencies and jurisdictions are included. Smith asked about the wording, and was referred to the memo. It references "working with" the group on the project, but doesn't mean the Township would do it. Throenle said the Township may get involved in the design and layout, but would not manage the disc golf trail. He said this could involve relinking the trail back to the Kawbawgam Pocket Park where it was originally. Woodward said a redesign would involve keeping some areas free of trees, and year round use would be beneficial. Ventura said it's similar to the dual-purposing proposed at Lion's Field.

Bohjanen suggested changing the words "work with" to "cooperate with".

Ventura moved, Bohjanen seconded, that after conducting a duly noticed public hearing, the Planning Commission hereby approves adoption of the Draft Charter Township of Chocolay 2014 – 2018 Recreation and Natural Resource Conservation Plan as changed by way of adopting the attached Resolution which also recommends adoption of the Plan by the Chocolay Township Board of

Trustees, with the addition of the correction of a parcel number for the Beaver Grove Recreation Area, and the addition of the disc golf proposal into the Action Plan as item 20 for 2014 to read "Cooperate with the DNR, U.P. Disc Golf Association and other interested trail stakeholder to design and redevelop (after forest management activities) the Kawbawgam Ski Trail as a dual-purpose trail accommodating an 18-hole disc golf course in the summer and ski / snowshoe / snowbike trail in the winter.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

VIII. NEW BUSINESS

A. Consideration of processing the Silver Creek Church use proposal

Woodward said this permit would ultimately be processed by the Planning Commission, so she proposes that the Planning Commission give this a preliminary review to determine their preferred method for processing the request. Three means are suggested as follows:

1. Consider this activity as a customary accessory use to the Church, and process the request through a modification of the original conditional use permit. Under this option, the Planning Commission would be evaluating this particular plan in association with this particular facility and situation in accordance with the Conditional Use standards.
2. Process through Site Plan Review and a rezoning to Planning Unit Development District. This would make the Church a nonconforming use that would require ZBA approval for expansion unless civic uses are added as uses in the PUD district. Civic uses seem reasonable in the PUD district since they are typically less disruptive to neighborhoods than manufacturing or commercial uses which are allowed in PUD districts. This would require action by both the Planning Commission and the Township Board.
3. Zoning ordinance amendment to accommodate mixed-use as a conditional use, then process this as an amendment to the original conditional use. This would require action by both the Planning Commission and the Township Board.

Woodward said the ZBA could be consulted for an interpretation of whether this type of activity is always to be considered a customary accessory use, and that decision would then be annotated in the ordinance and set precedent for all other cases. She wasn't convinced that every situation would be the same, and thought method #1 would allow each situation to be judged on its own merit. Woodward supplied a flow chart graphic with these three options.

Smith asked Woodward her opinion on the accessory use question. She said the applicant has supplied convincing evidence of other churches who do include thrift stores in their on-site ministries, and based on the project description, it is evident the activities would be incidental to the principal activities of the Church. Taylor spoke to this issue, giving background on the Church's activities in this type of ministry in the Silver Creek Church Block Party. He said offering the items for sale at a reasonable price preserves the dignity for some people who are in need but find it hard to accept donations. This will allow the Church to connect with people in a new way.

Mahaney asked if the group foresees selling hard goods. Taylor said he expects people to donate things like that, although it's not their objective and a bit outside their scope. They would try to set limits for large items and stick to essentials. It's a donation driven ministry, however they could give people some direction.

Sikkema asked about planned hours. Prus said expected hours are Monday through Friday 11 to 6 and Saturday 10 to 3. Closed on Sunday.

The Commission discussed the dimensions of the store, which would be 60 feet by 70 feet, with additional private storage areas.

Milton asked about fire marshall review. Taylor said it's too preliminary, but their Board has discussed these things. The Church needs to approve it first.

Meister asked about opening date. Prus said October 1 is a preliminary estimate.

Ventura said it's a good proposal for that facility, and would serve the needs of the community. St. Vincent De Paul has more donations than they can get on the floor, so another outlet would be beneficial. He asked about a structural element as he was concerned about removing the center wall. Taylor said they didn't plan to remove the center supports.

Bohjanen addressed the customary accessory use idea, saying it's not very different except for the hours of operation from any other church bazaar, rummage sale, or chicken barbecue. He thinks the traffic impact would be less than the bazaar or rummage sale which might have 200 people in one day.

Sikkema said a garage sale is a commercial activity in a residential area, and the neighbors accept it because it's for a limited time period. But they might object if it was every weekend. He thinks it is a good thing for the community. But if you take it to the nth degree, a church that has an occasional barbecue might decide to open a restaurant, or start making furniture. So you have to be careful what you allow as an accessory use versus an intermittent activity. All the options require a public hearing and neighborhood input.

Mahaney said it's like a retail store. Prus said they believe most of the traffic won't enter the residential neighborhood, but will occur between the highway and the Church location. Ventura said there would be more vehicle traffic for the sporting events at the recreation area at one time than for the retail store that might have a few cars at any one time.

Meister said the conditional use would not make this acceptable for every church – each would be evaluated separately. He said this property would be appropriate for mixed-use zoning in the future, especially since it's buffered all around, which may not be the case at every property.

Sikkema said you have to be careful because you can't do for one what you can't do for all. You want to make sure it's fair.

Mahaney said the straightforward option is #1.

Smith asked if the Township attorney could be asked for an opinion. Woodward said that if the Commission wants an interpretation of the Zoning Ordinance that would apply to every situation, then it should go before the ZBA. The interpreter of the Zoning Ordinance is the ZBA, not the attorney. Smith asked if the ZBA

would consult with the attorney. Woodward said he gives input on legal implications of the Ordinance.

Meister thinks the conditional use approach does not create precedent. Ventura said that other accessory uses allow for retail sales, such as market stands. Sikkema said we would be saying that a retail use is an accessory use to a church.

Taylor asked for a clarification of whether the Church's non-profit status impacts that idea of what can be accessory.

Smith asked what if a church started making and selling Amish furniture – is that an accessory activity? Regardless of the use of the funds, is it an accessory activity? Sikkema asked if selling thrift items at a garage sale make that an accessory use to the home?

Throenle pointed out that not every facility could accommodate a use such as a restaurant in a church. This operation is meant to support community, and bring visitors to the Township where they will spend money. It will also draw people to the recreation area. He said it's a big leap to think a church in this area would open a restaurant or make furniture. They don't have the proper facilities. No exterior change is required in this facility to accommodate the accessory use.

Sikkema said that people may create a wood shop business at their home which is an accessory use. Woodward said that's a good point – that we do allow home occupations as an accessory use in the R-1 district. Sikkema said the amount of space is limited, and they have to meet other standards. Woodward said if you hold this proposal up to those standards, they probably meet them.

Smith thinks this is a great idea, but is just worried about churches starting businesses. It's a good location for traffic and people.

Bohjanen said the property was rezoned to R-1 and was then granted a conditional use permit – but according to your definition that building is a home because it's in R-1. He said you're worried about creating a precedent, but all conditional uses would have to come before the Planning Commission anyway. Meister said he is in agreement, that's how you limit the conditions under which they are approved and handle each situation individually.

Gary Walker said doing this as a conditional use gives the Planning Commission more control rather than less control, and he would not be bothered if the thrift store is approved, and then a furniture operation in another church was denied. The ability to issue a conditional use is based on the entire circumstance, such as buffering, footprint, etc. The Commission can say no based on a lack of fit with neighborhood character. It doesn't mean saying yes to all like requests.

Meister moved, Mahaney seconded, that based on the presentation and proposal as submitted, the Planning Commission finds that the Silver Creek Church Thrift Store Ministry meets with the definition of a church which includes "accessory activities as are customarily associated therewith", and therefore recommends that the proposal is processed as a modification to the original conditional use permit.

Discussion: Woodward clarified that motion #1 means that *this* proposal seems to be a customary accessory use to *this* Church in *this* building, and should be

processed as a conditional use. Mahaney said it's not setting precedent, it's taking each on a case by case basis. Sikkema said it is setting precedent because now retail sales would be an acceptable accessory activity in a church. Meister said they're already doing it, it's just a question of scale.

Vote: Ayes: 6 Nays: 1 (Sikkema) MOTION CARRIED

B. Recreation rankings for Master Plan

Woodward pulled all the capital projects from the approved Recreation Plan draft and compared them to the priority decision criteria that had been approved for the draft Master Plan. She assigned a possible number of points from zero to 3 for each project or group of projects for each criteria. This resulted in a priority ranking for all capital projects. This is up for discussion so that the Board will have clear direction on the priority of projects.

The top priorities according to this ranking include the collaboration with the Chocoy Community Farm Collaborative for the project at the Beaver Grove Agriculture Area, the Lion's Field projects that include support from the Iron Ore Heritage Trail Recreation Authority, and the Silver Creek Disc Golf expansion project that has been facilitated by the U.P. Disc Golf Association. Woodward explained the method for evaluating the project at the Beaver Grove Agriculture Area.

Meister said there should be criteria related to percentage of residents expected to use a facility. Woodward said the closest criteria relates to user diversity, with greater diversity receiving more points. It could also be related to frequency of use or seasonality. Sikkema asked if Meister sees this as a weight applied to the final score.

Mahaney would like to revisit this now that he understands the method. Woodward said the only urgency is to make a decision on a project for a 2014 grant application. The rankings are for the recreation plan. Smith likes the idea of including number of users in the criteria.

Throenle explained his reasoning in ranking projects for the recreation plan.

Meister inquired about cost for signage, because for that item, it seems a priority for all parks, not just within the context of one park. Woodward said that's another way to look at it – should you look at one type of improvement in several locations or a particular project in a particular location? It could depend on the funding source for the project. DNR grants apply to one location. Meister said temporary signage could be put up that is less expensive until another option is funded.

Smith asked about the size of the annual budget for new capital recreation improvements. It is around \$50,000.

The Commission asked staff opinion on the weighting question. Woodward asked if the intent is to override all other criteria with this weight given to one criteria?

The Commission said they're good with the rankings as presented.

C. Recreation Grant application 2014

Throenle introduced the anticipated amenities associated with this project that is supported by matching funds from the Iron Ore Heritage Trail Recreation Authority. This project is to create a trailhead at Lion's field. New restroom facilities were already planned at that location.

Staff evaluated the options and thinks this is a priority grant opportunity for this year. Sikkema said it requires 25% match of the project cost, not the grant amount. The cost of the project has not yet been estimated. It would include restrooms and warming shelter, parking, signage, and trails. Mahaney said it's a heavily used facility and it makes sense to apply for a grant.

Milton moved, Ventura seconded, to recommend that the Township Board pursue a collaborative 2014 recreation grant application with the Iron Ore Heritage Trail Recreation Authority to establish Lion's Field as a trailhead for the Iron Ore Heritage trail with appropriate amenities such as restrooms / warming shelter, improved parking, and signage.

Discussion: Ventura asked if this was anticipated to be a Trust Fund application. Woodward said probably yes. He said it would need to be a competitive request. Woodward said they talked about hiring a consultant. Ventura said collaboration gets a higher score, so partnering with the Heritage Trail is beneficial. Ventura said this also has multiple recreation opportunities with the trail, skating, and ball field, so that will also increase the score. Sikkema said it also supports a DNR facility.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

D. Planning Commission priorities for 2014

Woodward created some suggested priorities for the year. Sikkema said they might get through priority 1 although it will be easier with fewer amendments. Smith asked about the firearms ordinance review. This was necessitated by changes in the zoning districts, for one thing.

Priority 1 items include the 2014 Recreation Grant application, master plan update, finish proposed amendments, reconsider "Accessory Homesteading Activities" regulations, junk car and blight ordinances, asset management plan for Township roadways, burn regulations, and updates to land division and lot split ordinances.

The Commission accepted the priorities as written.

E. Discussion of property at 208 Timberlane

Meister asked if people can take a canoe along that section. It is navigable. It is available to any prospective purchaser. Bohjanen asked if it is offered to the Township would it end up in a bidding war? Stephens said each offer is considered one on one.

Sikkema asked if staff has an opinion. Throenle asked if the owner would be willing to have an easement assigned to the Township. Stephens said she would have to inquire, but they wouldn't likely do anything that would diminish the value of the property. Throenle said the property would contribute to a water trail from Kawbawgam Road to the mouth of the Chocolate by creating another access

point to the river.

IX. PUBLIC COMMENT

None

X. COMMISSIONER'S COMMENT

Woodward reminded the Commissioners to offer comments on the Marquette Township Recreation plan during this time. There were no comments from Commissioners.

XI. DIRECTOR'S REPORT

The Commissioners will receive the Annual Report in March. The Choccolay Community Farm Collaborative will make a presentation to the Board on February 17. The management team members were discussed. Almost all are Township residents.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

Planning & Zoning News – January 2014

Charter Township of Choccolay 2013 Annual Report

Marquette Charter Township 2014 – 2018 Recreation Plan

ADJOURNMENT

Sikkema adjourned the meeting at 9:36 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, March 3, 2014

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:30 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Richard Bohjanen (Board), Kendell Milton, Bruce Ventura

Members Absent: Tom Mahaney

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES

February 10, 2014

Motion by Ventura, seconded by Smith, to approve the minutes as written.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Ventura, seconded by Bohjanen, to approve the agenda with the addition of Item VIII.D – Discussion of multi-family development options.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Cathy Peterson, 6339 U.S. 41 S, requested a correction to the February 10 minutes to reflect her public comment which she said was omitted. Woodward said Peterson's comments were included under the public hearing in Agenda item V.A.

Dick Arnold, 312 W. Branch Rd., wants to reserve comment on item VIII.C pertaining to junk.

Upon no further comments, public comment was closed.

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

DNR – Jim Ferris to discuss the Lake LeVasseur timber sale

Ferris gave the Commission a handout which is a map of the boundary of the timber sale at Lake LeVasseur (shown in green) overlaid with a map of the ski trail (shown in yellow). He said everything north of the lake will be harvested. The stand was last inventoried in 2007. At that time, a cut was not recommended. However, a neighbor reported a lot of dying timber. They reinspected and found the stand was in poor condition with blow down and standing dead trees. This is an area of dune soils with low moisture and nutrient status. This is not a desirable harvest situation, but the DNR feels it can harvest or watch it die and fall down. The harvest follows the line of the jack pine.

On the map, the three red ovals indicate areas in which the cut boundary may be too

close to a necessary buffer such as water resources or slopes. Ferris said some adjustments could be made to the cut boundary in these three areas. For example, in the circle on the left, a 100 foot buffer needs to be maintained to the swale. In the location of the other two circles, they may stop the cut further down on the dune.

Ferris said every jack pine left behind is a dead tree in the not-to-distant future, and they would rather utilize them than see them die. However, they replant with mechanical skidders which are hard to use and unstable on slopes. It's a trade off – if trees are left standing, they will blow down and be a potential a maintenance problem for the trails in the future, but the dunes would not be impacted.

Ferris said the extra posts installed by the Township will allow them to locate the ski trail again so it can be renewed after the harvest, but the area will be clearcut. The young jack pine stand won't look like a mature forest again for 30 to 40 years.

Ferris said the DNR has few options. The red pine is a longer lived tree, and more aesthetically pleasing, but it won't grow there. This land is the bottom of the scale of acceptable soils even for jack pine. It may need multiple plantings to ensure tree survival.

Bohjanen asked if they will leave the red pines? Ferris said yes, but there are not many. Only a few on the south edge. They will only take the jack pine – no other trees.

Ventura asked if the DNR will plant rye grass or something to help stabilize the soils. Ferris said "no", but they will plant tree seedlings right away. Seed would be slower and it's too dry for seed. However, the jack pine planting furrows will be 8 feet apart and native vegetation will grow up between them, such as blueberries, moss, and grass.

Ventura asked Ferris's opinion on the compatibility of a disc golf course. Ferris says he feels it is compatible. The State likes recreational use of the State forest, and if they also want to utilize the ski trail, it is already there.

Tim Kopacz of the U.P. Disc Golf Association said the long-term vision is to create a disc golf course which is not your typical 12 foot wide walking/ski trail. It would be in addition to that. If you use a ski trail for a disc golf course, you would lose some of the closed-in feel of the ski trail because you won't have the anchor boundary of large trees. In constructing a disc golf trail, scrub trees and brush would be cleared in the "airway". So for example, for a 400 foot long hole, there might be a 40 foot wide airway that is not clear of trees, but is strategically cleared of brush and low hanging limbs. It would curve and meander, with the trees strategically planted. So he envisions there would be much coordination needed – this design idea would substantially impact the mechanical planting. Ferris said he would need to see a drawing to respond. Ferris said they could plant the trees by standards methods and then the disc golf group could remove some of them later to carve out a golf course. They would have to agree on how many trees need to go, but can work on this together.

Kopacz said he would put together a plan after he sees the cut so he can work with the land. For example, they can use an area that does not regrow. They will raise funds to build the course. Ferris said the group would need to go through the DNR land use process.

Kopacz asked if any proceeds from the timber sale will go into redeveloping the land? Ferris said not directly, it goes into a general fund, and the fund pays for replanting costs. Ferris is with the forestry unit, and the disc golf group would need to work with the

park and recreation division to propose a new trail. A State recreation grant may be possible.

Ventura asked about the dollar value of the timber sale. Ferris said they have set a minimum bid of \$130,000 for the 90 acres. This is not considered a high volume high value sale. In good timber, it would be double this for that area.

Meister asked how much of a buffer will be retained by the lake. Ferris said at least a 100 foot buffer would be retained from the swale/wetland area. They will also try to stay off the ridge of the dune and are mostly well over 100 feet from the water.

Smith asked if they are open to redesigning the ski trail? Ferris said it's a flexible landscape and the trail can go anywhere. Kopacz said it makes sense to stay out of the drift areas for maintenance purposes.

Woodward asked if they would be open to public input and ideas? Ferris said yes, and if trail redesign is desired, someone from DNR recreation could help with the design. Ventura said someone from the Noquamenon Trail Network could also advise. The DNR used to groom the trail 15 years ago before the Township took over. The disc golf association also helps with trail maintenance. Summer use will make it easier to maintain in the winter.

VII. UNFINISHED BUSINESS

None

VIII. NEW BUSINESS

A. Discussion of Lake LeVasseur timber sale and replanting with guest Jim Ferris of the DNR and Tim Kopacz of the U.P. Disc Golf Association

Milton asked how much area would be taken up by a disc golf course. Kopacz said it depends on the land. In general it takes 1 to 3 acres per hole, so a 54 acre site could accommodate an 18 hole course. However, this does not mean the 1 to 3 acres would be cleared – maybe only 20 percent is clear and brush and limbs are selectively managed in the rest. The disc golf group wants a flat, open course with longer drives. It would meander through much of the 90 acres of land but you wouldn't see from one hole to the next. You would walk from one hole to the next. There might be multiple loops off a mound.

Ventura said his concern is that only the jack pine will be there. There are not many majestic trees. Kopacz said he would have to wait and see what is left in the landscape as anchor points. Ventura suggested looking at the 40 acres next to this property to the east to see what it will look like after harvesting (Holly property). Ferris said the property east of the Holly piece which is owned by the State is comparable with 5-6 year old growth. Discussion occurred between Ferris and Kopacz.

The Township has added the project to the recreation plan. Beyond that, Kopacz will coordinate with the DNR and Township to move forward. Kopacz said he will also coordinate with the cross-country trail people.

Kathy Peterson asked if there is a charge to play disc golf. Kopacz said no –

they are a non-profit and the club sells hole sponsorships and maintains the land as volunteers.

Kopacz said 10,000 rounds have been played at the new Powder Mill course in Marquette since June 2013. The new course at Silver Creek Recreation Area opened last October with no advertising and people have been playing this winter.

B. Work Session on Master Plan Chapter 5

Woodward said Chapter 5 is about resilience from the perspective of the private sector. It is meant to be educational, but also explores the public sector's role in improving resilience in the private sector.

Page 79, Bohjanen is still skeptical about the accuracy of the Census Data LEHD Origin-Destination Employment Statistics. The data is an average of estimates from years 2002 to 2011. There is a chart in the Appendix that breaks the data down by industry.

Sikkema asked if it is the intent for the Township to work on the opportunities for private transportation, such as flexible work options and rail transportation. Woodward said that to an extent the Township could have an influence, those items would be in the strategic plan, otherwise they would be included as public education material.

Page 81, Ventura is skeptical about whether a public car share option would work in a small community. Not to say it isn't a good idea, but it has to make money somehow to pay for the vehicles. He also said light rail proposals keep getting shot down in large urban areas and he hasn't seen any proposals here. It's a wonderful idea but is it appropriate for a Master Plan? Woodward said the plan suggests if it were to happen, we would be expressing public support. She said a car share arrangement wouldn't have to be a public entity – it could be an informal arrangement between families. This was just to put the idea out as an option. Ventura said that might be more feasible, and some communities have a hot line for people to coordinate arrangements. This is not the same as a private company having cars they rent out to people, which is what the wording suggests.

Ventura asked about Marq-Tran ridership in the community. He doesn't think public transportation is well utilized and said we might need more transfer stations. Woodward said she thinks there is a need for a stop on the west side of US-41 because people are frequently seen crossing the highway to get to the bus stop by Krist Oil. Ventura said he doesn't see the bus stop at the car pool lot by Jack's. Sikkema said the car pool lot was built for people riding the Altran bus to Munising from the prison and schools. The Township explored an option to put a station there, but Marq-Tran did not support the project at the time. Sikkema said putting up more shelters to make it more convenient and comfortable would help encourage the use of public transit more than education. A more moderate structure might have worked at the car pool location. The question was who would pay to operate and maintain it. Sikkema said that in the plan we could address the kinds of shelters that are needed, and how Marq-Tran could change their routes. It takes a great deal of effort to let people know it's

available and get them to change their habits and consider public transit as a viable option. Make it easier for people to access it. Sikkema said there may be programs to help improve ridership.

Bohjanen said that private enterprises also run buses out of the Munising transit station, but the municipality doesn't influence that.

Page 84, Ventura, remove the numbers on the passive solar homes discussion because they don't reflect reality here because the Michigan energy code requires at least 6" insulation for R-24 in the walls. Keep the concept but remove the numbers.

Page 85, Ventura is not sure that passive strategies provide the highest level of resilience for private homes because non-passive methods can provide just as much resilience. He wouldn't limit it to just passive strategies.

Page 86, Ventura regarding methane digesters, the larger use of biogas is in fixed installations, such as power plants or pumping stations with large engines, but it's hard to capture and package methane for transit uses.

C. Discussion on junk, blight, and nuisance ordinances

Sikkema asked for public comment on this issue. Dick Arnold spoke about junk cars in the Township, and cited an example of a neighbor with 13 cars and 12 trailers, including 3 large camper trailers belonging to someone else. His other neighbor has logs cut up and stored as lumber for 5 years. He thinks it hurts property sales. He also mentioned an outhouse. He said there's no enforcement. He also mentioned a 30 ton crane and front end loader along the snowmobile trail at a property on Bayou St.

He said there is no limit to the number or size or ownership of trailers. You can have an unlimited number of non-commercial semi-trailers and they don't have to belong to you. He also mentioned a commercial contractor trailer with big signs on it that is for a plumbing shop in Marquette, owned by someone who lives in Sands Township, stored at a property on US-41 in Chocolay Township.

He would like the Planning Commission to form a subcommittee. He said in 2005 he got 100 signatures of people opposed to junk cars. He said 1,500 people replied to a Township survey and 70 percent were against junk cars.

He said Chocolay is dying, there is only one restaurant and it's combined with a bar. There are few new houses. Someone could start a junk yard next to you.

Smith said the current ordinance controls the number of trailers. Arnold said you can have up to three cars but they can be parked anywhere like the front yard and you can throw a tarp over them so they are concealed. He doesn't like people parking semi-trailers in the driveway and obstructing the view of the neighbor to look down the street.

Smith said the junk vehicles regulations do not vary per zoning district – it is the same in every district. Woodward said this is controlled by the vehicle parking ordinance, not the zoning ordinance. Arnold said there is no time limit on how long you can keep the cars there.

Peterson said she sympathizes with Arnold, but doesn't want the Township to micromanage everything and take away property rights. For example, don't send

someone a ticket just because they have a love seat in their yard. That's not a junk yard, so don't put that in the ordinance.

The Commissioners began their discussion. This issue came up because of public comment. Sikkema asked who enforces these ordinances. Woodward said she enforces the zoning, junk vehicle, and nuisance ordinances.

Ventura asked if the ordinances are enforced by citation or misdemeanor. Woodward said that first letters are sent, and if the issue is not addressed, contact is made with the Attorney before moving forward with the municipal civil infraction citation.

Sikkema asked about how many complaints are typically received in a year. Meister asked about enforcement issues. Woodward said there is difficulty in that she can't trespass to determine compliance on license plates, and it's sometimes difficult to determine if something is operable or not without cooperation of the owner. Woodward wants to know what is important. Where the vehicles are stored? The number of vehicles or other items stored? How it's screened? How far the storage areas are set back from property lines? If there are complaints, and a neighbor allows the enforcement officer on their property, sometimes violations can be confirmed this way.

Meister asked if it's true people are only allowed three vehicles. Woodward said they are only allowed three inoperable vehicles provided they are screened from view, but if the vehicles are licensed and duly operable there is no limit to the number. Plus you can have one other temporarily inoperable for 14 days, one operable modified vehicle, one inoperable hobby vehicle, one for sale for 30 days, etc.

Ventura said it's hard to enforce relative to trailers because the State issues permanent licenses for trailers.

Bohjanen said he spent 14 years on the Board and everyone who knew him would say he was fighting ordinances. Complaints between neighbors are what led to writing these ordinances. He thinks it is inappropriate to write an ordinance to solve a dispute between neighbors. He tried to make sure that all the ordinances that were written applied to everyone equally and were enforceable, and objective vs. subjective. The ordinances we have were plagiarized from more experienced groups.

Bohjanen doesn't know how many times he was in violation of the vehicle ordinance when he had kids. If their car broke down in the winter, he might not fix it until the spring. Rather than having an ordinance to solve his problem, you have to have an ordinance that will solve everyone's problem. He doesn't know if you have to have an enforcement officer go look for things or if it's fair to enforce just based on complaints. One person might live next to someone with 13 cars and offer to help repair, and others might be totally annoyed by it. Citizen complaints aren't the ideal thing for enforcing ordinances. If the ordinance enforcement officer can't find a violation by ordinary means without trespassing, then it that a nuisance or blight? He thinks we need ordinances, but we have to have good, functional, working ordinances that apply to all people.

Sikkema said even an ordinance that was good in 1979 might become out-of-date due to outside influences, such as trailer licensing. Some things might need to be updated. We don't necessarily need to modify ordinances if it's just about how we identify violations.

Milton asked if there was a problem with enforcement. Woodward said when she gets a complaint, she doesn't just go investigate that one complaint – she also inspects the surrounding area at the same time so it isn't selective enforcement. She agrees you can't just enforce ordinances by complaint. Woodward asked if the Commissioners think the goals for enforcement for junk or blight should vary per zoning district or if they should be the same for all zoning districts.

Arnold said there's a limit in the size of trucks that can be stored – why not trailers? He thinks someone who doesn't live here should not be able to park their trailer here. Woodward said there is sometimes an issue with people owning vacant land in the country and storing boats, vehicles, and junk appliances on them.

Peterson suggested the Commission should think about this for awhile. One man's junk is another man's treasure. Maybe people should hide junk behind trees or put it in a building. She believes people should be able to do what they want with their land if it doesn't hurt anyone else. She doesn't think they should discriminate by zoning district.

Bohjanen doesn't think you can do it for all zones. He said you have to control the accumulation of junk cars that can drain fluid into the water table.

Ventura addressed blight in buildings. The issue is public safety. If a building is in danger of collapsing, or has no doors on it, it's an open invitation for kids to go in and get hurt or have a building collapse on them. When blight becomes a public safety issue, or an economic issue of protecting property values, it's the business of the Township.

Smith asked if we have blight provisions. Woodward said the only thing that addresses blight is a paragraph in the nuisance ordinance that talks about damaged or deteriorated structures in Section 37.4.B.

Sikkema asked if there has been a dilapidated structure that wouldn't be covered by this. Woodward said she has only dealt with one dilapidated structure on Sand River Road and that was taken to Court to order mitigation. It was covered by the ordinance because the structure had already fallen down. He said the ordinance doesn't cover something that is abandoned and secured and not falling down. Woodward said that is correct – we don't have a property maintenance code, just a dangerous building provision related to safety. Sikkema asked if there have been complaints about these types of abandoned, but secured buildings. Woodward said she doesn't get many of those types of complaints. She has an occasional complaint about tall grass or brush. Sikkema asked if there are specific areas from which these complaints arise. Woodward said no. Meister said some people do native landscaping and he doesn't know how you could regulate that. Sikkema said the neighbor might decide not to mow the grass but you have woods behind your house. He said there is a lot of variation in landscaping even along Lakewood Lane. Woodward mentioned that Firewise zoning standards would call for a park-like setting with no undergrowth,

brush or natural flammable materials near the house. She said the jack pine area along M-28 has been identified as a high risk for wildfires related to down dead trees and accumulating wood materials.

Sikkema wanted to figure out whether people are asking for us to enforce things that aren't in the ordinance, or if things are in the ordinance but need greater enforcement. Is there something missing? Does it work, or doesn't it? Can we just not get to everything, or do we need to fix something?

Smith said the trailers need to be addressed. Woodward said setbacks for outdoor storage are not addressed.

Meister said we don't need a plan for everything that could bother someone. Smith asked what is being done about camping trailers. Woodward said the Township doesn't really address recreational vehicle parking, except that people can't have two dwellings on the same parcel, so they can't live in them permanently. If a non-resident wants to store their camper on a resident's property, and it's a licensed trailer, it's allowed. Smith said he has seen multiple camping trailers stored on properties in the Township.

Bohjanen said there might not be a problem if a person has a 40 acre stand of red pines hiding 3 trailers, but those 3 trailers might be a problem on a 50' lot in town. He thinks the zoning district might have a role to play. Smith said if someone parks multiple trailers out-of-sight, out-of-mind that's ok because it's not devaluing neighboring properties. Sikkema said it then gets complicated when you start trying to think of every situation and regulate it. Meister said it's kind of the same idea as the form-based code where you try to control the appearance of the public space. The problem is you don't want to see you neighbor's junk. As long as it's not leaking oil, if you can't see it, then it's not a problem. Smith said the Township went to court with LaJeunesse who had 40 acres and was parking his equipment out of sight. He hopes the ordinance would let someone run their business when they're not devaluing property.

Sikkema asked if the Commission wants to amend, revise, or write new ordinances, or keep the status quo? Milton thinks enforcement has been variable. Sikkema said it has to be fair and equitable to everyone, and if there's not adequate time for that throughout the Township, it's hard to deal with one complaint knowing that same activity is going on somewhere else in the Township. He said Woodward is doing the best she can to also investigate the surrounding area, but that may not cover something similar in another area. Bohjanen suggested forming a team to go help inventory current violations and see if there's enough of a problem to make it worthwhile to change the ordinance, or just enforce current provisions.

Smith said the trailer parking issue needs to be addressed in the ordinance. The Commission reviewed the vehicle parking ordinance. Arnold said he'd be happier if trailers were parked to the side of the house and not the front. Bohjanen suggested eliminating commercial trailer parking in the R-1 district. Meister agreed the number of trailers and vehicles allowed is a problem. Since we already control commercial vehicle parking in residential neighborhoods via the zoning ordinance, maybe we should control commercial trailers as well. It would not be the same in all Districts. But what if it's a residential neighborhood and the trailers are out of sight? Now it gets complicated.

The Commission asked Woodward to send a log of complaints to them at her earliest convenience. The topic was tabled for more discussion.

D. Discussion on multi-family housing options

Woodward described a potential development involving cumbersome steps for approval. Someone wants to build a few duplexes for senior housing on 3 acres of land located in the R-1 district between the industrial district and a subdivision. The Zoning Ordinance only allows for duplexes in the multi-family district. We have no undeveloped parcels in the multi-family district. To do this development the applicant would have to do one of the following:

- Strategy: rezone from R-1 to multi-family residential and go through site plan review, involving Planning Commission and Township Board approval. But before that, a variance would be needed from the Zoning Board of Appeals from the 20 acre minimum lot size for multi-family residential.
- Strategy: rezone from R-1 to PUD and go through site plan review, involving Planning Commission and Township Board approval. But before that, a variance would be needed from the Zoning Board of Appeals from the 5 acre minimum lot size for multi-family residential.
- Strategy: Develop as a Rural Cluster Development Subdivision, which requires a Conditional Use Permit and site plan review from the Planning Commission. However, this would only allow single-family residential unless the zoning ordinance was amended to add duplexes or townhouses as a permitted use in the R-1 district.
- Strategy: Develop as a site condominium requiring Planning Commission and Board approval. However, it would probably first require a rezoning to multi-family and a variance from the 20 acre minimum to allow duplexes.
- Strategy: Land division into separate parcels. However, this would only allow single-family residential unless the zoning ordinance was amended to add duplexes or townhouses as a permitted use in the R-1 district.

Woodward suggested an easy fix would be to do what most communities do and allow duplexes in residential districts. Otherwise transitional areas could be identified in the Township which could be zoned for multi-family development. Sikkema said the person might also have to deal with health department issues. Woodward said she always people to get an evaluation from the health department first. Milton doesn't think residential should be adjacent to industrial. Smith said you also need to protect the industrial. Bohjanen said we should look at amending the PUD to include lots less than 5 acres because buffer zones become an issue. The PUD allows site planning, public hearing, flexibility, etc. Sikkema said the PUD doesn't exempt you from zoning district requirements. If you want to do something outside of zoning, then you have to get a variance. Woodward said if it's always ok to get a variance from the minimum lot size requirement, then the requirement should just be reduced so the variance isn't needed.

IX. PUBLIC COMMENT

Peterson said she sold her property to the Township for park, and the Township told them they had to take down the barn because kids might trespass and get hurt. She could see that and took down the barn. But she doesn't think the lack of paint makes something blighted. Neither does old windows. She has a vacant home which she uses for storage and doesn't want it to be considered blight. She would board it up before replacing the windows. Don't get too crazy with the blight ordinance.

Arnold thanked the Commissioners for letting him run his mouth. He asked them to consider storage containers – people take the wheels off a semi and use for storage.

X. COMMISSIONER'S COMMENT

Ventura said it was a good discussion on the junk and blight ordinances that will be more productive once they get more information from the zoning administrator. Sikkema asked Woodward to supply the same materials next month on this topic.

XI. DIRECTOR'S REPORT

Woodward said the Commissioners received the 2013 Annual Report, updated Zoning Ordinance, and the approved recreation plan. A citizen wishes to install a wood boiler but cannot meet the setback requirements, so they are seeking a variance. She thanked the Commission for the discussion with the DNR and disc golf group.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

Charter Township of Chocoday 2013 Annual Report
Chocoday Township Zoning Ordinance
Charter Township of Chocoday 2014 – 2014 Recreation and Natural Resource
Conservation Plan

ADJOURNMENT

Sikkema adjourned the meeting at 9:35 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, April 7, 2014

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:36 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Richard Bohjanen (Board), Kendell Milton, Bruce Ventura

Members Absent: Eric Meister (Secretary) and Tom Mahaney (both excused)

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Suzanne Sundell (Administrative Assistant)

II. MINUTES

March 3, 2014

Motion by Bohjanen, seconded by Ventura, to approve the minutes as written.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Ventura, seconded by Milton, to approve the agenda as amended – Item VII.E – Postpone discussion of Master Plan Chapter 6.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

No comment - public comment was closed.

V. PUBLIC HEARINGS

VI. PRESENTATIONS

None

VII. UNFINISHED BUSINESS

None

VIII. NEW BUSINESS

A. Conditional Use Permit #14-01 – Silver Creek Church, parcel #106-040-00.

Woodward introduced the Silver Creek Church application. This is a request to convert a portion of the existing space inside the current church facility to a thrift store to support the ministry of the church. This is being processed as an amendment to the original Conditional Use Permit #73. This is an 11-acre site in the R-1 zoning district with no known nonconformities. 71 spaces of parking are indicated per the site plan. Zoning History – In 2002 this property was rezoned from Residential 3 (R-3) to Public Lands (PL) due to the Township purchase of the property and conversion to a Community Center. In 2005, it was rezoned from Public Lands (PL) to Residential 3 (R-3) because of the transfer from public

to private ownership and change of use from Community Center to the Silver Creek Church and School. During the 2008 Zoning Ordinance amendment, the property was rezoned to Residential 1 (R-1). In 2005 a Conditional Use Permit was issued for the church, school, and day care center. Stated conditions of that permit are listed on page 2 of the staff memo.

Woodward stated that her memo outlines specific zoning ordinance standards that should be used in reviewing this proposal.

Public Hearing

Woodward submitted letters of comment to the Planning Commission before the meeting, including letters from Wayne Dees, Larry Klaus of the Chocoday Township Lion's Club, Mary DeMarse and grandsons, Dan Freberg of the Marquette Community Federal Credit Union, Amy Mattson of the Retired and Senior Volunteer Program, and Tanya Johnson of McDonald's Corporation. These letters were all submitted past the 3 p.m. deadline, but the Commission took the time to read them before the meeting.

Kevin Taylor, 209 Oakridge Drive, Marquette, MI – Pastor at Silver Creek Church. Taylor expresses the desire of Silver Creek Church to impact the community in a very positive way with this venture. Taylor said in addition to his presentation a couple months ago, there are other friends that would like to share their hearts – some are part of the church and part of the township, as well.

Maria Jensen, 319 South 3rd Street, Ishpeming, MI – Jensen attends Silver Creek Church and really thinks their mission with the thrift store is to reach out to the Harvey community with no expectations and no conditions, just to show Christ's love. Silver Creek has a reputation for doing that regularly with their outreach programs, such as the Block Party. Jensen herself benefitted from the backpack program for back to school kids. She also likes the Halloween Harvest Party that gives children a safe place to go. These activities are an effective outreach, and she hopes that the thrift store will do the same.

Don and Dorothy Schlientz, 2044 M-28 East, Marquette, MI – They believe they have lived here longer than anyone in Chocoday – 41 years. Their kids went to school at Silver Creek, and they are very familiar with the neighborhood and are members of Silver Creek Church. They feel this is a good forward move for Silver Creek in reaching that community – there are a lot of transient people and a lot of single parents with children and transportation issues. They feel that with the thrift store they can reach out and help people. They also wanted to thank everyone – they always come to these meetings and a lot of people come and complain. They are just saying “we're with you” in working together. Eight years ago the Church said their vision is to be good neighbors and that's why everyone is here – they're passionate about being good neighbors. In meetings, Church members have actually discussed how to be better neighbors in Chocoday Township, and people come up with ideas. But they can't do everything, and they are waiting for the Planning Commission to suggest how to be better partners. They have watched different people on the boards and everyone has been kind – when they call the office, they always get cooperative people. The Planning Commission and entire Board need to be commended.

Deb England, 1431 M-28 East, Marquette, MI – England has lived in Chocolay for 20 some years and is a recipient of the Silver Creek Church outreach. They reached into the lives of her children and helped to make a healthy life for them – loving them, embracing them, and being beside them when they had no dad. She appreciates their outreach into single parent homes. England has been a member of Silver Creek Church for several years, and sees the need in the community. It is nice to see that there are healthy resources in the community to reach into the lives of these families, and she'd like to see that continue.

Katrina Williams, 207 East Michigan, Marquette, MI – Williams is a single mom, with a daughter that has several learning disabilities. She was first invited to Silver Creek Church several years ago, and ever since they first walked in, they were welcomed and have been treated like family. Williams has benefited in many ways during rough times, as well as providing them with food vouchers and use of the pantry when they needed it, backpacks, needed school supplies for her daughter and herself (Williams attends NMU), and clothes. Williams and her daughter have been very lucky with the kindness they have received, and she sees Silver Creek Church's kindness in other families as well. Williams and her daughter have volunteered during the back to school parties over the past 3 years, so she has seen both sides of this church program. Williams feels this venture would benefit the community.

John Pritchett, 945 Silver Creek Road, Marquette, MI – (Sands Township) Pritchett's son went to Silver Creek School and he also believes in the programs that Silver Creek Church does. Pritchett feels that anything that Silver Creek Church does is a benefit to the community.

Cheryl Liubakka, 504 Woodvale, Marquette, MI – Liubakka has been a part of Silver Creek Church since its inception – she has lived 28 years in Chocolay. She believes in the programs that the church has – she feels they are very giving body and very interested in helping those in the community. The Block Party originally started as backpacks and school supplies, and it was somebody's vision to start including clothing giveaways for people that needed it. There is a real need for the thrift store and it would be a benefit to the community.

Gary Walker, 765 Lakewood Lane, Marquette, MI – Walker is the Supervisor at Chocolay Township. He spent 38 years doing another job, and finds that this job is somewhat more rewarding. Walker just wanted to say "Thank You" to the Silver Creek Church congregation, and that we really enjoy having them as neighbors. Walker personally feels that Chocolay Township is a better place with Silver Creek Church in it. Walker wished them God's speed in continuance of their ministry. Everyone needs to understand what they do in terms of relation to the community, helping others – that's what it is about. If there is anything we can do we're only a phone call away – or even better, walk into the Township Hall.

Jennifer Prus, 204 Candace Drive, Marquette, MI – Prus works with the Silver Creek Church Board and with Pastor Kevin. Commented that there was a great turnout of people from the Church – lots of compassionate people that want to help others and to bring Christ's love into the community. Prus is asking that the Planning Commission help Silver Creek Church to bring this about.

No further comments – Public Hearing closed by Sikkema.

Commissioner/Applicant Discussion

Sikkema asked if there were any questions for the applicant.

Ventura was concerned about plans for things that get dropped off when no one is there. Will there be a receptacle that is protected from weather or will that circumstance be avoided? Taylor said their goal would be that would not happen, but they realize it might and they would have to have some sort of process for that. Taylor states they have not fully worked out the details, but the goal would be to communicate to the public when they are open and when they can accept donations, and have some type of signage discouraging people from leaving anything when no one is there. Taylor says he cannot handle a bunch of junk (would probably go crazy) so a process is needed. Prus mentioned that the items would be dropped off behind the building so it wouldn't be visible from the road. They would make sure that there was a canopy to cover furniture and such until they open. Woodward stated the canopy is part of the proposal, and Prus confirmed that it is.

Sikkema asked for any discussion on accessory use. Bohjanen stated that he felt this was a good project and failed to see the downside of it, and he would be happy to make a motion to proceed.

Bohjanen moved, Smith seconded, that after consideration of Conditional Use application #CU14-01 and staff review/analysis, and the understanding that the specific configuration and design for this proposed use is found to be an accessory use customarily found in connection with the Silver Creek Church, and subsequently finding compliance with all terms of Section 16.2 Conditional Use Permits Basis of Determination and General Standards and intent of the Zoning Ordinance, the Planning Commission approves Conditional Use request #CU14-01 which is an amendment to Conditional Use #73 with the following conditions:

- 1. Before construction, the applicant will provide proof of compliance with all other applicable statutes, regulations, and ordinances and proof that they have obtained all other necessary licenses or permits to the Zoning Administrator.*
- 2. The hours of operation for the Thrift Store and full Church services shall not coincide.*

Discussion

Ventura went back to his original question to the Pastor, he was wondering if they could put another condition to either prohibit outdoor storage of items, or to require an enclosed and covered area for receiving things when it is outside of store hours. Bohjanen accepted this amendment to the motion. Sikkema confirmed Smith's acceptance of the amended motion.

Sikkema indicated it's hard for him to accept a retail operation as an accessory use. Even though he believes that it's a good thing, he doesn't believe that it's an accessory use to a church, so he doesn't know that he can support the motion.

Vote: Ayes: 4 Nays: 1 MOTION CARRIED

B. PUD amendment #14-01 – Z & P Properties, parcel #253-017-00

Woodward introduced the Amendment to the PUD which was originally called Rezoning 145 for the Corning Apartments. This is an almost 2 acre parcel. Past use is residential (5 apartments on top) and commercial (document storage in the basement). Adjacent current uses are single family homes and commercial. Some of the homes are zoned commercial so may be converted in the future. In 2010, a dimensional variance was granted to develop a PUD on a lot less than 5 acres. The property was rezoned to PUD and a zoning compliance permit was issued in 2011. Woodward also pointed out the applicable zoning standards. The setback and height limits are determined by the original zoning district before the PUD, which is the R-2 zoning district. However, they are not changing any setbacks, they just want to refinish the basement to be apartments. All apartments meet minimum floor area in Section 6.3 of the Zoning Ordinance, and they meet parking requirements.

Woodward a condition she had suggested, that the applicant be required to provide specifications on the lighting with the Zoning Compliance permit application. This was already discussed with Z & P.

Public Hearing

Steve Zarkowski, applicant and owner of Corning Apartments – Zarkowski stated that the apartments will be nice. There are 8.5 foot high ceilings so it won't feel like a basement, and air exchangers will allow fresh air down there. Egress windows are 5' wide and 4' tall. Zarkowski already has interested tenants. There will be eight apartments and plenty of parking (27 spots). There are only 5 people living in the 5 apartments right now, so there is not a lot of congestion. There is commercial all around, so the apartments are a fantastic buffer for the residential behind them. If you've been by the apartments, you know that they are well maintained, and have never had the police out there.

Woodward gave the Commissioners a letter from an adjacent resident, Darrel Adair, 141 Terrace Street. Adair had brought in a sample of a well filter and residue from the filter, and Woodward showed this to the Commission. Adair has concerns about his water because of how the filter looks. Woodward had talked to Steve Lawry, Township Manager, whose is an engineer and had a career in public works. He said it looks like a corroded screen in the well and that is iron residue from the screen. Iron residue is also in the pipes. Lawry did not think it would have anything to do with the drawdown of the water from adjacent properties. He thinks it's a well issue.

Sikkema asked if this is the only person that had raised this issue – Woodward said yes. He asked if the resident expressed concern with the lack of water. Woodward said he hasn't experienced a lack of water, but an increase in residue.

No further comment, public hearing closed by Sikkema.

Commissioner/Applicant Discussion

Zarkowski said last year the power company came out there, and they did something with the wires and reversed the phases – there was a 3-phase going into the building – and they ruined the pump. This is a 15 hp, 3-phase well pump and is very expensive. They had to replace it, so it is a brand new pump.

Sikkema clarified that Zarkowski is talking about the Corning Apartment well. Ventura asked if it is a drilled well as opposed to a shallow well. Zarkowski replied that it is a 100 foot well, with an 8 inch casing that puts out 250 gallons per minute and could be used as a community well. Sikkema asked if this is the well that was there when Zarkowski purchased the property and he said yes.

Milton asked if Bell moved out of the basement? Zarkowski said yes, the medical record storage moved out of the basement – there is now 3,600 feet not being used. This will utilize that with very little exterior change.

Sikkema asked if there were any other comments from the surrounding neighbors. Zarkowski said he had none at all. The Commission asked about the location of the Adair property in relation to the apartments. Woodward stated she did not have the parcel number immediately available – only the address. Bohjanen asked if Woodward knew if Adair's well is shallow or drilled. Woodward did not know.

Smith wondered if there will be additional parking lights, or will they be adjusted? Zarkowski indicated they will be adjusted so they are flat and there will be back light deflectors on the fixture in close proximity to Wright Street.

Sikkema said that when the PUD was approved, the possibility of additional units was discussed, so this was before them to approve the additional units. Woodward stated they are getting rid of the commercial use and converting to another principle use, so the change in use must be approved.

Ventura said it was a good reuse of the building, and that it addresses one of the items that is in our 5 year plan to increase density where it's appropriate, and this is an appropriate area. Ventura asked if it was served by public sewer – Woodward responded yes.

Sikkema asked Zarkowski about the current demographic of tenants – a salesman that is there 3-4 days/week, rather than renting a hotel room, an environmental engineer, a retired lady, a retail clerk, and a military guy from the reserve base here. Sikkema stated it was kind of a cross section. Sikkema said the Commission has been working on getting higher density for people that don't necessarily want a single family home.

Ventura moved, Bohjanen seconded, that after consideration of application PD14-01 and staff review/analysis, and subsequently finding compliance with all applicable terms and intent of the Ordinance, and in particular Section 10.3 Planned Unit Development Standards for decision, the Planning Commission approves application PD14-01 which is an amendment to a Planned Unit Development called "Rezoning 145" with the following conditions:

- 1. Before construction, the applicant will provide proof of compliance with all other applicable statutes, regulations, and ordinances and proof that they have obtained all other necessary licenses or permits to the Zoning Administrator.*
- 2. Applicant will provide specifications showing that all exterior lighting is in conformance with the Ordinance along with the application for a Zoning Compliance Permit.*

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

C. Conditional Use Permit #14-02 – Bertram residence, parcel #009-018-50

Woodward introduced the Conditional Use Permit for the Bertram Residence for dune modification in the Lake Superior Shoreline/Dune Protection Overlay District. They would like to construct a single family home with basement, attached garage and deck. They plan to remove only the trees necessary for the excavation, but they will be making earth changes in the dune, which is why they are here for the Conditional Use Permit. It's a 1.748 acre lot in the WFR district. Woodward mentioned that Gene Bertram would be showing some photos of the site. Woodward provided aerials to compare to the survey specifications, and also some best practices for dune development. Woodward asked the Commission to consider that the lot is 105' wide, and with the proposed width of the house being 66' wide, this leaves only 39' to be allocated to side setbacks. This meets required setbacks, but it will not meet the 20' undisturbed buffer on the sides due to the excavation process. The basement will encroach on the 20' buffer on one side where a 15' setback is planned.

Sikkema asked if this can be addressed without going to the Zoning Board of Appeals. Woodward stated that if they think that it can be addressed through mitigation, then it can be addressed by the Planning Commission. Or it could be approved conditional upon the ZBA approval.

Milton stated that it is a minimal dune, only about a 7% slope. He doesn't think the development has much impact on the dune. Woodward stated that the development is planned for a wooded area which is more stable. Woodward said that the Planning Commission can address this without it going to the ZBA if they feel that the intent of the standards are being met and the development won't harm adjacent properties.

Smith asked Woodward about the disturbance of the dune – is the disturbance just related to the building of the house, and once the house is done the existing contours will be restored? Woodward deferred to the designer.

Public Hearing

Mike Pond, 1500 West Avenue, Marquette, MI – Mr. Pond is an architect for Aecom in Marquette and represents Gene Bertram (Gene is his brother-in-law), and is working with Mr. Bertram to come up with a site plan to establish placement on lot. Pond has acquired the services of Bob Cambensie to do a survey of the land and to establish existing contours on the site. He discussed the original site plan with Woodward. They have moved the home back 10' from the initial placement – it is now 136' from the water line and several hundred feet from the road, so the front and back setbacks far exceed the requirements. The home is placed on the backside of the dune, with substantial fill to be hauled in. The elevation of the garage will require between 10' and 12' of fill at minimum. They will haul in approximately 1,000 cubic yards of dirt to place the home on this site so they can have a view of Lake Superior. Mostly they will fill the dune – only a small portion will be dug for the basement. There will be some excavation along the front and sides to place the footings. This will be the only excavation that takes place. On both sides there will be a minimal amount of fill, but there will be more on the east side because there are two egress windows in basement

bedrooms. From ground level to the peak of the roof will be 20' to 25' high. They do not plan to cut any more trees than absolutely necessary.

Don Casteel, Gladstone, MI – Casteel has the lot next door to Bertram. Casteel is concerned when they haul in the fill it might come down on them. They say it is a minor fill on the west side but his cottage is right next to it.

Gene Bertram, 137 Aspen Drive, Marquette, MI – Bertrams sold their house and are temporarily living at this address. They have wanted to retire to this site for 30 years now. Bertram does not want to cut any trees, but needs to cut some. He wants to save as many large pines as he possibly can – he is a naturalist and wants to make the surrounding area as wild as it is now. His footprint, as planned, will be cut into the bank in the woods. The fill will be built up right where the house is, and all the dirt will go south. Bertram plans on planting grass and trees to hold the soil. This will basically be his studio – he is an artist – which is the main reason for purchasing this property. He plans to make his art there, and enjoy the north light and serenity it provides.

No further comments, public comment closed by Sikkema.

Commissioner/Applicant Discussion

Sikkema asked Mike Pond where the fill is going to go. Sikkema invited all parties (Pond, Bertram, and Casteel) to the front table to look over the site plans. At this point, there was discussion between the three parties and the Planning Commission over the maps.

They will bring in 10' of fill to bring the garage to the 618' elevation. The fill will recede to the property line. Sikkema asked what the applicant can do to ensure the fill doesn't encroach on the adjacent property. Pond stated they could build a dirt berm along the side. Sikkema asked about using a silt fence. Pond indicated the silt fence on their plan. Casteel responded that a silt fence doesn't look good – others replied it's just temporary. Sikkema asked Smith if a silt fence will be enough to protect Casteel's property – Smith replied they will also restore the area with permanent vegetation, and the silt fence will protect it while the vegetation is restored.

Bertram mentioned he had planted trees along the property line years ago, which would not be disturbed. Ventura mentioned the 10' of fill combined with 15' distance to the property line will result in a steep 2:3 slope. The ordinance says dune cuts cannot exceed 1:3 slope. Pond explained that it is not a cut, it's a fill. Ventura said it's the same result. Pond responded that the garage has to be that elevation because Mrs. Bertram has some ambulatory issues and can't use stairs, so the garage cannot go lower. It's designed so you can walk right into the house from the garage. Bertram stated that's why they have one story instead of two. Pond said the garage is at 618.5' and the house is at 620', so there are two steps into the house. Casteel asked for a copy of the site plan.

Pond said if Casteel is worried about water runoff, they could build a berm. Pond indicated that the design will cause most of the water will flow north and south, and only the runoff from half the garage will shed to the west. Sikkema suggested that the conditions include retaining the trees on the property line and installing silt fence. Bertram agreed, and Pond indicated that is already shown as part of the Soil Sedimentation and Erosion Control Permit which they have

already obtained. Smith stressed the permanent vegetation to control erosion, although they have minimized erosion potential with the design.

Casteel asked about the location of the development in relation to his house. Bertram showed pictures of the property and locations were discussed per the aerial photo and Bertram's photos.

Woodward asked about the nature of the trees Bertram planted – Bertram responded they are now 6' tall pine trees.

Responding to Sikkema's inquiry, Pond indicated the fill would be within 5' of the property line. Casteel is still concerned with the fill which will be above everything existing. Sikkema asked if Casteel was concerned about appearance or water runoff. Casteel answered that he is concerned about both. Sikkema asked if the re-vegetation would be naturalized or manicured. Bertram stated that he does not want to change the look of anything – he doesn't really want a lawn, but if he must do it to hold the soil down he will. He wants it to be natural and will do whatever he has to do to preserve it.

Milton asked if there is a choice of basements – it looks like there are two footprints for the foundation – this was just a mistake in the submittals.

Sikkema confirmed that no excavation is needed to install the egress windows on the east. Pond indicated that area is basically fill. The existing elevation was discussed. The house is sited 2' lower than the top of the dune.

The stairway goes down into the basement from the garage. You have to have a raised elevation in the garage of 4"- 8" before you go down the steps.

Erosion control measures were again discussed. Sikkema stated Smith's question to the developer is the potential to put in a retaining wall of some type to control the fill. This will be quite a drop-off which could be difficult to hold together, even by the raised driveway. Pond indicated they would be putting gutter up on that side of the garage, so the only runoff results from water falling from the air. Pond indicated that the driveway access will be graded and sloped away from the house and not toward the adjacent property. Sikkema said that they would need to have a big enough area at the drive for snow removal and to get in and out of vehicles. With the slope, the area will be wider than the driveway – to get that room it might be necessary to add a structure to hold that slope. Pond said in the site plan there is an area to back out of their garage and turn around, but it pulls to the east, not to the west. Sikkema stated it was just a thought to try to mitigate the impact to the adjacent property and be able to maintain that 4 or 5 foot buffer. Pond indicated they would put the silt fence in, and make sure there is no impact.

Smith asked Milton about previous Commission discussions about how far a driveway and the associated grading and fill should be from the property line. Their discussion involved natural slopes to property lines.

Woodward stated that a lot of people have told her that any fill in that area will just filter down into the sand over time. That's why the Ordinance requires natural landscaping, with the dune grass and other vegetation that survives in those habitats. It is required that the area be replanted with a prescribed amount of plugs and beach grass – one per one square foot of disturbed area. Sikkema

stated that the area getting disturbed is more the tree area than dune area.

Bohjanen stated that by looking at the provisions, there needs to be a 20' undisturbed buffer. As a condition, that would have to be fulfilled. Sikkema indicated that it does say "20' undisturbed buffer", and it's obvious that it will be disturbed, so it's reasonable to ask how that supposedly undisturbed buffer will be restored. The resident on the west side has a concern with the appearance and the stability of the slope not encroaching upon his property. Sikkema asked if the buffers were put in there to maintain the appearance between the properties. Woodward stated buffers were to maintain the stability of the dune. Bohjanen stated that he was looking for the undisturbed buffer definition, but he thinks the proposal will not have a negative impact on the dune, it will probably have a stabilizing effect. So the buffer is simply a setback.

Casteel said there would be no impact to the dune. Smith said he has known Pond for a long time, and thinks he has reassured the Planning Commission that he will keep the drainage and the slope on the Bertram property. But he wants to add it as a condition.

Sikkema stated that the Township doesn't enforce soil erosion - the County addresses the issue of soil erosion. If the soil does leave and encroaches on Casteel's property, the County Soil Erosion will deal with that. They say that they are going to have a soil erosion silt fence, which would be common.

Smith stated that everything meets or exceeds Zoning Ordinance requirements. The biggest thing that came up is because of the berm, and the berm is not taking away - it's adding to.

Bohjanen wants to see that the applicant will apply for appropriate soil erosion permits as part of the motion. Pond said the permit has already been obtained. Add: ***"Applicant shall provide for and obtain appropriate soil erosion control permits."***

Pond stated if it was the wish of the Planning Commission to require them to meet with the adjacent property owner and go over the placement of the silt fence and resolve any issues with that placement, they would be happy to do that. Pond stated he would like to make Casteel an active part of the process - not be reactive. Casteel said he would like that very much. Sikkema asked about the property owner on the east side.

Ventura asked how much higher the roofline or floor level of this new house will be relative to the neighboring houses and those along the shoreline. Pond stated that floor to ceiling is 10ft - it's a single story building with a basement. The basement on the east side will be exposed about half way. On west side, the walls will stand in place without any fill up against them, but the fill may not cover the entire wall. Ventura asked the question in a different manner - what is this house going to look like from the outside relative to the other houses along the shore - is it going to stick up much higher, or approximately the same height. Pond indicated it will be significantly higher than the house on the west - doesn't know about the elevation on the east.

Sikkema restated conditions added to the motion - 7 relating to obtaining the soil erosion control permit, and 8 applicant meeting with adjacent property owner.

This has mitigated the need for ZBA involvement – there will be no cut into the dune on the 20 foot side buffer, so ZBA variance is not needed.

*Smith moved, and Ventura seconded, that after conducting a duly noticed public hearing, and upon finding that the proposed use **complies** with the Conditional Use Standards of the Chocolay Township Zoning Ordinance as noted in the staff report dated April 2, 2014, the Conditional Use request for parcel #52-02-009-018-50 located at 2433 M-28 East to perform construction within the Lake Superior Shoreline/Dune Protection Overlay District is hereby **approved** subject to the following conditions:*

- 1. They shall follow the suggested control measures to minimize disturbance within the 20' buffer.*
- 2. Disturbed areas will be minimized, and the applicant will utilize all applicable temporary slope stabilization measures during construction.*
- 3. Slopes for dune cuts shall not exceed 1 foot vertical to 3 feet horizontal.*
- 4. The limits of clearing, grading, and vegetation removal will be clearly indicated on the site to avoid accidental damage to slopes and vegetative roots that support slopes, and discourage materials being stored outside the planned impact area.*
- 5. The applicant will minimize tree and vegetation removal. If removing trees, stumps and roots will left in place to stabilize soils and slopes unless they would interfere with the building foundation.*
- 6. The development area will be re-vegetated in stages immediately as portions of the site are complete utilizing native vegetation. Disturbed areas of the dune will be rehabilitated with dune grass plantings at a rate of 1 culm (clump) per square foot of disturbed area (can also include other native vegetation).*
- 7. Applicant shall obtain appropriate soil erosion control permits.*
- 8. Applicant shall meet with the adjacent western property owner on site prior to construction.*

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

D. Site Plan Review – Ace Storage Units

Woodward introduced the Site Plan review for Ace Storage Units. Site Plan review is required for all commercial development. In 2008, they were given a permit to build three storage buildings within three years –only two were built as shown on the new site plan. The proposal is to build two more storage units. There are two things that need to be addressed that don't meet the requirements – on the western property boundary the proposed building does not meet the required 30' setback – it's only 25'. The screening buffer that is required between commercial and the R-1 zoning district isn't exactly in the right location and does not meet spacing requirements. Otherwise it looks like it meets the requirements.

Sikkema indicated it was R-1 to the west and R-2 to the South. Smith asked if the trees are not planned close enough together? Woodward stated that the spacing that is on the proposed site plan per scale looks about 20 – 25' apart and they are only supposed to be 5' apart. Woodward does not know if there are existing trees, but the driveway/travel lane is indicated near the property line, indicating no space for trees. She feels that the buildings need to be moved

further from the property line and a buffer needs to be placed there if there is not a natural buffer. This would be on the west. Smith indicated that on the west side, the terrain is almost straight up and down with the houses around 100' above the proposed development. Woodward stated that the elevation change was not shown on the site plan, but if there is a sufficient terrain difference then screening might not be needed.

Sikkema said there are two things – one is the setback should be 30' and is only 25', and the other is the planting location. Woodward said that one of the existing units is indicated on the permit as hundreds of feet away from the property line, but is only 25' from the property line, so that building is non-conforming.

Smith thinks there is enough slope that you don't need to worry about the west side screening. Milton doesn't see the access for that residential – Woodward indicated that she thinks they get there from the Sands Township side. Woodward indicated that there is already a buffer to the south, so it doesn't matter about the spacing.

Bohjanen asked about driveway access being on property line – is that permitted? Sikkema indicated you can't have building within the setback, but it doesn't say anything about a driveway. Woodward stated that we don't count paving as structures.

Ventura asked if 25' at the end of the building is enough to get a truck back there to get to the end bays. He assumed that there are going to be end bays like the other two buildings have. Smith stated that it would have to be 30', that the Planning Commission does not have the authority to grant it at 25'. Woodward stated he has to meet requirements or he won't get approved.

Ventura said that looking at the aerial photo, it looks like the two existing buildings have quite a bit more than 25' at the ends where vehicles can back into those overhead doors, so getting 30' here serves two purposes – it meets the Zoning Ordinance requirements and also makes the vehicle ingress a little handier. The site plan drawing shows all existing bays as being accessed by side of building, but he knows there are doors at the end of the existing building, and vehicles could conceivably be backing into those. Woodward had not gotten any pictures of the buildings, just the site plan.

It was decided that #2 on the suggested motion can be omitted.

Moved by Smith, seconded by Bohjanen, that after review of Application SP14-01, a site plan review for Chocoley Ace Hardware/Northshore Development Company for parcel #52-02-106-011-00; and staff report dated 04/02/14; the site plan dated 03/21/14 be approved having met all requirements of the Ordinance with the following conditions:

- 1. Buildings shall be setback from the west property line a minimum of 30' to the drip line.*

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

Ventura asked if approving the site plan takes care of whatever is needed from the Planning Commission. Woodward stated yes, Site Plan will be included when he gets his Zoning Compliance Permit

IX. PUBLIC COMMENT

No Public Comment

X. COMMISSIONER'S COMMENT

No Commissioner's comments.

XI. DIRECTOR'S REPORT

Woodward stated that there is a requirement for the Planning Commission to have a yearly joint meeting with the Township Board. She asked the Commissioners when they might want to do it, and what topics should be discussed. She indicated that Mark Maki (Township Board Trustee) had asked about the capital improvement projects that had come out in the Recreation Plan and how those would be funded and what the priorities were. Possibly could use the time to discuss the Master Plan. Sikkema indicated he would like to know what the Township Board priorities for the Planning Commission for the next year. Sikkema would also like feedback on what they have worked on so far. It was decided it would probably be better to have a special meeting – maybe a Monday night in either May or June. Suggested dates were May 12 or June 9. This will give the Township Board a couple options, and they can decide on date.

Woodward indicated she would give them the Grant Application materials next time.

Woodward mentioned that there is Michigan Association of Planning training coming up – Planning and Zoning Essentials. It's about a 4 or 5 hour class. She will send an email to the Planning Commission with information on this training.

Junk car issue – still needs to be compiled. It was suggested that the next time we put out a Township newsletter that something about how zoning enforcement is done – what should a person do if they have a concern. People may not know what the appropriate action would be. The Commission was happy with the layout of their packet compiled by Suzanne Sundell.

ADJOURNMENT

Sikkema adjourned the meeting at 9:26 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, May 5, 2014

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:30 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Richard Bohjanen (Board), Kendell Milton, Bruce Ventura, Tom Mahaney

Members Absent: None

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Suzanne Sundell (Administrative Assistant)

II. MINUTES

April 7, 2014

Motion by Bohjanen, seconded by Meister, to approve the minutes as corrected – Page 9 of 13 – 6th paragraph “... You have to have a raised elevation in the garage of 4” – 8” before you go down the steps.”

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Ventura, seconded by Milton, to approve the agenda as written.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Woodward summarized a letter or public comment submitted by Wayne Dees on the Holiday Site Plan Review. Woodward said that Mr. Dees has a concern for public safety. He feels that north Holiday driveway should remain open and the south driveway closed. Mr. Dees also feels that the Credit Union driveway on the west side of the highway should also be closed.

Sikkema questioned as to whether this letter will go into the record as written. Woodward stated it was up to Sikkema if he wanted to read it for the public – we don't usually make a transcript of the whole meeting. Sikkema read the letter from Mr. Dees to the public. Sikkema stated it should be paraphrased and put into minutes.

Other notes from the letter include: Mr. Dees wants all written comments included as part of the meeting minutes and also to be available online. He wondered if the designer considered accident reports, and if there was police department review. He feels there is a traffic conflict between people traveling southbound and turning east on M-28 and people traveling southbound and intending to turn into Holiday. He also sees a conflict due to insufficient line of sight between people turning from Cherry Creek onto US-41 northbound and traffic moving to and from the Holiday Station.

VII. NEW BUSINESS

A. Site Plan Review #14-02 – Holiday, parcel #107-020-00

Woodward introduced the Holiday Site Plan Review. This is a request for improvements to existing facilities and consolidation of access points on US-41/M-28 to improve aesthetics, functionality, efficiency, and safety. The proposal was extensively evaluated to all the Access Management Overlay District standards and also to the Site Plan Review standards and all the other applicable standards of the zoning ordinance.

Bill Finkbeiner, District Manager of the Holiday Station Stores in the Marquette area, was present to answer questions and he supplied large copies of the site plan.

Sikkema asked about replacing the plantings. Finkbeiner responded that on the original site plan it showed the trees being removed because of grading to be done. However, now the plan is to remove and replant them after the work is complete – they would be put in the same general vicinity. Woodward stated that the trees need to remain in the public right-of-way because they were part of a grant that the Township received through MDOT in 2010. Sikkema indicated that there was some concern at the Corridor Meeting that the lights of cars coming from Togo's would be shielded by the trees and shrubs. Finkbeiner responded that was the intent.

Smith questioned whether the Site Plan took into consideration the reconstruction of the new bike path this year. Finkbeiner responded yes, and although it's not on the site plan, they had discussed putting in handicap stripes at the intersections. Sikkema indicated he didn't think they had to put in the detectible markings – but had to meet the grade. Sikkema asked Woodward to verify the requirements at private driveways with Jeff at MDOT.

Mahaney asked if there would be any signage alerting the motorists to the bike path. Mahaney felt that this will become a busy egress entry point, and lots of people will be using the bike path. Sikkema asked that Woodward check with Jeff at MDOT on this matter also. He would be able to suggest a standard sign. Wintergreen Trail has some signs, but Sikkema indicated that was more because the bike trail looked like an actual road, so there needed to be some indication.

Meister asked if there was a reason why there are no deceleration lanes when coming from the south. Sikkema indicated that this was usually based on traffic flow and volumes of the road. The outside lane of a multi-lane road is supposed to provide for through traffic. He said it probably wouldn't hurt to do it here

because of the volume of people pulling into the Holiday Station.

Ventura stated that in studying that intersection over the last four years, and making left turns onto M-28, there are a lot of people that stop in the left turn lane at both the north and south driveways to turn into the Holiday station. There are also people that are southbound on US 41 trying to turn east on M-28 who get behind the people trying to get into Holiday and then realize that they are stuck – they then try to get back into the passing lane, sometimes without looking. He agrees with Dees that the driveway to be closed should be the south driveway, not the north driveway, and suggested that Holiday move the pump extension to the other side of the island. This would maintain the same customer service level and would not impact the other public benefits such as the rear travel areas. He attended MDOT access management classes, and one of the main goals was to locate driveways as far away from intersections as possible, especially intersections of two major highways. He thinks the driveway for the Credit Union is basically a non-issue because there is so little traffic and thus it does not cause vehicular conflicts with Holiday customers. Ventura cannot support this the way that the plan is drawn.

Mahaney questioned whether there had been any thought given to having separate entry/exit driveways. Finkbeiner indicated no. Mahaney turns left traveling eastbound from Cherry Creek Road onto northbound US 41, and he has waited behind people who sit at the intersection until the westbound traffic from M-28 traveling northbound onto US 41 has subsided, so they are able to get across both lanes to turn into the station. This creates a backup on Cherry Creek Road.

Ventura indicated that moving the Holiday driveway as far north as possible may help. Typically people turning north from M-28 to US 41 utilize the driving lane, and people turning north from Cherry Creek to US 41 first utilize the passing lane, but immediately change into the driving lane to get into the Holiday Station. He thinks you can't eliminate this from happening, but having a little more space before turning into the driveway would help.

Meister asked how far apart the existing driveways were. After further looking at the blueprints, Sikkema indicated it was probably 170 feet – center line to center line.

Smith asked if the Site Plan had been accepted by MDOT. Sikkema indicated that it went through MDOT's plan review at the Corridor Meeting. Comments from advisory group are in packet. They have not yet applied for an MDOT permit. Included in the Corridor Advisory Committee's comments was squaring up the south driveway to more resemble a 90° angle. The plans indicate the driveway will be improved with perhaps an additional 5 – 10 feet between the intersection and the driveway. Sikkema indicated that the two significant accidents that have occurred happened at the north driveway into Holiday.

There are not a high number of crashes in this area. It is primarily the people that are trying to turn left that contribute to crashes. Sikkema thinks that most people currently turning left into Holiday utilize the north driveway. So since the new north driveway for Holiday (shared use driveway at Snyder's) would be located further away from the intersection, it should reduce problems. Mahaney said people might use the south driveway instead because it's a shorter distance. Sikkema said that if you eliminate the south driveway, and people have to utilize the existing north driveway, that is where the previous crashes have occurred.

Other things to be considered – a request could be made that the center lane be double striped, which would indicate that people north of the south driveway should wait to go into the center lane to turn at the intersection until after the striping – this would make it a dedicated left turn lane. Typically you only do this when there is opposing traffic trying to make a left in the other direction. This is not the situation here.

Ventura indicated that we do have the conflict though of people wanting to make left hand turns at two different places, and trying to use the same lane. The striping probably has merit. Sikkema stated that it would not prevent people from pulling into the turn lane too early.

Bohjanen stated that his thoughts on the matter are probably not practical, but if you close the south and the north drive entirely, and put an access onto M-28 with no left turn (right turn only - which probably creates problems with property ownership and MDOT requirements), it would improve flow and take some of the traffic off US 41 close to the intersection. Cars coming off Cherry Creek would have to use the north entrance into the gas station.

Sikkema indicated that his experience in working with these types of things is that you make incremental improvements where you can. This is an incremental improvement – he feels it helps Holiday and some of their circulation problems. Holiday has a right to have access, and right now they have a right to the two existing driveways. He feels that Holiday is making a step in the right direction by trying to provide something that the Township wants, which is connectivity between these businesses. This investment will be a benefit – it doesn't solve everything, but it provides the connectivity they've been trying to get for years.

Bohjanen asked about the status of the road that goes from the Holiday Station to Togo's. Sikkema indicated it is a private driveway which is partially in the right-of-way. Bohjanen said that access is beneficial.

Sikkema wondered if Holiday would consider moving the south driveway as far north as possible – maybe 10-15 feet. Finkbeiner said that would probably work.

Smith indicated that he thought having access around the building will be helpful. Ventura stated that taking one driveway away would make it somewhat safer, and he understands the value of incremental improvement. He asked Finkbeiner

if he had discussions with Snyder regarding the plan. Finkbeiner stated that there had been discussions, and it's going through the attorneys to finalize. Finkbeiner stated that the project is not slated to start until after July 4th.

Sikkema indicated that it does tend to feel cluttered at Holiday when it becomes busy – hopefully people will readjust to use the northern-most driveway. Sikkema also indicated that you see people staging in the approaches, trying to figure out which driveway is going to work best. With the new plan, they won't have to do that anymore – they can get onto the access drive and do their staging from there. Sikkema thinks there are a lot of positives about this plan.

Sikkema stated that Holiday has been really good to work with – they always do quality work – and he sees this as a positive for the Township. Ventura stated that he liked the suggestions for the façade of the building, also.

Finkbeiner stated they are currently working to try to schedule large truck deliveries during the overnight hours between 10:00 PM and 4:00 AM. This helps with the congestion. They are trying to get the fuel deliveries on the overnight schedule.

Sikkema indicated that there had been some questions on snow storage and drainage. The snow storage looks like it has been taken care of. Woodward indicated that there is some evidence of drainage on top of the pavement in the south corner by Togo's – you can see where water has been standing. Sikkema asked if this could be graded to let the water out. Finkbeiner stated that would be addressed.

Bohjanen stated that people used to park along the curb between the pumps and highway causing circulation problems – this will be eliminated with the new access road.

Sikkema asked about truck movement, and he sees in the design that truck movement is addressed.

Sikkema asked Woodward about waivers and variances in the Access Management standards – Woodward indicated we have provisions for waivers or variances from standards for existing development and development supported by MDOT. For example, the plan does not meet the exact spacing requirements from driveways to intersections, but these are existing driveways.

Sikkema indicated that in the "Additional Comments" there was a suggestion to "Consider requiring Stop signs and possible Stop bars on the shared driveway where it intersects with access drives from US-41." He does not think this is needed.

Sikkema also asked about the comment "Inquire whether the benefits of having light standards near the multi-use path crossings on the access drives outweigh the dangers of having fixed objects in the ROW." Woodward indicated that this was a suggestion from the Township Manager – having some type of light at the

driveways where the bike path crosses. This would be to light the pedestrian crossings in driveways. Woodward asked about lower bollard lighting – Sikkema indicated MDOT does not do lighting.

Ventura questioned the size of handicapped spaces – they appear to be smaller than standard parking spaces (standard are 10' x 19', and the handicapped spaces are 8' x 19'). Sikkema indicated that you need to also consider the van access, which gives another 8', so the handicapped spaces would actually be 16' wide.

Sikkema and Woodward discussed the canopy lights – they will need to meet the standards at the zoning compliance permit stage and make sure that it is the minimum brightness necessary according to standards. Sikkema asked if this needs to be added in as a condition. Woodward stated that it is already included as #6 in the suggested motion. Sikkema asked about #7 on the motion about drainage – should this be included in the motion? Woodward indicated yes.

Mahaney had a question about stop signs – would there be a requirement for a stop sign at the end of the service road? Woodward indicated that Holiday has indicated these signs on Site Plan 1.1 before the Snyder driveway. There are others near where the bike path crosses the driveways. Sikkema said those locations are also lighted.

Moved by Milton, seconded by Bohjanen, that after review of Application #SP14-02, a site plan review for Holiday Stationstores, Inc. for parcel 52-02-107-020-00; and staff report dated 5/1/14; the site plan dated 1/13/14 be approved having met all requirements of the Ordinance with the following conditions:

- 1. Approval is conditioned upon MDOT approval;*
- 2. The shared access and maintenance agreement shall be presented to the Zoning Administrator and recorded with the Marquette County Register of Deeds; and*
- 3. All plantings associated with the 2010 MDOT grant and Adopt-a-Tree project shall be relocated to a Township/MDOT approved public right-of-way according to Township approved planting methods. The Beck family shall also be consulted regarding the Adopt-a-Tree marker relocation; and*
- 4. Driveway construction shall be coordinated with the MDOT/Chocolay Township project to rebuild the multi-use path paralleling the highway across this property frontage; and*
- 5. Owner shall install and maintain internal regulatory signing or pavement markings per current Michigan Manual of Uniform Traffic Control Devices standards for proper traffic flow/control; and*
- 6. The signage and lighting will meet all requirements of the Chocolay Township Zoning Ordinance, with additional information as needed being submitted to the Zoning Administrator; and*

7. *Applicant shall address site grading for positive drainage at the southeast corner of the parking area.*

Meister questioned the “coordinated with the MDOT/Chocolay Township project” (#4) of the motion – what does it mean? Sikkema indicated that he heard that the contractor is planning on starting the bike path project in late May. It should be in place before the Holiday plan is started. There will be revisions to the bike path.

Ventura asked about the reference to the Beck family in the motion. Sikkema indicated that there is a memorial by a tree for Andrew Beck who died in an accident there – it will go wherever the tree goes. Woodward indicated that it is a big concrete block, with a small engraved brick on top of it. The Boy Scouts installed it as part of the Adopt-a-Tree program.

Milton said it’s a good plan and it does everything that we encourage businesses to do. Ventura said it’s a step in the right direction.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

B. Site Plan Review #14-03 – Lakewood Medical, parcel #107-020-00

Woodward introduced the Lakewood Medical Site Plan. This will expand the current Lakewood Medical Associates building from 3,760 square feet to 4,938 square feet (a 30% increase) and will involve interior remodeling at the request of Marquette General Hospital so that more services can be offered at this location. This will bring additional doctors here. All exterior changes will be on the back side of the building. It meets the parking standards and all ratios for floor area and ground coverage. The proposal doesn’t involve wetland or floodplain issues.

There were variances granted for setback of the front buildings in the initial development, but the back buildings meet setback requirements.

Sikkema pointed out a potential problem with parking standards. Based on methods of calculation, the 4 chair beauty parlor is required to have more parking than the doctor’s office, which is not logical since there are 14 patient rooms in the doctor’s office. Parking standards for doctor’s offices are currently based on the size of the waiting room. This should be reviewed at a later date.

Brian Anderson, general manager of IHS Building Co., introduced himself and stated he was representing the project and was here to answer questions.

Milton questioned why the Planning Commission was reviewing this – Woodward stated that every commercial development that is an expansion greater than 20% of area has to go through site plan review.

Ventura indicated that this is a pretty straight forward request.

Moved by Ventura, seconded by Meister, that after review of Application #SP14-03, a site plan review for Superior Development for parcel #52-02-107-003-40; and staff report dated 5/2/14; the site plan dated 4/20/14 be approved having met all requirements of the Ordinance with the following conditions:

1. *The signage and lighting will meet all requirements of the Chocolay*

Township Zoning Ordinance, with additional information as needed being submitted to the Zoning Administrator.

Meister questioned whether there was going to be a new sign, or will they use the existing sign. Woodward indicated they will leave the existing sign, or they could also apply for a sign permit if there is a change.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

C. Discussion of Master Plan Chapter 6

Woodward apologized for not completing Chapter 6 – she has a small section remaining concerning floodplains, wetlands, dunes, and other areas of particular concern, and will finish the section pertaining to productive resources such as forest lands and agriculture.

Bohjanen suggested a few changes. Page 90 – “Adaptation strategies address **symptoms** ... – *maybe it should be **systems?***” Woodward indicated that it actually should be **symptoms**, but for clarity the sentence was revised to read “Adaptation strategies, *such as water resource management, stormwater control, storm shelters, etc,* address symptoms.”

Page 91 add word in **bold** – “Impacts on plants, animals, and humans”, second bullet, “... but will the adaptation **occur** fast enough to compensate?”

Page 91, same bullet – Ventura indicated there should be commas separating the tree species, “... jack pine, black spruce, balsam fir, quaking aspen, eastern hemlock, tamarack, and ...”

Page 92 – header “Opportunities for Climate Change” – change to “Opportunities for Climate Change **Response**”.

Ventura, page 92 – first bullet – remove “***For example, the northerly migration of tornado zones may necessitate much needed improvement to buildings and infrastructure to make them stronger and more resilient. This will also spur the economy.***” Ventura noted our buildings are built to withstand a snow load which is more than any place in the country.

Ventura, page 93 – Fire Hazard Profile – first paragraph, last word – “***lightning***”, instead of “lightening”. Page 99 – questioned Engman Lake, Strawberry Lake, and Sporley Lake – not in Chocoley Township, but are part of the watershed. Left as is.

Meister questioned the idea of plant hardiness zones moving north – after this winter, there are many dead shrubs in the landscape. Maybe the zones are moving the other direction – laughter.

Woodward indicated that Chapter 7 will include detailed action strategies, land use plans, and the zoning plan.

VIII. UNFINISHED BUSINESS

None

IX. PUBLIC COMMENT

No Public Comment

X. COMMISSIONER'S COMMENT

Mahaney stated it was nice to see the improvements that Holiday Station is going to do. It will help with traffic flow. Meister indicated that it was nice to see the expansion of the medical facility, or any kind of expansion in Chocolay Township. Sikkema said there is a current project to remodel the bathrooms at the Welcome Center. Milton likes the design of the Holiday Station.

Ventura asked about some type of procedure to handle public comment letters received so that they don't have to read the whole thing publicly. Woodward indicated that she could not find any written policy or procedure. She also noted that it is not our practice to create a transcript of everything that is said in the meeting, so it doesn't seem reasonable to expect that we would include entire letters in the minutes, however the letters could still be read in their entirety. Ventura asked about including it as an attachment to the minutes – "Correspondence was received from ... See Attachment ...". Woodward stated that this would create lengthy documents in the official written record book. Sikkema reiterated that if someone came to the meeting and spoke at public comment, their entire comments would not be transcribed, only summarized. Ventura said his suggestion was not to make the minutes even more lengthy, because they already include more content than most places. Meister suggested passing along comments received to all members of the public in attendance, and paraphrasing them for the minutes, then the correspondence would not need to be read. Bohjanen suggested displaying it on the screen during public comment.

Sikkema asked if you can make public **comment** without attending the meetings. Woodward indicated that for public **hearings** we invite and accept written comment. She feels that we should at least indicate that correspondence was received during public comment, give a copy to the Commission, and summarize the main points that were written. If we had the communication before packets go out to the Commission, we would include it in the packets and on the website. However, packets are not usually available online until the Friday before the meeting, so it doesn't allow much time to respond. Woodward will check into suggestions for making public comment remotely and e-mail Sikkema.

XI. DIRECTOR'S REPORT

Woodward indicated the information for the Planning and Zoning Essentials in the packet. Milton indicated he had emailed an application to her at planner@chocolay.org. This is an out-of-date e-mail address. Smith and Bohjanen also indicated they would like to attend both workshops.

Woodward also indicated that the Lion's Field Recreation Grant application materials were included in this packet.

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, June 2, 2014

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:32 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Richard Bohjanen (Board), Tom Mahaney, Kendell Milton, Bruce Ventura

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Suzanne Sundell (Administrative Assistant.)

II. MINUTES

May 5, 2014

Motion by Bohjanen, seconded by Ventura, to approve the minutes as written. Ventura commented that they were very thorough and captured the essence of the meeting.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Ventura, seconded by Mahaney, to approve the agenda as written.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Gary Walker, 765 Lakewood Lane – he has had several people approach him about the opening burning ordinance. We do not have the opening burning section on our website, so our citizens may not be aware of them. The opening burning section deals with burning of brush and trash. He notes that the ordinance does not provide for any penalties if you violate. This will be showing up in the agenda next week for the Joint Meeting in response to some of the complaints that he has had on fires being unattended. His suggestion is that the language be removed from the Zoning Ordinance and be made part of a Public Safety Ordinance – enforced as a civil infraction with fines by the police so they can handle after hours issues. It is a safety issue – around 3-4 times a year Walker investigates fires down the beach from his property to make sure the fire is out. There was an incident about 4 or 5 years ago where someone burned about a half a mile of beach grass. The beach grass isn't that big of a deal, but if the fire ever gets back into the jack pine our Fire Department would have a hard time dealing with it. This is a heads up that there are some citizens who are concerned.

Woodward added that the current applicable penalties are those that apply to any violation of the zoning ordinance, which can include a municipal civil infraction. She agrees with the separate ordinance suggestion, and noted that this issue is on the list of Planning Commission priorities for this year.

VIII. NEW BUSINESS

A. Discussion of Master Plan Chapter 7 partial

Woodward said she went through the Master Plan and pulled out the opportunities that the Planning Commission had identified that relate to action steps. Woodward completed the sections on economy, energy, fiscal sustainability (both community and household), transportation (both community and household), water and wastewater. There are still more sections she needs to go through and pull out the strategies. She wanted feedback on format, vision statement, policy statements, and strategies. The strategies have been divided into administrative strategies, regulatory strategies, and capital improvement projects. This way, staff and officials would look under “administrative strategies” for their tasks, zoning changes would be identified in “regulatory strategies”, and capital projects would all be in one section.

Bohjanen, regarding Page 111, list of acronyms for topic areas – he would like the full description for the acronyms to be more readily available while reading the strategies. Woodward suggested that she put “**Economic Development**” above the first occurrence of the words “**Strategy ED-1**” and “**Energy Infrastructure**” above the first occurrence of the words “**Strategy EN-1**” and so on. This format was agreed upon, while leaving the master list and the descriptions in the text.

The Commission discussed the vision statement. Mahaney questioned what “**built environment**” refers to – Woodward and Commissioners indicated that it pertains to anything that people have built or caused to be created, such as roads, utilities, parks, subdivisions, anything manmade and anything other than natural. Woodward felt that it was important to stress the word “**collaborations**” because that is essential to achieving anything in the Township. Regarding “**active, informed citizenship**”, there are a lot of strategies that deal with educating and engaging the public. Woodward felt it was also importance to work for the benefit of the Township and also the region.

Ventura felt that it was a good statement – he questioned the word “**inspiring**” – and suggested “**inspired**” instead. Change to “**...promotes collaborations between inspired, responsive leadership...**”. Sikkema indicated that they do talk about business environment in the Master Plan. So he wondered if something should be added to the Vision Statement. Add in bold “**... natural places, the built environment, the economic climate, and the people ...**)”

Page 106, Policy 4: “look at public places in ~~the~~ a new way ...”

The Commission discussed Policy 6 which encourages a more diverse revenue stream that is not dependent on property taxes for the Township. Meister wondered about the type of taxes – he is not in favor of income taxes. Woodward stated that income taxes were not discussed in the Master Plan – other options include special assessments, Corridor Improvement Authority district, etc.

Policy 7 – **Bullet #2**, Ventura suggested “*Create a more walkable and bike-able community*”. **Bullet #8** – Bohjanen questioned the “avoid strip, leap-frog, or sprawl development patterns” – he feels that in a township with as much area as ours, having isolated islands of minor commercial is not a bad thing. Sikkema asked Woodward where the statement came from – Woodward indicated it was part of the “Smart Growth Principles”. Bohjanen’s argument was that you will never have a “walkable community” that includes such places as Shot Point and Downtown Harvey. Sikkema indicated that the Township has multiple cultures – Harvey (somewhat urban) to extremely rural. It’s not a real homogenous community, and not all statements apply to all areas. For example, you can’t be a 100 percent walkable or bike-able community. Ventura also indicated there is a difference between a development like Kassel’s Korner that serves the Beaver Grove community and a strip mall. Kassel’s is community based/oriented and the other is not – the shareholders probably live elsewhere and you could end up with a lot of infrastructure problems and little return. Sikkema thought that this could be clarified per area in the Strategy portion. **Bullet #9**, Bohjanen thought it may help to add additional wording to the end of the sentence “...*conserve energy, encourage affordability, and promote neighborhood-serving commercial services*”.

Policy 8: Priority Decision Criteria – 14 listed. Sikkema mentioned that **Criteria 7** and **Criteria 12** both mention collaboration, but neither mentions consolidation. Woodward asked for clarification on what he meant by consolidation. Sikkema indicated that on a State level they try to consolidate efforts, so multiple agencies are not trying to attain the same objectives. Ventura mentioned you can consolidate human resources, but still maintain diverse facilities. Change **Criteria 12** to read, “*To what extent will the project or activity improve and increase opportunities for partnership, or consolidation of efforts or infrastructure, with other jurisdictions...*”

Policy 9: Woodward stated that she had been talking with Steve Lawry, Township Manager, and one of the things that he mentioned was that you may have to look at funding something when the funds become available, even if that particular project is not high on your priority list. Another thing Lawry pointed out was risk mitigation – if it involves improving the safety of something that we have, it should become a higher priority. Woodward stated that Lawry sees these as being additional criteria for recreational decisions. Ventura stated that funding availability and safety should be an over-arching concern no matter the nature of the decision. Woodward mentioned that safety is indicated in Criteria 4 of the Priority Decision Criteria. Addition to the title of Criteria 4 – “Strengthen Critical Systems and Public Health **and Safety**”.

Sikkema also pointed out that funding should not become its own criteria, because project decisions should be based on need, and not be driven by availability of funding. You should only look for funding for the things that are in the plan. Sikkema stated that he believes the purpose of the criteria is that you have 10 projects, and then find out you can get funding for #10, so then it moves to the head of the line. He doesn't feel you should start adding things to the plan just because someone will give you money for it.

Bohjanen indicated that the Recreation Plan already lists projects by priority for the next 5 years, with associated criteria. Woodward stated that in the Recreation Plan, projects are listed by the year that we would plan on doing them, but they are not necessarily prioritized. The general consensus was that a project that received funding would obviously automatically get moved up in importance. It was decided that **Policy 9** should be changed to: *"In addition to the Priority Decision Criteria, the criteria of the Recreation Plan apply to recreation decisions."* **Criteria 1 and Criteria 2 will be deleted.**

Woodward mentioned that Policy 10 should also be in the Recreation Plan. She will further research this, and if so, will restate Policy 10 similar to Policy 9. Otherwise, she will leave as is. However, Woodward indicated she does not know if every land acquisition decision is related to recreation and would therefore be included in the recreation plan. Ventura thought that Policy 10 could stay because it addresses land acquisitions. It was decided to leave Policy 10 in place – Ventura stated it may be unlikely that the Township will acquire land, but if there is an opportunity, there would be criteria in place. This criteria deals with "open space/natural area acquisition".

Policy 11 – Ventura asked Sikkema and Smith to explain how this policy about road capital preventive maintenance makes sense. Sikkema indicated that most capital maintenance is based not on age, but upon existing conditions and problems. Bohjanen asked about road ratings. Sikkema said the rating relates to road condition, and you're trying to keep them in good condition. Sikkema wasn't sure about the statement **"two years after the structural improvement"**. It depends on what you see. The concept of capital preventive maintenance was discussed. Ventura compared it to painting his older house as opposed to painting the new garage – this seems to be saying to paint the newly constructed garage and let the house deteriorate because it's older. Ventura asked if there had been studies that this was the most economical way to do this. Sikkema said yes, if you have limited funding. He said it depends on expected remaining life of the roadway. You wouldn't reconstruct a roadway that has 5 more years expected life. Instead, you'd keep the other roads from needing reconstruction, then reconstruct that one after the 5 years. Sikkema asked that Woodward discuss this with the Road Commission for better wording of this policy, and then present to Planning Commission again.

Policy 12 - Sikkema indicated that he would add one more bullet – **"Remaining service life"**. These criteria should also be explained elsewhere.

Ventura pointed out that Policy 11 is talking about preventative maintenance, and Policy 12 is talking about reconstruction.

Chocolay Township Strategic Plan – Bohjanen wondered about the meaning of “**Community Fiscal Sustainability**”, and asked for an example. Woodward stated it relates to the section on Local Government Financing.

Sikkema asked about “**Household fiscal sustainability**” and how it relates to the Township. Woodward stated that comes from Chapter 5 – the first section is household resilience. Commissioners felt that it isn’t something over which the Township has any control under the current governmental system. Woodward stated we could do education and support. It was decided to delete “**Household fiscal sustainability (FH)**” as a strategy category.

Strategy ED-1 – Sikkema asked what is re-localization. Woodward stated it was about strengthening the local economy. Ventura asked what is reskilling and indicated there is no such word as reskilling. On **Strategy ED-1.3**, change “**reskilling**” to “**retraining**”.

Strategy ED-1.7 – Sikkema is not sure that a government agency should be involved in creating local currencies – Ventura stated that it’s promoting a barter system – the US government is the only legal currency in the U.S. Meister also questioned the legality of this. Woodward discussed the concept of a “time bank”. Sikkema stated that unless they are claiming it as income, it’s illegal. Bohjanen did not think we could encourage a quasi-legal or illegal activity. It was decided that **Strategy ED-1.7** be **deleted**.

Strategy ED-1.11 – Business welcome packets – good idea. Sikkema wondered if CABA already does this. Woodward stated that CABA is not active right now. Leave **Strategy ED-1.11** as is. It was then brought up that CABA is mentioned in **Strategy ED-1.14**.

Strategy ED-1.14 – Since CABA is not currently active, Woodward suggested that “*In association with Chocolay Area Business Association (CABA) ...*” be replaced with “***In association with area business groups ...***”

Strategy EN-1.1 – Fuel fund – Sikkema wondered about the State already doing this with heating assistance. Woodward stated that this was more of a buffer for Township fuel use.

Strategy EN-1.2 – Emergency fuel resource – Sikkema noted this goes beyond governmental needs. Bohjanen noted the Township could sell fuel to these critical user groups. Sikkema said MDOT doesn’t keep fuel, but rather has agreements with other private providers to hold it in reserve for them. Change “*Establish ...*” to “***Arrange for ...***” an emergency fuel resource.

Strategy EN-2.3 – Milton doesn’t like this strategy. Bohjanen questioned use of “volunteers” – Woodward said staff won’t have time to do this. Ventura thinks there are programs like that already (Semco and power companies) to identify excess

energy use in buildings, and they include energy efficiency incentives (Federal, State). He doesn't know how you would get volunteers to go out and do those types of assessments. It takes equipment and training. It was decided that **Strategy EN-2.3** should be **deleted**.

Strategy EN-2.5 – Energy bonds – Public Act 270 gives the Township authority to issue bonds and special assessments to finance energy upgrades. Woodward stated that this Strategy just says to investigate the opportunity.

Strategy EN-2.6 – Discussed offering of tax incentives for renewable energy improvements. Gary Walker, Township Supervisor, indicated that he doesn't think we have the authority to fail to update assessments by ignoring improvements – there are strict State assessing guidelines. The Federal government does it through legislation. Mahaney said maybe it would just be a short-term delay. Woodward noted the tax increase might happen along with a future property sale when the improvements contributed to increased property values. Woodward will check with Township Assessor to see if we can legally do this.

Strategy FC-3 – Discourage short-term leases for long-term facilities. Bohjanen mentioned as an example that a long-term lease rather than a five-year lease would have been ideal for the Chocoley Community Farm, because you can't plant trees and expect to only have a five year lease.

Strategy TH-1.3 – *“Work with the City of Marquette ...”* change to ***“Work with nearby jurisdictions ...”***

B. Discussion of future land use and zoning

Woodward discussed future land use categories for the future land use plan, stressing the fact that this is not zoning, this is future land use. They don't have to be the same categories. She started with the character areas developed for the Master Plan Survey, which relates to current land use. Woodward suggested adding some “Mixed Use” areas to be consistent with the Master Plan, and possibly areas of “Mixed Density Residential” would include such things as single family, multi-family, etc. Smith asked if there was a current “Rural Residential” – Woodward indicated that we do not have a Rural Residential zoning district, but could incorporate that into the future land use. Woodward stated that the character map relates to what is already there, whereas future land use looks forward to what you want it to be.

The Commission discussed the purpose behind changing the zoning districts, such as consistency with the Master Plan, particularly the recommendation to add mixed-use areas and perhaps more commercial and industrial. They also discussed the purpose of the future land use map. Ventura said it makes sense to base the future land use map off the character area map.

Mahaney wondered about the end result – Woodward stated that it would guide the future zoning. He discussed a reactive approach as proposals come in. Mahaney doesn't agree with telling people what they can do with their property. Sikkema said

that's what zoning is – you are trying to protect property values. For example, people have to know what land uses might arise in the future so they feel their investment is protected. Woodward said that needs have been identified in the planning process, and we are trying to determine how to satisfy those needs. We have to be able to allow some development to occur. Sikkema said, for example, the Commission had discussed allowing neighborhood-serving businesses like Kassel's in other areas, but currently zoning does not allow it, and it might be beneficial to the community. Meister said a corner store is a good idea to support a walkable community, and they existed historically. The discussion resulted in the thought that foresight (through zoning) and buffering are important.

Woodward and the Commission discussed examples of future land use categories: Village mixed use (in the Harvey area with sewer, may see commercial with residential apartments above); Cluster mixed use (for example at Kassel's or the Varvil Center); Village residential (Harvey); Commercial/Light Industrial; Industrial; Primary working lands (forest and agriculture areas that may have homes at a very low density); Primary recreation; Rural residential; Sub-rural or Sub-urban residential. Sikkema asked what allows the future land uses to happen – doesn't zoning allow those land uses to happen? The number of future land use categories in relation to the number of zoning districts was discussed. To accommodate the future land use plan, you could either modify the zoning districts or modify the uses allowed in existing zoning districts. Mahaney wondered if this would increase the tax base. Woodward said that is one of the goals of the Master Plan.

Sikkema doesn't understand why we would redo zoning – there is no push.

Bohjanen stated there's a whole corridor that is not being developed because of restrictive zoning. A use may fit with our Master Plan and the location, but people have to go through a lot of hoops to accomplish that. Bohjanen thinks Woodward is trying to make it a simpler process, and the Master Plan says we should. He said when the zoning ordinance began, people zoned for the time, not for the future. Then they rezoned for the time, not for the future. He thinks Woodward is asking that they rezone now for the future.

Woodward said the Michigan Planning Enabling Act requires a Future Land Use plan and a Zoning Plan to be included in a Master Plan, whether we change the zoning or not. She was putting together a draft for the Joint meeting between the Board and the Planning Commission on Monday.

Ventura suggested the starting point be the character areas that relate to current land uses. Some residential areas may be able to be combined into one single-family residential land use.

VIII. UNFINISHED BUSINESS

None

IX. PUBLIC COMMENT

Woodward pointed out that there had been some written public comment received which was included in the packet. Sikkema encouraged all members to read the written public comment and consider them in deliberations.

X. COMMISSIONER’S COMMENT

Mahaney commented that when going through the Master Plan, it struck him that in the event of a natural disaster, the Township should consider assisting businesses that are essential to the Township, such as food storage, gas stations, etc. Woodward said she will consider this when putting together the strategies for that section.

Smith commented that UP Central Trails is a 501(c)3 organization that grooms snowmobile trails through grants. They groom from the Carp River to Chatham – the Chatham to Gwinn area has been under fire the past few years due to land control and changing ownership. UP Central Trails has been working with the DNR and the Forest Service to get a trail from Dukes, essentially down the old railroad grade that’s been abandoned by the Forest Service, come out at Mangum Road, cross Mangum, and head up Section 11. It’s all either State or Forest Service trail. Have been working on this since 2011, and finally have confirmation from the Forest Service. New trail will be built from Mangum Road (seasonal road) straight north to hit the existing snowmobile trail. This will be a north/south route connector for the snowmobile trails. No further comments.

XI. DIRECTOR’S REPORT

Woodward stated she had given the Planning Commission information on the Right To Farm Act Site Location GAAMP. This is given so that they can start reading for the discussion on agriculture regulations. The changes open up the door for our community to regulate some agriculture without being pre-empted. It’s going to be even more important to figure out what the community wants.

ADJOURNMENT

Sikkema adjourned the meeting at 10:00 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

SPECIAL MEETING
CHOCOLAY TOWNSHIP BOARD
CHOCOLAY TOWNSHIP PLANNING COMMISSION

June 9, 2014

A Special meeting of the Chocolay Township Board and Chocolay Township Planning Commission was held on Monday, June 9, 2014 at the Chocolay Township Office, 5010 U. S. 41 South, Marquette, MI. Supervisor Walker called the Township Board meeting to order at 7:00 p.m.

PLEDGE OF ALLIGIANCE.

Planning Chair Andy Sikkema called the Planning Commission meeting to order at 7:00 p.m.

TOWNSHIP BOARD.

PRESENT: Gary Walker, John Greenberg, Max Engle, Mark Maki, Susan Carlson, Richard Bohjanen.

ABSENT: Judy White.

TOWNSHIP PLANNING COMMISSION.

PRESENT: Andy Sikkema, Tom Mahaney, Bruce Ventura, Eric Meister, Andy Smith (arrived at 7:25 pm), Richard Bohjanen (also on Township Board).

ABSENT: Kendell Milton.

STAFF PRESENT: Steve Lawry, Kelly Woodward, Mary Sanders.

AGENDA.

The purpose of the Special Township Board/ Planning Commission meeting is to discuss future land use planning and zoning, Chocolay Community Farm license, Recreation Plan project priorities, Open Burning, Junk and Blight Ordinance revisions and Planning Commission priorities and performance.

Engle moved Carlson seconded to approve the agenda as amended and move Assignment of Chocolay Community Farm License to the first item on agenda.

AYES: 6 NAYS: 0 ABSENT: 1 MOTION CARRIED.

PUBLIC COMMENT.

Amy Conover, Superior Sustainability introduced herself.

ASSIGNMENT OF CHOCOLAY COMMUNITY FARM LICENSE.

Trustee Maki had questions on identification signage for the Chocolay Community Farm. He also felt that this was an increase in intensity from the past use of one person planting and harvesting the entire parcel of land. He feels this should go to the Zoning Board of Appeals as a non-conforming use of the property.

Planning Director Woodward stated that if structures were added, it would need to go to the Zoning Board of Appeals. This is still being used as farming, so the use has not changed and there is no need to go to the Zoning Board of Appeals.

Carlson moved Bohjanen seconded to approve the proposed license agreement with Superior Sustainability, which is a project sponsor for the Chocolay Community Farm Collaborative, as presented.

AYES: 6 NAYS: 0 ABSENT: 1 MOTION CARRIED.

FUTURE LAND USE PLANNING AND ZONING.

Planner Woodward explained to the Board that the Planning Commission is at the point in the Master Plan that focuses on the future land use plan, which is meant to be a depiction of future (20 years or more) uses of land.

Township Board and Planning Commission discussion on future land use:

- This is a long range look at zoning and we need to decide if we want to make changes in zoning or keep status quo.
- Comments from the majority of Township residents have been to preserve the rural character. There does not seem to be a large push for additional commercial.
- This is the struggle the Planning Commission faces; residents would like to see some commercial growth on M-28 and U S 41, but not change the rural feel of the Township.
- Do realtors inform us that they hear of a need for more commercial property in the Township?
- Items that discourage business in Chocolay are the size and shape of available parcels, zoning, and infrastructure (lack of a water system).
- Plan for places to allow a small amount of change, which is inevitable unless you chase it away. This is needed to support revenues.
- We should look at allowing multi-use in the existing commercial district. Allow a business on the bottom floor of a building with apartments above. Also multi-family development in the sewer district.
- Comments from the survey show a wish to retain young people and retain retirees looking to move out of the family home. This would require more apartments/condos and a zoning change.

- The City of Marquette takes a proactive approach to attract young people, such as providing transportation options.
- Clusters of small businesses supported by the residents that live nearby can be considered.
- Light industrial needs to be looked at before it happens on its own without forethought.
- Form based zoning could allow Commercial and Light Industrial in the same building near residences. This supports businesses with increased activity. It's about progress that won't change character.
- We need to control the area for an Industrial Park off a major road. See how other communities are creating these areas.
- There are different scales and types of industrial activity. Fraco is a great example of Industrial near residential. It is very well buffered.
- Revisit the Future Land Use map of the 2005 plan to determine changes.
- Government is not a great economic developer; it should be driven by the private sector.

The Board consensus was for the Planning Commission to continue to look at Mixed Use Zoning.

RECREATION PLAN PROJECT PRIORITIES.

A Recreation ranking document for the Master Plan was presented. The Board has a deadline of July 21, 2014 to make comments on the Recreation Plan Project Priorities; the comments will be forwarded to the Planning Commission for the August 4, 2014 meeting.

OPEN BURNING, JUNK AND BLIGHT ORDINANCE REVISIONS.

Supervisor Walker presented a suggested Outdoor and Open Burning Ordinance for Chocolay Township. The thought is to have a separate Ordinance dealing with Outdoor Burning separate from the Zoning Ordinance. Public Safety, Police and Fire Departments would handle the enforcement.

Township Board and Planning Commission discussion on an Outdoor and Open Burning Ordinance:

- Will campfires be allowed at the M-28 Turn outs or just private beaches?
- Buckets could be available at the turn outs for extinguishing camp fires.
- Contractors have difficulty disposing of large stands of trees from excavating at building site.
- We could add a clause that would allow commercial burning by conditional use permit in AF district on large parcels where it would not disturb the neighbors. Buffers are more important than the parcel size.

The Board concurred to add language to the ordinance to include our Police Department and Fire Department for enforcement, to allow camp fires at the M-28 Turn Outs and to add wording to allow commercial contractors to burn logs taken from development sites. This will appear on the Township Board June 16, 2014 agenda and will then be forwarded to the Planning Commission.

Township Board and Planning Commission discussion on Junk and Blight:

- The current Ordinance allows any number of vehicles on a piece of property as long as they are licensed. There is a forever license plate that can be purchased for \$75.00 and can stay on a vehicle forever. This could cause problems to our ordinance as it stands.
- Cargo trailers are also becoming a problem and are not addressed in the Ordinance.
- Damaged and deteriorated structures also need to be dealt with. How long should a non-functioning building be allowed to stand? Should we consider demolition permits to help control this?
- This ordinance is hard to enforce. We need to make it easier to enforce.
- How many times have we gone to court over vehicle issues? The Board needs to see photos of situations that the Ordinance does not address. Bring a list of specific problems pertaining to this Ordinance to the Board before we can move on this issue. This might include the storage of multiple RV's on a property, multiple licensed trailers and vehicles, etc.

DISCUSSION OF PLANNING COMMISSION PRIORITIES AND PERFORMANCE.

Andy Sikkema, Chairman of the Planning Commission said they are trying not to take on so much, so they may not be able to take action just because someone asks in public comment. He presented the following priority list to the Township Board.

- 2014 Recreation Grant application
- *Finish the Master Plan update*, including prioritization of projects
- Finish unfinished proposed zoning ordinance amendments
- Reconsider the "Accessory Homesteading Activities" regulations after evaluating public input
- *Junk car and blight ordinance updates*
- Asset Management Plan for Township roadways
- Consider need to amend burn regulations
- Necessary updates to the Lot Split and Land Division ordinances

Comments made by the Township Board to the Planning Commission:

- The Planning Commission should address Private Road regulations. There are concerns about allowing four lots off one private driveway, even with the 66' easement requirement. There are no construction requirements. This is a safety

issue for Police and Fire emergencies, especially when properties are not appropriately addressed.

- Homes on private roads should have fire numbers.
- The Commission discussed concerns relating to seasonal rentals and site plan review not having a provision to notify neighbors.

Supervisor Walker thanked the Planning Commission for their thoroughness and consideration of issues. He very much appreciates their hard work. The Board agreed with his comments.

PUBLIC COMMENT.

Karen Alholm, Zoning Board of Appeals member introduced herself to the Board. She is running for County Commission District 6 (vacated by Greg Seppanen).

Tom Mahaney, Planning Commission member commented that we cannot get the Third Street business feel in Chocolay Township due to traffic speed on the business corridor.

Supervisor Walker adjourned the meeting at 9:45 pm.

Max Engle,
Clerk

Gary Walker
Supervisor

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, July 7, 2014

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:32 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Richard Bohjanen (Board), Kendell Milton, Bruce Ventura

Members Absent: Tom Mahaney

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES

June 2, 2014

Motion by Ventura, seconded by Milton, to approve the minutes as written.

Vote Ayes: 6 Nays: 0 MOTION CARRIED

June 9, 2014, Special Meeting Township Board and Planning Commission

Motion by Meister, seconded by Smith, to approve the minutes as corrected. Page 3, last bullet, change the word "that" to "than".

Vote Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Bohjanen, seconded by Ventura, to approve the agenda as written.

Vote Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Deborah Mulcahey, 633 Lakewood Lane – Commenting on the proposed burn ordinance. She thinks the Township really needs to educate the public, visitors, and part-time residents. She suggested the following considerations: Section 2.1 – she perceives a problem with this section related to bonfires used to cook food. Section 4 – there are differing perceptions of "small" in relation to the definition of "campfire". She thinks differing officer perspectives will lead to enforcement difficulties so "small" needs to be defined. She said construction and demolition waste can't be burned according to State law. Section 4.9 – she feels it's hard to quantify nuisance fires in relation to odor because of differing perceptions. Section 6 – Public Act 102 of 2012 is very restrictive regarding burning of refuse. Section 6.2.5 and 7.1.7 – she thinks there's a problem with defining "competent" person. Section 7.1.3 – she thinks we should add that visibility won't be impacted on trails. Section 11, Liability section – should add the word, "person STARTING, . . . a fire". Section 12.1 – it should not read "his/her", it should read "their". Section 12.2 – How do you determine the application of a minimum vs. maximum fine? Section 12.3 costs – enforcement costs will be extensive, and often greater than \$500. She thinks the recovered costs should be reflective of true costs, based on hours

involved and salary/benefit levels, so the community doesn't incur the costs. She said the Planning Commission should again consider differences in the location of "front yard" for lakeside residences and the relationship to appropriate regulations.

Dick Arnold, 312 West Branch Rd – Was happy about the disappearance of the crane from the Hotel Place property. He encouraged the Planning Commission to protect residential areas. The house is most people's biggest investment.

Laurie Krzymowski, 741 Lakewood Lane – She expressed her negative experience with a bonfire of leftover building materials, brush, and refuse at a neighbor's house. She said the fire was 12 to 14 feet tall and 10 feet in diameter, burned for three days, and was not extinguished by the property owner. The police weren't able to ticket the property owner based on current regulations that classified it as a campfire. She showed pictures of what she does not consider to be a campfire, and noted the special risk of fire reaching the tall pine trees and beach grass. She thinks the police should enforce a size limit for fires that is related to the typical size of a fire ring, or human size (campfires should not be taller than a person). She said people can cut their fuel to be of more reasonable size. She noted the risk of injury to people walking the beach where fires are not fully extinguished, especially since the local hospital does not have a burn unit. She thinks people that have unattended fires should be automatically ticketed, and that recreational burning should not be allowed between 1:30 am and 7 am.

VII. NEW BUSINESS

A. Open Burning Ordinance

Woodward said the Township Board has reviewed the proposed ordinance. They asked the Planning Commission to review the ordinance, hold a public hearing, and submit recommendations.

Sikkema asked Woodward to clarify the role of the Planning Commission in relation to a public safety ordinance such as this, as opposed to the Zoning Ordinance. Specifically, he asked if the Township Board can approve this ordinance without Planning Commission input. Woodward said she was not sure, but the Board has asked for Planning Commission input. Gary Walker, Township Supervisor, said that as he understands Township history, the Planning Commission reviews all proposed ordinances. He said the Board does not have to hold a public hearing on the ordinance if the Planning Commission holds a hearing. Ventura asked why the Board isn't conducting the public hearing if they are the ones approving the Ordinance. Walker said, "for the same reason the Planning Commission holds public hearings on zoning amendments, which are also approved by the Board." Walker said the Board can hold a public hearing, but doesn't wish to. He clarified that there is a requirement that a public hearing be held, but it can be held by either public

body.

Meister asked for clarifications about the permit process, and what constitutes a permit. Sikkema noted that it's like "permit by rule" – the permission to burn is granted by the DNR by a posting on their website. It is not necessary to submit an application, and no one is issued a written permit. Woodward noted the DNR permit only applies to open burning of leaves, brush, trees, and other vegetation. Sikkema clarified the permit also does not apply to recreational campfires or bonfires.

The Planning Commission reviewed the marked-up version with Planning Director comments – the marked-up version is based on the text as approved by the Board to send to the Planning Commission, and also contains modifications suggested by Woodward. All of Woodward's modifications were accepted except as noted hereafter.

The Commission discussed the definition of "campfire" and the public comment received. Bohjanen said he agrees with public comment on the concept of size, and he doesn't understand what a "small bonfire" is, when by definition a bonfire is a large fire. Sikkema said he can see why location would be relevant in relation to size of fires. Bohjanen said if you are going to allow campfires without a permit, a size limit seems reasonable. Sikkema asked if this would relate to the size of the flame or the size of the fuel pile. Bohjanen was more concerned with diameter than height. Ventura said the height of the fire will depend on the fuel, and fires of the same diameter may have differing burn heights. He thinks that if we implement a size limitation, it should be easy to measure and enforce. Walker said a campfire does not require a permit under State law. He did not find a size limitation in any model ordinance. He does not think the term as currently defined will present a problem to legal defense in Court. He thinks there are ways for officers to distinguish between recreational fires and those meant to dispose of materials, which are both allowed under the ordinance, but one requires a permit. The ordinance also says fires must be attended. Sikkema asked if the Commission wanted to better define the size of campfires, or trust to discretion. Milton said his definition of a campfire is something you can be close to and cook over. He thinks police or other public officials would be similarly able to distinguish a campfire. Meister was in agreement with this. Bohjanen said he agreed as long as Section 7.1.5 is modified to delete small bonfires as follows, "Outdoor campfires ~~and small bonfires~~ for cooking, ceremonies, or recreation are allowed provided they do not cause a nuisance." This change was accepted by the Commission.

Pages 1 and 2 were accepted without change. Sikkema questioned if the definition of nuisance fire would allow someone to complain about any smoke, even smoke from clean wood, as a nuisance. It was agreed that this could also be left to the enforcement officer's discretion, and was noted that the materials that would cause a nuisance are prohibited for burning.

The Commission discussed the new prohibition on open burning of refuse from a

commercial or industrial establishment and supported it.

Sections 6.2 and 6.3 are identical to the current provisions of the Zoning Ordinance, and no changes were made to these sections.

Section 7.1.3 – the Commission considered adding trails and public beaches to those areas where fires shouldn't create adverse effects such as health or visibility hazards due to wind and weather conditions. They discussed whether DNR restrictions are sufficient to protect against these nuisance impacts, and whether or not this should be enforced by the Township. Walker said the DNR doesn't enforce their restrictions. This provision enables the Township to enforce sensible restrictions related to local wind conditions. Smith suggested eliminating the words "on roadways or railroads" so the provision will be encompassing of all areas, including trails and public beaches. The provision was changed as follows: "All allowed open burning shall be conducted in a safe, nuisance-free manner, when wind and weather conditions minimize adverse effects and do not create a health hazard or a visibility hazard ~~on roadways or railroads.~~"

Section 7.1.4 – regarding the provision that burning take place only on the property on which the materials are generated. It was interpreted that this means you could not remove materials from one property and burn them elsewhere. This is a difficulty for excavators. Bohjanen said there had been some discussion of amending the zoning ordinance to allow this type of burning in some zoning districts. He suggested deleting this provision. If this type of burning was conducted, the nuisance provision would address it. Walker said this provision was not intended to address the burning of materials from excavations, it was meant to assist in limiting the size of burning that would typically occur. For example, it would not allow someone to combine materials from his neighbor's property with his own materials, resulting in a larger burn. Sikkema thought it would be difficult for a police officer to determine where the materials come from. Meister said his neighbors ask to burn their Christmas trees on his property where it's far away from other homes. Smith said there are other properties where larger burns could occur without being a nuisance. The Commission agreed to delete Section 7.1.4.

Section 7.1.8 – regarding no burning on the ice of a lake, pond, stream, or waterbody. Smith asked about the impact of this provision on people who are out ice fishing and have a small campfire. Ventura asked if the DNR addresses this issue. Smith suggested taking out that part of the provision. Meister said you could prohibit this except for campfires. Woodward will reword this to except campfires from the prohibition to burn on the ice.

Sikkema said Section 10 means that if you're going to burn anything that's not in a burn barrel, or a campfire, or a fire in your house, you have to get a permit from the DNR. This was acceptable to the Commission.

Section 11 – Liability. Woodward reminded the Commission of the public comment on this item. Ventura said arson would become a civil infraction instead of a felony.

Sikkema asked Walker about liability costs – are these liability costs to the Township, or does this get the Township involved in private matters? Walker said this provision would not make us a player in private matters. You could sue your neighbor for starting your field on fire, and this provision of the Ordinance would probably assist you in doing so. Sikkema asked if this would obligate the Township to assist in private liability matters. Ventura made the point that if a firefighter was injured on the job, that's not a cost of fire suppression, but it's still a government-related cost or liability that the person starting the fire should be held responsible for. Sikkema said he has no problem with the Ordinance enabling the Township to recover their costs, but doesn't think that should extend to a civil matter between two neighbors. Ventura agrees, but doesn't think this should be limited to fire suppression costs. Walker suggested a change to add one word, "and any other TOWNSHIP liability". This change was accepted.

The Commission discussed Section 12.2, minimum and maximum fines and the public comment. Sikkema asked if this is common in Township ordinances. Walker affirmed you can have either a set amount or a range. The judge has the discretion to levy a fine within this range. The police issue a citation of violation, but the judge determines the fine amount. Woodward said her understanding of the public comment was that the speaker thought the fines should better reflect true costs. Walker said this section is not related to cost recovery. It's a penal fine. Cost recovery would come under another action. Walker said he thinks the most common violation will be unattended fires.

There was no further discussion.

Bohjanen moved, and Milton seconded, to accept Ordinance #59, the Charter Township of Chocolate Outdoor and Open Burning Ordinance, with modifications, and to hold a public hearing on this proposed ordinance at the August meeting.

Meister asked about the approval process, and what would happen if the Board changed the proposed ordinance after the public hearing, and if another hearing would be needed. Walker said an additional public hearing would only be needed if a fundamental change was made. Walker said with the good changes the Planning Commission has made, he wouldn't anticipate such a change from the Board. Woodward said the Township Manager anticipated the public hearing would be held at the Planning Commission meeting in August, and the Ordinance would be before the Board for a first reading in August.

Vote Ayes: 6 Nays: 0 MOTION CARRIED

B. Amendment of Zoning Ordinance – remove open burning provisions

Sikkema explained that this agenda item is to vacate portions of the Zoning Ordinance that have been proposed to be moved to Ordinance #59, the burn ordinance.

Bohjanen moved, and Meister seconded, to delete Section 6.5(D), items 1-3, from the Zoning Ordinance, to send it to the County for review, and to hold a public hearing on this zoning amendment at the August Planning Commission meeting.

Vote Ayes: 6 Nays: 0 MOTION CARRIED

VIII. UNFINISHED BUSINESS

A. Discussion of Master Plan Chapter 7

Woodward said she had highlighted the new portions of Chapter 7.

No changes to pages 108. Page 109, delete the bullet, "Avoid 'strip', 'leap-frog', or 'sprawl' development patterns which promote inefficient use of land and energy resources," as being contradictory to the next bullet, "Promote compact or cluster development patterns that preserve natural and recreation areas, conserve energy, encourage affordability, and promote neighborhood-serving commercial services". Allowing some development in other portions of the Township, such as Beaver Grove, might be interpreted as leap-frog development.

Page 110-111, and 113-114 no change. Page 112, switch Priority 3 Energy System and Priority 4 Public Water Supply System. Order of priority is now #1 Sewer, #2 Roads, #3 Public Water Supply, and #4 Energy.

Page 115, Strategy ED-1.2, change the word "reskilling" to "retraining".

No changes to pages 116-117. Page 118, Strategy GN-4, change the first "and" to "as". Page 119, Strategy NS-3.1, change the word "basic" to "basin".

Sikkema asked about the purpose of strategy LU-1, "Work with area experts to plan for the future management or replacement of jack pine areas". Woodward said that the jack pine represents such a fire hazard, and her thoughts were that any time a jack pine area was harvested, the Township should try to work with the owner to see if something else could be grown, especially if the climate continues to change.

Page 120, Ventura asked about Strategy PS-1.1, "Prepare and distribute educational materials regarding the importance of conspicuously posting addresses to facilitate timely emergency services". He asked why the posting of addresses is not required. Woodward said she thought the Township has an address ordinance that covers this, but it may not be enforced. The Board had discussed utilizing fire numbers, but it was determined to be too costly. Ventura is concerned about the instances where several homes share a driveway, making it hard to find the right home in case of emergency, especially at night. Ventura just thinks more should be done to ensure posting of addresses.

Sikkema asked about placemaking Strategy ED-3.6, "Ensure that regulations support the development of a four-season resort in appropriate areas of the Township." Meister said he's fine with the idea, but if this is commercial, could this be considered spot zoning? Woodward said it could be accomplished by Planned Unit Development (PUD). Page 125, Bohjanen asked about Strategy FS-2.5, "Amend the zoning ordinance to allow food marketing and distribution facilities (mobile or fixed) with appropriate restrictions in all districts." He wondered about "ALL" districts. Woodward said some districts might only allow mobile vendors, for instance. Woodward said the idea is to bring the essential food closer to neighborhoods. Bohjanen is ok with this since it says "with appropriate restrictions". Woodward said

the restrictions would be determined in the zoning amendment process. Sikkema asked about enhancing the capacity of water storage, and if that would involve dams. Woodward said no, it would involve watershed strategies to slow flow, preserve floodplains against development, etc.

No changes were made to page 120-130. Page 131, Strategy EN-4, change the word “probably” to “probable”. Strategy FS-1.7, change the word “City” to “Township”. Unused headers will be removed in the final draft. No changes to pages 133-137.

IX. PUBLIC COMMENT

Laurie Krzymowski, 741 Lakewood Lane – She told the Commissioners “thank you”.

X. COMMISSIONER’S COMMENT

Ventura will not be able to attend the next meeting. Meister suggested send out fire safety information, especially to those living along the Lake, to highlight the importance of extinguishing beach fires so they don’t injure people walking on the beach. Bohjanen said that a fire in the vicinity of Lakewood Lane might have the most economic impact, however, in terms of fire suppression, fires on inland properties south of M-28 might be much more difficult to contain and might burn much faster because of fuel load and lack of water supply. Sikkema mentioned that the lake bottom (high water mark) is public property, so one issue is like a fire in a park, and the other is fire on private property. Walker said there will be publicity for the ordinance changes, especially that you cannot have unattended fires, and that fires must be extinguished.

XI. DIRECTOR’S REPORT

Woodward said the next meeting will involve reviewing the future land use plan and other appendix maps and information.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

Planning and Zoning News

Attorney correspondence of July 7, 2014, regarding the Chocolay Community Farm

XIII. ADJOURNMENT

Sikkema adjourned the meeting at 9:30 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, August 4, 2014

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:30 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Tom Mahaney, Kendell Milton

Members Absent: Richard Bohjanen (Board), Bruce Ventura

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES

July 7, 2014

Motion by Milton, seconded by Mahaney, to approve the minutes as written.

Vote Ayes: 5 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Milton, seconded by Meister, to approve the agenda as written.

Vote Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Deborah Mulcahey, 633 Lakewood Lane – She thinks the Township really needs to concentrate on educating the public about the new burn regulations and the reasons behind them as this could alleviate many issues. She appreciated the FireWise information she received in a Township mailing. Mulcahey helped to educate a citizen who was burning dune grass. The citizen removed and was burning the dune grass because there wasn't enough beach. Mulcahey told her why the dune grass is important to stabilizing the dunes, and the citizen thanked her for the information.

V. PUBLIC HEARINGS

A. Draft Ordinance #59 Outdoor and Open Burning Ordinance

Deborah Mulcahey, 633 Lakewood Lane – She supports the ordinance and thanks the Commission.

B. Zoning Ordinance amendment #ZA001-14, deletion of Open and Outdoor Burning of Refuse and Brush regulations from the Zoning Ordinance

None

VI. PRESENTATIONS

None

VII. UNFINISHED BUSINESS

A. Draft Ordinance #59 Outdoor and Open Burning Ordinance

Milton suggested a change to the definition of "refuse". Insert words in bold,

“Refuse’ means any **combustible or solid** waste material except trees, logs, brush, stumps, leaves, grass clippings, and other vegetative matter.” The Commission accepted this amendment to the draft. There were no other changes.

Milton moved, and Mahaney seconded, that after holding a public hearing and considering public input, the Planning Commission recommends that the Township Board approve Ordinance #59 Outdoor and Open Burning Ordinance as changed.

Vote Ayes: 5 Nays: 0 MOTION CARRIED

The Commission discussed various ways to provide education. Mahaney was particularly concerned about education for new residents. Woodward suggested materials to be distributed in the Township office and on the website. She noted the Township has also distributed information along with assessment mailings to property owners. The notice of ordinance adoption will also be published in the newspaper. Mulcahey suggested placing a notice on the Township sign.

B. Zoning Ordinance amendment #ZA001-14, deletion of Open and Outdoor Burning of Refuse and Brush regulations from the Zoning Ordinance

Sikkema explained that this agenda item is to vacate portions of the Zoning Ordinance that have been proposed to be moved to Ordinance #59, the burn ordinance.

Meister moved, and Smith seconded, that after holding a public hearing and considering public input, and notifying the County Planning Commission of the proposed change, the Planning Commission recommends that the Township Board approve the deletion of Section 6.5(D), items 1-3 pertaining to open and outdoor burning from the Township Zoning Ordinance because a separate public safety ordinance has been drafted to address these issues.

Vote Ayes: 5 Nays: 0 MOTION CARRIED

VIII. NEW BUSINESS

A. Discussion of Future Land Use for the Master Plan update

Woodward explained the maps and descriptions that were included in the packet, and asked if there were any questions.

Sikkema expressed the thought that people live in Chocoday Township because of how it is, and said if we start expanding then people may not want to live here anymore. He said our existing mixed-use areas work very well, but he is cautious about opening it up in other areas. Mahaney said people live out here because they don't have the hustle/bustle of Marquette. Sikkema said people accept the inconvenience.

Meister asked for clarification on whether Sikkema is referring to the added uses in the AF district or the proposed clustered mixed-use. Sikkema said the corridor mixed-use makes sense, because they want redevelopment and it's not happening on its own. The existing commercial zoning may be restrictive.

Woodward explained that the only areas on the map representing newly proposed mixed-use are the M-28/Kawbawgam Road intersection (although the area currently

has a casino, apartment, and campground), CR480/Cherry Creek Road intersection, and a few larger parcels just east of the golf course which could be used for commercial uses that don't require large amounts of water. The areas designated for mixed-use expansion that already contain a mix of uses include the Beaver Grove area between CR480/Basal Road and Mangum Road, the area around the Varvil Center, and the area on Main Street between the condos and the multi-family development at Hotel Place, and including the Bayou Restaurant. This could be a small scale neighborhood mixed-use area.

Woodward urged the Commission to keep the principles in mind that were outlined in the Master Plan update, such as the value of having mixed-use nodes within walking distance of neighborhoods to better serve residents. This future land use map was intended to address that issue.

Sikkema said he thinks it's too much, too far out, and the public survey indicates people value rural character; too much commercial in more remote areas moves away from that.

The Commission opened this item for public comment.

Deborah Mulcahey, 633 Lakewood Lane – Said she appreciates her location in proximity to products and services, and the fact she doesn't always have to go in to Marquette. She does miss the ice cream store that was located at the corner of US41 – she thinks people liked this because the Township is a vacation area. She doesn't like to see the spread of industrial uses because everyone utilizes wells and septic systems, so we'd have to be mindful of the types of businesses that were going in. She understands the need for balanced growth, but retaining rural character is important to her. She supports mixed-use in the core since the buildings are already there, as long as the water and sewer system is capable of handling the development.

Gary Walker, 765 Lakewood Lane, said his assumption is that much of the US41 corridor is not zoned for residential. He understands and agrees that opening residential neighborhoods to mixed use creates potential sprawl problems, and may change the character, but zoning the US41 commercial corridor for a mix of apartments and commercial won't hurt the nature or character. He thinks it may enhance it. He said one of the problems we have is that there is a fair amount of underdeveloped or undeveloped land along the corridor. If something new came in, he would much prefer small shops with apartments than a large plot with storage buildings. This will help the character of the corridor.

Mulcahey said apartments above businesses would appeal to a certain demographic. She thinks storage uses would be appropriate if they are not the first thing people see coming in and out of the community. They should only be incorporated behind other uses or behind a vegetated buffer but not fences.

Dick Arnold, 312 West Branch Rd – He said the Commission should zone it to allow more uses and let the public determine what goes there. You can't dictate where a business will be successful. If you zone for a mix of uses, then the developers can decide what to build.

Sikkema asked Commissioners for their thoughts.

Mahaney suggested implementing the mixed-use along the corridor and keeping the other areas the way they are. If the development is concentrated there, it might force some redevelopment of blight.

Meister doesn't think mixed-use would be well accepted by the public at the Cherry Creek/CR 480 intersection. He thinks the Village Mixed-Use area might be a little extensive for the immediate future, but he can see how that could fill in with mixed-use in the future. He thinks the mixed-use zoning should be implemented in a smaller area (not all the way to Ortman and not so far out on M-28), but plan for the mixed-use to grow as the need grows. Perhaps show the future expansion in hashed red.

Smith is in agreement. He thinks some change is needed to accommodate developers and simplify the process. He watches the businesses struggle in the Moyle development, as evidenced by vacancies, and he thinks if they could have apartments above it might help the viability of the development.

Milton asked for clarification on where the Commission wants to keep the mixed-use designation. He asked how far back the mixed-use area would extend from the corridor? For the large parcels, is there a way that only a portion of the parcel could be mixed-use? He would like to see mixed-use next to the Class A highway.

Woodward reminded the Commission that the future land use plan is meant to address land use as much as 20 years into the future. The implementation through zoning ordinance changes can be phased. This will be outlined in the zoning plan. She said she incorporated the outlying parcels in the Village Mixed-Use area because they offer the only opportunity for development requiring larger parcels.

The Commission discussed each proposed mixed-use area, starting with the neighborhood mixed-use area at Kawbawgam. This was intended to include a mix of commercial, medium density residential, civic, and institutional uses near neighborhoods, but not industrial. Commissioners discussed what types of commercial uses might choose that location. Sikkema said M-28 and US-41 are the gateways to the community, and you want to present yourself as a nice residential, rural township. If people see warehouses and mini-storage businesses, they will think that's what the community is. For example, Marquette Township is perceived for the big box retail, not the rural landscapes on the way to Big Bay. He thinks the public perception is created by what they see on the corridor. Mahaney said this is a small frontage of M-28 that would be mixed-use.

Sikkema would want to see more rural residential because it's a scenic area along M-28. That's what people see and how the Township presents itself; people like it. He doesn't want that area represented by storage buildings and contractor yards (other areas are more appropriate). Mahaney reiterated the benefit of starting with the Village, because the businesses feed off each other. There are positive benefits of condensed mixed-use. Meister said it would be nice if they could accommodate a neighborhood convenience store, such as in the old bank building. It would serve

the community and not have a negative impact. Sikkema asked if that could be done through a PUD. Woodward said the minimum lot size requirement might need to be changed. She said the other option is to make a mixed-use building a conditional use in certain districts. Then it might go anywhere that meets the conditions. Sikkema said that's a good thought to implement the mixed-use. Woodward reminded the Commission that their task is to determine which uses are appropriate in the location, but not yet what mechanisms will be used to achieve those land uses. That will be outlined later in the zoning plan.

There was not much support for mixed-use at the Kawbawgam Road area or intersection of CR 480/Cherry Creek. Since the area adjacent to Lion's Field is already mixed-use, that was supported. The Commission discussed the Beaver Grove area. Sikkema said right now needs are met by the current zoning, which is mostly residential with some spot zoned commercial that is grandfathered. Smith and Mahaney said the area is actually mixed-use now. Sikkema said now you have chunks that are zoned exclusively residential, and this would open it up to commercial uses going in next to residences. If nothing is changed, then the commercial would be limited to existing parcels. Meister said that until municipal sewer and water is available he can't imagine much expansion. Smith said the water issue limits development east on M-28.

The Commission discussed water-oriented residential land use, which is mostly the same as the existing Waterfront Residential zoning district with the designation to include the addition of some river-front parcels. Milton asked about taxes on waterfront property. Mahaney said he likes the idea of vacation rentals along there – it's a good use. Accessory dwelling units were discussed. Sikkema is not in favor. Meister said it should be discussed, and the conditions established, before he makes a decision. Home rentals were discussed. Milton said it would be limited by the ability to have sufficient septic. Woodward said these properties were labeled as such on the future land use map because that's what they are – residential uses that have a special relationship with a water feature.

No changes were made to Village Residential, which is basically the same as the existing R-2 zoning district. Sikkema pointed out the allowance for accessory dwelling units. Woodward said that currently the R-2 zoning district is the only one that does permit duplexes.

The Commission discussed the neighborhood residential future land use map and description. Woodward said it basically mirrors the current R-1 zoning district, with a couple areas allowed for expansion near CR480 and Cherry Creek Road. Sikkema said the use changes include accessory dwelling units and farming activities. Woodward said the designation is based on a residential neighborhood character of existing development, and vacant areas that would be compatible. Sikkema said he has a neighbor with two roosters that are like barking dogs that go from three in the morning to ten at night.

The Commission discussed corridor residential. Woodward pointed out a possible need for minimum lot width requirements that would meet good access management standards. This would only apply to new parcels. However, it's just a small part of the Township, and most parcels are already created. The Commission decided to include these parcels in the R-N (residential neighborhood) designation.

The Commission discussed the R-R designation, and whether there is a need for this, or whether they should stay in the AF district. Sikkema discussed an area of Washtenaw County that had been divided into five acre parcels, which ended up being hard to service because development wasn't concentrated, and just created sprawl. Woodward said her intent was to preserve the rural feel of those parcels that weren't located on major roads but were near existing neighborhood development. This future land use was not changed.

The Commission discussed the primary working lands category. Sikkema asked Woodward about changes from the current AF district zoning designation. Woodward pointed out she had created some criteria by which the Commission might allow other uses on smaller lots by special review in that future land use area. She had also tried to allow for smaller hobby farms under certain conditions. This proposal was discussed. The Commission decided not to allow division of primary working lands into smaller hobby farms even under restricted circumstances.

Smith discussed the need to have another district to protect the people who live on smaller lots in the AF district (such as Foster Creek) and shouldn't have to live next to farms. Woodward said she did include the Foster Creek neighborhood in the R-R future land use category. Smith said he thinks regulations are needed to protect these parcels that are in the AF district but don't belong.

The Commission discussed the proposed description for other uses allowed at greater density, and whether the density was achieved through smaller lots of conservation development. Woodward said it might be beneficial to allow some farm-related or farm-compatible uses on smaller lots so that more land is left for farm use. The current zoning ordinance provisions for Rural Cluster Development subdivisions, consistent with the Open Space Preservation zoning allowed through the Michigan Zoning Enabling Act, was discussed. Mahaney asked if there was a minimum lot size requirement for that type of development. Woodward said this would be necessary since the area is served by wells and septic. Woodward said the Commission could consider differing standards for planned unit developments in different zoning districts. Planned unit developments and the open space preservation method and associated benefits were discussed. Woodward said she could adjust the future land use map to reflect their ideas and come back with suggestions for implementing them.

Mahaney moved, Sikkema seconded, to have Woodward streamline the future land use map in relation to their comments, and present it at the next meeting.

Vote Ayes: 5 Nays: 0 MOTION CARRIED

IX. PUBLIC COMMENT

Deborah Mulcahey, 633 Lakewood Lane – She appreciates that the people that are here represent the older generation and are mindful of aging in place. But she thinks we really need young people here to talk about what's happening in the Township in the

future and what they want. The people that are here know what they want, but don't know what younger people need. She wants the Township to stay away from sprawl development. The area by Lakestate Industries by Lion's Field looks like a dump and is not welcoming to Chocoday Township. She discussed a couple of concepts in the proposed language for water oriented residential land use. The former planner sent letters to people known to have rental properties, and it was helpful with alleviating nuisances. She is happy to see customization of fence regulations for waterfront properties. She hopes the statement about preservation of views applies to the "lake side", not the "non-lake" side, so that trees on lake front lots can be preserved. She thinks the intersection of US-41/M-28 is dangerous and she avoids it. She doesn't agree with the Planning Commission's approval of the Holiday Station plans to close the north driveway but leave the south driveway open. She thinks there is a need to create a narrow public easement for people who don't live on the lake to access the lake without going through private property.

Dick Arnold, 312 West Branch Rd – He thinks it would be nice for the public to be able to see the map so they know what the Commission is talking about. He lives in the AF district which he said has 841 parcels totaling about 8,000 acres. 512 of those parcels are nonconforming because they are under 20 acres. In those 8,000 acres he said there are five parcels where beef or milk cows are raised. There are about four parcels where only crops are raised. There are 15 to 20 parcels where people have horses for recreational purposes. He thinks we should zone the existing farm parcels for agriculture, and not the rest, because it's expensive to clear land. He is concerned about the size of accessory buildings that people can put up in the AF district. They can be too large. He thinks we need to protect the people who have smaller parcels. He doesn't think a racetrack is proper as a conditional use next to small parcels. He thinks it will be hard to find land to divide into 20 acre parcels.

X. COMMISSIONER'S COMMENT

Smith said he would like the Master Plan to explore getting the nonconforming parcels in the AF district into a separate zoning district to protect people on smaller lots from having large pole barns ruining the character of residential subdivisions such as Foster Creek.

Sikkema would like to have a report of zoning enforcement complaints and actions presented at each meeting, called the zoning enforcement activity report.

Mahaney revisited the Holiday Station site plan review. He did not feel he had enough time to study the highly technical issue and look at all the options. He asked if things could be tabled to the next meeting when he wants to look at things in more depth. Sikkema said anyone can propose to table an issue. Woodward noted that businesses will not look favorably on delays. Sikkema reiterated that the driveway that will be closed is the one where the crashes occurred. The decision was further discussed.

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, September 8, 2014

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:30 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Richard Bohjanen (Board), Bruce Ventura, Tom Mahaney (arrived at 7:33 p.m.)

Members Absent: Kendell Milton

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Suzanne Sundell (Administrative Assistant)

II. MINUTES

August 4, 2014

Motion by Bohjanen, seconded by Meister, to approve the minutes as written.

Vote: Ayes: 4 Nays: 0 Abstain: 1 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Ventura, seconded by Smith, to approve the agenda as written.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

None

V. PUBLIC HEARINGS

A. Rezoning Application ZA002-14, 118 West Wright Place, PID#52-02-106-043-80

Woodward explained that this was a request to rezone this residential property (meaning this property is in residential use) from commercial (C) to Residential 2 (R2) zoning. This property has a history of bouncing back and forth between residential and commercial zoning. This property started out as residential, and was rezoned to commercial in 1998. This is causing difficulty in selling the property. This is a small lot of approximately 17,425 SF, and a lot width of 179 feet. Woodward also pointed out the District regulations that pertain to the property. She has also provided the regulations pertaining to "Lawful Nonconforming Uses and Structures, Section 14.2", which essentially says if the cost of reconstruction after some type of calamity exceeds 75%, it would not be able to continue as a residential use, and would have to be rebuilt with something appropriate for the commercial zoning district. Woodward summarized information from the current adopted Master Plan and draft Master Plan.

Olive Hillier, 118 West Wright Place – they are getting older and have poor health. They want to sell their house and move south. They had an interested buyer, but it

fell through because of the clause that the house could not be rebuilt due to the commercial zoning. So they'd like to put it back to residential.

Dale Hillier, 118 West Wright Place – The rezoning would expedite their health care and sale of the property.

Pete LaRue, 426 Corning Avenue – He owns the property across the street. He doesn't think it would make a difference to rezone it back to residential. The doctor's office was rezoned from commercial to residential (Corning Apartments). He thinks we'd be doing the right thing to approve the rezoning. No one will buy one small parcel for commercial development.

VI. PRESENTATIONS

None

VII. NEW BUSINESS

A. Rezoning application ZA002-14, 118 West Wright Place, PID#52-02-106-043-80

Bohjanen questioned why the rebuilding of an inadvertently destroyed structure on that property would be limited to 75% of the value, other than the fact that it is in the zoning ordinance. Woodward stated the purpose is to support phasing out or conversion of non-conforming uses and structures. Woodward stated that it is a very common zoning provision.

Meister indicated that it makes sense either way – commercial or residential – and he sees no problem.

Ventura stated that he looked at the property, and he feels it makes more sense to be residential rather than commercial zoning. At 17,000 square feet, there are not many commercial establishments that could fit on that property. To the north and to the east is already residential. The property is part of the neighborhood, and not part of the commercial strip.

Ventura moved, and Bohjanen seconded, that after conducting a public hearing and review of the application and Staff Review/Analysis for Rezoning case #ZA002-14, the Planning Commission finds that the proposed rezoning is consistent with the goals and strategies of the Master Plan, and hereby recommends that the Township Board approve ZA002-14 for the following reasons: the property is currently being used as residential, and at least two adjoining directions are residential.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

Discussion on Township Board approval – Bohjanen indicated that he planned on being at Board meeting on Monday, September 15, and would recommend the waiving of the second reading.

VIII. UNFINISHED BUSINESS

A. Discussion of future land use and zoning strategies for the Master Plan update.

Woodward said the maps reflect the changes made by the Planning Commission at

the last meeting as follows. The “Corridor Residential” future land use was eliminated, and descriptions for the “Rural Residential” and “AF” future land uses were revised. The mixed-use designation for parcels near the intersection of Cherry Creek and CR 480 was eliminated; parcels were re-categorized as “Rural Residential” and “Neighborhood Residential”. In the Beaver Grove area from Basal Road to the Brookfield subdivision, she revised the Neighborhood Mixed-Use area to include only parcels with existing uses of that nature. This resulted in three small mixed-use areas instead of one continuous mixed-use area. She also shrunk the mixed-use area at Kawbawgam Road to include only the existing tribal properties (casino) and the apartment building, limiting further commercial expansion.

Woodward suggested other revisions as follows. She changed the industrial area adjacent to Lion’s Field to the “Corridor Mixed-Use” designation since it was more consistent with current uses. Some of the parcels between the Briarwood subdivision and Little Lake Road were previously identified in the “Neighborhood Residential” category. She advised changing them to “Rural Residential” to protect the river corridor and wetlands from further subdivisions. She felt these parcels were more consistent with the character of the parcels to the east, rather than the west.

Woodward provided comparison maps highlighting which parcels would change (assuming future land uses were translated directly into future zoning districts). There would be a few parcels that are currently in the “WFR” and “R1” zoning districts that are included in the “Conservation Recreation” future land use because of the predominance of floodplains and wetlands that limit development opportunity. There are a few parcels currently in the “R1” and “C” zoning districts that are included in the “Village Residential” future land use. Many parcels would be changed to a mixed-use future land use designation, since we currently have no such zoning district, but this would expand opportunity for these parcels. Around 60 parcels would be changed from the “WFR” or “AF” zoning district to a “Residential Neighborhood” category, mostly including small nonconforming parcels in the AF district, or large parcels that would be suitable for new neighborhood development. A few parcels would be converted from “WFR” to “AF”, and almost 30 would convert from “R1” to “AF”. Many parcels would be changed to a “Rural Residential” designation since we currently have no associated zoning district, for the purpose stated by the Planning Commission to protect the residential character of those rural properties, and reduce the number of nonconforming parcels in the AF district. Many of the properties being converted to “Waterfront Residential” future land use include riverfront properties that are currently in the “R1” or “AF” zoning districts. Woodward cautioned that some privately-owned parcels are shown as “Public” future land use, but would not be zoned public. The category reflects current and preferred future land use.

Smith asked about the large vacant parcel to the east of the existing NMU Golf Course. It is privately owned, and not used as a golf course, although parts were cleared for an additional nine holes. It was approved as part of a PUD development,

but not built. Current zoning is "R1". The designation was changed from "Public" to "Rural Residential" future land use. Access is difficult because of limited access across the Iron Ore Heritage Trail. Ventura and Smith said that County Road BU was officially abandoned in this area.

Sikkema had questions about parcels between Cherry Creek and Little Lake. Some are large parcels that are currently in the "AF" district but shown as "Neighborhood Residential" future land use, and some are small parcels that are currently in the "R1" district shown in the "Rural Residential" future land use. He asked for the reasoning behind this. Woodward said that the large parcel on Cherry Creek had highway access and would be appropriate for possible new residential development. It could just as easily be included in the "Rural Residential" category. No minimum lot size has been suggested for the "Rural Residential" future land use area, but Woodward has envisioned 3-5 or up to 10 acres. Woodward suggested the "Rural Residential" designation for the parcels along Little Lake Road and along the river corridors to try to prevent further small splits in areas with floodplains and wetlands, and because of the existing rural character. She was trying to keep new residential development closer to Harvey. Sikkema was concerned that this would take away the current right to make additional splits, and is inconsistent. Citing full disclosure, he said he owns property there, and intends to make further splits. He doesn't want his rights taken away, and assumes others also do not. Meister and Sikkema said there needs to be a compelling reason to change the rules. Sikkema doesn't think there is a compelling reason for the designation to go one way or the other, but there should be a compelling reason to change it once people have purchased property with that understanding. Smith asked if Sikkema would be satisfied if the "Rural Residential" future land use area was associated with two acre parcel minimums. Sikkema said the "R-R" was supposed to be a buffer between "R-1" and "AF", and he is concerned about what livestock might be allowed in the "R-R" area. The Commission decided to keep the area between Briarwood subdivision and US-41 as "Neighborhood Residential" to retain the character of the current "R-1" zoning district.

Smith asked about the smaller parcels to the west of Brookfield subdivision that are now zoned "R1" but shown as "AF" future land use. Woodward said they are vacant 10 acre parcels, divided by Big Creek, with wetlands, without direct road access, and surrounded by the AF district. Smith was concerned about making more parcels nonconforming. Woodward said you can still build on them as long as you meet the setbacks.

Smith was concerned about the nature of accessory structures that can be built in the AF district, and cited this as a compelling argument for changing the Foster Creek development to the "Rural Residential" designation (assuming that designation provides differing rules about accessory structures). He said large pole barn structures would devalue the neighboring residential properties.

The Commission discussed the area between the Bayou Court Condominiums and the Hotel Place/Bayou Restaurant (north side of Main Street) that is all designated as

“Neighborhood Mixed-Use”. Sikkema suggested a designation of waterfront residential to preserve the existing residential character. Both sides of Main Street would remain in residential character. The Commission decided to exclude the five single-family/vacant parcels north of Main St. in this district, leaving two mixed-use nodes at the ends.

The Commission clarified that the future land use map is to guide future zoning, but can be implemented incrementally over time, and can be revised at a later date. Smith asked how often the Township will revise the Master Plan or zoning ordinance. Woodward said the Michigan Planning Enabling Act says that at least every five years the Township shall review the master plan and decide whether to amend it. You are not required to amend it. The 2008 zoning changes were a result of the 2005 Master Plan update.

Sikkema asked whether the Commission agrees with the future land use descriptions, specifically allowed activities. Sikkema is concerned about allowing accessory dwelling units and accessory homesteading activities, although there are no specific definitions for these activities. He asked for other input. Ventura said to Sikkema’s concern, the description said these activities would be allowed with special review, not granted carte blanche, so they can be limited.

The Commission discussed other small parcels in the AF district, and whether they are more appropriate in the “R-R” future land use. Woodward suggested protections could be provided based on lot size as well. Meister asked if there are actual problems with large pole barns or if this is just speculation. Sikkema said they had received several complaints. Smith said this could result in more lot splits. Sikkema said no development could really happen around the Homestead Golf Course with the AF zoning, unless it was through a PUD. Mahaney said the area seems to be more agricultural. Bohjanen said the people that live in houses on small lots probably don’t feel that way. Sikkema said he is only aware of problems in the first mile south of CR 480 on Little Lake Road, where people had some issues with permitted uses on larger parcels in “AF”. The Commission discussed previous efforts to create a Rural Residential district, and thoughts about farmland vs. development. The final decision was to try to direct development to the area north of CR 480 before expanding further south. Ventura also asked about the camps and cabins near the mouth of the Sand River, south of the highway turnout. No change was made after discussion.

IX. PUBLIC COMMENT

None

X. COMMISSIONER’S COMMENT

Smith said they are getting natural gas service on Wintergreen Trail.

XI. DIRECTOR’S REPORT

Woodward directed the Commission to look at the fax from Mark Maki and her response, and decide if there were any action items. She said she answered the questions as best

she could with the time she had, but the Commission could direct her to do further research if warranted. Ventura said he thought the response was handled well.

Bohjanen said he appreciated seeing the ordinance enforcement report. Woodward answered questions about the report and status of the cases. The Commission wanted closed cases to show up as such for one month before being deleted. Sikkema said it's nice to know what's happening, in case it would impact what the Commission needs to do with zoning. Frequency of new cases was discussed, as well as the inspection and administration process. The Commission thinks this report is of value, and they'd like to see it for another few months at least. Sikkema noted there are quite a few steps that the enforcement officer has to go through, especially if people are unresponsive. Woodward noted there are many additional violations to be addressed from the assessor's inspection which revealed a possible lack of permits. These will be added as time permits.

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Bohjanen, seconded by Ventura, to approve the agenda as written.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

None

V. PUBLIC HEARINGS

A. AT&T Wireless Communications Tower, Site Plan 14-04 and Conditional Use 14-04.

Woodward asked that a written public comment that was submitted to the Planning Commission be read into the record. Sikkema read the letter from Bob and Sharon Roshak, 1318 M-28 East, in support of the proposal. Their family has AT&T cell service, and currently they do not always have good coverage. They feel that having a tower in close proximity may alleviate these problems. Also, there has been talk of the land lines going away in the coming years, and they would not feel safe relying on their cell phones.

Woodward explained that this is a proposal to construct a 180 foot monopole tower on a portion of the Charter Township of Chocolay's Silver Creek Recreation Area west of the soccer fields. It is in an area where the Disc Golf has recently expanded, and this has been discussed with the disc golf group. This may affect one of their holes, but they feel they would be able to relocate it. The proposal meets all requirements for setbacks, and Woodward indicated that she has provided a detailed analysis of how the proposal meets all other site plan review and conditional use standards. There is no proposed outside lighting at this time. Woodward has also provided an analysis of how the proposal meets the wireless communications

facilities standards of the zoning ordinance. Woodward provided some suggested conditions to make sure that the proposal does follow through and meet the requirements. These have been incorporated into the recommended motion. There are some restrictions based on State and Federal law, which have been detailed in Woodward's memo.

Sikkema opened Public Comment.

Wally Haley, Attorney representing AT&T – he feels that the letter in support covered some of the issues he would have started out with, such as the land lines going away. In an article from the November Detroit Free Press on “cutting the cord”, it indicates that many people are getting rid of their land lines and going to wireless communication. In 2000, there were 6.7 million landlines in the State of Michigan – in 2012 that number had dropped to 2.6 million. The wireless industry is growing, and there is a substantial need for better cell coverage in this area.

Haley indicated that he had read Woodward's report, and wanted to compliment her – he has been doing this for 20 years and he feels that Woodward's report is the best Planner's report that he has ever read, as to discussing all the issues and including Federal issues. He does not usually see that level of detail, with the level of understanding, in much bigger jurisdictions with some “very heavy-duty outside planning consultants”. He feels he would be remiss to not give Woodward some kudos on that.

Haley indicated that one thing the report doesn't mention, which dovetails into the discussion of alternative locations, is that he went to the Marquette Public Schools to discuss possible “Drop and Swap” opportunities on the Northern Michigan University tower located at the Cherry Creek School. He was told “no” by the school district – they were reluctant for an agreement at that point and time. There are no other towers in the area that would solve the need, so Haley approached the Township.

Haley also pointed out that the tower does meet all the setbacks in the ordinance, however modern technology allows towers to crimp over on themselves rather than fall over in case of major storms or ice.

Ventura wondered about the statement from the engineer that no other co-location opportunity was available. Ventura asked if they had considered the State Police tower, which is much higher than 180 feet above the surrounding area. Ventura understands that the State Police are reluctant to co-share, but he said there is legislation in and out of the State Legislature to change that.

Haley asked about the location of the State Police tower – Sikkema answered it was by the prison. Haley indicated that there is a tower on the other side of the ski hill, which is structurally incapable of being modified. Basically, what AT&T did was split that cell to provide coverage to the Chocoley center (M-28 & US 41), and the ski hill. The prison would have been way too far out of the search range area to provide that coverage.

Haley indicated that there has been talk of legislation to make state police towers available for years. There is a company that is called SBA which has a subsidiary that has a contract with the State of Michigan to market all their towers and land. Even they have made no inroads with the State.

Mahaney wondered about a lease with the Township and the payment terms. Woodward indicated that there was a copy of the lease in the packet.

Ventura pointed out that the lease had differing amounts – in two places it shows \$1,200 and one place it shows \$1,250. Haley indicated that he thinks the option to lease is \$1,200, and the rent is \$1,250. Bohjanen indicated that the rent was \$1,250 per month, not year. Ventura indicated per year. Sikkema clarified by saying the option to lease was yearly, the rent was monthly.

Denise Mullins, 321 Silver Creek Road – she has two concerns. Health and safety - she wondered what the radius would be as far as microwave frequencies. She also wondered if in the future the tower would be leased out to companies with more powerful technology. Sikkema inquired about information in the staff report. Woodward stated that the tower would have to meet federal safety regulations, so there are federal and state regulations that prohibit local governments from including these types of concerns in any findings-of-fact denying a tower.

Haley addressed Mullins second question regarding more powerful technology operating from the tower – he stated the FCC controls the amount of power you can put out. There will not be a cell tower that provides more powerful technology. This is a very low power broadcast, which is why more towers are needed. Sikkema indicated that there are provisions for this tower to include at least three more providers, but they would be limited to the 250 watts per channel.

Mahaney questioned the proposed location on a very flat area, and asked about moving south a mile or two to Green Garden hill. Haley indicated that there are two components – height and power. You don't get as far of a broadcast from these towers as you think you do – a tower at 180' height is about 1 – 1 ½ miles broadcast. Going up to 250' height might get you another ¼ mile broadcast – but it wouldn't serve the area of concern. Haley indicated there is a need for a lot of towers along US 41 and M-28 (Seney stretch). Sikkema stated that the reason we need as many towers as we do is because of the limitations on the output.

Bohjanen asked for a description of the cell phone broadcast. Haley stated he thinks it is typically ½ watt – Bohjanen stated that this seems to be the limiting factor, rather than the 250 watts that come off the tower. Haley indicated that the higher the broadcast frequency, the less it penetrates the tree canopy.

Sikkema closed the public hearing.

VI. PRESENTATIONS

None

VII. UNFINISHED BUSINESS

None

VIII. NEW BUSINESS

A. Site Plan Review 14-04 and Conditional Use 14-04, AT&T Wireless Communications Tower, PID #52-02-106-038-00, Silver Creek Recreation Area, 237 Silver Creek Road

Bohjanen commented that the Ordinance states that the either the property owner or lessee has to remove the tower when it is decommissioned. It seems to him that this should be looked at. For example, Bohjanen said the Township's contract states that the tower owner needs to remove it. Sikkema stated that the Township is covered in the contract – AT&T would have to remove it. What it doesn't cover is if AT&T went out of business – the responsibility would then fall on the property owner. Sikkema thought the ordinance was written more for leases on private property, not municipal property.

Smith stated he doesn't feel that the location has much bearing if it meets all the other regulations. Woodward stated that the Planning Commission can still control the location of tower, provided coverage is not denied entirely. Sikkema stated that the proposal doesn't violate any land use issues or zoning requirements.

Meister asked if the applicant had seen the list of conditions. Haley indicated that he had reviewed them. Sikkema then asked about the driveway configuration. Woodward stated that it was preferred to keep the wooded buffer between the facility and the parking lot so the fence is not visible to park users. Sikkema indicated that the driveway then interferes with the disc golf. Woodward stated it would have affected that hole either way. Haley indicated the location is least disruptive to the disc golf holes.

Ventura suggested one more condition be added to list – *"Township will receive a copy of the signed and sealed tower drawings before construction."*

Haley indicated that the County would request that they do this.

Mahaney asked if Haley anticipated starting this fall. Haley indicated it probably would not be starting this fall because they still need to get all the regulatory work done. Mahaney asked about length of construction period. Haley indicated 30 days. Mahaney asked if AT&T would get a license after all the regulatory work is done. Haley indicated there is no license – registration with the FCC and license are attached to the megahertz.

Ventura asked about current regulations on aircraft warning lights. Haley indicated that a tower under 200' height is not considered a hazard to aviation, so it is not anticipated that the tower will be lit.

Mahaney stated that at a 1 ½ mile signal radius, this tower will probably not help the cell phone reception down M-28. Haley agreed – more towers are needed along M-28.

Moved by Ventura, seconded by Mahaney, that after review of Application SP14-04 Site Plan Review and CU14-04 Conditional Use Permit; and review of the staff report dated 9-30-14; the site plan for AT&T Mobility for wireless communication facilities to be located at the Silver Creek Recreation Area parcel #52-02-106-038-00, as presented at the October 6 public hearing, be approved as presented having met all requirements of the Zoning Ordinance with the following conditions:

- 1. Removal of trees or alteration of the existing vegetative buffer should be minimized to the extent as essential for actual construction of the premises and access road, and any tree more than 6" in diameter that is removed outside the boundaries of the premises and utility/access easement shall be replaced during the construction with a tree not less than 2.5" dbh with species, planting location, and planting method as approved by the Township.*
- 2. The portions of the developed disc golf course lying outside the area of the lease and utility/access easement boundaries will not be disturbed.*
- 3. In no case shall the entire existing vegetative buffer between the lease premises and adjacent properties or park features be completely removed.*
- 4. Permit approval is conditioned upon receipt of certification by a licensed professional verifying that the structural design of all wireless communication facilities will withstand wind speeds and icing under the worst conditions experienced in this area.*
- 5. There shall not be displayed on the wireless communication facility advertising or identification of any kind intended to be visible from the ground or other structures, except as required for emergency purposes.*
- 6. The wireless communication facilities shall be kept updated in compliance with all applicable federal, state, county, and local regulations as amended or changed during the life of the facility unless compliance is waived by the controlling agency.*
- 7. The wireless communication facility shall be operated so as not to interfere with radio, television, audio, video, electronic, microwave or other reception in nearby areas.*
- 8. All wireless communication facilities shall be revoked by the lessee and premises returned to previous condition with 120 days per terms of the approved lease.*
- 9. The wireless communication facilities shall not be artificially lighted unless required by the Federal Aviation Administration, and shall be lit according to those minimum requirements.*
- 10. All wireless communication facilities shall be inspected after being constructed and then once every three (3) years for compliance with all ordinance, structural and operational requirements and shall be certified as in compliance by a licensed mechanical, civil, professional engineer or architect, or other*

professional competent in assessing the structural integrity of such towers, and said certification shall be submitted to the Township.

11. *The Township will receive a copy of the signed and sealed tower drawings before construction.*

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

Ventura commented that in the City of Marquette there is a tower that is camouflaged as a large fir tree. He stated that it is more obvious as a fir tree than a tower, because it would be a very tall tree in a surrounding forest of 60' trees. Haley indicated that it is a huge structure – a cell tower without all the appendages would have been one quarter of the size.

Haley asked if this still needed to go to the Township Board – Woodward stated the Conditional Use has been approved.

IX. PUBLIC COMMENT

None

X. COMMISSIONER'S COMMENT

Smith indicated that the Chocolay and Bayou River bridges were paved last week on the Iron Ore Heritage Trail. Ventura asked if it was compacted gravel or asphalt – Smith indicated it was asphalt.

Mahaney commented that he feels the cell tower is good for the community.

XI. DIRECTOR'S REPORT

The Zoning Enforcement list has been updated. There are not a lot of changes, but there have been two or three closures.

There are two sets of Board minutes attached, which have items that relate to the Planning Commission. Woodward pointed out that the August 18 minutes the Burning Ordinance first reading was included. The September 15 minutes covered discussion of the Future Land Use presentation. There is a plan to further discuss this at the next Board meeting – Woodward suggested that the Commissioners may want to be at that meeting to provide further clarification for the Board.

Ventura asked about the Rezoning of Hillier's property – Woodward indicated that it was approved.

On page 8 of the September 15 Board draft minutes, there is discussion on a letter from Trustee Maki to the Planning Commission – there are things Trustee Maki feels the Planning Commission should be addressing – there is also a question on if it is coming from the whole Board.

Woodward also indicated that the Commission should have received a memo response from Woodward to Trustee Maki on vacation rentals. The Commission should have also received an email response on October 6 to Scott Emerson addressing his concerns on

vacation rentals.

There is an upcoming workshop on “Streamlining the Zoning Ordinance”, and the closest location is Chatham on December 8. Woodward asked anyone who wants to attend to contact her.

Mahaney asked about the junk accumulation complaints – what does this consist of? Woodward explained that everyone has stuff, but it becomes a complaint if it looks like it’s been there a long time and wildlife is living in it. Mahaney asked where the complaints come from – Woodward indicated that usually it’s from residents (neighbors) that have to look at it. Some violations are found when just driving through the township on other business or by inspection.

Woodward also indicated that she would be attending the Michigan Association of Planning conference on Mackinac Island the latter part of the week, and would be bringing back great ideas.

Woodward also indicated there would be a Michigan Municipal League conference in Marquette sometime in October.

No comments.

Sikkema closed the public hearing.

VI. PRESENTATIONS

None

VII. NEW BUSINESS

A. Rezoning Case #ZA003-14, 225 W. Terrace St., PID #251-011-00

Bohjanen asked if anyone knew why the property had been rezoned from commercial to R2 to begin with. Woodward stated the designation officially changed in 2008 during the zoning ordinance update, and she suspects it was just a mistake in implementing the future land use maps, which if implemented correctly would have resulted in commercial zoning for this parcel. Bohjanen stated it was previously zoned commercial in 1977. He just wondered if there had been a specific request that caused the rezoning. Woodward stated that there had been no rezoning request that she could find.

Mark and Tina Brandel, 201 West Terrace – Tina stated that they used to be zoned commercial, but over time the Township switched their zoning to residential – they don't remember getting any kind of notification on this. She wondered if it had anything to do with the abandoned alley behind their properties.

Bohjanen moved, and Meister seconded, that after conducting a public hearing and review of the application and STAFF REVIEW/ANALYSIS for Rezoning case #ZA003-14 for 225 W. Terrace St, the Planning Commission finds that the proposed rezoning is consistent with the surrounding zoning and the future land use plan, and hereby recommends that the Township Board approve rezoning of this property from Residential 2 (R2) to Commercial (C).

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

Milton questioned how it was able to operate as an ice cream shop if it wasn't a commercial zone to begin with. Woodward stated that it was originally zoned commercial. In 2008, it became a non-conforming use until its closure in 2011 or 2012.

B. Site Plan Review 14-05 and Conditional Use 14-05, 225 W. Terrace St., PID #251-011-00

Mahaney had questions about the driveway. Conrad indicated that he is working with Sue and Walt Racine to get an easement for access to the rear parking lot from the driveway that is west of the property. Then people would not have to drive over the well to get to the parking.

Sikkema asked about the location of the property line – Conrad came forward with a copy of the most recent survey and indicated the location of the driveways to be used and to be closed. Commissioners and the applicant discussed access and ownership details for the adjacent properties. Sikkema affirmed that the only access to the residential parcel behind this lot is through the Racine property. Milton asked if the alley had been vacated – Conrad stated yes, and that a portion was added to his property.

Meister was concerned that the Corridor Advisory Committee might like to see Walt's driveway closed, especially if anything significant ever goes in there - people turn onto Terrace and then immediately have to make a left turn into the driveway. He isn't sure what is feasible, and whether the Committee would rather see Conrad utilize the eastern-most driveway.

Conrad was concerned for the safety of vehicles backing or pulling out into the street across from the bank's driveway. He feels the shared access is easier and safer.

Mahaney agreed with Meister on the difficulty of the sharp left hand turn immediately after turning off US 41.

Woodward stated that Walt's is not applying for a change to his property, so there is no mechanism for the Planning Commission to compel him close one of his existing driveways.

Brandel indicated that the parking scenario was worse when the ice cream shop was there because people parked on the side of the road – awareness was necessary. The type of businesses that Conrad is putting in there would have far less traffic and parking concerns.

Sikkema asked Meister if there is something that needs to be changed. Meister wondered about deleting condition #3 on the suggested motion for Corridor group approval – he doesn't know if they would approve or recommend the driveway being that close. Sikkema indicated that the Township has an agreement with the Advisory Group that they have to review everything within 1,000 feet of the corridor. The Township is obligated to take it there and get their comments, although the comments aren't binding. Meister is concerned that the Corridor Advisory group may not approve the driveway arrangement, and if the site plan approval is conditioned on their approval, the site plan won't be approved. Sikkema indicated that the Corridor Advisory group is just that – an advisory group. He said MDOT does not have jurisdiction over the decision because the project doesn't directly access US-41. Meister was concerned that by putting point #3 in the motion, we were making it binding. Sikkema said the Corridor group just makes recommendations. The Planning Commission could decide to wait for their recommendation, but the Planning Commission has the decision-making authority. Sikkema asked when this would be going the Corridor Advisory group – Woodward indicated that their meeting is next week.

Meister indicated he did not think the decision needed to be delayed, because the plan is fine for this business. He is looking more into the future because if something with significant traffic goes into Walt's, then this issue would come up again for their site approval. Sikkema said it should be much less traffic than the ice cream shop.

Bohjanen said Conrad's project would improve the situation, since now there would only be one choice of where to turn.

Sikkema questioned how the east driveway ever happened. He said people lived in

the house while the ice cream shop was open. Conrad indicated that they used that driveway, but it goes over the well, which doesn't make a lot of sense. Sikkema stated that it might have been used as a residential driveway to get to the back of the property. It looks like an impromptu driveway that just happened. Smith asked if there was a curb cut and Conrad said yes.

Conrad is working with a surveyor to draw up the easement for his lawyer.

Sikkema asked about landscaping on the property. Conrad indicated there will be landscaping on the north and east sides.

Mahaney asked if Conrad had plans to pave the parking area. Conrad indicated he was planning to do it when he can afford it. Meister stated that the Zoning Ordinance does not require the parking lot to be paved. Woodward said defined parking spaces are required, either by painting or bumper stops. Mahaney asked if the front driveway by the computer business was going to be a handicapped parking space. Conrad indicated yes, they felt it offered the safest access.

Sikkema went through the suggested motion.

Mahaney asked if the property has a non-conforming driveway. Woodward indicated that she had not talked to the Marquette County Road Commission about the current status of the driveways. The Township does not have any standards for driveways. Sikkema indicated that according to access management standards, the driveways are probably too close to the intersection, but there was no way to make Walt's driveway conforming to the standards.

Sikkema questioned the suggested condition for waiver of Section 5.3 (R) standards by the appropriate road authority. Woodward indicated that access management standards apply not only to properties that front on US-41, but also those that are a certain distance from the highway. Existing properties cannot always meet the standards, so the ordinance provides that a waiver from the standards can be granted.

Sikkema asked if there were any suggestions for additions or deletions on the suggested motion. Milton asked if the Township requires there be a screened area for the garbage dumpster. Woodward said yes. Woodward asked Conrad if he planned on having a dumpster. He indicated they do plan on it – on the northeast side there is already a concrete slab for one. The screening will be added as a condition to the motion.

Moved by Meister, seconded by Bohjanen, that after review of Application SP14-05 Site Plan Review and CU14-05 Conditional Use Permit; and review of the staff report dated 11/25/14; the site plan for 225 W. Terrace St, parcel #52-02-251-011-00, as presented at the December 1 public hearing be approved as presented having met all requirements of the Zoning Ordinance, with the following conditions:

1. *Permit approval is conditioned upon approval of the rezoning from R2 to C by the Township Board.*

2. *Permit approval is conditioned upon the Zoning Administrator being presented with the legal shared access and maintenance agreement meeting all requirements of the Ordinance, and the recording of this agreement with the Marquette County Register of Deeds.*
3. *Permit approval is conditioned upon approval of the access plan by the US-41 Corridor Advisory Group and that of the appropriate road agency.*
4. *Permit approval is conditioned upon the waiver of applicable Section 5.3(R) standards by the appropriate road authority.*
5. *All signage shall meet the requirements of the Chocolay Township Zoning Ordinance, and the applicant shall obtain a permit for all signs.*
6. *At the earliest date in the spring, the applicant shall plant the required planting screen along both sides of the parking lot that are adjacent to the residential district. The plants shall meet the type and spacing requirements of the Ordinance, as approved in advance by the Zoning Administrator.*
7. *The applicant shall provide the appropriate specifications for all outdoor lighting fixtures which shall meet all requirements of the zoning ordinance.*
8. *The applicant will provide garbage dumpster screening as per the requirements of the Zoning Ordinance.*

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

VIII. UNFINISHED BUSINESS

A. Master Plan

Woodward indicated the Planning Commission was to review changes that have been made to the Master Plan, including the Farmland, Forest and Protected Land section from Chapter 6, Strategic Plan of Chapter 7 (including Future Land Use; the comparison of Future Land Use, Current Zoning and Future Zoning; and Zoning Plan), and the Implementation Plan for capital projects of Chapter 8.

Sikkema proceeded to go through the updated pages, asking for Commissioner input.

Bohjanen indicated his was more of a philosophical question, which probably doesn't warrant a lot of discussion. His ancestors left Finland to ultimately end up in the UP because soil was poor, the winters were long, and the growing season was short, and it was hard to make a living, and they settled in the same kind of area around here. How do you convince somebody that is not able to make a living on their land that they shouldn't subdivide and sell to be more profitable? You can't convince an old Finlander that he should go to school for composting. Not recommending any changes, just felt the need to philosophize.

Woodward stated that the Future Land Use plan of our currently adopted plan does have a strategy to encourage farmers to farm as long as they want to, and to encourage them to keep land in a farmland preservation program since farming is important to our communities. So the proposed plan is a continuation of this idea. Bohjanen again said he didn't suggest any changes, but until there is a bigger

demand and more lucrative market, this sort of thing will remain philosophy and not practice.

Page 116, Sikkema had a comment on the last paragraph. “Also included are some parcels for potential neighborhood development near CR 480 and Little Lake Road.” He feels that the sentence should be deleted because he didn’t necessarily intend this are to be designated for intended growth, he just mentioned that area as an example of when we should leave zoning unchanged unless there is a compelling reason. It was agreed to delete the sentence.

Bohjanen said much of the Township has non-conforming lots, and changes to minimum lot size requirements may need to be considered. Sikkema indicated that non-conforming lots may still be developed – they are grandfathered in. He thinks we need to consider the size we want future lots to be – maybe some should remain nonconforming but developable (grandfathered in). This will be discussed further when ordinance changes are considered.

Page 130, Bohjanen had some questions on building height and height. There was some discussion about how to measure and regulate height, and about previous decisions regarding height that may not be reflected in the regulations (such as a reference to a national building standard, and discussion regarding fill). This will need to be researched for future discussion regarding changes to the definitions and measurement standards.

Page 145, Bohjanen asked for a definition of agri-tourism in reference to promotion. Woodward gave examples of the alpaca farm which holds open house events or a corn maze.

Page 160, Master Plan Capital Projects Priorities and Timeline, Bohjanen felt that rather than go through the exercise of estimating cost on each project, since they would change every year that it may be wise to look at the highest ranked projects and have some type of cost associated with them.

Bohjanen asked about the process of getting things off of the implementation charts and onto a schedule – Woodward suggested that staff would do an analysis during preparation of the annual report every year. Woodward stated that it would probably be up to the Township Manager to bring the projects before the Board. The Planning Commission can also suggest things that need to be done based on the Master Plan.

Woodward plans on presenting the entire Master Plan, along with the Appendices, to the Planning Commission at the next meeting. Then if the Board approves the Master Plan for distribution to the surrounding jurisdictions for comment, it is a 63-day comment period before the Master Plan can actually be adopted – probably looking at March for adoption.

IX. PUBLIC COMMENT

None

X. COMMISSIONER'S COMMENT

Smith indicated that road extension up Shiras Hills is out for bid. This project is resurfacing starting at the Carp River bridge, up and over Shiras Hills, heading towards Marquette, and would finish at Furnace Street. In addition, curb and gutter will be moved out 8 feet. The road will get widened 8 feet on each side.

Sikkema indicated that he had received two comments from residents on blight. One has brought it to the attention of the Township and says nothing has changed. The other one was just a general "township looks junky".

XI. DIRECTOR'S REPORT

Woodward stated she had not updated the Zoning Enforcement Report report due to absence due to illness.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

Mahaney referenced the November Township Board minutes – weight restrictions on Ortman Road. He thinks this is a good idea. He also agrees with W. Dees (letter in packet) on the inclusion of Cherry Creek Road. He bikes on this, and he feels that it is more of a residential walkway connector to neighborhoods. He feels that Cherry Creek Road should also have weight restrictions. He thinks CR 480 is better built for truck traffic.

Bohjanen indicated that he thinks Cherry Creek Road would be a long shot, as it was recently upgraded to a higher class of road. Cherry Creek is controlled by the County. Ortman Road was not built for truck traffic whereas Cherry Creek was.

Sikkema stated that anytime you are going to look at weight restricting, you should look at all roads in the entire jurisdiction. Cherry Creek Road is a County primary road – CR 551. This has the same classification as CR 480. Both are Class A all season roads. All decisions are related. Mahaney said the shoulders on CR 480 are wider than Cherry Creek, and Sikkema agreed. Sikkema said these things would be discussed, but you shouldn't cherry pick one road.

Bohjanen clarified that one reason Ortman Road was considered for restrictions was that it is unique in that it is a neighborhood street that does not need to be used as a connector between two highways because other options are available, and this is not similar to any other situation. Not many roads can be used as short cuts. Sikkema said he knows of other roads of the same classification as Ortman Road that have much higher truck traffic that are used as cut-across roads (i.e. Little Lake Road). Sikkema said he's not advocating for restrictions for Little Lake Road, he's just saying that everyone will start wanting weight restrictions on their roads, and the Township should be looked at in total.

Smith wondered who and why truckers would use Ortman Road as a cut-across. Speculation ensued.

Woodward indicated that the Township Manager is going to draft an ordinance which will come to the Planning Commission for discussion. Mahaney agreed that all roads should be considered, and Smith said traffic counts should be considered.

Woodward asked how the Planning Commission would like to handle Public Comment, such as the letter from W. Dees. She said public comment normally gets summarized in the minutes just like all other proceedings.

Sikkema initiated a conversation regarding procedures for handling written public comment, some of which is related to agenda items, and some of which is general in nature. Sikkema suggested that when the letters come in before the packet has been published, they go into the online packet. They are not read into record, they are just acknowledged or referenced. He stated that letters from the public should be treated equally – general comments that aren't agenda related should still be acknowledged. But there is a question whether written public comment must be read at the meeting, or should just be included as information received in the public packet online.

It was noted that public comment does not necessarily result in an agenda item, and may not be discussed. It must be received, and then a Commissioner can suggest adding it to the agenda.

Currently, letters to the Planning Commission that are received before the packet is published are included in the online version of the packet. If the letter is not received before the packet is published, and is just handed to the Commissioners at the meeting, they are not added to the online packet. We could go back and add to the online packet after the meeting.

When the public attends and gives verbal public comment, their comments are summarized as part of the meeting minutes – what actually happened at the meeting. If written comment is submitted, it is not read as part of the meeting, but it is included in the information packet for the Commissioners, and in the public packet online, either before or after the meeting, depending on when it is received. It will also be referenced as having been received in the meeting minutes. Written comment that is received as part of a public hearing is handled the same way, except that it is kept in the files along with the paperwork pertaining to that decision.

ADJOURNMENT

Sikkema adjourned the meeting at 9:06 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, January 19, 2015

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:15 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Eric Meister (Secretary), Richard Bohjanen (Board), Tom Mahaney, Bruce Ventura, Kendell Milton (arrived at 7:22 p.m.)

Members Absent: Andy Smith (Vice Chair)

Staff Present: Steve Lawry, Township Manager, Kelly Drake Woodward (Planning Director/Zoning Administrator), Suzanne Sundell (Administrative Assistant)

II. MINUTES

December 1, 2013

Motion by Meister, seconded by Bohjanen, to approve the minutes as written.

Vote: Ayes: 4 Nays: 0 Abstain: 1 Ventura MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Ventura, seconded by Mahaney, to approve the agenda as presented.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Greg Seppanen, 1019 Ortman Road, said he was there to represent the people on Ortman Road in regard to Item VII.A. Seppanen stated he would be happy to answer any questions.

Public comment was closed.

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

None

VII. NEW BUSINESS

A. Adoption of a Road Weight Limit Ordinance

Steve Lawry, Township Manager, introduced the draft of the proposed ordinance with some changes made based on the Township attorney's recommendations. Lawry stated that this was brought to the Township Board by the residents of Ortman Road. The possibility of recurring requests for similar regulations for other roads was considered. Lawry stated that there are very few roads in the Township that are connected at both ends, providing alternative routes for trucks. So there are only a few roads for which this proposed ordinance might apply. The State highways and the County primary system are designed for truck traffic, so there would be no

reason to restrict trucks from those roads based on weight. The ordinance has been written to apply to just Ortman Road, but could be modified to apply to additional roads should future connectivity occur in the system. Lawry pointed out that there are a number of exceptions provided for in the ordinance to allow for delivery of services to that road. Lawry indicated that it is usually the service vehicles that do more damage to the road, as they may drive half on pavement, half on the shoulder, which is the weakest part of the road. He doesn't feel that this ordinance will stop the breakup of the road as it is right now, but it should help to protect the road for the future.

Bohjanen asked what was considered a service vehicle. Lawry indicated snow plows, garbage trucks, school buses, utility trucks, and local deliveries.

Mahaney asked what other roads might fall under this ordinance. Lawry said that Carmen Drive is a similar situation, connecting to both Cherry Creek Road and US-41, but is basically just there to serve the businesses. Truck traffic is fairly heavy on it for deliveries to stores. It also serves as a turnaround point for road maintenance vehicles servicing the intersection. Lawry does not think there is much truck traffic on Carmen that is not related to the above activities. Lawry also indicated that Little Lake Road north of CR 480 is similarly situated, but was built to a higher standard a number of years ago, and doesn't really show deterioration because of truck traffic. Lawry also mentioned there are a few others such as Lakewood Lane and Riverside Drive which are connected on both ends, but are a much more inconvenient route for truck traffic, and he has not heard complaints about truck traffic on those roads.

Sikkema stated that he lives on Little Lake Road, and he has observed that portion of Little Lake Road being used extensively by commercial trucks, including several local excavators who do not live on the road. He said Little Lake Road is used as a cut across, rather than going up to the corner of CR 480 and US 41. He indicated that Little Lake Road is not built to a commercial standard – it is a weight restricted road built to the same standards as any other local road, not to a truck standard. Lawry indicated that he was told that MDOT had paid to upgrade it when it was used as a detour road for the highway. Sikkema (retired from MDOT) indicated that MDOT had put an inch of asphalt on it, but every spring it is weight restricted. He said that Little Lake Road is built to the same standards as Ortman Road.

Sikkema questioned whether the Humboldt Township Ordinance was a good model as it was a unique situation, and he thought that ordinance had been rescinded. Lawry indicated that Humboldt's ordinance had been recommended to him by the Marquette County Road Commission as language that was already in place in the County. Sikkema said he thought that both situations involve cherry picking a certain road for special regulations.

Sikkema then asked if there is any data on how many trucks are using the road. Lawry stated no.

Mahaney stated that he lives down the other side of Ortman Road that comes to the

intersection with Cherry Creek Road often, and he does not recall seeing any double trailer trucks going through there. He was wondering if it was a phase when they were doing the road construction on US 41.

Seppanen offered some background –he has lived on the road for around 30 years. After talking with other residents who live on Ortman Road and Apple Trail, it was agreed by everyone that truck traffic has been increasing over the last 10 years as more and more truckers find it a convenient shortcut. He said the truck traffic comes in waves. It was properly used as an alternative during road construction but the increased traffic has been hard on the road, especially near the sharp 90 degree turn. But the heavier use tends to coincide with area jobs when these types of deliveries are occurring (especially by local truckers). Sometimes, use is related to avoidance of the signalized intersection at US 41 and Cherry Creek Road. Seppanen said the problem is that Ortman Road is not on the list of roads to be repaired by the County Road Commission or by the Township because it requires major repairs. Seppanen is trying to extend the life of the road so that the Road Commission doesn't let it go back to gravel. He feels there are other viable options for truckers to use roads that are designed to handle truck traffic, and adopting this ordinance would mean less damage would occur on Ortman Road. He said the Township Board looked at this as a viable option and he hoped it would be acceptable to everyone, including truckers accessing Fraco on Cherry Creek Road and the Lindberg gravel pit on CR 480.

Mahaney asked if it is mostly local truck traffic. Seppanen discussed specific road users and reasons for use.

Sikkema indicated that he has several problems with this ordinance, first being why you would exclude any road. He asked why not put weight restrictions on all local roads? Then no one can ask why their road is not on the list.

Lawry pointed out the excessive cost of posting all roads with signs. He said the Board presented the ordinance to the Planning Commission to hold a public hearing to get public input. If there are other roads that should be included, they can be added into the ordinance. However, he said that there are very few through roads, and there is no point in posting the dead end roads because trucks wouldn't be accessing them unless they have a destination on that road, and they are exempt from the ordinance if they have a destination on the road.

Sikkema introduced an issue that was discussed in Humboldt Township – that any truck that originated in another township should get to the highway as close to their point of origin as possible, and enter another township only via the highway. That way roads such as Old Kiln Road, Cherry Creek Road, and Little Lake Road wouldn't be used by trucks originating outside the Township. For example, a truck coming from West Branch Township would be required to use CR 545 and US-41 and not Little Lake Road.

Sikkema stated that the ordinance looks like we are addressing the needs of one

part of the community by including only one road, and it should include the whole Township if anything is done. Lawry stated that the Board asked him to develop the ordinance in response to requests from the residents of Ortman Road, but also requested a public hearing to see if there are other problems in the Township. He asked the police and other staff to identify issues, and there no others were known. Lawry thinks it would be a problem to enforce the ordinance with no signage, and he doesn't think the Township can afford to post every road in the Township. Seppanen indicated that it sounds like Little Lake Road would be another road that should be included in the ordinance. Mahaney said he thinks it's a good ordinance but he doesn't like that it seems very selective.

Ventura said that in Section II of the proposed ordinance only one road is designated, but we could add part 2 that would state that we would allow other identified roads to be added in the future. Also delete Section IV as the stated conditions pertain only to Ortman road – instead state that there would need to be a better, safer alternate route for any road that would be proposed for weight restrictions. With those changes, Ventura would support the ordinance because he thinks there is a concern on more than one road. He agrees with others that we are singling out a certain road, and by tweaking the language it can be used when and where needed.

The Commissioners further discussed trucking activities, reasoning, and enforcement issues.

Ventura indicated that other jurisdictions have adopted these ordinances so there is precedent. Sikkema expressed a concern about diverting truck traffic to some other road or neighborhood – shifting the problem to a different set of people or a different agency. He feels that the Commission needs to make sure there is an issue that needs to be resolved before enacting an ordinance. We don't have data on how many trucks are involved.

Bohjanen stated there are only a few roads in Chocolay Township that are "truck suitable" roads – US-41, M-28, Cherry Creek Road, CR 480, and CR 545. Coming up with an ordinance that would restrict through traffic on any of the other roads would seem relatively easy. He thinks we would only need signs where the through roads intersect with truck suitable roads, so maybe a dozen signs, but that may be worth the prevention of the destruction of roads, even if it's only the one road. He said for the price of the signs you wouldn't even be able to pave the approach to Ortman Road.

Dick Arnold, 312 West Branch Road, said that he has a CDL license. He feels the Township is moving too fast. As a truck driver, he would never go down Ortman Road – he looks for the straight shot. He feels there should be more research on exactly how many trucks are going down that road. He has talked with Fraco, and they are willing to avoid Ortman Road. Arnold indicated that if they are local truckers, all you really need to do is talk with the owner.

Milton stated he would like to see a truck count on both roads, since there only seems to be two roads that are affected by this type of truck traffic. He doesn't know why anyone would choose Ortman Road as a shortcut – it doesn't seem logical. Sikkema indicated that he can see the logic if the truck is coming or going from Fraco. Various scenarios were discussed, such as avoiding the signalized intersection. Mahaney indicated that he has seen quite a few of the mine trucks on Cherry Creek Road. Seppanen indicated he had never seen a mine truck on Ortman Road.

Sikkema stated that anytime you enact an ordinance, you should have a good reason. The Planning Commission is guessing about how much truck traffic is actually on these roads. Milton stated that all they have at this point is resident complaints for information, and if residents are complaining, the Commission should at least listen to what they are saying.

Meister stated that if you do a count now you are not going to get the same results that you would get once the snow is gone because they're not hauling right now. Mahaney agreed that there needs to be more data. Meister asked if there are any other roads of concern besides Ortman Road and Little Lake Road. There were no suggestions.

Ventura moved, and Milton seconded, that the Road Weight Limit Ordinance be tabled until spring when a traffic count can be done on Ortman Road and Little Lake Road.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

Discussion ensued on how the count would be done. Sikkema stated that the Road Commission may have this data already. Lawry stated he had asked, and that they do not have the information. Various methods were discussed. Meister asked about subtracting the exempt trips. Seppanen reminded the Planning Commission that the truck traffic is sporadic, so the count may not be indicative.

Bohjanen stated that no matter how the count comes out, if it is decided to have the weight limit ordinance, he feels that both Ortman Road and Little Lake Road should be included.

Sikkema noted that the motion at this point was just to collect more data. Sikkema asked Lawry when he felt would be the proper time to do the road count. Lawry indicated that it would have to wait until the weight restrictions come off in the spring. Sikkema indicated that would be mid-May. By the time the counters were in place, it would probably be end of June before the count would take place.

Lawry indicated he would let the Planning Commission know what he hears from the Road Commission, and what the plans are for the counts. Counts may be collected for a few days or a couple weeks.

B. 2014 Annual Report Draft

Woodward introduced the draft 2014 Annual Report. She would like to have comment and suggestions on the Planning Commission portion.

Woodward put the 2014 priorities in the report, and noted what has been addressed during the year. She suggested the Planning Commission address the 2015 priorities at the joint meeting on February 9. A statement can be added to the report that the 2015 priorities will be added after the joint meeting.

Meister indicated that the report seemed very thorough to him.

Milton asked about the air raid siren. Lawry indicated that was a complaint about the fire pager system. The old siren had a lock on it so it would not go off between the hours of 9 p.m. and 7 a.m. When it was replaced with the new one, Lawry was not aware that the time lock was not on it. It has now been programmed with a time lock. Bohjanen wondered what happened if there was a fire during that time. Lawry explained that firefighters also carry a pager for notification. Ventura stated he is surprised that people would complain. As a former firefighter, he relied on the siren. Lawry stated that this siren has the capabilities of providing more than one tone, so it could also be used for alert warnings (tornado, etc.). Bohjanen stated that the siren also makes people in the neighborhood aware of an emergency circumstance, and helps them to be more aware of emergency vehicles pulling out of the station. Lawry indicated that this was a firefighter concern – that people not only be aware of fire trucks pulling out on the highway, but also be aware of the firefighters trying to get to the station to answer the call.

Sikkema asked if a motion was needed. Woodward indicated yes, since it is the Planning Commission's official report.

Meister moved, Mahaney seconded to approve the Annual Report as written.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

Milton commented on the small type used in the report.

VIII. UNFINISHED BUSINESS

A. Master Plan – discussion for final maps and joint meeting with Township Board

Woodward indicated she especially needed input on future road connections and multi-use paths, and particularly critical non-motorized paths that might be maintained all year round (anything from paved shoulders to separate paths). She had provided information on Complete Streets designs and strategies. She indicated that Lawry had suggested some possible new road connections for consideration.

It was suggested that some connections could be created through establishing an easement for a public walkway which would also serve as a placeholder for future road access. It was suggested that some connections could be justified for improved emergency access, such as situations in which an emergency could leave residents vulnerable due to only one access point. Lawry also pointed out that the police say

that dead end roads may actually help deter crime because there's only one way out in case of an alarm, and an unknown car is more conspicuous. The purpose of the discussion is to recommend beneficial road connections, and try to get them implemented with future property development plans. In particular, the goal is to avoid future cul-de-sac development in favor of the following connections at the time of future property development. The Commission discussed each suggested connection.

It was agreed that the road connections involving private roads would only be implemented if the residents want them. Recommended road connections involving at least one private road include (listed from north to south and west to east):

- E. Main St. southeast to Chocolay River Trail (there is an existing sewer easement in this area, and also a former rail grade with questionable ownership, and this may involve a waiver of public road standards for the private road)
- Ewing Pines Dr. south to Ortman Road
- Willow Road east to Cherry Creek Road in the vicinity of Fraco
- Cherry Creek Road east to Hidden Creek Tr.
- Hidden Creek Tr. South to Edgewood (Briarwood Subdivision)
- M-28 in the vicinity of Hiawatha south along Lion's Field and west to connect with Ridgewood or the cul-de-sac at the end of Candee Ln.

Recommended road connections involving public roads include:

- US-41 in the vicinity of the former Wahlstrom's restaurant east and south to M-28 behind the existing corridor development
- M-28 near Chocolay River Trail southwest to US-41 across from Veda St.
- M-28 near the hotel at the corner of US-41/M-28, southwest to US-41 near the connection to Carmen Drive
- Surrey Ln. south to Sandy Ln.
- Timberlane southwest to N. Big Creek Rd.
- **Cherry Creek Rd. south of CR 480 east to the vicinity of Truckey Court**
- **Little Lake Rd south of CR 480 east to S. Big Creek Rd.**

*Note bolded items don't show exact route, but indicate a need for connections between these existing roads, possibly achieved on flagged parcels

Recommended non-motorized connections include:

- A new trail connecting Baker Street to the proposed road connecting US-41

and M -28 behind the existing corridor development

- Along Ortman Rd.
- Along Lakewood Lane
- Trail connection of the Briarwood subdivision to other neighborhoods
- Connection along US-41 to the “Beaver Grove community”

It was recommended to designate the bike path on the west side of US-41 in Harvey as a critical path that will be maintained year round. The Township is considering purchase of equipment to keep snow blown off the path during the winter. The Commission wants to add a strategy to the Master Plan that entails writing a letter to legislators regarding plowing the road, road shoulders, and any non-motorized facilities, with a goal of preventing snow from being plowed onto these facilities. This might be a multi-jurisdictional effort. Woodward will talk to MDOT and the Marquette County Road Commission to get information about the specific statutes related to depositing of snow on roads, road shoulders, non-motorized facilities, etc. She will e-mail this information to Sikkema for the next meeting.

The Commission read and discussed a fax from Mark Maki dated January 15, 2015. Short-term rentals were briefly discussed as in the Master Plan. Sikkema is opposed to short-term rentals. Meister would like to see this explored further as there are some good reasons for it, and most people are responsible. He thinks these uses can be regulated and controlled. Mahaney said he thinks it’s worth exploring because it’s a good way for people with fixed incomes to earn some money. He cited an example of 10,000 people who attend the Birkebeiner ski race and rent area homes for a long weekend. These people do not create a problem in the neighborhood, and it draws tourism. Meister says it also gives people access to Lake Superior. Bohjanen said this plan is for the future, and things change. The neighborhood and the demands of the community change peacefully over time. He doesn’t think we should write something into the plan to prohibit that, but it should enable it to happen when the time is right. Sikkema said the regulations should be clarified in the zoning ordinance. He thinks Lakewood Lane is a residential, not a resort, neighborhood. The community should have input. Meister said the plan indicates it will be considered, not necessarily allowed.

X. COMMISSIONER’S COMMENT

None

XI. DIRECTOR’S REPORT

Woodward discussed concerns that developed as a result of updating the current zoning map. She said the Township had received verification of the successful DNR Trust Fund grant for Lion’s Field. The Township will also receive free consulting assistance from ENP Associates in food systems regulation, particularly processing and retailing. This will be of future assistance for zoning ordinance updates consistent with the Master Plan. Woodward also created a sewer system map.

SPECIAL MEETING
CHOCOLAY TOWNSHIP BOARD
CHOCOLAY TOWNSHIP PLANNING COMMISSION

February 9, 2015

A Special meeting of the Chocolay Township Board and Chocolay Township Planning Commission was held on Monday, February 9, 2015 at the Chocolay Township Fire Hall 5010 U. S. 41 South, Marquette, MI. Supervisor Walker called the Township Board meeting to order at 6:40 p.m.

Planning Commission Chair Sikkema called the Planning Commission meeting to order at 6:40 p.m.

PLEDGE OF ALLIGIANCE.

TOWNSHIP BOARD.

PRESENT: Gary Walker, John Greenberg, Judy White, Mark Maki, Susan Carlson, Richard Bohjanen.

ABSENT: Max Engle.

TOWNSHIP PLANNING COMMISSION.

PRESENT: Andy Sikkema, Tom Mahaney, Kendell Milton, Richard Bohjanen (on both boards) Andy Smith (arrived at 6:45) Bruce Ventura (arrived at 6:50 pm).

ABSENT: Eric Meister.

STAFF PRESENT: Steve Lawry, Kelly Woodward, Dale Throenle, Mary Sanders.

AGENDA.

The purpose of the Special Township Board/ Planning Commission meeting is to discuss the draft Master Plan and Planning Commission 2015 priorities.

Maki moved Bohjanen seconded to approve the agenda as presented.

AYES: 6

NAYS: 0

MOTION CARRIED.

PUBLIC COMMENT.

Tim Kopacz, 3 Hidden Creek Drive –His property is proposed to change from A/F to Rural Residential in the new Master Plan and he is in favor of that. He recommends maintaining the previous minimum lot size of 2 acres from the previous Rural Residential zoning district.

Jennifer Bruggink, 673 Lakewood Lane- Commented on the new Master Plan; and strongly opposes allowing waterfront property being used as resort or short term rental. She lives next to a house that was a single family home and it is now being rented by the week in the summer. There are problems with fireworks, parties, trash etc. She feels it has brought her property value down.

Tim Trobridge, 216 Timberlane - He would assume that there is a noise ordinance that would deal with fireworks or whatever it is that would bother neighbors. He thinks people purchase property to retire here later, and rent the property in the meantime. He feels that it would be almost impossible to enforce a prohibition on vacation rentals and would invite litigation.

PRESENTATIONS.

Supervisor Walker presented a Resolution of Appreciation to Susan Carlson, as she is stepping down from her duties as Chocolay Township Trustee.

For her dedication to the Township and its citizens as

Township Trustee from December 2008 to February 2015,
Her commitment to the Township included participation on the Personnel Committee, Election
Committee and assisting with the origin of the Chocolay Senior Center

SUSAN CARLSON

We do express our appreciation on behalf of the Township Board.
DATED THIS 9th DAY OF FEBRUARY, 2015 AND RECORDED IN THE OFFICIAL RECORD

PRESENTATION / DISCUSSION OF THE 2015 DRAFT MASTER PLAN.

Kelly Drake Woodward, Planning Director introduced the February 4, 2015 draft of the Master Plan. She thanked Dale Throenle for countless hours of work formatting the document. After tonight's discussion of the draft Master Plan, The Planning Commission will need to make a motion to submit the plan to the Township Board for review and comment and approval to distribute the plan to other interested parties for a 63 day comment period. After the 63 day comment period, the Planning Commission is required to hold a public hearing, and consider all comment received before officially adopting the plan. The plan can be revised before final adoption.

The Township Board and Planning Commission had a lengthy discussion on the Master Plan including allowing short term home rentals of residences, Mixed Use zoning districts and expanding the Commercial District.

Trustee Maki felt that the survey asking the question on short term rental is not conclusive because an individual could answer the survey multiple times. Short term rentals in residential areas in Chocolay Township have not been allowed in the past 38 years. We really need to quantify what short term rental means. Residents can now legally rent their house for 30 days or longer.

Trustee Carlson knows people that currently rent lakefront property in Chocolay Township for vacations and do not cause problems. There should be enforcement if renters are causing problems.

Commissioner Sikkema feels that short term rental could be disruptive in a predominately residential neighborhood. If it is not restricted, more people will own homes to rent out as a commercial enterprise.

Supervisor Walker feels that the current ordinance is not clear on short time rentals, and there is no record of past enforcement taken. He feels that there is a major difference between a resort rental and a short term rental of a private home. We would most likely be defending that portion of our zoning ordinance in court. Right now a Bed and Breakfast is a conditional use, so it might be hard to say you can't rent your home.

Trustee Carlson suggested we look at Shelter Bay's regulations.

Treasurer Greenberg suggested that we look at wording for the zoning ordinance that states the owner must live in the residence at least six months out of the year.

Trustee Maki said that in the past, enforcement was difficult unless there was a complaint. The enforcing agent can now use the internet to look for advertising for residences that are doing short term rentals. There is also a law that states if you rent out your residence for more than 14 days you lose your homestead tax classification.

Trustee Bohjanen stated that the paragraph in the Master Plan pertaining to future land use in regard to short term rentals could be considered for implementation as a conditional use. That would involve contacting the neighbors within 500 feet of the property for input on the issue. There could possibly be areas of Lakewood Lane that would not object to it.

Commissioner Sikkema said we need a detailed poll to see what people want.

Supervisor Walker feels that we should use the term short term rental not resort rental.

Commissioner Mahaney commented that he has stayed at vacation rentals across the United States and they draw beneficial tourism. All of them have a list of rules and a deposit must be paid to ensure proper behavior when staying at these places. He feels that we need to further discuss short term rentals.

Commissioner Ventura commented that people look at their home as having certain rights and they may feel that renting their home short term is a right. If we pass an ordinance that denies them that right we may open ourselves up to takings. If it went to court, we would probably lose unless the ordinance is written very carefully. The courts tend to side with the homeowner.

Trustee Maki questioned the mixed use area. He feels that it would be too difficult to monitor. Putting all the layers of protection is a great concept, but not practical. He is concerned that the lay out of the Mixed Use Zoning will create strip development.

Trustee Bohjanen does not understand what the problem is with strip development? If you have three businesses in a row with separate driveways, it is called strip development.

Commissioner Sikkema stated that it will be hard to move forward with any type of business growth without sewer and water. Does the Board want to move forward with sewer and water in the Township that will encourage business development?

Supervisor Walker said that we cannot consider sewer and water without imposing taxes to pay for that. He is not sure our residents want that.

The Planning Commission has been discussing accessory dwellings, raising of animals, planned unit development, cluster development, form based code to encourage redevelopment, what to do with the vacant commercial area in Harvey and junk car ordinance. By showing future road connections, they hope to avoid future cul-de-sac development and promote better connectivity.

Milton moved Ventura seconded, that after thorough consideration of the February 4, 2015 version of the Draft Charter Township of Chocoy Master Plan 2015 Edition and subsequent formatting edits, the Planning Commission submits the draft plan to the Township Board and recommends that the Board approve the distribution of the subsequently revised February 9, 2015 version draft plan for comment as provided in the Michigan Planning Enabling Act with pictures included.

NAYS: 0

MOTION CARRIED.

White moved Carlson seconded that after review of the February 4, 2015 version of the Draft Charter Township of Chocoy Master Plan 2015 Edition and subsequent formatting edits, the Township approves the distribution of the subsequently revised February 9, 2015 version draft for comment as provided in the Michigan Planning Enabling Act.

AYES: 5

NAYS: 1 (Maki)

MOTION CARRIED.

DISCUSSION OF PLANNING COMMISSION 2015 GOALS/ PRIORITIES.

- Looking at the Junk Car Ordinance and unlimited trailers on a parcel of property

Trustee White gave accolades to Planning Director Woodward and the Planning Commission for the wonderful document they put together in the Master Plan. She also thanked Dale Throenle and Suzanne Sundell for the beautiful lay out of the 2014 Annual Report.

Supervisor Walker read comments from Township resident Jean McLean, in favor of short term rentals.

PUBLIC COMMENT.

Jennifer Bruggink, 673 Lakewood Lane- Commented again on short term rentals and the problems it causes for the neighbors.

Supervisor Walker adjourned the meeting at 9:20 pm.

Max Engle,
Clerk

Gary Walker
Supervisor

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, February 16, 2015

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:00 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Richard Bohjanen (Board), Tom Mahaney, Bruce Ventura

Members Absent: Andy Smith (Vice Chair), Eric Meister (Secretary), Kendell Milton

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Suzanne Sundell (Administrative Assistant)

II. MINUTES

January 19, 2015

Motion by Bohjanen, seconded by Ventura, to approve the minutes as corrected (correct spelling of “at” to “that” on page 2, last sentence).

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

February 9, 2015 (Joint Township Board and Planning Commission)

Motion by Ventura, seconded by Bohjanen, to approve the minutes as written.

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Ventura, seconded by Bohjanen, to approve the agenda with additions (Unfinished Business – VIII.D Road Weight Limit update).

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Dick Arnold, 312 West Branch Road, commented on the definition of a “building” in the zoning ordinance. Particularly the last portion which describes a building thus; *“it shall also include trucks, vans, recreational vehicles or other vehicles or parts of vehicles situated on private property, and used for the purposes of a building, whether or not mounted on wheels.”* He feels that including these items in the definition of a building is inviting junk.

He also thinks we need a definition of a farm, because he is concerned about the number of farm vehicles you can have on your property in relation to activity level.

He also questions the fact that you can have as many accessory buildings as you want, as long as you meet setback requirements. He feels this is wrong. There should be a limit on the number of accessory buildings. For example, on Riverland Drive, a resident has a house with an attached double garage, detached single garage, and also an approximately 25' x 45' metal building, yet he still has five junk cars sitting outside.

Arnold is opposed to zoning for more business on M-28. He pointed out the businesses that are sitting empty right now – over by Main Street Pizza there are four units, with three units empty, along the strip mall there are eight units, with two units empty and one has never been rented. He feels we should do some public relations and improve the areas we have. He has worked all over the U.P. and feels there is only one place that has a worse business district than Chocoday, and that is McMillan.

Public comment was closed.

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

None

VII. NEW BUSINESS

A. Adopt a resolution to hold a public comment period and public hearing on the Master Plan.

Woodward indicated she would like to be able to adopt the resolution so the public comment period can be opened up. After the 63 day comment period for surrounding jurisdictions and other agencies, there would be a public hearing. There will be a newspaper ad on this.

Bohjanen wondered if a report could be given at the next meeting regarding comments received to date. Woodward indicated that would be possible, and said we anticipate comments from the County at least.

Ventura made a motion to adopt the resolution to hold a public comment period and public hearing on the Master Plan, seconded by Bohjanen.

Resolution for a Public Comment Period and Public Hearing

For the Draft Charter Township Master Plan 2015 Edition

Whereas the Charter Township of Chocoday Planning Commission has supervised an update to the 2005 Charter Township of Chocoday Comprehensive Plan to replace the Plan adopted on August 15, 2005; and

Whereas the notice of intent to plan was sent to surrounding jurisdictions and other required parties per the Michigan Planning Enabling Act 33 of 2008 on March 11, 2010; and

Whereas the public provided input to development of the Plan via a public meeting held on September 22, 2010, and was given further opportunities to provide input through two public opinion surveys conducted in 2010 and 2013; and

Whereas the Charter Township of Chocoday Planning Commission and the Chocoday Township Board of Trustees have reviewed the draft Plan over the past 15 months, and provided comments for its refinement which have been incorporated into the Plan; and

Now therefore be it resolved that the Charter Township of Chocolay Planning Commission does hereby set a public comment period to begin on February 20 and end on May 18 at 3 pm;

Be it also resolved that the Charter Township of Chocolay Planning Commission does hereby schedule a public hearing on the Draft Charter Township of Chocolay Master Plan 2015 Edition to be held at their regular meeting on May 18.

Roll Call Vote:

Ayes: Andy Sikkema, Richard Bohjanen, Bruce Ventura, Tom Mahaney

Nays: None

Absent: Andy Smith, Eric Meister, Kendell Milton

VIII. UNFINISHED BUSINESS

A. Master Plan – Review final draft version, particularly the parts of the implementation plan that relate to potential Planning Commission tasks.

Woodward indicated that the Commission had been given a draft that contains photos and additional corrections that have been implemented since the Joint Meeting. She asked for any further input on the Plan, especially the regulatory tasks and other strategies, and indicated the wording was not changed, just the formatting.

Bohjanen indicated that he had a comment on page 15 about an ironic statement in the Master Plan (from the public survey, regarding the characteristics of rural character) that may not be in keeping with the rest of the Master Plan – *“Living in a place where you don’t have to deal with a lot of government regulations.”*

Mahaney had a comment on Page 126 – after listening to Greg Seppanen’s concerns about through traffic, his concern is with TC-2.4 *“Possible new road connections that provide multiple access routes into residential subdivisions, businesses, and other activity centers are depicted in Appendix G”*. He feels that putting new road connections into some of the neighborhoods would really change the character of that neighborhood, because people sometimes moved into a cul-de-sac for that reason – they don’t want to be bothered by through traffic. He doesn’t feel that this is a wise idea. He also disagrees with TC-2.6 *The Township will collaborate with Sands Township on a possible secondary access road connecting neighborhoods along Ortman Road west of Cherry Creek School with those along Silver Creek Road west of the Township Hall*. Mahaney lives off that road and there is a lot of walking traffic, with dogs, strollers, kids. This is a very residential neighborhood, and he sees no benefit. Putting in a through road would increase the traffic and the speed. Pretty soon you would have it connecting to M-553.

Woodward indicated the reasoning behind the “possible” new road connections was for improved public safety in case of emergency. The people on Willow Road only have one way out on Silver Creek Road, just like some people in western subdivisions (many in Sands Township) only have one way out on Ortman Road.

Mahaney indicated that people move there knowing there is only one way out. He doesn't feel it is such a good idea.

Sikkema indicated that previous discussion was that these roads would not be constructed unless the community asks for them. Some people don't understand what they are buying into when they buy on a private road. On the other hand, there are some people that buy into a private road knowing what to expect. There are some difficulties in managing development on private roads.

Ventura indicated that on Timber Lane there are around 175 residents which all exit on one road. If that exit would get blocked for some reason, there would be no alternative exit. Also, around 7:50 AM cars trying to get out on M-28 are backed up 6-8 cars deep. Ventura stated that he is one that would prefer a second way out. Mahaney indicated that he did not think that would change the character of that neighborhood. Ventura stated he did not feel it would become a cut-through, as it would be longer and winding. Sikkema stated that the person who lives at the end of the lane may not feel the same way.

Sikkema stated he feels that the local neighborhoods need to be consulted before doing anything with the roads. Mahaney indicated that just because the Township or Planning Commission feels a change needs to be made, that doesn't necessarily mean it would be what the neighborhood wants.

Bohjanen stated that the neighborhood connectors are far less likely to happen unless you had a compelling reason to do it, such as consensus with the neighbors or a health and safety issue. He feels that these proposed roads are just conceptual, but would enable more use of the land. He said the connection east of Willow Road will probably not happen, but the proposed new roads in the vicinity of the US-41/M-28 intersection are more probable since that would create more opportunity for property owners and potential business owners.

Sikkema indicated the maps show the Commission's thought process – as the property develops these designs can be incorporated into the development. He feels it's good to have it in the Master Plan.

Woodward said there are no strategies in the Capital Improvements section that indicate the Township will build these roads. There is language that was agreed upon by the Commissioners in Appendix G as follows, "This plan acknowledges that some new road connections should be implemented to provide improved emergency access, especially in situations where residents are vulnerable because their neighborhood has only one access point. The following connections are recommended as beneficial for implementation at the time of future property development." Woodward also reminded the Commission that they had expressed a goal to prevent future cul-de-sac development in favor of providing through connections. The plan also states that "the suggested locations are approximate, and do not indicate a requirement for any particular parcel. Additionally, it is intended that future road connections involving private roads will only be

implemented if the residents are in favor.”

Sikkema stated that he feels the Planning Commission is in consensus that this will not be imposed upon neighborhoods – they would need to approach the Commission. Ventura indicated the importance of the wording that indicates it will be considered when future development happens.

Sikkema asked for the Master Plan to be tabled for next meeting to consider in more detail.

B. Finalize Planning Commission priorities for 2015

Bohjanen stated that a lot of the priorities are going to work side by side – it will take months to be able to do these. He sees nothing on the list to eliminate, but may want to review the list and renumber the priorities.

Sikkema stated that he agrees with the “Finish unfinished proposed zoning ordinance amendments”, as this is something that should be done. Woodward stated there are only two of them. But when it gets to amending the Zoning Ordinance to implement the Zoning Plan of the Master Plan, there are some philosophies that must be discussed – how far does the Planning Commission go into converting over from our current zoning classifications to what is in the Master Plan. He feels that if we start by building a hierarchy and work down, it may become more manageable – go into major conversations first.

Woodward said in moving forward with implementation for the Zoning Plan, it might be useful to explore some zoning topics in more detail. She proposed that she could prepare a presentation for each meeting about a certain zoning topic of concern with discussion following. This would not be done with the idea of making any zoning changes immediately, but as an information gathering tool. Woodward would make this one of her priorities if the Planning Commission was interested. It was agreed to do this.

Sikkema indicated he would like to further explore the zoning classifications. Ventura agreed that a presentation on this topic would give people an idea of what certain terms mean, as he feels there are some misconceptions. Woodward suggested going through an exercise to think about which specific land uses might be appropriate for different areas to help with zoning classification. This could take several meetings to work through. Sikkema suggested that zoning classifications should be the topic of March’s presentation. Woodward stated that once you decide which land uses could be appropriate, you have to then decide what conditions might be associated with that use, if any. This is an example of how looking at the topics in greater depth would help.

Woodward asked for clarification of what is meant by the zoning classifications – Sikkema indicated it was how current zoning classifications would translate into the future ones. Sikkema thinks that as a Commission they have to decide if they want

to tackle changing the classification structure, and then changing the classification of specific parcels. The Master Plan would be the guide for these changes. Mahaney asked about the motivation for changing the zoning classifications. Woodward stated that, for example, the Commission said they wanted to add a Rural Residential district because of concerns about residential protection in rural areas – concerns such as the size of accessory structures and kinds of uses allowed in more densely developed areas, etc.

Mahaney suggested the residents should be involved. Sikkema agreed we should try to better inform residents about what the potential changes would mean, and he wants people to voice their opinion – they should be more informed. Bohjanen indicated there was a public comment at the joint meeting where after much discussion the resident stated her impression that she wasn't being heard.

Woodward stated what she needed was a list from the Commissioners on the topics they may want covered. The Township can provide notice on the website that will tell people what the topic of the month will be. Sikkema indicated it should just be one topic at a time and we should also publicize it on the message board.

Sikkema stated he wanted to know if the plan is to change the zoning classification structure. Woodward referred the Zoning Plan in the Master Plan. Bohjanen indicated that the Master Plan vision may not be appropriate to implement immediately, but at some time it may become appropriate. He said we probably don't need to look at everything at once – we may implement portions of the plan in phases. Woodward said she will give some thought as to an implementation schedule and the steps that would be involved.

Bohjanen asked about the Asset Management Plan for Township roadways. Woodward stated that Steve Lawry, Township Manager, with staff assistance had started entering road rating data into Roadsoft Software last fall. Lawry is developing a road plan for the Board. Bohjanen feels that the plan should probably go through the Planning Commission before going to the Board. Sikkema indicated that he has done road asset management previously, and sometimes the results seem counterintuitive – one road gets fixed even though it looks good in order to preserve it for a longer period of time, at the same time a road that has gone beyond its life expectancy may not be immediately prioritized. Residents have a hard time with this.

Sikkema would like to have Jim Iwanicki or Kurt Taavela come talk to the Planning Commission about asset management, and how the Road Commission may be able to help us. Woodward will contact the Road Commission.

Woodward asked about putting the monthly presentations on the Priority List – Priority 1. Ventura suggested moving "Begin planning for implementation of high

priority Master Plan projects” from Priority 2 to Priority 1.

Mahaney wondered about moving the “Plan for four-season transit facility” up higher on the priority list for grant purposes. Sikkema suggested we make a presentation to the County Transit Board to try to gain their support. He will have more time available and offered to work on it. Mahaney stated this would really enhance the community. Woodward stated that the Silver Creek Church expressed the desire to have a transit stop near their facility. Woodward stated she will send a copy of the draft Master Plan to the Chairman of the Transit agency board.

Ventura stated that he would like guidance from the Trustees on the land use decisions such as short-term rentals – he feels they are elected officials and they get input from the public and should make the decision.

Woodward asked if “Short-term Rentals” is something that should be discussed as one of the zoning presentations and discussions at their meetings. Ventura feels the issue is being forced on them and thus has to be addressed. Sikkema indicated that since the Master Plan is still in the beginning stages, he would not be opposed to moving this topic to the top of the list of discussion. Ventura stated this might hold up the Master Plan. Bohjanen stated that we are just laying the groundwork for the Master Plan by approving the resolution to make it available for public comment and a public hearing – we aren’t able to move the Master Plan any faster than that.

Woodward wondered if the Commission was talking about going forward with a zoning ordinance change regarding short-term rentals. Ventura stated that if the Trustees see clear to delineate a clear direction regarding short-term rentals, they can direct the Planning Commission to draft provisions to accomplish that. He does not feel it should be a Planning Commission decision whether to allow short-term rentals. Sikkema suggested Woodward provide information on current ordinance provisions and issues of enforcement. Woodward stated that staff has agreed that an attorney opinion is needed on current ordinance interpretation and enforcement, and she is seeking approval for this expenditure. Sikkema suggested that this be put on the agenda for next month so that the Commission can communicate to the Board what assistance and direction they need to move forward. Ventura questioned the statement made at the Joint Meeting that someone renting their residence for more than two weeks would lose their homestead exemption, and there was discussion on whether that was a valid statement. He asked Woodward to check into that before the next meeting. Sikkema suggested that “Short-term rental” be moved to Priority 1, and that it be the topic of discussion at next meeting rather than the zoning classification. Woodward indicated she will get the information together, along with options on how to proceed.

Mahaney asked for an update regarding accessory homesteading provisions. Bohjanen asked for clarification on the exact meaning of accessory homesteading.

Woodward stated that at one point, the Planning Commission had discussed this as a way to handle local regulation of animal agricultural activities as accessory to residential uses. At the time, the Planning Commission decided that more public input was needed, so this prompted the 2013 public opinion survey. Bohjanen asked if accessory homesteading activities were mostly related to small farming operations as opposed to mixed use, such as mother-in-law homes, etc. Woodward stated it is mostly about urban livestock. She explained that the reason it was called accessory homesteading was to differentiate from agricultural regulations in the Right to Farm Act, so there might be some portion of local control.

Woodward sees the Short-term Rentals, Accessory Homesteading, and Accessory Housing Units and several others as being the topics of interest to be explored during the next year, before any attempt is made at zoning changes. She suggested the Planning Commission could implement zoning changes in a piecemeal fashion or work on it over a period of time and implement all changes comprehensively. This would be a Planning Commission decision.

Sikkema wanted to avoid having an activity allowed as part of a piecemeal zoning change and then prohibiting it with a future zoning classification change. Mahaney stated he thought the Accessory Homesteading provisions were related more to a land use area formula than zoning district. Woodward stated that a land use doesn't necessarily have to relate to zoning districts – it could be related to available land area for a particular purpose.

Woodward said she thinks it's beneficial to present clear alternative approaches to the citizens when asking for their input as opposed to asking a general question. She also suggested that the proposed information sessions will help by introducing the topic and educating folks on the options, which may help to get some buy-in for change. The Commission further discussed the process for future implementation of zoning changes, such as community workshops, neighborhood meetings, etc.

Sikkema indicated that once the Priorities are set, they should be copied in the Planning Commission binders for every meeting to keep everyone focused.

C. Provide direction for potential revisions of Ordinance #55 and the Zoning Ordinance related to parking of vehicles and storage of vehicle parts.

Woodward stated that the current ordinance is pretty good – there are areas of concern, such as the unlimited number of trailers you can park on a property. People seem mostly to object to things they can see – such as junk vehicles, or big vehicles, such as motorhomes, parked in the front yard or along their adjoining property line blocking their view of the neighborhood. She asked whether it is important to control the number of trailers, or more important to address where/how they are stored? Some ordinances state these vehicles cannot be parked in the front yard, but not everyone can park in the side or back yard, so there may need to be a

provision for exceptions if there is proper screening or inability to park elsewhere on the lot. She said the Commission may want to address the number of trailers that can be stored on a property. But one consideration is whether it's less problematic for people to store their trailers on their own small parcels in a neighborhood with limited screening options, or to allow them to be stored on someone else's larger parcel out of view (meaning some parcels might be approved as a multiple storage area). Woodward asked for direction on how to approach the issue – should regulations relate more to zoning district, or parcel size, or screening?

Sikkema had a number of suggestions – there are some things that may be difficult to enforce. “Lawn equipment” may need to be added to the definition of “motor vehicle” in 3B. Woodward indicated we may want to include aircraft (in the case of a helicopter parked in a yard). Mahaney stated the definition does include “...every vehicle which is self-propelled by means of an engine, and shall include but is not limited to...” So these items are covered. Ventura said that it would be more correct to say motor instead of “engine” (for electric vehicles, for instance). Sikkema said every time it mentions “essential parts of the engine”, the words “essential parts of the drive train” could be substituted. By changing to drive-train, it would include other parts such as the transmission, axles, drive shaft, etc that are needed to propel the vehicle forward. Ventura indicated that the language may be constrained by the 1949 Public Act 300.

Bohjanen objects to the run-on sentences that need a diagram to untangle or that communicate an unclear message.

Sikkema then brought up Section 4A.2 – “Two vehicles or trailers, or a combination thereof, that are temporarily inoperable because of mechanical failure and are not in any manner dismantled, and have all main component parts attached.” Woodward asked if they are not dismantled, how would she know if they are not working just by looking at them? Sikkema then asked what defines a mechanical failure – are flat tires included? Woodward has seen ordinances that have provisions related to vehicles having to be “regularly used for its intended purpose” to be parked or stored outdoors, but it is difficult to determine how often a vehicle is used, except that you have evidence that a vehicle is not being used in the winter if the snow is not removed or the path plowed. Commissioners thought this would be difficult to enforce and could cause delays.

Bohjanen stated he thinks the issue is related to zoning districts and property size – considering this could solve most of the problems. Sikkema stated that one of the recurring problems is people storing trailers that they don't own on their property, such as trailers belonging to relatives. Another would be storing semi-trailer vans with no restrictions on the number of trailers per property. He doesn't think dismantling the semi trailer and using the body for storage is allowed because then you'd have a vehicle “part” stored outside, which is not allowed. There is also the question of the number of agricultural vehicles or equipment allowed on a property.

Bohjanen asked where it says unlimited number of trailers. Sikkema stated it doesn't say unlimited, but there is no limitation stated. They can be stored outside as long as they are duly licensed and operable, etc.

Bohjanen asked if there is much of a problem with using a semi-trailer for a storage unit. Maybe it's better than having all that stuff lying around the yard. He also thought another thing missing from the discussion is the implication of leaking fluids. If equipment is not being used, sooner or later it will leak fluid. Sikkema stated that this has been talked about, and assumed it's regulated by the MDEQ.

Woodward said we could have a provision that exceptions to the rules require special review and approval if certain standards for screening, lot size, etc are met. Sikkema asked that an example of such a provision be provided for the next meeting.

Bohjanen stated that lot size is important, but he feels setbacks and screening are more important. Woodward stated that most ordinances that have setback requirements just reference the setback requirements of the zoning district in which the property is located, but sometimes they just have a fixed setback number regardless of zoning district. Bohjanen stated that the smaller lots are probably not as likely to accumulate a number of trailers, but if there was a requirement for a limited visibility screen, such as a fence or a hedge, that would make a difference. If you have a height limitation, they would have less impact.

Sikkema said it's not as reasonable to complain about the seasonal storage of a recreational trailer in the side yard when that trailer is in regular use, but it's more of an issue if someone were to purchase a semi-trailer and leave it parked in the side yard all the time for storage.

Woodward asked how the Commission wants to handle semi-trailers. In the above instance, the requirement for regular use would prohibit the semi-trailer permanently used for storage. Ventura indicated that one of the keys to the issue with the trailers is if they are out of sight, it is not an issue. Woodward suggested a requirement that if they have more than one trailer stored on the property, the additional trailers have to be stored out of sight and screened. Ventura said that's getting close.

Sikkema stated that in order to get people to move here, we have to be able to protect their investments. He appreciates Bohjanen's point that we don't want to restrict people from using their property, as long as they don't degrade their neighbor's property. Mahaney thinks lot size could come into play.

Ventura moved, seconded by Bohjanen, that the discussion on Vehicle and Nuisance Ordinance – Ordinance 55 – Vehicle and Trailer Parking be tabled until the next meeting.

AYES: 4 NAYS: 0 MOTION CARRIED

Ventura asked if a private road has a right-of-way. Sikkema indicated that it has a 66 foot private easement, not a right-of-way.

D. Road Weight limit update

Steve Lawry, Township Manager, indicated that he talked with Jim Iwanicki of the Marquette County Road Commission after the previous meeting, and asked if the Road Commission would be willing to do the truck counts. He was informed that they are willing to do the counts on both Ortman Road and Little Lake Road after the seasonal weight restrictions are removed – May at the earliest. No details have been worked out yet, but Lawry anticipates a data collection time of two weeks on each road. Lawry indicated that at this time there didn't appear to be any other roads in the Township that warranted counts. This could change as traffic patterns change.

Ventura asked if the counters have the ability to discriminate between car and truck traffic. Lawry indicated that his understanding is that they are based on the timing of the axles striking the hose – if close enough it counts as a double axle. If you have a pickup truck pulling a trailer, it may count as a truck. It is not actually measuring the weight, just the timing between axle strikes.

Lawry indicated we may not be able to do both roads at the same time. He has not tried to set dates as yet, since it has been mentioned that the traffic tends to be sporadic. We would try to work things so the counters could be placed when activity seems to be starting. Sikkema indicated that last year was an unusual year for Ortman because of the construction that was going on.

IX. PUBLIC COMMENT

None

X. COMMISSIONER'S COMMENT

None

XI. DIRECTOR'S REPORT

Woodward indicated that in the area of enforcement, for the next couple months she will be working on things identified by the assessor as possible violations due to failure to obtain a permit. After the snow melts, she will become more aggressive on the other types of violations. For the upcoming meetings, she will be working on presentations on short-term rentals, accessory dwelling units and tiny homes, and mixed use compatability.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

None

ADJOURNMENT

Sikkema adjourned the meeting at 9:07 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, March 16, 2015

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:03 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair) (arrived at 7:25 p.m.), Eric Meister (Secretary), Richard Bohjanen (Board), Tom Mahaney (arrived at 7:04 p.m.), Bruce Ventura

Members Absent: Kendell Milton (excused)

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Suzanne Sundell (Administrative Assistant)

II. MINUTES

February 16, 2015

Motion by Bohjanen, seconded by Ventura, to approve the minutes as written.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Sikkema asked if there was anyone there on a specific topic – John and Irene Janofski indicated they were there for the Lot Split Application (Item VII.A). Sikkema proposed that this topic be moved up in the agenda to accommodate the Janofski's.

Motion by Ventura, seconded by Meister, to approve the agenda as amended (New Business item VII.A Lot Split Application to be heard after item V. Public Hearings, and before Item VI.A Presentations)

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

None

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

A. Land Use Explorations – Short-Term Rentals of Single-Family Homes, Kelly Drake Woodward, Planning Director/Zoning Administrator.

Woodward stated this presentation is the first in a series of land use explorations related to future zoning decisions that may arise in implementing Master Plan recommendations. The first topic is the short-term rentals of single-family homes, which are sometimes called vacation homes.

Woodward suggested the first step in the decision process is to determine if there are existing problems or anticipated future problems associated with short-term

rentals of single-family homes that need to be addressed. If we cannot clearly identify or articulate such problems, then we may decide not to proceed further at this time. If we can clearly identify and articulate such problems, then we may move on to the next step, which is to evaluate current regulations – zoning or general ordinances – and see if they adequately address the identified problem. If the answer is yes, the problems are adequately addressed by current ordinances, then we proceed no further. If current regulations are deficient, we proceed to the next step which is to research and investigate various regulatory approaches, get public input, and then adopt regulations.

Woodward has divided the presentation into four areas: (1) Land Use Introduction; (2) Problem Identification: Past / Present / Future; (3) Regulation: Past / Present; and (4) Exploration of Future Approach.

Woodward compared short-term rentals of single-family homes with various lodging uses. Short-term rentals vary in intensity according to the frequency of the transient use and level of direct supervision (presence of manager or owner). To the outside world, the impact may be similar to friends, family or a housesitter visiting a single-family home, with or without the homeowner present. Woodward feels the single defining characteristic of a short-term rental is transient use of a single-family home. It may be an accessory or principal use of the home depending on the circumstance. This is in contrast to hotels or motels, which are a principal lodging use which may also involve other accessory uses such as bars or restaurants. Woodward also showed examples of short-term rentals available in our area as advertised on different websites, including the Lake Superior Community Partnership.

For Problem Identification, Woodward stated that she has searched through historical Township records, and finds no evidence of violation notices or citations issued in the last 10 years related to short-term rentals of single-family homes. The Township Attorney has also searched his records to 1997, and has found no instances of the Township prosecuting violations relating to “vacation rentals”. In recent Commission meetings, people have offered public comment about vacation rentals, indicating problems with trash, noise, unruly gatherings, people trespassing (because they don’t know the location of property lines), and an uncertainty of having “strangers” next door. These types of complaints are common with non-rental residential situations as well. In imagining other possible problems, people may assume there will be a lower level of maintenance of homes used for short-term rentals, however the opposite is often true as indicated by the photos of advertised properties. The homes need to look good to be competitive in the rental market. There can be problems if occupancy exceeds the capacity of sewer, water, or fire protection systems (which could be true of any residence). Some people cite concerns with protection of residential or neighborhood character. There is a possibility that use of single-family homes for short-term rentals will reduce the amount of housing available for locals.

Woodward continued with a discussion of Regulatory Approaches. There are some

difficulties with current regulations, particularly definitions. One of the problems is that short-term rentals of single-family homes are not expressly addressed in the zoning ordinance. To make the assumption, according to current regulations, that short-term rentals are not permitted anywhere would be problematic, according to the Township Attorney. To prove this use is not totally excluded, it would have to be shown that the use is equivalent to a “hotel”, “resort”, or “recreational structure”, which is also problematic per existing definitions.

Woodward explored key definitions with the Planning Commission, offering suggested clarifications should the Commission decide to pursue regulation of this land use. She suggested that “Short-term rental housing” be defined as a single-family dwelling unit that is offered for transient lodging (accompanied by appropriate definitions for “dwelling unit” and “single-family dwelling”). She said that “Tourist Home” is usually equated with “Bed & Breakfast”, which is an owner-occupied single-family dwelling unit in which transient accommodations and morning meals are provided to guests as an accessory use of the residence. “Recreational structure” differs as a structure intermittently used for transient lodging accommodations but not permanent residence. “Hotel / motel” is a facility principally used for transient lodging accommodations and which may include accessory facilities and services such as restaurants, meeting rooms, entertainment, personal services, and recreation. “Resort” is a facility used for transient lodging accommodations where the principal use is recreation or entertainment (such as a ski resort with lodge), unlike single-family rentals where the principal use is residential. Per current definitions, these uses are easily confused and thus regulatory intent is not clear.

Woodward discussed Michigan laws that do not equate bed and breakfast uses with hotels, specifically because bed and breakfast uses involve single-family structures. This includes Act 188 of 1913 Hotels, Inns, and Public Lodging Houses; and Act 230 of 1972, the State Construction Code act.

Woodward related research summarizing how definitions and use regulations have changed over time in the Township. From 1962 to 1976, dwellings were defined as permanent or transient occupancy, excluding tourist cabins (which are presumably temporary occupancy). Following that time, the only definitions that specifically address single-family occupancy are those for “single-family dwelling” and “bed & breakfast”. The “single-family dwelling” definition does not address occupancy type, although the definition for “bed & breakfast” specifies both permanent and transient occupancy (owner and guests). Current definitions for “resort” and “recreational structure” address temporary residency incidental to recreational use.

Woodward then explained County Regulations concerning single-family dwellings. Before construction, the Health Department authorizes permits for the septic and well infrastructure based on the number of bedrooms. The Building Codes Department issues occupancy permits if the structure meets Code requirements at the time of occupancy. However, there are no County codes relating to the subsequent operation of “short-term rentals” or “Bed & Breakfast” uses in single-family dwellings.

Woodward then cited the potential regulatory approaches to take if it is decided to regulate this land use – (1) Regulate external impacts that are not unique to short-term rentals uses through community-wide ordinances (Nuisance Ordinance, Noise / Unruly Gathering, Trespassing); (2) Zoning regulations related to distribution and operation (allow only in designated areas, cap on the number permitted at any one time or within a certain area, and performance standards); (3) Stand-alone ordinance with annual registration / licensing; and (4) Ban short-term rentals.

We have limited ability to monitor these uses and enforce performance standards such as occupancy limits and rental period restrictions. We can more easily monitor parking and maintaining an up-to-date contact name for a local representative in case there are reported problems. We can and do enforce ordinances related to noise and trash accumulation and storage. We would need increased staff time to handle renewable licenses or inspections.

A prohibition may be difficult and cost prohibitive to enforce or litigate. A ban may be seen as an “anti-tourist” sentiment and may have a negative impact on residency and tourism. The end result could be to punish owners and tenants who have done nothing wrong.

If we allow the use with restrictions we would have more information about the frequency of use and impacts. We would be better able to control the location and conditions of approval. We would still support tourism and allow homeowners an opportunity for supplemental income. Woodward concluded her presentation, and asked for questions.

VII. NEW BUSINESS

A. Lot Split Application #LS15-01, PID #52-02-305-012-00 and PID #52-02-305-011-00, commonly known as 250 and 254 Riverside Dr., Janofski

Woodward provided the introduction – Janofski’s own two adjacent parcels, and would like to shift the boundary line between them by 25 feet to the west. Currently, the eastern parcel is 100’ wide and is thus non-conforming to the minimum lot width of 125’, so the proposed boundary change would make that lot conforming. The other lot would remain conforming. Concerning current setbacks, the eastern parcel has an existing structure with a 6.8’ side setback which is nonconforming with a 10’ minimum required side setback. The proposed change would make the side setback conforming at almost 32’.

The staff memo addressed the four standards in the Lot Split Ordinance that are used to evaluate an application for a Lot Split when it does not create a new building site. The Planning Commission is to review the application and materials presented, and make a recommendation to the Township Board, either as presented or as changed.

Mr. Janofski came forward with a survey indicating the proposed change. He said that the existing structures were built in the 1920’s and 1940’s. Woodward indicated

that she had received a supporting statement from the County Road Commission.

Moved by Bohjanen, seconded by Ventura, that after review of Lot Split Application LS15-01; and review of the staff report dated 3/11/15; the lot split pertaining to Parcels #52-02-305-011-00, 254 Riverside Rd. and #52-02-305-012-00, 250 Riverside Rd. as presented at the March 16, 2015 Planning Commission meeting, be recommended for approval to the Township Board as presented, having met all standards of Section 42.6.B of Ordinance #42 Lot Splitting.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

Woodward indicated to Janofski's that this would be on the agenda for the next Township Board meeting on April 1, 2015 at 5:00 p.m.

B. Short-Term Rentals of Single-Family Homes - Discussion

Bohjanen asked about current regulations for long-term rentals of single-family homes. Woodward indicated there are none. Bohjanen asked if he would need Township approval before leaving town for a year and renting his home. Woodward said no, but it could affect his Principal Residence Exemption (PRE) for that year for tax purposes. Bohjanen mused that if you are worried about losing your PRE, you are not charging enough rent.

Gary Walker, Township Supervisor, explained that there is a State of Michigan ruling following the IRS Code that states that if you rent your home for more than 14 days out of the year, you are not able to claim a homestead exemption (because you have to pay income tax on the rent).

Smith asked if this has been a topic of frequent complaint. Woodward said no. Someone complained about a residential property with a house and three Air Stream trailers being used for seasonal residence, although they admitted it was probably limited to use by family members. Their main concern was parking the trailers too close to the property line, and people trespassing because they don't know the location of the property lines. Sikkema asked about the person at the joint meeting that had discussed this with Woodward. Woodward indicated that the citizen had asked about regulations, but had not called with a current complaint. Sikkema asked if anyone had checked with the police to see if there were any complaints dealing with short-term rentals. Woodward said she could check with them to see if any complaints were specifically related to short-term rentals. She is not sure if their records give this indication. Sikkema was trying to determine if there is actual data related to the extent of the problem.

Bohjanen said another option would be to do nothing. He thinks we should not regulate just because we can. Sikkema agreed with this.

Walker stated that our zoning powers are not infinite. As a government, we have to identify something that involves health, safety, and welfare. If we are going to regulate this, we have to make findings that say why we are regulating. Ventura

asked if health, safety and welfare include protection of property values. Walker indicated that it may, but we would have to be able to establish that a short-term rental lowers property values. We cannot simply speculate that this is what “may” happen. Meister stated that you could just as easily speculate that it would increase the values.

Paul Laurich, 872 Cherry Creek Road – he stated that he has managed both long-term and short-term rentals in the area. He stated he has more problems with his long-term rental tenants. Short-term renters have jobs, credit cards, and are here to spend money on vacation with their families. In his four years of short-term rental experience, there has never been anything broken or stolen, and no bounced checks. With long-term renters, they get into a place and they think they own it. Once they are in, it is hard to get them out. Another thing about short-term is that the rentals have to be kept in nice shape and be well-maintained or people will not rent them. Sometimes it actually makes the neighbors clean up their properties.

Mahaney said he has researched several websites, and a number of the homes that are listed are going for good money on weekly rates. With that kind of rate being charged, they are taking care of their homes. He doesn’t feel that they are attracting riff-raff at those rates.

Meister indicated that with the internet, it is becoming easier to rent out a place, so this will have to be addressed at some point. Smith indicated it would make it easier to catch the ones that are improperly claiming homestead exemptions.

Ventura indicated that if you go to a hotel in a larger city, you pay an occupancy tax to the local municipality – this may be something that the Township could be doing. Meister indicated that he stayed in a vacation home in Florida and he had paid a 12% occupancy tax. Woodward doesn’t know if that could be implemented here. Sikkema said he thought any tax would go to the Convention and Visitor’s Bureau, not the Township.

Sikkema asked if Commissioners feel that Lakewood Lane is mostly families or recreational property? Ventura indicated that there are both. Sikkema wondered if it was balanced more one way or the other, and asked what we want to see there?

Smith stated that you can bypass the rule regarding renting for less than 30 days by renting for a 31 day period, even if the tenant only pays for 2 weeks. He thinks people will get around that rule.

Sikkema stated he lived on Lakewood Lane for about 2 ½ years – and asked if other Commissioners would want this happening next door to them. He thinks the Planning Commission has to take into consideration what the residents who are raising families there want to see. Mahaney said you also have to consider the desires of the property owners offering the rentals.

Sikkema is concerned about people moving out if the area is opened up to short-term rentals. Mahaney said the internet indicates that there are rentals along

Lakewood Lane right now, and they may have been there for some time, and as far as we know, there are no complaints. Maybe the tenants understand and respect where they are.

Sikkema stated that one of the options is to just let it go and do nothing. Smith stated that if there were a bunch of written complaints then it would seem like the Planning Commission should look at it. Sikkema said a cavalier attitude about this could cause people to move out of the Township. Mahaney stated that he did not think that Smith was saying to turn a blind eye to it, but if there are no known issues right now, what is the need for regulation? What are we trying to correct?

Sikkema asked for a consensus decision regarding any action. Bohjanen agreed that everyone should render an opinion and reach a conclusion, but reminded the Commission that nothing need be done until zoning ordinance changes are pending. He said nothing needs to be done as a result of the Master Plan, and there is no citizen petition urging action, so this is not crunch time. Sikkema said the Township knows nothing of the residency decisions that are being made and why people move out of the Township. Bohjanen said there are many who don't move, and we don't know why they stay either.

Smith said he owned a lakefront lot and that several buyers declined to purchase after they discovered there were covenants mandating a minimum 6 month rental period.

Meister indicated there doesn't seem to be any decrease in property values on Lakewood Lane right now, but restrictions could be considered if there is indication that citizens want them, considering there will be those that don't want restrictions as well.

Ventura indicated that the Planning Commission should not take any action on it until the Township Board directs that something needs to be done. The Board is the one that gets information from the public. Walker indicated that it would be nice if the Planning Commission would communicate their conclusion to the Township Board.

The Commission discussed enforcement. Walker doesn't think that short-term rentals are really addressed in our ordinance right now, and doesn't feel that the ordinance could be enforced. Bohjanen indicated that the Nuisance Ordinance can be enforced, so in the interim, if there are complaints, they should be addressed in the same manner as long-term residences.

Sikkema saw something in the national news about people renting out large houses in California for parties. He would not want to live on Lakewood Lane with a short-term rental next to him. He feels if it was him, he would file a complaint, and if the Township said nothing could be done about it, he would move out and turn it into a short-term rental. Smith asked for a definition of short-term. Is it 2 weeks, 30 days, 60 days, 90 days – how long does it take till it's considered long-term? Mahaney stated he could see both sides of it. He can see certain property owners not wanting

transients – he also sees the other side of being a private homeowner and not wanting to be told what he can and cannot do. Sikkema asked why we can regulate a transmission business in a garage, but not someone renting out their home as a business?

Bohjanen stated that he has a long history of being against the idea of regulating to solve disputes between neighbors. It's not a matter of like or dislike – you have to regulate based on health, safety, and welfare. Sikkema agrees there needs to be a government interest.

Moved by Ventura, seconded by Smith, to have Planning Director Woodward write a brief summary to the Board explaining why the discussion of this item is being tabled following a determination that no action is necessary at the present time.

Vote: Ayes: 5 Nays: 1 (Sikkema) MOTION CARRIED

C. Request for comment on Land Use Order of the Director rule change for portion of Marquette to Munising Junction Trail located on State owned land in Alger and Marquette Counties

Woodward explained the DNR request for comment on their proposal to allow side-by-side ATV's on the portion of trail where ORVs are already allowed from the casino east into Alger County. Currently ORV's and vehicles more than 50 inches in width are prohibited. The DNR wants to do this because the "ORV trail" connects with an "ORV route" on which the vehicles are allowed, so it is confusing to riders. The Planning Commission is being asked to submit a recommendation to the Board for comment to the DNR either in support or opposition.

Sikkema indicated that this would allow side-by-sides, along with jeeps and other licensed vehicles along this route.

Ventura commented that he had talked with Carol Fulsher from the Iron Ore Heritage Trail (IOHT) Recreation Authority about a year ago about the idea of extending the IOHT to include the charcoal kilns that are at Deerton and Rock River, because they were part of the iron ore heritage as well. She said she didn't have any money right now to do that sort of thing. His comment would be that if the Planning Commission says yes to the DNR for wider vehicles, it makes it that much harder to then make this part of the IOHT. They ran into a similar problem west of Ishpeming and ended up having to put two parallel trails, one for ORV's and one for bikes, walkers, and skiers.

Smith indicated that if the DNR is proposing this, they have put a lot of thought into this and there must be a very good reason for their proposal. Sikkema stated it seems like the DNR wants to clean up some of the confusion on trail versus route.

Ventura asked what happens on these trails when two of the wide vehicles meet head to head. Bohjanen indicated that the two routes that he utilizes to get to hunting and fishing spots present the same problem with jeeps and trucks. If you come head to head with a vehicle that you can't pass, one has to back up.

Ventura mentioned the IOHT goes all the way to Kawbawgam Road and doesn't stop at the casino. Bohjanen stated there is no parking on the casino road – the only parking would be at the Pocket Park at Kawbawgam. Ventura indicated he is not opposed to it, but it is not as simple as it is suggested.

Bohjanen moved, and Smith second, to recommend that the Chocoley Township Board submit a comment to the Michigan DNR in support of the proposed Land Use Order of the Director rule change for a portion of Marquette to Munising Junction trail located on state owned land in Alger and Marquette Counties, the effect of which would remove a prohibition against operating a wheeled motorized vehicle which is greater than 50" in width along said trail.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

VIII. UNFINISHED BUSINESS

A. Provide direction for potential revision of Ordinance #55 and the Zoning Ordinance related to parking of vehicles and storage of vehicle parts

Woodward stated that the Planning Commission had identified one problem as the ability to park an unlimited number of licensed and operable vehicles and trailers on a property. The Planning Commission needs to think about whether they want to restrict the number of vehicles, and whether the appropriate number allowed would depend on the zoning district and property size. Another thing to think about is where the vehicles are parked, and whether a setback or screening requirement would help alleviate complaints.

Woodward stated that per request she has provided the Planning Commission with an example of an ordinance with exceptions to the rules – it is from Schoolcraft Township in Kalamazoo County – it basically states that the Supervisor has the authority to grant a waiver from the vehicle storage location requirements if there are special circumstances beyond the control of the applicant that make compliance unfeasible or impractical, if adjoining property owners are not adversely affected, and if the spirit of the regulations are still observed. The waiver could be granted with conditions. Woodward said she did not recommend that it become the Supervisor's job, but this was presented as an example of flexibility in regulation. Summaries of regulations in other municipalities were also provided.

Sikkema indicated that he has seen issues brought up a number of times about the overall number of trailers and types of trailers, and parking and condition of agricultural equipment. There are also concerns about ownership of licensed vehicles – people are storing other people's vehicles on their property. He knows of one person who is leaving the Township because he is not putting up with his neighbor's junk anymore. Woodward asked if this particular instance was on the enforcement list. Sikkema thinks it is – the person has told him that he has talked about it before and nothing ever changes. Sikkema stated that since the last meeting he has had two people come up to him and complain about the junk – one

was about a person who runs a business out of their house, but doesn't live at the house – right now there are three hot water heaters setting in the yard.

Meister wondered if part of the problem is the enforcement – if the problem isn't reported to Woodward, there is sometimes no way of knowing that it is happening. Sikkema indicated that Woodward's time is taken up with many things. These types of things sometimes take a lot of time to resolve. Sikkema indicated that he is not for over-regulating, but he doesn't think you can just turn a blind eye to this.

Smith indicated that the only reason he would entertain modifying this ordinance is because there has been a resident coming to every meeting for three years with the same complaint. Maybe the language just needs to be cleaned up a little bit. If you have 80 acres and can park everything in the back, you are not a nuisance to the neighbors.

Bohjanen stated he thinks the things that could be dealt with are parking in the road right-of-way, screening, and health and safety. Aesthetics and neighborhood fights are not something you can control. The prohibition about parking in the road right-of-way is already in the ordinance, but maybe the language needs to be made clearer that you cannot store your junk there. Something about screening could be added to the ordinance, so it would be a change, not a whole rewrite. Concerning the numbers of trailers that could be stored, maybe that can be solved in relation to zoning standards – it's a lot different if you have 20 acres to store things on.

Meister stated he agrees with Smith that there are some things in the ordinance that need changes, but not a complete overhaul. There are some minor oversights that could be corrected rather than rewriting the whole ordinance.

Sikkema said someone who lives on Lakewood Lane could buy a 50 foot trailer and park it in their driveway as a storage unit and it would be allowed. Ventura asked if this was something that could be solved by requiring that they must be parked in the back yard. Bohjanen wondered about the official definition of back yard. If your house is 200 feet from the road, and it faces the lake, between the house and the road is your backyard.

Sikkema suggested that the Planning Commission be proactive in looking for the loopholes in the ordinance that could be exploited. Smith indicated that most normal people would not park nine trailers in their yard, but currently this could happen. He feels something should be done to some degree to prevent the one person who may think it is okay from doing it. Ventura asked how you would determine the right number. Sometimes the type of trailer and use would be a determining factor. Bohjanen suggested required setbacks for trailer parking. Woodward suggested allowing one trailer to be parking in front of the home, and requiring the rest to be parked in the rear. Smith indicated that there are some places that you would not be able to get to a back yard. He wondered if there is anything in the ordinance that prohibits people from storing other people's vehicles on their property. Woodward said there is currently no prohibition as long as they are licensed and operable.

The Commission discussed the possibility of semi-trailers being used for storage, and the fact that the licenses are forever. Supervisor Walker indicated that you could write the ordinance to refer to trailers that are licensed and used as being allowed. Sikkema indicated that this has come up before, and there is no way to tell if the trailer has been moved or not – how far do they have to move it? This is an enforcement difficulty.

Woodward stated that if the Planning Commission would provide her with what they feel are the problems and what needs to be improved, and then she can provide some options.

The storage of multiple trailers was further discussed. Mahaney asked about ordinances that state that certain size vehicles cannot be parked in the neighborhood. Meister indicated that there should probably be a distinction between storage trailers and recreational vehicles – doesn't know if there is a way to differentiate.

Enforcement difficulties were further discussed. Supervisor Walker indicated that one of the things that's been encountered at the Township is people coming in with photos that they could only have obtained by trespassing on someone else's property. The problem is not visible from the roadway, which is problematic for Woodward because she cannot enter onto the property for inspection without the owner's permission.

Bohjanen asked about grandfathered conditions. Woodward indicated that there is no grandfathering with a stand-alone police power ordinance. So if we change the rules, then we enforce the new rules. However, the Zoning ordinance has non-conforming clauses to allow things to be grandfathered in. Woodward indicated that there are regulations in the zoning ordinance prohibiting the parking of vehicles of a certain size in certain zoning districts.

Woodward summarized what she has heard from the Planning Commission at this point is that if there are multiple trailers and they are screened, it is probably not a problem.

Mahaney wondered if the Planning Commission should shoot for a size limit. Sikkema indicated that some RV's are bigger than semi-trailers.

Ventura wondered if there could be something added to Regulation 4.A.1.a about the R1 zone being limited to 3 vehicles and AF being limited to 5 vehicles. Woodward said she would have to see if we can add references to the zoning ordinance in a stand alone ordinance.

Woodward indicated that you can have "inoperable" vehicles as long as they are screened. Smith feels that if you have enough property and everything is screened, there should be no problem. Sikkema indicated that our current regulation does address screening adequately.

The Commission discussed agricultural equipment which is not licensed. Ventura

stated the ordinance has an exception only for vehicles “used” for agricultural purposes, so if they’re not used they’re junk vehicles. Woodward stated that this ordinance applies to premises primarily used or zoned for residential occupation. So, a 40 acre parcel in the AF district with a house – would that be primarily for human occupation? There are things that will need to be clarified.

Smith stated Section 4.A.1 could potentially produce problems. Ventura stated part of this could be fixed by saying the license needs to be held by the property owner. Woodward stated she didn’t know if she could get ownership information.

Sikkema asked about buying a used semi-trailer with tires, license it for \$75, and use it for storage – how does the Township deal with that. He feels this is something that could show up in residential neighborhoods and cause problems. Meister asked if we were just looking to ban semi-trailers.

Ventura indicated there was something in Section 4.A that states, “...and does not violate any of the zoning or building laws of the Township, County, or State of Michigan ...”. It does reference zoning, so could we not use zoning districts as a way to regulate it. Woodward indicated that question would be asked of the Attorney.

Sikkema asked Woodward to do more research on the above items. Woodward asked the Planning Commission also to send her examples they might find.

B. Master Plan – Continuing review of final draft version and comments received to date

Woodward asked that the Planning Commission decide whether to implement changes related to public comment (specifically from Alger Delta Cooperative Electric) now or at a later date. The Commission decided to implement any changes at one meeting at the conclusion of the public comment period.

IX. PUBLIC COMMENT

None

X. COMMISSIONER’S COMMENT

None

XI. DIRECTOR’S REPORT

Woodward indicated she had given the Commissioners some information on upcoming training, or if anyone would like to do the Citizen Planner this year, she can get ahold of Brad Neumann for information.

Sikkema asked Woodward on the status of the Beaver Grove Community Farm – Woodward indicated that they are getting ready to host workshops and Field Days – the first one is March 26 at the Township Hall related to northern fruits. Hannah Brisson is doing the presentation. Other topics will relate to soil testing and development of swales for water catchment. They are looking for people who have knowledge and experience in these areas to help with the presentations. There is a new management team member – Phil Britton. The money from the first grant will be used for a banner, which

will have a code on it that you can scan with your phone and it will take you to their website. The website is in the development stage. They will be developing the children's garden this year, including a structure.

Smith said that the neighbors are complaining because of excess garbage on the disc golf trails. Woodward stated she had a hard time believing it is the disc golf players because they maintain the trails. Supervisor Walker indicated that once the disc golf started, the police and DPW indicated to him that they were getting a lot less garbage. There are quite a few kids that use the trails back there. Walker suggested Smith have the person making the complaint come in and talk with us.

Supervisor Walker thanked the Planning Commission for the work that they do. He stated they were a very vital part of Township Government, and that he appreciates everything they do.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

None

ADJOURNMENT

Sikkema adjourned the meeting at 9:30 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, April 20, 2015

I. MEETING CALLED TO ORDER BY: Andy Smith at 7:03 p.m.

ROLL CALL

Members Present: Andy Smith (Vice Chair), Eric Meister (Secretary), Bruce Ventura, Kendell Milton

Members Absent: Andy Sikkema (Chair), Richard Bohjanen (Board), Tom Mahaney

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Dale Throenle (Community Development Coordinator), Suzanne Sundell (Administrative Assistant)

II. MINUTES

March 16, 2015

Motion by Meister, seconded by Ventura, to approve the minutes as written. Comment made by Ventura that the minutes were very extensive and thorough.

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Milton, seconded by Meister, to approve the agenda as written.

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

None. Public Comment closed.

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

A. Land Use Explorations – Land-Use Classification, Kelly Drake Woodward, Planning Director / Zoning Administrator

Woodward indicated that the discussion is based on the “Land-Based Classification Standards (LBCS)”, which is a project between the Federal Highway Administration and the American Planning Association to standardize land-use coding to facilitate cross-jurisdictional data sharing between government entities. This is based on the Standard Industrial Classification (SIC) Codes. For Chocolay Township, it can provide a basis for a comprehensive, organized approach for zoning land use tables.

The LBCS is divided into five dimensional categories: (1) activity; (2) function; (3) structure type; (4) site development character; or (5) ownership. Woodward presented and summarized these five categories as below. Ventura asked about the use of the word “or” in the above – does this mean they need to pick between the

different classifications, or would the matrix include all of them? Woodward indicated the method usually uses combinations of categories.

Activity refers to how the land is actually used – what is taking place physically and what you would observe happening. Woodward said categorizing land use by activity is one of the best ways to address nuisance impacts as it reflects what is actually taking place on the site.

The four digit codes for classifying land uses by **activity** include: **1000** – Residential (household, transient, or institutional); **2000** – Shopping, Business, or Trade (shopping, restaurant, or office); **3000** – Industrial, manufacturing, and waste-related (factory or heavy goods storage, solid waste management, construction); **4000** – Social, institutional, or infrastructure (school or library, emergency or public safety, utilities, mass storage, health care, interment or cremation, military base); **5000** – Travel or movement (pedestrian, vehicular, trains or rail, boating and other port / marine, airport or spacecraft); **6000** – Mass assembly (indoor or outdoor gatherings of many people); **7000** – Leisure (active or passive, flying, water); **8000** – Natural resources-related (agriculture, livestock, pasturing, logging, quarrying, mining, dredging); **9000** – No human activity or unclassifiable.

Function is based on the economic function or type of establishment (which can be a variety of activities all serving a single function or establishment, such as an office and factory). It could also be useful for fine-tuning for compatibility in a mixed-used setting, or differentiating between districts.

The four digit codes for **function** are: **1000** – Residence or accommodation (private household; housing services; hotels, motels and other accommodations); **2000** – General Sales or services (retail sales and services; finance and insurance; real estate, rental and leasing; business, professional, scientific, and technical services; food services; personal services; pet and animal sales and service); **3000** – Manufacturing and wholesale trade (food, textiles and related; wood, paper and printing; chemicals, metals, machinery, and electronics; miscellaneous manufacturing; wholesale trade; warehouse and storage); **4000** – Transportation, communication, information, and utilities (transportation services, communications and information; utilities and utility services); **5000** – Arts, entertainment, and recreation (performing arts; special purpose recreational institutions; amusement, sports or recreation establishments; camps, camping and related; natural and other recreational parks); **6000** – Education, public administration, health care, and other institutions (educational services; public administration; other government; public safety; health and human services; religious; death care; associations and non-profits); **7000** – Construction-related (building, developing and general contracting; machinery-related; special trade contractor; heavy construction); **8000** – Mining and extraction establishments (oil and natural gas; metals; coal; nonmetallic; quarrying and stone cutting); **9000** – Agriculture, forestry, fishing, and hunting (crop production; agricultural support; animal production; forestry and logging; fishing, hunting, and game preserves).

Structure Type is especially useful when coding for appearance and continuity of the public space, as in form-based codes.

The four digit codes for structures have been broken down as follows: **1000** – Residential buildings (single unit; multi-unit; specialized units – barracks, dorms, hotels, single-room occupancy, temporary structures, converted structures); **2000** – Commercial buildings and other specialized structures (office or bank; store or shop; office or store with residence above; office over store; malls, shopping centers; industrial buildings – light and heavy; warehouse or storage facility); **3000** – Public assembly structures (theater; indoor games; sports stadium or arena; exhibition convention or conference; churches; capitol buildings; passenger assembly); **4000** – Institutional or community facilities (medical; school or university; library; museum or exhibition; public safety-related; jails and other correctional; cemetery, monument or mausoleum; funeral home and cremation); **5000** – Transportation-related facilities (linear or network feature; automobile parking facilities; bus stop shelter; bus or truck maintenance; water transportation or marine; air and space transportation; railroad facility); **6000** – Utility and other non-building structures (utility structures on right-of-way; water-supply related; sewer and waste-related; gas or electric power generation; communication towers; environmental monitoring station; sign or billboard; other miscellaneous – kiosks, roadside stand, welcome centers, playground, fountain, sculpture, outdoor stage); **7000** – Specialized military structures; **8000** – Sheds, farm buildings, or agricultural facilities (grain silos and other storage structures; livestock facility; animal feed operations facility; animal waste-handling facility; greenhouses; hatcheries; kennels and other canine-related; apiary and related; other ag related accessory buildings); and **9000** – No structure (subsurface).

The **Site Development Character** category is the overall physical development character of the land. This category could be useful in a build-out analysis or other analysis of development potential or vacancies. This category could also be used for assessing.

Classifications for **Site Development** included: **1000** – Site in natural state; **2000** – Developing site (graded with no structures or use, temporary structures); **3000** – Developed site – crops, grazing, forestry, etc.; **4000** – Developed site – no buildings or structures; **5000** – Developed site – non-building structures (landscaped, billboards, roads, tanks, or reservoirs); **6000** – Developed site – with buildings; **7000** – Developed site – with parks or trails; **8000** – N.A.; and **9000** – Unclassifiable per site development character.

The last category is **Ownership**. This is the relationship between the land use and land rights (public, private, mixed public / private, easements). It is useful for knowing which regulations supercede others, and which are out of local government control. Ownership impacts development character through decision-making authority. Classifications for **ownership** are: **1000** – No constraints – private ownership; **2000** – Some constraints – easements or other use restrictions; **3000** –

Limited restrictions – leased and other tenancy restrictions; **4000** – Public restrictions – local, state, and federal ownership; **5000** – Other public use restrictions – regions, authorities, tribes, etc.; **6000** – Nonprofit ownership restrictions; **7000** – Joint ownership character – public entities; **8000** – Joint ownership character – public, private, nonprofit, etc.; and **9000** – Not applicable.

Woodward introduced the draft land use matrix that is the type of table that would be implemented with future zoning revisions. The table lists general categories of land uses with more specific land uses below, and eventually would indicate which land uses are permitted in the different zoning districts that could be developing based on master plan recommendations. She would like to get input on the organization of the table.

Milton asked if the category / matrix was flexible enough for a residence and a library to share a structure. Woodward indicated that in the table (#240) she did indicate mixed-use applications, and the Commission would still need to decide which uses could be combined in the different zoning districts.

Meister asked if the idea behind this was that someone could find what they want to do on the table and look across to find where they would be allowed to do it. Woodward indicated that was the intent.

Lee Blondeau, 2001 N. Traci Lane, asked for clarification on SIC codes. Woodward indicated it stood for Standard Industrial Classifications, and could be used as a basis for detailed use standards. The new proposed mixed-use classification as recommended by the Master Plan was discussed. Woodward feels this will add some flexibility for property owners.

Ventura asked where the three digit classifications in the use matrix came from, since the LBCS codes were four digit numbers. Woodward didn't feel there was a need for four digit numbers, but if we want to be consistent with the LBCS for data base purposes, we could go to a four digit system.

VII. UNFINISHED BUSINESS

A. Review potential revisions of Ordinance #55 related to parking of vehicles and storage of vehicle parts

Woodward introduced the discussion starting from a list of the things she thought the Planning Commission had identified as potential problems in previous meetings, including:

- Number and types of trailers that can be parked on a property
- Parking location and condition of agricultural equipment
- Parking of multiple vehicles (which may be more acceptable if out of sight in the rear)
- What is allowed might be related to size and the use of the trailer (whether for recreation or storage)
- What is allowed might be related to lot size or buffers / screening provided

- The problem may be more related to where the vehicles are parked (near property boundaries or within view of the road or adjacent properties) and setback requirements or screening standards may help alleviate complaints

Woodward created a draft that would address all these issues, and it may be more detailed than need be, but it is a starting point. From here it can be simplified. New definitions are related to where cars can be parked on the lot as well as specific vehicle types - agricultural, and recreational, also mobile homes. The proposed draft clarifies the provisions for parking vehicles in the right-of-way, because currently our ordinance says that you are not to park in a public right-of-way EXCEPT for when it is a duly licensed and operable vehicle. Woodward also proposed a prohibition about parking vehicles where it presents a fire or safety hazard or obstructs building entrances. Another newly proposed provision is that any vehicle over 8 feet tall be stored at least 10 feet from the lot line so the view is not blocked by someone's trailer.

Smith asked if this is based on other existing ordinances. Woodward stated that the provisions are similar to other township ordinances.

Woodward tried to develop provisions to control vehicle parking in the front yard. It also controls the number of trailers that can be parked or stored in the front or side yards - anything over three have to be parked in the rear and substantially screened. There are provisions related to the parking of agricultural vehicles in the front or side yards (unless the principal use is a farm). There is a proposed provision dealing with inoperability determinations (which would still need to be looked at by the attorney) – if the Zoning Administrator cannot see the license, it will be presumed inoperable, although the owner would have the opportunity to show (within a specified time frame) that the vehicle is licensed and operable. There is also a provision dealing with seasonal use of parked recreational vehicles on the premises, and a prohibition against using semi-trailers as storage containers.

Smith feels that the summary of comments that were brought up at the last meeting is pretty accurate.

Milton wondered about “substantially screened” – how big and how far. “Substantially screened” is by a solid fence or wall or by landscaping or other natural barriers of ample height and density so the vehicles are barely discernable (such as a hill or tree cover). This is found in Section 7.A.2, related to the storage of recreational vehicles or trailers in the rear yard. The Commission discussed Section 4.D.4 “Waivers on front and side yard provisions – Sec. 4.D.4.a states “The premises have unique conditions that are beyond the control of the applicant that make it unfeasible to locate currently licensed and operable vehicles in full compliance with these requirements, such as unique parcel configuration or terrain” and Section 4.D.4.b states “The front and side yard areas are completely screened from view by a vegetated buffer at least fifty (50) feet wide.”

Meister asked about parking a car that is for sale in the road right-of-way. He

indicated that it looks like we allow property owners to display vehicles for sale for a period of time, but we are proposing that the vehicles can only be placed in the right-of-way if it meets the uniform traffic code. Most people offering vehicles for sale park at least a portion of the vehicle in the right-of-way. He feels that it would be okay, as long as they are not impeding traffic. Woodward stated that it is not actually legal to park in the right-of-way except as indicated by applicable vehicle codes, so the Township rules should be consistent with the State's rules.

Woodward discussed the proposed requirement that parking only be allowed on an improved surface in front or side yards. We do include gravel as an improved surface, which most other ordinances do not. Dirt would not count as an improved surface, however there are unimproved dirt driveways in the Township. The Planning Commission needs to decide if they care if people park all over the front yard, or if parking needs to be limited to the vicinity of the driveway (the size of which is limited). There are various ways to approach this, and some are more complicated than others. Meister asked if someone has a recreational vehicle, would they have to park it on a graveled spot. Woodward indicated that the proposed draft says if you want to park/store recreational vehicles in the side yard, you can have a separate improved surface for that, but otherwise the improved parking surface would need to be connected to the drive that goes out to the road. Ventura indicated that there may be some confusion on using the words "parking" and "storage". If an RV is stored for 6 months, he doesn't feel it is parking, it is storage. He felt that this may need to be clarified – to him "parking" means you are using the vehicle on a regular basis. Anytime you are using a vehicle on a regular basis, you would need a hard surface to park it on or a driveway of some sort, where for storage, you may not need the same type of surface. Woodward indicated that everything in the ordinance refers to both "parking / storage", except for the heading on Section 4.D, so it is currently not differentiated.

Smith indicated that he has not had the opportunity to drive around the Township and research the potential impacts of the draft ordinance. He asked if anyone else had taken the opportunity to drive around. Milton asked if they needed to approve anything at this point. Woodward indicated it was up to the Planning Commission. The next step in moving forward is for the Planning Commission to make any changes they would like to make, and then schedule a Public Hearing.

Meister indicated he was still unclear about the recreational vehicle storage / parking. He knows there are a lot of people that store their recreational vehicles in their yard, and does not feel they would want to put in a gravel pad to store them on – they would usually just park their RVs on the grass on the side of the house for the winter. He doesn't feel that people would want to start putting gravel pads all over their property. Woodward indicated this might have to be reworded somehow – this is found in Section 4.D.1 and Section 4.D.2, which says the parking surface can only include the areas privately or publicly connected to the road access or easement, except you can have one improved parking surface in the side yard, as long as it is

located as far as possible from the side property line. Woodward stated you could just take out the word “improved” in that Section 4.D.2. Meister feels that to leave it as it is there would be a lot of people that would be in violation with their recreational vehicles and boats.

Milton feels that people should be able to park vehicles on any surface that they want to. Woodward indicated the purpose of the provision is not to control the parking surface – it’s to keep vehicles from being parked all over the front yard. So if there is another way to prevent vehicles from being stored in the yard area without requiring that they be parked an improved surface, she is open to suggestion.

Ventura indicated that approach was used in the City of Marquette to limit front yard parking. There was a lot of push-back at the beginning of the ordinance, but after people saw the improved appearance, especially with rental properties, they came around to accepting the ordinance as a good thing. The City ordinance prohibits parking on anything but a paved surface.

Meister doesn’t feel it should be included, simply because a lot of people would be in violation, and he doesn’t feel that it is part of the problem – it’s more the number, rather than where they choose to park their vehicle. Woodward stated that then you would have to determine how many vehicles to allow.

Milton indicated that there needs to be a level of reasonableness. Woodward suggested a simpler requirement that parking has to be on or near the driveway, and not taking up more than a certain percent of the front yard. Smith asked if the percentages were based on other ordinances that Woodward reviewed. Woodward indicated it was, but still if you have a big yard, 40 or 50% allowance can mean that a lot of cars could be parked there. Meister asked if parking for cars and trucks was currently a problem, or is it just trailer parking. Smith said it’s a potential problem, but regarding trailers, the potential problem seemed to be that if you have permanent license plates on trailers, you could park many of them in the yard. Woodward indicated that there are residents that call to complain about the number of vehicles in someone’s yard, and she has to tell them that if they are duly operable and licensed, they can have as many as they want.

Woodward feels the whole group needs to be okay with the proposed ordinance changes before they go public. With three people missing this meeting, they may want to take more time to be able to drive around the Township and get a feel for how the ordinance will affect the people in the Township. Meister indicated that when he drove around the Township, it wasn’t the cars and trucks that he saw as being the biggest issue, it was more the miscellaneous junk. Smith indicated that he would like more time to drive around and analyze the ordinance.

Woodward indicated that many of the original provisions are unchanged, yet the ordinance may look a little different as it is organized – the exceptions to the rules are organized by type now. Woodward discussed the proposed provisions in detail to make sure the Commissioners understand before they tour the Township.

One new provision is Section 7.B – Temporary occupancy of one recreational vehicle on a private parcel used for residential occupancy is permitted for no more than 90 days per year, except for in a campground. You are not permitted to have two dwellings on a property, but some people use trailers as guest houses during the summer.

Semi-trailers, with or without wheels, are not permitted for storage. Smith asked if this was regardless of property size or buffering / screening. Woodward indicated it was. Ventura stated that he thought this is what it was all about – getting rid of the trailers for storage. He thinks we should leave it in. Smith indicated he didn't think it would matter if you had a large property and could properly buffer them. Woodward indicated that the provision could be changed to read that semi-trailers and similar types of vehicles could only be used as storage containers if they are in the rear of the property and substantially screened from view. The Planning Commission thought this would be a good idea.

Ventura indicated he felt it would be difficult to enforce the 40% and 50% front yard provision- this would be hard to explain to people and would take a lot of time to enforce. Woodward indicated that if the Planning Commission was going to simplify anything, it should be that section.

Moved by Meister, seconded by Ventura, that the review of potential revision of Ordinance #55 Vehicle and Trailer Parking and Storage be tabled until the next meeting.

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

It was reiterated that the homework was to go out and find examples of problems, and also to keep the meeting materials for use at the next meeting.

VIII. NEW BUSINESS

A. Land Use Classification – Discussion

Woodward indicated that this discussion will help the Planning Commission with land use classification for future zoning ordinance updates. Each category includes both principle and accessory uses.

Milton asked about the Tier 1 and Tier 2 distinctions. Woodward said when the Commission revised the home occupation provisions, they divided them into Type 1 and Type 2, so on the use matrix these two types are handled separately. Type 2 home occupations are currently only allowed in single-family residences. This is why only Tier 1 Home Occupations are indicated under multi-family residential categories.

Ventura asked for a definition of the LUI Code. Woodward stated the LUI code is something she has used before in ordinances – it is called the Land Use Intensity code. It would be assigning a range of intensities to the potential uses, and it would be related to screening requirements – LUI 1 probably would not have screening requirements at all. If you have LUI 6, which is the highest intensity uses, you would have the most substantial screening requirements. This would be implemented

when something new is built, or something is redeveloped. She would like to incorporate something like this in the future. The zoning districts correspond with what is outlined in the draft Master Plan, but are subject to revision.

Woodward asked that the Planning Commission study the land uses in the table in relation to the LBCS tables, and see if the proposed land use table is comprehensive and has a reasonable organization.

Ventura asked if they are to assign codes to each use in each zoning district, such as P (Permitted), C (Conditional), or a dash (Not Permitted). Woodward said eventually, yes. First she wants to focus on the categorization of the uses. For example, some categories (such as 211) include many different types of businesses – the Planning Commission needs to decide if they belong together, or in separate categories based on Township context.

Meister asked if the zoning districts were new. Woodward stated that some are new, but some are new in name only – for example, RV (Residential Village) is essentially a new name for the current R-2 zoning district, and RN (Residential Neighborhood) is essentially a new name for the current R-1 zoning district.

Meister asked if they are deciding if these are right before putting them on the map. Woodward stated that this was already done in the Master Plan. The zoning districts listed on the chart are indicated as per the Master Plan, but may be subject to change – for example, two zoning districts are listed for Residential Waterfront and Agriculture Forestry categories, but perhaps only one distinction will be necessary.

Smith asked if Woodward thought this would give the Township overall more flexibility – encourage more development in Chocolay Township. Woodward stated that the mixed use zoning districts will allow some increased flexibility in redevelopment and reinvestment, with attention to controlling the compatibility factors. Perhaps this would encourage vacant properties to be reused or redeveloped sooner. Smith wondered if, at present, there were just too many hurdles for prospective businesses. Woodward stated that property owners may also have something innovative in mind which doesn't fit with current ordinance requirements. This would provide more flexibility. Smith asked if there were very many inquiries on things not currently allowed. Woodward stated yes.

Woodward asked if this should be discussed at the next meeting with the whole group. Meister indicated he thought the junk ordinance should be the priority to get resolved at next meeting, with the secondary being the land use classification.

Woodward asked if they wanted a land use exploration presentation for next month's meeting, such as accessory buildings or mixed use compatibilities, or would they prefer to work more on the land use classifications. Ventura was in favor of working on the land use classifications rather than jumping into something else. Smith indicated that he will need some time to look over everything.

The Commission decided to look in particular at the land use categories in detail by

assigning permitted status (P, C, or -) to all uses in the first three zoning districts, which are the mixed-use zoning districts (MU-C, MU-N, MU-V). In other words, Commissioners will have homework to label each use in the first three zoning districts as being either Permitted, Conditional, or Not Allowed. For reference, the descriptions upon which the zoning districts are based are in the draft Master Plan (Chapter 7 has the future land use plan / descriptions, relationship of future land uses with current and future zoning, and future zoning plan, while the current zoning map is in Appendix M and future land use map is in Appendix U.) The draft Master Plan is on the website at <http://www.chocolay.org/masterplan/masterplan.php>.

Woodward also indicated that at the next meeting, the Master Plan comment period will be complete, and there will be a Public Hearing and decision on adopting the draft Master Plan.

Smith asked that Woodward send an email to all the Planning Commission members on what needs to be done on this topic. Ventura asked that along with the email, Woodward include a chart that explains what each district abbreviation stands for to avoid confusion. Woodward indicated she would do this.

B. Preparing for future development along the Harvey corridor

Woodward indicated that she is getting a lot of inquiries about properties that could be redeveloped. There is nothing in the ordinance right now on buffers and screening for uses that have a lot of outdoor storage. Woodward is asking that the Planning Commission let her develop a proposed zoning amendment to deal with reasonable screening of outdoor storage uses in the Village of Harvey. She is concerned that current development could impact the area for many years. She would also like the Commission to consider implementing the Master Plan recommendation LU-10 to recommend that the Board hire a team of consultants to create a development plan for the Harvey corridor area. Money is available in the current budget to go towards the project.

Meister indicated that the only property that is deeper would be the Wahlstrom property, otherwise they are relatively shallow. If someone put a commercial business in there, he feels there are already green space requirements for parking lots. Woodward stated that there are only requirements for parking lots with 50 cars or more. Meister indicated he doesn't see where they would have enough property to set aside additional property for the buffer beyond the right-of-way. As an example, Woodward indicated there is another property near Wahlstrom's that has been proposed with parking in the front and the building to the rear. Since there would not be 50 parking spaces, there would be no requirement for parking lot landscaping. Similarly, there are no screening requirements for a use that has a lot of outdoor storage.

Milton asked if the consultants would be addressing this issue. Woodward indicated they might develop some general recommendations to go along with a form-based code if we moved in that direction. Milton asked if they would be local. Woodward

indicated it was possible.

Meister sees it as being useful, but doesn't see a large demand for businesses wanting to come into Chocolay Township. If this is restricting further, it might keep these properties from being developed. Woodward indicated that now is the time for shaping future development. Meister indicated this would take away a substantial part of their property. Woodward said she could development options that are compatible with a small space.

Ventura indicated he would be in favor of the first proposal as a first step for redevelopment. Buffering isn't well defined – may need to give people examples, as they are much more comfortable with examples – anything that can be done to improve the appearance of the corridor helpful to residents, tourists, and business owners. Woodward indicated she wasn't trying to block the view, just filter the view aesthetically. Ventura said the highway aesthetic program was a good start, but the plantings weren't all successful. Woodward indicated the proposed standards would apply to the private space. Ventura thought it could be a joint public and private screening effort – it provides more space for the screening and is mutually beneficial to both.

Smith asked about the two options given – Woodward indicated that one is immediate and the other will take a longer time to implement. She would like both options addressed as soon as possible.

Ventura moved, Meister seconded, to direct the Planning Director to draft ordinance revisions for the area containing prime redevelopment opportunities in the Village of Harvey (meaning the US 41 Corridor) for the purpose of facilitating a beneficial mix of uses and improving pedestrian-oriented environment, with special attention to buffering of outdoor storage, display, or sales areas, and also to encourage a public / private cooperation within the MDOT right of way.

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

Smith asked if there was any discussion on the second item of making a recommendation to the Township Board to hire consultants. Milton indicated he would like to wait to see what Woodward comes up with in the first option, and go from there.

Ventura indicated that redevelopment is not driven by the Township, but by private monies. If private money saw an opportunity here, they would be coming in. There is not a lot we can do, other than make it look better, until we get a water system. This would encourage major development.

Woodward indicated that one item involved with the study that might help stimulate market interest is that the consultants would involve the property owners in the planning process to see what is envisioned. This planning process would also provide guidance to developers regarding available sites and market demand.

Meister indicated that if people were able to get grant money to help develop the

property that would be an incentive. Woodward stated that she had talked with the MEDC Community Assistance Team representative for the Upper Peninsula, and she had suggested the Corridor Improvement Authority might be a mechanism to help fund redevelopment.

Meister indicated that part of the Township's problem is that everyone is in Marquette every day, so they shop there. People in Marquette do not come out here. Chocolay has to depend on a small population and compete with Marquette.

Ventura feels that we already have information on some of the proposed work, such as water and sewer. Woodward may be able to incorporate standards into the mixed use language, where it doesn't involve expenditure of funds. Smith said it might be beneficial to have more information on barriers to redevelopment that are created by other regulations, such as building codes.

Milton moved, Ventura seconded to table Item 2 until the next meeting, after Woodward has had a chance to develop the strategies from the first motion.

Vote: Ayes: 4 Nays: 0 MOTION CARRIED

IX. PUBLIC COMMENT

Lee Blondeau, 2001 N Traci Lane, commented that when you are talking about the screening, snow storage needs to be taken into account. Snow storage is usually in the setback area, but it's not good to put it on landscaped areas. Woodward asked for clarification, and Blondeau indicated he was concerned about where to put the snow when you start looking at screening and setbacks, it doesn't leave any snow storage.

Smith indicated that in most city lots, there is only enough capacity for every other snow before it has to be hauled away. Smith also indicated that in Marquette, aesthetically you hardly ever see any snow storage in the front of the building – they are designed to push the snow to the back.

Dick Arnold, 312 West Branch Road – he is opposed to Section 7.B of the vehicle ordinance which allows people to stay 90 days of the year in a recreational vehicle – who is going to keep track of the days? There are parks that people can park their recreational vehicles in to stay. He feels that Chocolay Township is murdering residential districts. There is also nothing in the ordinance that says the recreational vehicles need to be owned by the property owner, so he feels this should be a consideration – people that can't park their trailers in town are bringing them out to Chocolay to park.

Arnold also felt that unlicensed vehicles should be reduced to one – how many can you work on at a time? Also wondered how long can the vehicle be there? His neighbor has a tractor with two rear wheels that have been off since 2011, and it is in the front yard. Vehicles that are not used daily or are unlicensed should be stored inside or in the back of the house, not in the front yard. When people drive by, this is the impression they get of your neighborhood.

Arnold commented that there is a limit regarding the size of commercial trucks parked in the area, but there is no limit on the size of recreational vehicles parked in someone's yard. Some are quite large, and when parked in the front yard they restrict the view of the neighbors.

Arnold stated that if the Planning Commission is going to do an inspection tour, he has a few addresses in mind – Seeds and Spores farm, West Branch Road ½ mile off of 41, Kawbawgam Road going to the east end of the lake, and County Road 480 and Gentz's Road.

Arnold stated that in the AF district there is approximately 8,000 acres, with 841 parcels – he said that 512 are non-conforming. Approximately 13 parcels have horses, 11 have cows, buffalo or llamas, and 20 raise hay, corn, or other crops. Out of 841 parcels, there are only 43 parcels that are actually farming. He feels that most of the people out there are not even aware they are in the farming district – he thinks it should be rural residential. Right now, there is no limit to the size of an accessory building and there is no limit to how many you can have. There are some beautiful areas with beautiful houses – why should 43 people overrule almost 500? He thinks farming should be a conditional use on 20 acres or more. People have a garden size plot and want to be called farmers in Chocoday Township. Arnold also brought up race tracks and shooting ranges.

Public comment closed.

X. COMMISSIONER'S COMMENT

Smith asked about the progress of the AT&T tower. Woodward indicated she did not know. She did indicate there will be another communication tower for site plan review next month, but at this time she is not aware of the location.

Smith indicated that he had pictures of concerns on the Disc Golf trail.

XI. DIRECTOR'S REPORT

Woodward indicated that she had given the Planning Commission a written report in their packets.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

None

ADJOURNMENT

Smith adjourned the meeting at 8:49 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, May 18, 2015

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:00 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Richard Bohjanen (Board), Tom Mahaney (arrived at 7:03 pm), Bruce Ventura, Kendell Milton

Members Absent: None

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Suzanne Sundell (Administrative Assistant), Gary Walker (Township Supervisor)

II. MINUTES

April 20, 2015

Motion by Ventura, seconded by Milton, to approve the minutes as written.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Bohjanen, seconded by Ventura, to approve the agenda as written.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Deborah Mulcahey, 633 Lakewood Lane – She realizes that a lot of work has been done on the Master Plan and it is admirable, but her position is that we need to be mindful that we are a bedroom community of less than 6,000 residents. Yes, we should have development, but it should be mindful. She thinks we should consider the issue of aging in place. She does not feel that we need to be fixing up the marina parking lot versus fixing Lakewood Lane. We need to keep green spaces on development lots. Presently, if she has an accessory building on her property which is the same size or less than her dwelling, she can place as many accessory buildings as she wants on her property, which means her whole green space would be used. She doesn't think this is what the Township really wants, and feels in part, that the Master Plan does address this. She feels that the concept of providing beach access is acceptable. Most of the Planning Commission has heard her talk about the "Unwelcome" sign at the Welcome Center – "Private Beach, Keep Out". It's been about six years since she first started talking about it, and it still is there. In regard to lot sizes, the Master Plan talks about the lots being non-conforming if they are less than 125' as required now. Most lots in Chocolay Township, when they were developed, were 50'. Why would we want to change from 125' to 100' – if we want to protect resources along the lakeshore as the Master Plan indicates we shouldn't allow a 400' parcel of land to be split into 4 – 100' parcels. Instead there would be 3 parcels, which leaves more green space and has less impact on resources. She agrees with standards for accessory buildings to accommodate energy needs. She doesn't want there to be a bunch of outbuildings along the road – the buildings need to be done so they are "in character" with the community and have vegetative buffering. She feels we need to keep it simple and educate people. Last year, everyone worked hard on the fire ordinance, but when the police were called on a fire issue recently, they did not enforce it as she expected.

Jennifer Bruggink, 673 Lakewood Lane, addressed the issue of short-term rentals of single-family

homes in the residential district along Lakewood Lane. She feels that if the Township adopts regulations allowing people to rent out their property by the week in the summer, the Township is saying to current residents with children on Lakewood Lane “bye” – the Township doesn’t care about them and doesn’t want families on Lakewood Lane. With two daughters, she no longer feels comfortable in letting them stay home with strangers next door every week. She feels that the Township is saying to people who have lived here a long time, and don’t live here anymore, that their interest in keeping the property for the someday inheritance of their children or for income is more important than the families that live here now. She would not buy a house where she knew there were going to be short-term rentals nearby. She already has the neighbor on one side doing this, and she can imagine the other doing it. The neighbor across the street that has an easement along her property line, which is 5 feet from her house, may decide to do this and then she may have people traipsing up and down the side of her house. Her husband loves living along the lake, but that is when she would say they need to move to Marquette. Right now, she has a big red dumpster next to her driveway with no screening. She complained about noise in the middle of the night and having to explain to people that she has to go to work in the morning. She thinks property owners with rentals defer maintenance for a longer period of time. She urges the Planning Commission to not make Lakewood Lane and M-28 an investment property, non-family-friendly stretch of road. There will be empty properties in the winter, and more complaints and traffic. She knows that some are doing it, but doesn’t feel that’s reason to allow everyone to do this.

James Dunn, 3120 M-28 East – In 2005 they bought 3 lots together on M-28, which were zoned residential at the time. During the time that they were renovating it, the zoning was changed to Agriculture/Forestry. They are snowbirds, and just recently returned and found out that property owners on both sides are doing short-term rentals. They are also concerned about travel trailers on the adjacent properties. He is concerned that the property values will drop if there continues to be rentals of homes and trailers, and he may ask that his taxes be reevaluated and decreased. He is not against long term rentals, with the rentals being a month or more. He is concerned about the day-by-day and weekly rentals that potentially bring down property values.

Public comment was closed.

V. PUBLIC HEARINGS

A. SBA Wireless Communications Tower, Site Plan 15-01 and Conditional Use 15-01

Woodward said this is a proposal to construct a 199 foot self-support tower on parcel #52-02-108-040-00 (AF district) which is currently used for agriculture, and is located just south of the M-28 and Cherry Creek intersection. The tower will accommodate Verizon Wireless antennas and provide space for three additional carriers. A Conditional Use permit is required. There is one setback in question. These are contiguously owned parcels. Taken together, the tower meets the setback requirements from parcel boundaries. However, the setback from the shared parcel boundary between the two parcels is only 128’. Our ordinance states that the tower should be setback 199’ from parcel boundaries. Woodward encouraged the Commission to listen to public comment, and to keep in mind that they are required to assume that public health and safety is adequately safeguarded if the facility meets the FCC regulations on emissions. Access and circulation patterns are good – they are using existing highway access and an easement over an existing path to get to the tower, which is about 500’ from the road.

Sikkema opened the public hearing.

James Dunn, 3120 US Highway M-28 East – he is curious about the coverage area for this tower. The applicant was not present to answer the question. Woodward stated that she had asked the applicant to provide this information but had not received it. During the hearing on the AT&T tower, they stated their tower would cover about 1 ½ to 2 miles.

Deborah Mulcahey, 633 Lakewood Lane – wanted to clarify that this was a separate tower from the one at Silver Creek. Woodward stated it was. She asked why the Township would allow multiple towers, when the original tower owner can be required to install additional equipment for different suppliers. She doesn't feel we should allow additional towers when there are existing towers that used, unless it will provide significant additional coverage.

Terrance and Pavie Donnelly, 910 Highland Drive – their property is located in a dead zone right now and she inquired about the location. Sikkema indicated it was about a mile south of the intersection of US-41, M-28 and Cherry Creek Road. She asked about the tower near Silver Creek Road. Sikkema indicated that tower was approved but has not yet been constructed. Ventura indicated that is an AT&T tower.

Doug Hall, 1181 Ortman Road – he feels that the only concern that some people might have is the continual propagation of these towers – he's concerned about the towers being single server towers and not allowing anyone else to use them. Woodward stated that this tower is being built by SBA, and then leased to Verizon, with room for three other carriers. The tower being constructed on Silver Creek is being built by AT&T, and there is room for other carriers there. Woodward has received a statement from Verizon on the research they conducted to see if the tower on Silver Creek would meet their needs for the customers that they serve, and it was concluded that it wouldn't meet their needs – the antennas are too low on the tower.

Sikkema closed the public hearing.

B. Draft Charter Township of Chocolay Master Plan 2015 Edition

Sikkema opened the public hearing on the Master Plan.

Deborah Mulcahey, 633 Lakewood Lane – she stated that her comments regarding the Master Plan, specifically in regard to rentals, should incorporate any and all comments made in September 2014 to the Planning Commission. She doesn't think the Township Planner or Supervisor sees any problems with short-term rentals. She addressed the condition of roads. Mulcahey strongly suggests that before Chocolay Township looks at putting one penny into future development of roads, that they look at maintaining existing roads. Page 86 of the Draft Master Plan, No. 13 reads, "Preserve road investments. Roads most recently reconstructed or resurfaced will receive a higher priority for capital preventive maintenance, occurring ideally not more than two years after the structural improvement to protect the initial investment." Mulcahey feels this is a negligent road policy. She doesn't think the Township is taking care of existing roads such as Lakewood Lane, which was identified by 112 people as needing improvement in the 2005 survey. She urged caution regarding the creation of public access from Lakewood Lane to Lake Superior from a legal and community perspective. Mulcahey would like to know why Lakewood Lane and lakefront properties have been singled out for use as rentals. If that's what the Township is going to do, they should open up all properties for rentals although she doesn't think it's a good idea because it's not consistent with the preservation of resources. Renters may exceed the capacity of the septic system and there are noise issues to be considered. Owners of rental properties need to educate their tenants on the rules. Mulcahey sees no problem with long term rentals. The

Planning Commission should educate the public with the Master Plan – she feels there are a lot of good ideas in it. Mulcahey urged the Commission to change regulations regarding fences for waterfront properties. In protecting the dunes, there should not be fencing in the dunes. Mulcahey indicated that she can see a lot of work was put into the Master Plan, but we have to be realistic. She read about creating a fire training facility and feels the need is education.

Doug Hall, 1181 Ortman Road – until today, he was not aware of the massive undertaking of updating the Master Plan. He spent a brief time reviewing it and suggested delay of approval. He would like a summary of the changes.

James Dunn, 3120 US Highway M-28 East – he came to the meeting tonight because he was unclear of all the changes. Dunn asked if the Master Plan was basically a guideline as to where the Township is going – are these the rules and regulations that will be in effect. Sikkema indicated that the Master Plan should be taken as the direction that the Township is heading – this is a guidance document. Dunn indicated he would like a written copy to review at the meeting, and also a summary of changes. Woodward indicated that there is a copy at the back of the room, and also one online. Dunn then indicated that one of the things he was concerned about was the number of trailers that can be parked in certain areas, and enforcement of the 90-day rule. How is this monitored? How many are allowed? He feels there are a lot of things in the Master Plan, and would like more time to review. He knows the Commission can't hold up the process for his needs, but he'd like to know more.

Mahaney asked both Hall and Dunn if they were aware or did they take part in the survey that was conducted in 2013 that was available to the residents on the Master Plan. Hall asked if it was online or a hard copy. Woodward indicated that a postcard was sent to all residents, indicating they could either take it online, or they could request a hard copy.

Ventura pointed out that this particular meeting to review the Master Plan has been advertised for at least 63 days, and there have also been several months of notice to the public about the Draft Master Plan hearing.

Bohjanen suggested that the biggest fear of the Master Plan is that it is an enactment. He indicated that what is done first is approve the Master Plan. Using trailers as an example, that issue would be addressed through ordinance changes. That is only one item of business that might come out of the Master Plan. That process would involve a public hearing and writing and rewriting and submission to the Board. If the Master Plan is adopted, it does not mean that all items are settled. The trailer issue is in the planning phase, not the adoption phase.

Hearing no more comments, Sikkema closed the public hearing.

VI. PRESENTATIONS

None

VII. NEW BUSINESS

A. Site Plan Review 15-01 and Conditional Use 15-01, SBA Wireless Communications Tower, PID #52-02-108-0040-00, 6135 US-41 South

Bohjanen indicated that the information that was given about the signal on a cell tower only reaching 1½ miles cannot be true, otherwise there would be no cell service at all. He does not feel that two towers is propagation. In the city, there are many more towers. Bohjanen marvels that he has no cell service at his house, but he can drive 6 hours into rural Honduras,

pack his stuff on a mule, and go 3 more hours into the woods, and get cell service. He referenced rumors that landlines will be discontinued.

Sikkema discussed the difference between allowed wattage in the U.S. of 250 watts due to the FCC rules, versus 2500 watts in other parts of the world. Ventura indicated that 1½ miles may be the area for optimal reception including data downloads, whereas more distant areas may receive lesser quality coverage.

Sikkema mentioned the access easement over the adjacent parcel, and suggested a similar easement on that property to provide for the fall zone (required setback area). This kind of easement would also allow towers to be located on smaller parcels. It would be a low cost solution for the developer. Smith asked if this would be a restricted easement. Sikkema said yes. Ventura indicated that a title search would indicate that such easements were in existence. Smith asked how the Zoning Administrator would know about those restrictive easements for purposes of zoning compliance approval. Ventura said that the applicant for the AT&T tower said that today's towers are built so that they have multiple collapse points that break the falling tower in several places so that a 200 foot tower might fall within a 50 foot square area. Sikkema stated that in order to accept that, it would require a change in the zoning – our Zoning Ordinance requires a fall area. Ventura asked if the fall area has to be equal to the height of the tower. Sikkema indicated it does. So in this case, an easement would solve the problem.

Mahaney asked about exterior lights. Woodward indicated she doesn't yet have the lighting specs for the accessory building, which would need to be submitted before approval of the zoning compliance permit. Woodward indicated that on the AT&T tower there were no lights, not even on the accessory building.

Sikkema brought up that the Conditional Use Permit application appears to be signed by the wrong party – it should be signed by the owner of the property, not by the company putting in the tower. His impression is that if the Conditional Use is given to the people with the tower, you would not be able to hold the property owner accountable. Woodward will get signatures from the property owners who will hold the conditional use permit.

Ventura feels that Woodward has identified all the conditions that are needed – they are similar to the AT&T tower.

Milton felt that any further site plans review should require applicants to indicate zoning districts. Bohjanen questioned what WECS means – Woodward stated that it was Wind Energy Conversion Systems.

Meister doesn't see a problem with this tower, but in the future he would like more information on coverage area and need for more towers. Mahaney indicated that there was a comment from Verizon that they had considered co-location on the AT&T tower, but the tower was too low. If the Township wants to minimize the number of towers in the future, we might have to allow greater height. Sikkema indicated that there is a provision in our ordinance that states the tower has to be the minimum necessary height. Maybe these regulations conflict. Sikkema indicated that in urban areas, there is more co-location because of the difficulty in locating towers. In rural areas it is easier to find tower locations so they don't work together as much.

Moved by Ventura, seconded by Mahaney, that after review of Application SP15-01 Site Plan Review and CU15-01 Conditional Use Permit; and review of the staff report dated 5/8/15; the

site plan for SBA Towers VI LLC and Verizon Wireless Personal Communication LP for wireless communication facilities to be located at 6165 US 41 South, parcel #52-02-108-040-00, as presented at the May 18 public hearing, be approved as presented having met all requirements of the Zoning Ordinance with the following conditions:

1. All exterior lighting shall comply with Zoning Ordinance requirements.
2. In no case shall the entire existing vegetative buffer between the lease premises and adjacent properties or the road right-of-way be completely removed.
3. Permit approval is conditioned upon receipt of certification by a licensed professional verifying that the structural design of all wireless communication facilities will withstand wind speeds and icing under the worst conditions experience in this area.
4. There shall not be displayed on the wireless communication facility advertising or identification of any kind intended to be visible from the ground or other structures, except as required for emergency purposes.
5. The wireless communication facilities shall be kept updated in compliance with all applicable federal, state, county, and local regulations as amended or changed during the life of the facility unless compliance is waived by the controlling agency.
6. The wireless communication facility shall be operated so as not to interfere with radio, television, audio, video, electronic, microwave or other reception in nearby areas.
7. All wireless communication facilities shall be removed by the property owner or lessee within six (6) months of being abandoned by all users.
8. The wireless communication facilities shall not be artificially lighted unless required by the Federal Aviation Administration, and shall be lit according to those minimum requirements.
9. All wireless communication facilities shall be inspected after being constructed and then once every three (3) years for compliance with all ordinance, structural and operational requirements and shall be certified as in compliance by a licensed mechanical, civil, professional engineer or architect, or other professional competent in assessing the structural integrity of such towers, and said certification shall be submitted to the Township.
10. Before a zoning compliance permit is issued, the Township will be in receipt of a letter from the Verizon Engineer indicating that feasible co-location is not available for the coverage area and capacity needs, and explaining why. The letter will also demonstrate a justification for the proposed height of the tower.
11. The wireless communication facility shall meet or exceed the current federal and state regulations.
12. Before a zoning compliance permit is issued, the Township will be in receipt of a legal easement executed on parcel #52-02-108-021-00 of sufficient area to accommodate a 199' radius from the tower which is to be located on the adjacent parcel.

Milton asked if the intent of condition #12 is to prohibit the building of structures within that fall zone, limiting use of the property. Sikkema indicated a building restriction was not required – he intended the easement to identify a fall zone on the property. Ventura thought that the point of the easement was to prohibit development in the potential fall zone. Sikkema stated that is not a condition of the ordinance – the ordinance standard is intended to prevent the tower from falling onto someone else's property. Ventura asked about the purpose of the easement if it's not for public safety. Sikkema said the purpose of the easement is to let future owners of parcel #108-021-00 know about the fall zone executed through the

easement recorded on the deed. Ventura indicated that a new property owner may not be aware of the easement if no mortgage company was involved in a sale and a title search wasn't done. Smith was concerned the Zoning Administrator might not know of the easement encumbrance. Ventura asked for clarification that Sikkema is saying that the purpose of the easement is for notification, not for prescription, since the zoning ordinance does not address a building restriction within the required setback. He doesn't necessarily agree with not having a building restriction in the fall zone, but he will go along with the majority.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

B. Provide Comment on the City of Marquette Community Master Plan

Woodward indicated that the Planning Commission had been sent notice of the availability of the City of Marquette's draft Master Plan for comment. She put together a draft letter of response which highlighted common goals, consistencies in the plans, and opportunities for collaboration in planning and ordinance development.

She also suggested including Sands Township in the jurisdictions identified in the following strategy: "Adjacent Planning and Zoning Changes in the Master Plans and/or zoning maps of Marquette Township, Chocolay Township, and Marquette County should be reviewed by the City ..."

Sikkema asked if a motion was needed. Woodward asked for additional comments or changes to the draft response letter. Bohjanen suggested that the letter be sent as written. The other Planning Commissioners agreed.

VIII. UNFINISHED BUSINESS

A. Adoption of the draft Charter Township of Chocolay Master Plan 2015 Edition

Woodward indicated that the 63 days public comment period is complete. Written comments were received from Alger Delta Cooperative Electric Association, Marquette County, and the UP Food Exchange. They were all positive. The Commission had previously discussed changes offered by Alger Delta regarding their rates, and had decided to incorporate them at the time of final approval. Woodward offered a revised document reflecting those changes. Additionally, the future land use map legends were revised to eliminate the Corridor Residential land use designation since that wasn't included in the final land use plan.

Woodward said the Commission has worked very hard on the plan for the last five years. The current plan was adopted 10 years ago, so there have been a lot of changes since then. The changes are highlighted in Chapter 1 of the plan, including a summary of the progress made toward the recommendations of that plan. The Township conducted a public visioning session in 2010, and public surveys in 2010 and 2013. The Planning Commission and the Township Board have spent many hours discussing the plan chapter by chapter for the last year and a half, with suggested revisions incorporated into the Plan as consensus was achieved on policy and strategy.

In summary, the document is based on a foundation of values relating to things like community character, healthy and liveable community, addressing critical systems, and moving towards a more sustainable and resilient community. Priority decision criteria were created to guide decision making for capital projects. The Master Plan is also meant to be a budgeting and implementation guide for staff, who will provide a progress report every year regarding plan achievements. The plan is also meant to serve as an introduction to new or prospective property owners who can learn about the historic and regional context, and about

the natural systems that make Chocolay such a wonderful place. Chapter 4 addresses community resilience, and contains a profile, risk assessment, and opportunity assessment for each topic of concern such as local government financing, transportation, water and wastewater systems, energy, food, public safety and health, recycling and solid waste management, the economy, recreation, and managed development and growth.

Chapter 5 is basically for residents, addressing resilience in the private sector. This chapter is meant to provide education on how people can be more resilient in their households or businesses. Chapter 6, natural systems, discusses climate change, natural hazards, and sensitive environmental areas.

If you only want to read one chapter of the plan, Chapter 7 is a summary of the data discussed in the rest of the plan. It contains the strategic plan, made up of a future land use plan, zoning plan, and strategies that are organized into administrative tasks, regulatory tasks, and capital projects. Chapter 8 rates all the capital projects of the plan according to the priority decision criteria. The Appendices contain all the maps and reference documents.

The Commission was directed to consider all the comments received and choose one of three actions: adopt the plan by resolution as distributed, adopt the plan by resolution with revisions, or table the plan for adoption at a later date. She also needs to know if the Planning Commission would like to her to respond to the comments received. Woodward suggested that the Commission add the written comments to the Appendices of the Master Plan.

Mahaney said he likes the Alger Delta revisions. Ventura said there is a typo in the sixth "Whereas" that should read 63 day. Bohjanen said he thinks they should move ahead with the document.

Walker indicated that since the resolution was 1½ pages long, it could simply be referenced, with the "Be It Resolved" portion read aloud.

Ventura stated a lot of time has been spent working on this, and it is not an edict – it is a plan / guide, so he verbally offered the resolution, reading aloud from the first "Now Therefore be it Resolved", and specifically noting the acceptance of the changes suggested by Alger Delta, and the inclusion of all written comments in the Appendices, as follows:

**CHARTER TOWNSHIP OF CHOCOLAY
COUNTY OF MARQUETTE, MICHIGAN
RESOLUTION OF ADOPTION
CHARTER TOWNSHIP OF CHOCOLAY MASTER PLAN 2015 EDITION**

WHEREAS the Michigan Planning Enabling Act (MPEA), Act 33 of 2008, as amended, authorizes the Planning Commission to prepare a Master Plan for the use, development, and preservation of all lands in the Township; and

WHEREAS the Charter Township of Chocolay Planning Commission has supervised an update to the Charter Township of Chocolay Comprehensive Plan, adopted on August 4, 2005, to be called the Charter Township of Chocolay Master Plan 2015 Edition; and

WHEREAS citizens were given the opportunity to provide input for the development of the Plan via a public meeting held on September 22, 2010, and through widely distributed public opinion surveys in 2010 and 2013; and

WHEREAS the Charter Township of Chocolay Planning Commission, in preparing this Master Plan, has studied present and future conditions within the Township and neighboring jurisdictions, and has addressed future land use and development, the transportation system and other public

infrastructure and services, natural resources, and future zoning within a framework of community sustainability and resilience; and

WHEREAS the Charter Township of Chocoy Planning Commission and the Charter Township Board of Trustees have reviewed the draft Plan over the course of many meetings and provided comments for its refinement which have been incorporated into the Plan; and

WHEREAS on February 9, 2015, the Charter Township of Chocoy Board of Trustees approved the distribution of the plan to the notice group entities identified in the MPEA for review, and a 63 day public comment period was duly noticed and completed; and

WHEREAS all the required notifications and draft documents were distributed per the requirements of the MPEA; and

WHEREAS the Charter Township of Chocoy Planning Commission has duly reviewed the draft plan consisting of three introductory chapters; resilience analysis for community, private, and natural systems; strategic plan (including future land use and zoning plans); implementation plan; and 22 appendices containing maps and reference documents; and accepts this plan as a guide for development of the Township pursuant to the authority of the MPEA; and

WHEREAS the Charter Township of Chocoy Planning Commission conducted a duly advertised public hearing on May 18, 2015 to receive public comment on this plan; and

WHEREAS a set of Plan amendments were presented at the hearing as a result of public comment; and

WHEREAS Pursuant to MCL125.3843 the Township Board has not asserted by resolution its right to approve or reject the proposed Master Plan and therefore the approval granted herein is the final step for adoption of the plan as provided in MCL 125.3843;

NOW THEREFORE BE IT RESOLVED that the Charter Township of Chocoy Planning Commission does hereby adopt on the date listed below the Charter Township of Chocoy Master Plan 2015 Edition, along with the amendments attached to the minutes of the May 18 public hearing, and does direct the Secretary of the Township Planning Commission to deliver a copy of the adopted Plan to the Township Board and to the County Planning Commission and other notice group entities identified in the MPEA along with this Resolution as certification of the adoption of the Plan;

BE IT ALSO RESOLVED that this Resolution be published inside the back cover of each copy of the Charter Township of Chocoy Master Plan 2015 Edition to certify that all maps, charts and descriptive and explanatory matter therein are a part of the Plan as so signified by the signature of the Chairperson of the Charter Township of Chocoy Planning Commission on this Resolution.

The Master Plan shall be effective as of the date of adoption of this resolution.

The foregoing resolution offered by Planning Commissioner Bruce Ventura
Second offered by Planning Commissioner Dr. Richard Bohjanen

Sikkema indicated that he has reservations about some parts of the plan, but none of those are enacted by this plan. He thinks there are a lot of great things in the plan, and he feels it is very well done. He doesn't support everything in it, but that is no reason for him to vote against it. The plan is a document that will guide the actions of the Township. He doesn't want to hold back the good things in the plan.

Meister indicated that everyone may have some reservations on certain things until the details are worked out, but the overall guidelines are good. Ventura stated that whether they agree or disagree with something today, circumstances may change in the future and revise impressions on how they use the guidance. He is in favor of the plan.

Roll Call Vote:

Ayes: Tom Mahaney, Eric Meister, Andy Smith, Bruce Ventura, Kendell Milton, Dr. Richard Bohjanen, and Andy Sikkema

Nays: none

The Chair declared the resolution adopted on May 18, 2015.

B. Review potential revision of Ordinance #55 related to parking of vehicles and storage of vehicle parts

Woodward stated that she had suggested some simplifications of the previous draft. Revisions were made to Section 4.D pertaining to parking in the front and side yard. It says that you are not supposed to park or store a vehicle in the front or side yard, except that all vehicles will be parked or stored on a driveway (width of driveway not to exceed 40 feet in width - no mandated surface type). Except up to 3 vehicles or trailers can be stored off the continuously connected driveway, as long as they are stored as far away from the property lines as feasible to maximize the open space adjacent to the property lines. The draft suggests that parking cannot exceed 50% of the total area of the front or side yard.

Section 5.C – Provisions of Section 4.D would temporarily be waived for vehicles that are for sale.

Section 7.C –At the last meeting it was discussed that it was okay to use semi-trailers for storage as long as they are substantially screened on the rear of the property.

Bohjanen feels that blight needs to be defined in the ordinance. He does not like Section 4.D very well because his driveway is 75 feet wide, and made out of concrete. He feels there is other ambiguity, such as in Section 4.D.1, "...such vehicles are stored as far from the lot lines as feasible in order to maximize the open area between the lot line and the vehicle." What is feasible? Does not like the standard regarding 50% of the yard – it could eliminate circle drives. On Section D.3.b it says, "If the front and side yard areas are completely screened from view of persons standing on adjoin roadways and the ground level of adjoining properties by a vegetated buffer at least fifty (50) feet wide, vehicles may be parked in locations other than the continuously connected driveway, and in that case, the area of the front or side yard used for parking can exceed fifty (50) percent." He feels 50 feet buffers on either side do not cover very many lots in Chocolay Township. Sikkema indicated that he had taken this to read that if you do have a large lot, and you do have vegetative buffers, then you really don't have to follow anything because it is screened off – it gives you more freedom. Woodward indicated that this would be a waiver of those conditions. Bohjanen indicated that his lot is 150 feet, and there are no requirements for buffers in their subdivision covenants, but there are buffers between most yards by choice, but none of them meet the 50 foot requirement. Sikkema indicated that then you would have to abide by no more than 50% of the yard being used for storage.

Ventura asked if by 50 feet, does it mean 50 feet width or length? Woodward indicated that is the depth. Meister asked if it meant that no more than 50% of your yard can be covered by vehicles. This means that circle drives aren't precluded, as long as the total area doesn't exceed 50% coverage. Smith said his driveway is 120' wide. Woodward indicated that the purpose was to keep someone from parking vehicles over their entire yard – we currently do not have minimum open space requirements for residential property. Woodward indicated that they would probably have to reword the 40 feet in width, so that it doesn't appear that they are trying to control the size of the driveway, just how much of the driveway is used for parking/storage of vehicles. Forty feet would basically allow you to park 4 cars side by side,

based on a typical size parking space. The intent is to try to control the number of vehicles in the front yard. Sikkema said that on a 50' lot, a 40' driveway would take up almost the whole lot. Woodward stated that it could read that vehicles need to be parked on the driveway that is continuously connected, and can't exceed 50% of the front and side yard area (leave out the driveway width). Sikkema said on a large lot, this still might mean many vehicles could be parked. Sikkema said "We're not necessarily trying to restrict the number of licensed vehicles, correct?" Mahaney asked if licensed meant operable. Sikkema restated that it was licensed and operable. Ventura indicated that they are trying to restrict trailers. Meister stated that was in a different section, with a maximum of number of 3 in the front yard. Ventura indicated that it is also a vehicle, so it falls into the rules that are being discussed.

Sikkema asked if there are other things in the Ordinance that would be more restrictive than saying you can't cover more than 50% of your yard. Woodward indicated there was nothing more restrictive than that.

Dick Arnold, 312 West Branch Road, said the old ordinance says no more than three vehicles. Any more than that has to be stored in an enclosed building. Woodward stated that currently you can have no more than 3 inoperable vehicles, but you can have any number of licensed and operable vehicles.

Deborah Mulcahey, 633 Lakewood Lane – asked about the definition of "driveway". At her house, she has a sand path used for driving. Also, the Township considers her front yard the area between the road and the house, but yet she cannot park in her back yard because of the dunes. Also, she has a larger buffer than 50', but if she parked between her house and the road the vehicles could still be seen. The other thing she questions is mobile homes – there are a couple of them on a property that also contains a home on the property. She wondered if they are regulated. Sikkema indicated that in Section 7.B they are regulated. Mulcahey also questioned the 90 days – who will be enforcing this?

Meister indicated that Section 3.L covers the lakefront properties – "properties with rear water frontage may consider the portion of the front and side yards that are at least one-hundred feet distant from the front property line to be a rear yard." Maybe that should apply to any property, not just waterfront properties.

Bohjanen stated that the assignment was to tour the Township and notice the problems. He sees a lot of people that have travel trailers, but very few were parked in an obtrusive way. It would be better to regulate unsightly vehicles or junk. He thinks there are about a dozen problem properties in the Township – most of it looks pretty good. You cannot regulate aesthetics – you can regulate health and safety. In Section 6.A, the lead paragraph states, "...does not constitute a nuisance or annoyance to adjoining property owners..." How can you regulate annoyance?

Doug Hall, 1181 Ortman Road – he has a driveway that leads up to the front of his house, and he is not able to park behind the house. He also has a 30' travel trailer. Sikkema indicated there is nothing in the ordinance that would prevent him from parking there. Sikkema indicated that the issue is that people are sometimes storing 3 or 4 on their property for other people.

Sikkema indicated that the problem occurs when the person with the four trailers is parking them on his neighbor's lot line – they are far away from the property owner's house. Woodward indicated that the draft ordinance addresses this in a couple of ways.

Debra Mulcahey, 633 Lakewood Lane – stated that she did not understand the original thought of this ordinance. One of her concerns is why would we allow someone to have three licensed and operational recreational vehicles or trailers. Sikkema indicated that there are lots of different trailer types. Mulcahey was wondering about travel trailers, and people living in those trailers. Woodward indicated that the zoning ordinance does not allow two dwelling units on the same property. Smith indicated that the current ordinance allows you to park as many trailers as you want as long as they are licensed. Meister doesn't think RV's are much of a problem in the Township.

Sikkema reiterated the things they originally felt needed to be addressed: the use of semi-trailers or storage containers for storage, people that allow relatives to park vehicles on their property, and retired agricultural equipment. He feels they should plan on two or three meetings to resolve this.

Bohjanen asked about Section 6.A which says that if it's less than 14 days, you can have two vehicles that are inoperable, but if it's more than 14 days, you can have three. Woodward explained that if they are temporarily inoperable, but not dismantled, they can be there for 14 days. For long term storage of inoperable without all the parts attached they must be stored in the rear yard, substantially screened. Bohjanen also pointed out on page 6, Section 10, "...regulations create any special or peculiar hardship ..." – he would like to scratch *peculiar* and put *particular*.

The Commission began to review the draft ordinance from the beginning.

Section 2: Purpose – Woodward indicated that this was a total rewrite, relating more to health and safety. Sikkema asked about the portion stating, "...parking on premises where the principal use is other than residential ...". The Commission discussed the determination of the principal use, and whether the rules should differ per zoning district. Woodward indicated that in Section 2, it states, "...These regulations shall not apply to parking on premises where the principle use is other than residential ...", so if it is principally a farm or business, it does not apply. Also, Section 2 and Section 4 say the ordinance applies to all vehicles and vehicle parts upon premises that are primarily used or zoned for residential occupancy.

Sikkema indicated that there are not a lot of people in violation. What they are trying to do is make sure the ordinance is up to date, such as addressing permanent license plates for trailers, and enforcement difficulties are addressed.

The Commission again addressed the ownership issue, but it was considered time consuming and difficult to enforce. Mahaney thinks we should address the ownership issue. Smith doesn't think ownership is an issue of concern – the buffers are more important. Mahaney said lot size matters. Screening was discussed.

Smith moved, Meister seconded, to table discussion on Ordinance #55 to the next meeting.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

Ventura encouraged everyone to focus on the purpose and then work through the details. Sikkema indicated he would like to be prepared to discuss the ordinance up to section 5 for the next meeting.

C. Land Use Classification Table – Discussion

Discussion was tabled. If time allows, this will be discussed at the next meeting. Woodward reiterated the assignment and explained the mixed-use designation.

IX. PUBLIC COMMENT

Deborah Mulcahey, 633 Lakewood Lane – indicated that Sikkema and other members of the Planning Commission had reservations on the Master Plan. When they first moved into the community before 2005, they did a lot of due diligence, and were really surprised to find an automotive repair across the street from them. She feels that the Planning Commission needs to be mindful – there are people raising families here. There may be short term rentals, but just because something is being done now, is not a reason to allow it to continue. Just because something was allowed historically, doesn't make them legal now.

Dick Arnold, 312 West Branch Road – would like to extend an invitation to the Planning Commission to take a look at West Branch Road. There was mention of allowing semi-trailers in the back yard – what will this look like in the Township? It doesn't address how many and how long they can be parked. He thinks it will detract from backyard entertainment of the adjacent property owner. He thinks there should only be allowed one of each kind of trailer, and they should be owned by the resident.

X. COMMISSIONER'S COMMENT

Mahaney – it was nice to hear public comment – whether he agrees or not, it is good to have input from the community. The Master Plan is not perfect, it's a guide – a lot of time has been spent on it. It gives the Township a direction.

Meister – no comment

Smith – appreciates the calendar that Woodward is giving them to know what is happening on different complaints.

Ventura – thanked the audience for rational and well directed comments.

Bohjanen – He feels that the Master Plan is extremely ambitious.

Sikkema – thanked everyone for their work on the Master Plan, with special thanks to Woodward for a good job. Also thanked the audience for their comments.

XI. DIRECTOR'S REPORT

None

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

ADJOURNMENT

Sikkema adjourned the meeting at 9:48 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, June 15, 2015

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:00 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary); Richard Bohjanen (Board), Kendell Milton, Tom Mahaney (arrived at 7:03 pm)

Members Absent: Bruce Ventura

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Suzanne Sundell (Administrative Assistant)

II. MINUTES

May 18, 2015

Motion by Milton, seconded by Bohjanen, to approve the minutes as written.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Bohjanen, seconded Meister, to approve the agenda as amended as follows: addition to VI. Presentations - Land acquisition by the Nature Conservancy and others to be presented by Scott Emerson; addition to VIII.B New Business – Discussion of land acquisition by Nature Conservancy and others; deletion of VI. Presentations – Scott Hamm on Complete Streets.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

None

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

Scott Emerson, 255 West Main Street, spoke regarding a proposed Choccolay Bayou Nature Park. Emerson is here for discussion along with Jerry Maynard, head of the Choccolay Raptor Center, and member of the North Country Trails Association, Trout Unlimited, Ducks Unlimited, and the Nature Conservancy. This parcel was mentioned in the Township Recreation Plan, and is for sale. It is a very unique piece of property that the Nature Conservancy, the UP Land Conservancy, and others are interested in purchasing as a nature preserve and park called the Choccolay Bayou Nature Preserve Park. It's unique is because of its location – it is in the heart of the village of Harvey, in the densest populated area of the Township. It has multiple access points including Main Street, but also the North County Trail / Iron Ore Heritage Trail at Green Bay Street

and the Welcome Center. The parcel can also be accessed from the water trail and Chocolay Marina. Ecologically, it is a very unique area, because it is an ecotone, an interface zone. There is old growth white pine and upland UP forest. There are bog areas with cedar, larch and tag alder. There is also a swampy area, and an open water area at the Chocolay Bayou used on a regular basis by fishermen. Bird watchers frequent this area because of the wide variety of species as documented in an Audubon Society survey.

There is a very interested group including himself, Jerry Maynard, the Nature Conservancy, UP Land Conservancy, Audubon Society, Trout Unlimited, and Planning Commissioner Bruce Ventura, that are trying to put together funds for the purchase of this property. There is significant funding available to purchase the property immediately, if an appraisal can be done. This appraisal needs to be done by appraisers that the funders use, and thus is estimated to cost between \$3,000 and \$4,000. This is a unique opportunity to purchase a 13-14 acre parcel which is environmentally significant and has tremendous public access. He is asking that the Planning Commission and Township Board authorize the use of some discretionary funds to pay for the appraisal. He feels this would be a good investment in the future.

There would be minimal development, although future grants might fund trails such as a bog walk through the different biomes. This land is appurtenant to other established regional recreational facilities such as the DNR Iron Ore Heritage Trail and North Country Trail. He feels it would put Chocolay on the map as an eco-tourism location, and would certainly be beneficial to local businesses. There would be some economic impact.

Maynard indicated that all the organizations that were mentioned support this purchase, and the collaboration should make it easier to get funding. Once the appraisal, which is estimated at \$3,300, is done, then they can move forward with the grant process, but they don't have funding for the appraisal. The Township is not being asked to provide funds for the purchase, or for maintenance, which will be provided by the partner organizations.

Maheney asked about list price – Maynard indicated that it is currently listed at \$195,000, down from \$290,000, and the appraisal is expected to come in lower than that. It is thought that the price might be negotiable, especially if it is used for a park. Emerson pointed out existing trails, the proposed parking area, and different access points. The Welcome Center would also provide parking and pedestrian access.

Sikkema asked who would become the ultimate owner of the property – Maynard indicated that it could be the Township, or possibly the UP Land Conservancy, as this is too small for the Nature Conservancy (although they are very supportive). Sikkema asked if the proposal is for the partner organizations or the Township to own the property. Maynard stated that ideally, because of some grants that favor local government ownership, the Township would own the property. If it was not possible, the UP Land Conservancy could own it. Maynard indicated that there was an upcoming

meeting to discuss these things. Pete Mackin indicated that the County could possibly own the property.

VII. NEW BUSINESS

A. Site Plan Review 15-02 Hendrickson Builders

Woodward stated this is a site plan review for a parcel at 5023 US-41 S, for utilization of an existing building for a conditional use for a contractor shop / yard. There are also plans to expand the building. There are no proposed access changes involved at the site. At this meeting, the Planning Commission will review the site plan. The Commission will review the Conditional Use application on Thursday, June 25. The building conforms to standards as is, and as proposed.

James Hendrickson, prospective buyer, was available for questions. He is a residential builder looking not so much to expand, but to organize. He feels the building is big enough to house 90% of his equipment – it will be more of a contractor's shop than a contractor's yard. Future expansion would include a maintenance and wash bay so he can maintain equipment in house. He would also like to add an office in the future.

Bohjanen asked if there would be customer interface in that building – people coming in to consult on projects. Hendrickson stated that would be his ultimate goal – to meet with the customer in the office, rather than at their homes. He wants to establish a professional business location. Bohjanen indicated that he thought that was a good thing, because that impacts exterior appearances.

Milton inquired if there will be access to toilet facilities during the 12-month renovation. Hendrickson stated he does not have any inside facilities at this point.

Mahaney asked about accessory equipment, such as trailers – would they be parked outside? Hendrickson stated that occasionally small trailers would be parked outside, particularly in the off season, but typically most of the equipment is at the job site. He said there is a buffer between the building and the residential use.

Sikkema inquired who had put up the fences. Lee Blondeau, current owner, responded that the original fences were put up by someone else, and he added another 150' section on the east side recently.

Sikkema asked Hendrickson if he would be using the north and east side for storage of equipment or materials (the sides abutting residential areas). Hendrickson said that would be possible if he had something of value that would only be there temporarily.

Smith asked about the current Conditional Use Permit and how many vehicles are permitted. Blondeau explained that the original conditional use encompassed several parcels, with less intensive use of this parcel. This parcel was used for the storage of trucks and trailers, snow storage, and one row of truck parking. Smith asked if JB Hunt is using it – Blondeau indicated they are not.

Mahaney asked Woodward about a shared driveway. Woodward indicated that the

trucking company would continue to access the highway via an existing easement over this parcel. Mahaney asked if the Dry Dock would need any permission for access. It would not. Blondeau indicated that this parcel was split, with the remaining portion added to the trucking company parcel because it had no street frontage. Sikkema asked about the location of the 30 foot driveway within the easement, and if it's located on this parcel. Blondeau said he and Hendrickson agreed to change the alignment of the easement but it would encompass the existing driveway. Sikkema asked if that was going to happen – Blondeau affirmed.

Sikkema indicated he is concerned with maintaining a good buffer with the residential properties on the north and east sides. He asked if restrictions pertaining to maintenance of the buffer would be a problem. Hendrickson indicated it would not be a problem. Hendrickson suggested it could be restricted for use as employee parking or there could be a height restriction for storage. Sikkema indicated that it is more than visual – construction businesses start early in the morning, so noise could be more of a problem. It might be ok if it isn't used for equipment storage. Hendrickson indicated there is other storage space on the parcel, so he can keep his distance. His operation usually runs from 7 AM until 6 PM, with 90% of work done at the project location. In the winter, they would probably work inside the shop.

Mahaney asked if Hendrickson would be starting the remodel project right away. Hendrickson indicated it would be done this year, before winter. It is all contingent on the sale of the property. It is a simple addition that he'd like to start in the second half of summer, and it won't take too long. Blondeau indicated that Hendrickson is planning on making the building congruent with the design of the existing building.

Meister asked if the lighting would be extinguished at 11 pm – Hendrickson affirmed. Milton asked if a dumpster would be required – Woodward indicated that a dumpster would already be appropriately buffered by the fencing. Sikkema wants the issue of the access easement straightened out. He would also like a condition about the storage of equipment.

Moved by Bohjanen, seconded by Milton, that after review of Application #SP15-02, a site plan review for applicant James R. Hendrickson for parcel #52-02-107-009-00; and staff report dated 6/10/15; the site plan dated May 2015 as contained within the June 15, 2015 Planning Commission packet be approved having met all requirements of the Ordinance with the following conditions:

- 1. The lights on the west façade shall be extinguished between 11 pm and sunrise.*
- 2. The east fence will be finished so that the entire 8' tall façade shall be of solid materials.*
- 3. The driveway easement will be settled.*
- 4. The north and east side of the building will not be used for storage of motorized construction equipment.*

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

B. Discussion on Land Acquisition by Nature Conservancy and others

Bohjanen, both personally and on behalf of the Township, feels that this project would be fitting with a lot of the criteria defined in the Master Plan and the Recreation Plan, with utilization by various ages and groups of people, available money, etc. It would score high according to the priority decision criteria. He feels that it is a prime opportunity. Bohjanen indicated that he was surprised to hear that they preferred that the Township own the property, but he agrees that would be the preferred scenario. He feels if the Township can own and maintain the property within the Recreation Plan it would be ideal, rather than have someone else in control.

Smith asked about the appraisal dollar amount – why is it so high? Maynard indicated that there are only a few people in the Upper Peninsula who can do this level of appraisal which is required for the grant money. The property is zoned R-1. Smith indicated that it must be a more in-depth appraisal. Sikkema asked if there was a residence on the southern parcel. Maynard indicated there was not. Emerson indicated the south parcel would provide access and vehicular parking. Mahaney asked about the terrain. Maynard stated there is a drainage basin between Hotel Place and the bayou that would probably need to have a boardwalk. Mahaney asked about other interest in this property.

Maynard indicated that there are probably some problems with development. The parcel (2.8 acres) fronting Main Street is probably developable but would not have water frontage. The back parcel (11.3 acres) has no street access. The back parcel has all the waterfront property, but has wetland issues.

Smith questioned the odds of obtaining the property if the Township approves payment of the appraisal. The response was that grant money is available, and the grant administrator indicated that this type of purchase would be an ideal use for the money. Mahaney stated that it sounded like the appraisal could get done, but the land could still be sold to someone else. Maynard said that is possible. Sikkema asked Woodward if she knew if it is unusual for the Township to pay for an appraisal on property they don't own, or if anything would prevent them from doing so. Woodward indicated that she did not have any prior experience with a situation like this in the Township.

Meister indicated that he thought it would be great for the Township to have this property, and he felt it was worth the risk of the \$3,300.

Sikkema asked Bohjanen what the Township Board would be looking for in regards to this parcel. Bohjanen indicated they would be looking for a vote of confidence from the Planning Commission and a request for funding.

Sikkema asked if there should be anything in the motion as to the final ownership of the property by the Township. Bohjanen indicated that it could be an item of

discussion by the Board, but until such time a final decision is made, it may be a moot point.

Mahaney asked about the timing of the purchase if the appraisal is completed. Emerson indicated he thought it would be pretty immediate because the money is available and the appraisal is the roadblock. Maynard said he'd like to see it completed this year. There are other possible grant sources, but they typically take a year to process. This money is available almost immediately and it could be topped off with other foundation grants.

Sikkema said he has seen situations in which money passed through the conservancy and then the property was resold to a local agency. But there will need to be an ultimate decision on who will negotiate the purchase and who will be the grantee. Smith asked if there was any way to tie the property up, such as with a purchase agreement, while securing the funding or the grant money. Maynard indicated that this would be discussed at the meeting that the organizations are having on Thursday, June 18.

Mackin indicated that the County is looking for opportunities to expand the County's role in area recreation, which is partially funded by timber sales in the County forest. He would like to discuss this at their next meeting on June 22. Woodward wondered if there would be a joint ownership opportunity, with the County taking care of maintenance. The Township could serve as the fiduciary in the grant process. Emerson asked if the County has funds available. Mackin indicated that the County has staff, which is the biggest asset. He did not know what kind of funds may be available. Emerson indicated that he did not feel there would be a problem of maintenance of the property with available volunteers. Mackin indicated that there also may be some funding available from the KBIC, and mentioned the idea of a Treaty Park since the Chocoday River is the treaty boundary.

Bohjanen moved, and Meister seconded, that the Planning Commission submit a recommendation to the Board for consideration of the Township funding the appraisal costs so the UP Land Conservancy can apply for funds to purchase the two parcels for a nature park.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

VIII. UNFINISHED BUSINESS

A. Review potential revision of Ordinance #55 related to parking of vehicles and storage of vehicle parts

Woodward indicated that the highlighted portions are the changes discussed at the last meeting. (In these minutes, only significant discussion and text changes are documented.)

In the "Purpose" statement, Bohjanen mentioned the need for a definition of blight. The word "blight" only appears in the purpose statement. Bohjanen stated that he

doesn't feel the word "blight" is appropriate when referring to junk cars – he gets blight on his tomatoes, for example. Woodward suggested the word "nuisance". Sikkema asked if a decrease in property value would be covered by a "nuisance". He feels there are two things: (1) a person being able to enjoy their own property, and (2) being able to stabilize their property value. Bohjanen suggested the word "degradation". Woodward looked up the definition of "blight" in regards to land use, and found that in most ordinances, it is defined by a long list of qualifying conditions that constitute blight, not by a simple definition. The Commission decided to change the wording within the purpose statement (eliminating the word "blight") to read "and the improper or inappropriate storage or parking of vehicles can be unsafe, unsanitary, and unsightly, constituting a **degradation of** surrounding properties. In order to prevent such **property degradation** ..."

- A. "Agricultural Vehicle" – Sikkema questioned the definition of motor vehicle or conveyance or parts – would farm implements like a plow be covered by this? Bohjanen felt that the word "conveyance" would cover implements. Sikkema suggested, "... *motor vehicle or conveyance, **implement**, or parts* ...". All agreed.
- C. "Front Yard" – "... the nearest portion of the principle structure". Bohjanen felt this needed clarification, as this portion of the definition also appears in item L and N. Bohjanen stated that if you have an L-shaped structure, such as an attached garage that extends forward, there would be a portion of the property that does not fit into any definition. This could cause confusion. He feels if you just delete "***the nearest portion of***", it would work better. This change will be made in items C, L, and N.
- E. "Main Components Parts" – Sikkema indicated that this would be applicable to only motor vehicles which could be licensed. What about something like a mini-bike that you take the motor out of – it wouldn't cover that, because it is not covered under the Motor Vehicle Code. No changes were made.
- I. "Plow Truck" - Bohjanen had an issue with the portion of the definition that stated, "...from residential premises", as plow trucks could be used for commercial properties, as well. This definition was changed to, "...*used for the sole purpose of removing snow.*" Remove "***from residential premises***".
- L. "Rear Yard" – Remove "...***the nearest portion of***..."
Bohjanen is concerned about properties on the lakeshore which have a house located on the dune with no usable "rear" yard, and whose front yard may not be 100' deep (pertaining to the statement, "*Provided, however, that properties with rear water frontage or front yards greater than one-hundred feet in depth may consider the portion of the front and side yards that are at least one-hundred (100) feet distant from the front property line to be a rear yard.*") It was decided that those who did not qualify under this would still have to follow the front and side yard parking provisions. Woodward pointed out that there are waivers

available from the front and side yard provisions for things related to terrain or topography, but this would not have the effect of allowing inoperable vehicles to be parked in the front or side yard. It was decided this was sufficient.

N. "Side Yard" - Remove "...*the nearest portion of...*"

The Commission discussed Section 4A, dealing with parking of vehicles in the right-of-way. Bohjanen questioned what is allowed per the referenced codes. Abandoned vehicles on highways were discussed. Sikkema said he thought the Township could pass a rule that is more strict than the State law. Sikkema also pointed out that many road right-of-ways are privately owned. The provision as currently written does not specify that the rule applies to inoperable vehicles. Milton said his entire driveway is in the road right-of-way, and Bohjanen said there are many properties like this. Bohjanen is not in favor of the wording in 4A, unless we add the words "unlicensed or inoperable". Sikkema said "unless those are allowed by the referenced codes". The Commission asked Woodward to contact Police Chief Zyburk regarding the content of the codes (what is a permitted vehicle?) and enforcement practices for vehicles parked in the right-of-way, whether licensed, unlicensed, operable, or inoperable.

Section D1 – Bohjanen thinks "open space" is pretty nebulous. Mahaney asked if three RVs could be parked in the front or side yard. The answer was "yes" as currently written. Milton likes a nebulous definition of "driveway". Sikkema didn't think there was much issue with front yard parking. Woodward said the issue is usually how near people are parking to the property line. Bohjanen said he doesn't know if it serves a function, and then said, "Why do people park on driveways and drive on parkways?" The Commission decided to eliminate this provision, and to require instead that vehicles shall not be parked or stored within the required structure setback. Woodward said it's hard to know exactly where the property line is when you're out in the field. Sikkema said the complaining neighbor would identify the property line. Woodward said most people don't know the location of the property line. Bohjanen said the complainer can have a survey if there's a question. Woodward pointed out that the effect would be to tie this ordinance to the zoning ordinance. Sikkema said the zoning setback table could be added to this ordinance. Woodward said she'd prefer that was not done, because then if one ordinance was amended, they would both need to be amended. She prefers to reference the zoning ordinance if the Attorney doesn't think this is a problem. Sikkema said the required setbacks don't necessarily have to be the same.

Section 4D3(b) – delete "**vehicles may be parked in locations other than the continuously connected driveway, and in that case,**".

There was a question about the 50' buffer. Smith felt that if the vehicles are completely screened by a fence, then there is no need to meet structure setbacks. The feeling is out-of-sight, out-of-mind. It was decided to reword the buffer requirement to match that in 7A2, thus – "The area of the front or side yard used for

parking can exceed fifty (50) percent if the front and side yard areas are **at all times substantially screened from the view of persons standing on adjoining roadways and the ground level of adjoining properties by a solid fence or wall meeting all requirements of the Charter Township of Chocolay Zoning Ordinance, or by terrain, landscaping, or other natural barriers of ample height and density so that the vehicles are barely discernable**".

B. Land Use Classification Table – Discussion

Motion by Mahaney, second by Milton, to table item 8B until the next meeting.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IX. PUBLIC COMMENT

Pete Mackin, P.O. Box 904, Chocolay Township, secretary of the County Planning Commission. He is visiting Townships to see everyone in action, and appreciates all the work. He said the County Board unanimously commented that the Chocolay Township Master Plan is a great example and is inspiring. He would like to invite the Urban Land Institute or other larger planning organization for a County-wide event to facilitate more collaboration.

X. COMMISSIONER'S COMMENT

Mahaney said that the latest enforcement activity report indicates that Woodward is busy, especially with junk violations. He would also like to have packets a few days earlier so he would have more time to review them.

XI. DIRECTOR'S REPORT

Woodward informed the Commission about steps that staff is taking to implement the master plan. Strategies are being collaboratively discussed and incorporated into the budget, and progress will be reported in the annual report. She said she will report back on staff comments about priorities.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

None

ADJOURNMENT

Sikkema adjourned the meeting at 9:05 p.m.

Eric Meister

**CHARTER TOWNSHIP OF CHOCOLAY
PLANNING COMMISSION MINUTES
SPECIAL MEETING**

Thursday, June 25, 2015 at 5:30 PM

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 5:30 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Eric Meister (Secretary), Richard Bohjanen (Board), Bruce Ventura, Kendell Milton

Members Absent: Andy Smith (Vice Chair), Tom Mahaney

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator), Suzanne Sundell (Administrative Assistant)

II. MINUTES

None

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

*Motion by Ventura, seconded by Bohjanen, to approve the agenda as corrected (correct day- showing Monday, change to **Thursday**)*

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

Mark Maki, 370 Karen Road – said vacation rentals have not been allowed in the Township since 1977. He handled inquiries from appraisers and realtors about weekly rentals of properties on Lakewood Lane and he consistently told them it was not allowed, and he never issued any permits. Maki said much of Attorney Roger Zappa’s opinion is predicated on the idea that the Township can’t completely prohibit this use in the Township. Maki feels the Township does provide for vacation rentals in the AF zoning district, and at one time, the Township did allow them as a conditional use in the WFR district, which was only in the Shot Point area. In 2008, the Township Planning Commission and Board changed the zoning district on Lakewood Lane to WFR, but the reference to resorts in those districts was deleted. Maki thinks Mr. Zappa should be invited to a future Board discussion to discuss possible enforcement of violations. He thinks that if the Township wants to have resort rentals, there will have to be an amendment to the zoning ordinance. Maki is not in favor of allowing residential resorts on Lakewood Lane. He contacted Marquette Township and the City of Marquette, and said in those communities you cannot rent a house in a residential area by the week because that’s considered commercial.

Maki also commented on the recent decision on the Verizon communication tower. He said Section 13.2.b of the ordinance requires cohabitation instead of a separate tower. There are ways to get around that but based on the minutes he doesn’t think the

Planning Commission addressed the requirements. Also the applicant is supposed to provide documentation regarding the height of their tower but he doesn't think this was addressed or that they provided alternatives. He doesn't feel that approval should have been given until they produced this. He also stated that the lease does not contain the minimum 20 acre lot size in the AF district.

The third item for comment was the Conditional Use for the contractor's yard. He discussed past permitting practices for the Blondeau Trucking operation. He questioned if the building met zoning requirements for height. He feels there should be access management review because there is a change in use from storage building to contractor's yard, and a land division was involved. There is a requirement for site review if these things happen. He hopes that outdoor storage will be addressed.

Maki's fourth topic is the Blondeau land split and the status of the groundwater contamination which could be an issue of concern. He wonders if the rear parking was previously approved. The current application indicates that there are no hazardous materials on site, but the previous application indicated there were, and he thinks this needs to be clarified. He is also concerned about how the Township monitors the groundwater because of the potential for leaking fluids. He does feel that Mr. Hendrickson's business will be a nice asset to the Township.

V. PUBLIC HEARINGS

A. Conditional Use CU15-02, PID 107-009-00, 5023 US-41 South

Woodward indicated that this Conditional Use was for reuse of a building that is currently used for storage, but is part of a previously approved conditional use for a contractor yard. Proposed use is contractor yard and shop with 90% of activity to be contained indoors or performed off-site.

Sikkema asked for comments regarding the Conditional Use permit. As there were none, the Public Hearing was closed.

B. Conditional Use Amendment #80, CU15-03, PID 107-007-20, 5025 US-41 South

Sikkema indicated that this would be a change in the Conditional Use permit previously issued to Lee Blondeau for a contractor yard on land currently partially leased by J.B. Hunt Trucking. The original conditional use was approved with conditions, and these conditions will still be met, however the property boundaries have changed with the sale of a portion of the land for the proposed use in CU15-02.

Sikkema asked for comments regarding this Conditional Use. As there were none, the Public Hearing was closed.

VIII. NEW BUSINESS

A. Conditional Use CU15-02, PID 107-009-00, 5023 US-41 South

Woodward reminded the Planning Commission that they had approved the Site Plan associated with this conditional use at the June 15 meeting. Draft minutes including discussion from that meeting were distributed.

Sikkema indicated that the original permit required maintenance of a 30-foot buffer. During site plan review, storage was allowed on the north and east sides of the building, encroaching on the buffer. The nature of the required buffer was discussed.

The original permit requires the maintenance of a 30-foot buffer, with indicated plants, where the use abuts residential property. Sikkema said if this condition is not renewed in the new conditional use it would be a change. Conditional Use #80 includes, "Approved plantings will be maintained throughout the duration of the permit." Sikkema thinks the intent was that the 30-foot buffer would not be used. He feels the new approval should address this.

Ventura asked Woodward if a buffer is required to be planted, or can it just be an empty space. In other words, does the Township's definition of a buffer require plantings? Woodward said that per Ordinance definitions, a buffer strip is *"a strip of land reserved for plant material, berms, walls, or fencing to serve as a visual and / or sound barrier between properties, often between abutting properties and properties in different zoning districts"*. Woodward said within the commercial district, when a parking lot or outdoor storage area or a conditional use lies within 50 feet of a residential district, a planting screen or fence that interferes with the view is required. This property already meets the screening requirements with the existing fence and trees. Also, the Zoning Ordinance states that within the commercial district, no structure shall be maintained within 30 feet of a residential district. Sikkema asked if Hendrickson planned on building a structure in that area? Hendrickson indicated that he was not planning on building a structure there.

Sikkema asked what would be allowed in the 30-foot buffer strip? The Planning Commission previously approved the site plan with outdoor storage not to include motorized equipment, although not necessarily in the buffer. Woodward indicated there is a limitation on structures there, but she doesn't interpret a limitation on storage, although the Planning Commission can make this a requirement.

Sikkema asked if the intention was that everything in the previous conditional use permit would carry forward. Woodward indicated that would be true for the Blondeau conditional use amendment, however, this is a new conditional use for Hendrickson. Sikkema stated that the Planning Commission would then need to go through and decide on conditions for this new permit.

Sikkema indicated that the previous permit had 12 conditions, some of which may not be applicable anymore. He proceeded to read through the conditions.

1. *Blondeau Trucking maintains a 30 ft. buffer where it abuts residential property. TriMedia will provide Chocolay Township with an "as planted" plan*

showing what was planted and where. Approved plantings will be maintained throughout the duration of the permit.

- 2. That Blondeau Trucking is permitted to keep 25 trucks on site. (Sikkema indicated this is not applicable)*
- 3. Approved hours of operation will be from 5:00 AM to 9:00 PM.*
- 4. That Blondeau Trucking keep Chocolay Township apprised of their correspondence with the DEQ. (Sikkema said this is not applicable)*
- 5. During construction, the applicant should make sure that best management practices are placed onsite. Blondeau Trucking will need to fill out an application with the Marquette Conservation District for their Soil Erosion Control Permit.*
- 6. Blondeau Trucking will provide the Fire Department with a set of plans indicating where utility shut offs are located and where flammable / hazardous materials will be stored. All flammable liquids shall be kept in metal cabinets. Finally, the Fire Chief will tour the facility upon completion.*
- 7. If the Police Department determines that Blondeau Trucking is making too many left-hand turns after 7 AM, Chocolay Township will be allowed to revisit the issue.*
- 8. Once comments are received from the MDOT Corridor Committee, these comments will be reviewed by staff and TriMedia and incorporated into the plans.*
- 9. TriMedia will work with Chocolay Township staff and our Engineering Consultants, Mike Pond from STS to ensure that all Township concerns are met and to work with Mike Pond and our DPW supervisors through this process. (Sikkema thought it probably dealt with drainage from the site)*
- 10. That any lighting shall be designed to reflect light downward and away from adjoining residential properties in accordance with the requirements of Section 500 of the Zoning Ordinance.*
- 11. A zoning compliance permit shall be obtained from the Chocolay Township Zoning Administrator.*
- 12. A zoning compliance permit shall not be issued until all other necessary permits as required by Federal, State, and Local Agencies, are acquired.*

Sikkema asked the Planning Commission if they could see any of the above conditions that should be carried over. Bohjanen felt there should be a change on requirement #6 from “Blondeau Trucking” to “Current occupant”. Meister asked if the permitting process requires the Fire Department to be notified? Woodward indicated this is not required as part of the zoning permit, but could be a County Code requirement, or it might have been something that was recommended by the site plan review consultant. Meister indicated it would make sense for the Fire Department to know where these things are. Hendrickson felt it is a good thing for any business to contact the Fire Department – they would then know what to expect if they were ever called to that site. Sikkema suggested #6 be changed from “Blondeau Trucking” to “Hendrickson Builders”. Ventura indicated that instead of

specific companies, it could be changed to “Owner” so this would not have to be changed again. Everyone agreed.

Sikkema asked about thoughts on Condition #1. Ventura indicated that by looking at the photographs that Woodward provided there appear to be trees inside the fence around three sides of that area, so there is a buffer, which may be more than 30 feet in width. Ventura stated condition #1 could be included with a name change as in #6. Sikkema stated that a buffer is only needed on the east and north sides. Blondeau sought to clarify the buffer requirements – if only 30 feet is involved, it leaves 10 feet on each side of the building (since the building is set back 40 feet). Milton said the “buffer” includes a fence, so he thinks Hendrickson should be able to use the area as he sees fit. Ventura stated that as long as whatever is being stored doesn’t project above the fence height of 8 feet, there should be no problem, unless there were odors. Meister wondered if they can just require the applicant to maintain the current buffer, while including the prohibition on the storage of motorized equipment as approved in site plan review. Sikkema asked if there was any possibility an exhaust system would be added for mill work. Hendrickson indicated that he had only considered venting an HVAC system, but that wouldn’t negatively impact the neighbors. He sees the logic of restricting outdoor storage over 8’ tall because of the fence on both sides. Right now Hendrickson has no plans to use the 30 ft. space, but there may be some future use. He thinks he could use it and keep the peace with the neighbors. .

Sikkema asked if Hendrickson would have a problem with a condition that prohibited noisy exhaust systems on the north and east sides in the buffer area so it doesn’t detract from the neighbor’s property. Hendrickson indicated that the building currently has no heat, and one of the heating systems that he is considering is an infrared heating system, ceiling mounted, with exhaust. Sikkema indicated this was not much noisier than a high efficiency furnace; he’d be more concerned about a dust collection system. Hendrickson said he would agree to not putting any noise producing systems on the north and east sides of the building. Ventura indicated that there are some dust collection systems that sit inside with only a bag outside, so it can be done.

Sikkema asked how #1 should be re-written. Meister indicated you may want to say “Maintain current fence and buffer ...” and then include the noise conditions that Sikkema had suggested. Sikkema asked if something should be in there about not storing motorized equipment on the north and east sides of the building. Meister indicated that this had already been a condition on the Site Plan. Woodward indicated that she had already included this as a condition in the proposed motion.

In the recommended motion, former #6 condition as revised could become proposed condition 2e; former #1 condition as revised could become proposed condition 2f; no storage over 8’ tall can be added at the end of proposed condition 2d; noise and fumes can be addressed in proposed condition 2g. Ventura stated 2g could read “noise, dust and fumes shall be contained on the site”; there is similar wording in the

City of Marquette. Meister asked if they address noise level. Ventura stated you could measure decibels, but he hasn't seen any ordinance that uses this. Milton indicated that you could say anything above "ambient levels". Woodward indicated that she had understood the Commission's intent was to prohibit noise, dust, or fumes from being discharged into the buffer areas. Ventura thought it would be a good idea to preface it by saying these things are environmental hazards, which signifies a level above the ambient or what may be expected. Meister indicated that it's a commercial property, so there are going to be things that make noise. Sikkema indicated that was not the concern he brought up – he was thinking that if you put in a dust collector, you may want to put it on the other side, even if it may look better on the east side. Woodward suggested that the requirement deal with directing noise, dust, and fumes away from the residential area. This was agreeable to the Commission and applicant.

Permitting for things such as vents and dust collectors was discussed, along with other former conditions. Only former conditions 1 and 6 were deemed applicable.

Moved by Bohjanen, seconded by Ventura, that after review of Application #15-02, a conditional use for applicant James R. Hendrickson for parcel #52-02-107-009-90 at 5023 US 41 South; and staff report dated 6/19/15; the conditional use of contractor shop and contractor yard as presented at the June 25, 2015 special meeting be approved having met all requirements of the Ordinance with the following conditions:

1. *The conditional use will be developed according to the site plan dated May 2015 as presented and approved with conditions at the June 15, 2015, Planning Commission meeting.*
2. *Permit approval is conditioned upon satisfaction of all site plan review conditions as follows:*
 - a. *The lights on the west façade shall be extinguished between 11 pm and sunrise.*
 - b. *The east fence will be finished so that the entire 8' tall façade shall be of solid materials.*
 - c. *The Zoning Administrator shall be presented with the legal agreement addressing access for parcel #52-02-107-007-20 and the recording of this agreement with the Marquette County Register of Deeds.*
 - d. *The north and east sides of the building shall not be used for storage of motorized construction equipment.*
3. *Permit approval is also conditioned upon satisfaction of the following:*
 - a. *Outdoor storage on the north and east sides of the building shall be less than 8 ft. in height.*
 - b. *Owner will provide the Fire Department with a set of plans indicating where utility shut offs are located and where flammable / hazardous materials will be stored. All flammable liquids shall be kept in metal cabinets.*
 - c. *Owner maintains a 30 ft. buffer where it abuts residential property.*

d. Noise, dust, and fumes shall be directed away from residential properties.

Vote: Ayes: 5 Nays: 0 MOTION CARRIED

B. Conditional Use amendment #80 CU15-03, PID 107-007-20, 5025 US 41 South

Woodward indicated that a portion of one parcel previously approved as part of this conditional use has been split off. The conditional use would continue as previously approved, but with a slightly smaller land configuration. If the conditional use meets all the original conditions of approval, it should be re-approved.

Bohjanen said that it seemed like it was just a case of tying up loose ends of the revised property description. Ventura said it seems that Blondeau Trucking has met all the conditions of approval as previously discussed, so there is no reason to use the change in property shape as a denial.

Moved by Ventura, seconded by Meister, that after review of Application #CU15-03, an amendment of conditional use #80 for applicant Lee Blondeau for parcel #52-02-107-007-20 at 5025 US-41 South; and staff report dated 6/19/15; the conditional use of contractor yard as approved at the May 12, 2008 meeting, having been found to meet all original and required conditions of approval, be amended with a revised legal description with the following condition:

- 1. Dust will be managed so as not to negatively impact the adjacent residential uses.*

VI. PRESENTATIONS

A. Complete Streets – Scott Ham, Marquette County Health Department, Community Outreach division

Scott Ham, Health Educator at the Marquette County Health Department. One of his responsibilities is fulfilling a “Building Healthy Communities” grant, which is through the Michigan Department of Health and Human Services. One of the goals of the grant is to provide local municipalities with funding for planning new projects that meet the criteria for “Complete Streets”. “Complete Streets” is a movement and concept to include all forms of transportation, especially non-motorized transportation, and to promote projects that might not happen otherwise. It normally includes projects such as sidewalks or widened shoulders to accommodate activities such as biking and walking.

The grant provides \$3,000 per municipality on behalf of the Marquette County Health Department. The money would need to be used for a Complete Streets project such as improving pedestrian access to businesses and residential areas. Mahaney asked if matching funds were needed – Ham indicated they were not. Ventura asked about the time frame for receipt – Ham indicated that this grant cycle expires September 30. Mahaney asked about what other municipalities are planning to do with the money. Ham indicated that Marquette Township already has a Complete Streets ordinance. Their project is to expand access to Northstar Academy so students can walk or bike – they needed some money for the planning process.

Woodward asked if this money could be used for planning a project. Ham said yes – it can be used for engineering, architectural planning, etc. The grant needs to be tied to some type of legislation, ordinance, or plan adopted by the Township, such as a Complete Streets ordinance, resolution to include Complete Streets elements in future projects, or policy/project in the Master Plan. The Health Department would need to have something on paper to show the grant underwriters.

Sikkema indicated that the Master Plan has references to Complete Streets in its transportation section. Ventura asked if the money could be used for planning connectors for pedestrian bike trails, as well as paths alongside streets. Ventura indicated that the Master Plan recommends connecting areas, which are not connected now, with trails. Ham said yes – the purpose is to encourage cardiovascular health, with exercise as part of people’s daily routine.

Sikkema indicated that the Master Plan has identified a number of projects that could be implemented, such as extensions of existing bike trails. He feels the money could help with project planning, if the Township could obtain other funds through such sources as enhancement grants.

Ham indicated that the projects do not need to be completed by September. Once the projects have been identified and a Memorandum of Understanding executed, the funds could be accessed whenever needed.

Sikkema asked Woodward to put this item on the August agenda.

B. Silver Creek Recreation Area planned improvements – Brad Johnson, Chocolate Public Works

Brad Johnson, Department of Public Works Foreman, updated the Planning Commission on happenings at the Silver Creek Recreation Area. Over the last 4 – 5 years, he has been working with Marquette Little League in an effort to get them to utilize the Silver Creek ballfield. With a change in leadership, they are now in a position to use the field. Improvements were needed to bring it up to Little League standards, such as covered dugouts, pitcher’s mound, clay pile around home plate, improved infield and outfield. When Little League came to talk with Johnson in February, Johnson indicated that the Township did not have the money to make the improvements. Little League lined up workers and donations to complete the

necessary changes to accommodate league play and tournaments. They plan to do more work this fall, such as sod, irrigation, gates on the dugouts and field entrances, new backstop, permanent benches in the dugouts – all at no cost to the Township. They will pay for the power necessary for an LED scoreboard, announcement booth, and concession stand. They are also planning on replacing the existing bleachers with 4-tier safety bleachers. Little League is asking for a 10-year agreement with first choice of use. We would then waive the fee.

Other future work at Silver Creek includes the tennis courts –there are 2,435 lineal feet of cracks. Johnson has contacted a couple of contractors about a product called “Crack Armor” for cold climates – a floating fiberglass mesh that lays over the crack and is guaranteed for 5 years. The nearest place that will install this product is based in Minnesota. The cost is about \$49,000 unpainted – including paint it’s \$65,000. Johnson is currently looking at other options for repair.

Johnson indicated that he is considering reconfiguring the current 4 tennis courts to include 2 tennis courts, a full basketball court, and 2 batting cages and 2 bullpens for Little League use. Little League would be willing to pay for the batting cages and bullpens to be used by the District.

There is increased use of the Silver Creek Recreation area for disc golf, soccer, and Little League. Johnson wants to improve the playground in the future with grant money to meet new playground safety standards. With the increased use, improved access (new entrance) and traffic flow is needed. It is a tight area for two way traffic.

Johnson provided the Planning Commission with visuals of the current driveway. The Township owns properties at either end of the park along Silver Creek Road, and has another 66’ utility easement in the middle across from Willow Road. Johnson suggests talking to the landowner to the right of the easement to see if the Township can get a driveway easement through there, as this would also improve access for emergency vehicles. He also suggests rerouting/straightening the driveway and making it a one-way. Johnson would like to eventually add bathrooms near the soccer field – this is near where the AT&T tower will be going in, so there would be some clearing. He also suggests another well be added. He would be doing a prefab outhouse, which would be closed down in the winter. There should be no problem hooking into the sewer. The new well could also be used to supply irrigation to the soccer field. The well that is currently supplying this area is 45 years old and needs to be rehabbed. Johnson also indicated that he would like to add a pavilion to that area.

Smith asked if the landowner had been contacted on the driveway easement. Johnson indicated he had not – he wanted to run the plan by the Planning Commission first before proceeding. Sikkema asked how large the parcels are and if anything is currently on them. Johnson indicated the easement is being used by adjacent property owners as a driveway. Ventura asked about ownership of the sewer easement – Johnson indicated that the person to the right actually owns the

property. Smith asked about the western Township-owned parcel adjacent to Sands Township – Johnson indicated that creating a road through that parcel would disrupt a large portion of the disc golf course.

Johnson also indicated he wants to open a ski trail at the park this winter. The one on Kawbawgam was destroyed with the clear cutting last year.

Sikkema asked if there was anything that was needed from the Planning Commission. Johnson indicated his purpose was to keep them informed and to solicit suggestions from them.

Mahaney asked if additional parking was needed with upgrades to the ballfield. Johnson indicated he would like to create parking on the east parcel adjacent to Silver Creek, and another row near the soccer field. Also, if the road was one-way, it might accommodate angle parking.

Meister asked if this was a priority over Beaver Grove field. Johnson said “yes”, due to the Little League desire to fund park improvements.

Smith asked if the disc golf holes could be moved to another area to accommodate a road. Johnson indicated there is not enough land to do this.

Mahaney said he liked the idea of reducing to two tennis courts and things that would satisfy the demand and be easier on the Township budget.

Johnson said the new surface for the basketball court would be similar to that used on the court at St. Michael’s Church, which has held up well for 10 years. The fenced space for the bullpens and batting cages will probably have indoor / outdoor carpet with a net over the top.

Mahaney asked if there was potential for conflict in use of the ballfield. Johnson indicated that it is too small for softball, so Little League is the ideal use.

Sikkema indicated there are new thoughts on playgrounds, so Johnson may want to look into creative and rustic play areas containing moveable things kids can use to build things. Johnson indicated that he is also looking into things that are low maintenance because of staff time and resources. Sikkema said we should consider what the modern family wants.

Milton asked if the bullpens and batting cages will be open to the public. Johnson indicated they would not be, due to liability issues. The main reason they will be installed is so the League can accommodate district tournaments.

The Planning Commission felt that Johnson is on the right track in going forward with improvements to the Silver Creek Recreation Area.

VII. NEW BUSINESS

- A. Site Plan Review SP15-03 – Dollar General, PID #106-004-00, 4067 US-41 South**
Woodward indicated this is a pretty extensive site plan review on a proposed commercial use for a property that contains a vacant residence. This property is

zoned for commercial only use, and is 1.15 acres. The proposed development meets the required setbacks. The main concern is that the Access Management Overlay District Standards cannot be met on this parcel, and focus should be on improving access conditions through a shared access arrangement or interconnected driveways with adjacent uses. The Commission was provided with the minutes from the meeting where a parking variance was granted. Revised site plans were submitted on day of meeting (July 20). Woodward would like the applicant to point out the site plan changes. The last sheet in the new site plan shows the truck circulation, which had not been shown on the original plans. Woodward pointed out that Lee Blondeau is still the owner of the adjacent property to the south with which a shared access arrangement would be negotiated.

Andrew Rossell, AR Engineering – represents both the seller (Freeman and Halvorson) and the potential buyer (Greg Oleszczuk, President of Midwest V, LLC, the development company), and Scott Knowlton (Midwest's general counsel). Rossell is the civil engineer who prepared the site plans. The plans were recently revised with mostly housekeeping items and are considered to be 95% complete.

The plan is for a Dollar General with a Prototype F footprint, which is 9,100 sq. ft. with a corner entry on the southwest corner. There are 30 spaces for parking along the front and side. As part of the parking variance, they have added 3 banked spaces along the south side in case there is ever a need for more parking. The retention basin is located on the north side of the building. All the storm water will be directed by catch basins into the retention basin. Rossell reviewed the plan for truck circulation. There is no loading dock, only double doors for receiving. In this same area, there is a fully screened dumpster on a concrete pad.

Dollar General's original plan as submitted to MDOT was to have the drive closer to the location of the existing drive. After meeting with MDOT and the Corridor Advisory Committee, Dollar General changed the plans by moving the drive as far south as possible and reducing the width of the drive. Dollar General is still in compliance with MDOT's suggested turn radius. Dollar General is center grading the parking lot so that water flows to the retention basin. There is also a slow release outlet in the structure to the right-of-way. The proposed well is indicated on the site plan with a W in a circle, and they have submitted for a well permit. They plan to tie into the sanitary sewer line. Stormwater will be retained on site with no runoff.

One of the topics at ZBA was snow storage – with the design as is they would be able to push most to the retention basin.

Lee Blondeau, 2001 N. Traci Lane – asked if Dollar General is planning on raising the elevation of the lot. Rossell indicated that the only thing that might be raised is the building pad. Blondeau asked if the retention pond for the overflow would be flowing towards the right-of-way. Rossell indicated that once it would get to a certain elevation it would start flowing into the MDOT right-of-way, into the storm system.

Rossell stated that Dollar General had looked at different options for the drive, such as coming into the store off Corning, but that would present problems with the property owners there, especially with the intermix of traffic. He has had several discussions with MDOT, and as far as he can tell, they are comfortable with the placement of the driveway.

Mahaney asked if MDOT had approved the driveway placement. Rossell indicated that technically MDOT cannot approve it until the site plan has been approved. His feeling is that when it went to the Corridor Advisory Committee, the site plan was "blessed". Woodward indicated that she had received a letter from the Corridor Advisory Group, dated July 16, 2015. The letter read thus, *"Due to the proposed commercial drive proximity to the existing signalized intersection at Silver Creek Road, the group suggests the following: (1) The Developer / Applicant pursues shared / combined access with the property to the south and shows proof of an unsuccessful effort to gain approval, and if Chocolay Township subsequently approves all necessary variances for a site plan with a direct access drive to US-41, it is recommended the two-way-left-turn-lane be converted to have a dedicated left turn lane meeting MDOT standards and storage requirements for northbound US-41 left turns to Silver Creek Road. This will prevent conflicting left turns between southbound US-41 traffic turning to the proposed business and northbound US-41 traffic intending to turn left onto Silver Creek Road. The storage requirements and subsequent markings may or may not leave room for SB left turns into Dollar General. Additionally, MDOT should reevaluate storage needs at the signalized intersection in the event of increased volumes on Silver Creek Road in the future, and make changes to increase storage as needed. There should be no expectation of direct left turns permitted into this site (proposed Dollar General) now or in the future."* Rossell asked if they could obtain a copy of this letter.

Mahaney asked if the shared driveway had been discussed with the adjacent landowner. Rossell said that the real estate broker indicated they made an effort to contact the landowner. In the process, the real estate broker talked with several people, and felt there was issues with the cross parking arrangement to the south, and the use of that drive. Sikkema asked what Rossell meant by "there was an effort made to contact". Does this mean a message was left on a phone or a letter was sent? Rossell said he could contact the broker to find out exactly what type of contact was made. Sikkema asked if any effort had been made after the ZBA meeting. Rossell indicated there had not been, because at that time he felt MDOT had made it pretty clear that they accepted the placement of the driveway. Sikkema explained that MDOT and Chocolay Township will not issue permits until they confer to make sure they are consistent. Rossell indicated that the Dollar General site plan had first gone before the Corridor Advisory group in May. Sikkema said he originated that group, and he used to work for MDOT. He said that almost every business in the Township works off a shared driveway. This is a strategy used in access management to try to minimize the number of driveways, and to make

conditions as safe and convenient as possible for the people of the Township. Sikkema asked what is different about Dollar General that makes it so they cannot make a shared drive work. Rossell explained that Dollar General has over 12,000 stores, and the only way they will share access is if they own it. Dollar General wants the control for liability and maintenance concerns. Sikkema wondered why other businesses (i.e. Holiday Gas Station or McDonald's) would not have those same concerns – what makes Dollar General so unique that they cannot do what everyone else is doing? Mahaney felt that Dollar General should take a look at the Township and see how things are being done here. Knowlton indicated the uniqueness may have to do with the use of the property to the south – Dollar General is a retailer that is being forced to share access with a trucking company. Ventura indicated that there are only 15 trucks, at the most, that would use the access each day – they go out in the morning and come back at night. That is all they are allowed to have, according to the Conditional Use permit they were issued from the Township. Ventura does not see how the truck traffic impacts this site. Knowlton indicated that the use of the trucks is inconsistent with general retail. Sikkema said Gordon Food Service also has a trucking company that uses the same driveway. He indicated those are not good arguments for the Planning Commission to go against their zoning requirements. Ventura stated that the lay of the land is conducive to a shared drive. Smith stated that the trucks are not moving in and out continuously throughout the day. Knowlton indicated it's a tough sell to the company, that this isn't going to change, it's going to be like this forever – the likelihood of Dollar General agreeing is remote. Oleszczuk said they respect the Township's position, and would like to get it done, but they must operate within Dollar General's parameters. They know of situations like this where the truck traffic has damaged the drive. The retail customers are inconvenienced by this, and there would be dangers in the winter associated with incompatible use. He can't control what happens on the adjacent property. A future use may be even more incompatible. That's why Dollar General does not allow shared access, unless it is under the most extreme conditions. Ventura said he feels this is an extreme condition, due to the volume of traffic on US-41, with the intersection being 130 feet away from the proposed driveway, and a left turn across two lanes of traffic. Overlay district parameters take precedence over having a direct driveway that close to an intersection. This is why the overlay district was created – for the safety of the people using the highway and the safety of the community, not for the convenience of a store. Sikkema indicated it would be hard for the Planning Commission to approve, as this driveway is going to be nearly 200 feet short of the requirement, and at a busy intersection. Dollar General is going to be located on a highway with lots of truck traffic – but they can't make that work in the driveway? Sikkema feels there should be an attempt made – this is a great addition to the Township, and he doesn't want to see it go away, but he doesn't feel that the Township should give up its principles and standards of the Ordinance. He knows of other companies who have changed their thought process, such as Holiday Gas Station. Ventura said those

businesses are busier than ever. Knowlton stated that he agreed there is value to a shared driveway, and he doesn't feel that the Township should throw away its values, but the reality is that if the shared drive is required the deal probably goes away. Sikkema said he'd hate to see that, but he can't say that's ok. The development would support the community greatly, but he does not feel that Dollar General has an open mind in being a good community partner. Ventura said they want people to get in and out of the property safely.

Knowlton indicated that they'll work on it, but the reality is that Dollar General is going to ask for restrictions on the use of Blondeau's property for perpetuity. Sikkema said shared driveways are standard now. Oleszczuk said the Planning Commission has every right to feel that way, but they haven't pursued this option to a large degree because of Dollar General's restrictions. Shared access makes it very restrictive for both parties. Sikkema stated that he did not want it to seem that the Planning Commission or Township is anti-business or anti-Dollar General. Knowlton stated that he did not want the Township to view Dollar General as anti-safety or anti-community, but it is company protocol. Meister indicated that he feels a shared driveway would be beneficial for Dollar General – in a recent driving experience involving this location, the traffic conditions would not have allowed him to turn into the existing driveway to the proposed site – he would either have had to turn around or keep on going and get what he needed at Snyder Drug. Sikkema indicated that the proposed driveway, if approved at all, would have to be a right in, right out driveway – there would be no left turns in or out according to MDOT.

Rossell indicated that they had already explored all those options and thought they had MDOT support of a modified plan. He said the gas station to the north has 3 curb cuts, the trucking company has their access and the restaurant to the south has their own access – maybe further south there is more shared access, but not in this particular area. Sikkema indicated those were all constructed before Access Management Zoning was implemented. In this case, the opportunity is there, and he would hope that Blondeau would be cooperative in working this out. Rossell indicated they will be sure to get Blondeau's number before they leave.

Ventura said that a simple connection could be created in the southeast corner of the parking lot, where there are banked parking spots, to an area not even used by the trucks but by the residential builder who has proposed to locate there. Rossell said the driveway would have to be as close as possible to the highway for their semi truck to maneuver. Ventura asked him to consider that if there was a driveway in the southeast corner, they would be able to back the truck right in without having to do a double back and forth – it would be a simpler maneuver than what is proposed.

Oleszczuk indicated that any plan has to be brought before the tenant and the tenant's legal team must agree with it. Dollar General will not even consider the property if there is a chance that a larger retailer or competitor will go into a property associated with it. This would limit an adjacent property owner. He said Rossell put

together a workable plan with MDOT. Sikkema indicated that MDOT permits driveways – local governments manage access.

Woodward asked about the access for the Dollar General in Negaunee – Knowlton indicated that they do have their own access, but they have barriers against cross access.

Bohjanen said there were concerns about the trucking business and the number of left turns and the potential hazard, and a limitation was placed on the number of turns, and there was the option to revisit the use in the future if there were problems. Now the proposed shared driveway would have the usual trucking flow, plus that for Hendrickson Builders, plus all of Dollar General's traffic. Limiting left turns might be helpful for access concerns, but limiting left turns may not be so good for Dollar General, but that's their problem. He feels the safety issue is more encompassing than Dollar General and their patrons, it impacts the general public that is passing by at the same time, as well. Sikkema agreed – if there are people waiting to make a left turn on Silver Creek you may create a shield situation where people have to guess if they can safely get out of the parking lot. These are things that you try to limit with driveway spacing.

Knowlton indicated that he will work with Blondeau and Dollar General. He wondered what happens if they are not able to reach an agreement. Sikkema said that MDOT would then become involved – they would notify the Township and the Corridor Group that they were modifying the pavement markings to make an exclusive left hand turn onto Silver Creek Road, which would not allow people to make a left hand turn into Dollar General. Sikkema indicated that you would still be able to make the left into the potential shared driveway.

Sikkema asked about sales per hour – Rossell indicated that their peak hour traffic is 11-12 cars per hour. Knowlton asked if the Planning Commission would consider granting approval with a condition of shared access. This would make them feel more comfortable knowing that they were down to the last issue.

The potential motions provided by Woodward were discussed. Woodward reminded the Commission that written documentation of the findings is required by the Access Management Standards. Bohjanen asked about 3 of the required parking spaces that are within the 50' setback from the right-of-way. Knowlton indicated that shared access may change parking layout. Oleszczuk said that they would like to have all letters of documentation that are available, noting they had not received the MDOT letter. Woodward said it was all available online last week, but she would give them a copy of the packet materials. Sikkema asked if the plan would need to go back to the Planning Commission if there was a significant change in the parking. Woodward stated that if there is a need for a waiver from standards, they would need to come back for final approval. This could serve as preliminary approval. Parking layout was further discussed. Sikkema indicated they would write the motion to include up to 6 or 8 spaces within 50 feet of the right-of-way for the misplaced parking.

Woodward asked how the potential parking and access change would impact snow storage. Rossell indicated it could be pushed to the retention basin. He feels they will probably be hauling some out anyway.

Mahaney asked about the photo that was provided of a Dollar General store with the storage of shopping carts outside. The applicant indicated that was not necessary. Meister said he had noticed on the landscaping plan that some of the plants were for Zone 5, and the survival rate would not be good for those plants. Mahaney asked about the outside lighting. Woodward indicated that they would need to submit the required specs before they got their Zoning Compliance Permit. Woodward asked the applicant about the security lights that were indicated on the elevation plans, but not listed on the photometric plan. Rossell indicated that the security lights are not included – they are using only wall packs.

Moved by Sikkema, seconded by Ventura, that after review of Application #SP15-03, a site plan review for Midwest V, LLC for parcel #52-02-106-044-00, 4067 U.S. 41 South; and staff report dated 7/13/15; and the site plan dated 7/20/15, that the development as proposed be approved with the following conditions:

1. *Developer must successfully negotiate shared use driveway with the adjacent property owner south of the proposed development for the following reasons:*
 - a. *The access to the site does not meet the requirements of Sections 5.3R3) and 5.3R7);*
 - b. *The Ordinance in Sections 5.3R8) and 5.3R9a) authorizes the requirement of a shared driveway or service drives as the only option when direct access consistent with the referenced standards cannot be achieved;*
 - c. *The Ordinance in Sections 5.3R11) requires that “Where a proposed parking lot is adjacent to an existing parking lot of similar use, there shall be a vehicular connection between the two parking lots where physically feasible”, and applicant has not supplied such connection or submitted evidence that such a connection is not physically feasible;*
 - d. *The applicant has submitted no evidence that adjacent development renders adherence to these standards economically unfeasible or that there is no other reasonable access due to topographic or other considerations, or that the standards have been applied to the maximum extent feasible to justify a waiver per Section 5.3T;*
 - e. *The US-41 / M-28 Corridor Advisory Team advises that the developer / applicant should pursue shared / combined access rather than direct access to US-41;*
 - f. *The Planning Commission believes that the absence of shared access or property interconnections poses a likely negative impact to the safety of vehicular traffic; and shared access and property interconnections would result in improvements that are more closely aligned with the goals of Section 5.3.*
2. *Approval is conditioned upon MDOT approval;*

3. *The signage and lighting will meet all requirements of the Chocolay Township Zoning Ordinance, with additional information as needed being submitted to the Zoning Administrator and necessary permits obtained;*
4. *No more than six (6) parking spaces can be constructed within the 50 foot right-of-way setback requirements per Section 5.3Q3) at the northwest corner of development.*

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

B. Preliminary concept meeting on potential development of parcels #114-003-00, #114-001-00, #114-001-10, and #114-001-20 as a retirement community / RV park – Paul Smith

Woodward indicated that Paul Smith has approached her several times with his desire to build a seasonal housing development for people 55 and older, possibly with an RV park as well. During their conversations, Woodward and P. Smith had discussed several options for development. Today she was notified that P. Smith had sold a portion of the 160 acre parcel south of the Chocolay River to someone else, essentially creating a land division. Woodward is currently researching this to see if this was a legal split or not, and to determine how it will affect the buildability of the parcels. Woodward said P. Smith seems to prefer the option of developing the parcel as a mobile home park, which would require rezoning to multi-family residential. She asked P. Smith to come to the Planning Commission to get input on the preferred mechanism to pursue in association with this development plan. The only option that wouldn't require a rezoning is the Rural Cluster Subdivision. All other options that she included in the staff report would require a rezoning.

Sikkema asked for clarification of the existing zoning district and permitted uses. Woodward said the parcel is in the AF district, which allows a rural cluster development subdivision as a conditional use. Woodward was not certain how many units he could build with that option, as he would have to subtract the area used for roads and wetland areas. If the entire 240 acres made up of 4 parcels was developable, he would need to preserve 120 acres in perpetuity for non-development, and could probably get about 54 units on the other 120 acres, which is a density of 2.2 acres per unit. These could be developed on smaller lots with Health Department approval. Regarding other options, Planned Unit Developments are not allowed in the AF district. Right now the multi-family residential district is scattered across the Township similar to spot zones. It would not be unreasonable, based on current land use configuration, to rezone these parcels to a mobile home park. Mobile home parks also need to go through State licensing procedures.

A. Smith indicated that he did not know for sure how much of the land is developable, as approximately 140 acres are wetlands. Sikkema indicated that a Rural Cluster Development would allow you to put a higher density on the developable acres. The Commission asked Woodward for clarification of the calculations related to Rural Cluster Development Subdivisions. Wetlands can be used as part of the reserved open space, but are subtracted during the calculation

for allowed number of units.

Woodward asked P. Smith how many units he envisioned building. P. Smith indicated that he had not really established a number. He figures he could get approximately 120 lots for RV's in the high ground. Sikkema asked if P. Smith was looking more at doing something with RV's. P. Smith indicated he would like to do RV's and modular homes. He would like to be able to offer the homes for under \$100,000. He would also like to be able to offer overnight parking for RV's. Meister asked if P. Smith would be offering units for people to live year round. P. Smith indicated that would be an option. Sikkema asked P. Smith what he is referring to when he is talking about "modular" homes, as there is a distinction between a modular home and a double-wide trailer trailer – the trailers would be licensed. P. Smith indicated he was looking at modular homes – he will have a sample by the end of the month, as one is being built right now.

Mahaney asked if P. Smith specifically wanted a mobile home park. P. Smith indicated that he wants to have modulars on the first ½ mile, and RV parking on the second ½ mile. Mahaney asked if people would be able to leave their RV there year round. P. Smith indicated they would be able to do this. Mahaney asked if there was access to the golf course. P. Smith indicated there was. His plan is to keep the area private as a retirement community. Meister asked if P. Smith was planning on putting in some type of buffer between the golf course homes and the RV park. P. Smith indicated he was planning on a buffer of 700'.

Sikkema asked if P. Smith had talked with the golf course about the proposal. P. Smith indicated he had sent some letters, but has not received answers yet.

Sikkema restated what he feels that P. Smith is proposing – permanent homes and then more of a transient / resort area. Meister asked if campgrounds are allowed in the AF district. Sikkema indicated that campgrounds are allowed in the AF district with a Conditional Use permit. Sikkema asked P. Smith if he envisioned having more than 48 modular homes. P. Smith didn't think so – he wants to put 2 modular homes per acre – something like they have at The Bluffs in Gladstone. Milton asked if one well would service more than one house. P. Smith responded it would. Mahaney asked if people can stay one or two nights, as well as staying year round. P. Smith responded that there are a lot of people who travel around and live in their RV. He feels that people in the south, such as Texas, would like to be up here in the summer months, rather than fighting the extreme temperatures there. P. Smith also feels like there are plenty of activities to offer, such as access to golf and RV trails.

Sikkema clarified with Woodward that the area allowed for RVs would be a permitted Conditional Use, but then the other parcel phase would be residential homes. Woodward agreed. Sikkema then asked that if something is zoned WFR, would they need to connect to the waterfront. Woodward indicated that they currently would not have to be waterfront property to be in the WFR district. Sikkema asked what the adjacent golf course is zoned. Woodward indicated that the parcels around the golf

course are currently zoned R1. Sikkema indicated a preference for rezoning to R1 zoning like the adjacent parcels, which has a 25,000 sq. ft. minimum lot size. Woodward indicated that if it was rezoned to R1, P. Smith could do a PUD incorporating both the RV park and homes. Sikkema indicated that the problem would be that he has to have access to a public road at the front. Sikkema also stated that if it was zoned R1, P. Smith could do a site condominium with a master deed – he could do what he wants to do on a private road.

Sikkema asked P. Smith if he was familiar with site condominiums. There is a master deed, and each lot is a sub-deed. Each person owns their lot, but it is attached to the master deed. It stays as one parcel. P. Smith indicated that they wanted to keep access to age 55 and older, and Sikkema indicated that would be possible. P. Smith also stated that he wants to retain property control. Sikkema indicated that was also up to the time that a Homeowner's Association would manage it. P. Smith indicated that he wants to keep property control so that it will be kept as a retirement village without children.

The Commission discussed rezoning a portion of the parcel to R-1 and retaining the remainder in AF as needed to accommodate the various uses. Meister asked if P. Smith was planning on selling or renting the lots for the modular homes.

Sikkema indicated to P. Smith that he feels there are some options to accommodate the development. He feels it is a good way to keep the senior population in the Township. It would give snowbirds another option for maintenance free living.

Sikkema asked about access – would it all go through the easement at the golf course? P. Smith indicated that his parcels also connect to BU Road, which is a seasonal County road. He does not want people to be able to come in one road and drive out the other. He does not want a gated community, but he also does not want through traffic.

Sikkema asked what P. Smith was looking for from the Planning Commission. P. Smith stated he does not want to put any more money towards the project if it's not something wanted in the Township.

Meister indicated he thought it was a good idea, and that it works with the Master Plan. Mahaney thinks it's a great idea. A. Smith thinks it's a great idea. Ventura stated there could be water concerns, but does think it would be a good idea. Ventura indicated that if P. Smith decided to go with the site condominium, there is an expert in Marquette that deals with this type of development. P. Smith indicated he wanted to stay with modular homes. Woodward pointed out that the term "site condominiums" makes it sound like you are building condominiums, but the term refers to the mechanism for development.

P. Smith indicated he wanted it to be like the development in Gladstone. That development was discussed. Sikkema asked if multiple zoning districts are allowed on one parcel. Woodward indicated there currently parcels with multiple zoning

districts.

Milton expressed concern was that the Health Department may determine there needs to be an operator for the wells. This was discussed.

Bohjanen indicated he thought it was doable, and that the nuances needed to be decided by P. Smith. Sikkema said depending on where he wants to put the various elements, that would decide the best zoning district to accommodate it. Mahaney said it's a good use of the property.

Woodward indicated that what she heard the Planning Commission tell P. Smith is that some of the land could be rezoned to R1 and some could stay as AF – this will drive the types of decisions that he will be able to make. P. Smith indicated that he will continue looking at his options for how to go forward on this project.

VIII. UNFINISHED BUSINESS

A. Review potential revisions of Ordinance #55 related to parking of vehicles and storage of vehicle parts.

Woodward indicated that she highlighted the changes she made in the ordinance based on what was decided at the last meeting. She had also researched State law regarding parking in the right-of-way. The police only deal with vehicles parked on the paved portion of the right-of-way in most cases, unless there's a clear vision issue. The applicable standards from the Michigan Vehicle Code and the Uniform Traffic Code were provided. She feels that if the Commission wants to regulate parking on the unpaved portion of the right-of-way, they would be able to. Basically, State regulations don't prohibit this.

Sikkema indicated that from his past experience, those two codes only deal with the improved portion of the roadway, such as shoulders and travel lanes, and possibly a ditch. If a complaint is received about a vehicle in the right-of-way, the local planner notifies the County Road Commission or MDOT, and the road agency directs the police to address it. The police then direct the citizen to remove the vehicle. In his experience the only thing he ever found that could be utilized in the unimproved portion of the right-of-way relates to litter – if people were parking junk on the right-of-way, the State Police would possibly issue a ticket for litter. The Commission decided not to change Section 4A.

Bohjanen questioned the wording of Section 4.D.1, "*Vehicles shall not be parked or stored within the required zoning ordinance setback for structures*", as to clarity. This was changed to read, "*Vehicles shall not be parked or stored within the required zoning ordinance setback for structures **and the property lines.***"

Bohjanen does not like the idea of putting a number on the quantity of trailers allowed in the front or side yard. After discussion, no change was made.

Section 7.C was changed to read, "*Semitrailers and similar types of vehicles, **or containers designed to be carried on those vehicles,...***"

Moved by Ventura, seconded by Bohjanen, that after review of the potential revisions made to Ordinance #55 Vehicle and Trailer Parking and Storage, that a Public Hearing be scheduled for the August meeting.

Vote: Ayes: 7 Nays: 0 MOTION CARRIED

B. Land Use Classification Table – Discussion

Woodward asked if anyone had done their follow up on the item. She also indicated that if they wanted, they could submit their input to her for compilation of the final results. Woodward would especially like to have the Planning Commission go over the uses for the AF district. A citizen had planned on being at this meeting to discuss a use that is not currently designated in the ordinance that relates to agri-tourism – such as using a farm structure for weddings.

Sikkema questioned changing zoning classifications. Meister thought it was important to address recommended changes along the corridor relating to mixed-use. Woodward explained that she has not suggested changing all zoning classifications – most of the districts in the draft matrix relate to current zoning districts, just with a different name that relates to the future land use areas of the master plan. For example, the RW (Residential Waterfront) is equivalent to the current WFR, RV (Residential Village) is equivalent to the current R2, RN (Residential Neighborhood) is equivalent to the current R1, RR (Rural Residential) was discussed as a separate Rural Residential category for some smaller parcels in the AF district, AF is unchanged, etc. Sikkema sees no reason for change. Woodward indicated that the most important thing about this exercise is thinking of the different uses and where they fit into the Township – some of the uses are not covered by the current ordinance. Mahaney asked what was being accomplished by doing this. Woodward explained that they are accomplishing clarity – so that citizens can better determine what is allowed. Bohjanen stated that he would like some clarification on a statement made by a previous Zoning Administrator to the effect of, “if something isn’t listed as permitted, it is prohibited”. He feels it would be close to impossible to address every possible use. He feels that this is what this exercise is to accomplish.

Bohjanen suggested that maybe it is time to go through each district and find out if any of the uses need to be different. Bohjanen would like to review the Zoning Ordinance one zoning district per month until done. Sikkema asked what should be worked on first. Meister suggested the Commercial district. Smith suggested the R2 district out by Foster Creek. Sikkema indicated that these were both very specific things. Ventura indicated that he would like to look at the corridor area. Milton would like to go one district at a time – one each month. Sikkema indicated that what Woodward has is a broader view. Ventura suggested that the Planning Commission look at one district per month, and then go to the complete matrix that Woodward has laid out. To go through the whole matrix at one time tends to be overwhelming. By doing one at a time, it may take a while, but it will be easier.

Sikkema suggested that at the next meeting they focus on commercial and industrial district uses. The amendment process was discussed. Woodward clarified with Ventura that he was suggesting to consider current uses in the commercial and industrial districts, and compare to the list of other uses that are possible and see if changes are needed. Woodward asked the Planning Commission to keep their copy of the matrix.

IX. PUBLIC COMMENT

Pete Mackin – wanted to update the Planning Commission on the status of the County helping with the project to acquire the land on Chocolay Bayou for a nature park. They will not be able to help with the project as he had hoped.

X. COMMISSIONER’S COMMENT

Mahaney was pleased to see there may be some potential development. Milton was glad to see that someone wanted to give us money. Bohjanen indicated to the Commission that the Board did approve the payment for the appraisal of the Bayou property to facilitate the acquisition.

XI. DIRECTOR’S REPORT

Sikkema asked if there was a way that Woodward would be able to date the report as to when the violations occurred – Woodward indicated that she highlighted the newest but the highlighting did not show up very well.

XII. INFORMATIONAL ITEMS AND CORRESPONDENCE

None

ADJOURNMENT

Sikkema adjourned the meeting at 10:24 p.m.

Submitted by:

Planning Commission Secretary
Eric Meister

CHARTER TOWNSHIP OF CHOCOLAY PLANNING COMMISSION MINUTES

Monday, August 17, 2015

I. MEETING CALLED TO ORDER BY: Andy Sikkema at 7:02 p.m.

ROLL CALL

Members Present: Andy Sikkema (Chair), Andy Smith (Vice Chair), Eric Meister (Secretary), Richard Bohjanen (Board), Tom Mahaney (arrived at 7:22 pm), Bruce Ventura, Kendell Milton

Staff Present: Kelly Drake Woodward (Planning Director/Zoning Administrator)

II. MINUTES

July 20, 2015

Moved by Ventura, seconded by Bohjanen, to approve the minutes as corrected – page 3, 4th paragraph, change “The is increased use” to “There is increased use”. Ventura commented the minutes were very thoroughly done and reflect all discussion items.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

III. ADDITIONAL AGENDA ITEMS / APPROVAL OF AGENDA

Motion by Meister, seconded by Milton, to approve the agenda as written.

Vote: Ayes: 6 Nays: 0 MOTION CARRIED

IV. PUBLIC COMMENT

None

V. PUBLIC HEARINGS

None

VI. PRESENTATIONS

None

VII. NEW BUSINESS

A. Site Plan Review SP15-04 – Alder Storage, PID #121-071-15, 6590 US-41 S

Woodward said this is a site plan review for an expansion to a mini-storage facility. The development, consisting of two buildings with access from S. Big Creek Rd, was first approved in 2000. Those two buildings were constructed with alterations, including a change in access location to US-41. In 2007, the conditional use was modified to include two additional buildings; however, only building #3 was constructed at that time. The applicant now wishes to build the previously approved building #4, however, the site plan is now expired. The applicant has not proposed any changes to the original site plan or conditions for approval. However, based on site measurements collected during an inspection, Woodward does not believe the original site plan can be achieved while maintaining the required 100' setback from the small waterbody. She addressed this concern in the suggested motion, along with the previously approved condition requiring a 20' separation distance between buildings #3 and #4.

Woodward presented the staff analysis comparing the development to zoning standards. Other concerns, besides waterfront setback and building separation, include traffic circulation (particularly using an informal dirt path around building #3 in the buffer area), retaining or extending existing buffer areas, outside lighting, and a requirement to obtain a County Soil Erosion permit before the Zoning Compliance Permit is issued.

Sikkema addressed the 30' buffer from the original approval. He doesn't believe the language indicates that the entire 30' width is required to be maintained as a vegetated buffer; he thinks a road could be located within that buffer area, but not a building.

Milton asked for clarification on a mention of building #5. This was a mistake in the application – the application is for only one additional building, for a total of 4.

Bohjanen said that if the applicant rotated building #4 by 90 degrees, it would comply with all spatial requirements. Woodward's measurements were discussed.

Ventura asked if the waterbody is a natural or man-made feature. Woodward said that the previous decision body made an interpretation that it was a waterbody as defined in the Ordinance, and therefore subject to the 100' waterfront setback requirement, and said she felt consistency was important. Ventura said he does not consider this man-made feature to be subject to the waterfront setback provisions, and he suggested the applicant could revise the dimensions of the pond to achieve the required setback. Bohjanen said the point was well-taken, and the placement of the building would not adversely impact the pond. Sikkema said he felt the proposed building location would result in a lesser disturbance to the natural area, and Milton said it would result in less pavement as well. Vegetation and topography were discussed. Sikkema asked if the Planning Commission is allowed to modify the 100' setback requirement – Woodward said her opinion is that the Zoning Board of Appeals would have to grant a variance from that requirement. Ventura asked about the mean high water mark of the pond. Meister agrees it's unfortunate, because the extra 6' separation isn't going to make a difference for the pond/borrow pit.

Sikkema discussed the suggestion that the existing lights should be shielded. He asked for comments on the suggested motion. Meister suggested changing condition #1C to say "Revisions to include a **change in building dimension** sufficient to preserve a minimum of 100' setback from the water's edge ...".

The Commission decided not to address the informal dirt drive that is within the 30' buffer area in the conditions for approval.

The remaining recommended conditions were accepted, with a change to #4 to read, "The 6' tall fencing and required plants as approved in the 2007 plan shall be extended as far south as necessary to **substantially screen** the new structure from the residential area."

A motion was made as below. During discussion, the Planning Commission decided to add an additional option in item #1, that the applicant can seek a variance for the 100' waterfront setback requirement from the Zoning Board of Appeals. The Planning Commission also added the words "licensed surveyor **or engineer**" in #1.
